Pachycholia (*pak-e-ko'-le-ah*) [παχύς, thick; χολή, bile]. An inspissated condition of the bile.

Pachychymia (*pak-e-ki'-me-ah*) [παχύς, thick; χυμός, juice]. Increased concentration of the bodily fluids.

Pachydactyl (*pak-e-dak'-til*) [παχύς, thick; δάκτυλος, finger]. A thick digit.

Pachydactylous (*pak-e-dak'-til-us*) [παχύς, thick; δάκτυλος, finger]. Having thick fingers.

Pachyderm (*pak'-e-derm*) [παχύς, thick; δέρμα, skin]. Thick-skinned.

Pachydermal (*pak-e-der'-mal*) [παχύς, thick; δέρμα, skin]. Same as *Pachyderm*.

Pachydermatocele (*pak-e-der-mat'-o-sēl*) [παχύς, thick; δέρμα, skin; κήλη, hernia]. A tumor due to thickening of the skin. The term is applied to *Elephantiasis arabum*, and to the condition of the skin in *Dermatolysis*.

Pachydermatoid (*pak-e-der'-mat-oid*) [παχύς, thick; δέρμα, skin; εἶδος, like]. Somewhat thick-skinned.

Pachydermatous (*pak-e-der'-mat-us*) [παχύς, thick; δέρμα, skin]. Thick-skinned.

Pachydermia (*pak-e-der'-me-ah*) [παχύς, thick; δέρμα, skin]. See *Elephantiasis arabum*. **P. lactiflua,** elephantiasis complicated with lymphorrhea. **P. laryngis,** extensive thickening and induration of the mucosa of the larynx. **P. vulgaris,** elephantiasis without lymphorrhea.

Pachydermoid (*pak-e-der'-moid*) [παχύς, thick; δέρμα, skin; εἶδος, like]. Pachydermatous.

Pachydermous (*pak-e-der'-mus*) [παχύς, thick; δέρμα, skin]. In biology, thick-coated.

Pachyemia (*pak-e-e'-me-ah*) [παχύς, thick; αἷμα, blood]. Abnormal or morbid thickening of the blood.

Pachyglossal, Pachyglossate (*pak-e-glos'-al, pak-e-glos'-āt*) [παχύς, thick; γλῶσσα, tongue]. Having a thick tongue.

Pachygnathous (*pak-ig'-na-thus*) [παχύς, thick; γνάθος, jaw]. Having thick or heavy jaws.

Pachylosis (*pak-il-o'-sis*) [παχυλῶς, thickly]. An extraordinary development of epidermis, most common about the legs, usually a sequel of chronic eczema or of ulceration.

Pachymenia (*pak-e-me'-ne-ah*) [παχύς, thick; ὑμήν, membrane]. Thickening of the skin, or of a membrane.

Pachymenic (*pak-e-men'-ik*) [παχύς, thick; ὑμήν, membrane]. Affected with pachymenia.

Pachymeningitic (*pak-e-men-in-jit'-ik*) [παχύς, thick; μῆνιγξ, membrane; ιτις, inflammation]. Affected with, or pertaining to, pachymeningitis.

Pachymeningitis (*pak-e-men-in-ji'-tis*) [παχύς, thick; μῆνιγξ, membrane; ιτις, inflammation]. Inflammation of the dura, especially of the ectal layer. It is usually due to extension from adjacent bone-disease, especially caries; it may be due to syphilis, sunstroke, or injuries. The symptoms are much the same as in leptomeningitis. **P., Hemorrhagic, P. hæmorrhagica interna,** an effusion of blood on the inner surface of the dura. The quantity may be large and enclosed in a sac —hematoma of the dura—or very small, only a fine rust-colored layer that is easily stripped off. The cause is still *sub judice;* probably it is a trophic phenomenon in most cases.

Pachymeninx (*pak-e-me'-ninks*) [παχύς, thick; μῆνιγξ, membrane]. The dura.

Pachymeter (*pak-im'-et-er*) [παχύς, thick; μέτρον, measure]. An instrument for measuring small thicknesses.

Pachynsis (*pak-in'-sis*) [πάχυνσις, thickening]. A thickening, as of a membrane.

Pachyntic (*pak-in'-tik*) [παχυντικός, making thick]. Pertaining to an abnormal thickening or hardening of a part; increasing the thickness.

Pachyodont (*pak'-e-o-dont*) [παχύς, thick; ὀδούς, tooth]. In biology, having thick or massive teeth.

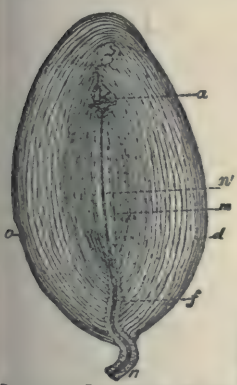
Pachyopterous (*pak-e-op'-ter-us*). Same as *Pachypterous*.

Pachyote (*pak'-e-ōt*) [παχύς, thick; οὖς, ear]. Having thick ears.

Pachyperitonitis (*pak-e-per-it-on-i'-tis*) [παχύς, thick; περιτόναιον, peritoneum; ιτις, inflammation]. An inflammation of the peritoneum characterized by thickening of the membrane.

Pachypod (*pak'-ip-od*) [παχύς, thick; πούς, foot]. Having thick or heavy feet.

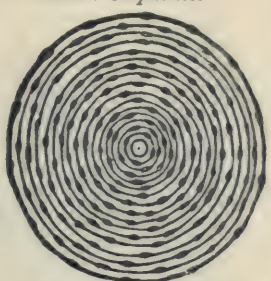
Pachypterous (*pak-ip'-ter-us*) [παχύς, thick; πτερόν, wing]. In biology, having thick wings, or fins.



Pachyrhynchous (*pak-ir-ing'-kus*) [παχύς, thick; ῥύγχος, bill, beak]. In biology, having a thick rostrum, bill, beak, or snout.

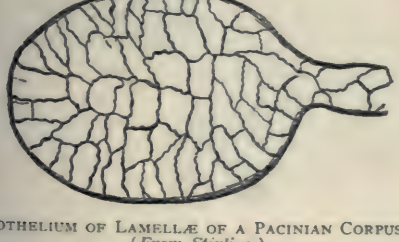
Pachystichous (*pak-is'-tik-us*) [παχύς, thick; στίχος, a row, line]. In biology, thick-sided.

Pachytes (*pak'-it-ēz*) [παχύς, thick]. Thickness; pachyblepharon.



Pacini's Fluid. A conserving and diluting fluid used in counting the red blood-corpuscles. Its composition is: Mercuric chlorid 2 grams; sodium chlorid 4 grams; glycerin 26 c.c.; distilled water 226 c.c. To be diluted with three parts of water before using. **P.'s Line.** See *Lines, Table of.* **P.'s Method,** a method of performing artificial respiration, by forcibly drawing the shoulders upward, in the direction of the long axis of the body, to expand the chest, and then relaxing. See *Artificial Respiration.*

Pacinian (*pas-in'-e-an*) [*Pacini*, an Italian anatomist, 1812–1883]. Described or discovered by Pacini. **P. Bodies** or **Corpuscles,** elliptic, semi-transparent bodies, that occur along the nerves supplying the skin, especially of the hands and feet, the external genitalia, the points of the extremities, the periosteum of certain bones and many other localities in man and other mammals; the so-called *Corpuscles of Vater*, or *Krause's Corpuscles.*



Pacinian Corpuscle, from Mesentery of Cat.

c. Capsules. *d.* Endothelial lining separating the latter. *n.* Nerve. *f.* Funicular sheath of nerve. *m.* Central mass. *n'.* Terminal fiber; and *a.* Where it splits up into finer fibrils.

Transverse Section of a Pacinian Corpuscle from Fetal Skin.

Endothelium of Lamellæ of a Pacinian Corpuscle. (*From Stirling.*)

Pack (*pak*) [ME., *pak*, pack]. A blanket wrapped about the body. **P., Cold,** a blanket wrung out of cold water and wrapped about the body. **P., Dry,** one which is not soaked in water. **P., Half,** one limited to the trunk. **P., Hot,** a blanket wrung out of hot water and wrapped about the body. **P., Wet,** a blanket wrung out of warm or cold water and wrapped about the entire body or a part, and surrounded by dry blankets. It may be used as a means to reduce temperature (cold pack) or to produce sweating (hot pack).

Packer's Knot. See *Fascia nodosa.*

Packing (*pak'-ing*) [ME., *pak*, pack]. The act of filling a wound or cavity with gauze or other material. **P., Gauze,** gauze cut in strips and used for the packing of cavities. **P., Iodoform,** a packing with gauze impregnated with iodoform.

Packwax (*pak'-waks*) [ME., paxwax]. The ligamentum nuchæ of the ox. See *Paxwax* and *Faxwax.*

Pacquelin Cautery. See *Cautery.*

Pad [ME., *padde*, a pad]. 1. A small bag stuffed with cotton, hair, etc., used as a cushion for the support of any part of the body. See *Liver-pad.* 2. Also, synonym of *Compress.* **P. of Corpus callosum,** the splenium of the callosum. **P., Dinner,** a folded towel laid over the region of the stomach in applying a plaster-of-Paris jacket, to give space for the distention of the stomach by the food.

Padding (*pad'-ing*) [ME., *padde*, a pad]. The material used in stuffing anything. **P. of Splints,** the covering of the splint-board with oakum or raw cotton for purposes of smoothness and to equalize pressure.

Pæ-. For words so beginning, see *Pe-.*

Pædogenesis (*pe-do-jen'-es-is*). See *Pedogenesis.*

Pagapoplexia (*pa-gap-o-pleks'-e-ah*). Synonym of *Pagoplexia.*

Pageism (*pa'-jizm*) [*pagius*, a servant]. A manifestation of masochism in which the individual affected revels in the idea of being a page to a beautiful girl.

Pagenstecher's Ointment. An ointment used in ophthalmic practice. It consists of from one to three grains of the yellow oxid of mercury to the dram of vaselin. **P.'s Operation.** See *Operations, Table of.*

Paget's Disease of the Nipple. See *Dermatitis* and *Diseases, Table of.* **P.'s Osteitis.** See *Diseases, Table of.* **P.'s Recurrent Fibroid,** the small spindle-celled variety of sarcoma, occurring chiefly in the subcutaneous tissue and sometimes in the breast. It recurs in the course of many years a dozen or more times, while distant parts and the lymphatic glands never become infected. See *Diseases, Table of.*

Pagiorrheumatism (*paj-e-or-ru'-mat-izm*) [πάγιος, firm; ῥευματισμός, rheumatism]. Chronic rheumatism.

Pagliari's Fluid. A styptic fluid composed of benzoic acid and alum. It is likely to interfere with the healing of wounds.

Pagoplexia (*pa-go-pleks'-e-ah*) [πάγος, frost; πλῆξις, stroke]. Frost-bite; numbness due to cold. See *Frost-bite.*

Paidiaphtha (*pa-de-af'-thah*) [παῖς, child; ἀφθα, aphtha]. The thrush of infants.

Paidonosology (*pa-don-os-ol'-o-je*) [παῖς, child; νόσος, disease; λόγος, science]. The science of diseases of children; pediatrics.

Pail (*pāl*) [ME., *pail*, a pitcher]. A cylindric vessel for carrying liquids. **P. System.** See *Sewage, Disposal of.*

Pain (*pān*) [ME., *paine*, pain]. Bodily or mental suffering. Distressing or agonizing sensation. It is usually due to irritation of a sensory nerve, although there are said to be pains of central origin. **P., Boring,** severe pain in bones, of a boring character. **P., Electric.** See *P., Fulgurant.* **P., Fulgurant, P., Fulgurating,** the intense shooting, cutting pains affecting principally the limbs of patients suffering from locomotor ataxy. **P., Girdle,** a painful sensation as of a cord tied about the waist; it is a symptom of organic spinal-cord disease. **P., Growing,** a popular term for the soreness about the joints in young persons at puberty. Some attribute these pains to in

creased vascularity of the epiphyses of long bones; others believe them to be rheumatic. **P.-joy** [Ger., *Schmerzfreude*]. Hysteric enjoyment of suffering; a symptom not uncommon in a certain class of neurasthenic patients. **P., Jumping,** the pain peculiar to disease of joints when the bone is exposed by ulceration of the cartilage. **P., Lancinating.** See *P., Fulgurant.* **P., Lightning.** See *P., Fulgurant.* **P., Osteocopic,** bone-tiring pains; a common symptom of secondary syphilis. **P., Shooting.** See *P., Fulgurant.* **P., Starting.** Synonym of *P., Jumping.* **Ps., After-,** those following labor, and caused by the uterus contracting to expel clots, etc., or to resume its normal proportions. **Ps., Bearing-down,** pains with a sensation of dragging or bearing down of the pelvic organs, occurring in labor and in various inflammatory affections of the female pelvic organs. **Ps., False,** those occurring in the latter part of pregnancy, not preceded by the premonitory signs of labor and not directly caused by labor. **Ps., Grinding,** the labor-pains during the stage of dilatation of the os uteri. **Ps., Irregular,** those not recurring according to the normal periodic or rhythmic nature of uterine contractions. **Ps. of Labor,** a synonym for uterine contractions, since these are attended by pains, increasing in severity according to the intensity and frequency of the contractions. **Ps., Premonitory,** so-called painless uterine contractions preceding the onset of true labor.

Painful (*pān'-ful*) [ME., *paine*, pain]. Characterized by pain. **P. Heel.** See *Pododynia* and *Achillodynia.*

Paint (*pānt*). See *Pigments, Colors, and Dye-stuffs.*

Painters' Colic. See *Colic.*

Pair (*pār*) [ME., *paire*, a pair]. Two similar organs, one right and the other left, occupying the same relative position on either side of the body; as a *pair* of nerves.

Pajot's Law. The law governing the rotating movements of the child during labor. It is expressed as follows: When a solid body is contained within another, if the receptacle is the seat of alternations of movement and repose, and its surfaces are slippery and but slightly angular, the contained body will tend increasingly to accommodate its form and dimensions to the form and capacity of the receptacle. **P.'s Maneuver.** Same as *P.'s Method.* **P.'s Method,** a method of decapitation of the fetus in embryotomy. It consists in passing a strong cord around the child's neck, and by a sawing movement cutting through the parts. The vagina should be protected by a speculum.

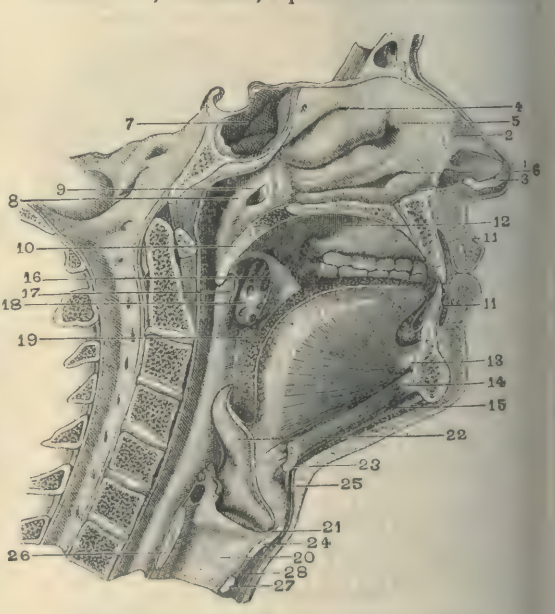
Paku-kidang (*pa'-ku-kid'-ang*) [Sumatra]. A drug obtained in Sumatra from several species of ferns. Under the name of *Agnus scythicus* it was formerly used as a styptic. Unof.

Pal's Method. A method of staining the tissues of the central nervous system. Allow the sections that have been hardened in Müller's solutions and then in alcohol to remain from five to six hours in Weigert's hematoxylin, and wash in distilled water till no more dye is removed. Then place the sections in potassium permanganate solution (0.25 per cent.) for from 15 to 20 seconds to differentiate, then in Pal's solution for from 1–2 minutes till the gray and white matter become well defined. Wash for from 15 to 30 minutes in water. If black spots appear at any stage, reverse the steps and then repeat. The medullary sheaths stain bluish-black. To stain nuclei follow with alum-carmin; dehydrate; clear; mount. **P.'s Solution.** A solution used in *Pal's Method.* It consists of oxalic acid 1 part, potassium sulphite 1 part, distilled water 200 parts.

Pal-Exner Method. A method of staining nerve-centers. Cut the brain or the cord into ¼-inch squares; fix and harden the segments for two days in ten times the volume of 0.5 per cent. osmic-acid solution; change each day; wash in water; pass up to absolute alcohol, and embed in celloidin. Place the sections as fast as cut in glycerin; treat with 0.25 per cent. aqueous solution of potassium permanganate for from 15–20 seconds; pass through Pal's solution for from 1–2 minutes; stain the nuclei with alum-carmin; dehydrate; clear; mount (after Squire).

Pala (*pa'-lah*) [L., a "spade"]. 1. A thin lamella connecting the fimbria and the tenia of the brain. It has a shape like the blade of a turf-cutter. 2. [Native Hawaiian]. The Hawaiian word for syphilis.

Paladina's Palladium Chlorid Method. See *Stains, Table of.* **P.'s Fonifero.** See *Phoniphore.*



Palæo- (*pa'-le-o-*) [παλαιός, old]. A prefix denoting old, early, long ago, etc. For words thus beginning see *Paleo-.*

Palama (*pal'-am-ah*) [παλάμη, the palm of the hand: *pl.*, *Palamæ*]. In biology, the webbed state of the toes of certain animals, either *palmation, semi-palmation, toti-palmation.*

Palamosyphilolepis (*pal-am-o-sif-il-o-lep'-is*) [παλάμη, palm of hand; *Syphilis*, syphilis; λεπίς, scale]. A squamous syphiloderm of the palm.

Palatal (*pal'-at-al*) [*palatum*, palate]. Pertaining to the palate; palatine. **P. Glands.** See *Gland, Palatine.* **P. Reflex.** See *Reflexes, Table of.*

Palate (*pal'-at*) [*palatum*, palate]. The roof of the mouth. **P., Artificial,** a plate of hard material used

MEDIAN SECTION OF MOUTH AND NASAL FOSSÆ.

1. Left nostril. 2. Upper lateral cartilage. 3. Inner portion of lower cartilage. 4. Superior turbinated bone and meatus. 5. Middle turbinated bone and meatus. 6. Inferior turbinated bone and meatus. 7. Sphenoid sinus. 8. Posterior nasal fossa. 9. Internal orifice or pavilion of Eustachian tube. 10. Velum palati. 11, 11. Vestibule of mouth. 12. Palatine vault. 13. Genio-glossus muscle. 14. Genio-hyoid. 15. Mylo-hyoid. 16. Anterior pillar of velum palati. 17. Posterior pillar. 18. Tonsil. 19. Circumvallate papillæ of tongue. 20. Cavity of larynx. 21. Ventricle. 22. Epiglottis. 23. Hyoid bone. 24. Thyroid cartilage. 25. Thyro-hyoid membrane. 26. Posterior portion of cricoid cartilage. 27. Anterior portion. 28. Crico-thyroid membrane.

as an obturator to close a fissure in the palate. **P., Cleft,** a congenital deformity characterized by incomplete closure of the lateral halves of the palate. The soft palate and the uvula, the hard palate, or all together may be involved. **P., Hard,** the bony plate adjacent to the gums and alveolar arches. **P.-myograph,** an instrument for taking a tracing of the movements of the soft palate. **P. Plates,** the horizontal portions of the superior maxillæ that unite to form the hard palate. **P., Soft,** the muscular membrane-like structure forming an incomplete septum between the mouth and the naso-pharynx. In biology, the convex base of the lower lip of a personate corolla, more or less completely closing the throat. In entomology, the epipharynx.

alatic (*pal-at'-ik*) [*palatum*, the palate]. Palatal; palatine.

alatiform (*pal-at'-if-orm*) [*palatum*, palate; *forma*, form]. In biology, resembling a palate.

alatiglossus (*pal-at-i-glos'-us*). Same as *Palatoglossus*.

alatine (*pal'-at-in*) [*palatum*, palate]. Pertaining or belonging to the palate. **P. Arches,** the arches, posterior and anterior, upon each side of the beginning of the pharynx. **P. Canals,** several canals in the palatal portion of the superior maxilla. **P. Fossa.** See *Fossa*. **P. Glands.** See *Gland*. **P. Orange.** See *Pigments, Conspectus of*.

alatitensor (*pal-at-it-en'-sor*) [*palatum*, palate; *tensor*, a stretcher]. The tensor palati muscle. See *Muscles, Table of*.

alatitis (*pal-at-i'-tis*) [*palatum*, palate; *ιτις*, inflammation]. Inflammation of the palate.

alatoglossal (*pal-at-o-glos'-al*) [*palatum*, palate; *γλῶσσα*, tongue]. Pertaining to the palate and the tongue.

alatoglossus (*pal-at-o-glos'-us*). See *Muscles, Table of*.

alatognathous (*pal-at-og'-na-thus*) [*palatum*, palate; *γνάθος*, jaw]. Affected with palatognathus.

alatognathus (*pal-at-og'-na-thus*) [*palatum*, palate; *γνάθος*, jaw]. Cleft palate.

alato-labial (*pal-at-o-la'-be-al*) [*palatum*, palate; *labium*, lip]. Pertaining to the palate and the lips.

alato-maxillary (*pal-at-o-maks'-il-a-re*) [*palatum*, palate; *maxilla*, jaw]. Pertaining to the palate and the jaws.

alato-nasal (*pal-at-o-na'-zel*) [*palatum*, palate; *nasus*, nose]. Pertaining to the palate and the nose.

alato-pharyngeal (*pal-at-o-far-in'-je-al*) [*palatum*, palate; *φάρυγξ*, pharynx]. Pertaining conjointly to the palate and the pharynx.

alato-pharyngeus (*pal-at-o-far-in'-je-us*). See *Muscles, Table of*.

alatoplasty (*pal'-at-o-plas-te*) [*palatum*, palate; *πλάσσειν*, to form]. Plastic surgery of the palate.

alatoplegia (*pal-at-o-ple'-je-ah*) [*palatum*, palate; *πληγή*, a stroke]. Paralysis of the soft palate.

alatopterygoid (*pal-at-o-ter'-ig-oid*) [*palatum*, palate; *πτερόν*, wing; *εἶδος*, like]. Pertaining to the palate bone and the pterygoid processes of the sphenoid bone; pterygopalatine.

alatoquadrate (*pal-at-o-kwod'-rāt*) [*palatum*, palate; *quadratum*, quadrate bone]. Pertaining to the palate and to the quadrate bone.

alatorrhaphy (*pal-at-or'-a-fe*). See *Staphylorrhaphy*.

alatoschisis (*pal-at-os'-kis-is*) [*palatum*, palate; *σχίσις*, a cleft]. Cleft palate.

alatostaphylinus (*pal-at-o-staf-il-i'-nus*) [*palatum*, palate; *σταφυλή*, uvula]. The azygos uvulæ muscle. See *Muscles, Table of*.

alatum (*pal-a'-tum*) [L.]. The palate. **P. durum,** the hard palate. **P. fissum,** cleft palate. **P. mobile,** **P. molle,** the soft palate. **P. pendulum,** the soft palate.

Pale, Palea (*pāl, pa'-le-ah*) [*palea*, chaff: *pl.*, *Paleæ*]. 1. In biology, one of the inner bracts of the inflorescence of grasses. Also applied to the flattened brown hairs or chaff found on the stems and leaves of ferns. 2. The dewlap or wattle of a bird.

Pale (*pāl*) [Fr. *pâle*, pale]. Deficient or wanting in the color natural to health. **P. Bark.** See *Cinchona*. **P. Catechu.** See *Gambier*. **P. Rose.** See *Rosa centifolia*.

Paleaceous (*pa-le-a'-she-us*) [*palea*, chaff]. In biology, furnished with chaff, or chaffy in texture.

Paleichthyology, Palæichthyology (*pa-le-ik-the-ol'-o-je*) [*παλαιός*, ancient; *ἰχθύς*, a fish; *λόγος*, science]. In biology, the science of fossil fishes.

Paleiform (*pa'-le-if-orm*) [*palea*, chaff; *forma*, form]. Chaff-like.

Paleness (*pāl'-nes*). Same as *Pallor*.

Paleo-anthropic, Palæo-anthropic (*pa-le-o-an-throp'-ik*) [*παλαιός*, ancient; *ἄνθρωπος*, man]. In biology, of, or pertaining to, aboriginal man.

Paleobotanic (*pa-le-o-bot-an'-ik*) [*παλαιός*, ancient; *βοτάνη*, herb]. Pertaining to paleobotany.

Paleobotanist (*pa-le-o-bot'-an-ist*) [*παλαιός*, ancient; *βοτάνη*, herb]. One versed in paleobotany.

Paleobotany, Palæobotany (*pa-le-o-bot'-an-e*) [*παλαιός*, ancient; *βοτάνη*, herb]. In biology, the science of fossil plants.

Paleo-ethnologic (*pa-le-o-eth-no-loj'-ik*) [*παλαιός*, ancient; *ἔθνος*, race; *λόγος*, science]. Pertaining to paleo-ethnology.

Paleo-ethnologist (*pa-le-o-eth-nol'-o-jist*) [*παλαιός*, ancient; *ἔθνος*, race; *λόγος*, science]. One versed in paleo-ethnology.

Paleo-ethnology (*pa-le-o-eth-nol'-o-je*) [*παλαιός*, ancient; *ἔθνος*, race; *λόγος*, science]. The science of the primitive peoples.

Paleola (*pa-le'-o-lah*) [*palea*, chaff]. In biology, a diminutive palea.

Paleolate (*pa'-le-o-lāt*) [*palea*, chaff]. In biology, having paleolæ or palea of a second order.

Paleology (*pa-le-ol'-o-je*) [*παλαιός*, old; *λόγος*, science]. The science of the biology of remote geologic periods, or of antiquities.

Paleontography (*pa-le-on-tog'-ra-fe*) [*παλαιός*, old; *ὤν*, being; *γράφειν*, to write]. A description of the fossil or extinct forms of life.

Paleontologic (*pa-le-on-to-loj'-ik*) [*παλαιός*, old; *ὤν*, being; *λόγος*, science]. Pertaining to paleontology.

Paleontologist (*pa-le-on-tol'-o-jist*) [*παλαιός*, ancient; *ὤν*, being; *λόγος*, science]. One versed in paleontology.

Paleontology (*pa-le-on-tol'-o-je*) [*παλαιός*, old; *ὤν*, being; *λόγος*, science]. The science of the early life-forms of the earth.

Paleophytology, Palæophytology (*pa-le-o-fi-tol'-o-je*) [*παλαιός*, ancient; *φυτόν*, plant; *λόγος*, science]. Same as *Paleobotany*.

Paleornithology, Palæornithology (*pa-le-or-nith-ol'-o-je*) [*παλαιός*, ancient; *ὄρνις*, bird; *λόγος*, science]. In biology, the science of fossil birds.

Paleozoic (*pa-le-o-zo'-ik*) [*παλαιός*, old; *ζῷον*, animal]. Pertaining to the geologic age preceding that of the carboniferous age, the age in which the first life-forms appeared. Also, pertaining to the life-forms of that age.

Paleozoölogic (*pa-le-o-zo-o-loj'-ik*) [*παλαιός*, ancient; *ζῷον*, animal; *λόγος*, science]. Pertaining to paleozoölogy.

Paleozoölogist (*pa-le-o-zo-ol'-o-jist*) [*παλαιός*, ancient; *ζῷον*, animal; *λόγος*, science]. One versed in paleozoölogy.

Paleozoölogy, Palæozoölogy (*pa-le-o-zo-ol′-o-je*) [παλαιός, ancient; ζῷον, animal; λόγος, science]. In biology, the science of fossil animals.

Palestric (*pa-les′-trik*) [παλαιστρικός, pertaining to wrestling]. Pertaining to systematic exercise, or physical training; athletic.

Palet (*pal′-et*). See *Palette.*

Palet (*pal′-et*) [*palea*, chaff]. English term for *Palea.*

Palette, Pallet, Palet (*pal′-et*) [*pala*, a spade]. In biology, a disc-shaped organ found especially on the front and middle tarsi of the males of certain beetles.

Pali (*pa′-le*) [Ind.]. Pali or Indian plague—an infectious febrile disease of India, where it is also known as *Mahamurri.* **P. Plague.** Synonym of the *Plague,q.v.*

Palicourea (*pa-lik-oo′-re-ah*) [L.]. A Brazilian rubiaceous shrub, numbering several species, some of which are poisonous. **P. diuretica** and **P. officinalis**, have diuretic properties. Unof.

Palillo (*pal-ēl′-yo*) [Sp.]. A Peruvian plant of value in gastric disorders.

Palimptosis (*pal-imp-to′-sis*) [πάλιν, back; πτῶσις, a fall]. A falling back; properly, a falling back to a former position, whether after a proptosis, or abnormal forward displacement, or after the rectification of backward displacement.

Palincotesis (*pal-in-kot-e′-sis*) [πάλιν, again; κοτεῖν, to be angry]. Recrudescence or recurrence of a disease or wound.

Palindromia (*pal-in-dro′-me-ah*)[πάλιν, again; δρόμος, a course]. Recurrence or growing worse of a disease; a relapse.

Palingenesis (*pal-in-jen′-es-is*) [πάλιν, again; γένεσις, production]. 1. In biology, the theory that the developmental history of an individual germ is the brief recapitulation of the development of its ancestors; unmodified ontogeny, the antonym of *Kenogenesis.* 2. The transformation or metamorphosis of an insect. 3. The recreation of life after a geologic catastrophe. 4. The supposed generation of a parasite from its host or from dead matter.

Palingenesy (*pal-in-jen′-es-e*). Same as *Palingenesis.*

Palingenetic (*pal-in-jen-et′-ik*) [πάλιν, again; γένεσις, genesis]. Of, or pertaining to, palingenesis; development according to the primitive or original mode.

Palingeny (*pal-in′-jen-e*) [πάλιν, again; γενής, producing]. Same as *Palingenesis.*

Palirrhea (*pal-ir-e′-ah*) [πάλιν, again; ῥοία, flow]. The return of a mucous discharge.

Palisade (*pal-is-ād′*) [Fr., *palisser*, to inclose with pales]. A fence made of strong poles or stakes set firmly in the ground. **P.-cell,** in biology, a constituent cell of palisade-tissue. **P.-parenchyma,** the same as *P.-tissue.* **P.-tissue,** in biology, applied to certain cells which are elongated at right angles to the surface, occurring especially on the upper side of leaves. **P.-worm.** See *Parasites* (*Animal*), *Table of.*

Palladium (*pal-a′-de-um*) [παλλάδιον, a statue of Pallas]. A rare and valuable metal, in some respects resembling platinum. Symbol, Pd., at. wt., 106.5, spec. grav. 11.4. It is sometimes used in making instruments of precision, and it has been employed in dentistry. See *Elements, Table of.*

Pallet (*pal′-et*). See *Palette.*

Palliation (*pal-e-a′-shun*) [*palliare*, to cloak]. The act of soothing or moderating, without really curing.

Palliative (*pal′-e-a-tiv*) [*palliare*, to cloak]. A drug relieving or soothing the symptoms of a disease without curing it.

Pallid (*pal′-id*) [*pallere*, to look pale]. Pale.

Palliobranchiate (*pal-e-o-brang′-ke-āt*) [*pallium*, a cloak; *branchiæ*, gills]. In biology, breathing by means of the mantle.

Palliocardiac (*pal-e-o-kar′-de-ak*) [*pallium*, a cloak; καρδία, heart]. In biology, pertaining to the mantle and to the pericardial sac of a mollusc.

Palliopedal (*pal-e-o-ped′-al*) [*pallium*, cloak; *pes*, foot]. In biology, pertaining to both the foot and the mantle or pallium of a mollusc.

Pallium (*pal′-e-um*) [*pallium*, a mantle, cloak]. In biology, the mantle or enclosing and shell-forming tissue of a mollusc; the stragulum.

Pallor (*pal′-or*) [L.]. Paleness, especially of the skin and mucous membranes. **P. chloroticus,** the peculiar paleness of chlorotic persons. **P. eximius,** abnormal paleness, usually due to anemia. **P. pathematicus,** the pallor due to terror or fright. **P. virginum.** Synonym of *Chlorosis.*

Palm (*pahm*) [*palma*, παλάμα, palm]. 1. The inner or ventral surface of the hand; the flat of the hand. 2 [*palma*, a palm-tree]. A palm-tree. **P.-oil,** *Oleum palmæ*, is obtained from the fruit of several species of palm. Fresh palm-oil has an orange-yellow tint, a sweetish taste, and an odor resembling that of violets. Its specific gravity is about .968; its consistency is that of butter or lard. It ordinarily becomes rancid rapidly, and hence usually contains free acid. It is used in candle-making and soap-making, and also to color and scent ointments, pomades, soap, and powders. See *Oil.* **P.-wine,** the juice of several species of wine-palms which has undergone vinous fermentation. The distilled product is known as *arrack.*

Palma (*pal′-mah*) [L.: *pl.*, *Palmæ*]. 1. In biology: (*a*) The palm of the hand. (*b*) The enlarged first joint of the front tarsus of a bee. (*c*) The dilated and setose tarsus of an insect. 2. A palm-tree. **Oleum palmæ.** See *Palm-oil.* **Palmæ plicatæ,** the arborescent rugæ of the interior of the vagina.

Palmar (*pal′-mar*) [*palma*, palm]. Pertaining to the palm of the hand. **P. Abscess,** an abscess in the palm of the hand, usually situated beneath the palmar fascia. **P. Arch,** one of the curved arches formed by the anastomosis of the radial and ulnar arteries in the hand. There are two, a superficial and a deep. **P. Arteries.** See *Arteries, Table of.* **P. Fascia,** the sheath investing the muscles of the hand. **P. Muscles.** See *Muscles, Table of.* **P. Reflex.** See *Reflexes, Table of.* **P. Triangle.** See *Triangle.*

Palmaris (*pal-ma′-ris*). See *Muscles, Table of.*

Palmate (*pal′-māt*) [*palma*, the palm of the hand]. In biology, resembling in some way the open palm, as the webbed foot of a bird or reptile, or a five-lobed leaf.

Palmatifid (*pal-mat′-if-id*) [*palmatus*, palmate; *fidere*, to cleave]. In biology, palmately cleft.

Palmatiform (*pal-mat′-if-orm*) [*palma*, the palm of the hand; *forma*, form]. In biology, having the form of a hand.

Palmatilobate (*pal-mat-il-o′-bāt*) [*palma*, the palm of the hand; *lobus*, a lobe]. In biology, palmately lobed.

Palmation (*pal-ma′-shun*) [*palma*, the palm of the hand]. In biology, the state of being palmate, as the webbed foot of a bird, or a five-lobed leaf.

Palmatipartite (*pal-mat-ip-ar′-tit*) [*palma*, the palm of the hand; *partiri*, to divide]. In biology, palmately parted.

Palmatisect (*pal-mat′-is-ekt*) [*palma*, the palm of the hand; *secare*, to cut]. In biology, palmately compound.

Palmature (*pal′-mat-ūr*) [*palma*, palm]. Union of the fingers, either congenital or from burns, wounds or other trauma.

Palmella (*pal-mel′-ah*) [παλμός, vibration]. A genus of fresh-water algæ believed by Salisbury to be the origin of the spores that produce malarial fever.

almellin (*pal-mel′-in*) [*παλμός*, vibration]. Phipson's name for the coloring-principle of a fresh-water alga, the *Palmella cruenta*. It is red in color, resembling hemoglobin, and contains iron in combination with an albuminous substance.

almetto (*pal-met′-o*). See *Saw Palmetto*.

almic (*pal′-mik*) [*palma*, palm]. Referring to the palm; palmitic. **P. Acid.** See *Acid*, *Palmitic*.

almic (*pal′-mik*) [*παλμός*, throb]. Pertaining to the pulse or to palpitation.

almicolous (*pal-mik′-o-lus*) [*palma*, palm-like; *colere*, to inhabit]. Growing on the palm-tree.

almification (*pal-mif-ik-a′-shun*) [*palma*, palm; *facere*, *facere*, to make]. In biology, the artificial fertilization of the flowers of certain trees; originally applied to the date-palm.

almiform (*pal′-mif-orm*) [*palma*, the palm of the hand; *forma*, form]. The same as *Palmatiform*.

almigrade (*pal′-mig-rād*) [*palma*, the palm of the hand; *gradi*, to walk]. In biology, treading on the soles of the foot; plantigrade.

Palmilla (*pal-mil′-ah*). Synonym of *Palmella*.

Palminerved (*pal′-min-ervd*) [*palma*, palm; *nervus*, nerve]. In biology, palmately nerved.

Palmiped (*pal′-mip-ed*) [*palma*, palm; *pes*, foot]. Having webbed feet.

Palmistry (*pal′-mis-tre*) [*palma*, palm of hand]. The comparative study of the lines, marks, and mounds on the palm of the hand; it has been made the basis of a system of fortune-telling.

Palmitamid (*pal-mit′-am-id*) [*palma*, palm; *amid*], $C_{16}H_{33}NO$. A solid substance melting at about 93° C., formed by the union of the amid radicle of ammonia and the radicle of palmitic acid.

Palmitic Acid (*pal-mit′-ik*). See *Acid*.

Palmitin (*pal′-mit-in*) [*palma*, palm-tree]. $C_3H_5(C_{16}H_{31}O_2)_3$. A solid crystallizable substance which, with stearin, constitutes the greater proportion of solid fats. It occurs both in animal and in vegetable fats. It is a constituent of palm-oil, from which it derives its name. Chemically, it is the tripalmitate of glyceryl.

Palmitolic Acid (*pal-mit-ol′-ik*). See *Acid*.

Palmitone (*pal′-mit-ōn*) [*palma*, palm-tree], $C_{31}H_{62}O_2$. A ketone of palmitic acid resulting when the latter is distilled with slaked lime.

Palmitoxylic Acid (*pal-mit-oks-il′-ik*). See *Acid*.

Palmi-veined (*pal′-miv-ānd*) [*palma*, a palm; *vena*, vein]. In biology, netted-veined, with the veins radiating from the base toward the margin of the leaf-blade.

Palmodic (*pal-mod′-ik*) [*παλμώδης*, like palmus]. Pertaining to, resembling, or affected with, palmus.

Palmo-plantar (*pal′-mo-plan′-tar*) [*palma*, palm; *planta*, the sole of the foot]. Pertaining to both the palms of the hands and the soles of the feet. **P.-plantar Sign**, *Filipowicz' Sign*: said to be diagnostic of typhoid fever. It consists of an orange or saffron coloration of the prominent parts of the palms of the hands and the soles of the feet. The change of color is attributed to feebleness of the action of the heart, causing incomplete filling of the capillaries, and dryness of the skin. See *Signs and Symptoms*, *Table of*.

Palmoscopy (*pal-mos′-ko-pe*) [*παλμός*, throb; *σκοπεῖν*, to observe]. The observation of the heart-beat and the pulse.

Palmospasmus (*pal-mo-spaz′-mus*) [*παλμός*, throb; *σπασμός*, spasm]. A clonic spasm. **P., Electric**, a peculiar reaction of the muscles to the electric current in progressive muscular atrophy.

Palmosseus (*pal-mos′-e-us*) [*palma*, palm; *osseus*, bony]. Any palmar interosseous muscle.

Palmus (*pal′-mus*) [*παλμός*, a twitch]. 1. Jumpers' disease; lata, or miryachit; a convulsive tic, with echolalia and abulia. 2. Subsultus; palpitation; pulsation; twitching; jerkiness.

Palmus (*pal′-mus*) [*palmus*, the palm of the hand]. An old measure of length. **P. major**, contains twelve fingers. **P. minor**, four inches.

Palp [*palpare*, to touch softly, to stroke]. In biology, a tactile organ. See *Palpus*.

Palpal (*pal′-pal*) [*palpare*, to touch softly]. In biology, of, or pertaining to, a palp. **P. Organs**, the modified recti-palpi of male spiders, functioning as impregnating organs.

Palpate (*pal′-pāt*) [*palpare*, to feel]. To examine by touch.

Palpation (*pal-pa′-shun*) [*palpare*, to feel]. In physical diagnosis, the laying of the hand on a part of the body or the manipulation of a part with the hand or fingers for the purpose of ascertaining its condition or that of underlying organs. **P., Abdomino-vaginal**, examination of the pelvic contents in women by means of a finger in the vagina and a hand in the suprapubic region pressing downward. **P., Bimanual**, the use of the two hands in examining an organ; the hands are placed on opposite sides, or one in the vagina and the other on the abdomen, and press toward each other. **P., Combined** or **Conjoined.** Synonym of *P., Bimanual.*

Palpatometry (*pal-pat-om′-et-re*) [*palpare*, to feel; *μέτρον*, measure]. A measuring of the greatest pressure that can be borne without pain.

Palpebra (*pal′-pe-brah*) [L.]. The eyelid.

Palpebral (*pal′-pe-bral*) [*palpebra*, eyelid]. Pertaining to the eyelid. **P. Conjunctiva**, the conjunctiva of the eyelids. **P. Fissure**, the opening between the upper and lower eyelids. **P. Folds.** See *Folds*. **P. Portion of the Lacrymal Gland.** See *Gland, Accessory of Rosenmüller*.

Palpebralis (*pal-pe-bra′-lis*) [*palpebra*, eyelid]. The levator palpebræ superioris muscle. See *Muscles, Table of*.

Palpebritis (*pal-pe-bri′-tis*) [*palpebra*, eyelid; *ιτις*, inflammation]. Synonym of *Blepharitis*.

Palpicil (*pal′-pis-il*) [*palpus*, a feeler; *cilium*, a cover, an eyelid]. In biology, a tactile hair.

Palpifer (*pal′-pif-er*) [*palpus*, a feeler; *ferre*, to bear]. In biology, the outer lobe of the maxilla of an insect; the bearer of the palpus.

Palpiform (*pal′-pif-orm*) [*palpus*, a feeler; *forma*, form]. Having the form or function of a palp.

Palpiger (*pal′-pij-er*) [*palpus*, a feeler; *gerere*, to bear]. In biology, an appendage to the labium of certain insects; the bearer of the labial palpus.

Palpitate (*pal′-pit-āt*) [*palpitare*, to quiver]. To flutter, to tremble or to beat abnormally fast; applied especially to the heart.

Palpitation (*pal-pit-a′-shun*) [*palpitatio*, a beating]. Any spasmodic fluttering or tremor, especially the abnormally rapid beating of the heart, of which the person is conscious. It is associated often with a choking sensation in the throat. It may be due to organic disease or to functional disturbance of the heart; very often it is caused by disorders of the stomach. **P., Arterial**, arterial pulsation synchronous with the action of the heart, seen sometimes in the epigastric region in the course of the aorta. It is quite common in hysteric persons. **P., Celiac**, palpitation of the abdominal aorta. **P., Nervous**, palpitation of the heart due to reflex disturbances from diseases of other organs. **P., Symptomatic, of Andral**, the reflex palpitation of the heart sometimes observed when teniæ are present in the intestines.

Palpocil (*pal'-po-sil*). Same as *Palpicil.*

Palpon (*pal'-pon*) [*palpus*, a feeler]. In biology, a siphonophoran polyp, specialized as a taster or feeler. Cf. *person.*

Palpulus (*pal'-pu-lus*) [dim. of *palpus*, a feeler: *pl.*, *Palpuli*]. In biology, a diminutive palpus.

Palpus (*pal'-pus*) [*palpare*, to touch softly: *pl.*, *Palpi*]. In biology: (*a*) one of the tactile organs or feelers attached to the maxilla or labium of an insect; (*b*) one of the fleshy lobes at the side of the mouth of certain molluscs, usually called the *labial palpus.*

Palsy (*pawl'-ze*) [ME., *palsey*, palsy]. Paralysis. **P., Bell's.** See *Diseases, Table of.* **P., Birth.** See *Birth.* **P., Cerebral,** a paralysis due to a lesion in the brain. **P., Creeping,** an old term for progressive muscular atrophy. **P., Crutch,** that due to pressure of the crutch in the axilla upon the brachial nerves. **P., Dancers',** a cramp affecting especially the muscles in the calf of the professional danseuse. **P., Erb's:** 1. Paralysis of the brachial plexus. 2. Spastic paraplegia. See *Diseases, Table of.* **P., Facial.** See *Paralysis, Bell's.* **P., Pen.** See *Writers' Cramp.* **P., Scriveners'.** Synonym of *Writers' Cramp.* **P., Shaking.** Synonym of *Paralysis agitans.* **P., Wasting,** progressive muscular atrophy.

Paludal (*pal'-u-dal*) [*palus, paludis*, marsh]. Pertaining to a marsh or the exhalations of marshes. Also a synonym of *Malarial.* **P. Fever.** Synonym of *Intermittent Fever.*

Paludicole (*pal-u'-dik-ōl*) [*palus*, a marsh; *colere*, to inhabit]. In biology, inhabiting marshes.

Paludine (*pal'-u-din*) [*palus*, a marsh]. Paludal.

Paludinous (*pal-u'-din-us*) [*palus*, a marsh]. Pertaining to marshes.

Paludism (*pal'-u-dizm*) [*palus*, a marsh]. Malarial poisoning; impaludism.

Paludose (*pal'-u-dōz*) [*palus*, a marsh]. In biology, growing in marshy places.

Paludous (*pal'-u-dus*) [*palus*, a marsh]. Marshy or swampy. Having the nature of, or affected with, marsh-fever.

Palulus (*pal'-u-lus*) [dim. of *palus*, a stake, pale: *pl.*, *Paluli.*]. A small palus; applied to the columellar rods in actinozoa.

Palumbo's Net. See *Net, Bathygraphic.*

Palus (*pa'-lus*) [*palus*, a stake, pale: *pl.*, *Pali.*]. In biology, one of the plates found in corals between the inner edge of certain septa and the axis of the visceral chamber.

Palustral (*pal-us'-tral*) [*palus*, marsh]. Pertaining to, or having the nature of, marsh-fever; paludal.

Palustrine (*pal-us'-trin*) [*palus*, a swamp]. The same as *Paludal.*

Pambotano (*pam-bo-tan'-o*) [native Mexican]. A Mexican plant, *Calliandra houstoni*, belonging to the order of *Leguminosæ.* It is a bitter and antimalarial of the first order. Dose of the powdered drug, 70 grains in 24 hours. The preparations are the tincture, decoction, elixir, and alcoholic extract. Unof.

Pamphagous (*pam'-fag-us*) [πᾶς, all; φαγεῖν, to devour]. Omnivorous.

Pamphilus (*pam'-fil-us*) [πᾶς, all; φιλεῖν, to love]. A plaster.

Pamphobia (*pam-fo'-be-ah*). See *Panophobia.*

Pampinary (*pam'-pin-a-re*) [*pampinus*, a tendril, or young shoot of a vine]. In biology, of, or pertaining to, a young shoot.

Pampiniform (*pam-pin'-if-orm*) [*pampiniformis: pampinus*, tendril; *forma*, form]. Having the form of a tendril. **P. Plexus.** See *Plexus, Spermatic.*

Pampinocele (*pam-pin'-o-sēl*) [*pampinus*, tendril; κήλη, tumor]. A varicocele of the veins of the pampiniform plexus.

Pamplegia (*pam-ple'-je-ah*) [πᾶς, all; πληγή, stroke]. General paralysis.

Pamprodactylous (*pam-pro-dak'-til-us*) [πᾶς, all; πρό, forward; δάκτυλος, finger]. In biology, applied to birds in which all four toes turn inward.

Pan- [πᾶν, neuter of πᾶς (*gen.* παντός), all, everything]. A Greek word signifying all, everything. The form *panto-* is frequently employed.

Pan [ME., *panne*, a pan]. A low, flat-bottomed vessel. **P., Bed,** a large, flat oval pan, usually of china, serving as a receptacle for the fecal discharges and urine of bed-patients. **P., Brain, P., Head,** the skull. **P., Knee,** the patella.

Panacea (*pan-as-e'-ah*) [πανάκεια, a cure-all]. A cure-all; a name applied to various empiric preparations alleged to cure a multitude of diseases.

Panache (*pa-nash'*) [*penna*, feather, plume]. In biology, a tuft of hairs or feathers.

Panacon (*pan'-ak-on*), $C_{22}H_{19}O_8$. A white, tasteless, crystalline body derived from the root of *Aralia quinquefolia.*

Panado (*pan-a'-do*) [Sp. *panada*, from *panis*, bread]. Bread softened in water. Also, a bread-poultice.

Panæsthesia (*pan-es-the'-ze-ah*). See *Panesthesia.*

Panæsthetism (*pan-es'-thet-izm*). See *Panesthesia.*

Panama Fever. 1. See *Fever.* 2. A synonym of *Yellow Fever.*

Panaquilon (*pan-ak'-wil-on*), $C_{24}H_{25}O_{18}$. An amorphous, bitter-sweet principle extracted from the root of *Aralia quinquefolia.*

Panaricium (*pan-ar-is'-e-um*). See *Panaris.*

Panaris (*pan-a'-ris*) [*panaricium*, a disease of the fingernails]. Phlegmonous inflammation of the finger or toe. Whitlow. See also *Paronychia.* **P., Analgesic.** See *Morvan's Disease.* **P., Periosteal,** phalangeal periostitis. **P., Tendinous,** inflammation of the sheath of a digital tendon.

Panaritium (*pan-ar-ish'-e-um*). See *Panaris* and *Whitlow.*

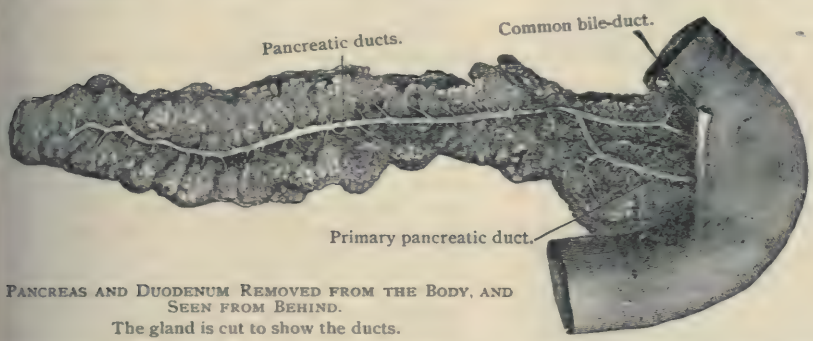
Panarthritis (*pan-ar-thri'-tis*) [πᾶς, all; ἄρθρον, joint; ιτις, inflammation]. General inflammation of the structures of a joint.

Panas' Solution. A mild antiseptic collyrium, serviceable in conjunctivitis, blepharitis, etc. It contains mercuric iodid 1, absolute alcohol 400, distilled water sufficient to make 20,000 parts.

Panax (*pa'-naks*) [πάναξ, panacea]. Ginseng. The root of *P. quinquefolium*, much used in China as a cure-all. It is a demulcent and mild purgative. Unof.

Pancenonosos (*pan-sen-on'-o-sos*) [πᾶς, all; κοινός, common; νόσος, disease]. An epidemic disease.

Pancenus (*pan-sen'-us*) [πᾶς, all; κοινός, common]. Epidemic.



Panchrestus (*pan-kres'-tus*) [πᾶς, all; χρηστός, useful]. Same as *Panacea.*

Panchymagogue (*pan-ki'-mag-og*) [πᾶς, all; χύμος, juice; ἀγωγός, leading]. A drug supposed to deplete all the fluids and humors of the body. [Old.]

Pancratic (*pan-krat'-ik*) [πᾶς, all; κράτος, strength]. Having a variable magnifying power; applied to the eye-pieces of certain microscopes.

Pancreas (*pan'-kre-as*) [πᾶς, all; κρέας, flesh]. A large racemose gland, from six to eight inches in length, lying transversely across the posterior wall of the abdomen. It secretes a limpid, colorless fluid for the digestion of proteids, fats, and carbohydrates. It is sweetbread of animals; the abdominal salivary gland of the Germans. It is vulgarly termed "*gut bread*," or "*belly sweetbread*," in contradistinction to the thymus or true sweetbread. **P., Accessory,** a small mass of

glandular structure similar to the pancreas, and adjacent to it. **P. Aselli,** a collection of lymph-glands in the mesentery of some mammals, resembling a pancreas. **P., Lesser,** a small partially detached portion of the gland, lying posteriorly to its head and having occasionally a separate duct which opens into the pancreatic duct proper. **P., Little.** Same as *P., Lesser*. **P.-ptyalin,** an amylolytic ferment secreted by the pancreas; amylopsin. **P., Small,** a glandular mass frequently found under the true pancreas, and similar in structure. **P. Winslowii.** Same as *P., Lesser*.

PANCREAS AND DUODENUM REMOVED FROM THE BODY, AND SEEN FROM BEHIND.
The gland is cut to show the ducts.

Pancreatalgia (*pan-kre-at-al′-je-ah*) [πᾶς, all; κρέας, flesh; ἄλγος, pain]. Pain in the pancreas.

Pancreatectomy (*pan-kre-at-ek′-to-me*) [πᾶς, all; κρέας, flesh; ἐκτομή, excision]. Excision of a portion or all of the pancreas.

Pancreatemphraxis (*pan-kre-at-em-fraks′-is*) [πᾶς, all; κρέας, flesh; ἔμφραξις, stoppage]. Obstruction of the pancreatic duct.

Pancreathelcosis (*pan-kre-ath-el-ko′-sis*) [πᾶς, all; κρέας, flesh; ἕλκωσις, ulceration]. Ulceration of the pancreas.

Pancreatic (*pan-kre-at′-ik*) [πᾶς, all; κρέας, flesh]. Pertaining to the pancreas. **P. Duct,** the efferent duct carrying the secretions of the pancreas to the intestines; it is also known as the duct of Wirsung. See *Duct*. **P. Fluid,** or **Juice,** the fluid secreted by the pancreas. It is thick, transparent, colorless, odorless, of a salty taste, and strongly alkaline. By heat it is coagulated into a white mass, from the presence of serum-albumin. Its composition is water 900.8, and solids 99.2. Of the latter, 90.4 are organic matter, and 8.8 inorganic matter. The ash from 1000 parts of juice yields soda 0.58; sodium chlorid 7.35; potassium chlorid 0.02; phosphates of alkaline earths and iron 0.53; sodium phosphate 0.01; lime and magnesia 0.32. Traces of leucin and soaps are present in the fresh juice. The ferments or enzymes, four in number, that it contains give to it its important digestive power. Its *diastatic* action is due to *amylopsin;* its *tryptic* or *proteolytic* action results from the presence of *trypsin;* its action on fats is due to the presence of *steapsin*, which causes the fats to split up into glycerin and the corresponding fatty acids; and, finally, it contains a *milk-curdling* ferment.

Pancreatica (*pan-kre-at′-ik-ah*) [πάγκρεας, pancreas]. The pancreatic artery.

Pancreatico-duodenal (*pan-kre-at′-ik-o-du-od′-en-al*) [πᾶς, all; κρέας, flesh; *duodenum*, duodenum]. Pertaining to the pancreas and the duodenum. **P.-d. Artery.** See *Arteries, Table of.*

Pancreatico-splenic (*pan-kre-at′-ik-o-splen′-ik*) [πᾶς, all; κρέας, flesh; σπλήν, spleen]. Pertaining to the pancreas and the spleen.

Pancreatin (*pan′-kre-at-in*) [πᾶς, all; κρέας, flesh]. The active elements of the juice of the pancreas; also the commercial extract of the pancreas. It is added to fats, milk, soups, gruel, etc. **Pancreaticus, Liquor,** prepared by digesting pigs' pancreas with four times its weight of alcohol. Dose ʒj ℥ss. Unof. See also *Organotherapy*.

Pancreatitic (*pan-kre-at-it′-ik*) [πάγκρεας, pancreas; ιτις, inflammation]. Pertaining to pancreatitis.

Pancreatitis (*pan-kre-at-i′-tis*) [πάγκρεας, pancreas; ιτις, inflammation]. Inflammation of the pancreas.

Pancreatize (*pan′-kre-at-iz*) [πάγκρεας, pancreas]. To treat, or digest, with pancreatin.

Pancreatogen (*pan-kre-at′-o-jen*) [πάγκρεας, the pancreas; γένεσις, production]. A nutritive element capable of being changed into pancreatin.

Pancreatogeny (*pan-kre-at-oj′-en-e*) [πάγκρεας, pancreas; γένεσις, genesis]. The conversion by the pancreas of suitable pabulum into pancreatin.

Pancreatoid (*pan′-kre-at-oid*) [πάγκρεας, pancreas; εἶδος, like]. Resembling the pancreas.

Pancreatomy (*pan-kre-at′-o-me*). See *Pancreatotomy*.

Pancreatoncus (*pan-kre-at-ong′-kus*) [πάγκρεας, pancreas; ὄγκος, tumor]. A tumor of the pancreas.

Pancreatorrhagia (*pan-kre-at-or-a′-je-ah*) [πάγκρεας, pancreas; ῥηγνύναι, to burst forth]. Hemorrhage from the pancreas.

Pancreatotomy (*pan-kre-at-ot′-o-me*) [πάγκρεας, pancreas; τομή, a cutting]. Incision of the pancreas.

Pancreazymose (*pan-kre-az-i′-mōz*) [πάγκρεας, pancreas; ζύμη, leaven]. One of the pancreatic ferments.

Pancreectomy (*pan-kre-ek′-to-me*). See *Pancreatectomy*.

Pancreopathia (*pan-kre-o-path′-e-ah*) [πάγκρεας, pancreas; πάθος, disease]. Disease of the pancreas.

Pandalitium (*pan-dal-ish′-e-um*). Synonym of *Paronychia*.

Pandanus (*pan-da′-nus*) [Malay, *pandang*, conspicuous]. A genus of pandaneaceous plants. **P. caricosus,** a species of screw-pine indigenous in the Moluccas Islands, and the leaves of which are used in gastro-intestinal disorders. **P. odoratissima, P. utilis,** fragrant screw-pine; keora oil-plant, used in dysentery. Unof.

Pandemia (*pan-de′-me-ah*) [πᾶς, all; δῆμος, people]. An epidemic that attacks all persons.

Pandemic (*pan-dem′-ik*) [πᾶς, all; δῆμος, people]. Epidemic over a wide area.

Pandemy (*pan′-dem-e*). Same as *Pandemia*.

Pander, Blood-islands of. Multinucleated areas of the angioblastic cells of the mesoderm, which give rise to the endothelium of the blood-vessels, or are converted into primary blood-corpuscles. **P., Nucleus of.** See *Nucleus*.

Pandiculation (*pan-dik-u-la′-shun*) [*pandiculatio: pandere*, to stretch out]. The act of stretching the limbs, especially on waking from sleep. It is sometimes symptomatic of fever, hysteria, and of malarial affections. Also, yawning.

Pandocheum, Pandochium (*pan-do′-ke-um*) [πᾶς,

all; δέχεσθαι, to receive]. A hospital receiving all diseases.

Pandurate (*pan'-du-rāt*) [*pandura*, a musical instrument]. Shaped like a pandura or violin.

Panduriform, Pandurate (*pan-du'-rif-orm, pan'-du-rāt*) [*pandura*, a lyre; *forma*, form]. Fiddle-shaped; pandurate. **P. Head,** a head whose transverse section would show a fiddle-shaped outline.

Panesthesia (*pan-es-the'-ze-ah*) [πᾶς, all; αἴσθησις, perception]. General or total sensation; cenesthesia.

Panesthetism (*pan-es'-thet-izm*). Same as *Panesthesia*.

Pang [ME., *pange*, a pang]. A momentary sharp pain. **P., Breast,** angina pectoris.

Pangene (*pan'-jēn*) [πᾶς (παν-), all; γένεσις, birth, production]. In biology, according to DeVries' theory of heredity, one of the primary bearers of the individual qualities or characters of the cell, *i.e.*, the constituent qualities of the species; one of the ultimate vital particles. Germ-substance is held to be formed of a number of different kinds of pangenes, of which as many are present as there are qualities in the species; they have no definite arrangement, but are freely miscible. They differ from the "gemmules" of Darwin and correspond to the "biophors" of Weismann. See *Heredity*.

Pangenesis (*pan-jen'-es-is*) [πᾶς, all; γένεσις, production]. In biology, Darwin's theory of heredity, which supposes the existence of gemmules separated from the body-cells and segregated from the circulation by the reproductive glands. These preformed constituents of all parts of the fully-formed animal or plant become aggregated in the germ, and give rise by a process of evolution to the new organism. Pangenesis is opposed to the theory of epigenesis, or the origin of the fully-formed organism by a gradual process of differentiation. See *Heredity*. **P., Intracellular,** the origin of ultimate vital particles (pangenes, gemmules, biophors) within the cell.

Pangenetic (*pan-jen-et'-ik*) [πᾶς, all; γένεσις, genesis]. Pertaining to pangenesis.

Pangium edule (*pan'-je-um-e-du'-le*) [L.]. A bixaceous plant of Java. Its oily leaves, though edible after due preparation, contain a powerfully narcotic principle which is readily removed by maceration in cold water. Unof.

Panhistophyton (*pan-his-toff'-it-on*) [πᾶς, all; ἱστός, web, tissue; φυτόν, plant]. See *Microbe of Pebrine*, under *Bacteria*. See also *Microsporidia*.

Panhysterectomy (*pan-his-ter-ek'-to-me*) [πᾶς, all; ὑστέρα, womb; ἐκτομή, excision]. Complete extirpation, or surgical removal, of the uterus.

Panicle (*pan'-ik-l*) [*panus*, a thread wound upon the bobbin in a shuttle]. In biology, a branched raceme; an inflorescence of varying shape (determinate, indeterminate, cymose, botryose), but typically loose and spreading, with repeatedly branched peduncles, as seen in the grasses or the lilac.

Panicula (*pan-ik'-u-lah*) [L.]. A swelling or tumor.

Paniculate (*pan-ik'-u-lāt*) [*panicula*, a panicle]. In biology, arranged in panicles.

Paniculus (*pan-ik'-u-lus*). See *Panniculus*.

Panicum (*pan'-ik-um*) [L.]. Panic-grass, a graminaceous plant widely distributed. **P. insulare,** a West Indian species, having purgative properties. Unof.

Panidrosis (*pan-id-ro'-sis*) [πᾶς, all; ἱδρώς, sweat]. General perspiration.

Panis (*pan'-is*) [L.]. Bread.

Panizza, Foramen of. See *Foramina, Table of.*

Panmixia (*pan-miks'-e-ah*) [πᾶς, all; μῖξις, mixing]. In biology, Weismann's term for the tendency of organic structures to retrogress and disappear when their value to the species becomes *nil*, as *e.g.*, the eyes in cave-animals.

Pannecrotomy (*pan-nek-rot'-o-me*) [πᾶς, all; νεκρός, dead; τομή, a cutting]. The dissection of all dead bodies, suggested by Kraus as the best method to prevent burial of living persons.

Pannetier's Green. Same as *Mittler's Green.*

Panneuritis (*pan-nu-ri'-tis*) [πᾶς, all, every; νεῦρον, nerve; ιτις, inflammation]. A synonym of multiple neuritis.

Panniculus (*pan-ik'-u-lus*) [dim. of *pannus*, a piece of cloth]. A small piece of cloth. In anatomy, a small membrane. **P. adiposus,** a compact layer in the subcutaneous stratum of the skin, in which the interfascicular spaces of the reticular framework of fibro-elastic bundles are occupied by adipose tissue. The large, thin muscles by which the lower animals move the skin, represented in man mainly by the platysma and by some of the facial muscles. **P. cordis,** the pericardium. **P. subtilis,** the pia mater. **P. transversus,** the diaphragm.

Pannose (*pan'-ōs*) [*pannus*, cloth, rag]. In biology: (*a*) Having the texture or appearance of woolen cloth or felt. (*b*) Covered with a felted coat of hairs.

Pannus (*pan'-us*) [L., a cloth]. Vascularization of the cornea, usually due to the irritation of trachoma-granulations. (The cornea is normally non-vascular.) **P. carnosus, P. crassus,** one that has acquired a considerable thickness. **P. siccus,** an old pannus composed of connective tissue and poor in vessels.

Panochia (*pan-o'-ke-ah*). Synonym of *Venereal Bubo.*

Panococo (*pan-o-ko'-ko*) [S. Amer.]. The South American leguminous tree, *Swartzia tomentosa;* its bark is strongly sudorific, and the tree affords a black resin. Unof.

Panoïstic (*pan-o-is'-tik*) [πᾶς, all; ᾠόν, egg]. In biology, applied to ovaries that produce ova only; as distinguished from *meroïstic* ovaries, which produce separate ova and yolk-cells or nutritive cells.

Panopathy (*pan-op'-ath-e*) [πᾶς, all; πάθος, disease]. A disease widely prevalent among many people, or affecting all the tissues of one individual.

Panophobia (*pan-o-fo'-be-ah*). See *Pantophobia.*

Panophthalmia (*pan-off-thal'-me-ah*). See *Panophthalmitis.*

Panophthalmitis (*pan-off-thal-mi'-tis*) [πᾶς, all; ὀφθαλμός, eye; ιτις, inflammation]. Inflammation of all the tissues of the eyeball.

Panosteitis (*pan-os-te-i'-tis*) [πᾶς, all; ὀστέον, bone; ιτις, inflammation]. An inflammation of all the parts of a bone.

Panotitis (*pan-o-ti'-tis*) [πᾶς, all; οὖς, ear; ιτις, inflammation]. An inflammatory affection involving all the structures of the ear, and resulting in complete destruction of its functions, with dangerous bone-sequelæ.

Panpharmacon (*pan-far'-mak-on*) [πᾶς, all; φάρμακον, drug]. A panacea.

Panphlegmon (*pan-fleg'-mon*) [πᾶς, all; φλεγμονή, inflammation]. Gangrene of rapid course and development, probably microbic in origin.

Panphobia (*pan-fo'-be-ah*) [πᾶς, all; φόβος, dread]. Synonym of *Panophobia.*

Panplegia (*pan-ple'-je-ah*) [πᾶς, all; πληγή, stroke]. Generalized paralysis.

Pansch, Fissure of. See *Fissures, Table of.*

Pansclerosis (*pan-skle-ro'-sis*) [πᾶς, all; σκλερος, hard]. Complete sclerosis or hardening of a part.

Panspermatism (*pan-sper'-mat-izm*) [πᾶς, all; σπέρμα, seed]. In biology, Spallanzani's theory that the air is full of invisible germs; the theory of omnipresent germs.

Panspermia (*pan-sper'-me-ah*). Same as *Pansermatism.*

Panspermic (*pan-sper'-mik*) [πᾶς, all; σπέρμα, seed]. Pertaining to panspermatism.

Panspermism (*pan-sper'-mizm*). See *Panspermatism.*

Panspermist (*pan-sper'-mist*) [πᾶς, all; σπέρμα, seed]. One who believes in spontaneous or equivocal generation. See *Abiogenesis.*

Panspermium (*pan-sper'-me-um*) [πᾶς, all; σπέρμα, germ]. The hypothetic ultimate element of matter.

Panspermy (*pan-sper'-me*) [πᾶς, all; σπέρμα, seed]. Same as *Panspermatism.*

Pansphygmograph (*pan-sfig'-mo-graf*) [πᾶς, all; σφυγμός, pulse; γράφειν, to write]. A variety of cardiograph by means of which tracings can be taken simultaneously of the cardiac movements, the arterial pulse, and the respiration.

Pansy (*pan'-ze*). See *Viola tricolor.*

Pant [ME., *panten*, to pant, gasp]. To breathe hard or quickly.

Pantadenodes (*pan-tad-en-o'-dēz*) [πᾶς, all; ἀδήν, gland; εἶδος, like]. Made up entirely of glandular tissue; *e. g.*, the pancreas.

Pantagogue (*pan'-tag-og*) [πᾶς, all; ἀγωγός, leading]. A medicine intended to expel all morbific matters. [Old.]

Pantais. See *Pantas.*

Pantamorphia (*pan-tam-or'-fe-ah*) [πᾶς, all; μορφή, form]. General deformity.

Pantamorphic (*pan-tam-or'-fik*) [πᾶς, all; ἀμορφία, shapelessness]. Completely deformed.

Pantanencephalia (*pan-tan-en-sef-a'-le-ah*) [πᾶς, all; ἀνεγκέφαλος, brainless]. Total congenital absence of the brain.

Pantanencephalic (*pan-tan-en-sef-al'-ik*) [πᾶς, all; ἀ priv.; ἐγκέφαλος, brain]. Congenitally destitute of brain.

Pantaphobia (*pan-taf-o'-be-ah*) [πᾶς, all; ἀ priv.; φόβος, fear]. Total absence of fear.

Pantas (*pan'-tas*) [*pantais, pantois*, a disease of hawks]. A pulmonary disease of hawks. Spelled also *pantass, pantasse, pantess, pantais.*

Pantatrophia, Pantatrophy (*pan-tat-ro'-fe-ah, pan-tat'-ro-fe*) [πᾶς, all; ἀτροφία, atrophy]. Complete or general atrophy.

Pantephobia (*pan-tef-o'-be-ah*). Synonym of *Hydrophobia.*

Pantess (*pan'-tes*). See *Pantas.*

Panthodic (*pan-thod'-ik*) [πᾶς, all; ὁδός, way]. Of nervous impulses, radiating to all parts of the body.

Panting (*pant'-ing*) [ME., *panten*, to pant]. Breathing loudly and rapidly, like a dog that has run fast.

Panto- (*pan'-to-*). See *Pan-.*

Pantogamy (*pan-tog'-am-e*) [πᾶς, all; γάμος, marriage]. Reckless, indiscriminate sexual intercourse.

Pantogangliitis (*pan-to-gang-gle-i'-tis*) [πᾶς, all; γάγγλιον, ganglion; ιτις, inflammation]. A synonym of *Asiatic Cholera.*

Pantograph (*pan'-to-graf*) [πᾶς, all; γράφειν, to write]. An instrument for the mechanical copying of diagrams, etc., upon the same scale, or upon an enlarged or a reduced scale.

Pantographic (*pan-to-graf'-ik*) [πᾶς, all; γράφειν, to write]. Pertaining to a pantograph and to pantography.

Pantography (*pan-tog'-ra-fe*) [πᾶς, all; γράφειν, to write]. 1. General description. 2. The process of copying by a pantograph.

Pantologic (*pan-to-loj'-ik*) [πᾶς, all; λόγος, science]. Pertaining to pantology.

Pantologist (*pan-tol'-o-jist*) [πᾶς, all; λόγος, science]. One versed in pantology.

Pantology (*pan-tol'-o-je*) [πᾶς, all; λόγος, science]. Universal knowledge.

Pantometer (*pan-tom'-et-er*) [πᾶς, all; μέτρον, measure]. An instrument for measuring angles of all kinds.

Pantometric (*pan-to-met'-rik*) [πᾶς, all; μέτρον, measure]. Pertaining to pantometry.

Pantometry (*pan-tom'-et-re*) [πᾶς, all; μέτρον, measure]. 1. Universal measurement. 2. The use of the pantometer.

Pantomorph (*pan'-to-morf*) [πᾶς, all; μορφή, form]. That which assumes, or exists in, all shapes.

Pantomorphic (*pan-to-mor'-fik*) [πᾶς, all; μορφή, form]. Assuming all shapes.

Pantophagist (*pan-toff'-aj-ist*) [πᾶς, all; φαγεῖν, to eat]. One who is omnivorous.

Pantophagous (*pan-toff'-ag-us*) [πᾶς, all; φαγεῖν, to eat]. Omnivorous.

Pantophagy (*pan-toff'-aj-e*) [πᾶς, all; φαγεῖν, to eat]. The habit of eating all kinds of food.

Pantophobia (*pan-to-fo'-be-ah*) [πᾶς, all; φόβος, fear]. Insane dread of all things.

Pantophthalmia (*pan-toff-thal'-me-ah*). Synonym of *Panophthalmitis.*

Pantoplethora (*pan-to-pleth'-or-ah*) [πᾶς, all; πλῆθώρη, fulness]. General hyperemia.

Pantoscopic (*pan-to-skop'-ik*). See *Bifocal.*

Pantostomate (*pan-to-sto'-māt*). Same as *Pantostomatous.*

Pantostomatous (*pan-to-sto'-mat-us*) [πᾶς, all; στόμα, mouth]. In biology, capable of ingesting food at any or every point on the surface of the body, *e. g.*, an ameba.

Pantozoötia (*pan-to-zo-o'-she-ah*). Synonym of *Panzoöty.*

Panygrous (*pan-ig'-rus*) [πάνυγρος, wet]. Fluid throughout.

Panzoism (*pan-zo'-izm*) [πᾶς, all; ζωή, life]. In biology, a collective term for the various elements or factors of vitality.

Panzoötic (*pan-zo-ot'-ik*) [πᾶς, all; ζῷον, animal]. Of the nature of a panzoöty; attacking all, or many animals.

Panzoöty (*pan-zo'-o-te*) [πᾶς, all; ζῷον, animal]. A disease attacking all, or a great many, animals at once.

Pap [ME., *pap*, pap]. A soft, semiliquid food for infants. Also the nipple. **P.-pox.** Same as *Cowpox.*

Papain (*pa'-pa-in*) [*Papaiamaram*, the native Malabar name of papaya]. A proteolytic ferment obtained from papaw-milk, the juice of *Carica papaya*, a tree native to South America. It has the digestive properties of pepsin, but is far more active, dissolving fibrin in neutral, acid, or alkaline liquids. It is an excellent solvent of false membranes. *Papayotin* and *Caricin* are other names for the ferment. Dose gr. j–x. Unof.

Papaina (*pa-pa-in'-ah*) [*gen.*, *Papainæ*]. See *Papain.*

Papaver (*pa-pa'-ver*) [*papaver*, poppy: *gen.*, *Papaveris*]. The poppy, the juice and extracts of which possess narcotic properties. Opium is obtained from *P. somniferum.* The *British Pharmacopeia* includes the nearly ripe dried capsules of the foregoing, from which are prepared the following: **Papaveris, Decoctum**, only used externally. **P., Extract.** Dose gr. ij-v. **P., Syrup.** Dose ʒj. The action of these preparations is similar to, but much weaker and more uncertain than, that of opium. **P. rheas**, the red or corn poppy resembling opium in its action, but milder. **Rheados, Syr.** Dose ʒj.

Papaveraldin (*pa-pav-er-al'-din*) [*papaver*, poppy], $C_{20}H_{19}NO_5$. A crystalline oxidation-product of papaverin.

Papaverin (*pap-av′er-in*) [*papaver*, poppy], $C_{21}H_{21}NO_4$. An alkaloid found in opium. It is narcotic, and produces primarily muscular relaxation, later convulsions. Dose gr. ¼. Unof.

Papaverous (*pap-av′-er-us*) [*papaver*, poppy]. Partaking of the character of the poppy.

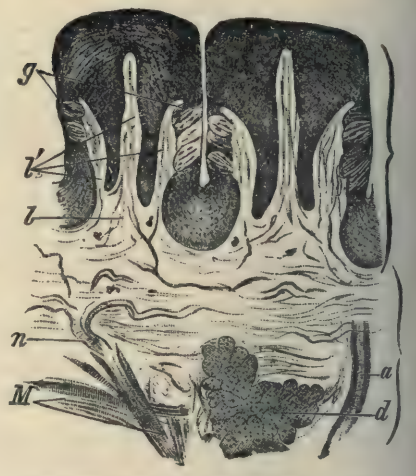
Papaw (*pa-paw′*) [a name of Malabar origin]. 1. The seed of *Asimina triloba*, a prompt emetic. Dose of the fld. ext. ♏x–xxx. Unof. 2. The tree *Carica papaya*; also, its edible fruit. See *Papain*.

Papayotin (*pap-a-yo′-tin*). See *Papain*.

Paper (*pa′-per*) [πάπυρος, the plant papyrus]. See *Charta*. **P.-shell Lobster**. See *Buckle-shell*.

Papilionaceous (*pap-il-e-on-a′-she-us*) [*papilio*, butterfly]. Resembling a butterfly.

Papilla (*pap-il′-ah*) [L., a nipple]. In anatomy, any small, soft, conic eminence, as the nipple. The word is used alone to designate the optic disc or nerve-head as seen by the ophthalmoscope. In pathology, a pimple, or pustule. Cf. *Mammilla*; *Wart*. **P., Caliciform, P., Circumvallate,** one of the large papillæ at the root of the tongue, arranged like a V opening forward. **P., Clavate.** Synonym of *P., Fungiform*. **P., Compound,** a papilla covered with several perfect secondary papillæ. **P., Conic.** See *P., Filiform*. **P., Conoidal.** Synonym of *P., Filiform*. **P., Dental.** See *Organ, Enamel*. **P., Duodenal,** the elevation at the point where the ductus choledochus communis enters the duodenum. **P. of Eye.** See *Disc*. **P., Filiform,** any one of the smallest and most numerous of the lingual papillæ. They are conic and have projecting from their apices filiform processes of a whitish tint.



FILIFORM PAPILLÆ. × 30.
1. Primary papilla. 2. Secondary papillæ on its summit. 3. Epithelial process on papilla. 4. Single process, with entangled epithelial cells.

P., Foliate, one of the small folds of mucous membrane at the sides of the tongue near its base, containing taste-organs. **P., Fungiform,** any one of the medium-sized papillæ of the tongue. They are named from their resemblance to a young mushroom. **P., Hair,** the projection of the corium into the depression at the end of the hair-bulb. **P. of Kidney.** See *P., Renal*. **P. Lacrymal,** the small elevation at the inner edge of the eyelid containing the opening into the canaliculus. **P., Lingual,** one of the elevations of the mucous membrane of the dorsum of the tongue; they are covered by stratified epithelium,

FUNGIFORM PAPILLA. × 30.

and are of three varieties, *filiform*, *fungiform*, and *foliate*. See *Illustrations*. **P. mammæ,** the nipple. **P.,**

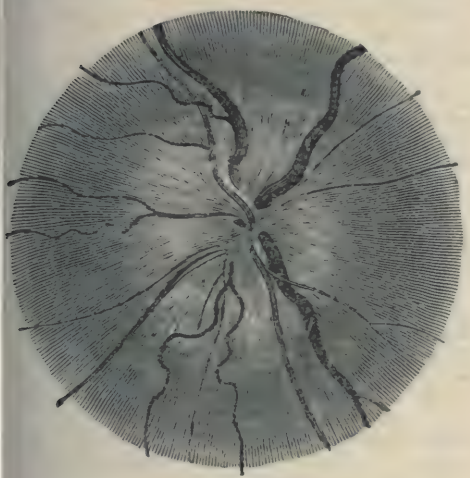
FOLIATE PAPILLÆ IN THE RABBIT. × 80.
l, l′. Primary and secondary septa. *g*. Taste-buds. *n*. Medullated nerve. *d*. Serous gland. *a*. Its duct. *M*. Muscular fibers.

Maximal. Same as *P., Circumvallate*. **P., Medullary,** one of the small eminences on the medulla oblongata. **P., Minimal.** Same as *P., Conic*. **P., Nerve,** any one of the skin-papillæ containing tactile corpuscles or nervous plexuses. **P. optica,** the optic disc or prominence formed by the fibers of the optic nerve after having entered the cavity of the eyeball. **P., Renal,** the summit of any one of the renal pyramids projecting into the renal pelvis. **P. of Skin,** any one of the minute finger-like projections of the corium. **P. spiralis,** the same as *Organ of Corti*. See *Corti, Organ of*. **P., Tactile,** one of the papillæ of touch; little eminences of the true skin containing tactile corpuscles and nerve-fibers. **P. truncatæ.** Synonym of *P., Circumvallate*. **P., Vallate.** See *P., Circumvallate*.

TONGUE OF RABBIT, SHOWING FOLIATE PAPILLÆ, P. F. (*From Stirling*.)

Papillar (*pap-il′-ar*). Synonym of *Papillary*.

Papillary (*pap′-il-a-re*) [*papilla*, nipple]. Pertaining to a papilla. Also, pertaining to the nipple. Bearing papillæ. **P. Wave.** See *Percussion-wave*.



Papillate (*pap′-il-āt*) [*papilla*, nipple, bud]. In botany, covered with papillæ.

Papilliferous (*pap-il-if′-er-us*) [*papilla*, papilla; *ferre*, to bear]. Papillate; bearing one or more fleshy excrescences.

Papilliform (*pap-il′-if-orm*) [*papilla*, nipple; *forma*, to form]. Shaped like a papilla, or nipple. **P. Bodies of Van Bemmelen.** See *Megalesthete*. **P. Layer of the Skin,** the layer bearing the papillæ. **P. Muscles,** those conic columnæ carneæ of the heart to which the chordæ tendineæ are attached.

Papillitis (*pap-il-i′-tis*) [*papilla*, papilla; *ιτις*, inflammation]. Inflammation of the optic disc or papilla of the eye. The old terms *choked disc*, *descending neuritis*, etc., implied unproved theories of causation, and have been replaced by the adoption of the

better term *papillitis*. Intracranial diseases, as tu-

PAPILLITIS.

mors, meningitis, abscess, etc., are the most frequent cause.

apilloma (*pap-il-o'-mah*) [*papilla*, papilla; *ὄμα*, tumor: *pl.*, *Papillomata*]. A term loosely employed to include corns, warts, horns, and certain nevi. Papillomata stand midway between true tumors and inflammatory growths; a papilloma is any growth on the skin or mucous membrane based upon, or resembling, a normal papilla. **P., Hard**, a form in which the connective-tissue framework is denser and the cells fewer than usual. It grows chiefly from the skin. **P., Soft**, one growing from mucous membranes, especially in the uterus, rectum, and bladder.

apillomatosis (*pap-il-o-mat-o'-sis*) [*papilla*, papilla; *ὄμα*, tumor; *νόσος*, disease]. The widespread formation of papillomata; also the state of being affected with multiple papillomata.

apillomatous (*pap-il-o'-mat-us*) [*papilla*, papilla; *ὄμα*, tumor]. Pertaining to a papilloma.

apilloretinitis (*pap-il-o-ret-in-i'-tis*). Synonym of *Neuroretinitis*.

apillose (*pap'-il-ōz*) [*papilla*, a nipple]. Bearing papillæ.

apillulate (*pap-il'-u-lāt*) [*papillula*, papillule]. Papular; covered with papillulæ.

apillule (*pap'-il-ūl*) [*papillula*, dim. of *papilla*, a nipple]. 1. A small papilla or tubercle. 2. Also applied to a small depression, as a variole, when it has a central elevation.

apoid (*pap'-oid*). A proprietary preparation similar to or identical with *papain*.

apoose, Pappoose (*pap-oos'*) [Amer. Ind.]. An Indian babe or young child. **P.-root.** Synonym of *Caulophyllum*.

appiferous (*pap-if'-er-us*) [*πάππος*, down; *ferre*, to bear]. Bearing a pappus.

appus (*pap'-us*) [*πάππος*, down]. The fine down first appearing on the cheeks and chin. In biology, the modified calyx-limbs of the florets of the *Compositæ*.

apula (*pap'-u-lah*). See *Papule*.

apular (*pap'-u-lar*) [*papula*, papule]. Of the nature of a papule.

apule (*pap'-ūl*) [*papula*, a pimple]. A small circumscribed, solid elevation of the skin. **P., Moist**, a name for a broad condyloma. **P., Mucous**, a mucous patch of syphilis.

Papuliferous (*pap-u-lif'-er-us*) [*papula*, a pimple; *ferre*, to bear]. Pimply; covered with papulæ.

Papulose (*pap'-u-lōz*). Synonym of *Papular*.

Papulous (*pap'-u-lus*). Synonym of *Papular*.

Papyraceous (*pap-ir-a'-se-us*) [*papyrus*, paper]. In biology, of a papery texture.

Papyritious (*pap-ir-ish'-us*) [*papyrus*, paper]. In biology, resembling paper, as the nests of certain wasps.

Paquelin's Cautery. See *Cautery*.

Par [L.]. A pair. **P. duodecimum**, an old name for the hypoglossal nerve. **P. medullæ primum**, an old term for the glosso-pharyngeal nerve. **P. medullæ secundum**, the vagus nerve. [Old.] **P. nonum**, an old name for the hypoglossal nerve. **P. piqûre.** See *Culture*. **P. vagum**, the vagus nerve.

Para- (*par'-ah-*) [*παρά*, beyond, beside]. A prefix signifying beyond, beside, near, the opposite of, etc. In chemistry, it denotes close relationship, and is applied, *e. g.*, to a derivation of the benzol ring formed by the substitution of two atoms of hydrogen situated opposite each other. In biology, it indicates comparison with another object, although a distinct difference exists. In pathology, it signifies a condition varying from the normal, though resembling it somewhat.

Para-analgesia (*par-ah-an-al-je'-ze-ah*) [*παρά*, beside; *ἀναλγησία*, insensibility to pain]. Analgesia limited to the lower limbs and the lower half of the trunk.

Para-anesthesia (*par-ah-an-es-the'-ze-ah*) [*παρά*, beside; *ἀναισθηθία*, anesthesia]. Anesthesia affecting both sides of the body below the waist.

Parabanic Acid (*par-ab-a'-nik*). See *Oxalyurea*.

Parabin (*par'-ab-in*). See *Gelose*.

Parablast (*par'-ab-last*) [*παρά*, beside; *βλαστός*, germ]. In biology, Kupffer's term for peculiar nutritive cells lying under the blastoderm of certain reptilian meroblastic eggs, as distinguished from the *archiblast* or formative cells. From it are developed the connective tissues, the endothelial cells, the corpuscles of the blood, the blood-plasma, and the lymph.

Parablastic (*par-ab-las'-tik*) [*παρά*, beside; *βλαστός*, germ]. Pertaining to the parablast.

Parablepsis (*par-ab-lep'-sis*) [*παρά*, beside; *βλέψις*, vision]. False or perverted vision.

Paraboulia (*par-ab-oo'-le-ah*). See *Parabulia*.

Parabranchia (*par-ab-rang'-ke-ah*) [*παρά*, beside; *βράγχια*, gills: *pl.*, *Parabranchiæ*]. In biology, the second gill of a gastropodous mollusc.

Parabranchial (*par-ab-rang'-ke-al*) [*παρά*, beside; *βράγχια*, gills]. Pertaining to a parabranchia.

Parabulia (*par-ab-u'-le-ah*) [*παρά*, beside; *βουλή*, will]. Abnormality of the volitional action.

Parabuxidin (*par-ab-uks'-id-in*) [*παρά*, beside; *buxus*, the box-tree]. A crystalline alkaloid found in the common garden-box.

Parabuxin (*par-ab-uks'-in*) [*παρά*, beside; *buxus*, the box-tree], $C_{24}H_{48}N_2O$. An alkaloid found in common garden-box.

Parabysma (*par-ab-iz'-mah*) [*παράβυσμα*; *παραβύειν*, to stuff: *pl.*, *Parabysmata*] Turgescence, especially of a viscus.

Paracanthoma (*par-ak-an-tho'-mah*) [*παρά*, beside; *ἀκανθα*, prickle; *ὄμα*, tumor]. A new growth affecting the prickle-cell layer of the skin.

Paracanthosis (*par-ak-an-tho'-sis*) [*παρά*, beside; *ἀκανθα*, prickle; *νόσος*, disease: *pl.*, *Paracanthoses*]. Any skin-disease characterized by some anomaly of the prickle-cell layer.

Paracarpium (*par-ak-ar'-pe-um*) [*παρά*, beside; *καρπός*, fruit]. In biology, an abortive pistil or ovary.

Paracele (*par'-as-ēl*) [*παρά*, beside; *κοιλία*, a hollow] A lateral ventricle of the brain.

Paracenterion (*par-as-en-te'-re-on*). Synonym of *Trocar.*

Paracentesis (*par-as-en-te'-sis*) [παρά, beside; κέντησις, puncture]. Piercing or tapping a cavity of the body, such as the chambers of the eye, or the thorax, for the evacuation of fluid.

Paracentral (*par-as-en'-tral*) [παρά, beside; κέντρον, center]. Alongside, or situated near, a center. **P. Lobule.** See *Lobulus.*

Paracentric (*par-as-en'-trik*) [παρά, beside; κέντρον, center]. Approaching the center.

Paracephalus (*par-as-ef'-al-us*) [παρά, beside; κεφαλή, head]. 1. A species of omphalositic monsters, characterized by the presence of four extremities, more or less imperfect, especially in the digits, an imperfectly-formed head, a rudimentary condition of the viscera, and, occasionally, absence of the heart. The paracephalus is one of unioval twins, the sex being always the same, and usually female. It is incapable of living. 2. A variety of the foregoing species in which the head is very imperfectly-formed, more or less defective in all its parts, but exhibiting rudiments of the cranium and of the organs of sense, and possessing even an oral orifice and a buccal cavity. The trunk is also defective, and there are no superior extremities.

Parachloralose (*par-ak-lo'-ral-ōz*) [παρά, beside; χλωρός, green]. A product of the action of chloral upon sugar. It is insoluble in water and is practically inert.

Paracholesterin (*par-ak-o-les'-ter-in*) [παρά, beside; χολή, bile; στέαρ, fat], $C_{26}H_{44}O$. One of the vegetable cholesterins.

Paracholia (*par-ak-o'-le-ah*) [παρά, beside; χολή, bile]. Any abnormality in the secretion of bile.

Parachordal (*par-ak-or'-dal*) [παρά, beside; χορδή, a string; specifically the chorda or notochord]. In biology: (*a*) One of two bars of cartilage extending alongside the occipital notochord in the human fetus. (*b*) Adjoining the cephalochord; situated at the side of the cranial part of the notochord of the embryo. (*c*) Pertaining to the cartilaginous basis of the cranium in the embryo.

Parachrea (*par-ak-re'-ah*) [παρά, beside; χροιά, color]. Morbid discoloration, or change of complexion.

Parachroma (*par-ak'-ro-mah*) [παρά, beside; χρῶμα, color]. Any pigmentary disease of the skin. See *Parachromatism.*

Parachromatin (*par-ak-ro'-mat-in*) [παρά, beside; χρῶμα, color]. In biology, that portion of the nucleoplasm which goes to form the spindle-threads during mitosis; linin. It is but slightly stainable, whence the name.

Parachromatism (*par-ak-ro'-mat-izm*) [παρά, beside; χρῶμα, color]. False, or incorrect perception of color. It is not the same as true color-blindness, which it may approach more or less completely.

Parachromatoblepsia (*par-ak-ro-mat-o-blep'-se-ah*). See *Parachromatism.*

Parachromatosis (*par-ak-ro-mat-o'-sis*) [παρά, beside; χρῶμα, skin; νόσος, disease]. Any one of the pigmentary skin-diseases.

Parachromophore (*par-ak-ro'-mo-for*) [παρά, beside; χρῶμα, color; φορός, bearing]. In biology, applied to chromogenic bacteria that produce the pigment as an excretion-product, but retain it in the organism.

Parachrosis (*par-ak-ro'-sis*) [παρά, beside; χρῶσις, coloring]. The existence of a pigmentary skin-disease.

Parachymosis (*par-ak-i-mo'-sis*) [παρά, beside; χυμός, juice]. A morbid state of a secretion or a secreting organ.

Paracinema (*par-as-in-e'-mah*). Synonym of *Dislocation.*

Paracinesis (*par-as-in-e'-sis*) [παρά, beside; κίνησις, motion]. Morbid movement of the voluntary muscles, arising from a diseased condition of the motor nerves or centers.

Paraclonus (*par-ak'-lo-nus*). Synonym of *Paramyoclonus.*

Paracmasis (*par-ak'-mas-is*). Synonym of *Paracme.*

Paracmastic (*par-ak-mas'-tik*) [παρά, beside; ἀκμή, acme]. Pertaining to the declining stage.

Paracme (*par-ak'-me*) [παρά, beside; ἀκμή, point, prime]. In biology, the degeneration or decadence of a group of organisms after they have reached their acme of development.

Paracnemion (*par-ak-ne'-me-on*). Synonym of *Fibula.*

Paracoe (*par-ak'-o-e*) [παρακοή, only half heard]. Some perversion of the sense of hearing, in which sounds are not heard distinctly.

Paracœle (*par'-as-ēl*). See *Paracele.*

Paracœlia (*par-as-e'-le-ah*). Same as *Paracele.*

Paracolitis (*par-ak-o-li'-tis*) [παρά, beside; κῶλον, colon; ιτις, inflammation]. Inflammation of the outer coat of the colon.

Paracolpitis (*par-ak-ol-pi'-tis*) [παρά, by; κόλπος, vagina; ιτις, inflammation]. Inflammation of the connective tissue about the vagina.

Paracondylar, (*par-ak-on'-dil-ar*) [παρά, beside; κόνδυλος, knuckle; εἶδος, like]. Situated alongside a condyle or a condylar region.

Paracondyloid (*par-ak-on'-dil-oid*) [παρά, beside; κόνδυλος, knuckle; εἶδος, form]. Adjoining the condyles.

Paracone (*par'-ak-ōn*) [παρά, beside; κῶνος, cone]. The antero-external cusp of an upper molar tooth.

Paraconicin (*par-ak-on'-is-in*) [παρά, beside; κώνειον, hemlock]. An isomer of coniin, possessing similar physiologic properties.

Paraconid (*par-ak-o'-nid*) [παρά, beside; κῶνος, cone]. The antero-internal cusp of a lower molar tooth.

Paraconiin (*par-ak-o'-ni-in*) [παρά, beside; κώνειον, hemlock], $C_8H_{15}N$. A principle formed from normal butyraldehyd and butylidene chlorid upon heating them with alcoholic ammonia. It is a colorless liquid, with a stupefying odor, boiling at 168°–170° C. It is said to have the physiologic properties of coniin, whence the name.

Paracope (*par-ak'-o-pe*) [παρά, beside, aside; κόπτειν, to strike]. Insanity or delirium.

Paracopic (*par-ak-op'-ik*) [παρακοπτικός, frantic]. Insane or delirious.

Paracorolla (*par-ak-o-rol'-ah*) [παρά, about; κορώνη, crown, garland]. In biology, an appendage in the throat of the corolla; the crown, as in *Narcissus.*

Paracoto (*par-ak-o'-to*) [παρά, beside; Sp., *coto*, a cubit]. A South American tree closely related to *Coto.* Its bark contains a neutral substance, *paracotoïn*, closely resembling *cotoïn*, but about half as strong. **P. Bark,** a variety of bark from Bolivia, of undetermined origin, but much resembling coto. Unof.

Paracotoïn (*par-ak-o'-to-in*) [παρά, beside; Sp., *coto*, a cubit], $C_{19}H_{12}O_6$. An active principle of *Para coto* and *Paracoto Bark*, valuable in cholera. It is similar to, but less active than, cotoïn. Dose gr. ½–j. Unof.

Paracotoïnic Acid (*par-ak-o-to-in'-ik*) [παρά, beside; Sp., *coto*, a cubit], $C_{19}H_{12}O + H_2O$. An amorphous substance obtained when paracotoïn is boiled with potassium hydrate.

Paracoumaric Acid (*par-ak-oo-mar'-ik*) [παρά, beside; *coumarin*], $C_9H_8O_3$. An acid obtained by treating aloes with sulphuric acid.

Paracousia, Paracousis (*par-ak-oo'-ze-ah, par-ak-oo'-sis*). See *Paracusis.*

Paracresotic Acid (*par-ak-re-sot'-ik*). See *Acid.*

Paracresylol (*par-ak-cres'-il-ol*) [παρά, beside; κρέας, flesh; *oleum*, oil]. A derivative of cresol.

Paracrusis (*par-ak-ru'-sis*) [παρά, beside, aside; κρούειν, to strike]. 1. Insanity, delirium. 2. The checking or "driving in" of an eruption or exanthem.

Paracusia, Paracusis (*par-ak-u'-ze-ah, par-ak-u'-sis*) [παρά, beside; ἀκούειν, to hear]. Any perversion of the sense of hearing. **P. acris**, excessively acute hearing, rendering the person intolerant of sounds. **P. duplicata**, a condition in which all or only certain sounds are heard double. **P. localis, P. loci**, Politzer's term for the difficulty in estimating the direction of sounds met with in unilateral deafness, or when the two ears hear unequally. **P. obtusa**, hardness of hearing. **P. perversa**, synonym of *P. willisii*. **P. willisii**. See *Deafness*, *Paradoxic*.

Paracyanogen (*par-as-i-an'-o-jen*) [παρά, beside; κύανος, blue; γεννᾶν, to produce]. A black, amorphous substance resulting when mercuric cyanid is heated, with the evolution of cyanogen gas; it is a polymeric form of cyanogen.

Paracyesis (*par-as-i-e'-sis*) [παρά, beside; κύησις, pregnancy]. Extra-uterine pregnancy.

Paracynanche (*par-as-in-ang'-ke*) [παρά, beside; κυνάγχη, cynanche]. Inflammation of the connective tissues about the larynx.

Paracystitis (*par-as-is-ti'-tis*) [παρά, beside; κύστις, bladder; ιτις, inflammation]. Inflammation of the connective tissue that surrounds the bladder.

Paracytic (*par-a-si'-tik*) [παρά, beside; κύτος, cell]. Lying among cells.

Paradactylar (*par-ad-ak'-til-ar*) [παρά, beside; δάκτυλος, a finger]. In biology, pertaining to the paradactylum.

Paradactylum (*par-ad-ak'-til-um*) [παρά, beside; δάκτυλος, a finger: *pl.*, *Paradactyla*]. In biology, applied to the side of a bird's toe, to distinguish it from the top or sole.

Paradenitis (*par-ad-en-i'-tis*) [παρά, about; ἀδήν, gland; ιτις, inflammation]. Inflammation of the areolar tissue about a gland.

Paraderm (*par'-ad-erm*) [παρά, beside; δέρμα, skin]. In biology, Kupffer's term for a peculiar invagination of the blastoderm of reptilian eggs.

Paradesmosis (*par-ad-ez-mo'-sis*) [παρά, beside; δέσμος, bond]. A disease of the skin characterized by a typical connective-tissue neoplasm.

Paradidymis (*par-ad-id'-im-is*) [παρά, beside; δίδυμος, testicle]. The organ of Giraldès; the remains of the urinary part of the Wolffian body of the fetus.

Paradise (*par'-ad-is*) [παράδεισος, a park]. 1. A park or pleasure-ground. 2. The home of primeval man; the garden of Eden. **P., Grains of.** See *Grains of Paradise*. **P.-tree**, the tree *Simaruba glauca*, found in America from Florida to Brazil. Its bitter bark is a good tonic. Unof.

Paradoxia (*par-ad-oks'-e-ah*) [παράδοξος, incredible]. An absurd or contradictory statement or proposition. **P. sexualis**, sexual excitement occurring independently of the period of the physiologic processes in the generative organs; the abnormal exhibition of sexual instincts in childhood or prior to puberty.

Paradoxic (*par-ad-oks'-ik*) [παράδοξος, incredible]. Of the nature of paradoxia. **P. Contraction.** See *Contraction*. **P. Deafness.** See *Deafness*. **P. Knee-jerk.** See *Reflexes, Table of*. **P. Muscular Contraction**, a slow tonic contraction occurring in a muscle when suddenly relaxed or when its length is suddenly shortened. **P. Temperature.** See *Thermal Ataxia*.

Paraesthesia (*par-es-the'-ze-ah*). See *Paresthesia*.

Paraesthetic (*par-es-thet'-ik*). See *Paresthetic*.

Paraffin (*par'-af-in*) [*parum*, little; *affinis*, related]. 1. A white, odorless, translucent, crystalline hydrocarbon obtained from coal-tar, or by the destructive distillation of wood. In a pure state it resembles white wax in physical properties. 2. In chemistry, the term is applied to any member of the paraffin series $C_n H_{2n+2}$, the lowest representative of which is CH_4, methane. In a more limited sense, the high-boiling (beyond 300° C.) solid hydrocarbons arising from the distillation of the tar obtained from turf, lignite and bituminous shales. Pure paraffins occur as white, translucent, leafy, crystalline masses, soluble in ether and hot alcohol. They melt between 45° and 70° C. and are essentially mixtures of hydrocarbons boiling above 300° C. For *Table of Paraffins*, see under *Hydrocarbons*. See also *Ethane*. **P. durum**, hard or solid paraffin, a mixture of several of the harder members of the paraffin series of hydrocarbons. It is usually obtained by distillation from shale. **P., Liquid**, a liquid hydrocarbon of the paraffin series. **P. Method**, a method of interstitial embedding of tissues, in which there is thorough and complete impregnation of the tissue with the embedding mass. The tissue must be saturated with some fluid with which the paraffin is perfectly miscible, and the fluids usually employed for this purpose are chloroform or turpentine oil. The order of preparation of the tissue is as follows: 1. Into 95 per cent. alcohol for from 12 to 24 hours. 2. Into absolute alcohol for from 24 to 48 hours, until complete dehydration has been secured. 3. Into pure chloroform for from 6 to 8 hours, or until the chloroform has replaced the absolute alcohol. 4. Into a saturated solution of paraffin in chloroform for from 2 to 3 hours. 5. Into pure melted paraffin which has a melting-point of about 50° C., and in this the tissue remains until every interstice has been completely filled with the embedding mass and all the chloroform has been drawn off. **P. molle**, soft paraffin or vaselin. See *Vaselin*. **P.-paper**, paper saturated with melted paraffin. **P., Scaly**, a paraffin that has been resolved into hydrocarbons ranging from heptdecane, $C_{17}H_{36}$, to tricosane, $C_{23}H_{48}$. **P.-treatment.** See *Diphtheria*.

Parafibrin (*par-af-i'-brin*) [παρά, beside; *fibra*, a fiber]. A modified fibrin.

Paraflagellate (*par-af-laj'-el-āt*) [παρά, beside; *flagellum*, a flagellum]. In biology, provided with paraflagella.

Paraflagellum (*par-af-laj-el'-um*) [παρά, beside; *flagellum*, a whip: *pl.*, *Paraflagella*]. In biology, a small supplementary flagellum.

Parafloccule (*par-af-lok'-u-lus*). See *Flocculus*.

Paragammacismus (*par-ah-gam-as-iz'-mus*) [παρά, beside; γάμμα, the letter g]. Inability to pronounce the hard g, and also k, other consonants being substituted, as d or t.

Paragaster (*par-ah-gas'-ter*) [παρά, beside; γαστήρ, the stomach]. In biology, the central cavity of a sponge.

Paragastric (*par-ah-gas'-trik*) [παρά, beside; γαστήρ, stomach]. Lying alongside the gastric cavity.

Paragastrula (*par-ah-gas'-tru-lah*) [παρά, beside; γαστήρ, belly: *pl.*, *Paragastrulæ*]. In biology, the two-layered sac or gastrula formed by the invagination of an amphiblastula.

Paragastrular (*par-ah-gas'-tru-lar*) [παρά, beside; γαστήρ, belly]. Pertaining to the paragastrula.

Paragenesis (*par-aj-en'-es-is*) [παρά, beside; γένεσις, origin]. In biology, the third of Broca's four degrees of fecundity in the union of two species. Cf. *Agenesis*, *Dysgenesis*, *Eugenesis*.

Paragenetic (*par-aj-en-et'-ik*) [παρά, beside; γένεσις, genesis]. Pertaining to paragenesis.

Parageusia (*par-ag-u'-ze-ah*). See *Parageusis.*

Parageusic (*par-ag-u'-zik*) [παρά, beside; γεῦσις, taste]. Pertaining to, or affected with, parageusia.

Parageusis (*par-ag-u'-sis*) [παρά, beside; γεῦσις, taste]. Perversion of the sense of taste.

Paraglenal (*par-ag-le'-nal*) [παρά, beside; γλήνη, the socket of a joint]. In biology, the coracoid of a fish.

Paraglobin (*par-ag-lo'-bin*). Same as *Paraglobulin.*

Paraglobularetin (*par-ag-lob-u-lar-et'-in*) [παρά, beside; *globus*, a round ball; ῥητίνη, resin], $C_{12}H_{16}O_4$. A decomposition-product of globularin obtained when the latter is treated with dilute acids.

Paraglobulin (*par-ag-lob'-u-lin*) [παρά, beside; *globulus*, a little ball]. A native proteid of the globulin class obtained from blood-serum and other fluids of the body. It is called, also, *Fibroplastin*, *Fibrinoplastin*, and *Serum-globulin.* It is precipitated as a white amorphous substance when carbonic acid gas is passed through diluted blood-serum.

Paraglobulinuria (*par-ag-lob-u-lin-u'-re-ah*) [παρά, beside; *globulus*, a little ball; οὖρον, urine]. The presence of paraglobulin in the urine.

Paraglossa (*par-ag-los'-ah*) [παρά, beside; γλῶσσα, tongue]. Swelling of the tongue. Also an hypertrophy of the tongue, usually congenital. In biology, one of a pair of appendages of the ligula found in many insects on each side of the glossa.

Paraglossate (*par-ag-los'-āt*) [παρά, beside; γλῶσσα, tongue]. In biology, provided with paraglossæ.

Paraglossia (*par-ag-los'-e-ah*) [παρά, beside; γλῶσσα, tongue]. Inflammation of the muscles and connective tissues under the tongue.

Paragluconic Acid (*par-ag-lu-kon'-ik*) [παρά, beside; γλυκύς, sweet]. An isomer of gluconic acid distinguished from the latter by forming with the alkaline metals salts that are crystalline instead of amorphous.

Paragnathous (*par-ag'-na-thus*) [παρά, beside; γνάθος, jaw]. 1. In biology, having both mandibles of equal length, their tips falling together, as in certain birds. 2. Pertaining to paragnathus.

Paragnathus (*par-ag'-na-thus*) [παρά, beside; γνάθος, jaw]. A double monster having a supernumerary mandible situated laterally.

Paragoge (*par'-ag-ōg*) [παρά, beside; ἀγωγός, leading]. Reduction of a fracture or luxation.

Paragomphosis (*par-ag-om-fo'-sis*) [παρά, amiss; γόμφωσις, a nailing]. Impaction of the fetal head in the pelvic canal.

Paragraphia (*par-ag-raf'-e-ah*) [παρά, aside; γράφειν, to write]. An aphasic symptom in which there is inability to express words in writing. In *literal* paragraphia the patient cannot even write the letters of the alphabet; in the *verbal* form he can write the letters and perhaps some syllables, but not words.

Paraguay Tea. See *Maté.*

Paraheliotropism (*par-ah-he-le-ot'-ro-pizm*) [παρά, about; ἥλιος, the sun; τρέπειν, to turn]. In biology, the power possessed by certain leaves of placing their surfaces parallel to the rays of light; diurnal sleep. Cf. *Diaheliotropism.*

Parahepatic (*par-ah-he-pat'-ik*) [παρά, beside; ἧπαρ, liver]. About or near the liver.

Parahypnosis (*par-ah-hip-no'-sis*) [παρά, beside; ὕπνος, sleep]. Abnormal sleep, like that of hypnotism or of narcosis.

Parakanthosis (*par-ak-an-tho'-sis*). See *Paracanthosis.*

Parakeratosis (*par-ak-er-at-o'-sis*) [παρά, beside; κέρας, horn; νόσος, disease]. Any disease of the skin characterized by an abnormal quality of the horny layer. **P. variegata,** a rare skin-affection characterized by the presence upon the entire surface of the body of a red exanthem leaving small, irregular, sunken patches of normal skin, and giving to the surface a reticulated appearance. The color varies from yellowish-red to bluish-red, and the affected patches are but slightly raised above the surface. Their borders are sharply defined and their surfaces covered with a fine lamellar desquamation under which they appear waxy and bright. There are no subjective symptoms throughout the course of the affection, which is protracted.

Parakinesis (*par-ak-in-e'-sis*). See *Paracinesis.*

Parakresol (*par-ak-re'-sol*). See *Kresol.*

Paralactic Acid (*par-al-ak'-tik*). See *Acid, Sarcolactic.*

Paralalia (*par-al-a'-le-ah*) [παρά, beside; λαλία, speech]. 1. Inability of correct verbal expression, without loss of the power of thought. 2. A term embracing all abnormalities of speech, from trivial mannerisms to difficulties in the utterance of certain letters, including those painful defects depending upon physical malformations.

Paralambdacism, Paralambdacismus (*par-al-am'-das-izm, par-al-am-das-iz'-mus*) [παρά, beside; λάμβδα, the letter λ]. Inability to pronounce the letter l, or the substitution of other consonants as t, r, s, w for l.

Paralampsis (*par-al-amp'-sis*) [παραλάμπειν, to shine slightly]. A corneal cicatrix. [Old.]

Paralbumin (*par-al'-bu-min*) [παρά, beside; *albumen*, white of egg]. This and metalbumin are two proteid substances found by Scherer in ovarian cysts. They also occur in the ascitic fluid.

Paraldehyd (*par-al'-de-hid*) [παρά, beside; *aldehyd*], $C_6H_{12}O_3$. A polymeric form of aldehyd. It is a colorless liquid of repulsive odor and unpleasant taste. It is a powerful hypnotic, and is diuretic. It is valuable in delirium tremens, mania, tetanus, and other nervous affections. **P.-habit,** morbid addiction to the use of paraldehyd. The following symptoms may be present: Emaciation, anemia, weakness and irregularity of the action of the heart, intermittence and softness of the pulse, palpitation, gastric derangement, costiveness, boulimia, general muscular weakness, general tremulousness, especially in the tongue, facial muscles and hands, feebleness and unsteadiness of gait, general restlessness, paresthesia, insomnia, mental anxiety and agitation, discontent, unreasonableness, mental confusion, mental excitement, temporary loss of memory, incoherence of speech, hallucinations, delusions. The odor of paraldehyd may be appreciable in the breath.

Paraldol (*par-al'-dol*) [παρά, beside; *aldehyd*], $(C_4H_8O_2)_n$. A polymer of aldol that melts at between 80° and 90° C.

Paraleipsis (*par-al-īp'-sis*) [παρά, beside; ἀλείφειν, to anoint]. A disorder of the sebaceous secretion.

Paralerema (*par-al-er-e'-mah*) [παρά, beside; λῆρημα, utterance]. Delirium, or delirious utterance.

Paraleresis (*par-al-er-e'-sis*) [παρά, beside; λῆρησις, speech]. Delirium, or moderate mental disturbance.

Paralexia (*par-al-eks'-e-ah*) [παρά, beside; λέξις, (reading) speech]. A form of aphasia characterized by transposition or substitution of words or syllables in reading.

Paralgesia, Paralgesis (*par-al-je'-ze-ah, par-al-je'-sis*) [παρά, beside; ἄλγος, pain]. Anesthesia or analgesia.

Paralgia (*par-al'-je-ah*) [παρά, beside; ἄλγος, pain]. Any perverted and disagreeable cutaneous sensation as of formication, cold, burning, etc.

Paralinin (*par-al-i'-nin*) [παρά, beside; *linin*, para chromatin]. In biology, the nuclear sap or matrix, a proteid of the globulin class, similar to those found in the cell-protoplasm. Cf. *Paramitom, Paraplasm.*

Parallax (*par'-al-aks*) [παρά, beside; ἄλλος, other]. The apparent displacement of an object by a change

in the position of the observer, or by looking at it alternately with one eye, then with the other; in the latter case the object seems to move. **P., Binocular,** the angle of convergence of the visual axes. **P., Mental,** a slight personal equation in observation due to one's standpoint. See *Equation, Personal.*

parallaxis (*par-al-aks'-is*) [παράλλαξις, alternation; παρά, beside; ἄλλος, other]. 1. The overriding or overlapping of the ends of a fractured bone. 2. Confusion of mind; mental aberration. **P., Crossed.** Synonym of *P., Heteronymous.* **P., Heteronymous,** the apparent shifting of an object toward the side of the covered eye. **P., Homonymous,** the movement of the object toward the side of the uncovered eye.

parallel (*par'-al-el*) [παράλληλος; παρά, beside; ἄλλος, another]. Having the same direction or course. **P. Fissure.** See *Fissures, Table of.*

parallela (*par-al-el'-ah*) [παράλληλος, parallel]. A scaly eruption on the palms of the hands, disposed in parallel lines.

parallelism (*par'-al-el-izm*). See *Isopathy.*

paralogia (*par-al-o'-je-ah*) [παρά, beside; λόγος, reason]. Difficulty in thinking logically. **P., Thematic,** a condition in which the thought is unduly concentrated on one subject. It characterizes the individual with a hobby.

paralogism (*par-al'-o-jism*) [παρά, beside; λόγος, reason]. The logical error of considering effects or unrelated phenomena as the causes of a condition.

paralysant (*par-al-i'-zant*). See *Paralyzant.*

paralysis (*par-al'-is-is*) [παρά, beside; λύειν, to loosen]. A complete loss or great diminution of the power of motion in one or in a number of muscles, or of sensation in a part, or of both motion and sensation. **P., Acute Ascending,** *Landry's Paralysis;* palsy beginning in the feet and ascending to the other muscles of the body, and finally involving the medulla. There is no pain, and no trophic changes; the knee-jerk is usually diminished; the sphincters are uninvolved. The pathology is obscure, and the malady is a very fatal one, usually terminating in death within a week, although it may continue for three or four weeks. Males are more frequently attacked than females, and the affection occurs chiefly between the ages of twenty and forty. See also *Landry's Paralysis,* and *Diseases, Table of.* **P., Acute Atrophic.** See *P., Infantile.* **P., Acute Progressive.** Synonym of *P., Acute Ascending.* **P. agitans,** *Shaking Palsy; Parkinson's Disease;* an affection marked by tremor or alternate contraction and relaxation of the muscles of the part involved. The movements are regular and rhythmic (distinction from insular sclerosis), and begin usually in one hand. They almost never affect the head. They persist during rest and are little influenced by voluntary movement. Later in the disease there is a typical gait, known as *festination* or *propulsion.* It consists in a progressive increase in the rapidity of the gait until the patient breaks into a run, which grows faster and faster until he either falls or seizes some support. This peculiar gait is ascribed to the bent position of the trunk which throws the head so far forward as to bring the center of gravity beyond the line of the feet. Rarely the movement is backward; this is called *retropulsion.* It may be to one or the other side—*lateropulsion.* The speech is slow, monotonous and high-pitched. The face is fixed and expressionless. In advanced stages there is an almost statue-like rigidity of the body. The hand assumes a peculiar position, as if rolling a small body between the thumb and the fingers, but later the position becomes constant, similar to that in which the pen is held—hence the term of *writing hand.* The knee-jerk may be exaggerated. Flushing and heat are sometimes complained of. The course is of long duration, the disease at times lasting twenty or thirty years. The lesion is probably a diffuse sclerosis of the brain and spinal cord. Paralysis agitans is most common in males over forty years of age. **P., Alcoholic,** a multiple neuritis due to alcohol. See *Neuritis, Multiple.* **P., Alternate.** See *Hemiplegia.* **P., Analgesic, with Whitlow.** See *Morvan's Disease.* **P., Anapeiratic.** See *Fatigue-diseases,* and *Professional Neuroses.* **P., Angioneurotic** (*of the auditory nerve*), a disturbance of the circulation in the internal ear characterized by sudden pallor of the face, nausea, tinnitus aurium, partial deafness, and vertigo, the symptoms disappearing rapidly. **P., Anterospinal.** Synonym of *Poliomyelitis, Anterior.* **P., Arsenical,** a paralysis due to a multiple neuritis caused by arsenical poisoning. **P., Association.** Synonym of *P., Glosso-labio-laryngeal.* **P., Atrophic** (*of children*). Synonym of *P., Infantile.* **P., Atrophic, Infantile.** Synonym of *P., Infantile.* **P., Atrophic, Spinal.** See *P., Infantile.* **P., Bell's,** a paralysis of the facial muscles arising from a lesion of the seventh, or facial nerve. This lesion may be on the face, in the temporal bone, or within the skull. Very rarely the affection is bilateral. **P., Brachial,** a paralysis of one or both arms. It may be due to a lesion of the brain-cortex, the spinal cord, or the nerves of the brachial plexus or their roots. **P., Brown-Séquard's.** See *Diseases, Table of.* **P., Bulbar,** *Glosso-labio-laryngeal paralysis;* a form of paralysis due to a degeneration of the nuclei of origin of the nerves (facial, glosso-pharyngeal, vagus, spinal accessory, and hypoglossal) arising in the oblongata. At first only the muscles of the lips, tongue, and pharynx are affected. The disease is marked by difficulty in mastication, deglutition, respiration, phonation, and articulation, and by wasting of the muscles concerned in the performance of these functions. The condition is sometimes a sequel to exposure to severe cold; it may be caused by morbid growths or by syphilis. It is usually confined to the latter half of life, and its prognosis is bad. **P., Caisson.** Synonym of *Caisson-disease.* **P., Central,** a paralysis due to a brain-lesion. **P., Centro-capsular,** a paralysis due to a lesion of the internal capsule. **P., Centrocortical,** one caused by a lesion of the cerebral cortex. **P., Cerebral,** a paralysis due to a brain-lesion. **P., Cerebral Infantile, P., Cerebral** (*of childhood*), a spastic paralysis of children due to a lesion of the brain. It is often caused by the use of the forceps at birth. **P., Cortical,** a paralysis due to a lesion of the cerebral cortex; it is usually a monoplegia or a hemiplegia. **P., Crossed:** 1. A paralysis of the arm and leg of one side, associated with either a facial paralysis or a paralysis of the oculo-motor nerve of the opposite side, due to a lesion involving the pyramidal tracts of the side before they have crossed in the medulla, and a cranial nerve, *e.g.*, the third, the sixth, or the seventh, after its fibers of origin have decussated. 2. Paralysis of the arm on one side and of the leg on the other. **P. cruciata.** Synonym of *P., Crossed.* **P., Crutch.** See *Crutch-paralysis.* **P., Cruveilhier's,** progressive muscular atrophy. **P., Dental,** anterior poliomyelitis occurring in teething children, formerly attributed to disturbed dentition. **P., Diphtheric,** a form sometimes occurring in patients convalescent from diphtheria. It is primarily a multiple neuritis caused by the toxin of diphtheria. **P., Divers'.** See *Caisson-disease.* **P., Duchenne's.** See *Duchenne's Disease* in *Diseases, Table of.* **P., Emotional,** a hysteric paralysis due to emotional excitement. **P., Erb's.** See *Erb,* and *Diseases,*

Table of. **P., Essential.** See *P., Infantile.* **P., Exhaustion,** a functional paralysis due to exhaustion of the nerve-centers by overwork. **P., Facial,** a paralysis of the muscles of the face, usually of one side only. It may be peripheral or central. **P. festinans.** Synonym of *P. agitans.* **P., Galloping,** a swiftly destructive form of general paralysis. **P., General** (*of the Insane*), *General Paresis; Paralytic Dementia; Paretic Dementia; Progressive Paralysis of the Insane*; an organic disease of the brain, characterized by progressive loss of power and by a deterioration of the mental faculties, ending eventually in dementia and death. In the early stages of the disease there are fibrillar tremblings, especially of the tongue and face. Speech is early disturbed. The disease is often associated with posterior spinal sclerosis. In cases presenting this type the knee-jerk is absent. The pupils very early show changes; they may be unequal, irregular in outline, myotic, or may present the Argyll-Robertson phenomenon. Death may result from epileptiform or apoplectiform seizures or from general exhaustion. The affection is most common in males between the ages of thirty and sixty. It is induced by overwork and mental and physical strain, intemperance, syphilis, and lead-poisoning. The lesion is essentially a meningo-encephalitis, with thickening of the cerebral meninges and wasting of the cortical substance. **P., General Spinal,** *Subacute and Chronic Atrophic Spinal Paralysis; Subacute and Chronic Anterior Poliomyelitis; Progressive Muscular Atrophy; Wasting Palsy; Chronic Spinal Muscular Atrophy, Amyotrophic Lateral Sclerosis;* a chronic disease of the spinal cord, characterized by paralysis followed by atrophy involving first the lower and then the upper extremities. It is due to an atrophy of the ganglionic cells in the anterior gray matter of the cord. The causes of the disease are obscure; it usually occurs between the ages of thirty and fifty. **P., Glosso-labio-laryngeal, P., Glosso-labio-pharyngeal, P., Glosso-laryngeal, P., Glosso-pharyngeal.** See *P., Bulbar.* **P., Glossoplegic.** Synonym of *Glossoplegia.* **P., Gubler's.** See *Gubler.* **P., Hemiplegic.** See *Hemiplegia.* **P., Hysteric,** a paralysis occurring in hysteric subjects and simulating organic disease. It is usually accompanied by impairment or loss of sensation, by peculiar contractions, and the other hysteric stigmata. **P., Idiopathic.** Synonym of *Tetany.* **P., Indian-bow,** paralysis of the thyro-arytenoid muscles. **P., Infantile,** *Acute Anterior Poliomyelitis; Acute Atrophic Paralysis; Atrophic Spinal Paralysis; Essential Paralysis;* a disease peculiar to childhood, and characterized by sudden paralysis of one or more limbs or of individual muscle-groups, and followed by rapid wasting of the affected parts, with reaction of degeneration and deformity. It is most common in the first year, and during the warm months. It may be produced by traumatism, exposure to cold, or may follow an exanthem. The tendency is now to consider it infectious. The paralysis is due to changes in the anterior cornua of the gray matter of the spinal cord, with degeneration of the multipolar cells and gradual disappearance of their processes. In accordance with the occurrence of these changes in the lumbar or cervical region the legs or arms are affected. **P., Infantile Spastic.** See *P., Cerebral* (*of childhood*). **P., Intermittent,** a form due to malarial poisoning. **P., Intra-peduncular,** one involving the muscles of the eye in consequence of a lesion situated between the crura cerebri. **P., Ischemic,** paralysis of a part due to cutting off of the circulation, *e. g.*, paralysis of the lower limb following embolism or thrombosis of the femoral artery. **P., Klumpke's,** an atrophic paralysis of the interossei and thenar and hypothenar muscles, with anesthesia of the forearm and fingers and contracted pupils. The lesion is probably in the spinal cord, at the level of the first and second thoracic nerve-roots. **P., Labio-glosso-laryngeal.** See *P., Bulbar.* **P., Landry's.** Same as *P., Acute Ascending.* **P., Laryngeal,** a paralysis usually peripheral, of one or more laryngeal muscles, on one or on both sides. **P., Lead,** a paralysis usually of the extensors of the wrist, causing wrist-drop. It is nearly always bilateral and is due to a peripheral neuritis induced by lead-poisoning. **P., Lenticular,** one resembling bulbar paralysis, due to hemorrhage into the lenticular nucleus of each side. **P., Lingual.** Synonym of *Glossoplegia.* **P., Little's.** Synonym of *P., Infantile.* **P., Local,** one confined to a single muscle or group of muscles. **P., Masticatory,** paralysis of one or more of the muscles supplied by the motor trunk of the trigeminal nerve. **P., Mimetic,** a feigned palsy. **P., Motor,** paralysis of the voluntary muscles. **P., Musculo-spiral,** paralysis of the extensors and supinators of the wrist, due to an injury or to inflammation of the musculo-spiral nerve. **P., Myogenic.** See *P., Infantile.* **P., Myopathic,** palsy due to primary disease of the muscles. **P., Neural,** paralysis due to peripheral neuritis. **P. notariorum.** See *Writers' Cramp.* **P., Nuclear,** one due to a lesion of the nuclei of origin of a cranial nerve. **P., Obstetric,** any paralysis of the child resulting from injuries received during delivery. **P., Occupation.** See *Occupation-neurosis.* **P., Organic,** one due to a structural lesion in the nervous system or in the muscles, as opposed to functional. **P., Painters'.** Synonym of *P., Lead.* **P., Paraplegic.** See *Paraplegia.* **P., Periodic,** a non-febrile paralysis of the arms and legs or neck and pharynx occurring in periodic attacks of short duration. **P., Peripheral,** loss of power due to a lesion of the nervous motor mechanism between the nuclei of origin and the peripheral termination, as distinguished from loss of power due to a lesion between the cortical centers and (including) the nuclei. **P., Phonetic, P., Phonic,** laryngeal paralysis in which the tensors and adductors of the vocal bands are involved. **P., Phosphoric,** a paralysis brought about by poisoning with phosphorus. **P., Post-febrile,** a so-called functional paralysis sometimes occurring during convalescence from certain fevers. **P., Pressure,** paralysis of a group of muscles supplied by a nerve which has been subjected to prolonged pressure. **P. procursoria.** Synonym of *P. agitans.* **P., Progressive Bulbar.** See *P., Bulbar.* **P., Pseudo-** (*of rickets*). See *P., Rachitic Pseudo-.* **P., Pseudobulbar,** a symmetric lesion of the halves of the cerebrum producing paralysis of the lips, the tongue, and the larynx or the pharynx. **P., Pseudohypertrophic,** *Lipomatous Muscular Atrophy; Duchenne's Paralysis;* a chronic disease characterized by progressive muscular weakness, associated with an apparent hypertrophy of the affected muscles. There is an interstitial fibrous overgrowth of the muscles, frequently accompanied by an accumulation of fat and atrophy of the true muscle-fibers. The disease usually begins in the muscles of the calf, and spreads over the body, the muscles of the hand almost always escaping. There is marked lordosis and a characteristic gait with wide separation of the legs and swaying of the body from side to side. The characteristic symptom is the manner in which the patient arises from the floor—he "climbs" up on his legs, on account of the weakened state of the extensor muscles

of the back. The disease is essentially a chronic one, but the patient becomes absolutely helpless long before death. It is most common in young male children usually under ten years of age. The disease is entirely myopathic, no adequate nerve-lesion having as yet been discovered. **P., Puerperal,** the paralysis following labor. It may be due to traumatism during delivery, to pressure by the uterus, or from displacement of the pelvic organs, to puerperal sepsis, to phlebitis and phlegmasia alba dolens (these are really septic causes). These causes usually induce inflammation of the lumbar and sacral nerves. There may, however, be myelitis from puerperal septic infection. **P., Rachitic Pseudo-,** the motor weakness observed in the lower limbs of marked cases of rickets. There is no true paralysis, the condition being due to changes in the ligaments, softening of the bones, and weakness of the muscles. **P., Radial.** Synonym of *P., Musculo-spiral.* **P., Reflex,** the paralysis which sometimes follows immediately upon a wound of a nerve, or the paraplegia that is sometimes due to irritation of an adherent prepuce. Other so-called reflex palsies, as that from renal calculus, are probably due to secondary changes in the spinal cord or nerves. **P., Regressive.** See *P., Infantile.* **P., Rheumatic,** a paralysis from peripheral neuritis the cause of which is apparently exposure to cold, *e. g.*, in some cases of facial paralysis. **P., Saturnine.** Synonym of *P., Lead.* **P., Scrivener's.** Synonym of *Cramp, Writers'.* **P., Segmental,** a paralysis of a segment of a limb produced by hypnotism. **P., Sensory,** anesthesia. **P., Sleep,** paralysis of the musculo-spiral nerve from pressure upon it during sleep. **P., Spastic,** a paralysis associated with rigidity of the muscles and heightened tendon-reflexes. **P., Spastic Spinal.** Synonym of *Lateral Sclerosis.* **P., Telegraphers',** an anapeiratic paralysis sometimes seen in telegraph-operators. **P., Toxemic,** one due to the presence of a poison in the blood. **P., Toxic,** a paralysis due to the influence of a mineral or organic poison on some part of the nervous system. **P. vacillans.** Synonym of *Chorea.* **P., Vasomotor,** a paralysis of the vasomotor center or the vasomotor nerves; it leads to dilatation of the blood-vessels. **P. venenata.** Synonym of *P., Toxic.* **P., Writers',** paralysis with incoördination of the muscles of the wrist and fingers from overuse.

aralysma mesentericum. Synonym of *Tabes mesenterica.*

aralytic (*par-al-it'-ik*) [παράλυσις, paralysis]. Having the nature of paralysis. Affected with paralysis. Also, a person suffering from paralysis; also, one suffering from general paralysis of the insane. **P. Chorea,** a local choreiform spasm connected with a cerebral hemiplegia or monoplegia. It may precede or follow the onset of the paralysis of the limb. **P. dementia.** See *Paralysis, General (of the Insane).* **P. Strabismus.** See *Strabismus.* **P. Theory of Inflammation.** See *Theory.*

aralyzant (*par-al-i'-zant*) [παράλυσις, paralysis]. 1. Effecting or causing paralysis. 2. An agent or drug that induces paralysis. **P., Motor,** a drug paralyzing any part of the motor apparatus; the motor cells of the spinal cord, the motor nerves, or the muscles.

aralyzing (*par'-al-i-zing*) [παράλυσις, palsy]. Producing or giving rise to paralysis. **P. Vertigo.** See *Gerlier's Disease.*

aram (*par'-am*), $C_2N_4H_4$. A substance produced by the evaporation of the aqueous solution of cyanamid. It crystallizes in leaflets that melt at 205° C.; it is insoluble in ether.

aramagnetic (*par-am-ag-net'-ik*) [παρά, beside; μάγνης, magnet]. A term applied to the ordinary form of magnetism, in which the orientation is north and south, in distinction from diamagnetism.

Paramagnetism (*par-am-ag'-net-izm*) [παρά, beside; μάγνης, magnet]. The phenomena exhibited by paramagnetic substances.

Paramastitis (*par-am-as-ti'-tis*) [παρά, near; μαστός, mamma; ιτις, inflammation]. Inflammation of the connective tissue about the mammæ.

Paramastoid (*par-am-as'-toid*) [παρά, beside; μαστός, nipple; εἶδος, like]. 1. Situated near the mastoid process. 2. The jugular process of the occipital bone.

Paramecium (*par-am-e'-se-um*) [παρά, along; μῆνος, length: *pl.*, *Paramecia*]. A longitudinal fissure.

Paramedian (*par-am-e'-de-an*) [παρά, beside; *medius*, middle]. Situated near the median line. **P. Sulcus,** a fissure present in the cervical portion of the spinal cord, not far from the posterior median fissure, and separating the column of Goll from the funiculus cuneatus.

Paramenia (*par-am-e'-ne-ah*) [παρά, beside; μῆνες, menses]. Difficult or disordered menstruation.

Paramere (*par'-am-ēr*) [παρά, beside; μέρος, part]. In biology: (*a*) one of the radial sections composing the body of certain *Medusæ.* (*b*) Any one of a set of radiated parts. (*c*) Either half of a bilaterally symmetric organism or somite.

Parameria (*par-am-e'-re-ah*) [παρά, beside; μηρός, thigh]. The inner surfaces of the thighs.

Parameric (*par-am-er'-ik*) [παρά, beside; μέρος, a part]. Pertaining to a paramere.

Paramesos (*par-am-e'-sos*) [παρά, near; μέσος, middle]. Synonym of *Ring-finger.*

Parametric (*par-am-et'-rik*) [παρά, beside; μήτρα, uterus]. Pertaining to the tissues about the uterus.

Parametritic (*par-am-et-rit'-ik*) [παρά, beside; μήτρα, uterus; ιτις, inflammation]. Relating to, of the nature of, or affected with, parametritis.

Parametritis (*par-am-et-ri'-tis*) [παρά, near; μήτρα, womb; ιτις, inflammation]. *Pelvic Cellulitis;* inflammation of the cellular tissue about the uterus. It is usually due to injury to the cervix and vagina during labor, but may also follow abortion and plastic operations on the cervix. It is marked by pelvic pain, with fever. Suppuration is very prone to take place. The abscess usually points in the inguinal region, but it may point in the thigh, or form a perinephric abscess; it may open into the bowel, bladder, or vagina, or burrow back to the side of the sacrum, or out upon the surface near the trochanter.

Parametrium (*par-am-e'-tre-um*) [παρά, near; μήτρα, womb]. The connective tissue that lies around the uterus.

Paramic Acid (*par-am'-ik*) [παρά, beside; *amid*], $C_{12}H_5N_3O_7$. A crystalline substance obtained when paramid is treated with ammonium and precipitated with hydrochloric acid.

Paramid (*par'-am-id*) [παρά, beside; *amid*], $C_{12}H_8N_8O_8$. *Mellimid;* an amid of mellitic acid, produced by the dry distillation of ammonium mellitate. It is a white, amorphous powder, insoluble in water and alcohol.

Paramimia (*par-am-im'-e-ah*) [παρά, beside; μιμεῖσθαι, to mimic]. The aphasic misuse of signs or pantomime.

Paramitome (*par-am-it'-ōm*) [παρά, beside; μίτος, thread]. In biology, Fleming's term for the more fluid portions of the cell-substance, contained in the protoplasmic reticulum. Cf., *Paralinin, Paraplasm.*

Paramnesia (*par-am-ne'-ze-ah*) [παρά, beside; μνησι-, only used in comp., remembering, from μιμνήσκειν, to remind]. The name given by A. Lalande to the very

common illusion of feeling as if one had already undergone the experience which may be passing, already been with just such people, in just such place, saying just such things, etc. The recognition of the situation sometimes goes so far as to lead to a correct expectation of what the next following details are to be. The phenomenon is too wide-spread to be considered pathologic. It is exhibited by both sexes, and all ages and temperaments, in about 30 per cent. of persons interrogated. The explanation is based upon subliminal or "unconscious" telepathic perception, *i.e.*, a double perception, unconscious at first, then conscious.

Paramonobromacetanilid (*par-am-o-no-bro-mas-et-an'-il-id*). See *Antisepsin.*

Paramorphia (*par-am-or'-fe-ah*) [παρά, beside; μορφή, form]. Abnormality of form.

Paramorphic (*par-am-or'-fik*) [παρά, beside; μορφή, form]. Pertaining to paramorphism.

Paramorphin (*par-am-or'-fin*). See *Thebain.*

Paramorphism (*par-am-orf'-izm*) [παρά, beside; μορφή, form]. In chemistry, a variety of pseudomorphism in which there is a change of molecular structure without alteration of external form or chemic constitution.

Paramorphosis (*par-am-or-fo'-sis*) [παρά, beside; μορφή, form]. Same as *Paramorphism.*

Paramucic Acid (*par-am-u'-sik*) [παρά, beside; *mucus*, mucus], $C_6H_{10}O_8$. An isomer of mucic acid, occurring in rectangular crystals.

Paramusia (*par-am-u'-ze-ah*) [παρά, beside; μουσική, music]. A form of aphasia in which there is perversion of the musical sense, resulting in the production of improper notes and intervals.

Paramyelin (*par-am-i'-el-in*) [παρά, beside; μυελός, marrow], $C_{38}H_{75}NPO_9$. A white, solid substance obtainable from brain-substance and nerve-substance. Other analogous bodies are spoken of as paramyelins.

Paramylum (*par-am'-il-um*) [παρά, beside; *amylum*, starch], $C_6H_{10}O_5$. *Zoöamylum;* a carbohydrate occurring in the infusorian, *Euglena viridis*, and in all gregarinæ, in the form of granules resembling starch. It is not colored by iodin. See *Carbohydrates, Table of.*

Paramyoclonus (*pa-rah-mi-ok'-lo-nus*) [παρά, beside; μῦς, muscle; κλόνος, clonus]. The *convulsive tremor* of Friedreich; a functional neurosis marked by the sudden shock-like character of the muscular contractions, their bilateral symmetry, and the freedom of the extremities. There is no ataxia, paralysis, or anesthesia; electric irritability is normal; consciousness is unimpaired; the convulsive movements are usually in abeyance during sleep. The disease generally occurs in males, and manifests itself both in children and in adults. It is supposed to be caused by fright or physical overstrain. **P. multiplex**, an affection characterized by clonic contractions, chiefly of the muscles of the extremities, occurring either constantly or in paroxysms. It occurs usually in males, and follows emotional disturbance, fright, or straining. The contractions are usually bilateral, and may vary from fifty to one hundred and fifty per minute.

Paramyosinogen (*par-am-i-o-sin'-o-jen*) [παρά, beside; μῦς, muscle]. Musculin; one of the proteids of muscle-plasma. It coagulates at 47° C. See *Muscle-plasma.*

Paramyotone (*par-am-i'-o-tōn*) [παρά, beside; μῦς, muscle; τόνος, tone, tension]. See *Paramyotonia.* **P., Ataxic**, a disease much resembling myotonia congenita, but not hereditary.

Paramyotonia (*par-am-i-o-to'-ne-ah*) [παρά, aside; μῦς, muscle; τόνος, tone]. Any perversion of muscular tonicity, with liability to spasm on small provocation. **P. congenita**, a rare and obscure family affection, allied to Thomsen's Disease, and by some regarded as identical with it. The chief symptom is tonic spasm, lasting from 15 minutes to several hours, affecting principally the facial muscles, but also those of the extremities; it is directly excited by cold and allayed by warmth.

Paramyotonus (*par-am-i-ot'-o-nus*). See *Paramyotonia.*

Paranema (*par-an-e'-mah*). Same as *Paraphysis.*

Paranematic (*par-an-e-mat'-ik*) [παρά, about; νῆμα, a thread]. In biology, resembling a paranema.

Paranephritis (*par-an-ef-ri'-tis*) [παρά, beside; νεφρός, kidney; ῖτις, inflammation]. 1. Inflammation of the paranephros, or supra-renal capsule. 2. Inflammation of the connective tissue about the kidney.

Paranephros (*par-an-ef'-ros*) [παρά, beside; νεφρός, kidney: *pl.*, *Paranephri*]. A supra-renal capsule, or adrenal.

Paraneurismus (*par-an-u-riz'-mus*) [παρά, beside; νεῦρον, nerve]. A nervous disorder, or perversion of nerve-function.

Parangi (*par-an'-je*). See *Frambesia.*

Paranœa (*par-an-e'-ah*). See *Paranoia.*

Paranoia (*par-an-oi'-ah*) [παρά, beside; νόος, mind]. Primary monomania; a mental disease characterized by systematized delusions. Heredity usually plays an important rôle.

Paranoiac (*par-an-oi'-ak*) [παρά, beside; νόος, mind]. 1. Affected with paranoia. 2. A person who is affected with paranoia; a "crank."

Paranuclear (*par-an-u'-kle-ar*) [παρά, beside; *nucleus*, a nut]. Pertaining to the paranucleus.

Paranucleate (*par-an-u'-kle-āt*) [παρά, beside; *nucleus*, kernel]. Provided with a paranucleus.

Paranucleolus (*par-an-u-kle'-o-lus*) [παρά, beside; *nucleolus*, dim. of *nucleus*, kernel]. The smaller of the nucleoli in a nucleus; also, a synonym of *Pseudonucleolus.*

Paranucleus (*par-an-u'-kle-us*) [παρά, beside; *nucleus*, kernel]. A part extruded from the nucleus of the spore-mother-cell, in the zoösphores of algæ, just before division. See *Polar Globules.*

Paraparesis (*par-ap-ar'-es-is*) [παρά, beside; πάρεσις, paresis]. Partial loss of power in the lower extremities.

Paraparetic (*par-ap-ar-et'-ik*) [παρά, beside; πάρεσις, paresis]. Pertaining to, or affected with, paraparesis.

Parapatagial (*par-ap-at-a'-je-al*) [παρά, beside; πατάγειον, a stripe]. Pertaining to the parapatagium.

Parapatagium (*par-ap-at-a'-je-um*) [παρά, beside; πατάγειον, a stripe, border: *pl.*, *Parapatagia*]. In biology, the fold of skin between the neck and the shoulder of a bird.

Parapathia (*par-ap-a'-the-ah*) [παρά, beside; πάθος, affection]. Moral insanity.

Parapectic (*par-ap-ek'-tik*) [παρά, beside; πηκτός, fixed]. Of the nature of, or pertaining to, parapectin. **P. Acid**, $C_{24}H_{34}O_{23}$, a body derived from pectose during the ripening of fruits.

Parapectin (*par-ap-ek'-tin*) [παρά, beside; πηκτός, fixed]. A derivative of pectose found in fleshy fruits during the process of ripening.

Parapeptone (*par-ap-ep'-tōn*). See *Peptone.*

Parapetalous (*par-ap-et'-al-us*) [παρά, beside; πέταλον, a petal]. In biology, located on each side of a petal. Cf. *Antipetalous.*

Paraphasia (*par-af-a'-ze-ah*) [παρά, beside; φάσις, speech]. A form of aphasia in which there is inability to connect ideas with the proper words to express the ideas; conduction-aphasia.

Paraphenetolcarbamid (*par-af-en-et-ol-kar'-bam-id*). See *Dulcin.*

Paraphenylendiamin (*par-af-en-il-en-di'-am-in*). An isomer of metaphenylendiamin. It causes great exophthalmos when injected into the bodies of animals.

Paraphia (*par-a'-fe-ah*) [παρά, beside; ἁφή, touch]. Perversion or a morbid state of the sense of touch.

Paraphimosis (*par-af-i-mo'-sis*) [παρά, beside; φιμοῦς, to bridle]. Retraction and constriction of the prepuce behind the glans penis.

Paraphobia (*par-af-o'-be-ah*). Synonym of *Hydrophobia*.

Paraphonia (*par-af-o'-ne-ah*) [παρά, beside; φωνή, voice]. Any abnormal condition of the voice. **P. clangens,** shrillness of the voice. **P. puberum, P. pubescentium,** the harsh, deep, irregular voice noticed in boys at puberty.

Paraphora (*par-af'-o-rah*) [παραφορά, wandering]. 1. Slight mental derangement, or distraction. 2. Unsteadiness due to intoxication.

Paraphragm (*par'-af-ram*) [παρά, beside; φράσσειν, to fence, to enclose]. In biology, an antero-posterior diaphragm, found in certain crustacea.

Paraphragmal (*par-af-rag'-mal*) [παρά, beside; φράσσειν, to fence]. In biology, forming a paraphragm.

Paraphrasia (*par-af-ra'-ze-ah*) [παρά, beside; φράσις, utterance]. Incoherence of speech. **P. præceps,** precipitant utterance of incoherent speech. **P. tarda,** abnormal delay in the expression of thoughts. **P. verbalis,** the interpolation of an inappropriate word. **P. vesana,** jumbling of words and ideas.

Paraphrenesis (*par-af-ren-e'-sis*) [παρά, beside; φρήν, mind]. Amentia; delirium, or insanity.

Paraphrenia, Paraphrenitis (*par-af-ren'-e-ah, par-af-ren-i'-tis*) [παρά, beside; φρήν, mind; diaphragm; ῖτις, inflammation]. 1. Delirium; a mental disease. 2. Inflammation of the diaphragm.

Paraphronesis (*par-af-ro-ne'-sis*) [παράφρων, insane; παρά, beside; φρήν, mind]. Insanity.

Paraphronia (*par-af-ro'-ne-ah*). See *Paraphronesis*.

Paraphrosyne (*par-af-ros'-in-e*) [παραφροσύνη]. Insanity; delirium of fever.

Paraphyllum (*par-af-il'-um*) [παρά, beside; φύλλον, a leaf: *pl.*, *Paraphylla*]. In biology, a foliaceous expansion which is not a true leaf. One of the leaf-like scaly hairs between the leaves of certain mosses.

Paraphymosis (*par-af-i-mo'-sis*). Synonym of *Paraphimosis*.

Paraphysis (*par-af'-is-is*) [παρά, beside; φύειν, to produce: *pl.*, *Paraphyses*]. 1. In biology, sterile filaments among reproductive bodies of various kinds in certain cryptogams. 2. A mesal outgrowth from the roof of the brain, cephalad of the epiphysis or conarium.

Paraphyte (*par'-af-it*) [παρά, beside; φύτον, plant]. A disease attended by proliferation of tissue.

Paraplasm (*par'-ap-lazm*) [παρά, beside; πλάσμα, a thing formed]. 1. See *Paraplasma*. 2. A heteroplasm or false growth.

Paraplasma (*par-ap-laz'-mah*) [παρά, beside; πλάσμα, anything formed]. In biology, Kupffer's term for the more fluid matrix of cell-protoplasm. See *Paramitome paralinin*.

Paraplastic (*par-ap-las'-tik*) [παρά, beside; πλάσσειν, to mold]. 1. Of the nature of paraplasm. 2. Having morbid formative powers.

Paraplectic (*par-ap-lek'-tik*) [παρά, beside; πληγή, stroke]. Stricken with paraplegia.

Paraplegia (*par-ap-le'-je-ah*) [παρά, beside; πληγή, stroke; the term originally meant a paralysis of one side, or hemiplegia]. Paralysis of the lower extremities. **P., Alcoholic,** that due to chronic alcoholism. It is probably a result of peripheral neuritis, rather than of cord-disease. **P., Ataxic,** a disease characterized clinically by a combination of ataxia and spastic paraplegia, and anatomically by sclerosis of the posterior and lateral columns of the cord. The disease is most common in middle-aged males, and may follow exposure to cold and traumatism. **P., Ataxic, Hereditary.** See *Friedreich's Ataxia*. **P., Congenital Hypertrophic** (*of Duchenne*), a synonym of *Paralysis, Pseudo-hypertrophic*. **P., Congenital Spastic,** that caused by meningeal hemorrhage during birth. **P. dolorosa,** paralysis of the lower portion of the body, arising from compression of the cord as a result of malignant disease of the vertebræ, and characterized by the early occurrence of excruciating pains. **P., Drunkard's,** a synonym of *P., Alcoholic*. **P., Dysenteric,** a paresis of the lower extremities due to the toxic action of the disease on the peripheral nerves. **P. a frigore,** a paraplegia resulting from multiple neuritis, due to exposure to cold.. **P., Functional,** one in which no organic lesion is ascertainable. **P., Hereditary Ataxic.** See *Friedreich's Ataxia*. **P., Hysteric,** a functional paraplegia due to hysteria. **P., Infantile Spasmodic,** *Spastic Cerebral Paraplegia; Spasmodic Tabes dorsalis; Birth-palsy;* a form characterized by muscular rigidity of the lower limbs, noticed from, or shortly after, birth. The gait of the child may be the so-called "*cross-legged progression*," *q. v.* There are exaggerated tendon-reflexes, no loss of sensation, and no interference with the action of the sphincters. If both arms and legs are affected, the condition is sometimes termed "*bilateral spastic hemiplegia of children*," or "*spastic diplegia*." Occasionally there are irregular movements of the arms resembling chorea or athetosis. These cases have been called "*chorea spastica*" and "*double congenital athetosis*." There may be a considerable degree of mental impairment, amounting even to idiocy, and convulsive attacks may persist through life. Nystagmus, squint, retarded dentition, arching of the palate, and other anatomic defects have been noted. This affection is due to prolonged labor or some form of dystocia, of fetal or maternal origin. **P., Puerperal.** See *Paralysis, Puerperal*. **P., Reflex,** a paraplegia of reflex origin. **P., Spasmodic.** Synonym of *P., Spastic*. **P., Spastic.** 1. Lateral sclerosis. See *Sclerosis, Lateral*. 2. Loss of power, with spasm of the muscles of the lower extremities. See *Erb's Palsy*. **P., Spastic Cerebral.** See *P., Infantile Spasmodic*. **P., Tabetic.** Synonym of *P., Ataxic*. **P., Toxic,** that due to the circulation of poisons in the blood.

Paraplegic (*par-ap-le'-jik*) [παρά, beside; πληγή, a stroke]. Pertaining to, or affected with, paraplegia.

Parapleurum (*par-ap-lu'-rum*) [παρά, beside; πλευρόν, the side: *pl.*, *Parapleura*]. In biology, one of the pieces forming the side of a thoracic ring in an arthropod.

Paraplexia (*par-ap-leks'-e-ah*) [παραπληξία, derangement]. 1. A slight apoplexy. 2. Paraplegia. **P. rheumatica.** Synonym of *Enteritis, Pseudo-membranous*.

Paraplexus (*par-ap-leks'-us*) [παρά, beside; *plexus*, a braid]. The choroid plexus of the paracele or lateral ventricle of the brain.

Parapod (*par'-ap-od*) [παρά, beside; ποίς, a foot]. A parapodium.

Parapodium (*par-ap-o'-de-um*) [παρά, beside; ποίς, foot]. In biology, one of the foot-stumps or rudimentary limbs of certain worms.

Parapoesis, Parapoiesis (*par-ap-o-e'-sis, par-ap-oi-e'-sis*) [παραποιεῖν, to vitiate]. A functional disease.

Parapolar (*par-ap-o'-lar*) [παρά, beside; πόλος, pole]. In biology, adjoining the pole.

Parapophyseal (*par-ap-off-is'-e-al*) [παρά, beside; ἀπόφυσις, an offshoot]. Pertaining to a parapophysis.

Parapophysis (*par-ap-off'-is-is*) [παρά, beside; ἀπόφυσις, offshoot]. In comparative anatomy, the process homologous to the lower transverse process of a vertebra.

Parapoplexy (*par-ap'-o-pleks-e*) [παρά, beside; ἀποπληξία, apoplexy]. A masked or slight form of apoplexy.

Paraproctitis (*par-ap-rok-ti'-tis*) [παρά, beside; πρωκτός, anus; ιτις, inflammation]. Inflammation of the connective tissue about the rectum.

Paraproctium (*par-ap-rok'-te-um*) [παρά, beside; πρωκτός, anus]. The connective tissue that surrounds the rectum.

Parapsis (*par-ap'-sis*) [παρά, beside; ἅψις, a touching]. A perverted condition of the sense of touch.

Parapsis (*par-ap'-sis*) [παρά, beside; ἀψίς, a loop, wheel: *pl.*, *Parapsi*]. In biology, MacLeay's name for the lateral portion of the mesoscutum of the thorax when separate from the dorsal portion; the *plagæ scapulares* of Haliday and the *scapulæ* of Thomson.

Parapteral (*par-ap'-ter-al*) [παρά, beside; πτερόν, wing.] Pertaining to the parapterum.

Parapteron (*par-ap'-ter-on*). Same as *Parapterum*.

Parapterum (*par-ap'-ter-um*) [παρά, beside; πτερόν, wing: *pl.*, *Paraptera*]. In biology: (*a*) The third of the three sclerites into which each lateral segment of each thoracic segment of an insect is divisible; (*b*) the scapular feathers of a bird's wing.

Paraqueduct (*par-ak'-we-dukt*) [παρά, beside; *aqua*, water; *ducere*, to lead]. The lateral division of the mesocele in the brain of birds and frogs, serially homologous with the paracele or lateral ventricle.

Paraquinanisol (*par-ak-win-an'-is-ōl*) [παρά, beside; *quinanisol*], $C_{10}H_9NO$. An artificial alkaloid possessing antipyretic properties.

Pararabin (*par-ar'-ab-in*) [παρά, beside; Ἀραβικός, Arabic]. A constituent of sugar-beet. Boiling with alkalies converts it into arabic acid.

Pararectal (*par-ar-ek'-tal*) [παρά, beside; *rectum*, rectum]. Beside or near the rectum. **P. Pouch**, a peritoneal depression behind the broad ligament and beside the rectum.

Parareducin (*par-ar-e-du'-sin*) [παρά, beside; *reducere*, to lead back]. An alkaloid found in conjunction with reducin in the urine.

Pararhotacism (*par-ar-o'-tas-izm*). See *Rhotacism*.

Pararhythmus (*par-ar-ith'-mus*) [παρά, beside; ῥυθμός, rhythm]. Disturbed rhythm.

Parарthrema, Pararthresis (*par-ar-thre'-mah, par-ar-thre'-sis*) [παρά, beside; ἄρθρον, joint]. Subluxation.

Pararthria (*par-ar'-thre-ah*) [παρά, beside; ἄρθρον, articulation]. A disorder or difficulty in the utterance of articulate speech.

Pararthrosis (*par-ar-thro'-sis*). Synonym of *Para-thria*.

Parasaccharose (*par-as-ak'-ar-ōz*) [παρά, beside; σάκχαρον, sugar], $C_{12}H_{22}O_{11}$. A crystalline modification of saccharose obtained by allowing a mixture of saccharose and ammonium phosphate in solution to ferment.

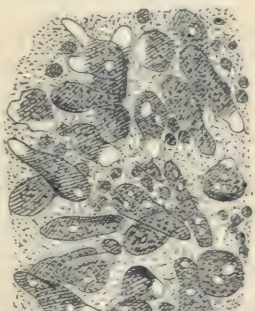
Parasalpingitis (*par-as-al-pin-ji'-tis*) [παρά, near; σάλπιγξ, tube; ιτις, inflammation]. Inflammation of the tissues around an oviduct.

Paraschistes (*par-as-kis'-tēz*) [παρασχιστής, one who opens corpses to embalm them; from παρά, to; σχίζειν, to rend asunder]. A grade of ancient Egyptian priests who began and carried out the process of embalming; they were also called by the Greeks *Tarcheutæ* (ταριχεία, embalming), and by the Egyptians themselves *Xar-heb*.

Parasecretion (*par-as-e-kre'-shun*) [παρά, beside; *cernere*, to secrete]. Any abnormality of secretion or any substance abnormally secreted.

Parasemia (*par-as-e'-me-ah*) [παρά, beside; ἄσημος, unintelligible]. Simulated asemia. See *Asemia*.

Parasigmatismus (*par-as-ig-mat-iz'-mus*) [παρά, beside; σίγμα, the letter ς]. The inability to pronounce *s* or *sh*, another letter, as *f*, being substituted.



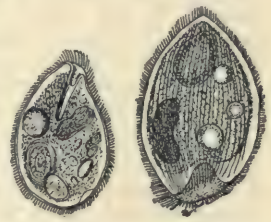
Parasinoidal (*par-as-in-oi'-dal*) [παρά, beside; *sinus*, sinus]. Lying near or along a cerebral sinus. **P. Space**, one of the small venous clefts on either side of the superior longitudinal sinus of the dura.

Parasite (*par'-as-īt*) [παρά, near; σῖτος, food]. The minor and feebler member of a pair of teratically joined twins. See *Autosite*. 2. In biology, an organism that inhabits another organism and obtains nourishment from it; it may be a *phytoparasite* or a *zoöparasite*, an *ectoparasite* or an *endoparasite*, *occasional*, *constant*, *temporary* or *stationary*, *obligate* or *facultative*, a *true parasite* or a *pseudo-parasite*. The term parasite is also applied to such birds as construct no nest and perform none of the duties of incubation, but impose on other birds for this purpose. Parasites that attain their full development upon or within a single host are said to be *autecious*, or *autoxenous*; those that pass different stages of development upon or within different hosts are said to be *heterecious*, or *metecious*. Among certain invertebrates the degenerated male becomes a permanent parasite of the female. **P., Accidental**, one which, though ordinarily not parasitic, has found its entrance into the body; *e.g.*, *Pentastomia constrictum*, *P. denticulatum*, *Œstrus hominis*, and others. **P., Animal**, a parasite belonging to the animal kingdom. A table of animal parasites is appended. **P., Endophytic**, one living within the tissues of its host. **P., Epiphytic**, a parasite inhaling the cutaneous or mucous surfaces.

SYNONYMATIC TABLE OF THE ANIMAL PARASITES OF MAN AND OF THE ANIMALS COMMONLY ASSOCIATED WITH HIM.

Abraxas grossulariata, Linné. The common gooseberry-moth; the larva was reported as a human pseudoparasite by Lankester and Norton, of England. —**Acanthia ciliata**, **Acanthia rotundata**, two species cited by Cobbold as belonging to Kasam and Reunion Island respectively, which are said to be more blood-thirsty than the common bed-bug.—**Acanthia columbaria**, Jenyns. The dove-cot bug. It infests doves and poultry, frequently causing sitting hens to abandon their eggs.—**Acanthia lectularia**. See *Cimex lectularius*.—**Acarus ægyptius**, Linné. See *Ixodes ægyptius*, Audouin.—**Acarus brachypus**, Olfers. See *Sarcoptes scabiei*, var. *hominis*, Mégnin. —**Acarus du cheval**, Gohier. See *Psoroptes communis*, var. *equi*, Fürstenberg.—**Acarus domesticus**, de Geer. See *Glyciphagus cursor*, P. Gervais. **Acarus dysenteriæ**, Linné. See *Tyroglyphus* Latreille.—**Acarus elephantiacus**, Dubini (1850). See *Sarcoptes scabiei*, var. *lupi*, Mégnin.—**Acarus exulcerans**, Linné ex Nyander. See *Sarcoptes scabiei*, var. *hominis*, Mégnin.—**Acarus folliculorum** Simon. See *Demodex folliculorum*, Owen.—**Acarus hordei**, Geber. See *Tarsonemus monungiculus* R. Blanchard.—**Acarus humanus subcutaneus** Linné ex Avelin. See *Sarcoptes scabiei*, var. *hominis* Mégnin.—**Acarus marginatus**, Fabricius.

Argas reflexus, Latreille.—**Acarus psoricus**, Pallas. See *Sarcoptes scabiei*, var. *hominis*, Mégnin.—**Acarus reduvius**, Schrank. See *Boöphilus bovis*, Riley, Curtice.—**Acarus ricinoide**, de Geer.—**Acarus ricinus**, Linné. See *Ixodes ricinus*, Linné.—**Acarus scabiei.** See *Sarcoptes scabiei*, var. *hominis*, Mégnin.—**Acarus siro**, Linné; **Acarus siro**, var. **scabiei**, Fabricius. See *Sarcoptes scabiei*, var. *hominis*, Mégnin.—**Acephalocystis endogena**, John Hunter, Owen.—**Acephalocystis exogena**, Kuhl.—**Acephalocystis granulosa**, Lænnec, Cloquet.—**Acephalocystis macaci**, Cobbold.—**Acephalocystis ovis tragelaphi**, Cobbold.—**Acephalocystis ovoidea**, Lænnec, Cloquet, Deslongchamps, Chiaje. See *Echinococcus polymorphus*, Diesing.—**Acephalocystis plana**, Lænnec. See *Ovuligera carpi*, Dupuytren.—**Acephalocystis racemosa**, Cloquet. A name including all those grape-like and currant-like hydatigenous formations frequently present in certain morbid affections of the chorion and mistaken for entozoa.—**Acephalocystis surculigera**, Lænnec. See *Echinococcus polymorphus*, Diesing.—**Achylostoma duodenale**, Bilharz. See *Dochmius duodenalis*, Leuckart.—**African Leech.** See *Hirudo interrupta*.—**Afterbremse**, Ger. See *Gastrophilus hæmorrhoidalis*, Linné.—**Aftermade.** See *Oxyuris vermicularis*, Bremser.—**Agamonema piscium**, Diesing. See *Filaria piscium*, Rudolphi.—**Alakurt.** See *Helminthopsylla alakurti*, Schimkewitsch.—**Algerian Ixode.** See *Ixodes algeriensis*, Mégnin.—**Alyselminthus cucumerina**, Weinland (1858); **Alyselminthus cuniceps**, Zeder (1800); **Alyselminthus ellipticus**, Zeder (1800). See *Tænia canina*, Linné.—**Alyselminthus infundibuliformis**, Zeder. See *Tænia infundibuliformis*, Goeze.—**Alyselminthus litteratus**, Zeder. See *Tænia pseudo-cucumerina*, Baillet.—**Alyselminthus lobatus**, Zeder. See *Tænia perfoliata*, Goeze.—**Alyselminthus plicatus**, Zeder. See *Tænia plicata*, Rudolphi.—**Alyselminthus pusillus**, Zeder. See *Tænia pusilla*, Goeze.—**Alyselminthus serratus**, Zeder. See *Tænia crassicollis*, Rudolphi.—**Alyselminthus setigerus**, Zeder. See *Tænia setigera*, Fröhlich.—**Alyselminthus sinuosus**, Zeder. See *Tænia sinuosa*, Rudolphi.—**Amblyomma americana.**—**Amblyomma unipunctata**, Packard.—**American Ixode.** See *Argas americanus*, de Geer.—**Amœba buccalis**, Steinberg. Syn. *Amœba dentalis*, Grassi. Quiescent below 25° C.; most active at from 38° to 40° C. It is found in the mucus covering the teeth of man.—**Amœba coli**, Lösch. Syn. *Amœba dysenteriæ*, Councilman and Lafleur. It is found in cases of ulcerative inflammation of the large intestine. Experiments prove this parasite capable of causing violent irritation of the mucous membrane. Moniez hazards the conclusion that this species is identical with *Amœba jelaginia* of the swamps near St. Petersburg.—**Amœba croupogena**, Rivolta. See *Coccidium oviforme*, Leuckart.—**Amœba dentalis**, Grassi. See *Amœba buccalis*, Steinberg.—**Amœba dysenteriæ**, Councilman and Lafleur. See *Amœba coli*, Lösch. **Amœba parasitica**, Lendenfeld. It is found in a dermatosis of lambs in Australia, attacking the feet, lips, gums, and nostrils. Lendenfeld could not differentiate this parasite morphologically from *Amœba princeps*, Ehrenberg. It is common in fresh water.—**Amœba vaginalis**, Baelz. Recorded from Japan as occurring in the human vagina.—**Amphistoma collinsii**, Cobbold. Brick-red worms found in thousands in the large intestine of the horse in India, where it is known to the natives as *Masuri*. It is perhaps identical with *Amphistoma sonsinoi*, Cobbold. Cobbold describes another *Amphistoma collinsii*, var. *stanleyi*.—**Amphistoma conicum**, Rudolphi. Found in the paunch and psalterium of the domestic sheep, ox, goat, deer, and several wild ruminants. It is rose-colored, irregular, length 10 to 13 mm., breadth 2 to 3 mm. It fixes itself between the papillæ of the rumen, especially at the border of the esophagus. It is common in Egypt and Australia, and probably has for its cercaria that found by Sonsino, in Cairo, on the gasteropod *Physa alexandrina*, and forming cysts on aquatic stones, plants, shells of molluscs, etc.—**Amphistoma crumeniferum**, Creplin. Found in the rumen of domestic cattle of India, and the zebu (*Bos indicus*).—**Amphistoma explanatum**, Creplin. Found by Gurlt, at Berlin, in the gall-bladder and biliary duct of a zebu (*Bos indicus*).—**Amphistoma hawksii**, Cobbold. Found at times, and in myriads, adhering to the mucous membrane of the large intestine of the Indian elephant and causing the most frequent disease of that animal, a diarrhea known in India as *Lungen;* death results from exhaustion following depraved appetite, anemia, and diarrhea.—**Amphistoma hominis**, Lewis and McConnell. Found in the large intestine and cecum of man.—**Amphistoma ornatum**, Cobbold. Found in the intestine of the Indian elephant.—**Amphistoma papillatum**, Cobbold. Found in the large intestine of the Indian elephant.—**Amphistoma sonsinoi**, Cobbold. Syn., *Gastrodiscus polymastos*, Leuckart, Cobbold. Possibly *Amphistoma collinsii* is identical with this species. It is found in the large intestine of the horse.—**Amphistoma sp.**, Cobbold. Found in the stomach of the horse.—**Amphistoma truncatum**, Rudolphi. Found in the intestine of the domestic cat.—**Amphistoma tuberculatum**, Cobbold. The only trematode found in the intestine of the domestic ox. It is found in India associated with the amphistomes of the rumen.—**Analges minor**, Nörner. See *Dermoglyphus minor*, Nörner.—**Anchylostoma caninum**, Ercolani. Found in the intestine of the dog.—**Anchylostoma (Agchylostoma) duodenale**, Bilharz, Creplin. See *Dochmius duodenalis*, Leuckart.—**Anchylostoma stenocephalum**, Bailliet. See *Uncinaria stenocephalus*, Bailliet.—**Anchylostoma trigonocephalum**, Rudolphi.—**Anguillula appendiculata**, Leidy. See *Oxyuris appendiculata*, Leidy.—**Anguilulla intestinalis**, Grassi and Parona. See *Rhabdonema intestinalis*, R. Blanchard.—**Anguillula leptodera**, Nielley (1882). See *Rhabditis nielly*, R. Blanchard (1888).—**Anguillula sp.**, Baillet. Found in the skin of the horse.—**Anguillula sp.**, Grassi and Perroncito. Found in the small intestine of the rabbit; the female only appears to be known.—**Anguillula stercoralis**, Bavay. See *Rhabdonema intestinale*, Blanchard.—**Animal bipede**, Bastian. See *Sagittula hominis*, Lamarck.—**Ankylostoma tubæforme**, Zeder. See *Uncinaria trigonocephala*, Rudolphi.—**Anthomyia canicularis**, Linné.—See *Homalomyia canicularis*, Linné.—**Anthomyia incisurata.** See *Homalomyia incisurata*.—**Anthomyia meteorica.** See *Hydrotæa meteorica*, Davaine.—**Anthomyia pluvialis.** A large European (?) fly, the larvæ of



AMŒBÆ COLI, Lösch; in intestinal mucus, with blood-corpuscles, schizomycetes, and similar bodies. (*From Leuckart, after Lösch.*)

which have been found by Danthon de Moulin in the human ear and in cutaneous wounds.—**Anthomyia scalaris,** Fabricius, Judd. See *Homalomyia scalaris*, Fabricius.—**Aphrophora bifasciata.** The frog-hopper, a fly. A case is reported by Cobbold, after Solly and Flower, in which the fly is stated to have been the cause of dysuria in a woman.—**Argas americanus,** de Geer. Syn., *Argas chincha*, Goudet; *Amblyomma americanum*, Koch; *Amblyomma unipunctata*, Packard; *Ixodes americanus*, Linné; *Nigua chinche, the Lone-star Tick.* Found in South America. It attacks sleeping men and animals, producing an irritation of the skin so intense as to cause serious symptoms and even death. It is exceedingly troublesome to horses on the prairies of Guatemala.—**Argas chincha,** Goudet. See *Argas americanus*, de Geer.—**Argas de Fischer.** See *Argas savignyi*, P. Gervais.—**Argas hermanni,** Audouin. See *Argas reflexus*, Latreille.—**Argas marginatus,** A. Railliet (1886). See *Argas reflexus*, Latreille.—**Argas mauritianus,** Guérin. A pest upon poultry in Mauritius. It closely resembles *Argas reflexus.*—**Argas mégnini,** Dugés. A lyriform species, very abundant in the State of Guanajuato on the horse, ass, and ox, principally upon the ears. It is often found on other animals and on man. Mégnin holds that the *Ixodidæ* so troublesome to animals, especially horses, in Mexico, ought to be included in this species.—**Argas miniatus,** Koch. See *Argas reflexus*, Latreille.—**Argas moubouta,** Murray. It is found in Angola on man and animals.—**Argas persicus,** Fischer. Syn., *Miana Bug, Mianawanze, Malleh der Perser, Malleh de Mianeh.* It lives in the dwellings of the Persians, especially in Miana; it is also found in Egypt. It attacks human beings at night, the bite being especially troublesome to strangers.—**Argas reflexus,** Latreille, 1796 (nec Fabricius, 1794). Syn., *Acarus marginatus*, Fabricius (1794); *Argas reflexus columbarum, Argas marginatus*, Railliet; *Argas hermanni*, Audouin (1812); *Argas miniatus*, Koch (1846); *Rhynchoprion columbæ*, Hermann (1808); *Saumzecke. The Bordered Argas.* It is frequently found in dove-cotes in Italy and France, rarely in Germany and England; it sucks the blood of pigeons, especially the young. It is nocturnal, and is a very troublesome parasite, spreading rapidly, limiting the rearing of pigeons, and wandering into houses, where it attacks human beings, producing painful vesicles, edema, and acute pruritus. Most active measures should be employed to exterminate it, such as hot water, lime, petroleum, insect-powder, soft soap. Zürn recommends washing the legs of the pigeons with an alcoholic solution of balsam of Peru. Hugo Engelmann takes the poison of this mite to be a toxalbumin.—**Argas savignyi,** P. Gervais. *L'argas de Savigny.* Found by Savigny in Egypt. Regarded by Audouin as identical with *Argas persicus*, Fischer.—**Argas talaje,** Mégnin, Guerin. Syn., *Garapates, Telajes.* Found in dwellings in Central America. It is nocturnal, and produces painful edema.—**Argas tholozani,** Laboulbéne and Mégnin. Syn., *Argas of Tholozan, Kene der Perser, Sheep-bug.* Found on man and sheep in Persia (Djemalabad).—**Argas turicata,** Dugès. Syn., *Turicates.* A parasite very troublesome to pigs and man in Guanajuato, Mexico, frequently causing the death of the former and of the fowls which feed on the parasites.—**Ascarid of Man.** See *Ascaris lumbricoides*, Linné.—**Ascarid of the Pig.** See *Ascaris suilla*, Dujardin. Leuckart, Schneider, and others hold this to be identical with the ascarid of man (*Ascaris lumbricoides*, Linné).—**Ascarid of the Sheep.** See *Ascaris ovis.*—**Ascaris brachyoptera,** Rudolphi. See *Ascaris mystax*, Rudolphi. — **Ascaris canicutæ,** Schrank (1788). See *Ascaris mystax*, Rudolphi (1801). —**Ascaris canis,** Gmelin (1789). See *Ascaris mystax*, Rudolphi (1801).—**Ascaris canis aurei,** Rudolphi (1819). See *Ascaris mystax* Rudolphi (1801).—**Ascaris canis et martis,** Schrank (1788). See *Eustrongylus gigas*, Diesing (1851).—**Ascaris cati,** Schrank (1788). See *Ascaris mystax*, Rudolphi (1801).—**Ascaris columbæ,** Gmelin. See *Heterakis maculosa*, Rudolphi.—**Ascaris conosoma,** Jördens (1802), Lenz, Brera, Bremser, Rudolphi, Diesing. *Der Kegelwurm.* Found by Bretschneider in the human intestine. According to Brera it is but the larva of *Musca domestica.*—**Ascaris crassa,** Deslongchamps. See *Heterakis inflexa*, Rudolphi.—**Ascaris dispar.** See *Heterakis dispar*, Schrank.—**Ascaris ensicaudata,** Rudolphi. Found in the mouth of the mocking-bird (*Mimus polyglottus*, Boie).—**Ascaris felis,** Gmelin. See *Ascaris mystax.*—**Ascaris filiformis caudaratundata,** Camper. See *Ascaris vituli*, Goeze.—**Ascaris gallinarum,** Gmelin. See *Heterakis papillosa*, Bloch. — **Ascaris gallopavonis,** Gmelin. See *Heterakis inflexa*, Rudolphi. — **Ascaris gibbosa,** Rudolphi. Found in the intestine of the domestic fowl. This is a doubtful species, found only by Zeder in 1788, and described from memory in 1800.—**Ascaris gigas,** Goeze. See *Ascaris lumbricoides.*—**Ascaris inflexa,** Rudolphi. Found in the intestine of domestic fowls, and by Chatin in hens' eggs. Ercolani's statement regarding the descent of this species and *Heterakis vesicularis* has no foundation.—**Ascaris ischnoptera,** Creplin. Found in the large intestine of the ostrich.—**Ascaris leptoptera,** Rudolphi. See *Ascaris mystax*, Rudolphi.—**Ascaris lonchoptera,** Diesing. Syn., *Ascarides*, Jackson; *Strongylus elephanti* (sic). Rudolphi. Found in the biliary ducts and duodenum of the *Elephas indicus*, discovered by Mayor in 1822; only the female has been described. "The first helminth discovered to infest the elephant, that very species about whose structure and economy we are least informed." (Cobbold.)—**Ascaris lumbricoides,** Linné (1758), Cloquet, Bloch, Goeze. Syn., Ἕλμινς, Hippocrates; Ἕλμινς στρογγύλη, Aristotle; *Tïnea rotunda*, Pliny; *Lumbricus longus et rotundus*, Sérapion; *Lumbricus rotundus*, Cœlius Aurelianus; *Fusaria lumbricoides*, Zeder (1800); *Lumbricus teres hominis*, Celse, Tyson, Redi Valisneri; *Ascaris gigas*, Goeze (1782); *Nematoideum hominis (ventriculi)*, Dégland, Leveillé; *Nematoideum hominis (viscerum)*, Pruner, Diesing; *Ophiostoma pontici*, Cloquet, Delle Chiaje, Bremser; *Spulwurm.* Held by some to be identical with the *Ascaris megalocephala* of the horse and the *Ascaris suilla* of the hog. This parasite is of cosmopolitan distribution. It is found abundantly in the human intestine, especially in children, and in that of domestic hogs and cattle, in which it reaches a somewhat larger size; a single female is calculated to lay fifty or sixty million eggs. The parasites are erratic, sometimes passing into the ductus choledochus, stomach, nasal fossa, Eustachian tube, larynx, trachea, and, by means of ulceration of the stomach and intestines, at times gaining entrance to the peritoneal cavity. Reflex symptoms of neurasthenia, hysteriform, epileptiform, or choreiform nature, coma, etc., may be directly traced to the presence of these parasites. Therapeusis: Santonin. The dose should not exceed ⅙–½ grain (0.011 to 0.032 gram) in each dose, or 1½ grains (0.065 to 0.097 gram) in the day; it is best administered dissolved in castor-oil. Sodium santonate is preferred by many to santonin. Ammonium embellate is highly recommended by Coronadi as less poisonous to the host than other anthelmintics. The alga *Alsidium* (*Cera-*

mium) *helminthochorton*, Ktz., the so-called Corsican moss, *Wurmtang*, *Wurmmoos*, is much used in southern Europe in the shape of an infusion, 30 grains to a pint of water, night and morning; in the same way pinkroot, *Spigelia marylandica* and *Spigelia anthelmia*, is employed. In large doses this has narcotic properties. The most popular vermifuge of Europe appears to be worm-seed (*Wurmsamen*, *Littwersamen*, *Semen flores*, *Cinæ*, *Cynæ sinæ*, *Santonicæ*, *Semen sanctum*), *Artemesia maritima*, var. *a Stechmanniana*, Bess, the source of santonin, which is administered with sugar or syrup. It owes its activity to the presence of santonin (discovered by Alnus, 1831). The discharged worms should be burned or have boiling water poured over them to prevent the spread of the eggs.—**Ascaris maculosa**, Rudolphi. See *Heterakis maculosa*, Rudolphi.—**Ascaris marginata**, Rudolphi. See *Ascaris mystax*, Rudolphi.—**Ascaris maritima**, Leuckart (1876). Only one instance is recorded of this worm acting as a human parasite, having been vomited by a child in North Greenland in 1865.—**Ascaris megalocephala**, Cloquet. The largest species of the genus. Peculiar to the *Equidæ*. It is found in the small intestine of the domestic ass, horse, mule, and zebra. No intermediate host is needed; drinking-water appears to be the vehicle of infection. The parasites often exist in great numbers, from 1000 to 1500, in the small intestine, especially the duodenum, passing at times into the stomach, bile-duct, and pancreatic duct. The manure of animals affected should be destroyed by fire. The presence of the parasite is accompanied by numerous reflex symptoms, *e.g.*, chronic intestinal catarrh, slight but obstinate diarrhea, the expulsion of feces being immediately preceded by a discharge of fluid. Treatment:—Arsenious acid with food in increasing doses of 1–3 grams a day for ten days, tartar emetic in doses of 15–20 grams per day in four doses at intervals of 3–4 hours, with gentian-powder or asafetida, emulsion of oil of turpentine in peanut or cottonseed-oil 80–150 grams, santonin 80–150 grams. Ferric chlorid and cupric sulphate have been successfully employed, but no specific has been found.—**Ascaris microptera**, Rudolphi. See *Ascaris mystax*, Rudolphi.—**Ascaris mucronata**, Fröhlich. See *Strongylus nodularis*, Rudolphi. — **Ascaris mystax**, Rudolphi (1801), Bremser, Dujardin, etc. Syn., *Lumbricus canis*, Werner (1782); *Ascaris lumbricoides*, Bloch (1782); *Ascaris caniculæ*, Schrank (1788); *Ascaris canies*, Gmelin (1789); *Ascaris alata*, Bellingham (1839), Dujardin, Diesing; *Ascaris cati*, Schrank (1788); *Ascaris felis*, Gmelin (1789), Thompson, Pickells; *Ascaris marginata*, Rudolphi (1793), Zeder (1800); *Ascaris teres felis*, Goeze (1782); *Ascaris triquetra*, Schrank; *Ascaris leptoptera*, Rudolphi; *Ascaris microptera*, Rudolphi (1819); (?) *Ascaris brachyoptera*, Rudolphi (1819); (?) *Fusaria mystax*, Zeder (1800); *Ascaris canisaurei*, Rudolphi (1819). This parasite is found in the small intestine of the domestic cat and dog; also in man. No intermediate host is necessary. Grassi's experiments show its life-history to be similar to that of *Ascaris lumbricoides;* drinking-water is the infecting medium. The form found in the cat appears only to be a larger variety of that found in the dog. It is most frequently found in young animals; by Krabbe, it was found in more than 50 per cent. of cats and 24 per cent. of dogs examined; it inhabits the small intestine and stomach, and causes the vomiting of glairy matter, in which it is to be found; in man it causes intestinal obstruction. Treatment: Santonin in doses of 2–3 centigrams given in milk, alone or combined with extract of malefern, repeated twice a week, followed by a laxative. Areca-nut is also useful. The investigations of Verloren prove that the eggs of the parasite can retain their vitality for more than a year.—**Ascaris ovis**, Rudolphi. Found in the intestine of the domestic sheep. It is very rare, only two cases having been reported, by Diesing and Neumann.—**Ascaris papillosa**, Bloch. See *Heterakis papillosa*, Bloch.—**Ascaris pellucida**, Brown. See *Filaria equina*, Abildgaard.—**Ascaris perspicillum.** See *Heterakis inflexa*, Rudolphi.—**Ascaris renalis**, Gmelin. See *Eustrongylus gigas*, Diesing.—**Ascaris sp.**, von Drasche. It is found in the intestine of the domestic sheep.—**Ascaris stephanostoma**, Jördens (1802); Lenz, Brera, Bremser, Rudolphi, Diesing. It was found in the human intestine by Bretschneider, and asserted by Brera to be the larva of *Musca carnaria*. — **Ascaris suilla**, Dujardin. This bears so close a resemblance to the *Ascaris lumbricoides* that Leuckart, Schneider, and others regard it as identical. Cobbold, Dujardin, Claparède, Moquin-Tandon, hold the two to be distinct. *A. suilla* is found rarely in the small intestine of the pig. Cases of epileptiform seizures in pigs have been referred to reflexes due to the presence of these parasites. *Filaria trachealis*, Bristow and Rainey (1855), may be but the larva of this species.—**Ascaris teres**, Goeze. See *Heterakis maculosa*, Rudolphi, and *Heterakis inflexa*, Rudolphi.—**Ascaris teres felis**, Goeze. See *Ascaris mystax*, Rudolphi (1801). — **Ascaris teres minor (Phasiani Galli et picti)**, Goeze. See *Heterakis papillosa*, Bloch.—**Ascaris tetraonis**, Gmelin. See *Heterakis papillosa*, Bloch.—**Ascaris trichiura**, Linné. See *Trichocephalus hominis*, Schrank (1788).—**Ascaris triquetra**, Schrank. See *Ascaris mystax*, Rudolphi.—**Ascaris urogalli**, Viborg, Rudolphi. See *Heterakis papillosa*, Bloch.—**Ascaris vermicularis**, Linné (1767). See *Oxyuris vermicularis*, Bremser (1819).—**Ascaris vesicularis**, Rudolphi. See *Heterakis vesicularis*, Fröhlich.—**Ascaris visceralis aut renalis**, Gmelin. See *Eustrongylus gigas*, Diesing.—**Ascaris vituli**, Gmelin, Goeze, Neumann (1883). Syn., *Strongylus vitulorum*, Rudolphi; *Gordius viviparus*, Bloch; *Ascaris filiformis cauda rotundata*, Camper; *Ascaris vituli*, Gmelin; *Fusaria vituli*, Zeder. *The Calf-ascarid.* Found in the intestine and abomasum of young domestic cattle; it is rare in adults. It is frequently found in the slaughter-houses in France. One case is reported in which 15 liters of these parasites were found in the intestine of the calf. Therapeusis:—Give 8–12 grams of a mucilaginous emulsion of empyreumatic oil at night, and follow in the morning with a purgative of sodic sulphate.— **Asthmatos ciliaris**, Salisbury. Dr. J. H. Salisbury described, in 1873, ciliated cells in the mucous fluid from the eyes, nose, and throat of human beings suffering from infusorial catarrh and asthma, hay-fever or autumn catarrh. He regarded them as parasites belonging to the cilio-flagellate infusoria. Cutter and Reinsch arrived at the conclusion that the organism is a protozoön allied to *Actinophrys*, but it was, in 1880, shown by Leidy to be merely detached ciliated epithelial cells from the air-passages, more or less modified by the catarrhal affection. — **Aulacostoma nigrescens**, Weigmann et Ruthe; **Aulacostomum gulo**, Grube. See *Aulastoma gulo*, Moquin-Tandon.—**Aulastoma gulo**, Moquin-Tandon. Syn., *Aulastoma vorax*, Gratiolet; *Aulacostoma nigrescens*, Weigmann et Ruthe; *Aulacostomum gulo*, Grube. *Hirudo depressa fusca margine laterali. Black-leech*, or *Voracious aulostoma*, incorrectly called *Horse-leech* in the neighborhood of Paris,

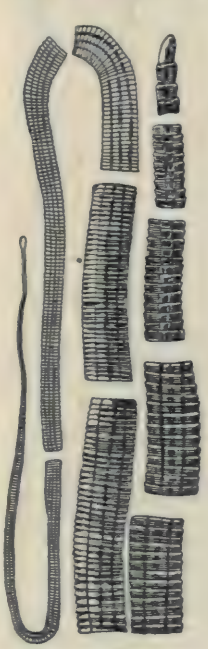
and thus confused with *Hæmopis sanguisuga*, Bergmann. It is widely distributed over Europe and leaves the water to hide under stones, feeding on earthworms, insect larvæ, and small fishes.—**Aulastoma vorax**, Gratiolet. See *Aulastoma gulo*, Moquin-Tandon.—**Autumn Ixode.** See *Ixodes autumnalis*, Leach. —**Autumnal Breeze-fly.** See *Tabanus autumnalis*, Linné. — **Bacon-beetle.** See *Dermestes lardarius*, Linné. — **Bacteriöidomonas sporifera**, Künstler. See *Monocercomonas caviæ*, Davaine.—**Balaninus nucum**, Linné. A beetle, the larvæ of which is reported as a facultative parasite of man by Henry, Astley Cooper, and Phillips. — **Balantidium coli**, Stein (1862). Syn., *Paramœcium coli*, Malmsten (1857); *Plagiotoma coli*, Claparède and Lachmann (1858); *Leucophrys coli*, Stein (1860); *Holophrya coli*, Leuckart (1863). An infusorian parasite first observed in 1856 by Malmsten, and since found abundantly in the colon of the pig. It has also been found in man in Russia, Sweden, Italy, Cochin-China, and China. In the pig it causes no serious disturbance, but in man it gives rise to profuse and obstinate diarrhea. Calandruccio, Grassi, and Wising maintain that two distinct species are classed under the name. According to Lindner this parasite is practically limited to northern Europe, where it is not uncommon for the peasantry to live in close and constant association with their swine. Probably its protective cysts or capsules enable it to resist the action of the gastric juice. Diagnosis of its presence in man or swine is readily made by the introduction of a sound into the rectum, the infusoria being found in the mucus and feculent matter brought out on the instrument. Therapeusis:—Malmsten and Henschen recommend enemata of dilute hydrocloric acid, or of vinegar and tannic acid.—**Balbiania gigantea**, Railliet (1886). A sporozoön parasite of the order *Sarcosporidiæ*, which has been found in the connective tissues of the sheep, goat, ox, deer, pig, and eastern buffalo, especially in the muscular layer of the esophagus, base of tongue, muscles of pharynx, cheeks, neck, thorax, abdomen, and thighs. The sudden symptoms of epizoöty, asphyxia, and epileptiform attacks seem to be due to edema of the glottis.—**Balbiania rileyi**, Stiles. Found in the intermuscular connective tissue of ducks (the shoveler or shovel-bill duck, or spoon-bill duck (*Spatula clypeata*), and the mallard duck, or tame duck (*Anas boschas*).—**Bed-bug.** See *Cimex lectularius*, Merrett (1667).—**Beinwurm.** See *Dracunculus medinensis*, Cobbald.—**Benchuate.** See *Conorhinus nigrovarius*. —**Bête rouge.** The native name in Guiana, the Antilles, and Honduras for *Leptus irritans*, *q. v.*—**Bettwanze.** See *Cimex lectularius*, Merrett (1667).—**Bewaffneter Bandwurm des Menschen.** See *Tænia solium*, Linné.—**Bicho.** See *Sarcopsylla penetrans*, Westwood.—**Bicho colorado**, of Argentine Republic and Uruguay. See *Tetranychus molestissimus*, Weyenbergh.—**Bilharzia bovis**, Sonsino. See *Gynæcophorus crassa*.—**Bilharzia capensis**, Harley. See *Gynæcophorus hæmatobius* (Bilharz), Diesing.—**Bilharzia crassa**. See *Gynæcophorus crassa*.—**Bilharzia hæmatobia**, Cobbold (1858). — **Bilharzia magna**, Cobbold. See *Gynæcophorus hæmatobius*, Diesing. — **Bird-flea.** See *Pulex avium*, Taschenberg.—**Biseriated Menopon.** See *Menopon biseriatum*, Piaget.—**Biting Louse.** See *Trichodectes scalaris*, Nitzsch. — **Black Breeze-fly.** See *Tabanus morio*, Latreille.—**Black Leech.** See *Aulastoma gulo*, Brown. —**Black-mouthed Menopon.** See *Menopon phæostomum*, Nitzsch.—**Blaps mortisaga**, Linné. Syn., *Todtenkäfer*, *Churchyard-beetle*. The larva of this beetle is recorded as a facultative human parasite by Pickells, Thompson, Bellingham, and Bateman. This beetle is common about houses and cellars in Europe from April until harvest-time. — **Blaue Fleischfliege.** See *Calliphora vomitoria*, Robineau-Desvoidy. —**Blinding Breeze-fly**, or **Blinding Chrysops.** See *Chrysops cæcutiens*, Linné. —**Blood-sucking Cone-nose.** See *Conorhinus*.—**Blow-fly.** See *Calliphora vomitoria*, Robineau-Desvoidy. — **Blue Flesh-fly**, *Bluebottle-fly*. See *Calliphora vomitoria*, Robineau-Desvoidy.—**Bodies of Laveran.** See *Polimitus malariæ*, Danilewsky. —**Bodo hominis**, Saville Kent (1880). See *Cercomonas hominis*, Davaine (1854). — **Bodo intestinalis**, Ehrenberg. Observed by Steinberg in the white material found between human teeth. Leuckart regards it of doubtful parasitic nature.—**Bodo muscæ domesticæ**, Burnett. See *Herpetomonas muscæ domesticæ*, Kent—**Bodo saltans**, Ehrenberg. Found by Wedl in great numbers in unhealthy ulcers in man. Leuckart doubts if it is parasitic. —**Bodo socialis**, Ehrenberg. This was observed by Steinberg in the white substance obtained from between human teeth. Leuckart doubts its parasitic nature.—**Bodo urinarius**, Hassal (1859). It is frequently found in the albuminous, alkaline urine of cholera-patients. R. Blanchard considers it as accidentally occurring in the urine and not a parasitic species. — **Bodo urinarius**, Künstler (1883). See *Cystomonas urinaria*, R. Blanchard (1885). — **Body-louse.** See *Pediculus vestimenti*, Leach.—**Boöphilus bovis** (Riley), Curtice. Syn., *Hæmaphysalis rosea*, Koch; *Ixodes annulatus*, Say; *Ixodes bovis*, Riley; *Ixodes dugesii*, P. Gervais (1844); *Ixodes indentatus*, Gamgee; *Ixodes reduvius*, De Geer. The cattle-tick; the most widely distributed of all the ticks occurring in America southward from the northern line of the southern cattle-fever area, to Mexico, Cuba, South America, and also in northern Africa and southern Europe; it is probably a native of N. Africa. This is the active agent in spreading Texas cattle-fever. Treatment: Almost any oily or greasy material.—**Bot-fly of Cattle.** See *Hypoderma bovis*, Latreille. —**Bot-fly of the Horse.** See *Gastrophilus equi*, Fabricius. — **Bothriocefalo largo, Bothriocephale large.** See *Bothriocephalus latus*.—**Bothriocephalus canis**, Ercolani and Bassi. See *Bothriocephalus latus*, Bremser (1819).—**Bothriocephalus cordatus**, Leuckart (1863). Syn., *Dibothrium cordatum*, Diesing. It is found in Iceland and North Greenland in the human body, also in walrus and seal (*Phoca barbata*) and in dogs. It is smaller than *B. latus*; *Tænia vulgaris*, Linné and Pallas, may be identical with

B

BALANTIDIUM COLI, Stein; (B), with widely opened peristome (dorsal view). (*After Leuckart.*)

BILHARZIA HÆMATOBIA; Cobbold; male and female, the latter in the *canalis gynæcophorus* of the former. (*After Leuckart.*)

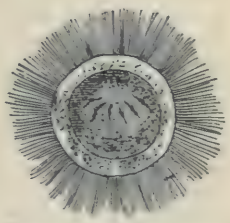
this species. The larval stage is found in a fish.—



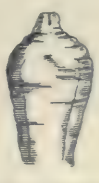
OTHRIOCEPHALUS CORDATUS, Leuckart: adult. (*After Leuckart.*)

Four young specimens of BOTHRIOCEPHALUS CORDATUS, Leuckart; (nat. size). (*After Leuckart.*)

Head and anterior portion of BOTHRIOCEPHALUS CORDATUS, Leuckart; seen (A) from the side, and (B) from the surface. (× 3.) (*After Leuckart.*)



Bothriocephalus cristatus, Davaine (1874). Syn., *Bothriocefalo a cresta.* It has been found in man in a few cases in Europe. A doubtful variety, possibly a monstrosity, and so considered by Moniez.—**Bothriocephalus decipiens,** Diesing. This is found in the intestines of several wild *Felidæ*, and includes, according to Diesing, *Bothriocephalus felis*, Creplin (1825), of the domestic cat, *q. v.*—**Bothriocephalus dubius,** Krabbe. This was found by Krabbe in a dog at Reykjavik, and resembles *Bothriocephalus fuscus, q. v.*—**Bothriocephalus felis,** Creplin (1825). Syn., *Bothriocephalus decipiens*, Diesing. This is found in the intestines of domestic cats, and in general features it resembles *Bothriocephalus latus*, Bremser, except in dimensions. — **Bothriocephalus fuscus,** Krabbe. Syn., *Bothriocephalus reticulatus et dubius*, Krabbe. This is found in the intestine of the dog in Iceland.—**Bothriocephalus hominis,** Lamarck. — **Bothriocephalus latus** (Linné), Bremser (1819), Blainville, Rudolphi. Syn., *Bothriocefalo largo; Bothriocephale large; Bothriocephalus canis*, Ercolani and Grassi; *Bothriocephalus hominis*, Lamarck; *Dibothrium latum*, Diesing (1850); *The Swiss Tapeworm*, *Tænia lata*, Linné (1748), Bloch, Goeze; *Tænia veterum*, Spiegel (1618); *Tænia sive fascia intestinorum*, Spiegel (1618); *Tênia de la second espece*, Andry (1700); *Tênia à épine*, Andry (1700); *The Broad Tapeworm*, Bradley (1813); *Tænia vulgaris*, Linné (1748), Werner, Retzius, Gmelin; *Tænia dentata*, Batsch (1786), Gmelin; *Tænia tenella*, Pallas (1781), Retzius; *Tænia grisea*, Schrank; *Tênia à article courtes*, Bonnet; *Tænia lata event. grisea*, Pallas (1766); *Tænia prima*, Plater (1603); *Tænia membranacea*, Pallas (1781), Batsch; *Tênia humanis inermis*, Brera (1802); *Breiter Grubenkopfwurm*, *Breiter Bandwurm des Menschen*, *Grande bothriocefalo; The Broad Tapeworm*, Bradley (1813). The largest cestode helminth at present known to infest the human body. Switzerland forms the first center for this parasite, and the Russian and Swedish provinces on the shore of the Baltic the second. It appears to be increasing in Germany and Italy. It is not rare in Denmark. Ijima reports it in Japan, referring to the fish *Buchorrhynchus perryi* as the host of the larva. Belgium, Holland, England, Scotland, and America are practically free from this parasite. It appears not to be rare in dogs in Italy and Russia. The larva or finn has been found in a large number of fishes; *e. g.*, the perch, turbot, sea-trout, salmon, pike, stint, etc. Its prevalence is due to the custom of eating fish imperfectly cured or cooked. The fish is possibly not the only provisional host, but is infected by eating some mollusc possessing the parasite in a hydatid condition. It is claimed that this parasite gives rise to all the symptoms of pernicious anemia.—**Bothriocephalus liguloides,** Leuckart (1886). See *Bothriocephalus mansoni*, R. Blanchard (1886).—**Bothriocephalus longicollis,** Molin. Found in the intestine of the domestic fowl in Italy. It gives rise to loss of appetite, emaciation, feebleness, diarrhea, and epileptiform attacks. The powdered bark of pomegranate-root—a teaspoonful for every fifty head—mixed with the poultry-food is regarded as the best treatment of teniasis in fowls.—**Bothriocephalus mansoni,** R. Blanchard (1886). Syn., *Bothriocephalus liguloides*, Leuckart (1886). *Ligula mansoni*, Cobbold (1883). This is found in the human peritoneum, and is known only in the



BOTHRIOCEPHALUS LATUS, Bremser. (*After Leuckart.*)

Club-shaped head of BOTHRIOCEPHALUS LATUS, Bremser. A, Seen from the edge; B, from the flat surface. (× 5.) (*After Leuckart.*)

Free-swimming embryo of BOTHRIOCEPHALUS LATUS, Bremser. (× 500.) (*After Leuckart.*)

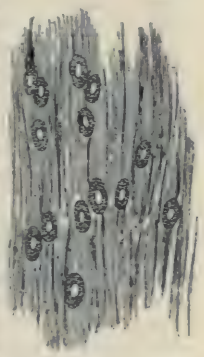
Head of BOTHRIOCEPHALUS MANSONI, R. Blanchard. (× 3.) (*After Leuckart.*)

larval condition. It has its habitat in the connective tissues of the host, as the conjunctival tissues of the orbit and subcutaneous tissues of the thigh, but it is capable of extensive migrations and has been voided with the urine; the cases are limited to Chinese and Japanese. **Bothriocephalus reticulatus,** Krabbe. It is found in dogs in Iceland. See *Bothriocephalus fuscus,* Krabbe. — **Bothriocephalus serratus,** Diesing. This was found by Natterer in the Pampas fox (*Canis azaræ*) of Brazil. Diesing holds the form found by von Siebold and others in dogs to be identical. See *Bothriocephalus canis* Ercolani and *B. latus,* Bremser. — **Bothriocephalus tropicus,** Schmidtmüller. See *Tænia saginata,* Goeze.—**Brechfliege.** See *Calliphora vomitoria,* Robineau-Desvoidy. — **Breeze.** See *Gastrophilus equi,* Fabricius.—**Breiter Bandwurm des Menschen, Breiter Grubenkopfwurm.** See *Bothriocephalus latus,* Bremser.—**Brummer.** See *Calliphora vomitoria,* Robineau-Desvoidy.—**Buffalo-fly,** or **Buffalo-gnat.** See *Simulium pecuarium.*—**Burrowing Flea.** See *Sarcopsylla penetrans,* Westwood.—**Bütschlia lanceolata,** Fiorentini; **Bütschlia neglecta,** Schuberg; **Bütschlia parva,** Schuberg. Three peritrichous infusorian parasites, rarely found in the rumen of the ox.—**Cælognathus morsitans.** An arachnid discoverd by Hessling and held by Cobbold to be a genuine human parasite. **Cæpophagus echinopus,** Mégnin (1880). Syn., *Tyroglyphus echinopus,* Fumouze et Ch. Robin (1867). An acaridan, common about liliaceous bulbs, found in the external auditory meatus of a woman suffering from otorrhea, also in a case of "seedy toe" in the horse.—**Calf Ascarid.** See *Ascaris vituli,* Goeze.—**Calliphora anthropophaga,** Conil.—**Calliphora hominivorax.**—**Calliphora infesta,** Philippi. See *Lucilia macellaria*—**Calliphora limensis.** A case of *myiasis narium* due to the larva of this fly is reported by Aguirre from Santiago de Chile.—**Calliphora macellaria,** Jörg. See *Lucilia macellaria,* Fabricius.—**Calliphora vomitoria,** Robineau-Desvoidy (1830). Syn., *Musca vomitoria, Bluebottle-fly, Blue Flesh-fly, Blow-fly, Mouche bleu de la Viande, blaue Fleischfliege, Schmeiszfliege, Brechfliege, Brummer.* These flies feed only on fresh meats and rarely deposit their eggs in wounds or in the natural cavities of the body; although Leuckart and Summa cite a case in which the larvæ were passed from the intestines of man, and Summa refers to cases of *Myiosis narium* due to these larvæ, and Langstein to a case in which he removed large numbers from the bladder of a woman recently confined.—**Callodium tenui.** See *Trichosoma tenuissima,* Diesing.—**Camel-bot.** See *Œstrus cameli,* var.— **Camel Ixode.** See *Ixodes camelinus,* G. Fischer.—**Camel Œstrus.** See *Œstrus cameli.*—**Camel-tick.** See *Galeodes araneoides.*—**Carphoglyphus passularum,** Ch. Robin (1869). A mite found on dried fruits, dates, figs, prunes, etc., and occasionally in vomited matter. — **Cat-flea.** See *Pulex serraticeps,* Gervais.—**Cat-louse.** See *Trichodectes subrostratus,* Nitzsch.—**Cattle-louse.** See *Hæmatopinus eurysternus,* Nitzsch.—**Cattle-worm.** See *Founza ia ngômbe.*—**Cayor Fly, Cayor Worm.** See *Ochromyia anthropophaga,* Blanchard.—**Cephalomyia ovis,** Latreille. See *Œstrus ovis,* Linné.—**Ceratopsyllus canis.** See *Pulex serraticeps,* Gervais. — **Ceratopsyllus gallinæ,** Bouché. See *Pulex avium,* Taschenberg.—**Cercaria brunnea,** Diesing. According to Diesing this is identical with the cercaria of *Distoma echinatum,* Zeder, of the duck. —**Cercaria cystophora,** von Willemoes-Suhm. This was held by Leuckart to be the larva of *Distoma lanceolatum,* Mehlis, of the sheep, but has since been demonstrated by Creutzburg to belong to *Distoma ovocaudatum* of the frog.—**Cercaria echinatoides,** Fil. Syn., *Cercaria echinifera,* La Valette, *C. spinifera,* La Valette, *C. brunnea,* Diesing (?). It is the larva of *Distoma echinatum,* Zeder, of the duck. It is found in aquatic molluscs, *Limnæa, Planorbis, Paludina.* — **Cercaria echinifera,** La Valette. See *Cercaria echinatoides,* Fil.—**Cercaria longicaudata.** This is the larva of *Distoma lanceolatum,* Zeder, of the sheep. It occurs in the pond-snails *Helix carthusiana,* Müller, and *Planorbis marginatus,* Draparnaud. — **Cercaria spinifera,** La Valette. See *Cercaria echinatoides,* Fil.—**Cercomonas davainei,** Moquin-Tandon (1860). See *Cercomonas hominis,* Davaine (1854).—**Cercomonas gallinæ,** Rivolta. Syn., *Cercomonas nell intestino dei gallinacei,* Perroncito, *Cercomonas de l' intestin des gallinacées.* It is found in cases of pseudo-croup in fowls and pigeons.—**Cercomonas globosus,** Perroncito, *Monocercomonas caviæ,* Davaine.—**Cercomonas of the Guinea-pig's Intestines.** See *Monocercomonas caviæ,* Davaine, *Cercomonas ovalis,* Perroncito, *Cercomonas pisiformis,* Perroncito, *Cercomonas globosus,* Perroncito, *Bacterioidomonas sporifera,* Künstler.—**Cercomonas hominis,** Davaine (1854). Syn., *Cercomonas intestinalis,* Lambl (1875 *nec* 1859); *Cercomonas davainei,* Moquin-Tandon (1860); *Bodo hominis,* Saville Kent (1880); *Cercomonas globosus,* Perroncito. This infusorian is of frequent and extensive occurrence in the discharges of cholera and typhoid-fever patients, and in various diarrheas, also in healthy persons, *e. g.*, the intestinal mucus of children. It is also found in the hepatic ducts.—**Cercomonas intestinalis,** Lambl (1859). [The species described by Lambl under this name in 1859 is referred to *Megastoma intestinale,* Blanchard, 1885, q. v.]—**Cercomonas intestinalis,** Lambl (1875). See *Cercomonas hominis,* Davaine (1854). —**Cercomonas intestinalis,** Marchand (1875). See *Trichomonas intestinalis,* Leuckart (1879). — **Cercomonas muscarum,** Leidy. **Cercomonas muscæ domesticæ,** Stein. See *Herpetomonas muscæ domesticæ,* Saville Kent. — **Cercomonas ovalis.** This was found by Perroncito in the intestine of the guinea-pig, producing an enteritis; perhaps identical with *Monocercomonas caviæ,* Davaine.—**Cercomonas pisiformis,** Perroncito. See *Monocercomonas caviæ,* Davaine.—**Cercosoma.** See *Eristalis tenax*

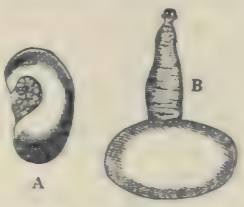
BOTHRIOCEPHALUS MANSONI, R. Blanchard. (A, *after Leuckart;* B, *after Cobbold.*)

Larvæ of CALLIPHORA VOMITORIA, Robineau-Desvoidy. (*After Leuckart.*)

CERCOMONAS HOMINIS, Davaine; (A), larger, and (B), smaller variety. (*From Leuckart, after Davaine.*)



and *Eristalis pendulum*.—**Cheiracanthus hispidus,** Fedschenko. Syn., *Gnathostoma hispida*. This is found in the walls of the stomach of the hog and dog.—**Cheyletus eruditus,** Schrank. This is a vagabond species, occasionally found on man and animals as well as among old books, rags, moldy forage, etc. De Mericourt reports a case in the pus from the ear of a sailor, and Picaglia attributed to it a dermatosis observed on the horse, resembling that produced by *Dermanyssus avium*, De Geer.—**Cheyletus heteropalpus,** Mégnin. This is a mite living at the base of the feathers of pigeons and doves as well as sparrows. It appears to cause no serious inconvenience to its host.—**Cheyletus scabiei.** See *Sarcoptes scabiei*.—**Chicken-louse.** See *Goniocotes gigas*, Taschenberg, *Goniocotes hologaster*, Nitzsch, and *Goniodes dissimilis*, Nitzsch.—**Chigga, Chigo, Chigoe, Chigger, Chiggre, Chique.** See *Sarcopsylla penetrans*, Westwood.—**Chigo of Fowls.** See *Sarcopsylla gallinaceæ*, Westwood.—**Chinche.** See *Argas americanus*, De Geer.—**Chorioptes communis,** var. **ovis,** Verheyen. "*The Foot-scab.*" See *Symbiotes communis*, Verheyen.—**Chorioptes ecaudatus,** Mégnin. See *Symbiotes auricularum*, var. *canis*, var. *cati*, Neumann.—**Chorioptes symbiotes,** R. Blanchard (1890), the mange of cattle. See *Symbiotes communis*, Verheyen.—**Chrithoptes monunguiculosus,** Geber. This is found among barley; the mites cause urticaria and eczema, accompanied by fever for from one to three days.—**Chrysops cæcutiens,** Meigen. Syn., *Small Blinding Breeze-fly*. A common fly, troublesome to man and animals throughout Europe during the summer.—**Churchyard-beetle.** See *Blaps mortisaga*.—**Ciliaris bicaudalis,** Salisbury (1868). See *Trichomonas vaginalis*. Donné (1837).—**Cimænomonas caviæ,** Grassi. See *Trichomonas caviæ*, Davaine.—**Cimex ciliata,** Eversmann. This species is native to Russia.—**Cimex columbarius,** Jenyns, a bug found on the pigeon.—**Cimex lectularia,** Merrett (1667). Syn., *Acanthia lectularia*, Fabricius (1794), *Cimex columbarius*, Jenyns, *Cimex hirundinis*, Jenyns, *Bed-bug, Punaise des lits, Bettwanze, Hauswanze, Wandlaus*. This was originally introduced from India, and was known to the Greeks as κόρις and to the Romans as *Cimex*. It was first recorded in Europe in Strasburg, in the 11th century, and was carried to London in the bedsteads of the Huguenots. It is now cosmopolitan. The female lays in March, May, July, and September, about fifty eggs at a time; they take eleven weeks to reach maturity. Adult bugs will withstand severe cold and survive the winter. The bed-bug not only attacks man, but also birds: doves, the swallow, etc. Spirit of turpentine, corrosive sublimate, mercurial ointment, red precipitate, and insect-powder are employed in their destruction, also fumigation (18–24 hours) with sulphurous acid gas. In Europe the pepper-grass (*Lepidium ruderale*, L.) is used to attract the bugs which are said to gather on the fresh plant to suck the juice, when plant and all can be thrown in the fire.—**Cirons.** See *Sarcoptes scabiei*, var. *hominis*, Mégnin.—**Clegg.** See *Hematopota pluvialis*.—**Clercus formicarius,** Linné. This is a beetle; the larva, according to Küchenmeister, was given to von Siebold as a urinary parasite.—**Clothes-louse.** See *Pediculus vestimenti*, Leach.—**Coccidium bigeminum,** Stiles (1891). Syn., *Corpuscules geminés*, Finck (1854), *Cytospermium villorum intestinalium canium*, Rivolta, *Coccidie geminé*, Railliet et Lucet (1890). This is found in the villi of the small intestine, particularly the duodenum of dogs and cats. It appears to cause no ill-effects, being found in healthy animals.—**Coccidium oviforme,** Leuckart (1879). Syn., *Corpi oviformes*, Vulpian; *Amœba croupogena*, Rivolta; *Psorosperma crouposum*, Rivolta; *Cytospermium zürnii*, Rivolta. This was the first of the psorosperms to be described. It is frequent in the cells of the biliary ducts of rabbits and in man, and the intestines of cattle, producing "psorosperm-nodules," or "coccidium-nodules," which may bring about changes resulting in death. Coccidiosis of rabbits is so common in certain hutches and warrens near London, that the keepers recognize it readily, and distinguish it by the "wet snout" which the affected animals exhibit. It is most fatal in young rabbits, which become affected as soon as they cease to suckle and begin to eat green food; they lose flesh rapidly and suffer from enteritis, dying in from 8 to 15 days. According to Galloway (1) a most important portion of the developmental cycle of this parasite takes place only external to the body, under aërobic circumstances; (2) Influences outside the body delay and even prevent, the external sporulation of the parasite, thus interfering with its infective power; (3) The host cannot be infected by coccidia inoculated directly from an animal already suffering, thus proving that the disease, though infectious, is so only in a very special way; (4) The parasite infects the host by passing into the alimentary canal, where it meets suitable conditions for its future development; (5) The parasite enters and grows within epithelial cells, without necessarily destroying them and causes great proliferation of the neighboring epithelium. This parasite is also the cause of a cutaneous psorospermosis of fowls, geese, turkeys, and pigeons, forming wart-like nodules on the head, and showing close analogy to the disease of man called *Epithelioma contagiosum* or *Molluscum contagiosum*. Treatment consists in cauterization by the hot iron or by chemicals. Oil of turpentine is also effective and prophylactic.—**Coccidium perforans,** Leuckart (1879). This is found in the intestinal epithelium of the dog, rabbit, cat, and man.—**Coccidium rivolta,** Grassi (1881). It is found encysted in the epithelial cells of the intestine in cats, and also free in the intestinal contents and feces. This species closely resembles the *Coccidium perforans* of the dog.—**Cœnurus cerebralis,** Rudolphi. This is the cystic larva or finn of *Tænia cœnurus*, Küchenmeister, of the dog, *q. v.* It is found in the brain and spinal marrow of cattle, sheep, goats, camels, dromedaries, horses and exceptionally, in man, producing staggers (*Hydatidocephalus, Gid*). It has also been found in the muscles of the domestic rabbit and in the subcutaneous connective tissue of the calf and sheep.—**Cœnurus serialis,** Gervais. This is the cystic finn of *Tænia serialis*. Its usual habitat is the connective tissue of domestic rabbits, hares, and squirrels, occurring on the head, neck, loins, thorax and limbs, and rarely, in the spinal cord. The fact that the largest number of cœnures have been collected from wild rabbits would appear to indicate that the *Tænia* which produces them must inhabit the intestine of some carnivorous animal that usually lives in the same localities as the rabbits, and that the development of



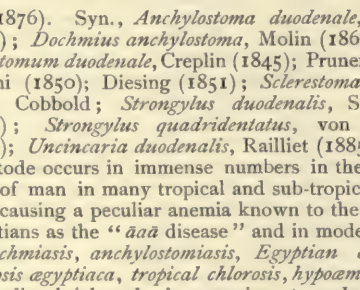
COCCIDIUM OVIFORME, Leuckart; from the human liver. (A × 200, B and C × 800. (*After Leuckart.*)

this *Tænia* in the dog must be considered purely accidental. — **Cœnurus, sp.**, Engelmayer. This is found in the liver of the domestic cat.—**Cœnurus, sp.**, Pagenstecher. This was found beneath the skin in the dog.—**Colorado**, the native name in Cuba for *Leptus irritans*, *q. v.*—**Colpocephalum longicaudum**, Nitzsch. The long-tailed colpocephalus, a louse found on many species of pigeons and doves.—**Common Scab.** See *Psoroptes communis*, Fürstenberg.—**Common Tick.** See *Ixodes ricinus*, Linné.—**Companion Gonicote.** See *Gonicote compar*, Nitzsch.—**Compsomyia macellaria, Compsomyia rubifrons**, Macquart. See *Lucilia macellaria*, Robineau-Desvoidy. — **Cone-nose.** See **Conorhinus, sp.** This blood-sucking cone-nose has recently been reported from the Yosemite Valley, Cal., where it is found in the beds, biting the face, hands, and feet of the sleeper, causing serious sores in some instances.—**Conorhinus nigrovarius**, a predaceous bug in the pampas, *Cenchucha*, which sucks blood like an ordinary tick.—**Conorhinus sanguisugus**, sucks the blood of warm-blooded animals.—**Corpuscles of Laveran.** See *Polimitus malariæ*, Laveran and Danilewsky—**Corpuscles of Rainey.** See *Sarcocystis miescheri*, Ray Lankester.—**Cousin commun.** See *Culex pipiens*, L.—**Crab-louse.** See *Phthirius inguinalis*, Leach. —**Crambus pinguinalis.** There are three cases cited of this lepidopterous insect (larvæ) acting as facultative human parasites by Linnæus, Church and Angetinus.—**Creole Tick.** See *Ixodes dugesi*, Gervais.—**Crinons.** This is a name given by Chabert in 1782 to *Sclerostoma armatum*, Rudolphi, *q. v.*,—**Crithoptis monunguiculosus**, Geber (1879). See *Tarsonemus monunguiculosus*, R. Blanchard (1889). —**Crown-tail Strongyle**, Cobbold. See *Stephanurus dentatus*, Diesing.—**Cryptocystis tricodectis**, Villot. This is the larva of *Tænia canina*, Linné, and was found by Melnikow (1867) in the body-cavity of the *Trichodectis latus*, Nitzsch, of the dog.—**Culex anxifer.** The species of mosquito cited by Cobbold as troublesome to man.—**Culex ciliatus.** This is a large species of mosquito found in the Atlantic States. It bites very severely, but is comparatively rare and does not appear in swarms.—**Culex damnosus**, Say. The common American mosquito, appears in swarms which invade marshy regions, appearing in the Middle States in four distinct broods, which only swarm at intervals of one month. This troublesome species is reported as becoming common in England.—**Culex equinus**, Cobbold. This is especially troublesome to horses.—**Culex Mosquito.** It is found in Southern Asia where, according to Manson, it acts as the host of *Filaria sanguinis hominis* and is the agent in infecting man with this, the most important of the animal parasites attacking man.—**Culex pipiens**, Linné. Syn., *Zanzara comune*, Ital.; *Cousin commun*, Fr.; *Gemeine Stechmücke*, Ger.; *Common Gnat of Europe.* This gnat takes the place in Europe of the mosquito of America, being in many regions a veritable scourge to man, especially at night. It is not aggressive to ward animals.—**Culex pungicus.** This is a species found in France and according to Liegard produces serious symptoms in those bitten by it.—**Culex rufus, Culex tæniorhynchus.** Two American species. **Cuterebra cuniculi**, Clark (1815); Macquart (1835); Joly (1846). Syn., *Œstrus cuniculi*, Clark (1797); *Trypoderma cuniculi*, Wildemann (1830). An American species, found on hares and rabbits. — **Cuterebra noxialis**, J. Goudot (1845). See *Dermatobia noxialis*, Brauer.—**Cyclobdella lumbricoides.** The blind leech. A species found in Brazil; it attacks men and animals indiscriminately.—**Cynorhæstes ægyptius**, Hermann. See *Ixodes ægyptius*, Audouin.—**Cynorhæstes ricinus**, Hermann. See *Ixodes ricinus*, Linné.—**Cynthostoma tetracanthum**, Molin. See *Strongylus tetracanthus*, Diesing.—**Cyrtoneura stabulans**, Macquart. Syn., *Musca stabulans*, Fallén; *Stallfliege.* The larvæ of this fly were first observed as facultative intestinal parasites of man by Laboulbène. It is troublesome about stables. — **Cysticercus acanthotrias**, Weinland. This is the larva of an undescribed species of *Tænia*, found in the connective tissue and dura mater of man.—**Cysticercus albopunctatus.** See *Cysticercus tæniæ solii*, Leuckart.—**Cysticercus alpaca**, Sappey. Found in the muscles of the alpaca; it seems to be very abundant in Peru. The adult worm and its host have not been discovered yet.—**Cysticercus bailletti**, Railliet. Syn., *Pleurocercoides bailletti*, Railliet, *Cysticercus elongatus*, Blumberg. This is found in the pleura and peritoneum of the cat, dog, rat, ichneumon and pole-cat.—**Cysticercus bicornis**, Zeder. See *Diceras rude*, Rudolphi.—**Cysticercus bothrioplitis**, Piana. See *Cysticercus tæniæ bothrioplitis*, Piana.—**Cysticercus bovis**, Göze. See *Cysticercus tæniæ saginatæ*, Goeze-Leuckart. —**Cysticercus clavatus.** See *Cysticercus tæniæ marginatæ*, Batsch-Diesing. — **Cysticercus conis, Cysticercus cellulosæ.** See *Cysticercus tæniæ solii*, Leuckart.—**Cysticercus coprinus.** See *Cysticercus tæniæ marginatæ*, Batsch-Diesing.—**Cysticercus dicysta.** A finn found in the cranial cavity of man; its tapeworm is unknown. —**Cysticercus elongatus**, Blumberg. This name was applied by Blumberg to the finns found in the dog and cat, (see *Cysticercus bailletti*, Railliet), but it had to be dropped, as it had already been applied by Leuckart to a variety of *Cysticercus tæniæ serratæ*, Zeder-Goeze, *q. v.*—**Cysticercus fasciularis**, Rudolphi. See *Cysticercus tæniæ crassicollis*, Rudolphi.—**Cysticercus finna.** See *Cysticercus tæniæ solii*, Leuckart; —**Cysticercus fischeriana.** A finn found by Fischer in the choroid plexus of man; the adult is unknown.—**Cysticercus fistularis**, Rudolphi. This was found in the peritoneum of the horse by Chabert and Reckleben. The *Platode* of which this is the finn is as yet unknown.—**Cysticercus globosa, Cysticercus lineata.** See *Cysticercus tæniæ marginatæ*, Batsch-Diesing.—**Cysticercus mediocanellata**, Davaine. See *Cysticercus tæniæ saginatæ*, Goeze-Leuckart. — **Cysticercus melanocephalus**, Köberle. — **Cysticercus multilocularis.** See *Cysticercus tæniæ solii*, Leuckart.—**Cysticercus oviparus**, Maddox. This is found in the muscles of the sheep and is regarded by Maddox not only as a new species, but as a sexually mature animal.—**Cysticercus ovis**, Cobbold. See *Cysticercus tæniæ marginatæ*, Batsch-Diesing. Cf. *Tænia tenella*, Cobbold. Cobbold found this finn on several occasions in the measles of sheep and held it to be the larvæ of a *Tænia* of man, the so-called *Tænia tenella*. Chatin demonstrated Cobbold's error, showing that the pretended *T. tenella*, was only a small-sized *T. solium*, and that *Cysticercus ovis* was but an imperfectly developed *Cysticercus tæniæ marginatæ*, Batsch Diesing.—**Cysticercus phacochœri æthiopici**, Cobbold. See *Cysticercus tæniæ marginatæ*, Batsch.—**Cysticercus pisiformis**, Zeder. See *Cysticercus tæniæ serratæ*, Goeze. — **Cysticercus pyriformis, Cysticercus racemosa (us)**, Zenker. See *Cysticercus tæniæ solii*, Leuckart.—**Cysticercus turbinata**, Köberle. A variety in which the head-process is coiled in a regular spiral of sometimes three turns See *Cysticercus tæniæ solii*, Leuckart.—**Cysticercus, sp.**, Baillet. This is found in the peritoneum of the domestic fowl.—**Cysticercus, sp.**, Sappey. This is

found in the muscles of the llama.—**Cysticercus suis**, Cobbold. See *Cysticercus tæniæ solii*, Leuckart.—**Cysticercus tæniæ bothrioplitis**, Piana. This is found in the snails *Helix carthusianella*, Draparnaud, and *Helix maculosa*, the mature form occurring in the domestic fowl.—**Cysticercus tæniæ cesticillus**, Goeze-Molin. Syn., *Cysticercus tæniæ infundibuliformis*, Goeze. This is found in the house-fly. The adult (*Tæniæ cesticillus*, Molin, *q. v.*) is found in the intestine of the domestic fowl. According to Grassi and Rovelli the earth-worm *Allobophora fœtida*, Eisen, is its intermediate host.—**Cysticercus tæniæ crassicollis**, Rudolphi. This is found in the liver of various rats and mice and is remarkable for the elongated form and the smallness of the bladder in which it is coiled up. Von Siebold demonstrated (1844) the relation of this finn to *Tæniæ crassicollis*, Rudolphi, of the cat.—**Cysticercus tæniæ cucumerinæ**, Bloch. See *Cysticercus tæniæ ellipticæ*, Batsch. **Cysticercus tæniæ cuneatæ**, von Linstow. Occurs in the worm, *Allobophora fœtida*, Eisen, and the adult in domestic fowls.—**Cysticercus tæniæ diminutæ**, Rudolphi. This is found in the orthopterous insect *Anisolabis annulipes*, Lucas; and the beetles *Akis spinosa*, Latr. and *Scaurus striatus*, Fabr., also in the meal-moth, *Asopia farinalis*, L.—**Cysticercus tæniæ ellipticæ**, Batsch. Syn., *Cysticercus tæniæ cucumerinæ*, Bloch. This is found in the fleas (*Pulex irritans*, L. and *Pulex serraticeps*, Gervais) and the dog-louse *Trichodectes canis*, De Geer).—**Cysticercus tæniæ gracilis**, Rudolphi. This is found in the perch *Perca fluviatilis*) and by Thos. Scott in the ostracod crustacean *Candona rostrata*, which Blanchard holds to be the intermediate host of *Tæniæ gracilis*, of the duck. **Cysticercus tæniæ infundibuliformis**, Goeze. See *C. tæniæ cesticillus*, Molin-Goeze.—**Cysticercus tæniæ krabbei**, Moniez, occurs in the reindeer (*Cervus tarandus*, Linné), the mature form being found in the dog.—**Cysticercus tæniæ marginatæ**, Batsch-Diesing. Syn., *Cysticercus clavatus*, *Cysticercus coprinus*, *Cysticercus globosa*, *Cysticercus lineata*, *Cysticercus tenuicollis*, Diesing, *Cysticercus phacochœri æthiopici*, Cobbold, *Cysticercus visceralis*, *Cysticercus ovis*, Cobbold. This is the larva of *Tænia marginata*, Batsch; and is found in the peritoneum and sometimes in the muscles, liver, lungs, and heart of the sheep, goat, ox, camel, reindeer, and pig, and it seems, as the result of the researches of Eschricht and others, occasionally to occur in monkeys and man. It rarely produces serious effects, although at times it grows to the size of a child's head. The size and occurrence have perhaps led to its being confused and ranked with *Echinococcus*, which has led to error, even as regards its human pathology, it having as a consequence been reckoned among human parasites, especially under the title, *Cysticercus visceralis*.—**Cysticercus tæniæ microstomæ**, Dujardin. Syn., *Scolex decipiens*, Diesing. This occurs in the orthopterous insect *Anisolabis annulipes*, Lucas; also in the beetle *Tenebrio molitor*, Fabricius. The mature form occurs in rats and mice.—**Cysticercus tæniæ proglottidæ**, Davaine, occurs in the snails *Limax agrestis*, Linné, and *Limax variegatus*, Draparnaud. The mature form is found in the domestic fowl.—**Cysticercus tæniæ saginatæ**, Goeze-Leuckart. Syn., *Cysticercus bovis*, Goeze, *Cysticercus mediotænellata*, Davaine. Leuckart was the first (1861) to show the relation of this finn to the tenia of the ox, in which animal it often occurs in great numbers, especially in Abyssinia, Russia, and the regions about the Mediterranean. The distribution in the tissues and organs varies. The peritoneum and lymphatic apparatus are rarely free from them; the kidneys, lungs, and liver contain relatively few; the muscles especially contain great numbers; all other tissues and organs may be infected. In the examination of beeves the finns should especially be looked for in the masseteric region, the internal and external pterygoids, heart and tongue. Owing to the presence of calcareous particles, they assume a white color upon drying, which allows their presence to be made out, *e. g.*, in dried beef; soaking will again render them invisible. E. Gavoy asserts that it has not been proved that the finns of *Tæniæ saginata* do not exist in man.—**Cysticercus tæniæ serratæ**, Zeder, Goeze. Syn., *Cysticercus pisiformis*, Goeze, *Cysticercus elongatus*, Leuckart, *Monostoma leporis*, Kuhn. This finn is the most common parasite in the peritoneum of the rabbit. It traverses the liver and, reaching the peritoneum, excites the formation of a cyst, which becomes full of fluid, and about the size of a pea. It occurs in such numbers as to resemble clusters of grapes. The white spot on the surface of each bladder locates the invaginated scolex.—**Cysticercus tæniæ sinuosæ**, Zeder. Occurs in the crawfish (*Astacus fluviatilis*, Rondelet), and the mature form in the domestic duck.—**Cysticercus tæniæ solii**, Leuckart. Syn., *Tæniæ hydatigena*, Pallas; *Cysticercus cellulosæ*, Leuckart; *Cysticercus albopunctatus*, *Cysticercus racemosa(us)*, Zenker; *Cysticercus acanthotrias*, Weinland (1858); *Cysticercus suis*, Cobbold; *Cysticercus canis*, *Cysticercus multilocularis*, *Cysticercus pyriformis*, *Cysticercus finna*. This is the finn of *Tænia solium*.

MEASLY PORK. (*After Leuckart.*)

CYSTICERCUS TÆNIÆ SOLII, Leuckart; or the common bladder-worm of the pig, (A) with invaginated head, and (B) with evaginated head. (*After Leuckart.*)

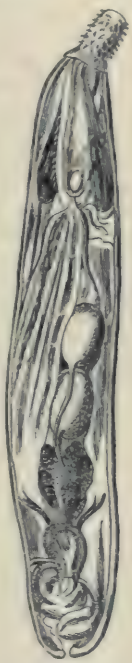


CYSTICERCUS TÆNIÆ SOLII, Leuckart; or bladder-worm of the pig, after the digestion of the bladder. (× 10.) (*After Leuckart.*)

Küchenmeister was the first to point out the relation between this bladder-worm and the hook-bearing *Tæniæ solium*. It causes the disease known as measles and is found in swine, dogs, cats, and man, and occurs in all tissues and organs, producing small tumors which are readily recognized when subcutaneous; when in the brain various apoplectiform or epileptiform symptoms, paraplegia, violent cephalalgia, vomiting, vertigo, staggers (*tournoiement*, *tournis*), convulsions, narrowing of the field of vision and deafness may ensue. When in the brain the symptoms resemble those of *Tabes dorsalis*. No treatment has been found for cerebral cysticercosis; some cases recover. The enforced inspection of meats is important in this connection.—**Cysticercus tarandi.** See *Cysticercus tæniæ krabbei*, Moniez.—**Cysticercus tenuicollis, Cysticercus visceralis.** See *Cysticercus tæniæ marginatæ*, Batsch-Diesing.— **Cystomonas urinaria**, R. Blan-

chard (1885). Syn., *Trichomonas irregularis*, Salisbury (1868); *Bodo urinarius*, Künstler (1883). A peculiar flagellate infusorian found in human urine and vaginal mucus.—**Cystotænia mediocanellata,** Leuckart (1862). See *Tænia saginata*, Goeze, 1782. —**Cytodites nudus,** Vizioli. Syn., *Cytoleichus sarcoptoides*, Mégnin; *Sarcoptes gerlachi*, Rivolta. This is found in the air-sacs of the *Gallinacea*, especially fowls and pheasants. They even reach the air-canals in the bones, and are supposed to cause enteritis.—**Cytoleichus sarcoptoides,** Mégnin. See *Cytodites nudus*, Vizioli.—**Cytospermium villorum intestinalium canis,** Rivolta. Oviform, tetrasporous coccidia found by Railliet and Lucet in the small intestine of the dog and cat. See *Coccidium bigeminum*, Stiles.—**Cytospermium zürnii,** Rivolta. This was reported by Pröger and Zürn from the intestine, liver, and glands of calves. It is probably *Coccidium perforans*, *q. v.*—**Cytosporozoön malariæ,** Danilewsky. See *Polimitus malariæ*, Laveran.—**Cytozoa pathogena.** The hematocystis of man and animals, found in malarial and other fevers. See *Polimitus malariæ*, Laveran. **Dactylius aculeatus,** Curling. See *Euchytræus albidus*, Henle.—**Dasytricha ruminantium,** Schuberg. A holotrichous infusorian of the esophagus and stomach of ruminants.—**Deer-tick, Western.** See *Dermacentor occidentalis*, Linné.—**Demodex canis,** Tulk. See *Demodex folliculorum*, var. *canis*. —**Demodex folliculorum,** Owen. Syn., *Acarus folliculorum*, Simon (1842); *Demodex folliculorum*, var. *hominis*, *canis*, *cati*, *suis*, *ovis*, *capræ*, *equi*, Küchenmeister; *Demodex caninus*, Tulk; *D. phylloides*, Csokor; *Macrogaster platypus*, Miescher (1843); *Entozoön folliculorum*, Erasmus Wilson (1845); *Steatozoön folliculorum*, E. Wilson (1847); *Simonea folliculorum*, Gervais (1844); *Simon et Simonide*, Fr. This is found in the hair-follicles and sebaceous glands of several species of mammalia: dog, cat, pig, sheep, goat, ox, deer, fox, rat, mouse, and bat. The dermatosis produced by this parasite has been most frequently and best studied in the dog. Nearly every known parasiticide has been tried for the cure of follicular scabies of the dog, but generally in vain (Neumann). Sulphur baths and applications of creolin or essence of juniper have given fair results.—**Demodex phylloides,** Csokor. See *Demodex folliculorum*, var., *suis*.—**Dermacentor americanus,** Linné. The American dog-tick. Cf. *Ixodes ricinus*, Linné.—**Dermacentor occidentalis,** Linné. The western deer-tick of the United States.—**Dermanyssus avium,** De Geer. Syn., *Dermanyssus gallinæ*, Redi; *Dermanyssus gallopavonis*, Gervais; *Dermanyssus hirundinus*, De Geer; *Tique*, Raspail. Gamasides which live on birds and may be transmitted to domestic mammalia: rabbits, dogs, cats, cows, and man. They are found in dove-cotes and poultry-yards, and are essentially noctambulatory. They frequently enter the nasal cavities or auditory meatus. In nasal or auricular acariasis, olive-oil, to which has been added a little ethereal essence of anise-seed, should be introduced by means of a thin feather. Oily mixtures, sulphuret of carbon and creolin are the most favored remedies for the dermatoses produced by this insect. —**Dermanyssus gallinæ,** Redi.—**Dermanyssus gallopavonis,** Gervais.—**Dermanyssus hirundinis,** De Geer. See *Dermanyssus avium*, De Geer.—**Dermatobia cyanoventris,** Moquin-Tandon. This differs from *Dermatobia noxialis*, Brauer, in the azure hue of the entire abdomen; its habits are the same.—**Dermatobia hominis.** See *Dermatobia noxialis*, Brauer.—**Dermatobia noxialis,** Brauer (1860). Syn., *Dermatobia hominis; Œstrus guildingi*, Hope (1840); *Cuterebra noxialis*, J. Goudot (1845). A bot-fly of Central and South America, the eggs of which are not infrequently deposited in the skin of animals and man, producing a swelling like an ordinary boil. In New Grenada this larva is know as *Nuche*, *Gusano*, or *Macaco Worm*, in Cayenne as the *Macaw Fly*, in Brazil as *Ura*, in Costa Rica as *Torcel*, and in Mexico as the *Moyoquil Worm*. It attacks chiefly the ox and dog, while mules and horses are exempt. In countries in which the parasite is abundant, the skins of slaughtered cattle are frequently so perforated as to be of little value.—**Dermatodectes communis,** Bourguinon and Delafond.—**Dermatodectes equi,** Gerlach. See *Psoroptes communis*, var. *equi*, Fürstenberg.—**Dermatokoptes communis,** Fürstenberg. See *Psoroptes communis*, Fürstenberg.—**Dermatophagoides scheremetewski,** Bogdanow. See *Symbiotes communis*, Verheyen.—**Dermatophagus cuniculi,** Zürn, 1872. See *Sarcoptes notædres*, Delafond and Bourguinon, 1857.—**Dermatophilus penetrans,** Guerin. See *Sarcopsylla penetrans*, Westwood.—**Dermestes lardarius,** Linné. The larvæ of this beetle, besides devouring dead bodies, skins, leather, etc., develop at times in the old manure of the dove-cote and attack the young pigeons, gnawing the skin of the neck and abdomen. The best preventive measure consists in covering the floor of the dove-cote and the nest with pine sawdust mixed with sand. The larvæ are also reported as facultative parasites of man by Otto and Chichester (England).—**Dermestes murinus,** Linné. The larva is reported as a facultative parasite of man by Otto and Lister.—**Dermofilaria irritans,** Rivolta. See *Filaria irritans*, Rivolta.—**Dermoglyphus elongatus,** Mégnin. One of the plumicole sarcoptidæ found on the quill of the feathers of the domestic fowl.—**Dermoglyphus minor,** Nörner. Syn., *Analges minor*, var. *similis*, Nörner. This is found in the quill of the feathers of the guinea-fowl. —**Dermoglyphus varians,** Trouessart. One of the *Analgesinæ* observed on the guinea-fowl, in the quill of the beam-feathers of the large wing-covers along with *picobia*. It is possibly only a variety of *Dermoglyphus elongatus* of the fowl.—**Deutscher Blutegel.** See *Hirudo medicinalis*, Ray.—**Diacanpolycephalus,** Stiebel, Bremser, Rudolphi, Diesing. Determined by Blumenbach to be a raisin-stalk which had been evacuated *per anum*.—**Dibothrium cordatum,** Diesing. See *Bothriocephalus cordatus*, Leuckart.—**Dibothrium latum,** Diesing (1805). See *Bothriocephalus latus*, Bremser.—**Diceras rude,** Rudolphi, Lamarck. Syn., *Cysticercus bicornis*, Zeder, *Ditrachyceras rudis*, Sultzer, Bremser, Diesing, Eschricht, Lerreboullet. A carpel of the mulberry (*Morus nigra*), which had been macerated and deprived of its color by digestion.—**Dicrocœlium buskii,** Weinland (1858). See *Distoma crassum*, Buck, Cobbold, Leuckart.—**Dicrocœlium heterophyes,** Weinland (1858). See *Distoma heterophyes*, von Siebold (1852).—**Dicrocœlium oculi humani,** Weinland (1858). See *Distoma lanceolatum*, Mehlis.—**Dimorphus muris,** Grassi (1879). See *Megastoma intestinale*, R. Blanchard (1885).—**Dioctophyme,** Collet-Meygret. See *Eustrongylus gigas*, Diesing.—**Diplacanthus nanus,** Weinland (1858). See *Tænia nana*, von Siebold (1853).—**Diplodinium bursa,** Fiorentini. A peritrichous infusorian found in the stomach of ruminants associated with the following species: *Diplodinium cattanei*, Fiorentini; *Diplodinium caudatum*, Fior.; *Diplodinium dentatum*, Stein; *Diplodinium ecaudatum*, Fior. (considered by Fiorentini to be only a rare form of *D. caudatum*); *Diplodinium maggi*, Fior.;

Diplodinium mammosum, Railliet; *Diplodinium rostratum*, Fior.; *Diplodinium uncinatum*, Fior. (found in the large intestine of horses); *Diplodinium vortex*, Fior.—**Dipylidium cucumerina**, Leuckart (1863). See *Tænia canina*, Linné (1767).—**Dipylidium latissima**, Riehm.—**Dipylidium leuckarti**, Riehm.—**Dipylidium pectinatum**, Riehm. See *Tænia pectinata*, Goeze.—**Diskostoma acephalocystis**, Goodsir (1844). See *Echinococcus polymorphus*, Diesing (1851).—**Dispharagus nasutus**, Rudolphi. Syn., *Filaria nasuta*, Rudolphi; *Spiroptera nasuta*, Rudolphi. A filaria-like worm found in the wall of the gizzard of the fowl and sparrow, at times so closely packed together as to form a kind of tissue and giving rise to an epizoöty.—**Dispharagus spiralis**, Molin. This was found in the esophagus of the fowl and also in the intestine by Fedschenko in Turkestan.—**Distoma armatum**, Molin, is found in the intestine, cecum, and rectum of the domestic fowl in Italy.—**Distoma buskii**, Wedl, Lankester (1857). See *Distoma crassum*, Busk.—**Distoma campanulatum**, Ercolani. See *Distoma truncatum*, Rudolphi.—**Distoma capense**, J. Harley. See *Gynæcophorus hæmatobius*, Diesing; *Distoma caviæ*, Sonsino. This was found by Del Chiappa in the biliary ducts of the guinea-pig. It resembles *Fasciola hepatica*, of which Neumann suggests that it may be but a young form.—**Distoma columbæ**, Mazzizanti. See *Mesogonimus commutatus*, Sonsino.—**Distoma commutatum**, Diesing. See *Mesogonimus commutatus*, Sonsino.—**Distoma conjunctum**, Cobbold (1859). Moniez regards it as not unlikely that this is identical with *Distoma sinense*, Cobbold, rather than with *Distoma truncatum*, Rudolphi. See *Distoma truncatum*, Rudolphi.—**Distoma conus**, Creplin. See *Distoma truncatum*, Rudolphi.—**Distoma crassum**, Busk (1859), *nec* von Siebold (1836), Cobbold, Leuckart. Syn., *Distoma buskii*, Wedl, Lankester (1857); *Dicrocœlium buskii*, Weinland (1858). This was found in the human intestine. "No other instance has occurred since the original fourteen specimens were discovered by Mr. Busk in the duodenum of a Lascar" (Cobbold).—**Distoma cuneatum**, Rudolphi. This was found by Gurlt in the oviduct of the peacock. Rudolphi considers it very similar to *Distoma ovatum*, Rudolphi.—**Distoma dilatatum**, Miram. Found in the rectum and cecum of the domestic fowl; rare.—**Distoma echinatum**, Zeder. Dujardin and von Linstow consider *Distoma oxycephalum*, Rudolphi, as a variety of this species. It is found in the intestine of the domestic duck and goose, rarely in the fowl. Genè found it in the duodenum of a dog and Nathusius in the black stork. According to the researches of Wagenstecher and Ercolani, the larvæ (*Cercaria echinatoides*) are the most common distome larvæ found in the aquatic molluscs, *Limnæa*, *Planorbis*, and *Paludina*.—**Distoma elegans**, Rudolphi, is found in the intestine of the domestic sparrow.—**Distoma elephantis**, Jackson. See *Fasciola jacksoni*, Cobbold.—**Distoma endemicum**, Ijima. See *Distoma sinense*, Cobbold.—**Distoma felineum**, Rivolta. See *Distoma truncatum*, Rivolta.—**Distoma flum**, Dujardin. This is found in the intestine of the domestic sparrow.—**Distoma hæmatobium**, Bilharz. See *Gynæcophorus hæmatobius*, Bilharz.—**Distoma hepaticum**, Retzius (1786), Abildgaard, Zeder, Mehlis. See *Fasciola hepatica*, Linné (1767). Cf. *Distoma lanceolatum*, Mehlis. Cf. *Fasciola jacksoni*, Cobbold.—**Distoma hepatis endemicum seu perniciosum**; **Distoma hepatis innocuum**, Baelz (1883). See *Distoma sinense*, Cobbold.—**Distoma heterophyes**, von Siebold (1852), Küchenmeister, Bilharz. Syn., *Fasciola heterophyes*, Moquin-Tandon (1860); *Dicrocœlium heterophyes*, Weinland (1858).—**Distoma japonicum**, R. Blanchard (1886). See *Distoma sinense*, Cobbold.—**Distoma lanceolatum**, Mehlis (1825), Bucholz, Dujardin. Syn., *Distoma hepaticum*, Zeder (1800), Rudolphi (1810), Bremser; *Distoma opthalmobium*, Diesing (1850), Küchenmeister; *Distoma lentis*, von Ammon; *Distoma oculi humani*, von Ammon (1833), Gescheidt; *Dicrocœlium lanceolatum*, Dujardin (1845), Weinland; *Dicrocœlium oculi humani*, Weinland; *Fasciola hepatica*, Block (1782), Jördens (1802), Bosc; *Fasciola lanceolata*, Rudolphi (1803), Moquin-Tandon; *Fasciola ocularis*, Moquin-Tandon (1862); *Festucaria lentis*, Moquin-Tandon (1860); *Monostoma lentis*, Nordmann (1832), Gescheidt, Diesing; *Planaria latiuscula*, Gœze (1782). This is found in the gall-bladder, bile-ducts, and intestine of sheep, cattle, llama, rabbit, hare, pig, ass, horse, dog, cat, and man. In the last the recorded cases are few and include in all probability the trematodes of the eye described by Gescheidt, von Ammon, and others. The larva, *Cercaria longicaudata*, is found in *Helix carthusiana*, Müller, and *Planorbis marginatus*, Draparnaud. Leuckart believed *Cercaria cystophora* was the larval form of *Distoma lanceolatum*.—**Distoma lentis**, von Ammon. See *Distoma lanceolatum*, Mehlis.—**Distoma lineare**, Rudolphi. See *Syngamus trachealis*, von Siebold.—**Distoma lineare**, Zeder. This is found in the large intestine of the domestic fowl; rare.—**Distoma magnum**, Bassi (1875). Syn., *Fasciola carnosa*, Hassall (July, 1891); *Fasciola americana*, Hassall (Sept., 1891); *Distoma texicanum* (Oct., 1891). This parasite occurs in *Antilope picta*, *Bos taurus*, *Cervus aristoteles*, *Cervus canadensis*, *Cervus dama*, *Cervus elephas*, *Cariacus* (*Cervus*) *virginianus*. It is abundant in Western cattle.—**Distoma musculi**, Rudolphi. This is found in the intestine of the house-mouse (*Mus musculus*, Linné).—**Distoma oculi humani**, von Ammon (1833), Gescheidt. See *Distoma lanceolatum*, Mehlis.—**Distoma ophthalmobium**, Diesing (1850). See *Distoma lanceolatum*, Mehlis.—**Distoma ovatum**, Rudolphi. Possibly *D. cuneatum* is identical with this species. This is found in the oviducts and eggs of the domestic fowl, in the intestines of the domestic goose, and in the bursa of *Fabricius* of numerous young birds, including the fowl.—**Distoma oxycephalum**, Rudolphi. See *Distoma echinatum*, Zeder.—**Distoma pellucidum**, von Linstow. See *Mesogonimus pellucidus*, Neumann.—**Distoma pulmonale**, Baelz (1883). See *Distoma ringeri*, Cobbold (1880).—**Distoma rathouisi**, Poirier. This was found in the liver of a Chinaman at the mission of Zi-kawei, named after Père Rathouis, and at first sight resembles in size and general form *Fasciola hepatica*, Linné.—**Distoma ringeri**, Cobbold and Manson (1880). Syn., *Distoma pulmonale*, Baelz (1883). This is found in the human lungs in the mountainous regions of Formosa, Corea, and Japan, producing a parasitic hemoptysis, the treatment of which has thus far been unsuccessful.—**Distoma sinense**, Cobbold (1875). Syn., *Distoma spathulatum*, Leuckart (1876); *Distoma hepatis endemicum seu perniciosum*, Baelz (1883); *Distoma hepatis innocuum*, Baelz (1883); *Distoma japonicum*, Blanchard (1886); *Distoma endemicum*, Ijima. It is held by Moniez as not unlikely that the *Distoma conjunctum* of Cobbold belongs here. It is found in the liver, biliary ducts, and intestine of man and the cat in Japan, especially in the region of Okayama.—**Distoma spathulatum**, Leuckart (1876). See *Distoma sinense*, Cobbold (1875).—**Distoma spiculator**,



Dujardin. This is found in the small intestine of the brown rat (*Mus decumanus*, Pallas).—**Distoma, sp.**, Duncker. This larva was found by Leunis encapsulated in the muscles of the domestic hog, in the fleshy part of the diaphragm, and in the laryngeal muscles. **Distoma texicanum**, Francis (Oct., 1891). See *Distoma magnum*, Bassi (1875).—**Distoma truncatum**, Rudolphi, Ercolani. Syn., *Distoma conus*, Creplin; *Distoma conjunctum*, Cobbold (1859); *Distoma felineum*, Rivolta; *Distoma campanulatum*, Ercolani. According to Neumann, this *Distoma* was first found in the Greenland seal (Otto and Rudolphi), then in the cat (Creplin, Rivolta, Zwaardemaker, Generali), dog (Ercolani, Rivolta, Zwaardemaker, De Jong, Sonsino), American red fox (Cobbold), Indian Pariah dogs (Lewis). It is frequent in Holland and in India. It lodges itself in the bile-ducts and gall-bladder, and gives rise to a cirrhosis, which has been studied by Zwaardemaker and Neumann—. **Ditrachyceras rudis**, Sultzer. See *Diceras rude*, Rudolphi.—**Dochmius anchylostoma**, Molin (1860). See *Dochmius duodenalis*, Leuckart.—**Dochmius balsami**, Pavona. See *Uncinaria trigonocephala*, Rudolphi.—**Dochmius duodenalis**, Leuck-

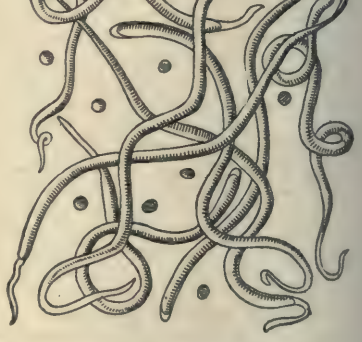
Cephalic extremity of DOCHMIUS DUODENALIS, Leuckart; profile and front view. (*After Leuckart.*)

art (1876). Syn., *Anchylostoma duodenale*, Dubini (1843); *Dochmius anchylostoma*, Molin (1860); *Anchylostomum duodenale*, Creplin (1845); Pruner (1847); Dubini (1850); Diesing (1851); *Sclerostoma duodenalis*, Cobbold; *Strongylus duodenalis*, Schneider (1866); *Strongylus quadridentatus*, von Siebold (1851); *Uncincaria duodenalis*, Railliet (1885). This nematode occurs in immense numbers in the duodenum of man in many tropical and sub-tropical countries, causing a peculiar anemia known to the Ancient Egyptians as the "*āaā* disease" and in modern times as *dochmiasis*, *anchylostomiasis*, *Egyptian chlorosis*, *chlorosis ægyptiaca*, *tropical chlorosis*, *hypoæmia intertropicalis*, *brick-makers' anemia*, *tunnel anemia*, *miners' cachexia*, *anæmia* vel *cachexia montana*, *jail debility*. Oswald Baker reports having found the ova in the evacuations of the dog, and Lutz records the parasite in the gibbon. Giles and Sinclair find the disease known as *Beri-beri* and the *Kala-gar* of Assam and Ceylon to be identical with dochmiasis. No intermediate host is necessary, but the eggs are not able to develop in the intestine if swallowed immediately after they have been laid. They must first develop into rhabditiform larvæ in muddy water or upon damp earth, which, after moulting two or three times, reach a stage in which they can develop no more outside the human intestine. The ethereal extract of male fern is a favorite remedy, but Sonsino, Macdonald, and others regard thymol as almost a specific. Perfect cleanliness must, of course, be insisted upon, as this parasite has no intermediate host, it being conveyed directly through dirt or food contaminated with infected feces.—**Dochmius sängeri**, Cobbold (1882). This is found in the intestine of the Indian elephant. To the naked eye this small worm looks like an ordinary thread-worm, but a hand lens is sufficient to demonstrate its strongyloid character.—**Dochmius stenocephalus**, Railliet. See *Uncinaria stenocephala*, Railliet.—**Dochmius trigonocephala**, Dujardin. See *Uncinaria trigonocephala*, Rudolphi.—**Dochmius tubæformis**, Molin. See *Uncinaria trigonocephala*, Rudolphi.—**Docophorus adustus**, Nitzsch. See *Docophorus icteroides*, Nitzsch.—**Docophorus icteroides**, Nitzsch. A louse frequent on ducks, relatively rare on geese, on which according to Piaget, it constitutes a mere variety called by Nitzsch *Docophorus adustus*.—**Dog-flea.** See *Pulex serraticeps*, Gervois. — **Dog-lice.** See *Hæmatopinus piliferus*, Burmeister, and *Trichodectes latus*, Nitzsch.—**Dog-tick.** See *Ixodes ricinus*, Linné, and *Dermacentor americanus*, Linné.— **Domestic Fly.** See *Musca domestica*, Linné.—**Douve du foie.** See *Fasciola hepatica*, Linné. **Dovecote Bug.** See *Acanthia columbaria*, Jenyns.—**Draconcilla Sp.**—**Dracunculus**, Lister (1690). See *Dracunculus medinensis*, Cobbold (1864).—**Dracunculus loa**, Cobbold (1864). Syn., *Dracunculus oculi*, Diesing (1860); *Loa*, Guyot, Bajon, Mongin, Guyon, etc.; *Filaria medinensis*, Gmelin; *Filaria hominis ovis*, Leidy; *Filaria lacrymalis*, Dubini (1850, *nee* Gurlt, 1831); *Filaria oculi*, Gervais, Van Beneden, Moquin-Tandon; *Filaria loa*, Guyot (1778). A parasite found beneath the conjunctiva of negroes of the Gaboon and Congo region also reported from S. America, Martinique, San Domingo, etc. The natives state that after a period of several years the worm voluntarily quits the eye.—**Dracunculus longissimus**, Cæsalpinus (1585). See *Eustrongylus gigas*, Diesing (1851). **Dracunculus medinensis**, Cobbold (1864). Syn., *D. persarum*, Kämpfer (1694), Diesing; *Filaria medinensis*, Gmelin (1789), Olfers, Rudolphi; *Filaria dracunculus*, Bremser (1819), McClelland, Pruner; *Filaria romanorum orientalis*, Sarcani; *Furia medinensis*, Modeer (1795); *Gordius medinensis*, Linné (1767), Grundler; *Vena medinensis*, Velsch (1674), *Dracunculus*, Lister (1690); *Vermis medinensis*, Grundler (1740); *Medina-worm*, *Guinea-worm*, *Filaira de médine*, *Filaire de Guinnée*, *Ver de Guinée dragoneau*, *Ver cutanee de marchais*, *Veine de medine*, Fr.; *Fadenwurm*, *Haut-wurm*, *Beinwurm*, *Pharaohswurm*, *Guineawurm*, *Medinawurm*, *Medinerischer oder guineischer Faden-wurm*, Ger.; *Draconcillo*, Sp.; *Rishta*, Rus.; *Perjunk*, *Narn*, Pers.; *Narambo*, *Narapoo chalandy*, Hind.; *Hanschoschim Haschrofim*, Heb.; Δρακόντιον μίκρον, *Agatharchidas* (Plutarch, *Symposiacon* viii), a parasite known to the ancients, being the "fiery serpents" which afflicted the children of Israel during their stay in the neighborhood of the Red Sea, which is still the center of the geographic distribution of this worm. It is exclusively confined to hot countries: Arabia Petræa, the border of the Persian Gulf and Caspian Sea, the banks of the Ganges, Upper Egypt, Abyssinia, Guinea, and the Upper Senegal. It also occurs in the West Indies, Guiana, and Brazil. Although chiefly known as a parasite of man, it has been found in the dog, horse, and ox, the disease produced by it being known as dracontiasis. The worm is supposed to have small crustaceans (*Copepoda*) as its intermediate hosts, and to be taken in drinking-water. Carter suggests the house-fly as an intermediate host. It occurs in the subcutaneous connective tissues, especially of the legs and feet. It is usually removed by gentle and continued traction, but the natives of India hold the plant *Amarpat* or *Rádpáná*, as a specific in the shape of application of the bruised leaves.—**Dracunculus oculi**, Diesing (1860). See *Dracunculus loa*, Cobbold (1864).—

Dracunculus persarum, Kæmpfer (1694). See *Dracunculus medinensis*, Cobbold (1864).—**Dracunculus spathulum,** Leuckart. See *Distomum sinense*, Cobbold (1875).—**Dragon d'alger, Dragon-leech.** See *Hirudo troctina*, Johnson.—**Duck-louse.** See *Lipeurus squalidus*, Leach.—**Dünndarmbremse.** See *Gastrophilus nasalis*, Linné.—**Dyticus marginalis,** Linné. A beetle the larva of which is reported as a human pseudo-parasite by Hope.—**Earwig.** See *Forficula auricularia*, Linné.—**Echinococcifer echinococcus,** Weinland (1861). See *Tænia echinococcus*, von Siebold, (1853).—**Echinococcus altricipariens,** Küchenmeister; **Echinococcus alveolaris,** Bernsteiner; **Echinococcus aristis,** Blanchard; **Echinococcus cerebralis,** Perroncito; **Echinococcus endogenus,** Kuhl; **Echinococcus exogenus,** Kuhl; **Echinococcus gallopavonis,** von Siebold; **Echinococcus giraffæ,** Gervais (1847); **Echinococcus granulosus,** Rudolphi (1810), Leuckart; **Echinococcus hominis,** Rudolphi (1810), Bremser, Chiaje; **Echinococcus hydatidosus,** Leuckart; **Echinococcus infusorum,** Fr.; S. Leuckart (1827); **Echinococcus multilocularis,** Leuckart. See *Echinococcus polymorphus*, Diesing.—**Echinococcus polymorphus,** Diesing (1851), Leidy. Syn., *Acephalocystis endogena*, Hunter, Owen; *Acephalocystis exogena*, Kuhl; *Acephalocystis granulosa*, Lænnec (1804), Cloquet; *Acephalocystis macaci*, Cobbold; *Acephalocystis ovis tragelaphi*, Cobbold; *Acephalocystis ovoidea*, Lænnec (1804), Cloquet, Deslongchamps, Chiaje; *Acephalocystis curculigera*, Lænnec (1804), *Diskostoma acephalocystis*, Goodsir (1844), *Echinococcus alveolaris*, Bernsteiner; *Echinococcus altriciparies*, Küchenmeister; *Echinococcus arietis*, Blanchard; *Echinococcus cerebralis*, Perroncito; *Echinococcus endogenus*, Kuhl; *Echinococcus exogenus*, Kuhl; *Echinococcus gallopavonis*, von Siebold; *Echinococcus giraffæ*, Gervais; *Echinococcus granulosus*, Rudolphi; *Echinococcus hydatidosus*, Leuckart; *Echinococcus hominis*, Rudolphi, Leidy, Bremser, Chiaje; *Echinococcus infusorum*, Fr., S. Leuckart (1827); *Echinococcus multilocularis*, Leuckart; *Echinococcus scolepariens*, Küchenmeister; *Echinococcus simiæ*, Rudolphi (1810); *Echinococcus simplex*, Leuckart; *Echinococcus veterinorum*, Rudolphi (1810), Bremser, Gurlt, Blanchard; *Hydatigena granulosa*, Batsch (1786); *Hydatis*, Lüdersen, Rudolphi, Olfers, Bremser; *Hydatis erratica*, Blumenbach (1810); *Polycephalus hominis*, Goeze (1782), Jördens (1802); *Polycephalus humanus*, Zeder (1803); *Polycephalus granulosus*, Zeder (1803), Cloquet; *Polycephalus echinococcus*, Zeder (1803), Tschudi; *Tænia visceralis socialis granulosa*, Goeze (1782); *Tænia granulosa*, Gmelin (1790); *Vesicaria granulosa*, Schrank (1788). The "hydatids," "acephalocysts," "echinococcus-vesicles," "pill-box vesicles," etc., of medical writers. This parasite is the finn of a small tapeworm (*Tænia echinococcus*, von Siebold, 1853) which infests only the dog and the wolf, occurring in a great variety of animals; it was long regarded as an independent and distinct animal, varying specifically in different hosts and organs. Echinococci have been found in man, monkeys, the dog, cat, ichneumon, rabbit, squirrel, pig, wild boar, ox, argali, sheep, goat, deer, giraffe, camel, dromedary, elan, antelope, horse, zebra, elephant, tapir, kangaroo, and turkey. They are most frequently found in ruminants, the pig and the dog, and are endemic in Iceland and abundant in regions where large numbers of cattle are raised. They are found in all parts of their host, but the liver is the favorite location.— **Echinococcus veterinorum,** Rudolphi (1810). See *Echinococcus polymorphus*, Diesing (1851).—**Echinorhynchus angustatus,** Rudolphi. A parasite of fresh water fishes.—**Echinorhynchus capræ,** Braun (1810). See *Linguatula rhinaria*, Railliet, 1886.—**Echinorhynchus cuniculi,** Bellingham. This is found in the small intestine of the domestic rabbit.—**Echinorhynchus filicollis,** Rudolphi. This is found in the intestine of the domestic duck.—**Echinorhynchus gigas,** Goeze (1782). Syn., *Echinorhynchus hominis*, Lambl (1859); *the Giant Echinorhynchus.* This parasite is found in the small intestine of the hog, the wild boar, the collared peccary and the striped hyena. It is common in India, North Africa, France, Germany, and Austria, and occurs in the United States and Mexico. Only one case, regarded by Leuckart as accidental, is recorded of its occurrence in man. Kaiser finds that the common rose-chafer (*Cetoma aurata*, Linné) swallows the larva of this worm from the excrement of the pig, and is probably the intermediate host of the worm. Schneider regards the *white worm*, the larva of the ordinary May-bug (*Melolontha vulgaris*, Fabricius) as the intermediate host, and Lespès caused the ova of this parasite to be hatched in the intestine of several species of snails (*Helix promatia*, Linné; *Helix hortensis*, Müller; *Limax maximus*, Linné; *Arion rufus*, Linné.) — **Echinorhynchus hominis,** Lambl (1859). See *Echinorhynchus gigas*, Goeze (1782). — **Echinorhynchus miliaris,** Zenker. See *Echinorhynchus polymorphus*, Bremser. —**Echinorhynchus moniliformis,** Bremser. This parasite, known to occur rarely in the field-mouse (*Arvicola arvalis*, Selys-Longchamps) and the hamster (*Cricetus frumentarius*, Pallas), has been proved by Grassi and Calendruccio to occur in the brown or Norway rat (*Mus decumanus*, Pallas) and in man, the second investigator having himself voided over fifty specimens from his intestine after taking extract of male fern. The common churchyard-beetle (*Blaps mortisaga*, Linné) is the intermediate host of this parasite.—**Echinorhynchus muris,** Zeder. This is found in the stomach of the house-mouse (*Mus musculus*, Linné).—**Echinorhynchus polymorphus,** Bremser. This is found in the intestine of the tame swan (*Cygnus odor*, Linné) and the domestic goose (*Anser domesticus*, Linné). Graeff has recognized the larval form of this parasite in the fresh-water shrimp (*Gammarus pulex*, (L.) De Geer), in which it has been named *Echinorhynchus miliaris*, Zenker. Von Siebold found it frequently encysted in the intestinal walls of the crayfish (*Astacus fluviatilis*, Rondelet). — **Echinorhynchus sphæzocephalus,** Bremser. This is found in the intestine of the domestic duck (*Anas domestica*, Linné).—**Echinorhynchus, sp.,** Lewis. This is found in the walls of the stomach of the dog.—**Egyptian Ixode.** See *Ixodes ægyptius*, Linné, and *Ixodes savignyi*, P., Gervais.—**Eimeria falciformis,** Eimer. A psorosperm found by Rivolta, d'Arloing, Tripier, and Silvestrini in the liver of the

A male ECHINORHYNCHUS ANGUSTATUS Rudolphi. (The internal organs consist of the sheath of the proboscis, with retractor muscles, lemniscus, and sexual organs. An intestine is wanting.) (*After Leuckart.*)

rabbit, but previously only found in the intestinal epithelium of the mouse. Artificial psorospermosis was produced by feeding birds with masses of affected flesh.—**Eimeria Sp.**, Blanchard. R. Blanchard refers to this genus as the parasite mentioned by Rivolta in chickens, and which the latter regarded as *Sarcosporidia*. Probably the parasites of Kühn belong here also.—**Elophilus pendulus.** See *Helophilus pendulus*, Méigen.—**Emasculating Bot.** See *Sitomys californicus*.—**Enchytræus albidus,** Henle. Under the name *Dactylius aculeatus*, Curling described this setigerous annelid as having been observed in the urine of a girl five years old, undoubtedly introduced designedly, as this worm is not parasitic, but common in garden-earth.—**Entodinium bursa,** Stein. A peritrichous infusorian found in the rumen of the ox and sheep, as are also the three following species: **Entodinium caudatum,** Stein; **Entodinium minimum,** Schuberg; **Entodinium rostratum,** Fiorentini.—**Entozoön folliculorum,** Wilson (1845). See *Demodex folliculorum*, Owen (1843).—**Epauletted Ixode.** See *Ixodes scapulatus*, Mégnin.—**Epidermoptes bifurcatus,** Rivolta (1865). Produces a cutaneous acariasis of fowls.—**Epidermoptes bilobatus** (Rivolta), Railliet and Lucet (1891). Syn., *Symbiotes avium*, Caparini (1880). Produces a multiple cutaneous acariasis in fowls.—**Epidermoptes cysticola,** Rivolta. See *Symplectoptes cysticola*, Railliet.—**Eristalis tenax,** Linné. Syn. *Ver a queue de rat, Rattenschwanzlarve, Rat-tailed larvæ.* The larvæ are reported by Jewell from the human intestine. Under the name *Cercosoma*, Canali and Brera, Bremser, Rudolphi, Siebold, and Diesing described a larva of this fly, or *Helophilus pendulus*, which had accidentally got into the urine.—**Eucolus ærophilus,** Creplin. See *Trichiosoma ærophilum*, Creplin.—**Eustrongylus gigas,** Diesing (1851). Syn., *Serpents des rognons des loups*, Jean de Clamorgan (1570); *Dracunculus longissimus cæsalpineus*, (1585); *Ascaris canis et martis*, Schrank, (1788); *Ascaris visceralis*, Gmelin (1789); *Ascaris renalis*, Gmelin (1789); *Fusaria visceralis*, Zeder (1800); *Fusaria renalis*, Zeder (1800); *Lumbricus in renibus*, Blasius; *Lumbricus martis et canis renalis*, Redi; *Lumbricus sanguineus in rene canis*, Hartman; *Les vers sortis des reins et de l'urèthre*, Moublet; *Lumbricus gulonis sibirici*, Pallas; *Dioctophyme*, Collet-Meygret (1802); *Strongylus gigas*, Rudolphi (1802); *Strongylus renalis*, Moquin-Tandon (1860). This is the largest of the parasitic *Nematodes*. Its habitat is the kidney, although reported from the liver (Lissizin) and heart (Jones) of the dog. It is met with in man, the horse, ox, dog, wolf, mink, marten, weasel, otter, seal, glutton, raccoon, coati, etc. It is fortunately rare in man; the symptoms arising from its presence resemble those of renal abscess or calculus. The finding of the eggs in the urine is the most important diagnostic consideration. The intermediate host is unknown, though the *Filaria cystica* or *Filaria piscium*, Rudolphi, found by Schneider encysted in fishes, is held by some to be the larva of this worm. Oil of turpentine may cause migration of the worm, but extirpation is indicated.—**Eustrongylus visceralis.** See *Eustrongylus gigas*, Diesing.—**Eutarsus cancriformis.** An arachnidan found by Hessling and held by Cobbold to be a genuine human parasite.—**Eutodinium bursaria,** Stein.—**Eutodinium caudatum,** Stein.—**Eutodinium dentatum,** Stein (1858). Three species of peritrichous infusoria resembling *Ophryoscolex*, and described at the same time as endoparasitic in the first and second stomachs of ruminants.—**Fadenwurm,** Ger. See *Dracunculus medinensis*, Lister.—**Fadenwurm des Augapfels.** See *Filaria conjunctivæ*, Addario. **Falciger rostratus,** Bucholz. This is found on pigeons and several other birds, chiefly in the subcutaneous connective tissue around the large veins of the neck and on the surface of the pericardium. The hypopial nympha of this parasite was described by Mégnin as *Hypodectes columbæ*. According to Robertson, wild and tame pigeons are rarely free from these *Acarina*.—**Fasciola americana,** Hassall.—**Fasciola carnosa,** Hassall. See *Distoma magnum*, Bassi.—**Fasciola hepatica,** Linné (1767), Pallas, Fabricius, Cobbold. Syn., *Fasciola humana*, Gmelin (1789), *Fasciola lanceolata*, Rudolphi (1803), *Distoma hepaticum*, Retzius (1786), Abildgaard, Zeder, Mehlis; *Planaria latiuscula*, Goèze; *Douve du foie*, *Liverfluke.* "The scientific nomenclature of this parasite involves a question of some importance. Amongst naturalists generally, the common liver-fluke is continually described under the combined generic and specific title of *Distoma hepaticum*, but working parasitologists, who are at the same time acquainted with the writings of the earlier scientific observers, know very well that this title is both incorrect and inappropriate. The proper generic appellation of this parasite is *Fasciola*, as first proposed by the illustrious Linnæus (1767) and subsequently adopted by F. Müller (1787), Brera (1811), Ramdohr (1814), and others. Unfortunately, however, Retzius (1786) and Zeder (1800) changed the generic title without good cause, and the majority of writers, following their authority, obstinately refused to employ the original name, although fair dealing with the posthumous reputation of its distinguished author, and a consideration of the distinctive types of structure displayed by the two genera (*Distoma* and *Fasciola*), alike demand the retention of the Linnæan title. In later times, M. Emile Blanchard (1847), of Paris, has strongly advocated the final adoption of the original nomenclature, and has also from time to time (in 1854–56–58–60 and 1862) demonstrated the propriety of rejecting the commonly received synonym. Another distinguished French naturalist, namely, Prof. Moquin-Tandon, has also employed the term *Fasciola*, but by placing in the genus several species not properly belonging to it, such as *Distoma lanceolatum* and *Distoma heterophyes*, he has unwittingly rendered "confusion worse confounded (Cobbold)." This is preëminently a parasite of ruminants (ox, sheep, goat, camel), but it is also found in the hog, in the horse and ass (Daubenton), in the hare and rabbit (Cobbold) the squirrel (Tozzetti), kangaroo (Bremser, Diesing), antelopes and deer (Ploskal), beaver (Czermak), and man (Partridge, Giesker, Harris, etc.). It is usually found in the liver, gall-bladder, but sometimes wanders about, reaching the lungs and afterwards the muscles and connective tissue. The egg of the fluke, passing from the biliary duct through the intestine to the ground, gives rise to a ciliated embryo, which attaches itself to and penetrates the water-snail (*Limnæa minuta*, Draparnaud,



FASCIOLA HEPATICA, Linné. (*After Leuckart.*)

Free embryo of FASCIOLA HEPATICA Linne. (*After Leuckart.*)

r *L. truncatula*, Müller, and *Limnæa peregr*, Drap-rnaud), in which it lodges in the respiratory cavity, id after encystment gives rise to redeæ and cercariæ; ie latter become free and finally infect mammals. eumann suggests *Limnæa humilis*, Say, as the inter-ediate host in North America, and *Limnæa viator*, Orbigny, in the Argentine Republic. Prophylaxis nsists chiefly in keeping the sheep or cattle in dry stures. According to Trasbot, the young buds of ie maritime pine mixed with bran produce curative ects. Mojkowski obtained encouraging results with phthalin. The regimen must be strengthening. ie liver-fluke is found throughout Europe, except Iceland. It is rare in Asia and North Africa, but common in North and South America and Australia d Tasmania. Fascioliasis occurs most frequently young animals and is increased by wet weather; e epizoöties always follow abundant and prolonged ins.—**Fasciola heterophyes**, Moquin-Tandon 860). See *Distoma heterophyes*, Siebold.—**Fasci-a humana**, Gmelin (1789). See *Fasciola hepatica*, nné (1767).—**Fasciola jacksoni**, Cobbold (1869). n., *Distoma hepatica*, Jackson (1847), *Distomum phantis*, Diesing (1858). This is found in the iary ducts and duodenum of the Indian elephant d is the most important of the whole group of para-es infecting elephants.—**Fasciola lanceolata**, ıdolphi (1803), Moquin-Tandon.—**Fasciola ocu-ris**, Moquin-Tandon (1862). See *Distoma lanceola-m*, Mehlis (1825); also *Fasciola hepatica*, Linné 767).—**Fasciola trachea**, Montague. See *Syn-mus trachealis*, von Siebold.—**Federmilbe der auben**, Zürn. See *Strongylus bronchialis*, Cobbold.—**Filaire Guinea, Filaire de Médine.** See *Dracunculus edinensis*, Cobbold (1864).—**Filaire de l'œil**, Fr. e *Filaria conjunctivæ*, Addario.—**Filaire sous-onjonctivale.** See *Filaria conjunctivæ*, Addario. **Filaria ægyptiaca**, Sonsino. See *Filaria san-inis hominis*, Lewis.—**Filaria anatis**, Rudolphi. und in the heart of the domestic duck by Paul-us.—**Filaria des Auges.** See *Dracunculus loa*, bbold, *Filaria lacrymalis*, Gurlt, and *Filaria tis*, Diesing.—**Filaria bancrofti**, Cobbold (1877). e *Filaria sanguinis hominis*, Lewis.—**Filaria bron-ialis**, Rudolphi. See *Strongylus bronchialis*, Cob-ld.—**Filaria bubali**, Rudolphi. See *Filaria cer-a*, Dujardin.—**Filaria canis cordis**, Leidy. See *laria immitis*, Leidy.—**Filaria capræ**, von Linstow. is is found in the muscles of the domestic goat.—**laria cervi-elaphi**, Rudolphi. See *Filaria cervina*, jardin.—**Filaria cervina**, Dujardin (1845). Syn., *laria cervielaphi*, Rudolphi; *F. papillosa*, Rudolphi *parte*); *F. hilato-papillosa*, Alessandrini; *F. tere-*, Diesing (1851); *F. bubali*, Rudolphi (?); *F. ten-ulata*, Mehlis (?) (1840). This is found in the abdo-n, eye, and intestinal wall of domestic cattle and deer. der the name of *Thelozia*. Bosc describes it from neath the eyelids of an ox, but considers it to be an ect larva.—**Filaria cincinnati**, Perroncito. See *hocerca reticulata*, Diesing.—**Filaria clava**, Wedl. is is found in the peritoneal connective tissue and estines of the domestic pigeon. **Filaria conjunc-æ**, Addario (1885). Syn., *Filaria palpebralis*, Pace 67); *Filaria inermis*, Grassi; *Filaire sous-conjonc-ale*, *Filaire de l'œil*, *Fadenwurm des Augapfels*. und beneath the conjunctiva of the eye in man and domestic ass and horse.—**Filaria cygni**, Rudolphi. und by Redi in the intestine and abdomen of the ne swan.—**Filaria cystica**, Dobson. See *Filaria sanguinis hominis*, Lewis.—**Filaria cystica**, Rudolphi. This was found by Schneider encysted in fishes and identified by him as the larva of *Eustrongylus gigas*, Diesing, though without sufficient reason, according to Leuckart.—**Filaria dermathemica**, O'Niel (1875); da Silva Aranjo (1875). This was found as the cause of an endemic dermatosis of the negroes of the west coast of Africa. Leuckart reports an analogous disease among foxes, and Semmer in horses.—**Filaria dracunculus**, Bremser (1819). See *Dracunculus medinensis*, Cobbold (1864).—**Filaria equina**, Abildgaard, Emil Blanchard. Syn., *Gordius equinus*, Abildgaard; *Filaria equi*, Gmelin; *Filaria papillosa*, Rudolphi (ex parte Allesandrini); *F. pellucida*, Kennedy; *Ascaris pellucida*, Brown; *Thelozia rhodesii*, Desmarest (1828). This is found in the thoracic cavity, peritoneum, muscles, men inges, and eyes of the domestic horse and ass and mule, and is frequent in Upper India and Bengal, where it is known as *sanp*, or serpent in the eye. Usually but one eye is affected, the worms swimming about freely in the aqueous humor.—**Filaria evansi**, Lewis. This was found in the dromedary by Griffith Evans, the larvæ in the general circulation (resembling *F. sanguinis hominis*, Lewis), and the adults in the lungs and mesentery. **Filaria hæmatica**, Gruby and Delafond. See *Filaria immitis*, Leidy.—**Filaria hæmorrhagica**, Railliet. Syn., *F. multipapillosa*, Condamine and Drouilly. This was found as the cause of cutaneous hemorrhage (*hæmathydrosis*) in horses, especially those of Eastern origin, the steppe breed, and white horses of Tartary.—**Filaria hepatica**, Cobbold. This was found by Mather encysted in the intestinal mucous membrane and biliary ducts of a dog. Railliet considers it a larval form.—**Filaria hominis**, Diesing (1851).—**Filaria hominis bronchialis**, Rudolphi (1819). See *Filaria lymphatica*, Moquin-Tandon (1860).—**Filaria hominis oris**, Leidy (1850). Leidy suggested the identity of this worm with *Dracunculus medinensis*, Cobbold, in which Leuckart agreed. Blanchard and others oppose this view. It may, perhaps, be the *Filaria lymphatica*, Moquin-Tandon. The single specimen was obtained from the mouth of a child.—**Filaria immitis**, Leidy. Syn., *Filaria hæmatica*, Gruby and Delafond; *Filaria canis cordis*, Leidy; *Filaria papillosa hæmatica*, Molin. This is found in the heart and blood-vessels of the dog. It is very abundant in Chinese dogs, and is also found in those of Europe, and North and South America. The larvæ are found in the dog-flea (*Pulex serraticeps*, Gervais) and in the dog-louse (*Trichodectes canis*, De Geer, and *Hæmatopinus piliferus* Burmeister), and by Manson in the mosquito (*Culex mosquito*). According to Manson, these insects infest the drinking-water, from which the free-swimming larvæ are taken by dogs in drinking. Grassi disputes this.—**Filaria inermis**, Grassi (1887). See *Filaria conjunctivæ*, Addario.—**Filaria irritans**, Rivolta. Syn., *Dermofilaria irritans*, Rivolta.—**Filaria labialis**, Pane (1864). A parasite found in a pustule on the lip of a man in Naples; perhaps it is identical with *Filaria lymphatica*, Moquin-Tandon.—**Filaria labio** or **Filaria labiato-papilloso**, Alessandrini. See *Filaria cervina*, Dujardin.—**Filaria lacrymalis**, Dubini (1850). See *Dracunculus loa*, Cobbold.—**Filaria lacrymalis**, Gurlt (1831). Syn., *Filaria des Auges*. This is found in the lacrymal duct and beneath the eyelids of the domestic ox. Baillet distinguishes it from the filaria of the horse (*F. palpebralis*, Wilson), than which it is more common. Its origin is unknown.—**Filaria lentis**, Diesing (1851), Gervais, van Beneden, and Cobbold. Syn., *Filaria*

oculi, Owen, Moquin-Tandon; *Filaria oculi humani*, von Nordmann (1832), Gescheidt, Ammon; *Filaria des Auges*, Ger. This is found in the crystalline lens of the human eye.—**Filaria leporis pulmonalis**, Fröhlich, Diesing. See *Strongylus commutatus*, Diesing.—**Filaria lienalis**, Stiles. See *Spiroptera reticulata*, Creplin.—**Filaria loa**, Guyot (1778). See *Dracunculus loa*, Cobbold (1864).—**Filaria lymphatica**, Moquin-Tandon (1860). Syn., *Hamularia lymphatica*, Treutler (1793); *Tentacularia sub-compressa*, Zeder (1800); *Hamularia subcompressa*, Rudolphi (1810); *Filaria hominis bronchialis*, Rudolphi (1819); *Filaria hominis*, Diesing (1851); *Strongylus bronchialis* or *Strongylus tracheo-bronchialis*, Cobbold (1879); *Filaire bronchiale*, Fr. A parasite first observed by Bianchi, Treutler, and Brera, and afterward by Zahn and others, in the tracheal and peribronchial lymphatic ganglia of man. Diesing, Weinland, and Cobbold at one time believed this worm to be identical with *Strongylus longivaginatus*, Diesing, while Leuckart held Treutler's worm to be the male of *Ascaris mystax*, Rudolphi, and Brass that it was the larva of a fly. The *Filaria hominis*, Leidy (1850), and *Filaria labialis*, Pane (1864), may perhaps be identical with this parasite.—**Filaria mansoni**, Cobbold. This is found in the eye of the domestic fowl in China.—**Filaria medinensis**, Gmelin (1789). See *Dracunculus medinensis*, Cobbold (1864).—**Filaria megastoma**, Rudolphi. See *Spiroptera megastoma*, Rudolphi.—**Filaria microstoma**, Schneider. See *Spiroptera megastoma*, Gurlt and Schneider.—**Filaria multipapillosa**, Condamine and Drouilly. See *Filaria hæmorrhagica*, Railliet.—**Filaria muscæ**, Carter. This was found in the horse-fly of India by H. J. Carter, who suggested that it might be the larva of the Guinea-worm (*Dracunculus medinensis*, Cobbold) of man.—**Filaria nasuta**, Rudolphi. See *Disparagus nasutus*, Rudolphi.—**Filaria niellyi**, Moniez. See *Rhabditis niellyi*, Blanchard.—**Filaria obtusa**, Schneider. Syn., *Spiroptera obtusa*, Rudolphi; *Spiroptera murina*, Leuckart. This is found in the stomach of the brown rat (*Mus decumanus*, Pallas) and of the house mouse (*Mus musculus*, Linné).—**Filaria oculi**, Owen. See *Filaria lentis*.—**Filaria oculi**, Gervais et van Beneden (1859). See *Dracunculus loa*, Cobbold.—**Filaria oculi humani**, von Nordmann (1832). See *Filaria lentis*, Diesing.—**Filaria osleri**, Cobbold. Syn., *Strongylus bronchialis canis*, Osler. A parasite found by Blumberg Rabe, Renault, and Osler in tubercles of the trachea and bronchi in dogs, producing a bronchitis fatal in a large proportion of cases.—**Filaria palpebralis**, Pace (1867), Wilson. This is found beneath the eyelids or in the lacrymal canal of horses, causing at times severe conjunctivitis, with opacity of the cornea. R. Blanchard holds this to be identical with *Filaria conjunctivæ*, Addario (1885).—**Filaria papillosa**, Rudolphi. A term applied to the filaria of horses and cattle before Alessandrini indicated specific differences. See *F. cervina* and *F. equina*.—**Filaria pellucida**, Kennedy. This is considered by Neumann as a young form of *F. equina*, Abildgaard.—**Filaria peritonei hominis**, Babes (1880). This was found encapsulated in the gastrolineal ligament of man by Babes in Budapest.—**Filaria piscium**, Rudolphi, Siebold, Schneider (*q. v.*). A parasite held by some to be the larva of *Eustrongylus gigas*, Diesing. It is a parasite very abundant in many maritime fishes, particularly in the haddock, but never in the human being, in whom it was held to occur by Lawrence and others.—**Filaria recondita**, Grassi and Calandruccio, a name given to the adult form (yet undiscovered) of *Hæmatozoön lewisii*, Grassi.—**Filaria restiformis**, Leidy (1880) This was found in the human urethra.—**Filaria rhytipleuritis**, Deslongschamps. This is found in the stomach of the brown rat (*Mus decumanus*, Pallas) The larva is found in the cockroach (*Periplaneta orientalis*, Linné).—**Filaria romanorum orientalis** Sarcani. See *Dracunculus medinensis*, Cobbold (1864).—**Filaria salisburyi.** See *F. sanguinis hominis*, Lewis. **Filaria sanguinis**, Lewis. See *Filaria sanguinis hominis*, Lewis.—**Filaria sanguinis equi**, Sonsino. The name given to the filaria larvæ found in the blood of the horse. The adult form is unknown.—**Filaria sanguinis hominis**, Lewis

FILARIA SANGUINIS HOMINIS, Lewis. (*From Leuckart, after Lewis.*)

(1872), Cobbold. Syn., *Filaria bancrofti*, Cobbold (1877); *Filaria sanguinis hominis ægyptiaca*, Sonsino (1874); *Filaria sanguinis*, Bancroft; *Filaria salisburyi*; *Filaria wuchereri*, Silva Aranjo (1877); *Filaria cystica*, Dobson; *Filaria dermathemica*, da Silva Aranjo (1875); *Filaria sanguinis hominum*, Lewis (1885); *Trichina cystica*, Salisbury (1868). The female adult worm was discovered by Bancroft of Brisbane, the male by Aranjo and Dos Santos of Brazil, and Sibthorp of Madras, and the embryo by Demarquay, Wucherer, and Lewis. Bernard gives the life-history of the parasite as follows:—

EMBRYO.	LARVA.	ADULT.
1. Parasite of the blood of man.	2. Parasite of *Culex mosquito*. 3. Free in water. 4. Parasite of the alimentary canal of man.	5. Parasite of the lymphatic vessels of man.

Manson, judging this parasite from the wideness of its distribution and the grave character of the diseases it produces, holds it to be infinitely the most important of the animal parasites attacking man. Filariasis, including lymph-scrotum, chylous dropsy, and hematochyluria, due to this worm is a malady of the tropics up to about the 38th parallel, N. latitude, but chiefly in the East. Many cases present lymphatic varix of the groin and scrotum, the extirpation of which is strongly recommended by Maitland. Hydrogen is recommended as a therapeutic agent of great efficacy.—**Filaria sanguinis hominis ægyptiaca**, Sonsino (1874). See *Filaria sanguinis hominis*, Lewis.—**Filaria sanguinolenta**, Grassi (1888). See *Spiroptera sanguinolenta*, Rudolphi.—**Filaria scutata œsophagea bovis**, Müller. See *Myzomimus scutatus*, Stiles (1892).—**Filaria smithii**, Cobbold (1882). This was found in the walls of the stomach of the Indian elephant.—**Filaria sp.**, Drechsler. This is found encapsulated

n the intestine of domestic cattle.—**Filaria sp.,** Mégnin. This is found in the connective tissue of the horse.—**Filaria tentaculata,** Mehls (1846). —**Filaria terebra,** Diesing (1851). See *Filaria ornata*, Dujardin (1845).—**Filaria trachealis,** Brisowe and Rainey (1855). See *Strongylus paradoxus*, Mehlis. — **Filaria tracheo-bronchialis,** Cobbold. See *Filaria lymphatica*, Moquin-Tandon.—**Filaria rispinulosa,** Diesing. This was found in the vitreus humor of the dog by Gescheidt; Cobbold holds to be a larva.—**Filaria uncinata,** Rudolphi. See *Spiroptera uncinata*, Rudolphi.—**Filaria wuchri,** da Silva Lima (1877). See *Filaria sanguinis hominis*, Lewis.—**Filaria zebra,** Mongrand. This was found in the left saphena vein of a convict. Robin and Davaine regard this as a fibrinous coagulum.—**Filzlaus.** See *Phthiriasis inguinalis*, Leach. **Fleas.** See under *Pulex* and *Sarcopsylla*.—**Fleischfliege.** See *Musca carnaria*, Linné.—**Flour-beetle, Flower-worm.** See *Tenebrio molitor*, Linné.—**Forest-fly.** See *Hippobosca equina*, Linné.—**Forficula auricularia,** Linné. Syn., *Earwig*, *Verme auricolare*, Ital.; *Worm*, Dutch; *Orentvist*, Dan.; *Ormask*, Sw.; *Gemeiner Ohrwurm*, *Ohrbohrer*, Ger.; *Perceorèille*, Fr.; *Tesura-orelhas*, Per.; *Gusano del oido*, Sp. But few cases are on record in support of the popular notion that this insect acts as a human parasite. See those of Griffin of Ireland.—**Forked worm.** See *Syngamus trachealis*, v. Siebold.— **Founza ia ngômbe** (cattle-worm). Native name for the larva of a dipterous insect developing beneath the skin of the ox and man in Central Africa. **Freyana anatina,** Koch. This is an acarine parasite of the duck.—**Frühlingskäfer.** See *Geotrupes vernalis*, Linné.—**Tesura-orelhas,** P. See *Forficula auricularia*, Linné. —**Furia infernalis,** Linné. "An altogether fabulous parasite" (Cobbold), believed in by early parasitologists.—**Furia medinensis,** Modeer (1795). See *Dracunculus medinensis*, Cobbold (1864).—**Fusaria lumbricoides,** Zeder. See *Ascaris lumbricoides*, Linné.—**Fusaria mystax,** Zeder. See *Ascaris mystax*, Zeder.—**Fusaria papillosa,** Zeder. See *Heterakis papillosa*, Bloch.—**Fusaria reflexa,** Zeder. See *Heterakis inflexa*, Rudolphi.— **Fusaria renalis,** Zeder. See *Eustrongylus gigas*, Diesing.—**Fusaria Strongylus,** Zeder. See *Heterakis papillosa*, Bloch.—**Fusaria vermicularis,** Zeder. See *Oxyuris vermicularis*. Bremser.—**Fusaria visceralis,** Zeder (1803). See *Eustrongylus gigas*, Gmelin.—**Fusaria vituli,** Zeder. See *Ascaris vituli* (Gmelin) Goeze.—**Gad-fly.** See genus *Gasterophilus*.—**Galeodes araneoides,** Pallas. Syn., *Galeodes arabs*, Koch; *Galeodes fatalis*, Herbst. *The Camel Tick*, a disgusting and highly venomous species, nearly two inches in length, and very apt to attack man if disturbed. Found in Egypt and the oases of the Sahara, through Southern Russia and Arabia to India. It is a great torment to camels in the countries where it abounds.—**Gamasus auris,** Leidy. An acarus found by Turnbull in the external auditory canal of the ox, particularly on the tympanum.—**Gastrodiscus polymastos,** Leuckart, Cobbold. See *Amphistoma sonsinoi*, Cobbold.—**Gastrophilus asininus,** Brauer. See *Gastrophilus flavipes*, Olivier. **Gastrophilus elephantis,** Cobbold (1882). Syn., *Oestrus elephantis*, Steel (1878). *Œstrus of the Elephant*, Cobbold (1866). The larvæ or bots are found in the stomach of both the African and Indian elephant.—**Gastrophilus equi,** Fabricius, Leach. Syn., *Œstrus equi*, Clark, Fabricius, Latreille. Oliver, Fallen, Macquart, Westwood, Joly; *Œstrus intestinalis*, De Geer; *Œstrus hæmorrhoidalis*, Linnelin, Schrank; *Œstrus gastricus major*, Schwab; *Œstrus gastricus vulgaris*, Schwab; *Œstrus bengalensis*, var. *equi*, Macquart; *Gastrus equi*, Rondani; *Common Bot-fly of the Horse*; the *Breeze* or *Horse-bee*; *Pferdemagenfliege* or *Bremsfliege, grosse Magenbremse.* This is a cosmopolitan; from June to July the eggs are laid on the hair, whence they are licked off and transferred to the stomach, to the walls of which the larvæ or grubs adhere and are passed *per anum*, to bury themselves in the earth until they reach the imago stage.—**Gastrophilus flavipes,** Olivier. Syn., *Œstrus flavipes*, Olivier; *Gastrus flavipes*, Brauer; *Gastrophilus asininus*, Brauer. This is found in Southern Europe, North Africa and Asia Minor; larvæ are found in the stomach of the ass.—**Gastrophilus hæmorrhoidalis** (Linné), Leach, (1817). Syn., *Œstrus ani equorum*, Linné, (1746); *Œstrus hæmorrhoidalis*, Linné (1761); *L'Œstres du fondement des chevaux*, Geoffroy (1764); *Œstrus equi*, var. *hæmorrh.*, Fabr. (1794); *Gastrus hæmorrhoidalis*, Meigen (1824); *Mastdarmbremse*, Ger.; *Afterbremse*, Ger.; *Red-tailed Bot-fly*, *Red-tailed Horse-bot.* This is found in Europe and North America, the most common with *Gastrophilus equi.* The female lays the eggs on the lips of the horse. The larvæ often become attached to the mucous membrane of the pharyngeal region, producing dyspnea and asphyxia; they may also be found both in the right and left sacs of the stomach and remain for some time in the ectal portions of the rectum before leaving the body, and then they assume a characteristic green tint. They may be seen at the time of defecation, when the rectum is everted, and it is this which gave rise to the error that the bots were developed in the region.—**Gastrophilus inermis,** Brauer (1858). Syn., *Gastrus inermis*, Schiner (1861). An Austrian species troublesome to horses, found near Gyois and the Haklasberge; the larva is unknown.—**Gastrophilus lativentris,** Löw. This is found in Kurland, and infests domestic animals.—**Gastrophilus nasalis,** Linné (1761), Schiner (1861). Syn., *Mouche des chevaux*, Réaumur (1734); *Œstrus nasalis*, De Geer (1776); *Œstrus equi*, var. (*a*) *nasalis*, Fabricius (1794); *Œstrus veterinus*, Clark (1797); *Œstrus salutiferus*, Clark (1815); *Œstrus clarkii*, Leach (1817); *Gastrus salutaris*, *Gastrus nasalis*, *Gastrus jumentorum*, *Gastrus clarkii*, Meigen (1824); *Œstrus salutaris*, Macquart (1835); *Œstrus duodenalis*, Schwab; *Gastrus nigritus*, Letterst; *Gastrus subjacens*, Walker; *Rasenbremsfliege*, *Dünndarmbremse*, Ger. A European species, most common in Austria and Prussia, the larvæ being found especially in the duodenum, rarely in the stomach of the horse. The female deposits the eggs in the alæ of the nostrils and on the lips of the horse. Brauer considers the form reported from Nova Scotia (*Gastrus subjacens*, Walker) as belonging here.—**Gastrophilus pecorum,** Fabricius (1749), Schiner (1861). Syn., *Œstrus bovis*, var. *β*, Linné (1761); *Œstrus pecorum*, Fabricius; *Œstrus vituli*, Fabr. (1794); *Œstrus equi*, var. *β*, Clark (1815); *Gastrus pecorum*, Meigen; *Gastrus jubarum*, Megerle (1824); *Œstrus gastricus major*, Schwab (1840); *Gastrus ferruginatus*, Zetterst, Rondani (1843–8); *Œstrus veterinus*, var. Joly (1846); *Gastrus selysii*, Carlier (1842); *Gastrus veterinus*, Green; *Viehbremse*, *Horse-bee.* This is found throughout Europe, rare in Sweden, abundant in Hungary. The larvæ are fixed for some time in the rectum before emerging to undergo nymphosis.—**Gastrus clarkii,** Meigen. See *Gastrophilus nasalis*, Linné, Schiner.—**Gastrus equi,** Rondani. See *Gastrophilus equi*, Fabricius.—**Gastrus ferruginatus,** Rondani, Zetterst. See *Gastrophilus pecorum*, Fabricius. — **Gastrus**

flavipes, Brauer. See *Gastrophilus flavipes.* Olivier. — **Gastrus hæmorrhoidalis,** Meigen. See *Gastrophilus hæmorrhoidalis,* Linné. — **Gastrus inermis,** Brauer. See *Gastrophilus inermis,* Brauer. — **Gastrus jubarum,** Meigen. See *Gastrophilus pecorum,* Fabricius. — **Gastrus jumentorum,** Meigen. See *Gastrophilus nasalis,* Linné. — **Gastrus lativentris,** Brauer, Schiner. See *Gastrophilus lativentris,* Löw.—**Gastrus nasalis,** Meigen. See *Gastrophilus nasalis,* Linné.—**Gastrus nigricornis,** Löw. Infests domestic animals in the Crimea (Bessarabia).—**Gastrus nigritus,** Zetterst. See *Gastrophilus nasalis,* (Linné) Schiner.—**Gastrus pecorum,** Brauer, Meigen, Walker. See *Gastrophilus pecorum,* Fabricius.—**Gastrus salutaris,** Meigen. See *Gastrophilus nasalis* (Linné), Schiner.—**Gastrus selysii,** Carlier. See *Gastrophilus pecorum,* Fabricius.—**Gastrus subjacens,** Walker. See *Gastrophilus nasalis,* (Linné) Schiner.—**Gastrus veterinus,** Green. See *Gastrophilus pecorum,* Fabricius.—**Gauleblutwürmchen.** See *Drepanidium ranarum,* R. Lankester.—**Gekörnelter Blutegel.** See *Hirudo granulosa.*—**Gemeine Räudemilbe.** See *Psoroptes communis,* Fürstenberg.—**Gemeiner Blutegel.** See *Hirudo medicinalis,* Ray.—**Gemeiner Floh.** See *Pulex irritans,* Linné.—**Gemeine Kriebelmücke.** See *Simulium reptans* Linné.—**Gemeiner Zungenwurm.** See *Linguatula rhinaria,* Railliet.— **Geotrupes vernalis,** Linné. Syn., *Frühlingskäfer.* A beetle, the larva of which is reported by Van Bromell as a facultative human parasite.—**Gewitterfliege.** See *Hydrotæa meteorica,* Linné.—**Globidium leuckartii,** Flesch. An infusorian found in the wall of the sustaining connective tissue of the villi of the small intestine of the horse. An uncertain form which appears to have analogies with the *Sarcosporides* (*Balbiania mucosa*), described by Blanchard, from the kangaroo. Moniez holds it to be but the embryo of the tenia of the horse, encysted in the papillæ, like those of *T. murina* of the rat, described by Grassi.—**Globocephalus longemucronatus,** Molin. This was found by Wedl in the intestine of the hog.—**Glossina morsitans,** Westwood. Syn., *Tsé-tsé Tzé-tzé,* or *Zimb.* The fly so frequently mentioned in the works of African travelers. It is about the size of the horse-fly. The accounts of the virulence of the bite of this pest are so conflicting as to lead to the conclusion that it is only poisonous when its proboscis is the carrier of a virus with which it has been previously infected.—**Glyciphagus buski,** Murray (1841). An accidental parasite in the ulcer on a negro's foot.—**Glyciphagus cursor,** Gervais (1841). Syn., *Acarus domesticus,* de Geer, 1735. *Glyciphagus prunorum,* Hering, 1838. *Sarcoptes hippopodus,* Hering (1838). A mite found in a horse's foot affected with canker. An accidental parasite.—**Gnat.** See *Culex pipiens,* Linné.—**Gnathostoma hispidium.** See *Cheiracanthus hispidus,* Fedschenko.—**Goat-louse.** See *Trichodectes climax,* Nitzsch.—**Goldfliege.** See *Lucilia cæsar,* Robineau-Desvoidy. — **Gongylonema minimum,** Molin. This was found in the stomach and liver of the house-mouse (*Mus musculus,* Linné). — **Goniocotes abdominalis,** Piaget. Syn., *Philopterus hologaster* [N], Verrill. *Goniocotes hologaster* (Burmeister), Denny. A louse common to the different varieties of *Gallus domesticus,* Brisson.—**Goniocotes burnetti** (Packard) Verrill. See *Goniodes burnetti,* Packard.—**Goniocotes compar,** Nitzsch, Denny, Paiget.—Syn., *Goniodes compar* (N), Verrill. *Pediculus bidentatus,* Scopoli. *Philopterus compar,* Burmeister. The louse of the pigeon. A common parasite of all varieties of domestic pigeons. According to Denny it has never been found on the turtle-dove.—**Goniocotes gigas,** Taschenberg. One of the lice of fowls.—**Goniocotes hologaster,** Nitzsch. Syn., *Ricinus gallinæ,* De Geer. This is a louse found upon the Bankhiv fowl, but not very abundant. The form described by Denny as *Goniocotes hologaster* is referred by Piaget to *Goniocotes abdominalis, q. v.*—**Goniocotes rectangulatus,** Nitzsch. Syn., *Goniocotes rectangulus,* Burmeister. This is found upon Guinea-fowls and peacocks.—**Goniodes burnetti,** Packard. This is found in the domestic fowl and perhaps is identical with *Goniocotes dissimilis,* Nitzsch (Piaget, 269).—**Goniodes compar** (N), Verrill. See *Goniocotes compar,* Nitzsch.—**Goniodes dissimilis,** Nitzsch. Syn., *Philopterus dissimilis* (N), Verrill. A louse of the domestic fowl, rather rare.—**Goniodes falcicornis,** Nitzsch. Syn., *Pulex pavonis,* Redi; *Pediculus pavonis,* Linné, Schrank, Frisch, Panzer; *Nirmus tetragonocephalus* Olfers; *Ricinus pavonis,* Kirby and Spence. *The Louse of the Peacock,* Albin, Shaw. The common louse of the peacock. — **Goniodes minor,** Piaget. Syn., *Dwarf Goniode.* This is found on *Columba tigrina, C. risoria, C. bitorquata,* and on domestic pigeons. — **Goniodes numidianus,** Denny. The louse of the Pintado or Guinea-fowl (*Numida meleagris,* Linné).—**Goniodes parviceps,** Piaget. *Small-headed Goniode.* This is found frequently on peacocks in company with *G. falcicornis.*—**Goniodes stylifer,** Nitzsch. Syn., *Pediculus meleagris,* Schrank. Found upon the turkey. — **Goose-louse.** See *Trimetopon lituratum* (Nitzsch), Piaget. — **Gordius aquaticus,** Dujardin (1842); Syn., *Seta* or *Vitulus aquaticus,* Aldrovandi (1605). A common worm in the mountainous regions of Europe and long considered as an occasional pseudo-parasite of man.—**Gordius chilensis,** Emil Blanchard (1849); an imperfectly-known species reported by Gay as a pseudo-parasite of man in Chili.—**Gordius equinus,** Abildgaard. See *Filaria equina* Abildgaard.—**Gordius marinus,** Linné. See *Filaria piscium,* Rudolphi. — **Gordius medinensis,** Linné (1767). See *Dracunculus medinensis,* Cobbold (1864). — **Gordius orientalis,** von Siebold. This is found in the abdomen of the cockroach (*Periplaneta orientalis,* Linné).— **Gordius sp.,** Hess (1887). Found in the honey-bee. Cf. *Mermis albicans,* von Siebold (1857).—**Gordius subbifurcus,** von Siebold (1848); See *Gordius tolosanus,* Dujardin (1842) — **Gordius tolosanus,** Dujardin (1842); Syn., *Oxyuris toma pontieri,* H. Cloquet (1822), *Gordius subbifurcus,* von Siebold (1848). A European species reported by Degland (1823), and Fiori (1881) as a pseudo-parasite of man.—**Gordius varius,** Leidy (1851). A common American species, recorded by Diesing after Kirkland as a pseudo-parasite of man.—**Gordius viviparous** Bloch. See *Ascaris vituli* (Gmelin), Goeze.—**Grand pou du cheval.** See *Hæmatopinus tenuirostris,* Burmeister. —**Grande Bothriocefalo.** See *Bothriocephalus latus,* Bremser.— **Gray Carnivorous-fly, Gray Flesh-fly, Graue Fleischfliege.** See *Sarcophaga carnaria,* Meigen.—**Gray Leech.** See *Hirudo medicinalis,* Ray.—**Gray Simulium.** See *Simulium griseum,* Meigen. — **Great Breeze-fly.** See *Tabanus bovinus,* Linné.—**Green Leech.** See *Hirudo medicinalis,* Ray. — **Gregarina avium intestinalis.** Psorosperms found encysted in the submucous tissue of the intestine of the *Gallinacea* of the poultry yard. They are introduced with the food. Symptoms: diarrhea, depression, loss of appetite, death from marasmus. The affection generally occurs in an epizoötic form which has been termed tuberculo-diphtheria.—**Gros pou du boeuf.** See *Hæmatopinus eurysternus,* Burmeister.—**Gros pou du chien.** See *Trichodectes latus*

Nitzsch.—**Gros tavin.** The name in Burgundy for the Great Breeze-fly. See *Tabanus bovinus*, Linné. —**Grub in the Back.** See *Hypoderma bovis*, Latreille, and *Hypoderma lineata*, Löw.—**Grubenfliege.** See *Homalomyia canicularis*, Linné.—**Guinea-fowl Goniodes.** See *Goniodes numidianus*, Denny.—**Guinea-worm, Guineischer Wurm,** Ger. See *Dracunculus medinensis*, Cobbold. — **Gusano.** See *Dermatobia noxialis*, Goudot.—**Gusano del oido, Sp.** See *Forficula auricularia*.—**Gynæcophorus bovis,** Sonsino. See *Gynæcophorus crassus*, Sonsino.—**Gynæcophorus crassus,** Sonsino. Syn., *Bilharzia bovis*, Sonsino; *Bilharzia crassa*, Sonsino. This was found in 1876 at Zagazig, Egypt, in the portal vein, ureters and urinary bladder of domestic sheep and cattle. It has since been found in Italy. Neumann regards it as but a variety of *Gynæcophorus hæmatobius*, Diesing, and hence dangerous to man. It gives rise to symptoms similar to those caused by the last-named parasite.—**Gynæcophorus hæmatobius,** Diesing (1858); Syn., *Schistoma hæmatobium*, Weinland (1858); *Distoma capense*, Harley (1864); *Distoma hæmatobium*, Bilharz, (1852), Küchenmeister, Moulinie, Leuckart; *Thecosoma hæmatobium*, Moquin-Tandon (1860); *Bilharzia magna*, Cobbold; *Bilharzia hæmatobia*, Cobbold (1858). A fluke originally found by Bilharz in 1851 in Egypt in 63 per cent. of fellahs and copts. It has since been frequently found in the natives and European residents along the entire coast of East Africa, in Arabia, Mauritius, India, and Brazil, producing a grave disorder known as endemic hematuria. It also occurs in an African monkey, the *Mangabey* (*Cercopithecus fuliginosus*, Geoffroy). It is most abundant in the vessels of the portal system, and mesentery, and in the hemorrhoidal and vesical veins. It feeds upon the blood; no intermediate host is known, and it is supposed to be introduced into the human system by impure drinking-water, as a swimming embryo. Fouquet of Cairo reports favorably on the use of extract of male fern, and Dight, of Beirut, recommends the injection of large amounts of sulphuretted hydrogen and carbon dioxid into the rectum and bladder.—**Gyropus gracilis,** Nitzsch. Syn., *Pediculus porcelli*, Schrank. A louse of the guinea-pig (*Cavia cobaya*, Shreber).—**Gyropus ovalis,** Nitzsch. A minute louse of the guinea-pig. Cf. *Menopon extraneum*, Piaget.—**Habronema muscæ,** Carter. This is found in the head and proboscis of the house-fly.—**Hæmadipsa ceylonica,** Moquin-Tandon. Syn., *Hirudo* (*Sanguisuga*) *tagalla*, Meyen. *Hirudo ceylonica*, Moquin-Tandon, *Zeylon'scher Blutegel*, *The Ceylon Leech*. A terrestrial leech; according to Hofmeister and Tennant, the most detested of all the plagues which beset the traveler in Ceylon.—**Hæmamœba præcox; Hæmamœba vivax; Hæmamœba malariæ; Hæmamœba immaculata,** Grassi and Filetti. See *Polimitus malariæ*, Danilewsky.—**Hæmaphysalis rosea,** Koch. See *Boöphilus bovis* (Riley), Curtis.—**Hæmatobia ferox** Davaine; **Hæmatobia irritans,** Meigen; **Hæmatobia serrata,** Davaine. — **Hæmatobia malariæ,** Celli and Guarneri. See *Polimitus malariæ*, (Laveran), Danilewsky.—**Hæmatobia stimulans,** Meigen. A group of flies recorded by Neumann as troublesome to man, and cattle in pastures. The saw-hematobia (*Hæmatobia serrata*, Davaine) is particularly spoken of as bloodthirsty, and common in Europe and America. The parasitescollect in swarms at the base of the horns, or on the abdomen, back, flanks or upper parts of the legs. The eggs are deposited in the fresh dung, and they may be destroyed by throwing lime over the dung lying in pastures.—**Hæmatomonas evansi.** See *Trypanosoma evansi* (Evans), Balbiani.—**Hæmatomonas malariæ,** Osler.—**Hæmatophyllum malariæ,** Metschnikoff (1887). See *Polimitus malariæ*, Danilewsky (1886).—**Hæmatopinus acanthopus,** Denny, Piaget. Syn., *Hæmatopinus serratus*, Nitzsch, Burmeister, Denny. The louse of the mouse (*Mus musculus*, Linné).—**Hæmatopinus asini,** Linné. See *Hæmatopinus macrocephalus*, Burmeister, var. *colorata*, Piaget.—**Hæmatopinus cameli,** Redi. The louse of the camel; it resembles that of the hog (*Hæmatopinus urius*, Nitzsch).—**Hæmotopinus eurysternus,** Nitzsch, Burmeister. Syn., *Pediculus eurysternus*, Nitzsch; *Pediculus vituli*, Linné; *P. tenuirostris*, Burmeister; *Hæmatopinus oxyrhynchus*, Nitzsch; *H. tenuirostris*, Burmeister; *H. vituli*, Stephens; *Gros pou du boeuf*. One of the lice found upon cattle.—**Hæmatopinus lyriocephalus,** Burmeister, Denny, Piaget. Syn., *Pediculus lyriocephalus*, Burmeister. The louse of the hare (*Lepus timidus*, Linné).—**Hæmatopinus macrocephalus,** Burmeister. Syn., *The Horse-louse; Pediculus asini*, Linné; *Pediculus macrocephalus*, Burmeister; *Hæmatopinus asini*, Denny. One of the three lice of the horse.—**Hæmatopinus macrocephalus,** var. **colorata,** Piaget. The louse of the ass.—**Hæmatopinus oxyrhynchus,** Nitzsch. See *Hæmatopinus eurysternus*, Burmeister. —**Hæmatopinus piliferus,** Burmeister, Denny. Syn., *Pediculus piliferus*, Burmeister; *Pediculus canis familiaris*, Müller; *Pediculus bicolor*, Lucas; *Petit pou du chien; The dog-louse;* not common.—**Hæmatopinus serratus,** Nitzsch, Burmeister, Denny. See *Hæmatopinus acanthopus*, Denny.—**Hæmatopinus spinulosus,** Burmeister. Syn., *Pediculus spinulosus*, Burmeister; *P. denticulatus*, Nitzsch. The louse of the common rat (*Mus decumanus*, Pallas).—**Hæmatopinus stenopsis,** Burmeister. Syn., *The Goat-louse*. —**Hæmatopinus suis,** Leach. See *Hæmatopinus urius*, Nitzsch.—**Hæmatopinus tenuirostris,** Burmeister. See *Hæmatopinus eurysternus*, Nitzsch.—**Hæmatopinus tuberculatus,** Giebel. The louse of the Eastern buffalo.—**Hæmatopinus urius,** Nitzsch. Syn., *Pediculus suis*, Linné; *Hæmatopinus suis*, Leach. *The Hog-louse*, the largest of the pediculi, and occasionally found in great numbers on swine.—**Hæmatopinus ventricosis,** Denny. The louse of the rabbit (*Lepus cuniculus*, Linné.) — **Hæmatopinus vituli,** Stephens; See *Hæmatopinus eurysternus*, Nitzsch, Burmeister.—**Hæmatopota pluvialis,** Meigen. Syn., *Small Rain Breeze-fly; Petit taon pluvial*, Fr.; *Picolo Tafano pluviale*, It. *The Clegg* of the West Highlands of England and Scotland. This is said by Mégnin to be troublesome to man and animals during stormy weather, especially in Lapland, where the reindeer is tormented by it.—**Hæmatopota punctulata,** Macquart. A breeze-fly found in the Southern United States. — **Hæmatozoön lewisi,** Grassi. An embryonic nematode found by Gruby, Dellafond, Lewis, Manson, Sonsino, Grassi, etc., in the blood of the dog. The last claimed to have discovered the intermediate host in the cockroach (*Periplaneta orientalis*, Linné). Sonsino has found the same larvæ in the fleas of dogs (*Pulex serraticeps*, Gervais), and in their lice (*Hæmatopinus piliferus*, Burmeister). Grassi and Calanduccio have given the name *Filaria recondita* to the adult form, yet undiscovered, to which these embryo belong. — **Hæmatozoön sublatum,** Gurlt. See *Strongylus sublatus*, Cobbold.—**Hæmentaria costata,** Müller. A Crimean leech employed in medicine.—**Hæmentaria ghilianii,** de Filippi. A common leech in Brazil especially along the Amazon; it attacks man. **Hæmentaria mexicana,** de Filippi. Found in Mexico and Central and South America. Its bite produces an acute irritation. **Hæmentaria offi-**

cinalis, de Filippi. Found in the lagoons of Mexico; used medicinally.—**Hæmogregarina avium**, Danilewsky. See *Polimitus malariæ*, Danilewsky.—**Hæmopis sanguisorba**, Savigny; **Hæmopis sanguisuga**, Moquin-Tandon; **Hæmopis vorax**, Moquin-Tandon. See *Hirudo sanguisuga*, Bergmann.—**Hæmoplasmodium malariæ**, Marchiafava and Celli. A hemocytozoön found in the blood of malarial-fever patients. They are homogenous, protoplasmic bodies from one-tenth to one-third the size of red blood-corpuscles and within which they occur as pseudo-vacuoles and also to which they impart a lively movement by their protruded flagella (*pseudospirilla*). Danilewsky regards this as but a developmental stage of *Polimitus malariæ*, *q. v.*—**Halysis caprina**, Zeder (1803). See *Linguatula rhinaria*, Railliet (1868).—**Halysis gracilis**, Zeder. See *Tænia gracilis*, Rudolphi.—**Halysis infundibuliformis**, Zeder. See *Tænia infundibuliformis*, Goeze.—**Halysis lanceolata**, Zeder, Dujardin. See *Tænia lanceolata*, Bloch.—**Halysis lata**, Zeder. See *Bothriocephalus latus*, Bremser.—**Halysis lineata**, Zeder. See *Tænia lineata*, Goeze.—**Halysis litterata**, Zeder. See *Tænia pseudo-cucumerina*, Baillet.—**Halysis marginata**, Zeder. See *Tænia marginata*, Batsch.—**Halysis membranacea**, Zeder (1803). See *Bothriocephalus latus*, Bremser.—**Halysis passeris**, Zeder. See *Tænia fringillarum*, Rudolphi.—**Halysis perfoliata**, Zeder. See *Tænia perfoliata*, Goeze.—**Halysis plicata**, Zeder. See *Tænia plicata*, Rudolphi.—**Halysis pusilla**, Zeder. See *Tænia pusilla*, Goeze. **Halysis serrata**, Zeder. See *Tænia crassicollis*, Rudolphi, and *Tænia serrata*, Goeze.—**Halysis setigera**, Zeder. See *Tænia setigera*, Frölich.—**Halysis sinuosa**, Zeder. See *Tænia sinuosa*, Rudolphi.—**Halysis solium**, Zeder. See *Tænia solium*, Linné.—**Halysis torquata**, Zeder. See *Tænia sinuosa*, Rudolphi. **Halysis trilineata**, Zeder. See *Tænia trilineata*, Batsch.—**Hammularia lymphatica**, Treutler (1793). See *Filaria lymphatica*, Moquin-Tandon.—**Hammularia subcompressa**, Rudolphi. See *Filaria bronchialis*.—**Hanchoschim-Haschrofim**, Heb. See *Dracunculus medinensis*, Lister. **Harpirhynchus nidulans**, Mégnin. Syn., *Sarcoptes nidulans*, Nitzsch. The pubescent nymphæ have been found in the plumage of pigeons and parrots.—**Harvest-bug**. See *Tetranychus autumnalis*, Shaw.—**Harvest-mite**. See *Leptus irritans* and *Tetranychus autumnalis*, also *Trombidium americanum*.—**Harvest-tick**. See *Leptus irritans*.—**Hauswanze**. See *Cimex lectularia*, Merrett.—**Hautwurm**. See *Dracunculus medinensis*, Cobbold.—**Head-louse**. See *Pediculus capitis*, Leach.—**Heel-fly**. See *Hypoderma lineata*, Löw.—**Helminthopsylla alakurti**, Schimkewitsch. Syn., *Alakurt*. A flea, allied to the chigoe, abundant in Turkestan, upon horses, sheep, camels and oxen in the autumn and winter, causing extreme debility.—**Helophilus pendulus**, Meigen. A dipterous insect, the "rat-tailed" larvæ of which, according to Cobbold, not infrequently occurs in the digestive canal of the horse. Cf. *Eristalis tenax*, Linné.—**Hematopota**. See *Hæmatopota*.—**Hematozoaires du paludisme**, Laveran. See *Polimitus malariæ* (Laveran), Danilewsky.—**Hemistoma alatum** (Goeze), Diesing. A trematode common in the fox and wolf, and found in the small intestine of the dog by Creplin and Schöne.—**Hen-flea**. See *Pulex avium*, Taschenberg.—**Henlice**. See *Goniocotes abdominalis*, Piaget; *Goniocotes hologaster*, Nitzsch; *Goniodes dissimilis*, Nitzsch; *Goniodes burnetti*, Packard; *Lipeurus heterographus*, Nitzsch; *Lipeurus variabilis*, Nitzsch; *Menopon biseriatum*, Piaget; *Menopon pallidum*, Nitzsch.—**Herpetomonas lewisi**, Saville, Kent. See *Trypanosoma lewisi*, Danilewsky, Kent.—**Herpetomonas muscæ domesticæ**, Saville, Kent. Syn., *Monomita muscarum*, Grassi; *Cercomonas muscarum*, Leidy; *Bodo muscæ domesticæ*, Burnett. Often found in abundance in the chylific stomach of the house-fly.—**Heterakis columbæ**, Gmelin. See *Heterakis maculosa*, Rudolphi.—**Heterakis compressa**, Schneider. A nematode found in the intestine of the domestic fowl in South Australia.—**Heterakis differens**, Sonsino. This is found in the posterior portion of the fowl's intestine.—**Heterakis dispar**, Schrank. Syn., *Ascaris dispar*. This was found in the intestine and cecum of the domestic goose and duck by Fröhlich, Schrank, and Zeder.—**Heterakis inflexa**, Rudolphi. Syn., *Ascaris crassi*, Deslongchamps, *Ascaris teres*, Goeze; *Ascaris gallopavonis*, Gmelin; *Ascaris perspicillum*; Rudolphi, Dujardin; *Heterakis perspicillum*; *Fusaria reflexa*, Zeder. This is found in the intestine of the domestic fowl, turkey and duck, and is abundant in the latter about Caen.—**Heterakis lineata**, Schneider. This was found in the intestine of the domestic duck of Turkestan by von Linstow, and in a Brazilian cock by Schneider.—**Heterakis maculosa**, Rudolphi. Syn., *Ascaris maculosa*, Rudolphi, Bremser, Bellingham, Dujardin; *Ascaris columbæ*, Gmelin; *Ascaris teres*, Goeze; *Heterakis columbæ*, Gmelin; *l'ascaride del piccioni*, Ital. This is found in the intestine of the domestic pigeon, producing frequently a fatal disease. Unterberger has shown that the eggs of this nematode require to be kept for about seventeen days under suitable conditions outside the body of the host before they are capable of further development in the intestine.—**Heterakis papillosa**, Bloch. Syn., *Heterakis vesicularis*, Fröhlich, Dujardin; *Ascaris vesicularis*, Rudolphi; *Ascaris tetraonis*, Gmelin; *Ascaris papillosa*, Bloch; *Ascaris teres* (*minor Phasiani et picti*), Goeze; *Ascaris gallinarum*, Gmelin; *Ascaris urogalli*, Viborg, Rudolphi; *Fusaria tetraonis*, Zeder; *Fusaria papillosa*, Zeder. This is found in the cecum of the fowls, duck, peacock, and turkey.—**Heterakis perspicillum**, Rudolphi. See *Heterakis inflexa*, Rudolphi.—**Heterakis spumosa**, Schneider. This is found in the intestine and cecum of the brown rat (*Mus decumanus*, Pallas).—**Heterakis uncinata**, Rudolphi. This is found in the intestine and cecum of the domestic guinea-pig.—**Heterakis vesicularis**, Fröhlich. See *Heterakis papillosa*, Bloch.—**Heteromita lens**, Müller. Syn., *Monas lens*, Dujardin. Found in the mouth of man by Steinberg.—**Hexacotyle venarum**, de Blainville. See *Hexathyridium venarum*, Treutler.—**Hexamita duodenalis**, Davaine. See *Megastoma intestinale*, Blanchard.—**Hexastoma pinguicola**, Cuvier. See *Hexathyridium pinguicola*, Treutler.—**Hexastoma venarum**, Cuvier. See *Hexathyridium venarum*, Treutler.—**Hexathyridium pinguicola**, Treutler, Jördens, Brera. Syn., *Hexastoma pinguicola*, Cuvier; *Linguatula pinguicola*, Lamarck; *Polystomum pinguicola*, Zeder, Rudolphi, Bremser. A trematode found in the ovaries in women. Van Beneden and Gervais hold this as likely to prove a larval form of *Linguatula rhinaria*, Railliet, from which opinion Cobbold differs.—**Hexathyridium venarum**, Treutler, Jördens, Rudolphi. Syn., *Hexastoma venarum*, Cuvier; *Hexacotyle venarum*, de Blainville; *Linguatula venarum*, Lamarck; *Polystoma sanguicola*, Delle Chiaje, Frick; *Polystoma venarum*, Zeder, Rudolphi, Dujardin, Owen. This is found in the veins of man; Rudolphi and others referred this to the fresh-water *Planariæ*, and Davaine

ought it *Distoma lanceolatum*, Mehlis, or a young *...a hepatica*, Linné.—**Hippobdella sanguisuga,** Blainville. See *Hirudo sanguisuga*, Bergmann.—**Hippobosca canina**, Rondani. See *Hippobosca ...ina*, Linné.—**Hippobosca equina**, Linné. Syn., *...obosca canina*, *Hippobosca taurina*, Rondani: *Mouche araignée*, *Mouche plate*, *Horse-tick*, *Forest-fly*. an interesting remittent parasitic insect of the family *...pipara*, common in the summer on horses, sheep, ...ttle and dogs, especially about the perineal ...gion; it is very troublesome.—**Hippobosca ovina,** ...inné. See *Melophagus ovinus*, Latreille.—**Hippo...osca taurina,** Rondani. See *Hippobosca equina*, ...inné.—**Hirudine viva.** See *Hirudo medicinalis*, ...ay.—**Hirudo albopunctata,** Diesing. A leech ...mmon in Sweden.—**Hirudo ceylonica,** Moquin-...andon. See *Hæmadipsa ceylonica*, Moquin-Tan...on.—**Hirudo chinensis,** Schmarda. A small spe...es used by the Chinese.—**Hirudo decora.** A North ...merican leech used medicinally.—**Hirudo depressa ...isea margine laterali.** See *Aulostoma gulo*, Mo...uin-Tandon.—**Hirudo flava,** Brossat. See *Hirudo ...edicinalis*, Ray.—**Hirudo granulosa,** *Gekör...elter Blutegel.* A leech used in India, and in the ...le of Bourbon and the Mauritius.—**Hirudo grisea,** ...rossat. See *Hirudo medicinalis*, Ray.—**Hirudo inter...upta,** Moquin-Tandon. Syn., *Sanguisuga interrupta*, Moquin-Tandon; *The Dragon Leech*; *The African ...eech*, *Blutegel mit unterbrochenen Rückenstreifen*. ...species found in North Africa.—**Hirudo javanica,** ...Wahlberg. Syn., *Sanguisuga javanica*, Wahlberg. The Javanese leech.—**Hirudo medicinalis,** Ray (1710), Linné (1746). Syn., *Hirudo venæsector*, ...raun; *Hirudo flava*, Brossat; *Hirudo grisea*, Bros...t; *Hirudo officinalis*, Savigny; *Hirudo provin...alis*, Braun (1805); *Hirudo viridis*; *Iatrobdella ...edicinalis*, Blainville (1828); *The Gray Leech*; *The ...Green Leech*; *The Common Medicinal Leech*; *The ...Speckled Leech*; *Hirudine viva*; *Sangsue mèdicinale*; *...angsue grise*; *Sangsue verte*; *Deutscher Blutegel*; *...Der ungarische Blutegel.* A fresh-water species ...und throughout Europe and the North of Africa; ...he great color-variation of this species has given ...se to the differentiation of some sixty varieties ...nd a confused nomenclature. A large leech will ...ke about fifteen grams of blood, which requires ...everal months to digest.—**Hirudo mysomelas,** ...irey; *Senegal'scher*, *Blutegel.* Found in Sene...ambia and exported to France.—**Hirudo ob...cura.** Syn., *Sangsue noire.* A French species. —**Hirudo officinalis,** Savigny. See *Hirudo me...dicinalis*, Ray.—**Hirudo provincialis.** See *Hirudo ...edicinalis*, Ray.—**Hirudo quinquestriata,** Schmar...a. Syn., *Hirudo tristriata.* An Australian spe...ies largely exported to Europe.—**Hirudo san...uisorba,** Lamarck. See *Hirudo sanguisuga*, Berg...mann.—**Hirudo sanguisuga,** Bergmann (1757). ...yn., *Hirudo sanguisorba*, Lamarck (1818); *...æmopis sanguisorba*, Savigny (1820); *Hæmopis ...orax*, Moquin-Tandon (1826); *Hippobdella san...uisuga*, de Blainville (1827); *Hæmopis sanguisuga*, Moquin-Tandon (1846). *The True Horse-leech*; *...angsue de cheval*, Fr.; *Pferdeegel*, Ger. Found ...n Spain and Southern Europe generally, but par...icularly in the North of Africa, this worm being ...nadvertently swallowed in an immature condition ...n drinking-water, not infrequently attaches itself to ...he mucosa of the nose and pharynx of man, as ...ell as of animals. Strong solutions of salt cause ... to loosen its hold.—**Hirudo sinica,** de Blain...ille. A Chinese species.—**Hirudo tagalla.** See *...æmadipsa ceylonica*, Moquin-Tandon.—**Hirudo tesselata.** A species found in the United States; it is green with black dots.—**Hirudo tristriata,** Schmarda. See *Hirudo quinquestriata*, Schmarda. —**Hirudo troctina,** Johnson (1816). Syn., *Sanguisuga interrupta*, Moquin-Tandon (1826); *Iatrobdella medicinalis*, var. *tesselata*, de Blainville (1827); *Trout Leech*; *Dragon Leech*, *Sangsue dragon*, *Dragon d'Alger*, Fr. A native of the North of Africa, but long employed in hospitals throughout Southern Europe and England.—**Hirudo venæsector,** Braun. See *Hirudo medicinalis*, Ray.—**Hirudo verbana.** Syn., *Blutegel des Lago-Maggiore.* An Italian species.—**Hirudo viridis.** See *Hirudo medicinalis*, Ray.—**Hirudo wiffonia.** A Japanese variety, dried, powdered and administered internally to relieve pain.—**Hog-louse.** See *Hæmatopinus urius*, Nitzsch.—**Holophrya coli,** Leuckart (1863); See *Balantidium coli*, Stein (1862).—**Holostoma erraticum,** Rudolphi, Dujardin. This is found in the intestine of the domestic duck and the tame swan. The larva (*Tetracotyle filippi*) has been found in the viscera of several molluscs and fish, and also as a parasite in the sporocysts of several *Distomata.*—**Homalomyia canicularis,** Linné. Syn., *Anthomyia canicularis*, Meigen; *Kleinstubenfliege*; *Hundstagfliege.* This is common in Europe from spring throughout the summer, and feeds on decaying vegetable matter. The larvæ live in the earth.—**Homalomyia incisurata.** Syn., *Anthomyia incisurata.* The larvæ occur in the human intestine, according to Moniez.—**Homalomyia scalaris,** Fabricius. Syn. *Anthomyia scalaris*, Fabricius. This is common from spring throughout summer, especially under trees; the larvæ are found on decaying substances, and at times as pseudo-parasites in man, in the intestines nasal passages and ears. Judd (Amer. Nat., 1876, p. 374) reports a case of the intestinal discharge of fifty larvæ of this fly.—**Hornfly.** See *Hæmatobia serrata.*—**Horse-bee.** See *Gastrophilus equi*, Fabricius and *Gastrophilus pecorum*, Linné.—**Horse-fly.** See *Tabanus Sp.*—**Horse-leech.** See *Hirudo sanguisuga*, Bergmann.—**Horse-louse.** See *Hæmatopinus macrocephalus.*—**Horse-tick.** See *Hippobosca equina*, Linné.—**House-fly.** See *Musca domestica*, Linné.—**Hunde Haarling.** See *Trichodectus latus*, Nitzsch.—**Hundstagfliege.** See *Homalomyia canicularis*, Linné.—**Hydatigena granulosa,** Batsch. See *Echinococcus polymorphus.*—**Hydatis erratica,** Blumenbach. See *Echinococcus polymorphus.*—**Hydatis Lüdersen,** Rudolphi, Olfers, Bremser. See *Echinococcus polymorphus*, Diesing.—**Hydrotæa meteorica,** Davaine. Syn., *Anthomyia meteorica*, L. *Meteoric Fly*; *Storm-fly*; *Gewitterfliege.* This is so called because at the approach of rain it often forms a kind of cloud about horses' heads. It is common in Europe in summer in damp situations, as forests, its ordinary nourishment consisting of the sap of flowers. The females attack animals and although their soft proboscis cannot pierce the skin, and only allows them to suck up the humors from the surface, they harass and torment most stubbornly. They may produce inflammation of the eyes and ears of domestic animals. The larvæ are found in cow-dung and decaying vegetable matter.—

Larva of HOMALOMYIA CANICULARIS. (*Linné.*)

Hymenolepis flavopunctata, Weinland (1858). See *Tænia flavopunctata,* Weinland, (1858).—**Hymenolepis nana,** Leuckart, (1863). See *Tænia nana,* von Siebold (1853).—**Hypodectes columbæ,** Mégnin. See *Falciger rostratus,* Bucholz.—**Hypoderma bonassi,** Brauer. A grub recorded as being taken from the back of a buffalo in Colorado.—**Hypoderma bovis,** De Geer (Latreille, 1825). Syn., *Œstrus bovis* (1776), Fabricius, Herbst, Fischer, Clark, Latreille, Leach, Fallen, Macquart, Westwood, Sells, Saxisen, Walker; *Œstrus hominis,* Gmelin (1788); the *Ox-hypoderma, Grub-in-the-back, Warble-fly, Bot-fly of Cattle.* A cosmopolitan species, the adult fly having a life of about eight days, occurring during July and August, the larvæ living from ten to eleven months in the skin of the cattle and of man. These parasites cause great damage to hides, and the effect on the carcass is serious, producing what is known as "licked beef" or "butcher's jelly." Squeezing out the maggot is a sure method of getting rid of it, or the warble may be smeared with a thick grease that will choke up its breathing pores.—**Hypoderma diana,** Brauer (1858). Syn., *Œstrus hominis,* Völkel. The larvæ reported by Joseph Borthen, Völkel, etc., as parasites of the skin in man.—**Hypoderma equi,** Joly (1849). Syn., *Hypoderma silenus,* Brauer; *Hypoderma loisetti,* Joly (1846); *Œstrus cuticole,* Loiset; *Œdemagena equi,* Loiset (1844). The larvæ are found in the skin of the horse and ass throughout Europe and S. America.—**Hypoderma lineata** (Villers), Löw (1863). Syn., *Œstrus lineatus,* Villers (1789); *Œstrus hæmorrhoidalis,* var. β, Clark (1797); *Œstrus bovis,* var. β *vernalis,* Clark; *Œstrus lineatus,* Olivier (1811); *Œstrus ericetorum,* Leach (1811); *Hypoderma lineatum,* Brauer (1858); *the Heel-fly of Texas; Grub-in-the-back; Ox-warble.* These grubs cause effusion of serum in the connective tissue, giving an appearance in cattle and sheep called the "lick" by ranchmen. It is stated that the only adult warble-flies found in the United States belong to this species, which appears to be cosmopolitan.—**Hypoderma loiseti,** Joly. See *Hypoderma equi,* Joly.—**Hypoderma silenus,** Joly. See *Hypoderma equi,* Joly.—**Hypoderma tarandi,** Linné (1761). Syn., *Œstrus rangiferinus,* Linné (1736); *Œstrus tarandi,* Linné (1761); *Œdemagena tarandi,* Latreille (1816). Larvæ found in the skins of the reindeer; they resemble those of *Hypoderma bovis,* De Geer, but are smaller.—**Hystrichis rachycephalus,** Molin. This was found in the walls of the crop of the tame swan.—**Hystrichis tricolor,** Dujardin. Found in the crop of the domestic duck.—**Hystrichis tubifex,** Diesing. Found in the esophagus of the domestic duck.—**Iatrobdella medicinalis,** Blainville. See *Hirudo medicinalis,* Ray.—**Iatrobdella medicinalis, var. tessellata,** de Blainville. See *Hirudo troctina,* Johnson.—**Isotricha intestinalis,** Stein. A free-swimming infusorian, with long, dense ciliary clothing, found in the rumen of sheep and cattle.—**Isotricha prostoma,** Stein, has the same habitat as the preceding.—**Ixodes ægyptius,** Audouin (1812). Syn., *Ixodes savignyi,* P. Gervais; *Acarus ægyptius,* Linné; *Cynorhæstes ægyptius,* Hermann; *Egyptian Ixode.* The largest known ixode, very common upon cattle in Africa and upon African cattle in European markets.—**Ixodes algeriensis,** Mégnin. This is found upon African cattle. Neumann regards this as closely related to the form known in the Guadeloupe as *Tique sénégalaise,* where it produces farcy on horses, cattle, and mules.—**Ixodes americanus,** Linné. See *Argas americanus,* De Geer.—**Ixodes annulatus,** Say. See *Boöphilus bovis,* Curtice.—**Ixodes autumnalis,** Leach. Syn. *The Autumn Ixode.* A species cited by Neumann as found in France.—**Ixodes bovis,** Riley. See *Boöphilus bovis,* Curtice.—**Ixodes brevipes,** Murray. A species found in Ceylon.—**Ixodes camelinus** Fischer. Found on camels on the Steppes of Asia.—**Ixodes carapatos,** a tick troublesome in Brazil.—**Ixodes chelifer,** Mégnin. This is found on dogs.—**Ixodes distipes,** Murray. Found in Tunis.—**Ixodes dugesi,** Gervais (Mégnin). See *Boöphilus bovis* Curtice.—**Ixodes erinaceus,** Audouin. This is a common species in Britain, attacking dogs, cattle, foxes, hedgehogs, etc. It is generally known as the dog-tick and mistaken for *Ixodes ricinus, Ixodes indentatus* Gamgee.—**Ixodes fabricii** (Audouin). An acarine parasite found in Southern Europe on cattle and sheep.—**Ixodes fodiens,** Mégnin. Syn., *Ixodes putularum,* Mégnin, Lucas. Found on horses.—**Ixodes marginatus,** Leach. Syn., *Ixodes testudinarius,* Murray. A British species troublesome to laborers in hay fields.—**Ixodes marmoratus,** Risso. Found on sheep in France.—**Ixodes megathyreus,** Leach. Found on sheep and cattle in Southern Europe.—**Ixodes mombata,** a troublesome tick in Angola.—**Ixodes pustularum,** Mégnin. See *Ixodes fodiens,* Mégnin.—**Ixodes reduvius,** de Geer. This is common in Southern Europe, attacking sheep, cattle, dogs, hares, and man. See *Boöphilus bovis,* Curtis.—**Ixodes ricinus,** Linné. Syn., *Acarus ricinus* (1790); *Acarus ricinoide,* De Geer; *Cynorhæstes ricinus,* Hermann (1808); *Ricinus caninus,* Ray; *Tique des chiens* Geoffroy; *Common Tick, Dog-tick.* This is frequently found on hunting-dogs, and is the oldest known species.—**Ixodes rotundatus,** Koch. A South American species.—**Ixodes rugica.** A species found in Surinam and Brazil.—**Ixodes savignyi,** Gervais. See *Ixodes ægyptius,* Audouin.—**Ixodes scapulatus** Mégnin. A species found on cattle in the South of France.—**Ixodes, Sp.** (Stiles). Found on cattle in California.—**Ixodes testudinarius,** Murray. See *Ixodes marginatus,* Leach.—**Ixodes trabeatus** Audouin. A French species.—**Jigger.** See *Sarcopsylla penetrans,* Westwood.—**Kariophagus hominis,** Podwyssozki. Coccidia observed frequently in the white of fowls' eggs and in the hepatic cells of man.—**Kegelwurm.** See *Ascaris conosoma,* Jördens (1802).—**Kender Perser.** See *Argas tholozani,* Laboulbène & Mégnin.—**Kleiderlaus.** See *Pediculus capitis,* Leach.—**Kleine Stubenfliege.** See *Homalomyia canicularis,* Linné.—**Kolumbaczer Mücke.** See *Simulium columbacschensis,* Fabricius.—**Kopflaus.** See *Pediculus capitis,* Leach.—**Kriebelmücke.** See *Simulium reptans,* Linné.—**Kritoptes monunguiculosus,** Geber. See *Tarsonemus monunguiculosus,* R. Blanchard.—**Lamblia intestinalis,** Blanchard. See *Megastoma intestinale,* R. Blanchard (1885).—**Laminosioptes gallinarum,** Mégnin. See *Symplecoptes cysticola,* Railliet.—**Laveranie malariæ,** Grassi and Feletti. See *Polimitus malariæ* (Laveran), Danilewsky.—**Leg-sticker.** See *Stomoxys calcitrans,* Geoffroy.—**Leptodera intestinalis,** Cobbold. See *Rhabdonema intestinale,* R. Blanchard.—**Leptodera niellyi,** Blanchard & Moniez. See *Rhabditis niellyi,* R. Blanchard.—**Leptodera stercoralis,** Cobbold. See *Rhabdonema intestinale,* R. Blanchard.—**Leptodera teres,** Schneider. See *Rhabditis terricola,* Oerley.—**Leptus autumnalis.** The larval hexapod of *Tetranychus autumnalis,* Shaw, *q. v.*—**Leptus irritans.** The six-legged stage of a mite, the *Tetranychus tlalsahuate,* Lemaire, Murray (1876), *q. v.,* (Guiana, Antilles, Honduras); *Colorado,* (Cuba);

(New Grenada); *Moqui* (Para); *Tlalsahuate?* (Mexico). See *Tetranychus* and *Tlalsahuate*, Lemaire. *Red Harvest-mite.* A widely-dispersed pest, abundant in the Mississippi valley, where it is known as the chigger, being confused in the popular mind with the sandflea or chigoe (*Sarcopsylla penetrans*, Westwood), which it resembles in its burrowing habits and serious effects.—**Leucophrys coli,** Stein (1860). See *Balantidium coli*, Stein (1862).—**Ligula mansonii,** Cobbold (1883). See *Bothriocephalus mansoni*, R. Blanchard (1886).—**Linguatula constricta,** Küchenmeister, R. Blanchard (1888). Syn., *Pentastoma constricta*, von Siebold (1852); *Nematoideum hominis*, Pruner, Diesing. This is only known in the larval condition. It is found in negroes and in the giraffe. —**Linguatula constricta,** Pruner; **Linguatula denticulata,** Lamarck (1816); **Linguatula ferox,** Küchenmeister (1855); **Linguatula lanceolata,** de Blainville (1818). See *Linguatula rhinaria* (1866).—**Linguatula pinguicola,** Lamarck. See *Hexathyridium pinguicola*, Treutler.—**Linguatula rhinaria,** Railliet (1886). Syn., *Tænia lanceolé ou ver rhinaire*, Chabert (1787); *Tænia caprina*, Abildgaard (1789); *Tænia rhinaria*, Pilger (1802); *Halysis caprina*, Zeder (1803); *Polystoma serrata*, Zeder; *Polystoma tænioide*, Rudolphi (1810); *Echinorhynchus capræ*, Braun (1810); *Polystoma denticulatum*, Rudolphi (1810); *Tetragulus caviæ*, Bosc (1810); *Linguatula tænioides*, Lamarck (1816); *Linguatula denticulata* Lamarck (1816); *Prionoderma lanceolatum*, Cuvier (1817); *Prionoderma rhinarium* Rudolphi; *Linguatula lanceolata*, de Blainville (1818); *Pentastoma emarginatum*, Rudolphi (1819); *Pentastoma tænoides*, Rudolphi; *Pentastoma fera*, Creplin (1829); *Linguatula ferox*, Küchenmeister (1855); *Monostoma settenii*, Neumann; *Linguatula constricta*, Pruner; *Linguatula serrata*, Fröhlich (1789); *Gemeiner Zungenwurm*, Ger. An endoparasitic acaridan with elongate, vermiform body, which led to its being classed as a worm. The sexually-mature form inhabits the nasal cavities of dogs and other domestic animals, where the eggs are deposited. These become scattered on the grass and are eaten by herbivorous animals. The larval and encysted stages are found in the mesenteric glands, liver and lungs of the goat, ox, horse, camel, sheep, deer, antelope, peccary, porcupine, rabbit, guinea-pig, brown rat, sometimes in man and according to Creplin in the domestic cat.—**Linguatula serrata,** Fröhlich (1789); **Linguatula tænioides,** Lamarck (1816). See *Linguatula rhinaria*, Railliet (1886).—**Linguatula venarum,** Lamarck. See *Hexathyridium venarum*, Treutler.—**Liotheum giganteum,** Denny, Verrill. See *Menopon latum*, Piaget.—**Liotheum pallidum,** Nitzsch, Verrill. See *Menopon pallidum*, Nitzsch.—**Liotheum stramineum,** Nitzsch. See *Menopon biseriatum*, Piaget.—**Lipeurus anseris,** Gurlt. A louse of the goose.—**Lipeurus baculus,** Nitzsch. Syn., *Phiopterus baculus* (Nitzsch), Verrill; *Pulex columbæ majoris*, Redi; *Pediculus columbæ*, Linné; *Nirmus filiformis*, Olfers, a common louse of the pigeon found together with *Nirmus claviformis* and *Goniocotes compar.*—

Larva of LINGUATULA RHINARIA, Railliet: from the liver of man. (*After Leuckart.*)

Lipeurus cygni, Giebel. See *Ornithobius bucephalus*, Giebel.—**Lipeurus heterographus,** Nitzsch. Syn., *Philopterus heterographus*, (N) Verrill. A louse found on fowls.—**Lipeurus jejunus,** Nitzsch. Syn., *Pulex anseris*, Redi; *Pediculus anatis anseris* Linné; *Nirmus crassicornis*, Olfers; *Lipeurus jejunus*, Rudow. A louse of the goose.—**Lipeurus numidæ,** Denny. Syn., *Nirmus numidæ*, Denny. A louse of the guinea-fowl.—**Lipeurus polytrapezius,** Nitzsch. Syn., *Pediculus meliagrides*, Linné; *Philopterus polytrapezius*, Nitzsch, Verrill. The louse of the turkey. —**Lipeurus squalidus,** Nitzsch. Syn., *Philopterus squalidus* (Nitzsch), Verrill; *Pediculus anatis*, Fabricius. A very common louse of the duck.—**Lipeurus variabilis,** Nitzsch. Syn., *Philopterus variabilis* (Nitzsch), Verrill; *Pediculus caponis*, Linné. A louse of the fowl.—**Listrophorus gibbus,** Pagenstecher; *Le Listrophore bossu.* An acaridan found on domestic rabbits and hares.—**Listrophorus mustelæ,** Mégnin. An acaridan parasite of the ferret and pole-cat.—**Liver-fluke.** See *Fasciola hepatica*, Linné.—**L'Œstre du fondement des chevaux,** Geoffroy. See *Gastrophilus hæmorrhoidalis*, Linné.—**Lone-star Tick.** See *Argas americanus*, De Geer.—**Long-nosed Louse.** See *Hæmatopinus vituli.*—**Lucilia anthropophagi,** Conil. See *Lucilia macellaria*, Fabricius.—**Lucilia cæsar,** Robineau-Desvoidy. Syn., *Musca cæsar*, Linné; *Goldfliege.* A fly that commonly deposits its eggs on decomposing organic matter, especially meat, but also in the wounds of man and animals.—**Lucilia ferinata,** Gerlach. Syn., *Lucilia serinata* (Perroncito), Gerlach. A species troublesome to sheep in Olanda, the larvæ producing ulceration of the perineal regions. —**Lucilia hominivorax,** Coquerel. See *Lucilia macellaria*, Robineau-Desvoidy. —**Lucilia macellaria,** Robineau-Desvoidy (1830). Syn., *Musca macellaria*, Fabricius (1794); *Lucilia hominivorax*, Coquerel (1858); *Calliphora infesta*, Philippi (1861); *Calliphora macellaria*, Jorge (1878); *Musca anthropophaga; Compsomyia rubrifrons*, Macquart; *Compsomyia macellaria; Somomyia montevidensis*, Bigot; *Calliphora anthropophaga*, Conil (1878); *Lucilia anthropophaga*, Conil; *Macellaria hominivorax*, Macquart; *La Lucilie bouchère; Texas Screw-worm; Screw-worms.* This fly is widely distributed over America from Canada to the Argentina. It deposits its eggs in the wounds of domestic animals and man, and also in the natural cavities. These larvæ cause serious symptoms. It is said that in Paraguay foals die in great numbers from the effects of larvæ that hatch from eggs deposited upon the navel before it has dried up. The prompt application of a mixture of pine-tar and grease to all raw surfaces, and about the ears, eyes, and nostrils of animals is recommended. Men should avoid sleeping in the open air unprotected by some netting. The myiosis produced is known as *Peenash.*—**Lucilia sericata,** Meigen. A fly common in Holland where the larvæ produce a form of myiosis called worm-sickness (worm-ziekte) in young sheep.—**Lucilia serinata,** Gerlach. See *Lucilia ferinata*, Gerlach.—**Lucilie bouchère.** See *Lucilia macellaria*, Robineau-Desvoidy.—**Lumbricus canis,** Werner (1782). See *Ascaris mystax*, Rudolphi (1801).—**Lumbricus guloris sibirici,** Pallas. See *Eustrongylus gigas*, Diesing.—**Lumbricus in renibus,** Blasius. —**Lumbricus latus,** Plinius; **Lumbricus martis et canis renalis,** Redi. See *Tænia solium*, Linné.—**Lumbricus longus et rotundus,** Serapion. See *Ascaris lumbricoides*, Linné (1758).—**Lumbricus rotundus,** Cælius Aurelianus. See *Ascaris lumbricoides*, Linné (1758).—**Lumbricus sanguineus in rene canis,** Hartmann. See *Eustrongylus gigas*, Diesing.

—**Macaw Fly, Macaco Worm, Macaw Worm.** See *Dermatobia noxialis*, Goudet.—**Macellaria hominivorax**, Macquart. See *Lucilia macellaria*, Robineau-Desvoidy.—**Macrogaster platypus**, Miescher. See *Demodex folliculorum*, Owen.—**Madenwurm.** See *Oxyuris vermicularis*, Bremser.—**Mange-mites.** See under genera *Chorioptes*, *Demodex*, *Psoroptes*, *Sarcoptes*, *Symbiotes*.—**Mastdarmbremse**, Ger. See *Gastrophilus hæmorrhoidalis*, Linné.—**Massuri.** See *Amphistoma collinsii*, Cobbold.—**Mastigodes hominis**, Zeder (1803); **Mastigodes siminæ**, Zeder (1803); See *Trichocephalus hominis*, Schrank (1788).—**Maw-worm.** See *Oxyuris vermicularis*, Bremser, and *Ascaris lumbricoides*, Linné.—**Meal-beetle, Meal-worm.** See *Tenebrio molitor*, Linné.—**Medicinal Leech.** See *Hirudo medicinalis*, Ray.—**Medicinischer Blutegel.** See *Hirudo medicinalis*, Ray.—**Medina-worm; Medinawurm**, Ger.; **Medinenischer Fadenwurm.** See *Dracunculus medinensis*, Cobbold.—**Megastoma entericum**, Grassi (1882). See *Megastoma intestinale*, Blanchard.—**Megastoma intestinale**, R. Blanchard (1885). Syn., *Cercomonas intestinalis*, Lambl 1859 (nec 1875); *Lamblia intestinalis*, Blanchard; *Hexamita duodenalis*, Davaine; *Dimorphus muris*, Grassi (1879); *Megastoma entericum*, Grassi (1882). This infusorian is found abundantly in the duodenum and jejunum of rats and mice of various species, especially in old individuals. It is frequently transmitted to man by the excrement of rats or mice becoming mixed with food-stuffs.—**Megninia asternalis**, Mégnin. Syn., *Federmilbe der Tauben*, Zürn. An acaridan found on domestic fowls.—**Megninia cubitalis**, Mégnin. Found on the quill-feathers of fowls.—**Megninia ginglymura**, Mégnin. Found on the turkey.—**Megninia velata**, Mégnin. Found on the domestic duck.—**Mehlkäfer.** See *Tenebrio molitor*, Linné.—**Meloe proscarabeus**, Linné. Syn., *Gemeiner Oelkäfer*. A beetle the larva of which is reported as a facultative human parasite by Germar and Otto.—**Melontho sp.** A beetle, the larva of which is reported as a facultative parasite of man by Le Maout, Depalse, and Robineau-Desvoidy. — **Melophagus ovinus**, Latreille. Syn., *Hippobosca ovina*, Linné. The Sheep-tick (a misleading name), a wingless fly, spending its entire life on the sheep and multiplying in its fleece. **Menopon biseriatum**, Piaget. Syn., *Liotheum* or *Menopon stramineum*, Nitzsch, Verrill. A louse of domestic fowls and turkeys.—**Menopon extraneum**, Piaget. A louse found on the guinea-pig.—**Menopon giganteum**, Denny. See *Menopon latum*, Piaget.—**Menopon latum**, Piaget. Syn. *Menopon giganteum*, Denny; *Liotheum giganteum*, Verrill.—An ectoparasite of the pigeon.—**Menopon numidæ**, Giebel. An ectoparasite of the guinea-fowl (*Numida meleagris*, Linné).—**Menopon olescuram**, Piaget. Found upon the domestic duck.—**Menopon pallidum**, Nitzsch. Syn., *Liotheum pallidum*, Nitzsch, Verrill; *Pulex capi*, Redi; *Nirmus trigonocephalus*, Olfers; *Pediculus gallinæ*, Schrank, Linné. One of the lice infesting domestic fowls.—**Menopon phæostomum**, Nitzsch. The Black-mouthed Menopon; one of the lice found upon peacocks.—**Menopon stramineum**, Nitzsch. See *Menopon biseriatum*, Nitzsch.—**Menschenfloh.** See *Pulex irritans*, Linné.—**Mermis albicans**, von Siebold (1857). Found in the honey-bee (*Apis mellifica*, Linné) and in many other insects. Hess (1887) describes a species of *Gordius* as parasitic in the bee.—**Mermis blattæ orientalis**, Diesing. This is found in the abdomen of the cockroach (*Periplaneta orientalis*, Linné). **Mesocestoides litteratus**, Vaillant. See *Tænia litterati*, Batsch.—**Mesogonimus commutatus**, Sonsino. Syn., *Distoma commutatum*, Diesing. A trematode found in the intestine of the common fowl and turkey.—**Mesogonimus pellucidus**, Neumann. Syn., *Distoma pellucidum*, von Linstow. A trematode found in the esophagus of the domestic fowl.—**Metastrongylus longevaginatus**, Molin (1861); See *Strongylus longevaginatus*, Diesing (1851).—**Meteoric Fly.** See *Hydrotæa meteorica*, Davaine.—**Miana Bug; Mianawanze**, Ger. See *Argas persicus*, Fischer.—**Microsporidia.** Syn., *Microbe de la pébrine; Bacterium ovatum*, Lebert; *Bacillus pasteurianus*, Hansen; *Micrococcus ovatus; M. pasteurianus*, *Nosema bombycis*, Nägeli; *Panhystophyton ovatus*, Lebert; *Pleospora herbarum; Cornalia's Corpuscles; Cornalian Bodies; Corpuscles de Cornalia; Cornalia'sche Körperchen*, *Corpuscles des vers à Soie; Corpuscles piriformes*, *Granulins*, Pasteur; *Psorospermies des Insects* (Balbiani); *Micrococcus of pébrine*, *Micrococcus der Fleckenkrankheit.* A group of Psorosperms or Sporozoans first discovered by Leydig (1853) in an hemipterous insect (*Coccus hesperidum*, Linné, the scale-louse of the orange and oleander). They were afterwards found in various arthropods, spiders, bees, crustacea (*Daphnia rectirostris*). Munk found them in *Ascaris mystax* (Bischoff mistaking them for seminal corpuscles). Vlacovitch found them in the reptile (*Coluber carbonarius*) and the cricket (*Grillus campestris*), and Lebert and Frey in a beetle (*Emus oleus*). Cornalia, Filippi, Ciccone, Vittdini, Pasteur, etc., found them in the silkworms suffering from pébrine; here they were at first held to be the nucleoli of broken-down blood-corpuscles (Charannes), or hæmatozoa (Guérin-Meneville). While Nägeli believed them to belong to the *Schizomycetes*, and Lebert to the unicellular algæ, Hallier designated them as the stylospores of a mushroom (*Pleospora herbarum*). Pasteur finally adopted the idea that they belonged to the so-called "*organites.*" Balbiani was the first to prove the truth of Leydig's supposition and to settle their sporozoan nature. The Microsporidia have within recent years been found in many insects (*Bombyx mori*, *Satturnia pernyi*, *Bombyx neustria*, *Liparis chrysorrhæa*, *Tenebrio molitor*), the larvæ of flies, of ants, etc., etc.—**Miescheria muris**, R. Blanchard (1885). Utriculiform psorosperms found in the voluntary muscles of mice by F. Miescher, of Basle, in 1843. The involuntary muscles remained free from the parasites.—**Miescher's**, or **Miescherian Sacs, Tubes**, or **Utricles; Miescher'sche Schläuche.** See *Sarcocystis miescheri*, Ray Lankester.—**Monas anatis**, Davaine. See *Monocercomonas anatis*, Davaine.—**Monas canis**, Davaine. See *Monocercomonas canis*, Davaine.—**Monas caviæ**, Davaine. See *Monocercomonas caviæ*, Davaine.—**Monas crepusculum**, Ehrenberg, Müller. A doubtful species observed in the white substance between the teeth by Steinberg—**Monas elongata**, Dujardin; **Monas globulus**, Dujardin. Found by Steinberg in the human mouth.—**Monas lens.** See *Heteromyia lens*, Müller.—**Moniezia alba** (Perroncito, 1879), R. Blanchard (1891). Syn., *Tænia alba*, Perroncito (1879); *Moniezia alba*, var. *dubia Moniez*, 1891. A parasite of sheep and cattle.—**Moniezia benedeni** (Moniez, 1879), R. Blanchard (1891). Syn., *Tænia benedeni*, Moniez, 1879; *Tænia denticulata*, Neumann, 1892. This is found in the intestines of domestic sheep and cattle.—**Moniezia denticulata** (Rudolphi, 1810), R. Blanchard (1891). Syn., *Tænia denticulata*, Rudolphi, 1810; *Tænia denticolata*, Perroncito (1882); *Alyselminthus denticulatus*, Blainville (1853). A parasite of domestic cattle. **Moniezia expansa** (Ru-

dolphi, 1810), R. Blanchard (1891). Syn., *Tænia vasis nutritiis distinctis*, Bloch (1782); *Tænia ovina*, Goeze (1782), Batsch (1786), Schrank (1788), Gmelin (1789); *Halysis ovina*, Zeder (1803); *Tænia denticulata*, Mayer; *Alyselminthus expansus*, Blainville; *Tænia expansa*, ex parte Rudolphi, Raillet, Neumann, Perroncito, Curtice. This cestode has for its host, sheep, goats, cattle, and various wild ruminants.—**Moniezia fimbriata**, Moniez (1891). See *Thysanosoma actinioides*, Diesing (1834).—**Moniezia goezei** (Baird, 1853), R. Blanchard (1891). See *Tænia pectinata*, Goeze (1782).—**Moniezia leuckarti**, Riehm (1881), R. Blanchard, (1891). See *Tænia pectinata*, Goeze (1782).—**Moniezia neumanni**, Moniez (1891). The domestic sheep harbors this platode.—**Moniezia nullicollis**, Moniez (1891). Found in sheep in France.—**Moniezia ovilla**, Moniez (1891). **Moniezia ovilla, var. macilenta**, Moniez (1891). See *Thysanosoma giardi* (Rivolta, 1878), Stiles (1803).—**Moniezia pectinata**, R. Blanchard (1891). See *Tænia pectinata*, Goeze (1782).—**Moniezia planissima**, Stiles and Hassall (1892). Syn., *Tænia expansa*, ex parte Rudolphi. This is found in the small intestine of domestic sheep and cattle.—**Moniezia trigonophora**, Stiles and Hassall (1893). Syn., *Tænia expansa*, Curtice, ex parte McMurrich, *Tænia benedeni*, Neumann. A species recently described as a parasite of sheep.—**Monocercomonas anatis**, Davaine. Syn., *Monas anatis*, Davaine. A flagellate infusorian found in the cecum of the duck.—**Monocercomonas canis**, Davaine. Syn., *Monas canis*, Davaine. This is found in the stomach and duodenum of the dog.—**Monocercomonas caviæ**, Davaine. Syn., *Monas caviæ*, Davaine. A flagellate infusorian found in the large intestine of the guinea pig. It is perhaps identical with the form described by Künstler as *Bacterioidomonas sporifera*, and those by Perroncito as *Cercomonas ovalis, pisiformis, globosus*.—**Monocercomonas gallinæ**, Rivolta. This is found in cases of croupous angina in pullets and young pigeons. — **Monocercomonas hepatica**, Rivolta. This was found in the diseased liver of a young pigeon.—**Monocercomonas hominis**, Grassi (1883). See *Cercomonas intestinalis*, Lambl.—**Monodontus wedli**, Molin. See *Uncinaria cernua*, Creplin.—**Monomita muscarum**, Grassi. See *Herpetomonas muscæ domesticæ*, Saville Kent.—**Monostoma attenuatum**, Rudolphi. This was found by Creplin in the intestine and cecum of the domestic goose.—**Monostoma bijuge**, Miescher. See *Monostoma faba*, Bremser.—**Monostoma caryophyllinum**, Rudolphi. This is parasitic in the intestine of the stickle-back, but was found by Gwilt in the intestine of the domestic duck.—**Monostoma faba**, Bremser. Syn., *M. bijuge*, Miescher. Found in tubercles in the skin of the domestic sparrow and of canary birds (*Fringilla canaria*, Linné).—**Monostoma lente**, Nordmann, Gescheidt, Diesing, etc. See *Distoma lanceolatum*, Mehlis.—**Monostoma lepore**, Kuhn. See *Cysticercus tæniæ serratæ*, Zeder, Goeze. — **Monostoma mutabile**, Zeder. Found in the infraorbital space of the domestic goose.—**Monostoma setteni**, Neumann. See *Linguatula rhinaria*, Railliet.—**Monostoma verrucosum**, Fröhlich. Syn., *Notocotyle triserialis*, Diesing. Found in the large intestine and ceca of the goose, duck, and fowl. — **Mordella sp.** A beetle, the larvæ reported as a facultative parasite of man by Rosen.—**Morpion.** See *Phthirius inguinalis*, Leach.—**Mouche araignée.** See *Hippobosca equina*, Linné.—**Mouche bleue de la viande.** See *Calliphora vomitoria*, Robineau-Desvoidy.—**Mouche carnassiere.** See *Sarcophaga carnaria*, Meigen.—**Mouche des chevaux**, Réaumur. See *Gastrophilus nasalis*, Linné.—**Mouche domestique.** See *Musca domestica*, Linné.—**Mouche ou ver du nez des moutons**, Réaumur. See *Œstrus ovis*, Linné.—**Mouche plate.** See *Hippobosca equina*, Linné.—**Mouqui.** The native name in Para for *Leptus irritans, q. v.*—**Mouse-flea.** See *Pulex musculi*, Mégnin.—**Moyoquil.** See *Dermatobia noxialis*, Goudot, Müller. See *Tenebrio molitor*, Linné.—**Musca anthropophaga.** See *Lucilia macellaria*, Robineau-Desvoidy.—**Musca bovina**, Davaine. A torment to cattle.—**Musca cadaverina**, Linné. Syn., *Pyrellia cadaverina*, Robineau-Desvoidy. *Aasfliege.* A carrion fly, sometimes depositing its eggs in the open wounds of cattle.—**Musca carnaria**, Linné. Syn., *Fleischfliege.* A carrion fly, the larva of which was found by Bretschneider in the human intestine; it is described by Jördens and others as *Ascaris stephanostoma*. Roulin, Cloquet, Brera, Wahlborn, Cheyne, and Bateman report cases of myiosis from its larva.—**Musca carnifex**, Davaine. *The executioner fly.* Torments cattle.—**Musca cibaria.** Two cases are reported by Good and White (England).—**Musca corvina**, Fabricius. This is common in Europe in warm, wet weather, and is troublesome to cattle, on which it alights to suck the sweat; it does not bite.—**Musca domestica**, Linné. *House fly, Domestic fly, Mouche domestique, Stubenfliege.* Dubinsky and Senator report cases of the larvæ of the house fly being vomited. It is troublesome to man and animals, sucking their excretions. The *Ascaris conosoma* of Jördens and others is but the larva of this fly. **Musca hortorum**, Meigen. Troublesome to domestic animals.—**Musca larvarum**, one case reported by Pickells (Ireland).—**Musca macellaria**, Fabricius. See *Lucilia macellaria*, Robineau-Desvoidy.—**Musca nigra**, one case of myiosis attributed to this fly reported by Wahlborn (Sweden).—**Musca sp.** Syn., *Warega fly.* This is found in Brazil, and deposits its eggs beneath the skin of man and animals, causing painful swellings.—**Musca sp.** The larva of an unidentified fly, removed by Dr. Kirk from the leg of David Livingston in Africa, also from the shoulder of a negro. The adult fly is said to be not unlike but smaller than our blue-bottle fly (*Calliphora vomitoria*, Robineau-Desvoidy).— **Musca stabulans**, Fallen. See *Cyrtoneura stabulans*, Macquart.—**Musca vaccina**, Davaine. Troublesome to cattle.—**Musca vagatoria**, Davaine. The vagabond fly, troublesome to domestic cattle.—**Musca vitripennis**, Meigen. A torment to cattle.—**Musca vomitoria.** See *Calliphora vomitoria*, Robineau-Desvoidy. — **Mydæa vomiturationis**, Robineau-Desvoidy. See *Teichomyza fusca*, Macquart.—**Myotrichodina.** See *Trichina spiralis*, Owen.— **Myzomimus scutatus**, Stiles. Syn., *Spiroptera scutata*, Müller. *Filaria scutata œsophagea bovis*, Müller. Found in the walls of the esophagus of domestic cattle and horses and in the pharynx and tongue of the domestic hog and sheep; it probably belongs to the genus *Gongleonema*, Molin (1857).— **Narambo, Narapoo chalondy**, Hind.; **Naru**, Pers. See *Dracunculus medinensis*, Cobbold.— **Nematoideum bovis tauri**, Diesing. Found in the aqueous humor of the eye in domestic cattle.—**Nematoideum canis familiaris**, Warren. Found in the esophagus of the dog.—**Nematoideum equi caballi**, Peschel, Diesing. See *Sclerostoma tetracanthum*, Diesing.—**Nematoideum fringillæ domesticæ**, Rudolphi. This is found in the stomach of the domestic sparrow.—**Nematoideum ovis pulmonale**, Rudolphi, Diesing. See *Strongylus rufescens*, Leuckart.—**Nematoideum sp.**, Brehm. Found in the pancreas and liver of the vicunna.—**Nematoideum sp.**, Ebertz. This is found in the lungs of the domestic

sheep, and is probably *Strongylus filaria*, Rudolphi, or *Strongylus rufescens*, Leuckart, *q. v.*—**Nematoideum sp.**, Generali. Found in the house-fly.—**Nematoideum sp.**, Leuckart. Found encapsuled in the lymphatic glands of domestic cattle.—**Nematoideum sp.**, Stiles. Found in lymphatic glands of cattle in capsules.—**Nematoideum tracheale**, Rainey and Bristowe. See *Filaria trachealis*, Cobbold. This is possibly but the larval form of *Ascaris megalocephala* or *Ascaris suilla*.—**Nephrophages sanguinarius**, Miyake and Scriba (1893). A mite found in considerable numbers in the urine of a native patient in Tokio. The parasite was held to have its seat in the kidney, and as being the cause of the hematuria.—**Nettorhynchus blainvillii**, Zenker. According to Raspail, this may have been a partially decomposed *Bothriocephalus claviceps* or *Bothriocephalus rugosa* of the salmon.—**Niaibi.** The native name in New Grenada for the *Leptus irritans*, *q. v.*—**Nigua.** See *Argas americanus*, DeGeer, and *Sarcopsylla penetrans*, Westwood.—**Nirmus clavicornis**, Denny, Verrill. The louse of the ring-dove and stock-dove. Piaget refers them to *Lipeurus baculus*, Nitzsch.—**Nirmus crassicolis**, Olfers. See *Lipeurus jejunus*, Nitzsch.—**Nirmus filiformis**, Olfers. See *Lipeurus baculus*, Nitzsch.—**Nirmus numidæ**, Denny. See *Lipeurus numidæ*, Denny.—**Nirmus tetragonocephalus**, Olfers. See *Goniodes falcicornis*, Nitzsch.—**Nirmus trigonocephalus**, Olfers. See *Menopon pallidum*, Nitzsch.—**Noctua sp.** A lepidopterous insect. One case of the larva acting as a facultative parasite cited by Dumeril (France).—**Noisy Breeze-fly.** See *Tabanus bromius*, Linné.—**Notocotyle triserialis.** See *Monostoma verrucosum*, Fröhlich.—**Nuche.** See *Dermatobia noxialis*, Brauer.—**Ochromyia anthropophaga**; Blanchard. Syn., *Cayor Fly*. A Senegal fly, the larvæ of which are found beneath the skin in man, the dog, cat, and goat.—**Œdemagena equi**, Loiset. See *Hypoderma equi*, Joly.—**Œdemagena tarandi**, Latreille. See *Hypoderma tarandi*, Linné.—**Œsophagostoma columbianum**, Curtice. A worm producing a nodular disease of the intestines of sheep in the Southeastern United States.—**Œsophagostoma dentatum**, Rudolphi. Syn., *Œsophagostoma subulatum*, Molin; *Sclerastoma dentatum*, *Strongylus dentatus*, Rudolphi. This is found in the small intestine, cecum, and colon of the domestic pig, the wild boar, and the white-lipped peccary (*Dicotyles* (*Noctophorus*) *labiatus*).—**Œsophagostoma inflatum**, Schneider, Railliet. Syn., *Strongylus inflectus*, Schneider. Found in the large intestine of domestic cattle.—**Œsophagostoma subulatum**, Molin. See *Œsophogostoma dentatum*, Rudolphi.—**Œsophagostoma venulosum**, Rudolphi. This is found in the goat, sheep, and roe-deer.—**Œstre du mouton**, Geoffroy. See *Œstrus ovis*, Linné.—**Œstrus ani equorum**, Linné. See *Gastrophilus hæmorrhoidalis*, Linné.—**Œstrus bengalensis**, var. **equi**, Macquart. See *Gastrophilus equi*, Fabricius.—**Œstrus bovis**, Fabricius, Linné (1761). See *Gastrophilus equi*, Fabricius.—**Œstrus bovis**, De Geer (1776). See *Hypoderma bovis*, De Geer.—**Œstrus cameli**, var. **pharyngobalus**, Steel. Camel-bot. A bot producing great irritation of the nasal cavities and pharynx of camels.—**Œstrus clarksii**, Leach. See *Gastrophilus nasalis* (Linné), Schiner.—**Œstrus cuniculi**, Clark (1797). See *Cuterebra cuniculi*, Clark (1815).—**Œstrus duodenalis**, Schwab. See *Gastrophilus nasalis* (Linné), Schiner.—**Œstrus elephantis**, Steel. See *Gastrophilus elephantis*, Cobbold.—**Œstrus equi**, Clark, Fabricius, Latreille, Olivier, Fallen, Macquart, Westwood, Joly. See *Gastrophilus equi*, Fabricius.—**Œstrus equi**, var. *α* **nasalis**, Fabricius. See *Gastrophilus nasalis* (Linné), Schiner.—**Œstrus equi**, var., *β* **hæmorrhoidalis**, Fabricius. See *Gastrophilus hæmorrhoidalis*, Linné.—**Œstrus ericetorum**, Leach. See *Hypoderma lineata* (Villers), Lõw.—**Œstrus gastricus major, Œstrus gastricus vulgaris**, Schwab. See *Gastrophilus equi*, Fabricius.—**Œstrus guildingi**, Hope. See *Dermatobia noxialis*, Brauer.—**Œstrus hæmorrhoidalis**, var. *β* Clark. See *Hypoderma lineata* (Villers), Lõw.—**Œstrus hæmorrhoidalis**, Gmelin, Schrank. See *Gastrophilus equi*, Fabricius, and *Gastrophilus hæmorrhoidalis*, Linné.—**Œstrus hominis**, Völkel. See *Hypoderma diana*, Brauer.—**Œstrus intestinalis**, DeGeer. See *Gastrophilus equi*, Fabricius.—**Œstrus lineatus** (Villers), Olivier. See *Hypoderma lineata* (Villers), Lõw.—**Œstrus nasalis**, Linné. See *Gastrophilus nasalis* (Linné), Schiner.—**Œstrus nasalis ovinus**, Neumann. See *Œstrus ovis*, Linné.—**Œstrus ovinus**, Fischer. See *Œstrus ovis*, Linné.—**Œstrus ovis**, Linné (1760). Syn., *Mouche ou ver du nez des moutons*, Réaumur (1734); *Œstrus sinus frontalis*, Linné (1746); *L'œstrus de moutons*, Geoffroy (1764); *Œstrus ovinus*, Fischer (1787); *Cephalomyia ovis*, Latreille (1825); Westwood (1840); Joly (1846); *Œstrus nasalis ovinus*, Neumann (1851); *Sheep Bot-fly; Sheep Gad-fly; Grub-in-the-head.* The larvæ are found in the nostrils and nasal and frontal sinuses of sheep.—**Œstrus rangiferinus**, Linné. See *Hypoderma tarandi*, Linné.—**Œstrus salutaris**, Macquart.—**Œstrus salutiferus**, Clark. See *Gastrophilus nasalis* (Linné), Schiner.—**Œstrus tarandi**, Linné. See *Hypoderma tarandi*, Linné.—**Œstrus veterinus**, Clark. See *Gastrophilus nasalis* (Linné), Schiner.—**Ohrbohrer; Ohrwurm**, Ger. See *Forficula auricularia*.—**Ollulanus tricuspis**, Leuckart. This is found encapsulated in the muscles of the house-mouse (*Mus musculus*, Linné,) and in the walls of the stomach of domestic cats, wandering into the muscles, connective tissue, and diverse organs.—**Onchocerca reticulata**, Diesing. Syn., *Spiroptera cincinnata*, Zürn; *Filaria cincinnati*, Perroncito. Found in the muscles and coats of arteries in the horse.—**Oorworm**, Dan. See *Forficula auricularia*.—**Ophiostoma pontieri**, H. Cloquet (1822). See *Gordius tolosanus*, Dujardin (1842).—**Ophryoscolex inermis**, Stein (1858). A peritrichous vorticella-like infusorian found in the rumen and reticulum of various ruminants. The infusoria found in the viscera of sheep by Gruby and Delafond (1843) probably belonged to this genus.—**Ophryoscolex purkinjei**, Stein (1858). Endoparasitic within the first and second stomachs of sheep and cattle.—**Orentvist**, Dan. See *Forficula auricularia*.—**Ormask**, Sw. See *Forficula auricularia*, Linné.—**Ornithobius bucephalus**, Giebel, Piaget. Syn. *Pulex cygni*, Redi; *Pediculus cygni*, Linné; *Lipeurus cygni*, Giebel; *Ornithobius cygni*, Denny. The louse of the swan.—**Ornithobius cygni**, Denny. See *O. bucephalus*, Giebel.—**Ovuligera carpi**, Dupuytren. Syn., *Acephalocystis plana*, Lænnec. A concretion found between the tendons and muscles and mistaken for an entozoön.—**Ox Breeze-fly.** See *Tabanus bovinus*, Linné.—**Ox Warble-fly** or **Ox Bot-fly.** See *Hypoderma bovis*, Latreille.—**Ox Gad-fly.** See *Tabanus bovinus*, Linné.—**Ox Warble.** See *Hypoderma lineata*, Villers.—**Oxyporus subterraneus.** A beetle, the larvæ of which is reported by Paykul as a facultative human parasite.—**Oxyuris ambigua**, Rudolphi. Syn., *Passalurus ambiguus*, Dujardin. This is found in the large intestine and cecum of the domestic rabbit and of the hare.—**Oxyuris appendiculata**, Leidy. Syn., *Anguillula appendiculata*, Leidy:

Oxyuris blattæ orientalis, Bütschli. This is found in the large and small intestine of the cockroach (*Periplaneta orientalis*, Linné).—**Oxyuris blattæ orientalis**, Bütschli. See *Oxyuris appendiculata*, Leidy.—**Oxyuris blatticola**, Galeb. Found in the cockroach (*Blatta germanica*, Fabricius).—**Oxyuris compar**, Leidy. This is found in the small intestine of the domestic cat. The female only is known.—**Oxyuris curvula**, Rudolphi. This is found in the intestine and cecum of the domestic ass, mule, and horse. **Oxyuris diesingi**, Hammerschmidt. Syn., *Anguillula mucrura*, Diesing. This is found in the large and small intestine of the cockroach (*Periplaneta orientalis*, Linné).—**Oxyuris mastigodes**, Nitzsch. This is found in the intestine of the horse.—**Oxyuris obvetata**, Bremser. Found in the intestine of the house mouse (*Mus musculus*, Linné) and of the house rat (*Mus ratus*, Linné) and the brown rat (*Mus decumanus*, Pallas).—**Oxyuris semilanceolata**, Molin. See *Oxyuris tetraptera*, Nitzsch.—**Oxyuris tetraptera**, Nitzsch. Syn., *Oxyuris semilanceolata*, Molin. This is found in the large intestine of the house mouse (*Mus musculus*, Linné).—**Oxyuris vermicularis**, Bremser (1819), Chiaje, Dugés, etc.. Syn., *Ἀσκαρις*, Hippocrates; *Lumbriculus*, Aldrovandi; *Ascaris vermicularis*, Linné (1767), Müller, etc.; *Fusaria vermicularis*, Zeder (1800), *Madenwurm; Pfriemenschwanz*, *Springwurm*, *Aftermade*, Ger.; *maw worm*, *threadworm*, *pin worm*, *seat worm*. This is found in the cecum and lower part of the ileum of man and, according to Zürn, occasionally in the dog. The feeding experiments of Cobb prove that no intermediate host is necessary for the development of this worm.—**Oxyuris vivipera**, Probstmayer and Perroncito. This is found in the cecum and intestine of the domestic ass; according to Railliet this is a *Rhabdonema*.—**Palisade-worm.** See *Sclerostoma armata*, Dujardin, or *Eustrongylus gigas*, Diesing.—**Pampas benchucha.** See *Conorhinus nigrovarius*.—**Pangonia neo-caledonica**, Mégnin. A gad-fly which is very troublesome in New Caledonia (l'île des Pines), said to have spread an epidemic of anthrax in cattle and men by its bite. To the genus *Pangonia* is said to belong the "*seroot*" or "*zimb*," which, according to Bruce and other African travelers, is so troublesome in Abyssinia; others refer this to *Glossina morsitans*, Westwood, *q. v.*—**Papilio (Pieris) brassica**. One of the cabbage butterflies, the larva of which is reported by Calderwood (Scotland) as a facultative parasite.—**Paramecium coli**, Malmsten (1857). See *Balantidium coli*, Stein (1862).—**Passalurus ambiguous**, Dujardin. See *Oxyuris ambigua*, Rudolphi.—**Pediculus anatis**, Fabricius. See *Lipeurus squalidus*, Nitzsch.—**Pediculus anatis anseris**, Linné. See *Lipeurus jejunus*, Nitzsch.—**Pediculus anseris**, Sultzer. See *Trinoton conspurcatum*, Nitzsch.—**Pediculus bicolor**, Lucas. See *Hæmatopinus piliferus*, Burmeister.—**Pediculus bidentatus**, Scopoli. See *Goniocotes compar.*, Nitzsch.—**Pediculus bovis**, Linné. See *Trichodectes scalaris*, Nitzsch. **Pediculus canis**, O. Fabricius (?). See *Trichodectes latus*, Nitzsch.—**Pediculus canis familiaris**, Müller. See *Hæmatopinus piliferus*, Burmeister.—**Pediculus capitis**, Leach, Nitzsch. Syn., *Pediculus ordinarius*, Redi; *Pediculus cervicalis*, Leach; *Pediculus corporis humanus*, var. 1; Linné; *Head-louse*, *Common Louse*, *Pou human de la tête*, De Geer; *Le pou ordinaire*, Geoffroy; *Pou de la tête*, Lamarck, Fr.; *Kopflaus*, Ger. This louse infests by preference the human head, but is frequently found on all parts of the body, and is thus confused with *Pediculus vestimenti*, Leach. According to Murray the colored races have lice with corresponding colors. Those of the negroes of West Africa and Australia are nearly black, those of the Hindoos dark, those of the Hottentots orange, those of the Chinese and Japanese yellowish-brown, those of the Indians of the Andes dark-brown, those of the California Indian olive, those of the northern Indians, Esquimaux etc., pale. The lice from a negro turn light-colored when placed on the head of a white person. Any simple grease will destroy these parasites, a fact which perhaps explains the universal use of ointments and pomades by all savages and people of dirty habits.—**Pediculus caponis**, Linné. See *Lipeurus variabilis*, Nitzsch.—**Pediculus cervicalis**, Leach. See *Pediculus capitis*, Leach.—**Pediculus columbæ**, Linné. See *Lipeurus baculus*, Nitzsch.—**Pediculus corporis.** See *Pediculus capitis*, Leach.—**Pediculus cygni**, Linné. See *Ornithobius bucephalus*, Giebel.—**Pediculus denticulatus**, Nitzsch. The flea proper of hares and rabbits.—**Pulex hominis**, Dugés. See *Pulex irritans*, Linné.—**Pulex irritans**, Linné (1758). Syn., *Pulex ater*, Linné (1746); *Pulex vulgaris*, De Geer (1778); *Pulex hominis* (1832); *Human Flea*, *Puce de l'homme*, *Gemeiner Floh*, *Menschenfloh*. This species, common on man, may be conveyed to dogs and cats and rabbits.—**Pulex minimus cutem penetrans**, Catesby. See *Sarcopsylla penetrans*, Westwood.—**Pulex minutissimus nigricans**, Barrère. See *Sarcopsylla penetrans*, Westwood.—**Pulex murinus**, Mégnin. Syn,. *Rat-flea*, *Puce de rats*. A very small species found on rats.—**Pulex musculi**, Mégnin. Syn., *Mouse-flea*, *Puce de souris*. A minute form found on mice, but not transmitted to dogs and cats.

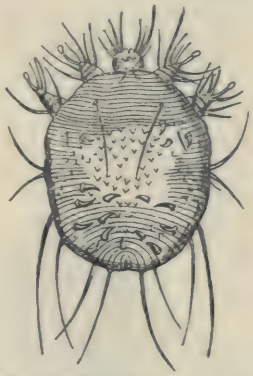
Larva of the flea (PULEX IRRITANS, Linné).

—**Pulex pavonis**, Redi. See *Goniodes falcicornis*, Nitzsch.—**Pulex penetrans**, Linné. See *Sarcopsylla penetrans*, Westwood.—**Pulex serraticeps**, Gervais. Syn., *Pulex cati*, Mégnin; *Pulex felis*, Künckel, Bouché; *Pulex canis*, Curtis; *Ceratopsyllus canis*, Dugés; *Ceratopsyllus serraticeps*, Gervais; *Dog-flea*, *Hundefloh*, *Puce du chien*, *Puce de chat*, *Cat-flea*. This flea abounds on dogs. is less frequent on cats and is transmissible to man, but is not usually troublesome to him; it is occasionally found on rabbits. It acts as the intermediate host for *Tænia canina*, Linné. Verrill and others hold the cat-flea and dog-flea to be different species, the posterior tarsi of the latter having the fifth joint longer than the second, while in the cat-flea the second joint is longer than the fifth.—**Pulex vulgaris**, De Geer. See *Pulex irritans*, Linné.—**Pyrellia cadaverina**, Robin. See *Musca cadaverina*. Linné.—**Rain Breeze-fly**. See *Hæmatopota pluvialis*, Meigen.—**Rainey's Bodies, Rainey's Tubes, Rainey'sche Körperchen**. See *Sarcocystis miescheri*, Ray Lankester.—**Rasenbremsfliege**. See *Gastrophilus nasalis* (Linné), Schiner.—**Rat-flea**. See *Pulex murinus*, Mégnin.—**Red Flea, Red Harvest-mite, Red Mite**. See *Tetranychus autumnalis*, Shaw.—**Red-tailed Bot-fly**. See *Gastrophilus hæmorrhoidalis*, Leach.—**Red-tailed Horse-bot**. See *Gastrophilus hæmorrhoidalis*, Linné.—**Reduvius amœnus**. This is found in Borneo.—**Reduvius cruentus**, an Indian species.—**Reduvius personatus**, L. Kothwanze. A common fly-bug in houses throughout Europe, rarely in the open; appears at night to suck the juices of bed-bugs, spiders, flies, moths, etc. Cobbold cites it with the other species as a human parasite.—**Reduvius pungens**, Le Conte. Frequently found in the Eastern United States, about bed-rooms, living upon bed-bugs and other insects.—**Reduvius serratus**, a predaceous bug of India. The bugs of the genus *Reduvius* although included by Blanchard and others among those occasionally attacking man, are on the whole useful. The young stages of these insects cover themselves over with dust, and thus concealed, lurk in dark places for the insects upon which they ordinarily prey.—**Red Worm of Game-keepers**. See *Syngamus trachealis*, von Siebold.—**Rhabditis cornwalli**, Cobbold. See *Rhabditis terricola*, Oerley.—**Rhabditis genitalis**, Scheiber. See *Rhabditis pellio*, Bütschli.—**Rhabditis intestinalis**. See *Rhabdonema intestinale*, R. Blanchard.—**Rhabditis niellyi**, R. Blanchard (1888). Syn., *Anguillula leptodera*, Nielly (1882); *Leptodera niellyi*, R. Blanchard (1885); *Filaria niellyi*, Moniez. It is found in the skin of man, producing a dermatitis occurring in discrete and confluent papules and vesico-papules, covering the arms, forearms, backs of the hands, and dorsal surface of the fingers. The eruption also involves the thighs. From the papules the parasite can easily be expressed. The disease resembles very strongly the African affection termed "Craw-craw."—**Rhabditis pellio**, Bütschli (1873). Syn., *Pelodera pellio*, Schneider (1866); *Rhabditis genitalis*, Scheiber (1880). This was found in the urine of a woman. The history of this case points to the parasite having lived in the vagina rather than in the urinary passages proper.—**Rhabditis stercoralis** (Normand), Bavay. See *Rhabdonema intestinale*. R. Blanchard.—**Rhabditis teres**, Perez. See *Rhabditis terricola*, Dujardin.—**Rhabditis terricola**, Dujardin (1845), Oerley (1881). Syn., *Pelodera teres*, Schneider (1866); *Rhabditis teres*, Perez (1866); *Pelodera setigera*, Bastian (1879); *Rhabditis cornwalli*, Cobbold (1879). This is common in garden earth throughout Europe. Found in the body of a boy who died from an epidemic disease on board the British reformatory school ship "Cornwall" in 1879, producing a trichinosis-scare.—**Rhabdonema intestinale**, R. Blanchard (1885). Syn., *Anguillula stercoralis*, Bavay (1877), Normand; *Anguillula intestinalis*, Bavay (1877), Grassi; *Leptodera stercoralis*, Cobbold, (1879); *Pseudo-rhabditis stercoralis*, Perroncito (1881); *Rhabditis stercoralis*, *Rhabditis intestinalis*, *Rhabdonema strongyloides*, Leuckart (1883); *Strongyloides intestinalis*, Grassi (1883); *Rhabditis strongyloides*, Grassi. Found in the human intestine in cases of catarrhal gastro-enteritis. It is said to determine the Cochin-china diarrhea, both of men and of fowls. Grassi first demonstrated that *Anguillula stercoralis* was but the free state, and *Anguillula intestinalis* the parasitic stage, of the same worm.—**Rhabdonema longum**, Grassi and Segrè. Syn., *Rhabdonema suis*, Lutz.—**Rhabdonema strongyloides**, Leuckart. See *Rhabdonema intestinale*, R. Blanchard.—**Rhabdone-**



ma suis, Lutz. See *Rhabdonema longum*, Grassi and Segrè.—**Rhophalocephalus carcinomatosis,** Korotneff (1893). Found in carcinomatous growths. It is referred to a group of organisms intermediate between the monocystic *Gregarinæ* (*Monocystidæ*) and the *Coccidia* (*Coccididæ*). It shows close relationship to *Ophryocystis bütschli*, Schneider (1884). Korotneff summarizes his observations as follows: 1. "Carcinoma is malignant only in case of the presence of *Rhophalocephalus* within it." 2. *Rhophalocephalus* belongs by nature to the *Sporozoa*, and consists of two stages of development: *Ameba* and *Coccidum*. 3. The respective conditions of these two stages of development are shown by the two kinds of larva, the *zoöid* (zoöit) which has no enclosing envelopment (Hülle), and the *sporozoöid* (sporozoöit), which has an envelop. 4. The zoöid, as also the sporozoöid, can be either a coccidium or an ameba, with this difference, however, that in a coccidium we usually find only one larva (zoöid or sporozoöid), while in the ameba we may find many larvæ together, and of both kinds. 5. The zoöid forms a coccidium by encapsulation, but the sporozoöid changes into an ameba when it loses its envelop. 6. The zoöid, under favorable conditions of nourishment, can enlarge considerably, and assume a gregarina-like form. 7. The disappearance of the nucleus before or at the time of the formation of the larva (multiplication) either in the case of the ameba or coccidium, is a constant occurrence. 8. A regular succession of the stages of development (ameba and coccidium) does not occur in *Rhophalocephalus;* it is entirely accidental. 9. The coccidia, as well as the larvæ, are entirely passive, and are driven here and there in the organism, while the amebæ move about actively. 10. Before the larva is formed within the ameba, the latter becomes encapsulated and degenerates proportionately to the formation of the larva, a circumstance which corresponds with the penetration of the leukocytes into the interior of the cysts. 11. Leukocytes are necrophages which have nothing to do with living parasites; their rôle is not beneficial but pernicious, as they form in great numbers around the parasites and change into corpuscles. 12. The zoöid and coccidium are *intra*-cellular parasites, while the sporozoöid and ameba are *ecto*-cellular or *inter*-cellular parasites. 13. After a zoöid has penetrated into a cancer-cell, it may undergo division and form the nucleus (*Bildungscentrum*) of a cancer-pearl (*Krebsperle*). 14. The pearls form a necrotic area, which opening outward takes on the character of an abscess."—**Rhynchoprion columbæ,** Hermann. See *Argas reflexus*, Latreille.—**Rhynchoprion penetrans,** Owen. See *Sarcopsylla penetrans*, Westwood.—**Ricinus canis,** De Geer. See *Trichodectes latus*, Nitzsch.—**Ricinus caninus,** Ray. See *Ixodes ricinus*, Linné.—**Ricinus gallinæ,** De Geer. See *Sarcocystis tenella*, Railliet.—**Sarcocystis miescheri,** Ray Lankester (1882). Syn., *Synchytrium miescherianum*, Kühn (1865), Zopf; *Corpuscles of Rainey; Rainey's Bodies; Rainey's Corpuscles; Rainey's Tubes; Utricles of Miescher; Miescher's Tubes; Tubespore spherique*. Sausage-like psorosperm tubes or saccules occasionally found in immense numbers in the muscles of pigs, cattle, sheep, mice and fowls, but never in man.—**Sarcocystis tenella,** Railliet. Syn., *Sarcocystis hirsuta*, Moulé. The cause of psorospermosis in the muscles of the sheep (Huet, Moulé, von Hessling, Cobbold, Sticker, Brusafeno, Krause), the goat (Pagenstecher, Moulé), the ox (von Hessling, Cobbold, Perroncito, Krause, Manz, Beale, Moulé), and the horse (Siedamgrotzky, Schulze, Pütz, Moulé).—**Sarcophaga carnaria,** Meigen. Syn., *Gray Carnivorous Fly; Mouche carnassiere*, Fr.; *Graue Fleischfliege*, Ger. Common in Europe in summer and autumn; very rarely deposits its eggs and larvæ in wounds.—**Sarcophaga magnifica,** Schiner, (1862). Syn., *Sarcophaga* (*Sarcophila*) *wohlforti*, Portschinsky (1875); *Sarcophaga ruralis*, Meigen; *Sarcophila meigeni*, Portschinsky; *The Magnificent Sarcophagus*. A fly common to Europe and Russia, rural in habit, never entering houses; found especially about the flowers of *Eryngium*. The larvæ occur in wounds and folds of the skin of cattle, horses, sheep, dogs, and domestic birds, especially geese. They are especially abundant where collections of sebaceous matter exist, as in the lacunæ of the fourchet of a horse's foot, the cavity of the sheath, or the folds of the pastern, where they produce ulceration. They are especially abundant in the districts of Mohilew, Orscha, and Gorki. Mégnin holds that the majority of cases of myiosis in Europe are due to this fly.—**Sarcophaga ruralis,** Meigen. See *Sarcophaga magnifica*, Schiner.—**Sarcophaga wohlfarti,** Portschinsky. Syn., *Sarcophaga magnifica*, Schiner.—**Sarcophila meigeni,** Portschinsky. See *Sarcophaga magnifica*, Schiner.—**Sarcophila wohlfarti,** Portschinsky. See *Sarcophaga magnifica*, Schiner.—**Sarcopsylla gallinacea,** Westwood. The chigoe of fowls. Found on domestic fowls in Ceylon by Morely and by Green at Colombo.—**Sarcopsylla penetrans,** Westwood (1840). Syn., *Pulex minimus cutem penetrans*, Catesby (1743); *Pulex minutis simus nigricans*, Barrère (1743); *Acarus fuscus sub cutem nidulans*, P. Brown (1756); *Pulex penetrans*, Linné (1758); *Rhynchoprion penetrans*, Oken (1815); *Sarcopsylla canis*, Westwood (1840); *Dermatophilus penetrans*, Guerin-Méneville; *Chigo, Chigoe, Chique, Chigga, Chigger, Chiggre, Jigger, Sandflea, Sandfloh, Puce penetrante, Puce-chique, Pique, Tique, Ton, Nigua, Bichotunga,*

SARCOPSYLLA PENETRANS. Westwood; A, female; B, male. (*After Leuckart.*)

Penetrating Flea, Burrowing Flea. A variety of flea found in Brazil, Guiana, Mexico, West Indies, and recently (1872) introduced into Africa, Congo, Gaboon, from Brazil. It lives in woods, on plants, dry herbage and sand, and attacks man, sheep, goats, cattle, horses, mules, asses, dogs, and especially pigs. Its attacks show preference for the feet, causing gangrenous wounds, arthritis, necrosis, fistulæ, loss of phalanges. Among animals the ears are frequently attacked. Immediate extraction, care being taken not to injure the parasites for fear of perforating the ovigerous sac and allowing the eggs to escape in the wound, is recommended; also applications of grease. In the western United States, the harvest-mite (*Leptus autumnalis*) has been confused with this parasite and called chigger.—**Sarcoptes auricularum,** Lucas and Nicolet. See *Symbiotes auricularium*, var. *canis*, Bendz.—**Sarcoptes canis,** Gerlach. See *Sarcoptes scabiei*, var. *suis*, Mégnin; also var. *canis*, Railliet.—**Sarcoptes cati,** Hering (1838). See *Sarcoptes notœdres.*—**Sarcoptes crustosæ,** Fürstenberg. See *Sarcoptes scabiei*, var. *lupi*, Mégnin.—**Sarcoptes cuniculi,** Gerlach. See *Sarcoptes notœdres*, Delafond and Bourguinon.—**Sarcoptes cynotis,** Hering. See *Symbiotes auricularium*, var. *canis*, var. *cati*, Neumann.—**Sarcoptes cysticola,** Vizioli. See *Symbiotes cysticola*, Railliet.—**Sarcoptes dromedarii,** Gervais. See *Sarcoptes scabiei*, var. *cameli*, Mégnin. —**Sarcoptes gerlachi,** Rivolta. See *Cytodites nudus*, Vizioli.—**Sarcoptes hippopodos,** Hering (1838). See *Dyciphagus cursor*, P. Gervais.—**Sarcoptes hominis,** Raspail. See *Sarcoptes scabiei*, var. *hominis*, Mégnin. —**Sarcoptes lævis,** var. **columbæ,** Railliet (1855). Found by Railliet and Cadiot at the base of the feathers in pigeons.—**Sarcoptes lævis,** var. **gallinæ,** Railliet (1886). Found on fowls.—**Sarcoptes minor,** Fürstenberg; **Sarcoptes minor,** var. **cati,** var. **cuniculi,** Fürstenberg. See *Sarcoptes notœdres*, Delafond and Bourguinon.—**Sarcoptes mutans,** Robin. Syn., *Kremidoptes viviparus*, Fürstenberg. The cause of the leg rabies of fowls. Reynal and Lanquetin regard it as transmissible to man.—**Sarcoptes nidulans,** Nitzsch. See *Harpirhynchus nidulans*, Mégnin.—**Sarcoptes notœdres,** Delafond and Bourguinon (1857). Syn., *Sarcoptes cati*, Hering (1838); *Sarcoptes cuniculi*, Gerlach (1857); *Sarcoptes minor*, var. *cati*, var. *cuniculi*, Fürstenberg (1861); *Dermatophagus cuniculi*, Zürn (1872). Found on the head of the cat and rabbit by ermulot and Coati. — **Sarcoptes scabiei,** var. *cameli*, Mégnin (1877). Syn., *Sarcoptes dromedarii*, Gervais (1841). The cause of the mange of the camel, llama, giraffe, and certain antelopes. According to Palgrave, Bérenger, Féraud, and Carpot, this form is transmissible to man and constitutes that form of acariasis of the Senegal negroes called *larbisch.*—**Sarcoptes scabiei,** var. **canis,** Railliet, Cadiot, Neumann. Found on mangy dogs; distinct from the varieties *suis* and *lupi*, which are at times found on the dog.—**Sarcoptes scabiei,** var. **capræ,** Mégnin (1877). Syn., *Sarcoptes capræ*, Fürstenberg (1861), Roloff; *Sarcoptes scabiei*, var. *ovis*, de Geer; *Sarcoptes squamiferus ovis*, Gerlach. *The Head-scab of Sheep.* Found on the sheep, goat, moufflon, gazelle, etc. According to Walbraff, transmissible to man and domestic animals.—**Sarcoptes scabiei,** var. **cati,** Hering and Fürstenberg, or **cuniculi.** See *Sarcoptes notœdres*, Delafond and Bourguinon.—**Sarcoptes scabiei communis,** Latreille. See *Sarcoptes scabiei*, var. *hominis*, Mégnin.—**Sarcoptes scabiei,** var., **equi,** Mégnin (1877). Syn., *Sarcoptes equi*, Gerlach (1857). Found on the various species of the horse tribe; transmissible to man according to experiments of Géraud and Gerlach.—

Sarcoptes scabiei, var. **hominis,** Mégnin (1877). Syn., *Acarus scabiei*, Linné (1748), De Geer; *Acarus exulcerans*, Linné ex Nyander (1757); *Acarus psoricus*, Pallas (1760); *Acarus humanus subcutaneus*, Linné ex Avelin (1761); *Acarus siro* (1761); *Acarus siro*, var. *scabiei*, Fabricius (1775); *Sarcoptes scabiei*,

SARCOPTES SCABIEI, var. HOMINIS, Mégnin. (*After Leuckart.*)

Crust of SCABIES NORVEGICA with the mites (SARCOPTES SCABIES, var. LUPI, Mégnin) their borings, eggs and excreta. (*After Leuckart.*)

Latreille (1806); *Acarus brachypus*, Olfers (1816); *Sarcoptes exulcerans*, Nitzsch (1818); *Sarcoptes galei*, Owen (1853); *Sarcoptes hominis*, Raspail; *Cheyletus scabiei*, Cloquet (1855); *Sarcoptes communis*, Delafond and Bourguinon (1857). The smallest variety of a form common to man and many mammals.—**Sarcoptes scabiei, var. lupi,** Mégnin (1877). Syn., *Acarus elephantiacus*, Dubini (1850). *Sarcoptes scabiei crustosæ*, Fürstenberg (1861). Found on mangy wolves; most common in Norway; transmissible to man and dogs, causing a crusty form of scabies known as Norwegian itch, *Scabies crustosa*, or *Scabies norvegica.* A case has recently been reported from America by Hessler.—**Sarcoptes scabiei,** var. **ovis,** de Geer. See *Sarcoptes scabiei*, var. *capræ*, Mégnin (1877).—**Sarcoptes scabiei,** var. **suis,** Mégnin (1877). Syn., *Sarcoptes suis*, Gerlach (1857); *Sarcoptes canis*, Gerlach (1857); *Sarcoptes squamiferus*, Fürstenberg (1861). The sarcopt of the pig.—**Sarcoptes squamiferus,** Fürstenberg. See *Sarcoptes scabiei*, var. *capræ*, Mégnin, and *Sarcoptes scabiei*, var. *suis*, Mégnin.—**Sarcoptes suis,** Gerlach. See *Sarcoptes scabiei*, var. *suis*, Mégnin.—**Saugkrätzmilbe der Haustiere.** See *Psoroptes communis*, Fürstenberg.—**Saumzecke.** See *Argas reflexus.*—**Scab-insect, Scab-mite.** See under genera *Chorioptes, Demodex, Psoroptes, Sarcoptes, Symbiotes.*—**Scatella wimaria,** Robineau-Desvoidy, See *Trichomyza fusca*, Macquart.—**Schaff Haarling.** See *Trichodectes sphærocephalus*, Nitzsch.—**Schamlaus.** See *Phthirius inguinalis*, Leach.—**Schistoma,** Weinland. See *Gynæcophorus hæmatobius.* — **Schmeissfliege.** See *Calliphora vomitoria*, Robineau-Desvoidy. — **Sclerostoma armata,** Dujardin, Molin. Syn., *Crinons*, Chabert (1782); *Strongylus equinus*, Müller, Goeze, Gmelin; *Strongylus armatus*, Rudolphi, Bremser, Westrumb, Schmalz, Lebland, Gurlt; *Sclerostoma equinum*, Blainville; *Sclerostoma armatum aneurysmaticum*, Rayer, Diesing; *Strongylus armatus minor*, Rayer; *Palisade-worm. The Armed Strongyle.* This is found in the adult state in the cecum and colon and the visceral arteries of the horse, ass, mule, and hemione; very common. The larval condition of this worm is passed in water or damp earth, after which development takes place not in the intestine of the host, but in the mesenteric arteries, giving rise to

aneurysmal dilatations, in which the larvæ remain for a time, finally making their way into the large intestine of the host, where they become sexually mature. Hayem found parasites in the trachea of ducks which he assigned to this species. They more likely belong to *Syngamus bronchialis*, Mühleg.—**Sclerostoma clathratum,** Baird. See *Strongylus clathratus* (Baird), Cobbold.—**Sclerostoma dentatum.** See *Œsophagostoma dentatum*, Rudolphi.—**Sclerostoma duodenale,** Cobbold. See *Dochmius duodenalis*, Leuckart.—**Sclerostoma equinum,** Blainville. See *Sclerostoma armata*, Dujardin.—**Sclerostoma hypostoma,** Dujardin. Syn., *Strongylus hypostomus*, Rudolphi, Bremser, Creplin, Diesing. Common in the large intestine of the sheep and goat. Probably ingested, in the water drunk, as embryos. Dujardin includes here the *Strongylus ammonis*, Rudolphi. —**Sclerostoma pinguicula,** Verrill. See *Stephanurus dentatus*, Diesing.—**Sclerostoma quadridentatum,** Dujardin. See *Sclerostoma tetracantha*, Diesing.—**Sclerostoma sipunculiforme,** Baird, Cobbold. Found in the large intestine of the Indian elephant.—**Sclerostoma struthionis,** Horst. Found in the cecum and intestine of the ostrich.—**Sclerostoma syngamus,** Diesing. See *Syngamus trachealis*. Siebold.—**Sclerostoma tetracantha,** Diesing (1851). Syn., *Proles strongyli armati*, Rudolphi (1808); *Strongylus tetracanthus*, Mehlis (1831); *Sclerostoma quadridentatum*, Dujardin (1845); *Nematoideum equi caballi*, Diesing (1851); *Cyathostomum tetracanthum*, Molin (1860); *Trichonema arcuata*, Cobbold (1874–5). Found between the mucous membrane of the cecum and colon of the various members of the horse-tribe, producing tumors, hemorrhagic enteritis, and sometimes fatal colic. **Sclerostoma tracheale,** Diesing. See *Syngamus trachealis*, von Siebold.—**Scolex decipiens,** Diesing. See *Cysticercus tæniæ microstomæ*, Dujardin.—**Screw-worm.** See *Lucilia macellaria*, Robineau-Desvoidy. —**Scrub-tick,** a formidable acarine parasite of horses, dogs, and man in the scrub of Australia. Species unidentified.—**Seat-worm.** See *Oxyuris vermicularis*, Bremser.—**Senegal'scher Blutegel.** See *Hirudo mysomelas.*—**Senegal Tick.** See *Ixodes algeriensis*, Mégnin.—**Seroot.** See *Pangonia.*—**Serpent des rognons des loups,** Jean de Clamoyan (1570). Referred by Dujardin to *Sclerostoma ...stoma*, Dujardin.—**Strongylus anseris**, Zeder. ... *Strongylus nodularis*, Rudolphi.—**Strongylus a...atus**, Rudolphi. See *Sclerostoma armata*, Dujardin.—**Strongylus arnfieldi**, Cobbold. Found in the trachea and bronchi of the domestic horse and ass. Cobbold referred the bronchial strongyle of the ass to *Strongylus micrurus*, Mehlis, of bovine animals, but Railliet has shown its identity with *Strongylus arnfieldi*.—**Strongylus axei**, Cobbold. Found in the walls of the stomach in the domestic ass.—**Strongylus bronchialis**, Cobbold (1860). See *Filaria lymphatica*, Moquin-Tandon.—**Strongylus bronchialis canis**, Osler. See *Filaria osleri*, Cobbold.—**Strongylus capreoli**, Rudolphi. A doubtful species reported from an old Vienna catalogue as from the kidney of a goat.—**Strongylus cernuus**, Creplin. See *Uncinaria cernua*, Creplin.—**Strongylus clathratus**, Baird. Syn., *Sclerostomum clathrum* (Baird). Found in the stomach and intestines of Indian and African elephants.—**Strongylus commutatus**, Diesing. Syn., *Filaria leporis pulmonalis*, Fröhlich. Found in the trachea and bronchi of hares and wild rabbits and rarely in the domestic rabbit.—**Strongylus contortus**, Rudolphi. Syn., *Strongylus ovinus*, Fabricius, Gmelin; *Strongylus fillicolis*, Rudolphi. Found in the abomasum of the sheep, goat, argali, chamois, and cattle; producing at times in Europe and the United States an epizoötic disease (*Magenwurmseuche*), a kind of pernicious anemia in lambs and yearling sheep.—**Strongylus convolutus**, Ostertag (1890). Syn., *Strongylus ostertagi*, Stiles (1893). Found frequently in the abomasum of cattle, causing a pernicious anemia and gastric catarrh in young animals. Stiles takes exception to the specific name *convolutus* as it was once employed for a parasite of the dolphin, now referred to the genus *Pseudalus*. We prefer to retain the discoverer's name. It may be, as suggested by Neumann, a variety of *Strongylus contortus*, Rudolphi.—**Strongylus dentatus**, Rudolphi, Dujardin, Zürn. See *Œsophagostoma dentatum*, Rudolphi.—**Strongylus dorcadis**, Rudolphi. Vienna catalogue (1821). See *Strongylus filaria*, Rudolphi.—**Strongylus douglassii**, Cobbold. This was found in the crop of the ostrich.—**Strongylus duodenalis**, Schneider (1866). See *Dochmius duodenalis*, Leuckart (1876).—**Strongylus elephanti** (sic), Rudolphi (1819). See *Ascaris lonchoptera*, Diesing.—**Strongylus elongatus**, Dujardin. See *Strongylus paradoxus*, Mehlis.—**Strongylus equinus**, Müller. See *Sclerostoma armata*, Dujardin.—**Strongylus falcifer**, Cobbold (1882). Found in the intestine of the Indian elephant.—**Strongylus filaria**, Rudolphi. This is found in the trachea and bronchi of the domestic sheep and cattle, goat, Bactrian camel, roebuck, fallow-deer, argali, and gazelle, producing a disease called "Hoose," or "Sheep-cough." Dujardin refers the *Strongylus dorcadis*, Rudolphi, from the old Vienna catalogue, to this species.—**Strongylus fillicolis**, Rudolphi. There is a confusion of this worm with *Strongylus contortus*, Rudolphi, by early writers. It is found in the abomasum and small intestine of the domestic sheep and goat. According to Curtice it is frequently found in the United States in autumn and winter. The *Trichosoma papillosum*, Wedl, may be but a young form of this parasite.—**Strongylus foliatus**, Cobbold. Found in tumors of the stomach of the Indian elephant.—**Strongylus gigas**, Rudolphi (1802). See *Eustrongylus gigas*, Diesing (1851).—**Strongylus hypostomus**, Rudolphi, Bremser, Creplin, Diesing. See *Sclerostoma hypostomum*, Dujardin.—**Strongylus inflatus**, Schneider. See *Œsophagostoma inflatum*, Schneider.—**Strongylus longevaginatus**, Diesing (1851). See *Strongylus paradoxus*, Mehlis (1830). Diesing, Weinland, Küchenmeister, and Cobbold hold this to be identical with *Filaria lymphatica*, Moquin

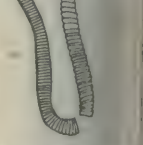
Tandon.—**Strongylus meleagris gallopavonis,** Buckingham. See *Syngamus trachealis*, von Siebold.—**Strongylus micrurus,** Mehlis. Found in the arterial aneurysms, trachea, and bronchi of domestic cattle. An ovoviviparous species. The strongyle of horses and asses was formerly included in this species, but is now referred to *Strongylus arnfieldi* by Cobbold and Railliet.—**Strongylus minusculus,** Neumann. See *Strongylus tenuissimus*, Mazzanti.—**Strongylus minutissimus,** Mégnin. This is shown by Railliet to be but a form of *Strongylus rufescens, q.v.*—**Strongylus nodularis,** Rudolphi. Syn., *Ascaris mucronata*, Fröhlich; *Strongylus anseris*, Zeder. This is found in the esophagus, gizzard, and duodenum of the domestic goose.—**Strongylus ostertagi,** Stiles (1892). See *Strongylus convolutus*, Ostertag.—**Strongylus ovinus,** Fabricius, Gmelin. See *Strongylus contortus*, Rudolphi.—**Strongylus ovis pulmonalis,** Diesing, Curtice. See *Strongylus rufescens*, Leuckart.—**Strongylus paradoxus,** Mehlis (1830). Syn., *Strongylus elongatus* (1845); *Strongylus longevaginatus*, Diesing (1851); *Filaria trachealis*, Bristowe and Rainey (1855); *Metastrongylus longevaginatus*, Molin (1861). Discovered at the end of the eighteenth century by Ebel in the lung of a wild boar; afterward by Modeer and Bremser, Rayer, Bellingham, Cobbold, etc., in the bronchial tubes of domestic swine, and by Jortsits (or Jovitsits) in man, and by Koch in sheep.—**Strongylus pergracilis,** the parasite of the Red grouse (*Lagopus scoticus*) of Europe, causing so-called grouse-disease.—**Strongylus pulmonalis,** Ercolani, found in the bronchi and lungs of domestic cattle.—**Strongylus pusillus,** S. Müller. This is found in the bronchi of hares and wild rabbits, rarely in the domestic rabbit, but very frequently in the cat; according to Railliet and Neumann all cases of pulmonary helminthiasis in cats are due to this parasite, which is present in one-fourth of all cats examined.—**Strongylus quadridentatus,** von Siebold (1851). See *Dochmius duodenalis*, Leuckart (1876).—**Strongylus radiatus,** Rudolphi. See *Uncinaria radiata*, Rudolphi.—**Strongylus renalis,** Moquin-Tandon (1860). See *Eustrongylus gigas*, Diesing (1850).—**Strongylus retortæformis,** Zeder, Rudolphi, Dujardin. This infests the small intestine of the hare and wild rabbit. This name was incorrectly applied by Bremser to *Strongylus strigosus*, Dujardin.—**Strongylus rubidus,** Hassall and Stiles. An extremely small species found in the stomachs of pigs in the United States. In some lots of hogs examined the parasite was present in 75 per cent.—**Strongylus rufescens,** Leuckart. Syn., *Nematoideum ovis pulmonale*, Diesing; *Pseudalius ovis pulmonalis*, A. Koch; *Strongylus ovis pulmonalis*, Curtice. This is found in the bronchi and pulmonary follicles of the domestic sheep, goat and roebuck. The *Strongylus minutissimus*, Mégnin, which causes the verminous bronchitis of African sheep, is but a variety of this worm, as shown by Railliet.—**Strongylus strigosus,** Dujardin. Syn., *Strongylus retortæformis*, Bremser. This is very abundant in warren rabbits, giving rise to a fatal anemia.—**Strongylus sublatus,** Cobbold Syn., *Hæmatozoön sublatum*, Gurlt. Found in the veins of the dog.—**Strongylus tenuis,** Eberth. This is found in the intestine and cecum of the domestic goose.—**Strongylus tenuissimus,** Mazzanti (1891). Syn., *Strongylus minusculus*, Neumann. Found in the mucous membrane of the stomach of the horse.—**Strongylus tetracanthus,** Diesing. See *Sclerostoma tetracantha*, Diesing.—**Strongylus trachealis,** Nathusius. See *Syngamus trachealis*, von Siebold.—**Strongylus trigonocephalus,** Rudolphi. See *Uncinaria trigonocephala* (Rudolphi), Neumann.—**Strongylus tubæformis,** Zeder. See *Ankylostomum tubæforme*, Zeder.—**Strongylus vasorum,** Baillet. The adult worm is found in the right ventricle of the heart and in the lungs, the embryos in the pulmonary arteries of the domestic dog.—**Strongylus ventricosus,** Rudolphi. This is found in the stomach and small intestine of domestic cattle and European deer.—**Strongylus venulosus,** Rudolphi. See *Uncinaria radiata*, Rudolphi.—**Strongylus vitulorum,** Rudolphi. See *Ascaris vituli* (Gmelin), Goeze.—**Strongylus vulpis,** Zeder. See *Uncinaria trigonocephala*, Rudolphi.—**Stubenfliege.** See *Musca domestica*, Linné.—**Surra Parasite.** See *Trypanosoma evansii*, Balbiani.—**Swiss Tapeworm.** See *Bothriocephalus latus*, Bremser.—**Symbiotes** (1857). A genus of psoric acaridans founded by Gerlach ("Krätze und Räude, entomologisch und klinisch bearbeitet, Berlin," 1857). Mégnin's grounds for referring all members of this genus to the genus *Chorioptes*, Gervais (1859), seem insufficient, as according to Scudder (Nomenclator zoölogicus) the coleopterous genus *Symbiotes* was not created by Redtenbacher until 1858 (*Fauna austrica*, "Die Käfer," 2te Auflage, Vienna, 1858, p. 371). We have therefore retained Gerlach's genus.—**Symbiotes auricularum,** var. **canis,** var. **cati,** Neumann (1892). Syn., *Sarcoptes cynotis*, Hering (1834); *Sarcoptes auricularum*, Lucet and Nicolet (1849); *Symbiotes canis*, Bendz (1862); *Symbiotes ecaudatus*, Mégnin (1876); *Chorioptes ecaudatus*, Mégnin (1880); *Psoroptes auricularis canis*, Sewell (1891). This is found in the ears of dogs and cats, producing that form of otacariasis accompanied by epileptic symptoms, with which packs of hunting-dogs are often attacked.—**Symbiotes avium,** Caparini (1880). See *Epidermoptes bilobatus*, Rivolta.—**Symbiotes canis,** Bendz. See *Symbiotes auricularum* var. *canis*, Neumann.—**Symbiotes communis,** Verheyen. Syn., *Sarcoptes bovis* (*?*), Hering; *Symbiotes bovis*, Gerlach; *Symbiotes equi*, Gerlach; *Dermatophagus bovis*, Fürstenberg; *Dermatophagoides scheremetewski*, Bogdanow (1864); *Symbiotes spathiferus*, Mégnin (1876); *Chorioptes spathiferus*, Mégnin (1880); *Chorioptes symbiotes*, var. *bovis*, R. Blanchard (1880); *Chorioptes communis*, var. *ovis*, Verheyen; *Foot-mite*. This parasite lives in colonies, and without excavating sub-epidermic galleries causes a localized scaliness especially on horses and cattle but also on the goat, sheep, and rabbit, and is, according to Bogdanow and Zürn transmissible to man.—**Symbiotes ecaudatus,** Mégnin. See *Symbiotes auricularum*, var. *canis*, var. *cati*, Neumann.—**Symbiotes spathiferus,** Mégnin. See *Symbiotes communis*, Verheyen.—**Symplectoptes cysticola,** Railliet (1885). Syn., *Epidermoptes cysticola*, Rivolta (1880); *Sarcoptes cysticola*, Vizioli (1870); *Laminosioptes gallinæ*, Mégnin (1880). An acaridan peculiar to the *Cystidicolidæ*, living in the connective tissue of the abdominal viscera, peritoneum, muscles, and beneath the skin of fowls, pheasants, and turkeys, especially old birds.—**Synchytrium miescherianum,** Kuhn. See *Saccocystis miescheri*, Ray Lankester.—**Syngamus bronchialis,** Mühleg (1884). Found in the larynx, trachea, and bronchi of geese by Pezibylka (1853–4) and Mühleg (1884). The specimens found in ducks by Hamm and referred by him to *Sclerostoma armatum*, Diesing, may belong here.—**Syngamus primitivus,** Molin. See *Syngamus trachealis*, Siebold.—**Syngamus sclerostomum,** Molin. See *Syngamus trachealis*, Siebold.—**Syngamus trachealis,** von Siebold (1836–'37–'42), Youat (1840), Gurlt (1841), Dujardin (1845), Ehlers (1872), Perrier (1875), Mégnin (1888).



Walker (1884), Neumann (1892). Syn., *Distoma ineare* (*tracheale*), Rudolphi (1800); *Fasciola trachea*, Montagu (1811); *Strongylus trachealis*, Nathusius (1837), v. Siebold (1838), Creplin (1840); *Strongylus meleagris gallopavonis*, Bellingham (1843); *Sclerostomum tracheale*, Diesing (1851); *Sclerostoma syngamus*, Diesing (1851), Cobbold (1864), Davaine (1877); *Syngamus sclerostomum*, Molin (1861); *Syngamus primitivus*, Molin (1861); *Gapes-worm; Red-worm of Gamekeepers.* The cause of gapes in the domestic fowl, peacock, turkey, partridge, black stork, magpie, hooded crow, green woodpecker, starling, swift, robin, etc. The investigations of H. D. Walker indicate the earthworm as the intermediate host of this worm.—**Tabanus bifacies,** Fabricius (1792–4). A breeze-fly, very widely spread in Egypt, called by the Arabian fellahs or bedouins *El Debab* or *Debane* (Fly), and falsely blamed by them for a mortality among their horses and camels, but which, according to Cobbold, is really due to hydatid cysts in the lungs.—**Tabanus albipes,** Fabricius. Syn., *The White-footed Breeze-fly.*—**Tabanus ater,** Meigen. See *Tabanus serio,* Latreille.—**Tabanus atratus,** Fabricius (1775). Syn., *Black Horse-fly.* The large, common gad-fly of the United States.—**Tabanus autumnalis,** Linné. Syn., *The Autumnal Breeze-fly; Taon d' automne.* A European species.—**Tabanus bovinus,** Linné. Syn., *The Ox Breeze-fly; Ox Gad-fly; Great Breeze-fly, Gros taon, Taon des bœufs, Rinderbremse.* A wide-spread and formidable species. The blood-sucking females are equally troublesome to cattle and horses.—**Tabanus bromius,** Linné. Syn., *The Noisy Breeze-fly; Taon bruyant.* Common in Europe, especially in wooded regions.—**Tabanus fulvus,** Meigen. Syn., *The Tawny Breeze-fly.* A European species.—**Tabanus lineola,** Fabricius. A very common American gad-fly.—**Tabanus luridus,** Fallen. A European species common in wooded regions.—**Tabanus morio,** Latreille. Syn., *Tabanus ater,* Meigen; *The Black Breeze-fly; Taon noir.* A common European species.—**Tabanus rusticus.** Syn., *The Rustic Breeze-fly; Taon rustique.* A common European species.—**Tabanus tectus,** Riley. A crepuscular species reported from Missouri, by G. M. Dodge, as swarming upon cattle and horses after sunset during June and July, rendering them well nigh frantic in their efforts to escape.—**Tabanus tropicus,** Linné. A European species common in woods. *Ταυίαί,* Aristotle. See *Tænia solium,* Linné.—**Tænia a articl courtes,** Bonnet. See *Bothriocephalus latus,* Bremser (1819).—**Tænia à épine,** Andry. This name was based upon the belief that the uterine coils of the worm were vertebræ. It refers to the modern *Bothriocephalus.*—**Tænia abietina,** Weinland (1858). See *Tænia serrata,* Goeze.—**Tænia acanthotrias,** Weinland (1858), Leuckart. This name was applied by Weinland and Leuckart, to a tapeworm of which only the finn with three rows of hooks has been described under the name *Cysticercus acanthotria,* Weinland (1858). Küchenmeister, Davaine, Cobbold, and Dallinger, regard it as but a variation of *Cysticercus cellulosæ.*—**Tænia aculeata,** Perroncito (1882). See *Trypanosoma giardi,* Rivolta (1878), Stiles (1893).—**Tænia acutissima,** Pallas. See *Tænia lanceolata,* Bloch.—**Tænia æquabiles,** Rudolphi (1810). This cestode was found by Rudolphi in the intestine of the swan (*Cygnus ferus*), and by Bremser in that of *Cygnus musicus*; rare.—**Tænia alba,** Perroncito (1879). See *Moniezia alba,* R. Blanchard (1891). Found in the intestine of domestic sheep and cattle.—**Tænia albolactata hominis,** Treutler. See *Tænia solium,* Linné.—**Tænia alpaca.** Only the finn observed hitherto.—**Tænia anatina,** Krabbe (1866–67). This cestode is found in the intestine of the domestic duck.—**Tænia anatis,** *β* **lineata,** Gmelin. See *Tænia trilineata,* Batsch.—**Tænia anserum,** Fischer. See *Tænia lanceolata,* Bloch.—**Tænia apri,** Gmelin. See *Tænia marginata,* Batsch.—**Tænia articulis conoideis,** Bloch. See *Tænia infundibuliformis,* Goeze.—**Tænia articulus demitten̨s,** Dyonis. See *Tænia solium,* Linné.—**Tænia avium,** Pallas. See *Tænia fringillarum,* Rudolphi.—**Tænia benedeni,** Moniez (1879). See *Moniezia benedeni,* R. Blanchard (1891), and *Moniezia trigonophora,* Stiles and Hassall (1893). Found in the intestine of the domestic sheep.—**Tænia botryoplitis,** Piana (1881). Found in the intestine of the domestic fowl. The larva or finn, *Cysticercus tænia bothryoplitis,* occurs in the snails, *Helix carthusianella* and *Helix maculosa.*—**Tænia bovina,** Gmelin. See *Tænia marginata,* Batsch.—**Tænia brachydera,** Diesing (1854). Found in the small intestine of the brown rat (*Mus decumanus,* Pallas) by Bellingham, of Ireland.—**Tænia canina,** Bloch, Carlisle. See *Tænia serrata,* Goeze.—**Tænia canina,** Linné (1767), Pallas (1781), Batsch (1786). Syn., *Tænia osculis marginalibus oppositis,* Linné (1748); *Tænia moniliformis,* Pallas (1781), Schrank (1788); *Tænia cucumerina,* Bloch (1782); *Tænia canina felis,* Werner (1782); *Tænia elliptica,* Batsch (1786); *Tænia cateniformis,* Goeze (1787); *Tænia cateniformis e felis,* Gmelin (1788); *Tænia* (*Alyselminthus*) *cuniceps,* Zeder (1800), Rudolphi (1810); *Alyselminthus elliptica,* Zeder (1800); *Tænia* (*Alyselminthus*) *cucumerina,* Weinland (1858); *Tænia* (*Dipylidium*) *cucumerina,* Leuckart (1863).

TÆNIA CANINA, Linné. (*After Leuckart.*)

This is found in the small intestine of dogs, cats, and man; in the latter its occurrence is rare and only during childhood. The larva or finn (*Cysticercus tæniæ ellipticæ,* Batsch; *Cryptocystis trichodectis,* Villot) has for its hosts the fleas of dogs, cats and man (*Pulex serraticeps,* Gervais, and *Pulex irritans,* Linné), and the dog-louse (*Tricodectes canis,* de Geer).—**Tænia canina solium,** Werner. See *Tænia serrata,* Goeze.—**Tænia canis lagopodis,** Rudolphi, Viborg. Syn., *Tænia pseudo-cucumerina,* Baillet. This is found in the small intestine of the isatis (*Canis lagopus,* Linné), or arctic fox, and in the cat, the dog, and the house-mouse (*Mus musculus,* Linné).—**Tænia cantaniana,** Polonio. Found in the intestine of the domestic turkey.—**Tænia capensis,** Küchenmeister, Moquin-Tandon. See *Tænia saginata,* Goeze.—**Tænia capite bonæ spei,** Küchenmeister. See *Tænia saginata,* Goeze.—**Tænia capræ,** Rudolphi (1810); **Tænia capreoli,** Viborg (1795). Provisional names given to fragments of worms obtained from the intestine of the domestic goat. As a result of recent investigation Stiles concludes that these two species should be entirely ignored.—**Tænia caprina,** Abildgaard (1789). See *Linguatula rhinaria,* Railliet (1886).—**Tænia caprina,** Gmelin. See *Tænia marginata,* Batsch.—**Tænia cateniformis,** Goeze (1877); **Tænia cateniformis, var. E felis,** Gmelin (1788). See *Tænia canina,* Linné (1767).—**Tænia cateniformis,** Rudolphi (1810). See *Tænia echinococcus,* von Siebold (1853).—**Tænia cateni-**

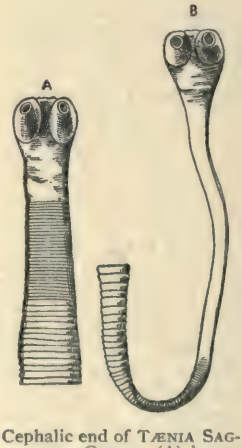
formis of Glirium, Gmelin. See *Tænia pumilla*, Goeze.—**Tænia cateniformis lupi,** Goeze. See *Tænia marginata*, Batsch.—**Tænia cateniformis vulpis,** Borke. See *Tænia pseudo-cucumerina*, Baillet. —**Tænia cellulosa,** Gmelin. See *Tænia solium*, Linné. **Tænia centripunctata,** Rivolta (1874). See *Stilesia centripunctata*, Railliet (1893). Found in sheep.—**Tænia centripunteggiata,** Perroncito (1882). See *Stilesia centripunctata*, Railliet (1893).—**Tænia cesticillus,** Molin. Syn., *Tænia infundibuliformis*, Dujardin. A common species found in the intestine of the domestic fowl. The larva (*Cysticercus tæniæ infundibuliformis*, Goeze) is found in the house-fly. Mégnin considers *Tænia cesticillus* to be only an incomplete state of *Tænia echinobothride*. —**Tænia cœnurus,** Küchenmeister (1853). Found in the small intestine of the dog. The larva (*Cœnurus cerebralis*, Rudolphi) is found in the brain, connective tissue, and spinal cord of domestic cattle, sheep, dromedary, and horse. It is the cause of the symptoms known as "*gid*," "*sturdy*," "*staggers*," or "*turnside*" in sheep.—**Tænia collari nigro,** Bloch; **Tænia collaris,** Bloch. See *Tænia sinuosa*, Rudolphi.—**Tænia collo brevissimo,** Bloch. See *Tænia crassicollis*, Rudolphi.—**Tænia collo longissimo,** Bloch. See *Tænia gracilis* (Zeder), Rudolphi. —**Tænia communis,** Moquin-Tandon. See *Tænia solium*, Linné.—**Tænia conica,** Molin. Found in the intestine of the domestic duck.—**Tænia conoidea,** Schrank. See *Tænia infundibuliformis*, Goeze. —**Tænia continua,** Colin. An anomalous form of *Tænia solium*, Linné (*q. v.*). **Tænia coronula,** Dujardin. Found in the intestine of the domestic duck. —**Tænia crassicollis,** Rudolphi (1819), Bremser, Gurlt, Dujardin (1845), Diesing (1850). Syn., *Tænia cucurbitina*, Pallas; *Tænia collo brevissimo*, Bloch; *Tænia serrata felis*, Goeze, Batsch, Schrank, Gmelin, Rudolphi; *Tænia moniliformis*, Batsch, Gmelin; *Tænia felis*, Carlisle, Gmelin; *Alyselminthus serratus*, Zeder; *Halysis serrata*, Zeder; *Tænia semiteres*, Baird. Found in the small intestine of domestic cats and various wild *Felidæ* (*Felis catus ferus*, *Felis concolor*, *Felis mellivora*, *Felis onca*, *Felis pardalis*, *Felis macroura*, *Felis tigrina*), giving rise at times to an epizoöty among them, accompanied by epileptiform attacks and chronic enteritis. The larva (*Cysticercus fasciolaris*, Rudolphi) is found encapsulated in the liver of the brown or Norway rat (*Mus decumanus*, Pallas), in that of the black rat or house-rat (*Mus rattus*, Linné), in the house-mouse (*Mus musculus*, Linné), as well as in moles and water-rats. Baird's specimen is regarded by Neumann as but a monstrous form of this species. R. Blanchard includes *Tænia crassicollis*, Diesing (1851), among the synonyms of *Tænia echinococcus*, von Siebold, of the dog.—**Tænia crassula,** Rudolphi. Found in the intestine of the pigeon; rare. —**Tænia cucumerina,** Bloch (1782), Weinland (1858), Leuckart (1863). See *Tænia canina*, Linné (1767). This is included among the synonyms of *Tænia echinococcus*, von Siebold, by R. Blanchard. —**Tænia cucurbitina,** Pallas (1781), Bloch (1782), Goeze (1782), Batsch (1786), Schrank (1788). See *Tænia solium*, Linné (1767), Rudolphi (1819); *Tænia saginata*, Goeze (1782); *Tænia serrata*, Goeze (1782); *Tænia crassicollis*, Rudolphi; *Tænia marginata*, Batsch; and *Tænia pucilla*, Goeze.—**Tænia cucurbitina plana pellucida,** Goeze. See *Tænia solium*, Linné.—**Tænia cuneata,** Batsch, von Linstow. See *Tænia infundibuliformis*, Goeze. —**Tænia cuniceps,** Zeder (1800), Rudolphi (1810). See *Tænia canina*, Linné (1767). **Tænia cysticerci tenuicollis,** Leuckart. See *Tænia marginata*, Batsch.—**Tænia degener,** Spigel. See *Tænia solium* Linné.—**Tænia dentata,** Batsch (1786), Gmelin (1790), Nicolai (1830). See *Bothriocephalus latus* Bremser; *Tænia saginata*, Goeze (1782); and *Tænia solium* (Linné), Rudolphi.—**Tænia denticolata,** Perroncito (1882). See *Moniezia denticulata*, R. Blanchard (1891).—**Tænia denticulata** Rudolphi (1810), Mayer (after Baird, 1853), Neumann (1892). See *Moniezia benedeni*, R. Blanchard (1891); *Moniezia denticulata*, R. Blanchard (1891) and *Moniezia expansa*, R. Blanchard (1891). This is found in the intestine of domestic cattle.—**Tænia diminuta,** Rudolphi. See *Tænia flavopunctata* Weinland (1858).—**Tænia echinobotrida,** Mégnin Found in the intestine of the domestic fowl Mégnin considers this to be the complete stage of *Tænia cesticillus*, which has lost its hooks and suckers.—**Tænia echinococcus,** von Siebold (1853) Leuckart. Syn., *Tænia cateniformis*, Rudolphi (1810); *Tænia cucumerina*, Bloch (1810); *Tænia visceralis socialis granulosa*, Goeze; *Terratas*, Rö (1852) (*nec* Goeze 1782); *Tænia granulosa*, Gmelin Prochaska; *Tænia serrata rölli*, Küchenmeister *Tænia echinococcus scolioparies*, Küchenmeister *Tænia nana*, van Beneden (1861) (*nec* Bilharz et von Siebold 1853); *Echinococcifer echinococcus*, Weinland (1861). This worm in its adult or strobila state infests only the small intestine of the dog and the wolf. The well-known larva (*Echinococcus polymorphus*, Diesing *q. v.*) is found in the viscera of man, swine, sheep goat, cattle, dromedary, Bactrian camel, and domestic ass.—**Tænia echinococcus scolioparien** Küchenmeister. See *Tænia echinococcus*, von Siebold (1853).—**Tænia elliptica,** Batsch (1786). See *Tænia canina*, Linné (1767).—**Tænia equina** Pallas, Müller, Chabert. See *Tænia perfoliata* Goeze; and *Tænia plicata*, Rudolphi.—**Tænia e cysticerco tenuicolli,** Küchenmeister. See *Tænia marginata*, Batsch.—**Tænia exilis,** Dujardin. Found in the intestines of domestic fowls.—**Tænia expansa,** Rudolphi (1810), Railliet, Neumann, Peroncito, Curtice, McMurrich and various authors See *Moniezia expansa*, R. Blanchard (1891); *Moniezia planissima*, Stiles and Hassell (1892); *Moniezia trigonophora*, Stiles and Hassell (1893) (*Tænia capræ*, Rudolphi, probably belongs here) Found in the intestine of domestic sheep, goats, and cattle.—**Tænia fasciata,** Feuereisen. See *Tænia gera*, Fröhlich.—**Tænia fasciata,** Rudolphi. Found in the intestine of the domestic goose.—**Tænia fasciolaris,** Pallas. Syn., *Tænia malleus*, Goeze. Found in domestic fowls.—**Tænia felis,** Carlisle. See *Tænia crassicollis*, Rudolphi.—**Tænia fenestrata,** Delle, Chiaje. The name applied to tapeworms exhibiting an anomalous perforated condition, first observed and described by Masars de Cazeles in *Tænia saginata*, afterward by Notta and Marfan in *Tænia solium*, Linné.—**Tænia ferrarum,** Gmelin. See *Tænia marginata*, Batsch.—**Tænia fimbriata,** Diesing (1850). See *Thysanosoma actinioides*, Diesing (1834), Stiles (1892). The cause of most of the tapeworm-disease among western (U. S.) sheep —**Tænia finna,** Gmelin. See *Tænia solium*, Linné —**Tænia flavopunctata,** Weinland (1858). Sy

TÆNIA FLAVOPUNCTATA, Weinland. (*From Leuckart after Weinland.*)

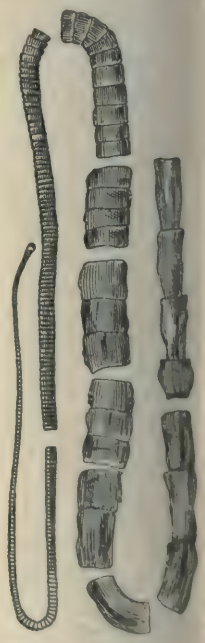
Tænia diminuta, Rudolphi; *Tænia leptocephala*, Creplin; *Hymenolepis flavopunctata*, Weinland (1858). This tapeworm has been found but five times in man, in America (Weinland, Leidy) and Italy (Parona, Grassi). It is not at all uncommon in the intestine of the brown or Norway rat (*Mus decumanus*, Pallas), in the house-mouse (*Mus musculus*, Linné), and in the black rat or house-rat (*Mus rattus*, Linné). The larva or finn (*Cysticercus tæniæ flavopunctatæ*, Weinland, Rudolphi) is found in certain insects, *e.g.*, *Anisolabris annulipes*, Lucas.—**Tænia fringillarum**, Rudolphi. Syn., *Tænia avium*, Pallas; *Tænia passeris*, Gmelin; *Halysis passeris*, Zeder. This tapeworm is commonly found in the intestine of the domestic sparrow (*Fringilla domestica et canabina*, Pallas, *F. linaria*, *F. montana*, *F. spinus*).—**Tænia fusa**, Colin. An anomalous form of *Tænia solium*, Linné, *q.v.*—**Tænia giardi**, Moniez (1879). See *Thysanosoma giardi*, Rivolta (1878), Stiles (1893). — **Tænia globipunctata**, Rivolta. See *Stilesia globipunctata*, Rivolta (1874), Railliet (1893). A species found in domestic sheep and cattle. — **Tænia globosa**, Rudolphi. See *Tænia marginata*, Batsch.— **Tænia gracilis** (Zeder), Rudolphi. Syn., *Tænia collo longissimo*, Bloch; *Halysis gracilis*, Zeder. This is found in the domestic duck; the cysticercoid found by Scott in the ostracode crustacean (*Candona rostrata*) is thought to be the finn of this worm.—**Tænia grandis saginata**, Goeze. See *Tænia solium*, Linné.— **Tænia granulosa**, Gmelin (1790), Prochaska. See *Tænia echinococcus*, von Siebold (1853), and *Echinococcus polymorphus*, Diesing (1851).— **Tænia grisea**, Pallas (1766), or **Taenia grysea** (*sic*), Schrank (1788). See *Bothriocephalus latus*, Bremser.—**Tænia humanis inermis**, Brera (1802). See *Bothriocephalus latus*, Bremser (1819).—**Tænia hydatigena**, Pallas. See *Tænia marginata*, Batsch. Cf. *Cysticercus tæniæ solii*, Leuckart.—**Tænia hydatigena anomala**, Steinbach; **Tænia hydatigena suilla**, Fabricius. See *Tænia solium*, Linné.—**Tænia hydatula**, Linné. See *Tænia marginata*, Batsch.—**Tænia imbricata**, Diesing (1854). Syn., *Tænia pusilla* (?), Bellingham. Found in the small intestine of the house-mouse (*Mus musculus*, Linné).—**Tænia imbutiformis**, Polonio. Found in the intestine of the domestic duck.—**Tænia inermis**, Moquin-Tandon (1860); **Tænia inermis hominis**, Brera (*pro parte*) (1802). See *Tænia saginata*, Goeze (1782).—**Tænia infundibuliformis**, Dujardin. See *Tænia cesticillus*, Molin.—**Tænia infundibuliformis**, Goeze, Batsch, Siebold, von Linstow. Syn., *Tænia avium*, Pallas (*ex parte*); *Tænia infundibulum*, Bloch; *Tænia articulis conoideis*, Bloch; *Tænia cuneata*, Batsch; *Tænia conoidea*, Schrank; *Alyselminthus infundibuliformis*, Zeder; *Halysis infundibuliformis*, Zeder; *Tænia phasiani cochlici*, Rudolphi. This enzoön is found in large numbers in fowls. According to Grassi and Rovelli the cysticercus of this tenia has for its intermediate host an earthworm (*Allolobophora fœtida*, Eisen): Cf *Tænia sinuosa*, Rudolphi.—**Tænia infundibulum**, Bloch. See *Tænia infundibuliformis*, Goeze.—**Tænia krabbei**, Moniez. An Icelandic species found in the intestine of the domestic dog. The larva or finn occurs in the reindeer (*Cervus tarandus*, Linné).—**Tænia lanceolata**, Bloch, Goeze, Batsch, Schrank, Gmelin, Fröhlich, Creplin, Dujardin. Syn., *Tænia anserum*, Frisch (1727); *Tænia acutissima*, Pallas; *Halysis lanceolata*, Dujardin, Zeder. Most frequently found in the intestine of the domestic goose, often, according to its discoverer Frisch, producing a veritable epizoöty.—**Tænia lanceolata**, Thabert (1787). See *Linguatula rhinaria*, Railliet (1886).— **Tænia lata**, Linné (1748); **Tænia lata event. grisea**, Pallas (1776). See *Bothriocephalus latus*, Bremser.—**Tænia lata**, Tutscheck, observed by Tumale (Africa). See *Tænia saginata*.—**Tænia lata**, Pruner (1847), included by R. Blanchard among the synonyms of *Tænia saginata*, Goeze, and by Cobbold among those of *Tænia solium* (Linné), Rudolphi.—**Tænia lata**, Reinstein. See *Tænia solium*, Linné, Rudolphi.—**Tænia leptocephala**, Creplin. See *Tænia flavopunctata*, Weinland.—**Tænia lineata**, Bloch. See *Tænia trilineata*, Batsch.—**Tænia lineata**, Goeze, Batsch, Schrank, Gmelin, Diesing. With this species found in the wild-cat, Hamann (1885) has classed a form expelled by a domestic dog.—**Tænia litterata**, Batsch. See *Tænia pseudo-cucumerina*, Baillet.—**Tænia litterata**, Goeze. See *Tænia pseudo-elliptica*, Baillet.—**Tænia longirostris**, Fröhlich. See *Tænia trilineata*, Batsch.—**Tænia lophosoma**, Cobbold. See *Tænia saginata*, Goeze (1872). Cobbold insists that this is a good species despite the criticisms bestowed upon his determination.—**Tænia lupina**, Schrank, Goeze. See *Tænia marginata*, Batsch.—**Tænia madagascariensis**, Davaine (1869). Syn., *Tænia ex cysticerco tenuicolli*, Küchenmeister. Found in the human intestine.—**Tænia magna**, Abildgaard. See *Tænia plicata*, Rudolphi.—**Tænia malleus**, Goeze. See *Tænia fasciolaris*, Pallas.—**Tænia mammillaria**, Mehlis, Diesing, Neumann. Found in the intestine of the horse.—**Tænia marginata**, Batsch, Rudolphi, Dujardin, Diesing, Cobbold. Syn., *Tænia cucurbitina*, Pallas, Bloch; *Tænia cateniformis lupi*, Goeze; *Tænia lupina*, Schrank, Goeze; *Tænia ex cysticerco tenuicolli*, Küchenmeister; *Tænia tenuicollis*, Gunther, Moquin-Tandon; *Tænia hydatigena*, Pallas, Bloch; *Tænia hydatula*, Linné; *Tænia globosa*, Rudolphi, Gmelin; *Tænia siniæ*, Gmelin; *Tænia ferrarum*, Gmelin; *Tænia caprina*, Gmelin; *Tænia ovilla*, Gmelin; *Tænia vervicina*, Gmelin; *Tænia bovina*, Gmelin; *Tænia apri*, Gmelin; *Halysis marginata*, Zeder; *Tænia cysticerci tenuicollis*, Leuckart. This is the largest of the tapeworms infesting the dog and wolf. The finn or larva (*Cysticercus tæniæ marginatæ*, Batsch-Diesing, *q.v.*), is found in various ruminants, sheep, goats, hogs, horses, squirrels, monkeys, and man.—**Tænia mediocanellata**, Küchenmeister (1852). The parasite described as new under this name by Küchenmeister being in reality a specimen of *Tænia solium*, the name was unfortunately transferred to the unarmed species, but it should be dropped. "It is surely not only justifiable, but really demanded by the rules of zoölogic nomenclature, that the thoroughly unsuitable designation '*mediocanellata*' should be replaced by Goeze's very appropriate name '*saginata*,' and since Küchenmeister has himself declared that he was prepared to accept any name more suitable than his own, I have no scruples in using the name *Tænia saginata*" (Leuckart).—**Tænia megaloön**, Weinland. See *Tænia saginata*, Goeze.—**Tænia megalops**, Nitzsch, Neumann. Found in the intestine of the domestic duck.—**Tænia membranacea**, Pallas (1781), Batsch (1786). See *Bothriocephalus latus*, Bremser (1819).—**Tænia microstoma**, Dujardin, Diesing. This is found in the intestine of the house-mouse (*Mus musculus*, Linné), and of the house-rat (*Mus rattus*, Linné). The larva or finn occurs in the insect *Anisolabris annulipes*, Lucas.—**Tænia moniliformis**, Batsch, Gmelin. See *Tænia crassicollis*, Rudolphi (1819).—**Tænia moniliformis**, Pallas (1781), Schrank (1788). See *Tænia canina*, Linné (1767).— **Tænia murina**, Dujardin. A platode found in the intestine of the

brown rat (*Mus decumanus*, Pallas), and of the house-mouse (*Mus musculus*, Linné).—**Tænia musculi**, Rudolphi, Diesing. Syn., *Tænia tenella*, Pallas. Found in the abdominal cavity of the house-mouse (*Mus musculus*, Linné); a doubtful species.—**Tænia nana**, van Beneden (1861); *nec* Bilharz et von Siebold (1853). See *Tænia echinococcus*, von Siebold (1853).—**Tænia nana** (Bilharz), von Siebold (1853). Syn., *Diplacanthus nanus*, Weinland (1858); *Hymenolepis* (*Tænia*) *nana*, Leuckart (1863). A small species found in man, especially in children.—**Tænia nigra**, Laboulbène. A variety characterized by having a pigmented scolex. According to Blanchard it is nothing more than a *Tænia saginata* affected

TÆNIA NANA, von Siebold (× 10.) (*After Leuckart.*)



Head of TÆNIA NANA, von Siebold; with retracted rostellum. (× 75.) A. An isolated hook. (× 300.) (*After Leuckart.*)



Egg of TÆNIA NANA, von Siebold. (× 300.) (*After Leuckart.*)

with melanosis.—**Tænia osculis marginalibus oppositis**, Linné (1748). See *Tænia canina*, Linné (1767).—**Tænia osculis marginalibus solitariis**, Linné (1748), Bradley. See *Tænia solium*, Linné.—**Tænia ovilla**, Gmelin. See *Tænia marginata*, Batsch.—**Tænia ovilla**, Rivolta (1878). See *Thysanosoma giardi*, Rivolta (1868), Stiles (1893).—**Tænia ovina**, Goeze (1782), Batsch (1786), Schrank (1788), Gmelin (1789). See *Moniezia expansa*, R. Blanchard (1891).—**Tænia ovipunctata**, Rivolta (1874). See *Stilesia globipunctata*, Railliet (1893).—**Tænia passeris**, Gmelin. See *Tænia fringillarum*, Rudolphi.—**Tænia pectinata**, Goeze. This tapeworm (possibly the name includes several species) is found in the intestine and stomach of the domestic rabbit. The tapeworms of rabbits and hares, owing to their variable characters, have been grouped by Riehm into the following species: *Tænia rhopalocephala*, Riehm; *Tænia wimerosa*, Moniez; *Dipylidium latissimum*, Riehm; *Dipylidium leuckarti*, Riehm; *Dipylidium pectinatum*, Riehm.—**Tænia perfoliata**, Goeze, Schrank, Rudolphi, Bremser, Gurlt, Dujardin, Diesing, Neumann. Syn., *Tænia equina*, Pallas, Batsch, Gmelin; *Tænia quadrilobata*, Abildgaard; *Alyselminthus lobatus*, Zeder; *Halysis perfoliata*, Zeder. A platode found in the small intestine and colon of the horse.—**Tænia phasiani cochlici**, Rudolphi. See *Tænia infundibuliformis*, Goeze.—**Tænia plana pellucida**, Goeze (1782). See *Tænia solium* (Linné), Rudolphi (1810).—**Tænia plicata**, Rudolphi, Bremser, Gurlt, Dujardin Diesing, Neumann. Syn., *Tænia equina*, Pallas, Müller, Chabert; *Tænia magna*, Abildgaard; *Alyselminthus plicatus*, Zeder; *Halysis plicata*, Zeder. A form found in the small intestine and stomach of the horse.—**Tænia prima**, Plater (1603). See *Bothriocephalus latus*, Bremser (1819).—**Tænia proglottina**, Davaine. Found in the intestine of the domestic fowl. The larva or finn occurs in the snails, *Limax agrestis*, Linné, and *Limax variegatus*, Draper.—**Tænia pseudo-cucumerina**, Baillet. Syn., *Tænia cateniformis vulpis*, Borke *apud* Goeze, Schrank, Gmelin; *Tænia litterata*, Batsch, Rudolphi, Dujardin, Diesing; *Alyselminthus litteratus*, Zeder; *Halysis litterata*, Zeder. Found in the dog in Iceland.—**Tænia pseudo-elliptica**, Baillet. Syn., *Tænia litterata*, Goeze. Found in the cat. Resembles closely and is perhaps identical with the *Tænia pseudo-cucumerina*, Baillet, of the dog.—**Tænia pusilla**, Bellingham. See *Tænia imbricata*, Diesing.—**Tænia pusilla**, Goeze, Batsch, Schrank, Rudolphi, Dujardin, Diesing. Syn., *Tænia cucurbitina*, Pallas; *Tænia cateniformis*, *e Gilrium*, Gmelin; *Alyselminthus pusillus*, Zeder; *Halysis pusilla*, Zeder. Found in the small intestine of the brown rat (*Mus decumanus*, Pallas), and of the house-mouse (*Mus musculus*, Linné), and of the house-rat (*Mus rattus*, Linné), and in *Mus sylvaticus*.—**Tænia quadrilobata**, Abildgaard. See *Tænia perfoliata*, Goeze.—**Tænia ratti**, Rudolphi, Diesing. Found in the intestine of the house-rat (*Mus rattus*, Linné).—**Tænia relicta**, Zschokke. Found in the intestine of the brown rat (*Mus decumanus*, Pallas).—**Tænia rhinaria**, Pilger (1802). See *Linguatula rhinaria*, Railliet (1886).—**Tænia rhopaliocephala**, Riehm. See *Tænia pectinata*, Goeze.—**Tænia saginata**, Goeze (1782). Syn., *Tænia solium*,

Cephalic end of TÆNIA SAGINATA, Goeze; (A) in retracted, and (B) extended state. (*After Leuckart.*)

TÆNIA SAGINATA, Goeze. (*After Leuckart.*)

Linné, *pro parte* (1767); *Tænia cucurbitina*, Pallas, *pro parte* (1781); *Tænia inermis hominis*, Brera, *pro parte* (1802); *Pentastoma coarctata*, Virey (1823);

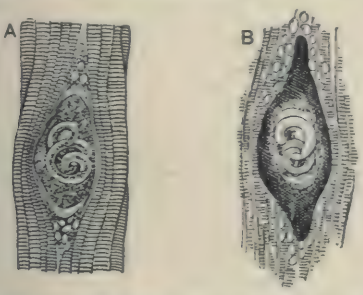
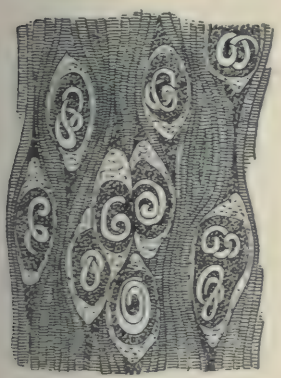
Cephalic end of TÆNIA SOLIUM, Linné. (*After Leuckart.*)

Küchenmeister's *Tænia mediocanellata* was in reality a *Tænia solium; Bewaffneter Bandwurm des Menschen*; *The Armed Tapeworm*. This tapeworm has been known as a parasite of man from the earliest times. It has been observed in all parts of Europe, but with remarkable differences in frequency, being relatively rare in Turkey in Europe, the Danubian provinces, Greece, Italy, France, Spain, and England. It is more frequent in Central Europe, in Germany and Austria, the prevalence of the parasite holding direct relation to the quantity of pork consumed. It is rare throughout Asia, Japan, Oceanica, and Africa. In North America it appears to be somewhat on the increase. It is very rare in Mexico and South America. The larva (*Cysticercus cellulosæ, Cysticercus tæniæ solii*, Leuckart *q. v.*) is found in the tissues of swine, dogs, cats, rats, and man, producing *measles* (*q. v.*).



Egg of TÆNIA SOLIUM, Linné. (× 300.) (*After Leuckart.*)

Tænia solium, var. **abietina,** Weinland (1858). See *Tænia saginata*, Goeze.—**Tænia solium,** var. **mediocanellata,** Diesing (1854). See *Tænia saginata*, Goeze (1782).—**Tænia stigmata lateralibus,** Bonnet. See *Tænia solium*, Linné.—**Tænia struthionis,** Houltayn. Found in the intestine of the ostrich (*Struthio camelus*).—**Tænia tenella,** Cobbold. This name was first applied to *Bothriocephalus latus* by Pallas and Retzius (1781), afterward by Cobbold to a small-sized *Tænia solium* (according to Chatin), which he held to be a distinct species and derived from a finn which he termed *Cysticercus ovis* (because found in the pseudo-measles of sheep); this in turn proved to be *Cysticercus tæniæ*.—**Tænia tenella,** Pallas. See *Tænia musculi*, Rudolphi.—**Tænia tenuicollis,** Günther, Moquin-Tandon. See *Tænia marginata*, Batsch.—**Tænia tetragona,** Molin. Found in the intestine of the domestic fowl.—**Tænia torquata,** Gmelin. See *Tænia sinuosa*, Rudolphi.—**Tænia trilineata,** Batsch, Rudolphi, Dujardin, Creplin. Syn., *Tænia lineata*, Bloch; *Tænia anatis, β lineata*, Gmelin; *Tænia longirostris*, Fröhlich; *Halysis trilineata*, Zeder. Found in the intestine of



the domestic duck.—**Tænia tropica,** Moquin-Tandon (1860). See *Tænia saginata*, Goeze (1782).—**Tænia umana armata,** Brera (1802–3). See *Tænia solium*, Linné.—**Tænia umbonata,** Molin. Found in the intestine of the house-mouse (*Mus musculus*, Linné). —**Tænia vasis nutritiis distinctis,** Bloch (1782). See *Moniezia expansa*, R. Blanchard (1891).—**Tænia vervicina,** Gmelin. See *Tænia marginata*, Batsch.—**Tænia veterum,** Spigel (1618). See *Bothriocephalus latus*, Bremser.—**Tænia visceralis socialis granulosa,** Goeze (1782). See *Tænia echinococcus*, von Siebold (1853), and *Echinococcus polymorphus*, Diesing (1851).—**Tænia vogti,** Moniez (1879). Syn., *Anoplocephala vogti*, Moniez (1891). A doubtful species reported as parasitic in sheep.—**Tænia vom Kap der guten Hoffnung,** Küchenmeister (1855) (the *Tænia capensis* of Moquin-Tandon). See *Tænia saginata*, Goeze.—**Tænia vulgaris,** Linné (1748), Werner (1782). See *Bothriocephalus latus*, Bremser (1819); and *Tænia solium* (Linné), Rudolphi (1810).—**Tænia wimerosa,** Moniez. Found in the wild rabbit. See *Tænia pectinata*, Goeze.—**Tæniarhynchus mediocanellatus,** Weinland (1855). See *Tænia saginata*, Goeze.—**Taon bruyant.** See *Tabanus bromius*, Linné.—**Taon d'automne.** See *Tabanus autumnalis*, Linné.—**Taon des bœufs.** See *Tabanus bovinus*, Linné.—**Taon noir.** See *Tabanus morio.* Latreille.—**Taon rustique.** See *Tabanus rusticus*, Fabricius.—**Tarsonemus intectus,** Karpelles. See *Tarsonemus monunguiculosus*, R. Blanchard.—**Tarsonemus monunguiculosus,** R. Blanchard (1889). Syn., *Crithoptes monunguiculosus*, Geber (1879); *Kritoptes monunguiculosus*, Geber (1884); *Acarus hordei*, Geber (1884); *Tarsonemus uncinatus*, Flemming (1884); *Tarsonemus intectus*, Karpelles. An acaridan which is frequently very troublesome to workers in barley.—**Tarsonemus uncinatus,** Flemming. See *Tarsonemus monunguiculosus*, R. Blanchard.—**Tavin,** the common name for the breeze-fly. Cf. *Tabanus sp.*—**Tawny Breeze-fly.** See *Tabanus fulvus*, Meigen.—**Trichomyza fusca,** Macquart. Syn., *Scatella urinaria*, Robineau-Desvoidy; *Mydæa vomiturationis*, Robineau-Desvoidy. A fly very common about urinals and water-closets, the larvæ being represented as pseudo-parasites, the possibility of which is not fully settled, but is unlikely. —**Tenebrio molitor,** Linné. Syn., *Ver de farine*, Fr.; *Mehlkäfer*, Müller, Ger.; *Meal-beetle, Flour-beetle.* The larva or meal-worm is reported as a facultative parasite in the nose, digestive tube, and urinary passages of man, by Bateman, Allen, Shaw, Foresters, Tulpius, Kellie, Pickells, Thomson, Traill, Gleadow, and Acrel.—**Ténia á anneaux courts,** Bonnet (1750). See *Bothriocephalus latus*, Bremser (1819).—**Ténia à épine,** Andry (1700). See *Bothriocephalus latus*, Bremser.—**Ténia algérien,** Redon. An anomalous pigmented form of *Tænia saginata*, Goeze.—**Ténia de la second espece,** Andry (1700). See *Bothriocephalus latus*, Bremser.—**Ténia fenêtré,** Masars de Cazeles. See *Tænia saginata*, Goeze.—**Ténia hybrida,** Brera. An anomalous form of *Tænia saginata.*—**Tenia inerme.** See *Tænia saginata*, Goeze.—**Ténia lancéole ou ver rhinaire,** Chabert (1787). See *Linguatula rhinaria*, Railliet (1886).—**Tentacularia subcompressa,** Zeder. See *Filaria lymphatica*, Moquin-Tandon.—**Terratas,** Röll (1852). See *Tænia echinococcus*, von Siebold (1853).—**Tetracotyle,** Filippi. See *Holostoma erraticum*, Rudolphi.—**Tetragulus caviæ,** Bosc (1810). See *Linguatula rhinaria*, Railliet (1886).—**Tetrameres hæmochrous,** Creplin (1846). See *Tropidocerca inflata*, Diesing (1861), and *Tropidocerca paradoxa*, Diesing.—**Tetranychus autumnalis,** Shaw. Syn., *Leptus autumnalis; Trombidium autumnalis.* The common "*harvest-bug*" of England and the *rouget* of the French, which has been incorrectly referred by Mégnin to *Trombidium holosericeum*, Fabricius. A minute, scarcely visible, spinning-mite, breeding upon plants, beans, currants, raspberries, gooseberries, etc, which it deserts whenever opportunity offers, to fasten on animals, having a special predilection for human beings, especially women and children. It causes severe itching. The mite is very abundant in England, Scotland, and on the continent of Europe, especially near the seashore. The larval hexapod is the form most often met with.—**Tetranychus molestissimus.** Syn., *Bicho colorado* of the Argentine Republic and Uruguay; a small, red *Acarus* that lives on the under surface of the leaves of *Xanthium macrocarpum;* it attacks man and other warm-blooded animals, causing insupportable itching.—**Tetranychus tlalsahuate,** Lemaire, Murray (1867); a mite called by the Indians of Mexico *Tlalsahuate.* It lives among the herbage and is almost imperceptible to the naked eye. It attacks man and fixes itself upon the eyelids or armpits, etc. It is included by authors under the spurious genus *Leptus.*—**Tetrastoma renalis,** Lucarelli and Della Chiaje. A trematode found in the urinary tubules of an Italian woman.—**Texas Screw-worm.** See *Lucilia macellaria*, Robineau-Desvoidy. —**Thecosoma hæmatobium,** Moquin-Tandon. See *Gynæcophorus hæmatobius*, Diesing.—**Thelazia rhodesii,** Desmarest. See *Filaria equina*, Abildgaard. —**Threadworm.** See *Oxyuris vermicularis*, Bremser.—**Thysanosoma actinioides,** Diesing (1834), Stiles (1892). Syn., *Tænia fimbriata*, Diesing (1850); *Moniezia fimbriata*, Moniez (1891). This is found in sheep and several species of deer. It appears to be the cause of much of the tapeworm-disease of the western United States.—**Thysanosoma giardi,** Rivolta (1878), Stiles (1893). Syn., *Tænia ovilla*, Rivolta (1878); *Tænia giardi*, Moniez (1879); *Tænia aculeata*, Perroncito (1882); *Moniezia ovilla*, Moniez (1891); *Moniezia ovilla*, var. *macilenta*, Moniez (1891). This cestode has sheep and cattle for its hosts.—**Tinea rotunda,** Plinius. See *Ascaris lumbricoides*, Linné (1758).—**Tipula sp.** A fly, the larvæ of which are reported by Kirby (England) as facultative human parasites.—**Tique,** Raspail. See *Dermanyseus avium*, de Geer, and *Sarcopsylla penetrans*, Westwood.—**Tique des chiens,** Geoffroy. See *Ixodes ricinus*, Linné.—**Tique senegalaise.** See *Ixodes algeriensis*, Mégnin.—**Tlalsahuate.** See *Tetranychus tlalsahuate*, Lemaire.—**Todtenkäfer.** See *Blaps mortisaga*, Linné.—**Ton.** See *Sarcopsylla penetrans*, Westwood.—**Torcel.** See *Dermatobia noxialis*, Goudot.—**Trichina affinis,** Diesing, Herbert, Küchenmeister, Wedl, Leidy. Found encapsulated in the connective tissue and muscles of the hog, cat, dog, mole, badger, gull, buzzard, and crane.—**Trichina circumflexa,** Polonio. Found encapsulated in the peritoneum of the brown rat (*Mus decumanus*, Pallas). —**Trichina contorta,** Botkin. See *Tylenchus putrefaciens*, Kühn.—**Trichina cystica,** Salisbury (1858). See *Filaria sanguinis hominis*, Lewis (1872).—**Trichina papillosa,** Rivolta and Delprato. These nematodes were found encysted in the connective tissue about the esophagus, crop, and gizzard of the fowl. To this species probably belongs the *Disparagus spiralis*, Molin.—**Trichina spiralis,** Owen (1835). Syn., *Vibrio humana*, Lizars (1843); *Trichina spiralis*, Bischoff (1840); *Pseudalius trichina*, Davaine (1862). The adult parasite is

found in the intestines, and the larvæ encapsuled in the connective tissue of all warm-blooded animals, especially man, the hog, dog, cat, mouse, and rat.

TRICHINA SPIRALIS, Owen; (A) encapsulated with connective tissue covering (*in situ*); (B) calcified. (*After Leuckart.*)

Leidy (1846) was the first to discover this parasite in the hog, the source from which man is infected.—**Trichina spiralis,** Bischoff (1840). See *Trichina spiralis,* Owen (1835).—**Trichocephalus,** Gœze (1782). See *Trichocephalus hominis,* Schrank (1788).—**Trichocephalus affinis,** Rudolphi. Found in the large intestine of the domestic sheep, goat, cattle, dromedary, and Bactrian camel.—**Trichocephalus campanula,** von Linstow. Found in the intestine of the domestic cat.—**Trichocephalus crenatus,** Rudolphi. Found in the large intestine of the hog.—**Trichocephalus depressiusculus,** Rudolphi. Found in the cecum of the dog and ferret.—**Trichocephalus dispar,** Rudolphi (1801). See *Trichocephalus hominis,* Schrank (1788).—**Trichocephalus echinophyllus,** Nitzsch. Found in the intestine of the dromedary.—**Trichocephalus hominis,** Schrank (1788). Syn., *Trichuris,* Büttner (1761); *Ascaris trichiura,* Linné (1771); *Trichocephalus,* Gœze (1782); *Trichocephalus simiæ patas,* Treutler (1793); *Trichocephalus dispar,* Rudolphi (1801); *Mastigodes hominis,* Zeder (1803); *Mastigodes simiæ,* Zeder (1803); *Trichocephalus lemuris,* Rudolphi (1819); *Trichocephalus palæformis,* Rudolphi(1819). This parasite of the human intestine is much more common than is generally suspected by physicians, owing to the tenacity with which the worms adhere to the mucous membrane. Recent investigations prove that many cases of obscure and persistent anemia may be traced to its presence by a search for the eggs in the feces.

TRICHINOSED PORK. (× 30.) (*After Leuckart.*)

TRICHOCEPHALUS HOMINIS, Schrank (*in situ.*) (*After Leuckart.*)

—**Trichocephalus lemuris,** Rudolphi (1819). See *Trichocephalus hominis,* Schrank (1788).—**Trichocephalus nodosus,** Rudolphi. Found in the cecum of the house-mouse (*Mus musculus,* Linné) and of the house-rat (*Mus rattus,* Linné).—**Trichocephalus palæformis,** Rudolphi (1819). See *Trichocephalus hominis,* Schrank (1788).—**Trichocephalus serratus,** von Linstow. Found in the intestine of the domestic cat.—**Trichocephalus simiæ patas,** Treutler (1793). See *Trichocephalus hominis,* Schrank (1788).—**Trichocephalus unguiculus,** Rudolphi. Found in the intestine, especially the cecum of the wild and domestic rabbit and hare.—**Trichodectes canis,** de Geer. See *Trichodectes latus,* Nitzsch.—**Trichodectes capræ,** Packard, Gurlt. See *Trichodectes climax,* Nitzsch.—**Trichodectes climax,** Nitzsch. Syn., *Trichodectes capræ,* Gurlt, Packard; *Trichodectes solidus,* Rudow; *Trichodectes mombricus,* Rudow; *Petit pou de la chèvre, Goat-louse.* The common goat-louse frequent on the goat (*Capra hircus,* Linné).—**Trichodectes crassipes,** Rudow. Syn., *Trichodectes penicillatus,* Piaget. Found on the Angora goat and kangaroo (*Macropus penicillatus*).—**Trichodectes equi,** Denny (1842). Syn., *Trichodectes parumpilosus,* Piaget (1880), varieties *ocellata* and *tarsata.*—**Trichodectes latus,** Nitzsch, Burmeister, Denny, Piaget. Syn., *Ricinus canis,* de Geer; *Trichodectes canis,* de Geer; *Pediculus setosus,* Olfers; *Pediculus canis,* O. Fabricius (?); *Gros pou du chien; Hunde-Haarling; Dog-louse.* Found on dogs, especially puppies, mostly on the head and neck. This louse is the host of the finn (*Cryptocystis trichodectis,* Villot) of the tapeworm of the dog (*Tænia canina*), Linné.—**Trichodectes limbatus,** Gervais. See *Trichodectes climax,* Nitzsch.—**Trichodectes mombricus,** Rudow. See *Trichodectes climax,* Nitzsch.—**Trichodectes ovis.** See *Trichodectes sphærocephalus,* Nitzsch.—**Trichodectes parumpilosus,** Piaget (1880). See *Trichodectes equi,* Denny (1842).—**Trichodectes penicillatus,** Piaget. See *Trichodectes crassipes,* Rudow.—**Trichodectes pilosus,** Giebel. Syn., *Pediculus equi,* Linné. The louse of the horse and ass.—**Trichodectes pubescens.** See *Trichodectes equi,* Denny.—**Trichodectes pubescens,** Neumann. *Louse of the Horse; Petit pou du cheval.* Found on the domestic horse, Burchell's zebra, and the small horses of Java.—**Trichodectes quadricornis,** Gay (Neumann, 1890). A louse of the horse.—**Trichodectes scalaris,** Nitsch, Piaget. Syn., *Pediculus bovis,* Linné; *The Biting Louse*; *Petit pou du bœuf.* Found on cattle.—**Trichodectes solidus,** Rudow. See *Trichodectes climax,* Nitsch.—**Trichodectes sphærocephalus,** Nitzsch, Piaget. Syn., *Trichodectes ovis, Pediculus ovis,* Linné. *The Sheep-louse; Schaf-Haarling.* The adults lay their eggs at the base of the wool fibers; no other host is known.—**Trichodectes subrostratus,** Nitzsch, Piaget. Syn., *Pou du chat; Cat-louse.* The only louse found on the cat.—**Trichodes crassicauda,** Bellingham. See *Trichosoma crassicauda,* Bellingham.—**Trichomonas caudata,** Steinberg. An infusorian found in the human mouth.—**Trichomonas caviæ,** Davaine (1875). Syn., *Cimænomonas caviæ,* Grassi. An infusorian found in the intestine of the guinea-pig.—**Trichomonas columbæ,** Railliet. An infusorian intestinal parasite of the pigeon.—**Trichomonas eberthi,** Neumann. Found by Eberth in the fowl and in the glands of Lieberkühn of the duck. Neumann holds that the *Monocercomonas anatis* of Davaine may be identical with this species.—**Trichomonas elongatus,** Steinberg. Found in the human mouth.—**Trichomonas evansi,** Crook-

shank. See *Trypanosoma evansi*, Balbiana.—**Trichomonas flagellata**, Steinberg. Found in the human mouth.—**Trichomonas intestinalis**, Leuckart. Syn., *Cercomonas intestinalis*, Marchand (1875). This infusorian has been frequently found by Grassi in human dejections in cases of acute and subacute diarrhea, and in cases of typhoid fever and enteritis by Marchand and Zenker.—**Trichomonas irregularis**, Salisbury (1868). See *Cystomonas urinaria*, R. Blanchard (1885).—**Trichomonas suis**, Davaine. A flagellate infusorian parasite in the stomach of the pig.—**Trichomonas vaginalis**, Donné. Found abundantly in the acid mucus of the human vagina.—**Trichonema arcuata**, Cobbold. See *Sclerostoma tetracantha*, Diesing.—**Trichosoma ærophilum**, Creplin. Syn., *Eucoleus ærophilus*, Creplin. A filiform worm found in the trachea and bronchi of the cat, fox, and marten.—**Trichosoma annulatum**, Molin. This is found beneath the esophageal membrane of the domestic fowl.—**Trichosoma annulosum**, Dujardin. This is found in the small intestine and duodenum of the brown rat (*Mus decumanus*, Pallas), and the house rat (*Mus rattus*, Linné).—**Trichosoma bacillatum**, Eberth. This is found in the esophagus of the house-mouse (*Mus musculus*, Linné).—**Trichosoma brevicolle**, Rudolphi. This is found in the intestine and cecum of the domestic goose.—**Trichosoma collare**, von Linstow. Occasionally found in great quantities in the intestine of the domestic fowl.—**Trichosoma columbæ**, Rudolphi. See *Trichosoma tenuissima*, Diesing.—**Trichosoma contortum**, Creplin. A nematode found in the intestine of ducks, causing a disease termed by Railliet and Lucet (1890) "ingluvial indigestion."—**Trichosoma crassicauda**, Bellingham. Syn., *Trichodes crassicauda*, Bellingham. Found in the urinary bladder and ureter of the brown rat (*Mus decumanus*).—**Trichosoma felis cati**, Bellingham. Found in the urinary bladder of house-cats by Wedl, and in wild-cats by Bellingham.—**Trichosoma lineare**, Leidy (1856). Found in the small intestine of the domestic cat.—**Trichosoma longicolle**, Rudolphi. Found in the large intestine and cecum of the domestic fowl; not frequent.—**Trichosoma muris musculi**, Creplin. Found in the large intestine of the house-mouse (*Mus musculus*, Linné).—**Trichosoma papillosum**, Polonio. Found in the urinary bladder of the brown rat (*Mus decumanus*, Pallas).—**Trichosoma papillosum**, Wedl. Found in the intestine of domestic sheep. Curtice holds it to be the young of *Strongylus filicollis*, Rudolphi.—**Trichosoma plica**, Rudolphi. Found in the urinary bladder of the dog, fox, and wolf.—**Trichosoma schmidtii**, von Linstow. Found in the urinary bladder of the brown rat (*Mus decumanus*, Pallas).—**Trichosoma tenuissima**, Diesing. Syn., *Trichosoma columbæ*, Rudolphi; *Calodium tenue*, Dujardin. Found in the large intestine of the domestic dove; it induces extreme anemia.—**Trichuris**, Bütner (1761). See *Trichocephalus hominis*, Schrank (1788).—**Trinoton conspurcatum**, Nitzsch, Denny, Piaget. Syn., *Pediculus anseris*, Sultzer; *Trinotum conspurcatum*, Burmeister. One of the largest of the lice found on domestic animals, common on the goose and swan, particularly the latter.—**Trinoton continuum**, Piaget. Probably only a variety of the preceding species.—**Trinoton lituratum**, Nitzsch, Denny, Piaget. Syn., *Ricinus stirnæ hirundinis*, Linné; *Trinotum lituratum*, Burmeister; *Trinoton squalidum*, Denny; *Trinotum squalidum*, Verrill. Found with other species on geese (*Dendrocygna arborea*, *Anser albifrons*, *Anas clypeata*).—**Trinoton luridum**, Nitzsch, Denny, Piaget. Found on the domestic duck.—**Trinoton squalidum**, Denny. See *Trinoton lituratum*, Nitzsch.—**Trinotum conspurcatum**, Burmeister. See *Trinoton conspurcatum*, Nitzsch.—**Trinotum squalidum**, Verrill. See *Trinoton lituratum*, Nitzsch, Denny, Piaget.—**Trombidium americanum.** The true American harvest-mite, with eight legs, sometimes confounded with the hexapod stage of a species of *Tetranychus*, under the name of *Leptus irritans*.—**Trombidium autumnalis.** See *Tetranychus autumnalis*, Shaw.—**Trombidium cinereum.** The hexapod larva of this or some closely allied species is reported as a pseudoparasite of man.—**Trombidium holosericum**, Fabricius. According to Mégnin it is the larval hexapod of this species which has long been designated as *Rouget*, *Red Flea*, *Harvest-bug*, *Leptus autumnalis*, etc. This is a mistake, as this hexapod is the larva of *Tetranychus autumnalis*, Shaw, *q. v.*—**Tropidocerca fissispina**, Diesing (1855), von Linstow (1879). Syn., *Tetrameres sp.*, Leuckart (1860). A nematode found in the mucous membrane of the proventriculus of the duck (*Anas boschas domesticus*).—**Tropidocerca inflata**, Diesing (1861). Syn., *Spiroptera inflata*, Mehlis, Creplin; *Tetrameres hæmochrous*, Creplin (1846); *Tropidocerca paradoxa*, Diesing (*partim*) 1851). Found in the proventriculus of the domestic duck.—**Tropidocerca paradoxa**, Diesing (1851). Syn., *Tropisurus paradoxus*, Diesing; *Spiroptera inflata*, Mehlis, Creplin (1846); *Tetrameres hæmocrous*, Creplin (1846). Found in the proventriculus of several birds, among them the domestic duck. The worm discovered by Simonds, and named *Simondsia paradoxa* by Cobbold (1864), is referred to this species by some writers, but it seems improbable that this is warranted, as the worm was found in a hog, whereas the entire genus of *Tropidocerca* seems to be parasitic only in birds.—**Trout-leech.** See *Hirudo troctina*, Johnson.—**Trypanosoma evansi**, Balbiani. Syn., *Spirochæte evansi*, Steel; *Trichomonas evansi*, Crookshank; *Hæmatomonas evansi*, Osler; *Surra Parasite.* The cause of the very serious epizoötic pernicious anemia in horses, mules, and camels, called *Surra*, prevailing in India and Southern Asia. Rankin recommends large doses of quinin frequently in milk, with iron and arsenic, at the commencement of the disease.—**Trypanosoma lewisi**, Danilewsky (Saville Kent). Syn., *Herpetomonas lewisi*, Saville Kent. A pale, translucent, motile, flagellate hematozoön found by Lewis in the blood of the rat. Kent suggests, on the grounds of the particular position of the flagellum, that further investigation may demonstrate this to be one of the spermatic elements of minute nematodes, microfilariæ, or other endoparasitic forms. Danilewsky calls attention to the similarity between this form and that described by him in the blood of birds.—**Trypsoderma cuniculi**, Wiedemann (1830). See *Cuterebra cuniculi*, Clark (1815).—**Tsé-tsé, Tse-tsefliege**, Ger.; **Tse-tsevlieg**, Dutch. See *Glossina morsitans*, Westwood (it closely resembles *Stomoxis calcitrans*); abundant in Central Africa.—**Tunga.** See *Sar-*

TRICHOMONAS INTESTINALIS, Leuckart. (*From Leuckart, after Zenker.*)

TRICHOMONAS VAGINALIS, Donné. (*From Leuckart, after Kölliker.*)

copsylla penetrans, Westwood. — **Turicatas.** See *Argas turicata*, Dugés. — **Turkey-gnat.** See *Simulium meridionale*. — **Tylenchus contorta,** Kühn. Syn., *Trichina contorta*, Botkin. An occasional parasite of man.—**Tyroglyphus echinopus,** Fumouze et Robin. See *Cæpophagus echinopus*, Mégnin.—**Tyroglyphus mericourti,** Laboulbène. A singular mite with enormous palpi, found on man by Le Roy de Méricourt.—**Tyroglyphus siro,** Latreille (1806). Syn., *Acarus dysenteriæ*, Linné. Common in flour, cheese, etc. Reported as the cause of gastric catarrh in a person who preferred cheese containing these mites. Cases of diarrhea due to them are also recorded. Burke also describes, under the name of *Stomatitis pustulosa acarosa*, an affection of horses caused by eating bran containing these mites. —**Unarmed Tenia of Man, Unbewaffneter Bandwurm des Menschen.** See *Tænia saginata*, Goeze.—**Uncinaria balsami,** Parona and Grassi. See *Uncinaria trigonocephali*, Rudolphi.—**Uncinaria cernua,** Creplin. Syn., *Monodontus woedli*, Molin. Found in the small intestine of the domestic sheep.—**Uncinaria duodenalis,** Railliet (1885). See *Dochmius duodenalis*, Leuckart (1876).—**Uncinaria radiata,** Rudolphi. Syn., *Strongylus radiatus*, Rudolphi; *Strongylus venulosus*, Rudolphi. Found in the intestine and duodenum of cattle and goats.—**Uncinaria stenocephala,** Railliet. Syn., *Ankylostomum stenocephalum*; *Dochmius stenocephalus*. Found in dogs, along with *Uncinaria trigonocephalus*; it appears to play as active a part as its congener in the development of anemia in packs of sporting-dogs (Neumann). —**Uncinaria trigonocephala,** Rudolphi. Syn., *Ankylostomum trigonocephalum*, Rudolphi; *Ankylostomum tubuforme*, Zeder; *Dochmius trigonocephalus*, Rudolphi; *Dochmius balsami*, Parona; *Uncinaria vulpis*, Frölich; *Strongylus vulpis*, Zeder. Found in the small intestine of the dog and cat, producing a not uncommon anemia known as "Pernicious Anemia of Packs of Hounds," attended with bleeding at the nose, edematous and indolent engorgement of the limbs, persistent diarrhea, loss of appetite, and emaciation. Greatest care as to cleanliness of kennels and food, and thymol as a vermicide are recommended. This parasite also gives rise to a pernicious anemia of cats, prevalent in Italy.—**Uncinaria vulpis,** Frölich. See *Uncinaria trigonocephala*, Rudolphi (Neumann). —**Ungarische Blutegel.** See *Hirudo medicinalis*, Ray.—**Ura.** See *Dermatobia noxialis*, Goudot.—**Utricules of Miescher.** See *Sarcocystis miescheri*, R. Lankester.—**Veine de Medine,** Fr.; **Vena medinensis,** Veloch (1674). See *Dracunculus medinensis*, Lister.—**Ver cutanée des marchais; Ver de Guinée dragonneau.** See *Dracunculus medinensis*, Cobbold.—**Ver de farine.** See *Tenebrio molitor*, Linné.—**Ver rhinaire,** Chabert. See *Linguatula rhinaria*, Railliet.—**Ver solitaire,** Andry. Applied by Andry to his *Solium*, which was in reality *Tænia saginata, q. v.*—**Verme auricolare,** Ital. See *Forficula auricularia*, Linné.—**Vermes cucurbitini.** See *Tænia saginata*, Goeze.—**Vermis cucurbita,** Plater. See *Tænia solium*, Linné.—**Vermis medinensis,** Grundler (1740). See *Dracunculus medinensis*, Cobbold.—**Vers sortis des reins et de l'urèthre,** Moublet. See *Eustrongylus gigas*, Bremser. **Vesicaria granulosa,** Schrank. See *Echinococcus polymorphus*.—**Vibrio humana,** Lizars (1843). See *Trichina spiralis*, Owen (1843).—**Viehbremse.** See *Gastrophilus pecorum*, Fabricius.—**Vituli aquaticus,** Aldrovandi (1605). See *Gordius aquaticus*, Dujardin (1842).—**Vogelfloh.** See *Pulex avium*, Taschenberg.—**Wandlaus.** See *Cimex lectuaria*, Linné.—**Warble-fly.** See *Hypoderma bovis*, Latreille.—**Warega Fly.** See *Musca sp.*—**Western Deertick.** See *Dermacenior occidentalis*, Linné.—**Whip-worm of Ruminants.** See *Tricocephalus affinis*, Rudolphi. **White-footed Breeze-fly.** See *Tabanus albipes*, Fabricius.—**Zanzara comune,** Ital. See *Culex pipiens*.—**Zeylonischer Blutegel.** See *Hæmadipsa ceylonica*.—**Zimb.** See *Glossina morsitans*, Westwood; also *Pangonia*.

Parasitic (*par-as-it'-ik*) [παρασιτικός, parasitic]. In biology, of, or pertaining to, a parasite; holding the position of a parasite. In ornithology, applied to such birds as deposit their eggs in the nests of other birds, to which are left the duties of incubation and care of the young (*e.g.*, the European cuckow, *Cuculus canorus*, Linné, the American Cow Black-bird, *Molobrus pecoris*); also to such birds as obtain their food by systematically robbing other species (*e.g.*, the Parasitic Jaeger, *Stercorarius parasiticus* and the Bald Eagle, *Haliætus leucocephalus*). **P. Castration,** sterility in plant or animal induced by a parasite. **P. Disease,** one due to the presence of parasites. **P. Hemoptysis,** hemoptysis associated with cough, due to the presence of a trematode, or fluke, the *Distoma ringeri* in the bronchial tubes. It is a disease of China, Japan, and Formosa. See *Parasites* (*Animal*), *Table of*. **P. Male,** applied to the male of certain invertebrates which lives upon, and is nourished by, the female; *e.g.*, the microscopic male of the crustacean *Lernæa*, which becomes practically a spermatophore, and the diminutive *Turbellaria*-like ciliated male of the vermian *Bonellia*, which establishes itself upon the sexual organs of the female. **P. Plant,** a plant deriving its nourishment from another plant or from another organism; a bacterium. **P. Twin,** an autosite.

Parasiticide (*par-as-it'-is-id*) [παρά, beside; σῖτος, food; *cædere*, to kill]. Any substance destructive of parasites.

Parasitism (*par'-as-it-izm*) [παρά, beside; σῖτος, food]. The relation which a parasite bears to its host; infestation by parasites.

Parasitize (*par'-as-it-īz*) [παρά, beside; σῖτος, food]. To infest; the act of one organism becoming parasitic within or upon another.

Parasitogenesis (*par-as-it-o-jen'-es-is*) [παρά, beside; σῖτος, food; γένεσις, genesis]. 1. The formation of parasites. 2. A bodily condition favoring the development of parasites.

Parasitogeny (*par-as-it-oj'-en-e*). Same as *Parasitogenesis*.

Parasitoid (*par'-as-it-oid*) [παρά, beside; σῖτος, food; εἶδος, like]. Parasitic; like a parasite.

Parasitologist (*par-as-it-ol'-o-jist*) [παρά, beside; σῖτος, food; λόγος, science]. One versed in parasitology.

Parasitology (*par-as-it-ol'-o-je*) [παρά, beside; σῖτος, food; λόγος, science]. The science, or study, of parasites.

Parasitosis (*par-as-it-o'-sis*) [παρά, beside; σῖτος, food; νόσος, disease]. Any disease dependent upon the presence of parasites. The development of a parasitic disease.

Parasorbic Acid (*par-as-or'-bik*), $C_6H_8O_2$. An oily liquid, of unpleasant odor, obtained in the production of malic acid from the berries of the mountain-ash.

Paraspadia (*par-as-pa'-de-ah*) [παρά, beside; σπάειν, to draw]. An opening of the urethra, usually congenital, on one side of the penis.

Parasphagis (*par-as'-faj-is*) [παρά, beside; σφαγή, throat]. The region about the throat.

Parasphenoid (*par-as-fe'-noid*) [παρά, beside; σφήν, wedge; εἶδος, form]. In biology: (*a*) Located along-

side or under the sphenoid. (*b*) A membrane-bone occupying the position of the sphenoid bone proper in the *Sauropsida*. (*c*) A mesal bone articulating with the vomer in amphibians and fishes.

Parastata (*par-as'-tat-ah*) [παραστάτης, epididymis]. Synonym of *Epididymis*.

Parastatadenitis (*par-as-tat-ad-en-i'-tis*). Synonym of *Epididymitis*.

Parastatitis (*par-as-tat-i'-tis*). Synonym of *Epididymitis*.

Parasteatosis (*par-as-te-at-o'-sis*) [παρά, beside; στέαρ, a hard fat]. Fatty degeneration attended with an altered sebaceous secretion.

Parastemon (*par-as-te'-mon*) [παρά, about; στήμων, the warp of a web]. Same as *Staminodeum*.

Parasternal (*par-as-ter'-nal*) [παρά, beside; στέρνον, sternum]. Beside or near the sternum. **P. Line,** the imaginary vertical line midway between the margin of the sternum and the line passing through the nipple. **P. Region,** the region between the sternal margin and the parasternal line.

Parastichy (*par-as'-tik-e*) [παρά, about; στίχος, a row, line, rank: *pl.*, *Parastichies*]. In biology, a whorl or spiral row of organs. Cf. *Orthostichy*.

Parastigma (*par-as-tig'-mah*) [παρά, beside; στίγμα, a prick, spot: *pl.*, *Parastigmata*]. In biology, a chitinous spot on the wings of an insect.

Parastigmatic (*par-as-tig-mat'-ik*) [παρά, beside; στίγμα, a spot]. 1. Of, or pertaining to, the parastigma. 2. Situated beside the stigma of an insect's wing.

Parastramnia, Parastremma (*par-as-tram'-ne-ah, par-as-trem'-ah*) [παραστρέφειν, to twist]. Distortion of the mouth or face.

Parastrepsis (*par-as-trep'-sis*). Synonym of *Subluxation*.

Parastyle (*par'-as-tīl*) [παρά, beside; στῦλος, a pillar]. In biology, an abortive style.

Parasynovitis (*par-as-in-o-vi'-tis*) [παρά, about; σύν, with; *ovum*, egg; ιτις, inflammation]. Inflammation of the structures about a joint.

Parasyphilitic (*par-as-if-il-it'-ik*) [παρά, beside; σύφιλις, syphilis]. Not unlike syphilis, or in some way resembling syphilis.

Parasystole (*par-as-is'-to-le*) [παρά, beside; συστολή, systole]. The interval between the cardiac systole and the diastole.

Paratarsia (*par-at-ar'-se-ah*) [παρά, beside; ταρσός, tarsus]. Ectopia of the tarsus.

Paratarsial (*par-at-ar'-se-al*) [παρά, beside; ταρσός, tarsus]. Pertaining to the paratarsium.

Paratarsium (*par-at-ar'-se-um*) [παρά, beside; ταρσός, the sole of the foot: *pl.*, *Paratarsia*]. In biology, applied to the side of the tarsus of a bird to distinguish it from the acrotarsium.

Paratartaric (*par-at-ar-tar'-ik*) [παρά, beside; *tartarum*, tartar]. Resembling tartaric acid. **P. Acid.** Synonym of *Acid, Racemic*.

Paratela (*par-at-e'-lah*) [παρά, beside; *tela*, a web]. The tela of the lateral ventricle of the brain.

Parateresiomania (*par-at-er-es-e-o-ma'-ne-ah*) [παρατήρησις, observation; μανία, madness]. A mania for observing, or seeing new sights.

Parathenar (*par-ath-e'-nar*) [παρά, beside; θέναρ, the flat of the foot]. Applied to the abductor and flexor brevis muscles of the little toe.

Parathymia (*par-ath-i'-me-ah*) [παρά, beyond; θυμός, mind]. Mental strain, or overwork.

Parathyroid (*par-ath-i'-roid*) [πάρα, beside; θυρεός, a shield; εἶδος, like]. Lying beside the thyroid gland.

Paratoloid (*par-at'-o-loid*). A synonym of *Tuberculin*. See *Lymph*.

Paratoluidin (*par-at o-lu'-id-in*) [παρά, beside; *toluidin*]. A so-called aromatic, or benzyl-compound resembling toluidin, and derived from coal-tar. It has been proposed as a remedy in tuberculosis.

Paratolyl (*par-at'-o-lil*). A liquid with a strong odor, inducing, when inhaled, headache and epistaxis. It is also called *Phosphene*.

Paratomial (*par-at-o'-me-al*) [παρά, beside; ταμεῖν, to cut]. Pertaining to the paratomium.

Paratomium (*par-at-o'-me-um*) [παρά, beside; ταμεῖν, to cut: *pl.*, *Paratomia*]. In biology, applied to the side of the upper mandible, to distinguish it from the *culmen* and *tomium*.

Paratonia (*par-at-o'-ne-ah*) [παρά, beside; τόνος, stretching]. In biology, over-extension; excessive tension.

Paratonic (*par-at-on'-ik*) [παρά, beside; τείνειν, to stretch]. In biology, Sachs' term for states of depressed activity in plants.

Paratopia (*par-at-o'-pe-ah*) [παρά, beside; τόπος, place]. Displacement.

Paratremma (*par-at-rem'-ah*). Synonym of *Paratrimma*.

Paratrichosis (*par-at-rik-o'-sis*) [παρά, beside; θρίξ, hair]. Trichosis characterized by an excessive growth of imperfect hair, or by growth in abnormal places.

Paratrimma (*par-at-rim'-ah*) [παρά, along; τρίβειν, to rub]. Intertrigo. Chafing. See *Erythema*.

Paratriptic (*par-at-rip'-tik*) [παρά, beside; τρίβειν, to rub]. Rubbing together; increasing waste.

Paratrope (*par-at'-ro-pe*) [παρά, beside; τρέπειν, to turn]. Twisting of a limb.

Paratrophy (*par-at'-ro-fe*) [παρά, beside; τροφή, nutrition]. Perverted or abnormal nutrition.

Paratyphlitis (*par-at-if-li'-tis*) [παρά, beyond; τῦφλος, blind; ιτις, inflammation]. Inflammation of the extraperitoneal and post-cecal connective tissue. It is always secondary to typhlitis. The tumor in the right iliac fossa is frequently concealed by intestinal folds that are filled with air and mask the dulness on percussion. The term is going out of use, and is being replaced by appendicitis.

Parauchenium (*par-aw-ke'-ne-um*) [παρά, beside; αὐχήν, neck]. In biology, the lateral cervical region.

Paraumbilical (*par-ah-um-bil'-ik-al*) [παρά, beside; ὀμβιλικός, umbilicus]. Near the navel.

Paravaginitis (*par-av-aj-in-i'-tis*) [παρά, beside; *vagina*, vagina; ιτις, inflammation]. Inflammation of the connective tissue surrounding the vagina.

Paravertebral (*par-av-er'-te-bral*) [παρά, beside; *vertebra*, vertebra]. Situated near the spinal column.

Paravesical (*par-av-es'-ik-al*) [παρά, beside; *vesica*, bladder]. Situated near the urinary bladder. **P. Pouch,** the peritoneal pocket on either side of the bladder.

Paraxanthin (*par-az-an'-thin*) [παρά, beyond; ξανθός, yellow], $C_7H_8N_4O_2$. A leukomain discovered in 1883, and since shown to be a normal constituent of urine, though present in very small quantities. It was formerly called *urotheobromin*. Paraxanthin is isomeric with theobromin, also with dioxy-dimethyl-purpurin; it is, therefore, a dimethyl-xanthin. It crystallizes readily in characteristic flat, somewhat irregular, six-sided tables when its solutions are slowly evaporated, or in needles if rapidly evaporated. See *Leukomains*.

Paraxial (*par-aks'-e-al*) [παρά, beside; ἄξις, axis]. Lying near the axis of the body. A descriptive term applied to certain muscles, which, in the *Bimana*, are represented by the intercostal and abdominal muscles.

Paraxon (*par-aks'-on*) [παρά, beside; ἄξων, axis]. One of the first branches of an axis cylinder, a collateral.

Paraxylene (*par-aks'-il-ēn*) [παρά, beside; ξύλον,

wood]. *Paradimethylbenzene;* a hydrocarbon found in xylol.

Paraxylorcinol (*par-aks-il-or'-sin-ol*) [παρά, beside; ξύλον, wood; *orcinol*], $C_8H_{10}O_2$. A crystalline body melting at 163° C; chemically, it is dihydroxylene.

Parazoe (*par-az-o'-e*) [παρά, beside; ζῷον, animal]. A disease characterized by the presence of adult parasites.

Parazygosis (*par-az-i-go'-sis*) [παρά, beside; ζυγεῖν, to yoke]. The condition of a double monster in which there is union of the trunks above the umbilicus. It includes xiphopagus, thoracopagus, and pleuropagus.

Parchment (*parch'-ment*) [ME., *parchement*, parchment]. See *Leather*. **P.-crackling**, the peculiar sound elicited by pressure on the cranial bones in children the subjects of rickets and congenital syphilis. It is due to a localized hypertrophy of the bones. **P.-glue.** See *Glue*. **P.-induration**, a form of chancre, or primary lesion of syphilis, in which the induration is parchment-like in feel. **P.-skin.** See *Xeroderma*.

Parcidentate (*par-sid-en'-tāt*) [*parcus*, sparing; *dens*, tooth]. In biology, having relatively few teeth.

Parecceloma (*par-ek-se-lo'-mah*) [παρά, beside; ἐκ, out; κοῖλος, hollow]. A cavity produced by disease.

Pareccrisis (*par-ek'-ris-is*) [παρά, aside; ἐκ, out; κρῑνειν, to separate]. A disorder of a secretion.

Parecious, Parœcious (*par-e'-she-us*) [παρά, beside; οἶκος, house]. In biology, having male and female organs developed side by side.

Parecism, Parœcism (*par'-es-izm*) [παρά, beside; οἶκος, house]. In biology, the state or condition of being parecious.

Parectama (*pa-ek'-tam-ah*). Synonym of *Parectasis*.

Parectasis (*par-ek'-tas-is*) [παρά, beyond; ἔκτασις, a stretching out]. Excessive stretching or dilatation.

Paregoric (*par-e-gor'-ik*) [παρηγορικός, consoling]. 1. Soothing, or assuaging. 2. A soothing remedy. **P., Elixir.** See *Opii, Tinct., Camphorata*.

Pareia (*par-i'-ah*) [παρειά, cheek]. Cheek.

Pareira (*par-a'-rah*) [native Braz.]. The root of *Chondodendron tomentosum*, a plant of South America. It is diuretic and laxative, and tonic to the mucous membrane of the genito-urinary organs. It is valuable in cystitis, gonorrhea, and leukorrhea, and is used internally and locally for the bites of poisonous serpents, etc. **P., Decoct.** (B. P.) Dose ʒj–ij. **P., Extract.** (B. P.) Dose gr. x–xx. **P., Ext., Fld.** Dose ʒss–ʒj. **P., Ext., Liq.** (B. P.) Dose ʒj–ij. **P., Infus, unof.** Dose ʒj–ij. **P. brava.** Synonym of *Pareira*.

Pareirin (*par-a'-rin*). See *Pereirin*.

Parelectronomy (*par-e-lek-tron'-o-me*) [παρά, beside; ἤλεκτρον, amber; νόμος, law]. The electric condition of a transverse section of a muscle and its tendon, compared with that of the natural surface of the muscle. The former is negative, the latter positive.

Paremptosis (*par-emp-to'-sis*) [παρά, beside; ἐμπίπτειν, to sink in]. 1. Dislocation. 2. A form of amaurosis.

Parencephalis (*par-en-sef'-al-is*). Synonym of *Parencephalon*.

Parencephalitis (*par-en-sef-al-i'-tis*) [παρά, beside; ἐγκέφαλος, brain; ῑτις, inflammation]. Inflammation of the parencephalon, or cerebellum.

Parencephalocele (*par-en-sef'-al-o-sēl*) [παρά, beside; ἐγκέφαλος, brain; κήλη, hernia]. Hernia of the parencephalon.

Parencephalon (*par-en-sef'-al-on*) [παρά, beside; ἐγκέφαλος, brain]. The cerebellum.

Parencephalus (*par-en-sef'-al-us*) [παρά, beside; ἐγκέφαλος, brain]. A congenital malformation of the brain.

Parenchyma (*par-eng'-kim-ah*) [παρά, beside; ἐγχεῖν, to pour in]. In biology, soft cellular tissue, whether of plants (pith, pulp of leaves, etc.), or of animals, as the solid parts of a gland, any substance lying between ducts, vessels or nerves, connective tissue, corpuscles or amorphous matter. In physiology, the secreting or functionating structure of an organ. **P., Digesting**, a mass of stellate, branched cells representing the alimentary canal in the so-called *Acœla* among platode worms. Food enters this mass directly through the mouth or esophagus.

Parenchymal (*par-eng'-kim-al*) [παρέγχυμα, parenchyma]. Pertaining to, or of the nature of, parenchyma.

Parenchymatic (*par-eng-kim-at'-ik*) [παρέγχυμα, parenchyma]. Parenchymatous.

Parenchymatitis (*par-eng-kim-at-i'-tis*) [παρά, beside; ἐγχεῖν, to pour in; ῑτις, inflammation]. Inflammation of parenchyma.

Parenchymatous (*par-eng-kim'-at-us*, or *par-eng-ki'-mat-us*) [παρά, beside; ἐγχεῖν, to pour in]. Pertaining to, or having the nature of, parenchyma. **P. Inflammation**, inflammation of the parenchyma, as distinguished from that of the interstitial tissue. In reality there can be no inflammation of the parenchyma without the same process in the interstitial tissue.

Parenchyme (*par-eng'-kīm*). Same as *Parenchyma*.

Parenchymepatitis (*par-eng-kim-ep-at-i'-tis*) [παρέγχυμα, parenchyma; ἧπαρ, liver; ῑτις, inflammation]. Inflammation of the parenchyma of the liver.

Parenchymous (*par-eng'-kim-us*). Same as *Parenchymatous*.

Parenchymula (*par-eng-kim'-u-lah* [dim. of *parenchyma*: *pl.*, *Parenchymulæ*]. Hyatt's name for the embryonic stage immediately succeeding that of the closed blastula. Synonym of *Metschnikoff's Larva*.

Parencranis (*par-en-kra'-nis*). Synonym of *Cerebellum*.

Parent (*pār'-ent*) [*parens*, a parent]. One who has generated or produced; a father or mother. **P.-cell.** See *Cytula, Mother-cell*. **P.-form**, in biology, a stock; a parent of any kind. **P.-hood**, the state of being a parent. **P.-kernel**, the nucleus of a parent-cell; a cytococcus.

Parepicele (*par-ep'-is-ēl*) [παρά, beside; ἐπί, upon; κοῖλος, hollow]. The lateral recess of the epicele extending latero-ventrad.

Parepididymal (*par-ep-id-id'-im-al*) [παρά, beside; ἐπί, upon; δίδυμος, the testes]. Pertaining to the parepididymis.

Parepididymis (*par-ep-id-id'-im-is*). See *Paradidymis*.

Parepithymia (*par-ep-ith-i'-me-ah*) [παρά, aside; ἐπιθυμία, desire]. A morbid or depraved desire or habit.

Parerethisis (*par-er-eth'-is-is*) [παρά, beyond; ἐρῑθίζειν, to excite]. Abnormal excitement, or stimulus.

Paresis (*par'-es-is*) [παρά, from; ἵεναι, to let go]. 1. Slight paralysis; partial loss of muscular power. 2. Same as general paralysis.

Paresoanalgesia (*par-es-o-an-al-je'-ze-ah*) [παρά, beside; ἵεναι, to let go; ἀναλγησία, analgesia]. Paresis with analgesia; a symptom of Morvan's disease.

Paresthesia (*par-es-the'-ze-ah*) [παρά, beside; αἴσθησις, sensation]. Morbid or perverted sensation, as numbness, formication, "pins-and-needles."

Paresthesic (*par-es-the'-zik*) [παρά, beside; αἴσθησις, sensation]. Pertaining to paresthesia. **P. Neurosis**, a peculiar neurosis, in which the patient complains of paresthesiæ as follows: gnawing, boring, "pins and needles," sensations in the extremities, particularly

the upper, involving the fingers, hands and forearms, often of both sides, but not infrequently of only one. The neurosis appears in the following types: 1. The emotional. 2. The mental. 3. The neurasthenic. 4. The toxic. 5. Waking numbness (?). 6. The type that may be called an occupation-paresthesia, as it is often associated with a certain class of occupations. It is more frequent in women.

Paresthetic (*par-es-thet'-ik*) [παρά, beside; αἴσθησις, sensation]. Pertaining to, or having the nature of paresthesia.

Paretic (*par-et'-ik*) [παρά, beside; ἱέναι, to let go]. Pertaining to, or affected with, paresis. Also, a person suffering from paresis. **P. Dement**, a person suffering from paretic dementia. **P. Dementia.** See *General Paralysis of the Insane.*

Pareunia (*par-u'-ne-ah*) [παρά, beside; εὐνή, bed]. Coitus; sexual congress.

Parfocal Ocular. See *Ocular.*

Parhidrosis (*par-hid-ro'-sis*). Same as *Paridrosis.*

Parhomology (*par-ho-mol'-o-je*) [παρά, beside; ὁμολογία, agreement, conformity]. In biology, apparent homology; imitative homodynamy.

Paricin (*par'-is-in*) [*par*, equal; *Cinchona*], $C_{16}H_{18}N_2O$. An amorphous alkaloid of the *Cinchonas.*

Paridigitate (*par-id-ij'-it-āt*) [*par*, equal; *digitatus*, having fingers or toes]. In biology, having an even number of digits, as in artiodactyl ungulates.

Paridin (*par'-id-in*) [*par*, equal], $C_{16}H_{28}O_7$. A glucosid obtained from *Paris quadrifolia.*

Paridol (*par'-id-ol*) [*par*, equal], $C_{24}H_{14}O_9$. A decomposition-product of paridin.

Paridrosis (*par-id-ro'-sis*) [παρά, beside; ἱδρώς, sweat]. Qualitative change in the secretion of sweat.

Paries (*pa'-re-ēz*) [*paries*, a wall: *pl.*, *Parietes*]. In biology, an enveloping or investing structure or wall.

Parietal (*par-i'-et-al*) [*parietalis*, belonging to walls]. (*a*) Pertaining to the walls of a body-cavity. (*b*) Applied to placentæ that are borne on the walls of the ovary. **P. Angle.** See *Angle.* **P. Bone,** one of the two large, rectangular bones that by their union form the sides and roof of the skull. See *Bones, Table of.* **P. Boss.** Same as *P. Eminence.* **P. Cell,** one of a variety of cells, also called *acid cells*, found irregularly distributed among the epithelium of the peptic glands. They communicate with the lumen of the tube by means of intercellular clefts. **P. Convolution.** See *Convolutions, Table of.* **P. Eminence.** See *Eminence.* **P. Eye.** See *Pineal Eye.* **P. Foramen.** See *Foramen.* **P. Fossa,** the deepest part of the inner surface of the parietal bone. **P. Gyrus.** See *P. Convolution.* **P. Lobe.** See *Lobes of Brain.* **P. Lobules,** two lobules of the cerebrum, *inferior* and *superior*, separated by the interparietal sulcus. **P. Peritoneum,** the peritoneum covering the internal surface of the abdominal wall. **P. Placenta,** in biology, a placenta borne on the ovarian wall. **P. Pleura,** the pleura lining the thoracic wall. **P. Protuberance.** Same as *P. Eminence.* **P. Segment:** 1. The second cranial segment, between the occipital and frontal, and including the basisphenoid, alisphenoid, and parietal bones. 2. The posterior segment of the mitral valve. **P. Sulcus,** the intrapraietal sulcus. **P. Vertebra.** Same as *P. Segment.*

Parietale (*par-i-et-a'-le*) [*parietalis*, belonging to walls]. One of the parietal bones.

Parieten (*par-i'-et-en*) [*paries*, wall]. Belonging to the parietal bone in itself.

Parietic Acid. A synonym of *Acid, Chrysophanic.*

Parieto-frontal (*par-i'-et-o-frun'-tal*) [*paries*, a wall; *frons*, front]. Of, pertaining to, or representing both the parietal and frontal bones; frontoparietal.

Parieto-mastoid (*par-i'-et-o-mas'-toid*) [*paries*, a wall; μαστός, the breast; εἶδος, like]. Pertaining to the parietal bone and the mastoid process of the temporal bone; mastoparietal.

Parieto-occipital (*par-i'-et-o-ok-sip'-it-al*) [*paries*, a wall; *occiput*, the back of the head]. Pertaining to the parietal and occipital bones or lobes, as the *parieto-occipital fissure*, the *parieto-occipital convolutions*, and the *parieto-occipital suture.*

Parieto-quadrate (*par-i'-et-o-kwod'-rāt*) [*paries*, the wall; *quadratus*, square]. Pertaining to the parietal and quadrate bones. **P. Arch,** an arch in the skull of reptiles.

Parieto-sphenoid (*par-i'-et-o-sfe'-noid*) [*paries*, wall; σφήν, wedge; εἶδος, like]. Pertaining to the parietal and sphenoid bones.

Parieto-splanchnic (*par-i'-et-o-splangk'-nik*) [*paries*, a wall; σπλάγχνον, viscera]. Of or pertaining to the walls of the alimentary canal, as the nervous ganglia of certain molluscs.

Parieto-squamosal (*par-i'-et-o-skwa-mo'-sal*) [*paries*, a wall; *squama*, a scale]. Of or pertaining to the parietal and squamosal bones. **P. Suture,** a suture between the squamous portion of the temporal bone and the parietal bone.

Parieto-temporal (*par-i'-et-o-tem'-po-ral*) [*paries*, a wall; *tempora*, the temples]. Pertaining to the parietal and temporal bones. **P. Suture,** the suture between the parietal and temporal bones.

Parieto-vaginal (*par-i'-et-o-vaj'-in-al*) [*paries*, a wall; *vagina*, a sheath]. Of or pertaining to the ectodermal and endodermal layers of a polyzoan, as the *parieto-vaginal* muscles.

Parieto-visceral (*par-i'-et-o-vis'-er-al*) [*paries*, a wall; *viscus*, a bowel, entrails]. Of or pertaining to the walls of a body-cavity and the contained viscera.

Parietti's Solution. See *Stains, Table of.*

Parigenin (*par-ij'-en-in*). See *Parillin.*

Parillin (*par-il'-in*) [*parilla*, dim. of *parra*, a trained vine]. A glucosid obtained from sarsaparilla. It crystallizes in white scales or needles, permanent in the air, neutral, odorless, at first tasteless, but afterward bitter and acrid, slightly soluble in cold water and alcohol, freely so in hot. If treated by dilute mineral acids it yields *parigenin* and sugar.

Parin (*par'-in*). Synonym of *Paridin.*

Pari passu (*par'-e pas'-u*) [L.]. Coincidently; side by side; with equal progress; in the same degree.

Paripinnate (*par-ip-in'-at*) [*par*, equal; *pinna*, wing, feather]. In biology, abruptly pinnate; *i. e.*, without an unpaired terminal leaflet.

Paris (*par'-is*) [*par*, equal]. 1. A genus of liliaceous plants. 2. The capital of France. **P. Blue.** Same as *Cobalt-blue.* **P. Green.** Same as *Schweinfurth Green* and *Rinmann's Green.* See also *Copper.* **P. quadrifolia,** a common European herb, the one-berry, true-love, or four-leaved grass, which is actively poisonous. It yields paridin. Unof. **P. Red.** Same as *Colcothar, Mauvein*, and *Minium.* **P. Violet.** Same as *Methyl-violet.* **P. Yellow.** Same as *Chrome-yellow.*

Parisagoge (*par-is'-ag-og*) [παρά, beside; ἀγωγός, leading]. Intussusception.

Parish (*par'-ish*) [ME., *parishe*, a parish]. A place for which a separate poor-rate is or can be made, or for which a separate overseer is or can be appointed. (Brit. Pub. Health Act, 1875.)

Parish's Chemical Food. See *Phosphorus.*

Paristhmia (*par-ist'-me-ah*) [παρά, beside; ἰσθμός, throat]. The tonsils.

Paristhmic (*par-ist'-mik*) [παρά, beside; ἰσθμός, throat]. Relating to the tonsils.

Paristhmitis (*par-ist-mi'-tis*) [παρά, beside; ἰσθμός, throat; ιτις, inflammation]. Tonsillitis.

Paristyphnin (*par-is-tif'-nin*) [*par*, equal; τῦφος, smoke], $C_{38}H_{64}O_{18}$. A glucosid found in the root of *Paris quadrifolia*.

Parity (*par'-it-e*) [*par*, equal]. Equality.

Parity (*par'-it-e*) [*parere*, to bring forth]. The condition of being able to bear children.

Park's Aneurysm. See *Aneurysm*, and *Diseases, Table of*.

Parkinson's Disease. See *Paralysis agitans*, and *Diseases, Table of*. **P.'s Mask**, the immobile, mask-like expression of patients suffering with paralysis agitans. See *Signs and Symptoms, Table of*.

Parma-blue. Same as *Spirit-blue*. **P.-violet.** Same as *Rosanilin-violet*.

Paroarium, Paroarion (*par-o-a'-re-um, par-o-a'-re-on*) [παρά, beside; ᾠάριον, dim. of ᾠόν, egg]. Same as *Parovarium*.

Paroccipital (*par-ok-sip'-it-al*) [παρά, beside; *occiput*, occiput]. 1. Literally, beside the occipital region. 2. The mastoid apophysis. See *Parieto-occipital*.

Parodinia (*par-o-din'-e-ah*) [παρά, beside; ὠδίς, labor]. Difficult parturition.

Parodontis (*par-o-don'-tis*). Synonym of *Epulis*.

Parodyn (*par'-o-din*). Synonym of *Antipyrin*.

Parœnia (*par-e'-ne-ah*) [παρά, from; οἶνος, wine]. In legal medicine, an act committed while intoxicated, or drunken.

Paroicous (*par-oi'-ik-us*) [παρά, beside; οἶκος, house]. Same as *Parecious*.

Parolivary (*par-ol'-iv-a-re*) [παρά, beside; *oliva*, olive]. Situated near the olivary body.

Paromphalocele (*par-om-fal'-o-sēl*) [παρά, near; ὀμφαλός, navel; κήλη, tumor]. Hernia in the region of the navel.

Paroniria (*par-o-ni'-re-ah*) [παρά, beside; ὄνειρος, dream]. Depraved or morbid dreaming. A condition marked by imperfect sleep and by dream-excitement or action of the voluntary muscles. **P. ambulans**, sleep-walking. **P. salax**, a restless condition attended with involuntary seminal emissions and lascivious dreams.

Paronychia (*par-o-nik'-e-ah*) [παρά, beside; ὄνυξ, nail]. Inflammation about the finger-nail. It may be phlegmonous and form an abscess. Applied also to inflammation of the flexor-tendons and of their sheaths. *Run-around*, for the lightest form, and *whitlow*, for the severer form, are popular names for these affections. **P. gangrænosa**, a gangrenous inflammation around the nail, resulting in the loss of the terminal phalanges. **P., Syphilitic**, an ulcerative form due to syphilis. The swelling is very marked.

Paronychial (*par-o-nik'-e-al*) [παρωνυχία, a whitlow]. Having the character of paronychia.

Paronychis, Paronychitis (*par-o-nik'-is, par-o-nik-i'-tis*). Synonym of *Paronychia*.

Paronychium (*par-o-nik'-e-um*) [παρά, beside; ὀνύχιον, a little claw; dim. of ὄνυξ, a nail: *pl.*, *Paronychia*]. In biology, a bristle-like organ between the terminal claws of the foot of an insect.

Paronychosis (*par-o-nik-o'-sis*) [παρά, beside; ὄνυξ, nail; νόσος, disease]. A diseased condition of the structures about the nails; also growth of a nail in unusual places.

Paronym (*par'-o-nim*) [παρά, beside; ὄνυμα, name]. A word that exactly represents a word in another language, differing from it, if at all, only in some slight modification. Thus *nerve* is a paronym of Latin *nervus*; *muscle* of *musculus*; *canal* of *canalis*. A related synonym. Cf. *Heteronym*.

Paroöphoritis (*par-o-off-or-i'-tis*) [παρά, beside; ᾠοφόρος, egg-bearing; ιτις, inflammation]. 1. Inflammation of the parovarium. 2. Inflammation of the tissues about the ovary.

Paroöphoron (*par-o-off'-o-ron*) [παρά, beside; ᾠόν, an egg; φέρειν, to bear: *pl.*, *Paroöphora*]. In biology, the organ constituted by the persistent tubules of the posterior part of the Wolffian body. It was first described in the male by Giraldés under the name of the *corps innominé*, and was first described in the female by Waldeyer. See *Paradidymis*.

Parophobia (*par-o-fo'-be-ah*) [πάρος, before (intensive); φόβος, fear]. Hydrophobia.

Parophrenitis (*par-o-fren-i'-tis*) [παρά, beside; φρήν, diaphragm; ιτις, inflammation]. Inflammation about the diaphragm.

Parophthalmia (*par-off-thal'-me-ah*) [παρά, beside; ὀφθαλμός, eye]. Inflammation about the eye.

Paropia (*par-o'-pe-ah*) [παρά, beside; ὤψ, eye]. The angle of the eyelid toward the temple.

Paropion (*par-o'-pe-on*) [παρά, beside; ὤψ, eye]. An eye-screen.

Paropsis (*par-op'-sis*) [παρά, aside; ὄψις, vision]. Disordered or false vision.

Paroptesis (*par-op-te'-sis*) [παρά, near; ὄπτησις, a roasting]. A hot-air bath.

Paroral (*par-o'-ral*) [παρά, beside; *os, oris*, mouth]. In biology, alongside the mouth or oral aperture.

Parorasis (*par-o-ra'-sis*) [παρά, beside; ὁράειν, to see]. Any perversion of vision or of color-perception; an hallucination.

Parorchid (*par-or'-kid*). Same as *Parorchis*.

Parorchidium (*par-or-kid'-e-um*) [παρά, beside; ὄρχις, testicle]. Abnormal position of a testicle, or its non-descent.

Parorchido-enterocele (*par-or-kid'-o-en-ter'-o-sēl*) [παρά, beside; ὄρχις, testicle; ἔντερον, intestine; κήλη, tumor]. Inguinal hernia combined with displacement of the testis.

Parorchis (*par-or'-kis*) [παρά, near; ὄρχις, testicle]. See *Epididymis*.

Parorexia (*par-or-eks'-e-ah*) [παρά, aside; ὄρεξις, appetite]. A perverted appetite.

Parosmia (*par-oz'-me-ah*) [παρά, aside; ὀσμή, smell]. Hallucination of smell, usually unpleasant.

Parosmis (*par-oz'-mis*). See *Parosmia*.

Parosphresis (*par-os-fre'-sis*). Same as *Parosmia*.

Parosteitis (*par-os-te-i'-tis*). Synonym of *Parostitis*.

Parosteosis (*par-os-te-o'-sis*). See *Parostosis*.

Parostia (*par-os'-te-ah*) [παρά, beside; ὀστέον, bone]. Disorder or defect of ossification.

Parostitis (*par-os-ti'-tis*) [παρά, near; ὀστέον, bone; ιτις, inflammation]. Inflammation of the outer surface of periosteum.

Parostosis (*par-os-to'-sis*) [παρά, beside; ὀστέον, bone]. The abnormal formation of bone outside of the periosteum, or in the connective tissue surrounding the periosteum.

Parotic (*par-ot'-ik*) [παρά, near; οὖς, ear]. Situated near or about the ear.

Parotid (*par-ot'-id*) [παρά, near; οὖς, ear]. Near the ear. **P. Abscess**, an abscess of the parotid gland; also sometimes applied to abscess of the lymphatic gland lying upon the parotid. **P. Duct**, the excretory duct of the parotid gland. **P. Glands.** See *Salivary Glands*.

Parotidectomy (*par-ot-id-ek'-to-me*) [παρά, beside; οὖς, ear; ἐκτομή, excision]. Excision of the parotid gland.

Parotiditis (*par-ot-id-i'-tis*). See *Parotitis*.

Parotido-auricularis (*par-ot'-id-o-aw-rik-u-la'-ris*) [παρά, near; οὖς, ear; *aura*, ear]. A muscle, well-developed in lower animals, arising from the surface

of the parotid gland and inserted into the base of the concha. Its function is to abduct and depress the pinna.

Parotidoncus (*par-ot-id-ong'-kus*). See *Parotitis.*

Parotidoscirrhus (*par-ot-id-o-skir'-us*) [παρά, beside; οὖς, ear; σκιῤῥός, hard]. Scirrhous carcinoma of the parotid gland.

Parotis (*par-o'-tis*) [L.]. The parotid gland. **P. accessoria,** a small lobule near the parotid gland, called the accessory parotid gland.

Parotitic (*par-o-tit'-ik*) [παρά, beside; οὖς, ear; ιτις, inflammation]. Having the mumps; affected with parotitis.

Parotitis (*par-o-ti'-tis*) [παρά, beside; οὖς, ear; ιτις, inflammation]. Inflammation of the parotid gland, commonly called the mumps. **P. contagiosa,** mumps. **P., Epidemic,** ordinary mumps. **P., Idiopathic,** mumps. **P., Metastatic,** mumps secondary to disease elsewhere; it is not uncommon in infectious diseases, and usually goes on to suppuration.

Parotoid (*par'-o-toid*) [παρωτίς, the parotid gland; εἶδος, form]. In biology, applied to certain cutaneous glands near the external ear in some batrachians.

Parous (*par'-us*) [*parere*, to bear]. Having borne one or more children.

Parovarian (*par-o-va'-re-an*) [παρά, beside; *ovarium*, ovary]. Situated in or occurring near the ovary.

Parovarium (*par-o-va'-re-um*) [παρά, beside; ᾠόν, egg: *pl.*, *Parovaria*]. In biology, the functionless remnant or vestige of the Wolffian body of the female; the organ of Rosenmüller, *q. v.*

Paroxysm (*par'-oks-izm*) [παρά, beside; ὀξύνειν, to sharpen]. The periodic increase or crisis in the progress of a disease; a fit or sudden attack of pain or convulsion. **P., Febrile,** an accession of fever.

Paroxysmal (*par-oks-iz'-mal*) [παρά, beside; ὀξύνειν, to sharpen]. Of the nature of or resembling a paroxysm; recurring in paroxysms. **P. Sleep.** See *Narcolepsy.*

Paroxysmic (*par-oks-iz'-mik*). Same as *Paroxysmal.*

Parrot (*par'-ot*) [Fr., *pierrot*, a sparrow]. Any bird of the family *Psittacidæ*, having a curved and hooked bill. **P.-beak Nails,** nails that are curved strongly antero-posteriorly, like the beak of the parrot. **P.-mouth.** A deformity of the mouth of a horse in which the upper incisors project in front of and beyond the lower ones. This results in interference with prehension and mastication, and indirectly with digestion.

Parrot's Disease. Syphilitic pseudo-paralysis. See *Diseases, Table of.* **P.'s Nodes.** See *Signs and Symptoms, Table of,* and also *Node.* **P.'s Sign.** See *Signs and Symptoms, Table of.*

Parry's Disease. Exophthalmic goiter. See *Diseases, Table of.*

Pars (*parz*) [L.]. Part. **P. ciliaris retinæ,** the part of the retina in front of the ora serrata. **P. intermedia.** 1. Same as *Portio inter durem et mollem.* 2. Also a small plexus of veins establishing communication between the bulbs of the vestibule of the vagina and the clitoris. **P. juncturæ,** the lock of an obstetric forceps. **P. minoris resistentiæ.** Synonym of *Locus minoris resistentiæ.*

Parsley (*pars'-le*) [πέτρος, rock; σέλινον, a kind of parsley]. A biennial garden herb, *Petroselinum sativum.* It contains a volatile oil and a camphor (*Apiol*). **P.-camphor.** See *Apiol.*

Parson's Disease. Exophthalmic goiter. See *Diseases, Table of.* **P. Method.** See *Treatment, Methods of.*

Part [*pars*, a part]. A segment or section; a member or organ.

Parted (*part'-ed*) [*partire*, to divide]. In biology, applied to a leaf that is separated into parts almost to the midrib or base.

Parthenicin, Parthenin (*par-then'-is-in, par'-then-in*) [παρθένιος, maidenly, pure]. The alkaloid of *Parthenium hysterophorus*, native to the Gulf States and the West Indies. It has proved efficacious in neuralgia and in intermittent fever. Dose gr. ¾–ij; as an antiperiodic, gr. v–xv. Unof.

Parthenium (*par-the'-ne-um*) [παρθένιος, maidenly, pure]. A genus of composite-flowered herbs of America. **P. hysterophorus,** and **P. integrifolium,** of N. America, are useful in fever. Unof.

Parthenochlorosis (*par'-then-o-klo-ro'-sis*) [παρθένος, virgin; χλωρός, green]. The chlorosis of young maidens.

Parthenogalactozemia (*par'-then-o-gal-ak'-to-ze'-me-ah*) [παρθένος, virgin; γάλα, milk; ζημία, loss]. The secretion of milk in the breast of a virgin.

Parthenogenesis (*par-then-o-jen'-es-is*) [παρθένος, a virgin; γένεσις, production]. In biology, a variety of asexual or virginal reproduction in which the whole development of the embryo is affected without the aid or stimulus of fecundation; the production of young without any previous congress with the male organism, as in various forms of *Medusæ*, *Tæniæ*, and *Aphidæ*. The common black scale-bug, *Lecaneum oleæ*, of the oleander affords an example, all the insects being oviparous females.

Parthenogenetic (*par-then-o-jen-et'-ik*) [παρθένος, a virgin; γένεσις, genesis]. In biology, of or pertaining to parthenogenesis. **P. Eggs,** eggs developed without fertilization, as the statoblasts of the freshwater *Bryozoa*. In these eggs, according to some observers, only one polar body is formed.

Parthenogenous (*par-then-oj'-en-us*) [παρθένος, a virgin; γενής, producing]. Producing spores, eggs, or young, without fertilization.

Parthenogeny (*par-then-oj'-en-e*) [παρθένος, a virgin; γενής, producing]. Same as *Parthenogenesis.*

Parthenogonidium (*par-then-o-gon-id'-e-um*) [παρθένος, a virgin; γονή, generation: *pl.*, *Parthenogonidia*]. In biology, an individual of an asexual generation which produces by continuous incomplete fission a colony that separates from the mother-colony.

Parthenology (*par-then-ol'-o-je*) [παρθένος, virgin; λόγος, science]. The study or science of the diseases and conditions peculiar to or characteristic of virginity, or of young girls.

Parthenosperm (*par'-then-o-sperm*) [παρθένος, a virgin; σπέρμα, seed]. Same as *Parthenospore.*

Parthenospore (*par'-then-o-spor*) [παρθένος, a virgin; σπορά, seed]. In biology, a spore resembling a zygospore, but produced without fertilization, in certain algæ.

Particle (*par'-tik-l*) [dim. of *pars*, part]. A small part. The smallest visible portion of any substance.

Particulate (*par-tik'-u-lāt*) [*pars*, part]. Composed of minute particles; applied to various contagia.

Partite (*par'-tit*) [*partiri*, to divide]. In biology, divided from base to apex.

Partridge-berry (*part'-ridj-ber'-e*). See *Gaultheria procumbens;* also *Mitchella repens.*

Partridge's Hernia. Hernia external to the femoral vessels. See *Hernia*, and *Diseases, Table of.*

Parturiate (*par-tu'-re-āt*) [*parturire*, to bring forth]. To bring forth young.

Parturiency (*par-tu'-re-en-se*) [*parturire*, to bring forth]. The state of being parturient; parturition.

Parturient (*par-tu'-re-ent*) [*parturire*, to bring forth]. Being in labor; giving birth. **P. Apoplexy.** See *Collapse, Parturient.*

Parturifacient (*par-tu-rif-a'-se-ent*) [*parturire*, to

bring forth; *facere*, to make]. 1. Causing to bring forth. 2. A medicine or agent that induces parturition.

Parturiometer (*par-tu-re-om'-et-er*) [*parturire*, to bring forth; *μέτρον*, measure]. An instrument for measuring the expulsive force of the uterus and indicating the existing stage of labor.

Parturious (*par-tu'-re-us*) [*parturire*, to bring forth]. Parturient.

Parturition (*par-tu-rish'-un*) [*parturitio; parturire*, to bring forth]. The act of giving birth to young. See *Labor*.

Parturitive (*par-tu'-rit-iv*) [*parturire*, to bring forth]. Obstetric; relating to parturition.

Partus (*par'-tus*) [*partus; parere*, to bring forth]. The bringing forth of offspring; labor. **P. cæsarius**, Cesarean section. **P. difficilis**, dystocia. **P. immaturus**, premature labor. **P. maturus**, labor at term. **P. præcipitatus**, precipitate labor. **P. siccus**, dry labor.

Parulidodontitis (*par-u-lid-o-don-ti'-tis*) [*παρά*, beside; *οὖλον*, gum; *ὀδούς*, tooth; *ιτις*, inflammation]. Inflammation of a tooth and the gum.

Parulis (*par-u'-lis*) [*παρά*, near; *οὖλον*, the gum]. Alveolar abscess of the gums. Gum-boil.

Parumbilical (*par-um-bil'-ik-al*) [*παρά*, beside; *umbilicus*, navel]. Situated or occurring near the umbilicus.

Paruria (*par-u'-re-ah*) [*παρά*, beside; *οὖρον*, urine]. Any abnormality in the excretion of the urine. **P. mellita.** Synonym of *Diabetes mellitus*.

Parvipsoas (*par-vip'-so-as*) [*parvus*, small; *ψόα*, *pl.* *ψόαι*, a muscle of the loins]. The psoas parvus muscle. See *Muscles, Table of*.

Parvirostrate (*par-ve-ros'-trāt*) [*parvus*, small; *rostrum*, beak]. In biology, having a small bill or beak.

Parvolin (*par'-vo-lin*). A name given to Gautier and Etard's ptomain-base, $C_9H_{13}N$, obtained (1881) from decomposing mackerel and horseflesh, and isomeric with Waage's synthetic parvolin. The free base is an oily, amber-colored fluid, having the odor of hawthorn-blossoms. Its constitution and physiologic action have not yet been definitely settled. See *Ptomains, Table of*.

Parvule (*par'-vūl*) [Fr.; L., *parvulus*, small]. A small pill, or pellet of medicine.

Pascual (*pas'-ku-al*) [*pascuum*, a pasture]. Same as *Pascuous*.

Pascuant (*pas'-ku-ant*) [*pascere*, to feed]. In biology, feeding, as in a pasture; pasturing.

Pascuous (*pas'-ku-us*) [*pascere*, to feed]. In biology, growing in pastures.

Pasma (*pas'-mah*) [*πάσμα*; *πάσσειν*, to sprinkle: *pl.*, *Pasmata*]. 1. A powder for sprinkling on a surface. 2. A powder mixed up into a paste, *q. v.*

Pasque Flower (*pask*). See *Pulsatilla*.

Pass (*pas*) [*passus*, step]. To go, or to put through, or by; to discharge from the intestinal canal; to void.

Passage (*pas'-āj*) [*passare*, to pass]. 1. A channel. 2. The act of passing from one place to another. 3. The introduction of an instrument into a cavity or channel. 4. An evacuation of the bowels. **P., Lacrymal**, the excretory ducts of the lacrymal gland, including the puncta canaliculi, lacrymal sac, and lacrymo-nasal duct. **P., Tympanic.** See *Scala tympani*. **P., Vestibular.** See *Scala vestibuli*.

Passet's Bacillus. See *Bacteria, Synonymatic Table of*.

Passiflora (*pas-if-lo'-rah*) [*passio*, passion; *flos*, a flower]. Passion-flower, a genus of climbing plants represented by a number of species several of which have medicinal properties. **P. fœtida**, is emmenagogue and antispasmodic. Unof.

Passio (*pash'-e-o*) [L.]. Same as *Passion*. **P. colica.** Synonym of *Enteralgia*. **P. hæmoptoica**, hemoptysis. **P. hysterica.** Synonym of *Hysteria*. **P. iliaca.** Synonym of *Volvulus*. **P. uterina.** Synonym of *Hysteria*.

Passion (*pash'-un*) [*passio; pati*, to suffer]. Pain; suffering. Any intense emotion of the mind. Intense sexual excitement. In pathology, a term formerly used to include all acute diseases. **P., Iliac**, volvulus. **P.-fits**, a common name for the spasms occurring in laryngismus stridulus, from the supposition that they are due to anger on the part of the child.

Passive (*pas'-iv*) [*pati*, to suffer]. Not active. **P. Insufficiency of Muscles.** See *Insufficiency*. **P. Motion**, the movement of a limb or part of the body by a second person or by external agency, and not by the patient himself.

Passivism (*pas'-iv-izm*) [*pati*, to suffer]. The term given by Stefanowski to that variety of sexual perversion which consists in the complete subjugation of the will of one person to the profit of another, with an erotic end. *Subjectivism* would be a preferable term, as there is an active acquiescence engendering feelings of a positive type. Passivism is the exact opposite of sadism. Passivism in the male may be defined as voluntary subjugation of the male will to the profit of the female, accompanied by an intense desire for abuse and maltreatment by her. In the last factor consists the voluptuous ecstacy of the passivist. Passivism may be *physical* or *moral*. *Moral passivism* consists essentially of humiliations and abasements before women. Here should be included the perverse tastes for female secretions, the *cunnilinguists, renifleure*, etc. Passivism may accompany *sexual inversion*, in which case the loved object is a male, and the passivist becomes a *fellator*. The fellator is the so-called *bote*, said to be common among the Indians of the N. W. United States.

Passivist (*pas'-iv-ist*) [*pati*, to suffer]. One who is the subject of passivism, *q. v.*

Passula (*pas'-u-lah*) [L.: *pl.* and *gen.*, *Passulæ*]. A raisin. **P. major**, the common or large raisin. **P. minor**, the small raisin, or Greek currant. See *Uva passa*.

Paste (*pāst*) [*pasta; πάστη*, mess; *πάσσειν*, to sprinkle. Cf., *Pasma*]. Any tenacious substance for cementing or uniting parts, especially a semi-solution of starch or flour in water. Also, a confection of gum arabic, sugar, and water, flavored with any aromatic substance. Also, a caustic preparation composed of arsenic acid, cinnabar, and caustic alkali. **P., Arsenical**, a caustic paste containing arsenic. **P., Bonnet's**, a caustic paste composed of equal parts of zinc chlorid and flour. **P., Canquoin's.** See *Canquoin*. **P., Coster's**, a solution of iodin in oil of tar. **P., Dupuytren's**, a caustic paste composed of arsenious acid, calomel, and a solution of gum. **P., Esmarch's.** See *Esmarch*. **P., Felix's**, a caustic paste composed of zinc chlorid, mercuric chlorid, iodol, croton-chloral, bromid of camphor, carbolic acid, starch, and wheat-flour. **P., Landolphi's.** See *Landolphi*. **P., London**, a mixture of equal parts of sodium hydrate and slaked lime, moistened with alcohol. **P., Manec's.** See *Manec*. **P., Michel's**, a caustic paste composed of three parts of strong sulphuric acid and one part of finely powdered asbestos. **P., Socin's Antiseptic**, a mixture of zinc chlorid one part, and zinc oxid and distilled water each 10 parts. It is used as a dressing. **P., Vienna**, a mixture of potassium hydrate and caustic lime moistened with water. **P., Ward's**, a paste consisting of black pepper one part; root of *Inula helenium*, one part; white sugar, two

parts; fennel-seed, three parts; to which, before using, two parts of honey are added.

Pastern (*pas'-tern*) [OF., *pasturon*, a shackle for a horse at pasture]. That part of a horse's foot between the fetlock-joint and the coronet of the hoof. **P.-bone**, either of the two proximal phalanges of a horse's foot. **P.-joint**, the articulation between the proximal phalanx (great pastern-bone) of the horse's foot and the cannon-bone.

Pasteur's Fluid or **P.'s Liquid.** An artificial liquid for the cultivation of bacteria. They flourish in it, but not so well as when proteid elements are also added. It is composed of water 100 parts, crystallized sugar 10 parts, carbonate of ammonium and ashes of yeast, each, 1 part. **P.'s Method.** 1. See *Pasteurizing*. 2. See *Pasteurism*. **P., Microbe of.** See *Bacteria, Synonymatic Table of*. **P.'s Oven.** See *Oven*.

Pasteuring (*pas'-tur-ing*) [after the French biologist, Louis *Pasteur*]. See *Pasteurizing*.

Pasteurism (*pas'-tur-izm*) [after the French biologist, Louis *Pasteur*]. Prophylactic or protective inoculation; a synonym for the word vaccination.

Pasteurization (*pas-tur-iz-a'-shun*) [after the French biologist, Louis *Pasteur*]. The preservation of organic fluids by the destruction of the contained ferments or fungi through heating to 60° or 70° C.

Pasteurize (*pas'-tur-īz*) [after the French biologist, Louis *Pasteur*]. To sterilize fermentable fluids, as milk or cream, beer or wine, by heat.

Pasteurizing (*pas'-tur-i-zing*) [after the French biologist, Louis *Pasteur*]. An important process employed for the preservation and protection of wine and other organic fluids against diseases. It consists in heating the substance, either in casks or in bottles, to a temperature of 60° C., and then preserving it without exposure to the air.

Pastil, Pastille (*pas'-til, pas-til'*) [dim. of *pasta*, paste or confection]. A lozenge or similarly shaped mass composed of aromatic substances and employed in fumigation. Also, a troche or tablet of medicinal substance.

Pastinaca (*pas-tin-a'-kah*) [*pastinare*, to dig]. A former genus of umbelliferous plants. **P. sativa**, the common parsnip, formerly used as a diuretic and as an antiperiodic. Unof.

Pastophor (*pas'-to-for*) [παστοφόρος, a shrine-bearer: *pl.*, *Pastophori*]. A priest-physician; a clan of priests in Ancient Egypt who united the calling of physician and priest. Thus the High Priest of Sais bore the title of Chief of the Doctors.

Pat [ME., *patten*, to strike]. To tap; to strike gently with the fingers.

Patagium (*pat-a'-je-um*) [παταγεῖον: *pl.*, *Patagia*]. 1. The flight-membrane of birds and bats; also a congenital malformation consisting in a fold of skin passing from the thigh to the leg. 2. In biology, the expansion of the skin of the trunk, limbs, and tail of flying mammals or reptiles. Cf. *Ectopatagium, Dactylopatagium*.

Patch (*pach*) [ME., *pacche*, patch]. An irregular spot or area. **Ps., Drab-colored**, a name given by Macnamara to certain areas occurring in the livers of persons who during life had been exposed to the influence of a tropical climate. They are thought to be due to a coagulative necrosis. **P., Mucous.** Same as *Condyloma*. **Ps., Peyer's.** See *Glands, Peyer's*.

Patchouly (*pa-choo'-le*) [E. Ind.]. The labiate herb *Pogostemon patchouly*, of India, much used in the East as a perfume and insecticide. Unof.

Pate (*pāt*) [ME., *pate*, the crown of the head]. The crown or top of the head.

Patella (*pat-el'-ah*) [dim. of *patina*, dish]. The kneepan or rotula. The small, round sesamoid bone in front of the knee, in the tendon of the quadriceps extensor femoris muscle.

Patellar (*pat-el'-ar*) [*patella*, dim. of *patina*, dish]. Pertaining to the patella or knee-cap. **P. Clonus.** Same as *P. Reflex*. **P. Reflex**, or **P. Tendon-reflex.** See *Knee-jerk* and *Reflexes, Table of*.

Patellate (*pat-el'-āt*) [*patella*, a patella]. Provided with a patella.

Patelliform (*pat-el'-if-orm*) [*patella*, patella; *forma*, form]. Having the shape of a patella.

Patelline (*pat'-el-in*) [*patella*, patella]. Patelliform.

Patellula (*pat-el'-u-lah*) [dim. of *patella*, a pan: *pl.*, *Patellulæ*]. In biology, applied to the suctorial fossets on the lower surface of the tarsi of some insects.

Patellulate (*pat-el'-u-lāt*). Same as *Patellate*.

Patency (*pa'-ten-se*) [*patere*, to stand open]. Openness (as of the foramen ovale in fetal life, and in some cases of cyanopathy).

Patent (*pat'-ent, pa'-tent*) [*patere*, to be open]. Open, exposed. **P. Glue.** See *Glue*. **P. Leather.** See *Leather*. **P. Lint.** See *Lint*. **P. Medicine.** See *Medicine*. **P. Yellow.** Same as *Cassel Yellow*.

Pateriform (*pat'-er-if-orm*) [*patera*, a flat dish; *forma*, form]. In biology, saucer-shaped.

Pathema (*path-e'-mah*) [πάθημα; πάθος, disease]. Any disease or morbid condition.

Pathematology (*path-em-at-ol'-o-je*). Same as *Pathology*.

Pathengenetic (*path-en-jen-et'-ik*) [πάθος, disease; ἐγγενής, born in, native]. Induced by, or originating in, a disease. **P. Disease**, a disease arising from, or secondary to, another disease.

Pathetic (*path-et'-ik*) [παθητικός; πάθος, disease]. That which appeals to or stirs the passions. **P. Muscle.** See *Obliquus superior*, in *Muscles, Table of*. **P. Nerve.** See *Nerve*.

Pathetism (*path'-et-izm*) [πάθος, disease]. A generic term to express such conditions as hypnotism, telepathy, clairvoyance, etc.

Pathfinder (*path'-fin-der*) [ME., *path*, path; ME., *finden*, to find]. An instrument for finding the openings of a urethral stricture.

Pathic (*path'-ik*) [παθικός, passive]. Diseased; pathologic; pertaining to a morbid condition. Also, one who tolerates the commission of an unnatural crime upon the person.

Pathisotherapy (*path-is-o-ther'-ap-e*) [πάθος, disease; ἴσος, equal; θεραπεία, treatment]. Same as *Isopathy*.

Pathoanatomic (*path-o-an-at-om'-ik*) [πάθος, disease; ἀνατομή, a cutting up]. Pertaining to pathologic anatomy.

Pathoanatomy (*path-o-an-at'-o-me*) [πάθος, disease; ἀνατομή, a cutting up]. Pathologic anatomy.

Pathobiologic (*path-o-bi-o-loj'-ik*). Same as *Pathologic*.

Pathobiologist (*path-o-bi-ol'-o-jist*). Same as *Pathologist*.

Pathocratia (*path-o-kra'-she-ah*) [πάθος, feeling; κρατέειν, to rule]. The control of the passions; self-restraint.

Pathoctonus (*path-ok'-to-nus*) [πάθος, passion; κτείνειν, to kill]. The killing of the appetites; self-restraint.

Pathogene (*path'-o-jēn*) [πάθος, disease; γεννᾶν, to beget]. A disease-producing germ or principle.

Pathogenesis (*path-o-jen'-es-is*) [πάθος, disease; γένεσις, birth]. The origin and development of disease.

Pathogenic, Pathogenetic (*path-o-jen'-ik, path-o-jen-et'-ik*) [πάθος, disease; γεννᾶν, to beget]. Producing disease. **P. Microörganism**, any one of the various forms of microbic life which, when introduced into the system, causes disease.

Pathogenous (*path-oj'-en-us*) [πάθος, disease; γενής, producing]. Same as *Pathogenic.*

Pathogeny (*path-oj'-en-e*) [πάθος, disease; γενής, producing]. See *Pathogenesis.*

Pathognomonic (*path-og-no-mon'-ik*) [πάθος, disease; γνώμων, judge]. Characteristic of a particular disease, distinguishing it from other diseases.

Pathognomy (*path-og'-no-me*) [πάθος, disease; γνώμη, a sign]. The science of the signs by which disease is recognized.

Pathognostic (*path-og-nos'-tik*). Synonym of *Pathognomonic.*

Pathogony (*path-og'-o-ne*). Same as *Pathogeny.*

Pathographic (*path-o-graf'-ik*) [πάθος, disease; γράφειν, to write]. Pertaining to pathography.

Pathography (*path-og'-ra-fe*) [πάθος, disease; γράφειν, to write]. A description of diseases.

Pathologic (*path-o-loj'-ik*) [πάθος, disease; λόγος, science]. Pertaining to pathology. Morbid or diseased. **P. Anatomy.** See *Anatomy.* **P. Histology,** the microscopic study of diseased tissues.

Pathologist (*path-ol'-o-jist*) [πάθος, disease; λόγος, science]. A specialist in pathology.

Pathology (*path-ol'-o-je*) [πάθος, disease; λόγος, science]. That branch of medical science which treats of the modifications of function and changes in structure caused by disease. It is divided, especially on the European continent, into **P., External,** or surgery, and **P., Internal,** or medicine limited to diseases of internal organs. Of pathology in general three subdivisions are made—morbid anatomy, morbid physiology, and etiology. **P., Cellular,** pathology that makes the cell the basis of all vital phenomena, and teaches that every cell is derived from a pre-existing parent-cell. **P., Comparative,** a study of pathologic processes in lower animals, for purposes of tracing resemblances and differences among them and between them and those of the human body. **P., Experimental,** the study of pathologic processes artificially induced in lower animals. **P., General,** that department of pathology which takes cognizance of those morbid processes that may be observed in various diseases and in any organ, *e. g.*, inflammation and hypertrophy. **P., Geographic,** pathology in its relation to climatic and geographic conditions. **P., Humoral,** the old doctrine that all disease is due to abnormal conditions of the blood. It has been revived in recent times in a modified form, and is now based on the theory that both immunity and susceptibility to disease reside in the juices of the body. **P., Medical.** Synonym of *P., Internal.* **P., Special,** the science of such changes in function and structure as occur in special organs, *e. g.*, pneumonia. **P., Surgical.** Synonym of *P., External.*

Patholysis (*path-ol'-is-is*) [πάθος, disease; λύειν, to dissolve]. The dissolution of tissues or substances by the influence of disease.

Pathomania (*path-o-ma'-ne-ah*) [πάθος, disease; μανία, madness]. Moral insanity.

Pathometry (*path-om'-et-re*) [πάθος, disease; μέτρον, measure]. The measure of suffering; the distinction or diagnosis of different kinds of suffering.

Pathonomia (*path-o-no'-me-ah*) [πάθος, disease; νόμος, law]. The study of pathologic laws.

Pathopatridalgia (*path-o-pat-rid-al'-je-ah*) [πάθος, illness; πατρίς, fatherland; ἄλγος, pain]. Nostalgia.

Pathopatridomania (*path-o-pat-rid-o-ma'-ne-ah*). Synonym of *Nostromania.*

Pathophobia (*path-o-fo'-be-ah*) [πάθος, disease; φόβος, fear]. Exaggerated dread of disease.

Pathophorous (*path-off'-or-us*) [πάθος, disease; φόρος, bear]. Pathogenic.

Pathopoiesis (*path-o-poi-e'-sis*) [πάθος, disease; ποιεῖν, to make]. The creation of disease.

Patience (*pa'-shens*) [*patientia*]. A species of dock; **Rumex patientia,** of Europe, sparingly naturalized in N. America; is used in medicine (see *Rumex*) as an alterative and tonic. Unof.

Patient (*pa'-shent*) [*pati*, to suffer]. One who is under the care of a physician. A sick person.

Patten (*pat'-en*) [Fr., *patin*, a clog]. An iron support placed under a sound foot to remove pressure from and permit extension of the diseased limb in hip-joint disease.

Patterson's Powder. A mixture of bismuth subnitrate and magnesia.

Pattison's White Lead. See *Pigments, Conspectus of.*

Patulous (*pat'-u-lus*) [*patere*, to lie open]. In biology, spreading, gaping, open.

Pauci-articulate (*paw-se-ar-tik'-u-lāt*) [*paucus*, few; *articulatus*, articulate]. In biology, having few joints.

Paucidentate (*paw-sid-en'-tāt*) [*paucus*, few; *dens*, tooth]. In biology, having few teeth.

Pauciflorous (*paw-sif-lo'-rus*) [*paucus*, few; *flos*, flower]. In biology, having few flowers.

Paucifolious (*paw-sif-o'-le-us*) [*paucus*, few; *folium*, a leaf]. In biology, having few leaves.

Paucinervate (*paw-sin-er'-vāt*) [*paucus*, few; *nerva*, nerve]. In biology, having few nerves.

Pauciradiate (*paw-se-ra'-de-āt*) [*paucus*, few, little; *radius*, ray]. In biology, having few rays.

Paucispiral (*paw-se-spi'-ral*) [*paucus*, few; *spira*, a fold, coil]. In biology, having few spirals, whorls, or turns.

Paul's Sign. See *Signs and Symptoms, Table of.*

Paullinia (*paw-lin'-e-ah*). See *Guarana.*

Paunch (*pawnch*) [ME., *paunche*, paunch]. The abdominal cavity and its contents. In comparative anatomy, the largest stomach of cud-chewing animals. See *Farding-bag.*

Pausimenia (*paw-sim-e'-ne-ah*). See *Menopause.*

Pavasi's (Carlo) Method. A method of masking the taste of cod-liver oil: 1000 parts of the oil, 50 parts of ground coffee, and 25 parts of animal charcoal are placed in a flask and heated for an hour over a water-bath. The mixture is then set aside in a cool place, and stirred occasionally for three days, when the oil is filtered off and is ready for use.

Pavement (*pāv'-ment*) [*pavimentum*, a pavement]. A floor or paved structure; a formation like pavement. **P. Epithelium.** See *Epithelium.*

Pavilion (*pa-vil'-yon*) [*pavilio*, a canopy]. A name sometimes given to the expanded portion of a canal or tube; the outer ear; the pinna or auricle of the ear. **P. of Oviduct, P. of the Tube,** the fimbriæ or fringe-like process of the outer extremity of the oviduct; the center of the ovarian extremity of the oviduct; the *morsus diaboli.*

Pavimentum (*pav-im-en'-tum*) [L.]. A floor. **P. orbitæ,** the floor of the orbit. **P. ventriculi,** the floor of a ventricle.

Pavitation (*pav-it-a'-shun*) [*pavitatio; pavere*, to quake]. Terror, or fear, with trembling.

Pavor (*pa'-vor*) [L.]. Fright; fear. **P. nocturnus.** See *Night-mare* and *Night-terrors.*

Pavy's Disease. Intermitting or recurrent albuminuria. See *Diseases, Table of.* **P.'s Test,** a test for grape-sugar. It consists in the use of ammonia instead of caustic alkali in Fehling's solution. See *Tests, Table of.*

Paxton's Disease. See *Tinea nodosa, Morbus paxtonii,* and *Diseases, Table of.*

Paxwax (*paks'-waks*) [ME.]. The ligamentum nuchæ in the larger quadrupeds. See *Faxwax.*

Payne's Treatment. See *Treatment, Methods of.*

Paytin (*pa'-it-in*) [S.A., *Payta*], $C_{21}H_{24}N_2O + H_2O$. An alkaloid of one of the cinchona barks.

Peach (*pēch*) [ME., *peche*, peach]. The rosaceous tree or shrub, *Amygdalus persica*, and its valuable fruit. The kernels of the seed are a good substitute for bitter almonds; the decoction of the leaves is laxative and anthelmintic, as well as sedative. Peach-brandy is distilled from the fruit. Unof. **P.-black.** See *Pigments, Conspectus of.* **P.-brandy,** a liquor distilled from peaches. **P.-cold.** See *Hay-fever*, and *Rhinitis, Hyperesthetic.* **P.-fever,** a morbid condition of the respiratory and cutaneous surfaces, with some consequent systemic disturbances, due to irritation from the pubescence of the skin of the common peach, the *Amygdalus persica.* It is tolerably frequent among persons employed in the fruit-packing and canning establishments of Maryland and Delaware. The Schneiderian membrane becomes turgid; then follows a copious discharge of serum and mucus; the frontal sinuses, the conjunctivæ, and the larger bronchi also become the seat of catarrh, and asthmatic attacks may be induced. A macular or papular eruption comes out on the wrists, forearms, neck, and forehead; the cutaneous affection may go on to true dermatitis, and the lesions may become pustules. Anderson believes the source of irritation to be some germ whose habitat is the "fuzz" of the peach.

Peacock-sound (*pe'-kok-sownd*). A peculiar sound of the voice supposed to be the result of too close adaptation of the posterior half arches (palato-pharyngeal folds) of the fauces, but according to Harrison Allen due to a faulty method of breathing, neglected catarrh, or a growth in the upper air-passages.

Péan's Operation. See *Operations, Table of.*

Peanut (*pe'-nut*) [ME., *pease;* ME., *nutte*, nut]. An edible fruit of *Arachis hypogœa.* **P.-oil.** See *Ground-nut Oil.*

Pear [ME., *pere*, pear]. The tree *Pyrus communis*, and its fruit. **P.-oil,** a dilute alcoholic solution of the acetic ester of the amyl alcohol of fermentation; it is used in flavoring, cookery, and in candies.

Pearl (*perl*) [ME., *perle*, a pearl]. 1. In *pharmacy*, a small, glass globular body completely filled with liquid medicine. 2. A cataract; an opacity growing on the eye. 3. A peculiar arrangement of the epithelial cells. **P.-barley.** See *Barley.* **P. Disease,** a name for tuberculosis of serous membranes in the lower animals, especially cattle, given to it on account of the most manifest lesion, the pearly nodules or tumors, which are often pendulous. **P., Epidermic, P., Epithelial,** one of the spheroid concentric masses of epithelial cells often seen in hard papillomata, in squamous epitheliomata and in cholesteatomata; they are also called *pearly bodies.* See *Cell-nests.* **P.-eye,** afflicted with cataract; an opacity of the crystalline lens of the eye. **P. Tumor.** Synonym of *Cholesteatoma.* **P.-white.** Same as *Bismuth-white* and *White Lead.*

Pearly (*perl'-e*) [ME., *perle*, a pearl]. Resembling a pearl; nacreous; clear; translucent. **P. Bodies.** See *Pearls, Epithelial.* **P. Sputa,** a term given by Laennec to the transparent, tough, tenacious masses of mucus of the size of a pea, or smaller, expectorated in the chronic bronchitis of old people, occurring during cold weather. **P. Tubercle.** See *Grutum.*

Pearson's Solution. See *Arsenic.*

Peaslee's Formula. See *Alimentation, Rectal.*

Peat (*pēt*) [ME., *pete*, peat]. The product of the spontaneous decomposition (decay) of plants, especially swamp-plants, in many cases mixed with sand, loam, clay, lime, iron pyrites, ocher, etc. It is largely employed for fuel in some portions of the world, and is extensively used in some countries in mud-baths and for poultices.

Pébrine (*peb'-rin*) [Fr.]. Syn., *gattina*, Ital.; *gattine*, Fr.; *petechia, maladie des corpuscles, maladie des petites, etisie, maladie corpusculeuse.* An infectious epidemic disease which has frequently devastated the silkworm establishments (*magnanneries*) of Europe. The silkworms become infested with *Microsporidia* (*corpuscules de Cornalia, corpuscules vibrants*), which have been variously regarded as bacteria, hematozoa, unicellular algae, spores of higher fungi, or "organites." Cf., *Microbe of Pébrine*, under *Bacteria, Synonymatic Table of*, and *Microsporidia.*

Pebrinous (*peb'-rin-us*) [Fr., *pébrine*, pébrine]. Affected with pébrine.

Peccant (*pek'-ant*) [*peccare*, to sin]. Pathogenic; morbid; unhealthy; offensive.

Pechyagra (*pek-e-a'-grah*) [πῆχυς, forearm; ἄγρα, seizure]. Gout in the elbow-joint.

Pechytyrbe (*pek-it-er'-be*). Synonym of *Scurvy.*

Pecklin, Glands of. See *Gland.*

Pecquet, Cistern of. The receptaculum chyli. **P., Duct of.** See *Duct.* **P., Reservoir of.** See *P., Cistern of.*

Pectase (*pek'-tāz*) [πηκτός, fixed]. A supposititious ferment of plants which converts pectose into pectin.

Pecten (*pek'-ten*) [*pecten*, a comb: *pl.*, *Pectines*]. The os pubis. In biology, a comb-like structure or organ.

Pectic (*pek'-tik*) [πηκτός, fixed]. Concealing, curdling. **P. Acid,** $C_{32}H_{48}O_{32}$, a gelatinous substance obtained when pectin is treated with an alkali and acid successively.

Pectin, Pectine (*pek'-tin*) [πηκτικός, congealing, curdling]. One of a series of vegetable bodies found combined with lime in fleshy fruits and roots; and also in bark, stems and leaves. According to Braconnot, it is present in all plants. It forms the basis of vegetable jelly. Cf. *pectase, pectose, parapectin, metapectin, pectosinic acid, pectinic acid, metapectinic acid, pectinose, arabinose.*

Pectinal (*pek'-tin-al*) [*pecten*, a comb]. Comb-like.

Pectinate (*pek'-tin-āt*) [*pecten*, a comb]. In biology, comb-like; arranged like the teeth of a comb. **P. Antenna,** in biology, an antenna that resembles a comb, due to a linear projection of each joint on the inner side. **P. Ligament,** fibers of connective tissue at the angle of the anterior chamber of the eye, between the iris and the cornea. **P. Muscles,** the musculi pectinati of the heart. **P. Zone,** the upper surface of the basilar membrane external to Corti's organ.

Pectination (*pek-tin-a'-shun*) [*pecten*, a comb]. In biology: (*a*) the state of being pectinate; (*b*) a pecten or comb-like structure.

Pectinato-fimbricate (*pek-tin-a'-to-fim'-brik-āt*) [*pecten*, a comb; *fimbria*, a fringe]. In biology, having the pectinations fringed.

Pectineal (*pek-tin-e'-al*) [*pecten*, a comb]. Pectinal or pectinate. **P. Crest.** Same as *P. Line.* **P. Fascia,** the fascia covering the pectineus and adductor longus muscles. **P. Line,** a linear prominence on the os innominatum. The same as the ileopectineal line. See *Lines, Table of.* **P. Ridge.** Same as *P. Line.*

Pectinella (*pek-tin-el'-ah*) [dim. of *pecten*, a comb: *pl.*, *Pectinellæ*]. In biology, a pectinated appendage of the protomala of myriapods.

Pectineus (*pek-tin-e'-us*). See *Muscles, Table of.*

Pectinic Acid (*pek-tin'-ik*) [πηκτός, fixed], $C_{32}H_{50}O_{30}$, or $C_{32}H_{28}O_{28}$. This equals $4C_8H_8O_7$, according to Fremy; $C_{28}H_{20}O_{26}$, according to Chodnew. It is a colorless, transparent jelly, drying up to a horny mass, insoluble in cold water, scarcely soluble in warm water, insoluble in alcohol and ether.

Pectiniform (*pek-tin'-if-orm*) [*pecten*, a comb; *forma*, a form]. Having the form of or resembling a comb. Fimbriated or serrated. **P. Septum.** See *Septum.*

Pectinose (*pek'-tin-ōz*). Same as *Arabinose.*

Pectize (*pek'-tīz*) [πηκτός, fixed, congealed]. In biology, to congeal or form jelly. Cf. *Pectin.*

Pecto-antibrachialis (*pek'-to-an-te-bra-ke-al'-lis*) [*pectus*, breast; *antibrachium*, the forearm]. In biology, a muscle extending from the sternum to the elbow of certain animals.

Pectocaulis (*pek-to-kaw'-lis*) [*pecten*, comb; *caulis*, stem: *pl.*, *Pectocauli*]. In biology, the common stalk of the polypides of a polyzoary.

Pectoral (*pek'-to-ral*) [*pectus*, breast]. Pertaining to the breast. Of a medicine, useful in diseases of the respiratory tract. **P. Fin,** the thoracic limb of a fish. **P. Fremitus,** vocal fremitus of the chest. **P. Glands,** lymph-glands along the lower border of the pectoralis major muscle. **P. Laminæ,** the basal joints of the legs. **P. Limb,** the anterior or upper limb of a vertebrate animal. **P. Muscles.** See *Muscles, Table of.* **P. Nerves,** the cutaneous branches of the thoracic intercostal nerves. **P. Ridge,** the anterior or external bicipital ridge of the humerus. **P. Species.** See *Breast-tea.* **P. Tubercle,** the impression on the anterior surface of the clavicle for the attachment of the pectoralis major muscle.

Pectoralgia (*pek-tor-al'-je-ah*) [*pectus*, breast; ἄλγος, pain]. Neuralgic pain in the breast.

Pectoralis (*pek-tor-a'-lis*). See *Muscles, Table of.*

Pectoriloquism (*pek-tor-il'-o-kwizm*). Same as *Pectoriloquy.*

Pectoriloquy (*pek-tor-il'-o-kwe*) [*pectus*, breast; *loqui*, to speak]. The distinct transmission of articulate speech to the ear on auscultation. It may be heard over cavities in the lung, over areas of consolidation near a large bronchus, over a pneumothorax when the opening in the lung is patulous; over some pleural effusions. **P., Whispering,** the transmission of the whispered words to the auscultating ear. The sounds seem to emanate directly from the spot auscultated.

Pectorophony (*pek-tor-off'-o-ne*) [*pectus*, breast; φωνή, sound]. Exaggerated vocal resonance, as heard in auscultating the chest.

Pectose (*pek'-tōz*) [πηκτός, fixed]. A compound occurring in fruits, intermediate between starch and glucose. Its exact composition is not known. Heat and other reagents change it into pectin.

Pectosinic Acid (*pek-to-sin'-ik*) [πηκτός, fixed], $C_{64}H_{46}O_{62}$. A substance produced from pectose by treatment with dilute watery alkalies. It is amorphous and of an acid reaction, insoluble in cold dilute acids, scarcely soluble in cold water, but easily soluble in warm water. Its salts are jelly-like and amorphous, and soluble in warm dilute acids.

Pectous (*pek'-tus*) [πηκτός, fixed, congealed]. In biology, consisting of one or more pectin bodies.

Pectunculate (*pek-tung'-ku-lāt*) [*pectunculus*, a little comb]. In biology, furnished with a comb-like arrangement of minute spines or bristles.

Pectunculi (*pek-tunk'-u-li*) [*pecten*, comb]. Plural of *Pectunculus.* Longitudinal striations in the walls of the Sylvian aqueduct.

Pectus (*pek'-tus*) [*pectus*, breast: *pl.*, *Pectora*]. That part of the body between the neck and the abdomen. In biology, the chest, breast, lower surface of the thorax or pectoral region. **P. carinatum.** Same as *Pigeon-breast.* **P. gallinatum.** Same as *Chicken-breast.* **P. gallinaceum.** See *Chicken-breast.*

Pedal (*pe'-dal*) [*pes*, *pedis*, foot]. Pertaining to the foot.

Pedanchone (*ped-ang'-ko-ne*) [παῖς, child; ἀγχόνη, choking]. A synonym of *Cynanche maligna.*

Pedarthrocace (*ped-arth-rok'-as-e*) [παῖς, child; ἄρθρον, a joint; κακός, evil]. A necrotic ulceration or caries of the joints of children. The same as *Osteophthoria.*

Pedate (*ped'-āt*) [*pes*, foot]. In biology, resembling a foot in form or arrangement.

Pedatifid (*ped-at'-if-id*) [*pedatus*, furnished with feet; *findere*, to divide, cleave]. In biology, pedately divided or cleft about half-way to the base.

Pedatinerved (*ped-at'-in-ervd*) [*pedatus*, furnished with feet; *nervus*, nerve]. In biology, applied to leaves having no mid-rib, but supplied with two strong lateral nerves, which give rise to others extending toward the apex; pedately veined.

Pedatipartite (*ped-at-ip-ar'-tīt*) [*pedatus*, furnished with feet; *partire*, to part]. In biology, pedately lobed or cleft, with the sinuses extending about half-way to the base.

Pedatisect (*ped-at'-is-ekt*) [*pedatus*, furnished with feet; *secare*, to cut]. In biology, pedately cleft or parted; having the cleft reaching nearly to the mid-rib or base.

Pedatrophia, Pedatrophy (*ped-at-ro'-fe-ah, ped-at'-ro-fe*) [παῖς, child; ἀτροφία, atrophy]. 1. Any wasting disease of childhood. 2. Synonym of *Tabes mesenterica*, or *Intestinal Catarrh of Children.*

Pederastia, Pederasty (*ped-er-as'-te-ah, ped'-er-as-te*) [παῖς, boy; ἐράειν, to love]. Intercourse with a boy per anum.

Pederastic (*ped-er-as'-tik*) [παιδεραντία, pederasty]. Pertaining to pederasty.

Pedesis (*pe-de'-sis*) [πήδησις, leaping or bounding]. Jevon's name for the indefinite dancing or oscillating motion of the particles of any substance sufficiently powdered and suspended in a suitable liquid. It is a purely physical phenomenon probably due to the fact that the particles are in very delicate equilibrium and hence extremely sensitive to the slightest change of temperature. It is with less propriety termed *Molecular Movement, Brownian Movement,* and *Titubation.*

Pedialgia (*pe-de-al'-je-ah*) [πεδίον, foot; ἄλγος, a pain]. Pain in the foot.

Pediaphtha (*pe-de-af'-thah*) [παῖς, child; ἀφθα, thrush]. Infantile aphtha.

Pediatric (*pe-de-at'-rik*) [παῖς, child; ἰατρία, therapeutics]. Pertaining to pediatrics.

Pediatrics (*pe-de-at'-riks*) [παῖς, child; ἰατρία, therapeutics]. The treatment of the diseases of children.

Pediatry (*pe'-de-at-re*). See *Pediatrics.*

Pedicel (*ped'-is-el*) [*pediculus*, dim. of *pes*, a foot]. In biology: (*a*) a branch of a flower-cluster supporting one or more flowers; (*b*) any little foot, foot-stalk, or foot-like organ. **P.-cell,** in biology, a cell acting as a foot-stalk to some organ; as the flask-shaped cell which supports the antheridium in the *Characeæ.*

Pedicellaria (*ped-is-el-a'-re-ah*) [*pedicellus*, a pedicel: *pl.*, *Pedicellariæ*]. In biology, one of the tactile organs of the echinoderm, serving to keep off parasites, to retain protective substances (sea-weeds, etc.), and as organs of attachment or aids to locomotion.

Pedicellate (*ped-is-el'-āt*) [*pedicellus*, a pedicel]. In biology, having a pedicel.

Pedicellus (*ped-is-el'-us*) [dim. of *pediculus*, a little foot: *pl.*, *Pedicelli*]. In biology: (*a*) a pedicel; (*b*) the third joint of the antenna of an insect.

Pedicle (*ped'-ik-l*) [*pediculus*, a little foot]. In biology: (*a*) the stalk of a flower-cluster, whether supporting one flower or more; (*b*) the bony process giving support to the antlers of a deer; (*c*) the foot of the neural arch of a vertebra. In pathology, the narrow part of a tumor or morbid growth by which it is attached or which supports it. **P. of Invagination,** a

group of cells supporting the hypoblast in a stage of development of certain molluscs (*Pisidium*), and which subsequently develops into the rectum; the rectal peduncle. **P. of a Vertebra,** the portion of a vertebra that projects dorsad from the body on each side.

Pedicular (*ped-ik-u-lar*) [from *pediculus*, dim. of *pes*, a foot]. Pertaining to a pedicle or little foot-stalk. Peduncular.

Pediculation (*ped-ik'-u-la'-shun*) [*pediculus*, dim. of *pes*, foot]. The state of being lousy.

Pedicule (*ped'-ik-ūl*) [*pediculus*, a little foot]. In biology, a pedicel, pedicle, or peduncle.

Pediculi (*pe-dik'-u-li*) [L.]. Plural of *Pediculus*, *q. v.*

Pediculodermata (*pe-dik-u-lo-der'-mat-ah*) [*pediculus*, louse; δέρμα, skin]. The skin-lesion produced by lice.

Pediculophobia (*pe-dik-u-lo-fo'-be-ah*) [*pediculus*, louse; φόβος, fear]. Morbid dread of lousiness.

Pediculosis (*pe-dik-u-lo'-sis*) [*pediculus*, louse]. *Phthiriasis; lousiness;* a contagious animal parasitic skin-affection characterized by the presence of pediculi, which occasion peculiar lesions, scratch-marks, and excoriations, accompanied with itching. See *Pediculus* and *Phthiriasis*, under *Parasites* (*Animal*), *Table of.*

Pediculus (*pe-dik'-u-lus*) [*pediculus*, a louse]. A small parasitic hemipterous insect. See under *Parasites* (*Animal*), *Table of.*

Pedicure (*ped'-ik-ūr*) [*pes*, foot; *cura*, care]. A chiropodist; also the care of the feet.

Pediferous (*ped-if'-er-us*) [*pes*, foot; *ferre*, to bear]. Having feet.

Pediform (*ped'-if-orm*) [*pes*, foot; *forma*, form]. In biology, foot-shaped.

Pedigerous (*ped-ij'-er-us*) [*pes*, foot; *gerere*, to bear]. Bearing feet; pediferous.

Pedigree (*ped'-ig-re*) [possibly from Fr. *pied de grue*, a crane's foot, from the irregular lines on charts of descent]. An account of genealogy or descent.

Pediluvium (*ped-il-u'-ve-um*) [*pes*, foot; *lavare*, to wash]. A foot-bath.

Pedimana (*ped-im'-an-ah*) [*pes*, foot; *manus*, hand]. A family of mammals represented by the marsupials, which have the fore limbs so constructed as to serve either as hands or as feet.

Pedimanous (*ped-im'-an-us*) [*pes*, foot; *manus*, hand]. In biology, having hand-like feet.

Pediocle (*ped'-e-o-kl*) [*pes*, foot; *oculus*, eye]. A stalk-eyed crustacean.

Pediococcus (*ped-e-o-kok'-us*) [*pes*, a foot; κόκκος, a berry]. A term formerly given to a genus of micrococci.

Pedion (*pe'-de-on*) [πεδίον, sole]. Sole of the foot.

Pedion, Pedium (*pe'-de-on, pe'-de-um*) [παῖς, child]. A child; also, a fetus.

Pedionalgia (*ped-e-on-al'-je-ah*) [πεδίον, sole of the foot; ἄλγος, pain]. Pain in the sole of the foot.

Pedipalp (*ped'-ip-alp*) [*pes*, foot; *palpus*, feeler]. In biology, a maxillary palpus, so modified as to serve as an efficient limb, tactile or prehensile organ, as in scorpions, chelifers, etc.

Pedipalpous (*ped-ip-al'-pus*) [*pes*, foot; *palpare*, to feel]. Having pedipalps.

Pedipalpus (*ped-ip-al'-pus*) [*pes*, a foot; *palpare*, to touch: *pl.*, *Pedipalpi*]. A pedipalp.

Peditis (*pe-di'-tis*) [*pes*, foot; ιτις, inflammation]. Williams' term for the serious complication of laminitis of the horse's foot, in which not only the laminæ, but the periosteum and the coffin-bone also, are involved in the inflammatory process.

Pedodynamometer (*ped-o-di-nam-om'-et-er*) [*pes*, foot; δύναμις, power; μέτρον, measure]. An instrument intended to measure the muscular strength of the leg.

Pedogenesis, Pædogenesis (*pe-do-jen'-es-is*) [παῖς, child; γένεσις, generation]. In biology, a form of heterogeny, in which an imaginal generation reproducing sexually by means of fertilized eggs alternates with several generations of parthenogenetically reproducing viviparous larvæ (*e.g.*, in *Cecidomyia*).

Pedologic (*pe-do-loj'-ik*) [παῖς, child; λόγος, science]. Pertaining to pedology.

Pedology (*pe-dol'-o-je*) [παῖς, child; λόγος, science]. The science, or sum of knowledge, regarding childhood, its diseases, hygiene, etc.

Pedometer (*pe-dom'-et-er*) [παῖς, child; μέτρον, measure]. An instrument for determining the weight and height of a new-born child.

Pedometer (*ped-om'-et-er*) [*pes*, foot; μέτρον, a measure]. An instrument for automatically measuring any distance traveled. As formerly constructed, it registered the number of footsteps.

Pedometry (*pe-dom'-et-re*) [παῖς, a child, or *pes*, foot; μέτρον, measure]. 1. The measurement of the newborn child. 2. The use of the pedometer.

Pedomorphism (*pe-do-morf'-izm*) [παῖς(παιδ-), child; μορφή, form]. In biology, Harrison Allen's term for the disposition occasionally exhibited in adult animals for the proportions of different parts of the body to remain as they were in the immature individuals, not due to arrest of growth, but to the fact that certain parts preserve the peculiarities of the young.

Pedonosology (*pe-do-nos-ol'-o-je*) [παῖς, child; νόσος, disease; λόγος, science]. The nosology of diseases peculiar to infancy and childhood. Pediatrics.

Pedonosos, Pedonosus (*pe-don'-o-sos, pe-don'-o-sus*) [παῖς, child; νόσος, disease]. A disease of childhood.

Pedopathy (*pe-dop'-ath-e*) [παῖς, child; πάθος, suffering]. The science of the diseases of children, their treatment, etc.

Pedophlebotomy (*pe-do-fle-bot'-o-me*) [παῖς, child; φλέψ, vein; τομή, a cutting]. Venesection in children.

Pedophlysis (*pe-doff'-lis-is*) [παῖς, child; φλύσις, eruption]. A bullous or pustular eruption in young children.

Pedophthisis (*pe-dof'-this-is*) [παῖς, child; φθίσις, wasting]. Tabetic or other wasting disease of children.

Pedopyra (*pe-dop'-ir-ah*) [παῖς, child; πῦρ, fire]. A febrile disease of children. **P. americana.** Synonym of *Cholera infantum.*

Pedotrophic (*pe-do-trof'-ik*) [παῖς, child; τροφή, nourishment]. Pertaining to the rearing of children.

Pedotrophist (*pe-dot'-ro-fist*) [παῖς, child; τροφή, nourishment]. One skilled in, or devoted to, the rearing of children.

Pedotrophium (*pe-do-tro'-fe-um*) [παῖς, child; τρέφειν, to nourish]. A foundling hospital, or one for orphan children.

Pedotrophy (*pe-dot'-ro-fe*) [παῖς, child; τροφή, nourishment]. The hygiene of childhood; the care, nursing, and regimen of children.

Peduncle (*pe'-dung-kl*) [*pedunculus*, a little foot]. In biology, a foot-stalk, or foot-like part, a pedicel or pedicle, the stalk of a flower-cluster, of a barnacle, or of any organ. In anatomy, any supporting part. **P., Anterior Cerebellar.** Synonym of *P., Superior Cerebellar.* **P. of the Cerebellum.** See *P., Inferior, Middle, and Superior Cerebellar.* **P., Cerebral.** Synonym of *Crus cerebri.* **P. of the Cerebrum,** the crus cerebri. **P. of the Corpus callosum,** the

anterior perforated space. **P., Inferior Cerebellar,** one of the two bands of white matter passing up from the oblongata, a continuation of the restiform bodies, and connecting the medulla with the cerebellum. It forms the lower lateral wall of the fourth ventricle. **P., Middle Cerebellar,** one of the bands of white matter joining the pons and the cerebellum. **P., Olivary,** a band of fibers passing from the olivary nucleus to the lemniscus and the tegmentum. **P. of the Pineal Gland,** a delicate white band passing forward from each side of the pineal gland along the edge of the third ventricle. **P., Posterior Cerebellar.** Synonym of *P., Inferior Cerebellar.* **P., of the Spinal Cord,** the inferior cerebellar peduncle. **P. Superior Cerebellar,** one of the two bands of white matter that pass from the cerebellum to the testes of the corpora quadrigemina. **P., Transverse.** Synonym of *P., Middle Cerebellar.*

Peduncled (*pe'-dung-kld*) [*pedunculus*, a little foot]. Furnished with a peduncle; pedunculate.

Peduncular (*pe-dung'-ku-lar*) [*pedunculus*; dim. of *pes*, foot]. Pertaining to a peduncle.

Pedunculate, Pedunculated (*pe-dung'-ku-lāt, pe-dung'-ku-la-ted*) [*pedunculus*, dim. of *pes*, foot]. Having a peduncle; stalked.

Pedunculus (*pe-dung'-ku-lus*). Same as *Peduncle.*

Peeling (*pēl'-ing*) [*pellis*, skin]. A term applied to the process of desquamation, as in scarlet fever.

Peenash (*pe'-nash*) [E. Ind.]. The Eastern name for *myiosis*, produced by *Lucilia macellaria*. See *Parasites (Animal)*, *Table of.*

Peeosyne (*pe-e-os'-in-e*). Synonym of *Therapeutics.*

Peg [ME., *pegge*, a spike]. 1. A pointed pin of wood, metal, or other material. 2. A wooden leg. **P.-leg,** a wooden leg of the simplest form. **P.-teeth,** a name given by Hutchinson to the teeth of children with hereditary syphilis, from the peg-like appearance of the crowns.

Pegology (*peg-ol'-o-je*) [πηγή, fountain; λόγος, science]. The science of medicinal springs; balneology.

Peinotherapy (*pi-no-ther'-ap-e*) [πεῖνα, hunger; θεραπεύειν, to heal]. The cure of disease by the deprivation of food; hunger-cure; limotherapy.

Pelada (*pel'-a-dah*) [Fr.]. Alopecia of the scalp; also syphilitic alopecia.

Pelade (*pel-ahd'*) [Fr.]. A synonym of *Alopecia areata* or *Area celsi.*

Pelage (*pel-ahj'*) [Fr.; πέλλα, the hair]. In biology, the hairy system of the body as a whole. The hair, wool, or fur of a mammal.

Pelagian (*pel-a'-je-an*) [πέλαγος, the sea]. Inhabiting the deep sea.

Pelagic (*pel-aj'-ik*) [πελαγικός, pertaining to the open sea; from πέλαγος, the sea]. Inhabiting the high seas, the deep or open ocean, as contrasted with *limnetic*, or fresh-water inhabitants or the *littoral* marine fauna and flora. Cf. *Allopelagic, Autopelagic, Bathypelagic, Chimopelagic, Eupelagic, Nyctipelagic, Spanipelagic*, under *Plankton.* **P. Fauna and Flora,** the animals and plants (passively floating or actively swimming) which remain at the surface of the sea and never leave it, or only for a short time descend to a slight depth. Among such true pelagic animals are the *Radiolaria, Peridinia, Noctiluca, Medusæ, Siphonophora, Ctenophora, Sagitta, Pteropoda, Heteropoda*, a greater part of the *Crustacea*, the larvæ of *Echinodermata*, of many *Vermes*, etc. **P. Tow-stuff,** the small organisms obtained by towing nets at sea.

Pelargonic Acid (*pel-ar-gon'-ik*) [πελαργός, a stork], $C_9H_{18}O_2$. A monobasic crystalline acid obtained from the essential oil of *Pelargonium roseum* and from other oils. It is employed in the flavoring of wines. See *Acid.*

Pelargonium (*pel-ar-go'-ne-um*) [πελαργός, a stork]. A genus of the *Pelargoniæ* or stork's-bills, indigenous in Africa and India and cultivated in Europe and America. Several species have medicinal properties. **P. anceps** is an emmenagogue. **P. antidysentericum,** is used in dysentery. **P. roseum,** the rose-geranium, contains an oil from which pelargonic acid is obtained. Unof.

Pelican (*pel'-ik-an*) [πελεκᾶν, to hew with an ax]. An old variety of forceps, or key, for the extraction of teeth. In chemistry, a glass vessel for continued distillation.

Pelicology (*pel-ik-ol'-o-je*) [πέλιξ, pelvis; λόγος, science]. The study of the pelvis and its proportions.

Pelicometer (*pel-ik-om'-et-er*). Synonym of *Pelvimeter.*

Pelidnephidrosis (*pel-id-nef-id-ro'-sis*) [πελιδνός, livid; ἐφίδρωσις, ephidrosis]. Same as *Melinephidrosis.*

Pelidnoma (*pel-id-no'-mah*). Synonym of *Ecchymosis.*

Pelidnus (*pel-id'-nus*) [πελιδνός, livid]. A leaden-colored condition of the skin.

Pelioma (*pel-e-o'-mah*) [πελίωμα, a livid spot: *pl.*, *Peliomata*]. A livid spot, as seen in peliosis. **P. typhosum.** See *Taches bleuâtres.*

Peliosis (*pel-e-o'-sis*) [πελιός, livid]. A livid condition of the skin due to extravasation of blood. **P. pemphigoides.** See *P. rheumatica.* **P. rheumatica,** *Purpura rheumatica;* an acute purpuric skin-disease, more common in persons from fifteen to thirty years old, and characterized by the presence of non-elevated or slightly elevated spots, from the size of a pin's head to a lentil, of a deep-red color, which do not disappear on pressure, and soon become dark-purple. They are usually seen on the legs and feet, often clustered around painful joints; they are also found on the hands and arms, and very rarely on the trunk and face. At times erythematous or urticarial rashes (*P. urticans*) are present on other parts of the body, and more rarely vesication occurs (*P. pemphigoides*). **P. senilis,** the minute hemorrhages into the skin seen in marantic senile persons. **P. urticans.** See *P. rheumatica.*

Pellada (*pel-a'-dah*). See *Pelade.*

Pellagra (*pel-a'-grah*) [It., *pelle*, skin; *agra*, rough; or πέλλα, skin; ἀγρα, seizure]. *Ergotism, Lombardian Leprosy, Lepra asturiensis;* an endemic trophoneurotic skin disease occurring among the squalid and destitute, due to chronic poisoning with diseased or fermented maize, and affecting chiefly the cerebro-spinal and digestive systems. It usually occurs in those between thirty and fifty years of age. It always begins in spring, and the lesion appears on the parts of the body exposed to the air and light (face, neck, back of hands, and feet). It consists of an intense, rapidly-extending erythema, bright-red, livid or brown in color, with much swelling, and causing violent burning or itching. The spreading edge of the patches is much elevated and generally darker than the central portion. There are marked nervous and general symptoms, insanity, mania, or melancholia being common. **P. sine pellagra,** [L., pellagra without pellagra]. Pellagra without cutaneous eruption.

Pellagracein (*pel-a-gra'-se-in*) [It., *pelle*, skin; *agra*, rough; or πέλλα, skin; ἀγρα, seizure]. A name given by Lombroso to a poisonous substance found in decomposed corn-meal; it is probably a mixture of poisonous ptomains, some of which induce narcosis and paralysis; other symptoms are like those of nicotin-poisoning.

Pellagrin (*pel'-a-grin*) [It., *pella*, skin; *agra*, rough; or πέλλα, skin; ἀγρα, seizure]. One who is afflicted with pellagra.

Pellagrous (*pel-a′-grus*) [πέλλα, skin; ἄγρα, seizure]. Affected with pellagra; pertaining to pellagra.

Pellet (*pel′-et*) [*pila*, ball]. A small pill or tablet.

Pelletierin (*pel-et′-e-er-in*) [after Bertrand *Pelletier*, a French chemist, 1761–97], $C_8H_{13}NO$. An aromatic oily alkaloid from pomegranate-bark. Its tannate is an effective teniafuge. Dose ½ to 1 gr., followed by a purgative. Pelletierin is actively poisonous, causing weakness of the legs. Unof.

Pellibranchiate (*pel-ib-rang′-ke-āt*) [*pellis*, skin; *branchiæ*, gills]. In biology, breathing by means of the skin.

Pellicle (*pel′-ik-l*) [*pellis*, skin]. 1. A thin membrane, film, scum, or cuticle. 2. The *cortical layer* of plants. **P., Medicated,** a medicamentous layer or film left on the skin by the evaporation of collodion which is charged with some drug.

Pellicula (*pel-ik′-u-lah*) [*pellicula*, a small skin]. In biology, the cortical layer of a plant, as in lichens and some fleshy fungi.

Pellicular (*pel-ik′-u-lar*) [*pellicula*, dim. of *pellis*, skin]. Of the nature of, or resembling a pellicle; thin-skinned.

Pelliculate (*pel-ik′-u-lāt*) [*pellicula*, a small skin]. Covered with a pellicle.

Pellis (*pel′-is*) [L.]. The skin.

Pellitory (*pel′-it-or-e*) [ME., *pelleter*, pellitory]. See *Pyrethrum*. **P., Persian.** See *Pyrethrum roseum*. See also *Parietaria*. **P., American,** *Parietaria pennsylvanica*.

Pellous (*pel′-us*) [*pellis*, skin]. Dark-skinned.

Pellucid (*pel-u′-sid*) [*pellucere*, to shine through]. Transparent; translucent; not opaque. **P. Zone,** the zona pellucida, or inclosing membrane of the mammalian ovum. It is also called the *zona radiata*.

Pellucidity (*pel-u-sid′-it-e*). Same as *Pellucidness*.

Pellucidness (*pel-u′-sid-ness*) [*pellucere*, to shine through]. The state of being pellucid.

Pelma (*pel′-mah*) [πέλμα, sole]. The lower surface of the toes; also the entire sole of the foot.

Pelmatogram (*pel-mat′-o-gram*) [πέλμα, the sole of the foot; γράμμα, a writing]. A print of the sole.

Pelor (*pel′-or*) [πέλωρ, a monster]. A fetal monstrosity with some parts abnormally large.

Peloria (*pel-o′-re-ah*) [πέλωρ, a monster]. In biology, the production of regular flowers upon plants the flowers of which are normally irregular.

Peloriate (*pel-or′-e-āt*) [πέλωρ, a monster]. Characterized by peloria.

Peloric (*pel-or′-ik*) [πέλωρ, a monster]. Characterized by peloria.

Pelorisation, Pelorization (*pel-or-iz-a′-shun*) [πέλωρ, a monster]. The becoming affected with peloria.

Pelorism (*pel′-or-izm*) [πέλωρ, a monster]. Same as *Peloria*.

Pelorize (*pel′-or-īz*) [πέλωρ, a monster]. In biology, to bring about peloria.

Pelosin (*pel′-o-zin*). See *Buxin*.

Pelotonnement (*pel-o-ton′-mon(g)*) [Fr.]. The folding and the compression of the lower extremities of the fetus against the trunk, preliminary to expulsion in breech-presentations.

Pelt [ME., *pelt*, pelt]. The skin of a beast with the hair on it.

Peltate (*pel′-tāt*) [πέλτη, a light shield]. In biology, shield-shaped.

Peltatifid (*pel-tat′-if-id*) [πέλτη, a light shield; *findere*, to clean]. In biology, peltate and cut into subdivisions.

Peltcleis (*pel′-tik-lis*) [πέλτη, a shield; κλείς, bolt]. In biology, a tubercle attached to the posterior margin of the carapace of certain crustaceans (Bate).

Peltifolious (*pel-tif-o′-le-us*) [*pelta*, a shield; *folium*, a leaf]. In biology, having peltate leaves.

Peltiform (*pel′-tif-orm*) [*pelta*, a shield; *forma*, form]. Peltate.

Peltinerved (*pel′-tin-ervd*) [*pelta*, a shield; *nervus*, a nerve]. In biology, having nerves radiating from a central point, *e. g.*, certain leaves.

Pelvangustia (*pel-van-gus′-te-ah*) [*pelvis*, pelvis; *angustia*, narrowing]. A contracted state of the pelvis.

Pelveoperitonitis (*pel′-ve-o-per-it-on-i′-tis*) [*pelvis*, pelvis; περιτόναιον, peritoneum; ιτις, inflammation]. Inflammation of the pelvic peritoneum.

Pelveoscope (*pel′-ve-o-skōp*) [*pelvis*, pelvis; σκοπεῖν, to examine]. An instrument for examining the pelvis; a pelvimeter.

Pelveoscopy (*pel-ve-os′-ko-pe*) [*pelvis*, pelvis; σκοπεῖν, to examine]. The examination of the pelvis; pelvimetry.

Pelviarium (*pel-ve-a′-re-um*) [L.]. An artificial pelvis used as a model to demonstrate the anatomy and functions of the pelvic basin.

Pelvic (*pel′-vik*) [*pelvis*, a basin]. Pertaining to the pelvis. **P. Abscess,** a suppurative inflammation of the connective tissue of the pelvic cavity, most common in women, and usually associated with puerperal or gonorrheal infection. **P. Aponeurosis,** the tendinous lamina having its origin at the brim of the pelvis and lining the pelvic cavity. **P. Arch.** Same as *P. Girdle*. **P. Axis,** the curved axial line of the pelvic cavity. **P. Canal,** the birth-canal. **P. Cavity,** the cavity forming the lower part of the abdomen. **P. Cellulitis,** inflammation of the connective tissues in the vicinity of the uterus, or between the uterus and perineum. See *Parametritis*. **P. Contraction.** See *Pelvis, Planes of*. **P. Diameters.** See *Pelvis, Diameters of*. **P. Diaphragm,** the muscles forming the pelvic floor. **P. Expansion.** See *Pelvis, Planes of*. **P. Fascia.** See *Fascia*. **P. Girdle,** the arch formed by the ilium, ischium and pubis, or in the higher vertebrates by the two innominate bones. **P. Hematocele.** See *Hematocele*. **P. Hernia,** a rare condition in which there is a protrusion of some portion of the pelvic contents through an abnormal opening below the brim of the true pelvis; the chief forms are the *perineal, vaginal, sciatic,* and *pudendal*. **P. Index,** the relation of the antero-posterior to the transverse diameter of the pelvis. **P. Inlet,** the superior strait. **P. Limb,** the limb attached to the pelvic girdle. **P. Outlet,** the inferior strait. **P. Peritonitis.** See *Perimetritis and Pelveoperitonitis*. **P. Plexus.** See *Plexuses, Table of*. **P. Region,** the region within the true pelvis.

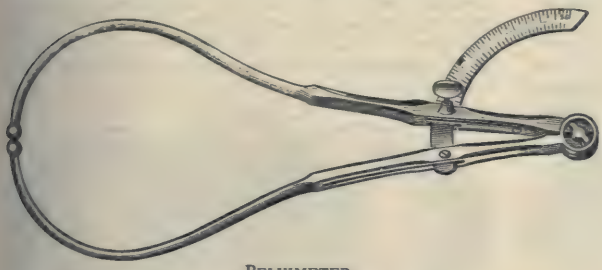
Pelvicellulitis (*pel-vis-el-u-li′-tis*) [*pelvis*, pelvis; *cellula*, a little cell; ιτις, inflammation]. See *Pelvic Cellulitis*.

Pelvicliseometer (*pel-vik-liz-e-om′-et-er*) [*pelvis*, pelvis; κλίσις, inclination; μέτρον, measure]. An instrument for determining the inclination and the diameters of the pelvis.

Pelvicology (*pel-vik-ol′-o-je*). Same as *Pelycology*.

Pelvicrural (*pel-vik-ru′-ral*) [*pelvis*, pelvis; *crus*, leg]. Pertaining to the pelvis and the thigh.

Pelvicula (*pel-vik′-u-lah*). Synonym of *Orbit*.



Pelvidymus (*pel-vid′-im-us*) [*pelvis*, pelvis; δίδυμος, double]. The same as *Dipygus*.

Pelviform (*pel′-vif-orm*) [*pelvis*, a basin; *forma*, shape]. In biology, shaped like a shallow cup.

Pelvigraph (*pel′-vig-raf*) [*pelvis*, pelvis; γράφειν, to write]. An apparatus that automatically records the outline of the pelvic wall.

Pelvigraphy (*pel-vig′-ra-fe*) [*pelvis*, pelvis; γράφειν, to write]. A contour or tracing of the pelvic wall.

Pelvimeter (*pel-vim'-et-er*) [*pelvis*, pelvis; *μέτρον*, a measure]. An instrument for measuring the pelvic dimensions.

PELVIMETER.

Pelvimetry (*pel-vim'-et-re*) [*pelvis*, pelvis; *μέτρον*, measure]. The estimation of the dimensions of the pelvis. **P., Combined,** a combination of external and internal pelvimetry. **P., Digital,** pelvimetry by means of the hand. **P., External,** measurement of the external diameters of the pelvis, by which to estimate the dimensions of the internal parts. **P., Internal,** measurement of the internal dimensions of the pelvis by the hand or by the pelvimeter. See *Pelvis*.

TABLE OF MEASUREMENTS OF THE FEMALE PELVIS COVERED WITH THE SOFT PARTS.

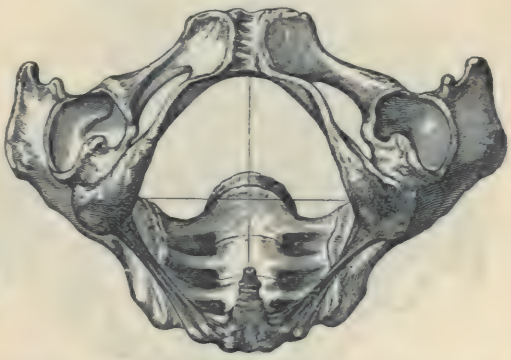
Between iliac spines,	26	cm.
" " crests,	29	"
External conjugate diameter,	20¼	"
Internal " diagonal,	12¾	"
True conjugate, estimated,	11	"
Right diagonal,	22	"
Left "	22	"
Between trochanters,	31	"
Circumference of pelvis,	90	"

Pelvimyon (*pel-vim-i'-on*) [*pelvis*, a basin; *μυών*, a cluster of muscles]. Any myon of the pelvic arch.

Pelviotomy (*pel-ve-ot'-o-me*) [*pelvis*, pelvis; *τομή*, a cutting]. Section or cutting of the bones of the pelvis, especially the division of the symphysis pubis in case of difficult labor.

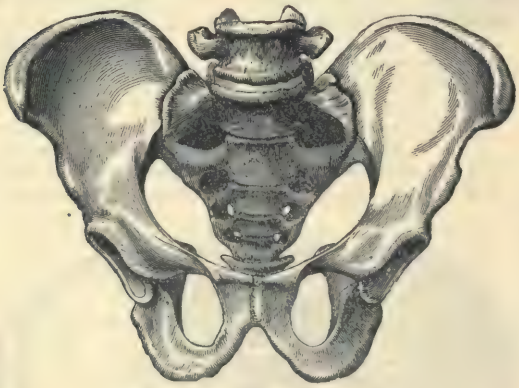
Pelviperitonitis (*pel-vip-er-it-on-i'-tis*). Synonym of *Pelveoperitonitis*.

Pelvis (*pel'-vis*) [*pelvis*, a basin]. The basin-like cavity of the inferior part of the trunk containing the rectum, and the urinary bladder and genital organs,



FEMALE PELVIS, SEEN FROM THE FRONT.

and bounded anteriorly and laterally by the innominate bones, posteriorly by the sacrum and coccyx, and inferiorly by the floor of the pelvis. **P. æquabiliter justo-major,** one equally enlarged in all diameters, with preservation of the normal proportions. It complicates labor by rendering it too precipitate. **P. æquabiliter justo-minor,** a normally proportioned pelvis, but with all its diameters reduced. **P., Anatomic.** See *P., Static.* **P., Axis of** (*of inlet or outlet*), a perpendicular to the middle of the antero-posterior diameter. **P., Beaked,** one in which the pubic bones are compressed laterally so as to approach each other, and are pushed forward. It is seen in the osteomalacic pelvis **P., Bony,** the framework of the pelvis. See *Pelvis*. **P., Brim of,** the entrance to the pelvic cavity, variously called the *inlet*, *superior strait*, *margin*, or *isthmus*. **Capuron, Cardinal Points of,** four fixed points of the pelvic inlet, the two ileo-pectineal



FEMALE PELVIS, VIEWED IN THE AXIS OF THE BRIM.
Showing the diameters of the superior strait.

OUTLET OF PELVIS.
Antero-posterior and transverse diameters of outlet seen from below.

eminences anteriorly, and the two sacro-iliac joints posteriorly. **P. cerea,** an osteomalacic pelvis in which the bones are very soft. **P., Cordate,** one in which the inlet is heart-shaped. **P., Cordiform,** an abnormal pelvis in which the inlet is shaped like the heart of playing cards. **P., Coxalgic,** a pelvis deformed as the result of hip-disease. **P., Deformities of.** See *Classification at end of this article.* **P., Diameters of** (*of the inlet*), the *antero-posterior* (*sacro-pubic*, or *conjugate*), from the upper edge of the promontory of the sacrum to a point an eighth of an inch below the upper border of the pubic symphysis; it

measures 11 cm.; the *transverse*, from side to side at the widest point; it measures 13½ cm.; the *oblique* (*right* and *left*), obliquely between the *points of Capuron*; it measures 12¾ cm.; (*of the outlet*), the *antero-posterior*, from the tip of the coccyx to the sub-pubic ligament; it measures 9½ cm.; the *transverse*, between the ischial tuberosities; it measures 11 cm.; the *oblique*, from the under surface of the sciatic ligaments to the junction of the ischio-pubic rami. **P., Dwarf,**

Male Pelvis, seen from the Front.

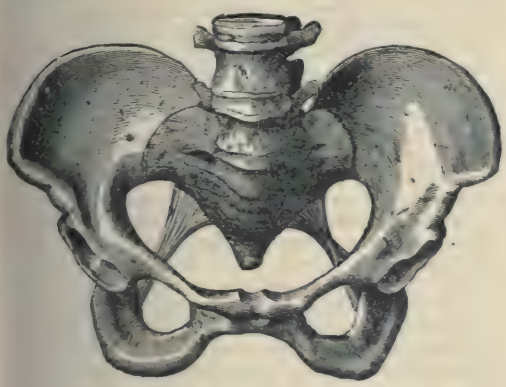
a justo-minor pelvis of small size, corresponding to the dwarfed state of the body. **P., Dynamic,** that of the woman in labor. **P., Elastic.** Synonym of *P., Osteomalacic.* **P., False,** that part of the pelvis (called, also, the *superior* or *large* pelvis) above the ileo-pectineal line. **P., Fetal.** Same as *P., Funnel-shaped.* **P., Fissured,** a form of rachitic pelvis in which the ilia are pushed forward and rendered nearly parallel. Exstrophy of the bladder is a common complication. **P., Floor of,** the united mass of skin, connective tissue,

Kyphotic Pelvis.

muscles, and fascia forming the inferior boundary of the pelvis. **P., Funnel-shaped,** one that is narrowed progressively from above downward; called, also, *P., Masculine.* **P., Giant.** Same as *P., Justo-major.* **P., Inferior.** See *P., True.* **P., Inlet of.** See *Inlet of Pelvis.* **P., Justo-major.** See *P. æquabiliter justo-major.* **P., Justo-minor.** See *P., æquabiliter justo-minor.* **P. of Kidney,** the funnel-shaped chamber extending into the interior of the kidney and opening into the ureter. **P., Kilian's.** Synonym of *P., Osteomalacic.* **P., Kyphotic,** one with a posterior curvature of the lumbar spinal column with increase of the conjugate diameter of the inlet, but decrease of the transverse diameter of the outlet, through approximation of the tuberosities of the ischium. **P., Large.** See *P., False.* **P., Lordotic,** one with an anterior curvature of the lumbar spinal

Infantile Pelvis, viewed in the Axis of the Brim.

Oblique Pelvis.
From ankylosis of the hip-joint and disuse of the right leg.



Oblique Pelvis of Nægele.

column. **P. major,** the false pelvis. **P., Malacosteon.** Synonym of *P., Osteomalacic.* **P., Masculine.** See *P., Funnel-shaped.* **P. minor,** the true pelvis. **P., Nægele's Oblique,** a pelvic deformity with ankylosis of one sacro-iliac synchondrosis, lack of development of the associated lateral sacral mass, and other defects that distort the diameters and render the conjugate oblique in direction. **P. nana,** a dwarf pelvis. **P., Obliquely Contracted.** Same as *P., Nægele's.* **P., Obliquity of,** called, also, the **Inclination,** the angle between the axis of the pelvis and that of the body. **P., Obstetric,** the static pelvis *plus* the last lumbar vertebra. **P., Osteomalacic,** a distorted pelvis characterized by a lessening of the transverse and oblique diameters, with great increase of the antero-posterior diameter. It is due to morbid softening of the bones. **P., Outlet of.** The inferior opening of the pelvic canal. **P., Planes of,** imaginary surfaces touching all points of the circumference. The *plane of pelvic expansion* perforates the middle of

Figure-of-eight Rachitic Pelvis.

Reniform Rachitic Pelvis.

the symphysis, the tops of the acetabula, and the sacrum between the second and third vertebræ. Its antero-posterior diameter is 12¾ cm., its transverse diameter 12½ cm. The *plane of pelvic contraction* passes through the tip of the sacrum, the spines of the ischia and the under surface of the symphysis. Its antero-posterior diameter is 11½ cm.; its transverse diameter 10½ cm. **P., Pseudo-osteomalacic,** a pelvis deformed by rickets, resembling that caused by osteomalacia. **P., Rachitic,** the distortion produced by rickets, usually consisting in a sinking in and forward of the sacro-vertebral angle, with a flaring outward of the iliac crests and increased separation of the iliac spines. **P., Reduced,** a generally contracted pelvis; a justo-minor pelvis. **P., Reniform,** one in which the inlet is kidney-shaped. **P., Robert's,** one in which there is an ankylosis of both sacro-iliac joints, with a rudimentary sacrum, both lateral sacral masses being undeveloped, and other malformations, the oblique and transverse diameters being much narrowed.

Transversely Contracted Pelvis of Robert.

P., Rostrated. Synonym of *P., Beaked.* **P., Round,** one in which the inlet is almost round in outline, owing to a diminution of the difference between the conjugate and the transverse diameter. **P., Rubber.** Synonym of *P., Osteomalacic.* **P., Scoliotic,** a distorted pelvis caused by lateral curvature of the spine. **P., Simple Flat,** one in which the only de-

Rostrated Malacosteon Pelvis in Early Stage of Deformity.

formity consists in a shortening of the antero-posterior diameter. **P., Small.** See *P., True.* **P. spinosa,** a rachitic pelvis in which the crest of the pubis is very sharp, and presents a spine at the insertion of the parvi psoas. **P., Split,** a form in which there is congenital separation of the pubic bones at the symphysis. It is often associated with exstrophy of the bladder. **P., Static,** the bony pelvis, called, also, the *P., Anatomic.* **P., Straits of,** *superior* and *inferior,* the planes of the inlet and outlet. **P., Superior.** See *P., False.* **P., Transversely Contracted.** Same as *P., Robert's.* **P., Triangular,** one with a triangular inlet.

P., Triradiate, a pelvis in which the promontory is pushed forward and the acetabula pressed inward; it is usually due to osteomalacia, and but rarely to rickets. **P., True,** that below the ilio-pectineal line, called, also, the *small*, or *inferior* pelvis, or the *pelvic cavity*. **P., Undeveloped.** Same as *P., Funnel-shaped*.

CLASSIFICATION OF DEFORMITIES OF THE FEMALE PELVIS, ACCORDING TO SCHAUTA.

A. ANOMALIES OF THE PELVIS THE RESULT OF FAULTY DEVELOPMENT.
1. Simple flat.
2. Generally equally contracted (*justo-minor*).
3. Generally contracted flat (*non-rachitic*).
4. Narrow funnel-shaped (*fetal* or *undeveloped*).
5. Imperfect development of one lateral mass of the sacrum (*obliquely contracted* or *Nægele's pelvis*).
6. Imperfect development of both lateral masses (*transversely contracted* or *Robert's pelvis*).
7. Generally equally enlarged (*justo-major* or *giant pelvis*).
8. Split pelvis.

B. ANOMALIES DUE TO DISEASE OF THE PELVIC BONES.
1. Rachitis.
2. Osteomalacia.
3. New Growths.
4. Fractures.
5. Atrophy, Caries, and Necrosis.

C. ANOMALIES IN THE CONJUNCTION OF THE PELVIC BONES.
1. *Too firm union* (*synostosis*).
   (1) of symphysis.
   (2) of one or both sacro-iliac synchondroses.
   (3) of sacrum with coccyx.
2. *Too loose a union or separation of the joints.*
   (1) Relaxation and rupture.
   (2) Luxation of the coccyx.

D. ANOMALIES DUE TO DISEASE OF THE SUPERIMPOSED SKELETON.
1. Spondylolisthesis.
2. Kyphosis.
3. Scoliosis.
4. Kypho-scoliosis.

E. ANOMALIES DUE TO DISEASE OF THE SUBJACENT SKELETON.
1. Coxalgia.
2. Luxation of one femur.
3. Luxation of both femora.
4. Unilateral or bilateral club-foot.
5. Absence or bowing of one or both lower extremities.

Pelvisacral (*pel-vis-a'-kral*) [*pelvis*, pelvis; *sacrum*, sacrum]. Pertaining to the pelvis and the sacrum.

Pelvisternal (*pel-vis-ter'-nal*) [*pelvis*, pelvis; στέρνον, breastplate]. Having the character of a breastbone.

Pelvisternum (*pel-vis-ter'-num*) [*pelvis*, pelvis; στέρνον, breastbone]. In biology, an infero-median osseous, cartilaginous, or ligamentous element of the pelvic arch, supposed to correspond to the omosternum of the pectoral arch.

Pelvitomy (*pel-vit'-o-me*) [*pelvis*, pelvis; τομή, a cutting]. Synonym of *Pelviotomy*.

Pelycography (*pel-ik-og'-ra-fe*) [πέλυξ, pelvis; γράφειν, to write]. A description of the pelvis.

Pelycology (*pel-ik-ol'-o-je*) [πέλυξ, pelvis; λόγος, science]. A treatise upon the pelvis.

Pelycometer (*pel-ik-om'-et-er*) [πέλυξ, basin; μέτρον, measure]. Same as *Pelvimeter*.

Pelycometresis (*pel-ik-o-met-re'-sis*). Synonym of *Pelvimetry*.

Pelycotomy (*pel-ik-ot'-o-me*) [πέλυξ, pelvis; τομή, a cutting]. Division of the os pubis; symphyseotomy. See *Pelviotomy*.

Pelyocheirometresis (*pel-e-o-ki-ro-met-re'-sis*) [πέλυξ, pelvis; χείρ, hand; μέτρον, measure]. Synonym of *Pelvimetry, Digital*.

Pelyometer (*pel-e-om'-et-er*) [πέλυξ, pelvis; μέτρον, measure]. Same as *Pelvimeter*.

Pelyometresis (*pel-e-o-met-re'-sis*) [πέλυξ, pelvis; μέτρον, measure]. Same as *Pelvimetry*.

Pemmican (*pem'-ik-an*) [Amer. Ind.]. A food used by Arctic travelers. It consists of a mixture of the best beef and fat dried together. Sugar is sometimes added, as well as raisins and currants.

Pemphigoid (*pem'-fig-oid*) [πέμφιξ, blister; εἶδος, like]. Resembling or having the nature of pemphigus. A term sometimes given to a single bleb running no definite course, and resembling pemphigus.

Pemphigus (*pem'-fig-us*) [πέμφιξ, a blister]. *Pompholyx; Bladder-tetter;* an inflammatory disease of the skin characterized by the formation of variously-sized blebs that appear in successive crops, occasionally also on the mucous membranes. The acute form is contagious and is most frequent in infants (*P. neonatorum*); in adults recovery may take place, although there is an acute form that sometimes proves fatal. The acute form of the disease seems to be infectious; microörganisms, especially a diplococcus, have been found in the fluid of the blebs. Some cases of pemphigus appear to be neurotic in origin. **P. acutus,** the acute form of the disease. **P. benignus.** See *P. vulgaris*. **P. cachecticorum, P. cachecticus,** pemphigus occurring in cachectic persons. **P. chronicus.** See *P. vulgaris*. **P. circinatus.** See *Hydroa herpetiforme*. **P. contagiosus,** *Epidemic Pemphigus;* a variety that occurs in epidemics, invariably in children. **P. contagiosus tropicus,** an epidemic form occurring only in the tropics, and appearing in a diffuse or infantile and an axillary or adult form. **P. diphtheriticus,** a form in which yellow lymph forms at the bases of the blebs. **P. diutinus.** See *P. vulgaris*. **P., Epidemic.** See *P. contagiosus*. **P. foliaceus,** a rare form in which the blebs are flaccid, with puriform contents, and soon rupture. The disease spreads slowly but surely, and the whole body eventually becomes involved. The mucous membranes may also be affected. The patient usually dies in an exhausted typhoid condition. **P. gangrænosus,** a variety in which the inflammatory process is intense and superficial, or deep sloughs form. See also *Dermatitis gangrænosus infantum*. **P. gyratus,** pemphigus in which the blebs are arranged in circular lines. **P. hæmorrhagicus,** *Purpura bullosa;* pemphigus attended with hemorrhage into the bullæ, varying in amount from enough to impart a mere pink tint to the serum up to black. **P. hystericus.** See *P. pruriginosus*. **P. leprosus,** the bullous eruption of leprosy. **P. localis.** See *P. solitarius*. **P. major.** Synonym of *P. vulgaris*. **P. malignus.** See *P. pruriginosus*. **P. medicamentosus,** pemphigus due to the administration of a drug. **P. neonatorum.** See *Pemphigus*. **P. pruriginosus,** a form associated with severe itching, purulent contents of the bullæ, and the appearance of wheals. From the scratching, eczema, ecthyma and other forms of dermatitis are produced. The patient becomes exhausted from loss of sleep, and a fatal issue may result. The affection is also called *Pemphigus malignus, Hydroa herpetiforme, Pemphigus hystericus*. **P. puerperalis,** pemphigus occurring in puerperal women. It may be associated with puerperal infection. Some cases have been considered forms of Duhring's disease, dermatitis herpetiformis. **P. scorbuticus,** the blebs or the blood-stained serum that sometimes appear over hemorrhagic areas in scurvy. **P. solitarius,** *pemphigus localis;* a form in which the blebs are single or few in number, localized in distribution, and accompanied by little constitutional disturbance. They occur where the circulation is feeble, as on the toes, fingers, or nose. They are chiefly seen in the aged and debilitated. **P. syphiliticus,** the bullous eruption of syphilis, most common in the syphilitic newborn. **P. vegetans,** an extremely rare form, the bullæ on the mucous membrane preceding those on the

skin by days or even weeks. The latter form most frequently in the axillæ or groins, and on the backs of the hands and feet. After rupture, they leave extensive excoriations, which show little or no tendency to heal, but ulcerate deeply and fungate, discharging offensive, viscid fluid. Death usually results from profound cachexia. **P. vulgaris,** *Pemphigus benignus*; the chronic form of pemphigus; it is a comparatively rare disease, and more frequently attacks children. The eruption may occur on any part of the body except the palms and soles; the seats of election are the abdomen, chest and thighs, face, ears and neck, genitals, and backs of the hands and feet. The lesions are always bilateral and sometimes symmetric. The bullæ may be as large as a walnut or larger; they soon dry up, forming crusts, or burst and form scabs. Successive crops appear, sometimes daily (*P. diutinus*).

Pen [*penna*, a feather]. A feather; a quill. **P.-sac,** in biology, the flap or hood-like prolongation of the mantle of a cephalopod which contains the pen, or calamary.

Pencil (*pen'-sil*) [*penicillus*, pencil]. In pharmacy, a medicated cylindric stick, as a menthol pencil, which is used for local application. 2. An aggregation of rays meeting in a point. **P.-flower.** See *Stylosanthes.*

Penciled (*pen'-sild*) [*penicillus*, a pencil]. In biology: (*a*) tufted, brushy, penicillate; (*b*) marked with fine lines.

Penciliform (*pen'-sil-if-orm*) [*penicillus*, a pencil; *forma*, form]. Having the form of a pencil.

Pendent (*pen'-dent*) [*pendere*, to hang]. In biology, drooping or hanging.

Pendinski Ulcer. See *Furunculus orientalis.*

Pendulous (*pen'-du-lus*) [*pendere*, to hang]. Hanging or drooping loosely. **P. Abdomen.** See *Abdomen.*

Pendulum-motion. See *Motion, Pendulous.*

Penetrating (*pen'-e-tra-ting*) [*penetrare*, to pierce]. Entering beyond the surface. Said of an odor when it is piercing or pungent. **P. Wound,** one that pierces an organ or one of the larger cavities of the body.

Penetration (*pen-e-tra'-shun*) [*penetratio; penetrare*, to pierce]. In medical jurisprudence, the entrance of the penis within the vagina, proof of which is a pre-requisite to establish the crime of rape.

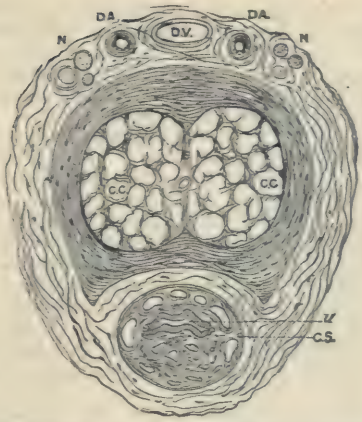
Penial (*pe'-ne-al*) [*penis*, penis]. Pertaining to the penis.

Penicil (*pen'-is-il*) [*penicillus*, a painter's brush or pencil]. In biology, a brush or bundle of hairs.

Penicillate (*pen'-is-il-āt*) [*penicillus*, a pencil]. Shaped liked a pencil of hairs.

Penicilliform (*pen-is-il'-if-orm*) [*penicillus*, a pencil; *forma*, form]. Resembling a pencil.

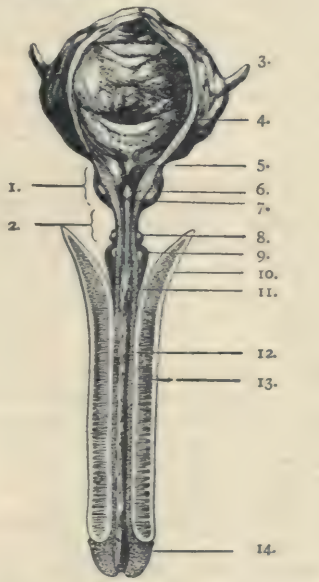
Penicillium (*pen-is-il'-e-um*) [*penicillus*, a brush]. A genus of saprophytic hyphomycetes or fungi, of which the **P. glaucum,** or common blue mold, is a familiar example.



Penile (*pe'-nil*). Same as *Penial.*

Penis (*pe'-nis*) [L.]. The male organ of copulation. It consists of the corpus spongiosum (which encloses the urethra) the two corpora cavernosa (which are largely composed of erectile tissue) and the glans. When not erect the organ is pendulous, whence its name. In some animals it contains a slender bone. **P. feminis,** the clitoris. **P. muliebris.** Synonym of *P. feminis.*

Penischisis (*pen-is'-kis-is*) [*penis*, penis; σχίσις, a splitting]. A comprehensive term for epispadias and hypospadias.



Penitis (*pe-nī'-tis*) [*penis*, penis; ιτις, inflammation]. Inflammation of the penis.

Penjdeh Sore. See *Furunculus orientalis.*

TRANSVERSE SECTION OF THE PENIS OF A MONKEY.

C.C. Corpora cavernosa. C.S. Corpus spongiosum. S. Septum. *u.* Urethra. D.V. Dorsal vein. D.A. Dorsal arteries. N. Nerves. (*From Stirling.*)

BLADDER AND URETHRA, LAID OPEN BY AN INCISION ALONG THE UPPER SURFACE.

1. Prostate gland. 2. Membranous part of the urethra. 3. Ureter. 4. Orifice of ureter. 5. Uvula. 6. Caput gallinaginis. 7. Orifice of seminal duct. 8. Cowper's gland. 9. Bulb of urethra. 10. Crus penis. 11. Orifice of the duct of Cowper's gland. 12. One of the lacunæ. 13. Corpus cavernosum penis. 14. Glans penis.

CORPORA CAVERNOSA AND ADJACENT PARTS. (*Potter.*)

1. Corpora cavernosa. 2. Corpus spongiosum. 3. Dorsal vein. 4, 4. Arteries. 5, 5. Nerves.

Penna (*pen'-ah*) [L., a feather, wing: *pl.*, *Pennæ*]. In biology, a large, stiff feather; a quill-feather or contour-feather.

Pennaceous (*pen-a'-se-us*) [*penna*, a feather]. In biology, resembling a quill-feather or the structure resembling the web of such a feather.

Pennate (*pen'-āt*) [*pennatus*, winged; *penna*, a wing]. In biology, winged, feathered.

Penniferous (*pen-if'-er-us*) [*penna*, a feather; *ferre*, to bear]. In biology, provided with feathers.

Penniform (*pen'-if-orm*) [*penna*, feather; *forma*, form]. Shaped like a feather; said of certain muscles.

Pennigerous (*pen-ij'-er-us*). Same as *Penniferous*.

Penninerved (*pen'-in-ervd*) [*penna*, a feather; *nervus*, nerve]. In biology, feather-nerved or feather-veined; pinnately nerved.

Pennopluma, Pennoplume (*pen-o-plu'-mah, pen'-o-plūm*) [*penna*, a wing; *pluma*, a feather]. Same as *Plumule*.

Pennyroyal (*pen'-e-roi-al*). See *Hedeoma* and *Pulegium*.

Pennyweight (*pen'-e-wāt*) [AS., *peningwæg*, a penny-weight]. A weight of 24 grains, or one-twentieth of the troy ounce. See *Weights and Measures*.

Pennywort (*pen'-e-wert*). See *Hydrocotile*.

Penrose Disc. A solid rubber disc used as a substitute for the Senn bone-plate in intestinal anastomosis.

Pentabasic (*pen-tab-a'-sik*) [πέντε, five; *basis*, base]. Having five replaceable hydrogen atoms.

Pentacapsular (*pen-tak-ap'-su-lar*) [πέντε, five; *capsula*, a small box]. In biology, having five capsules or seed-vessels.

Pentacarpellary (*pen-tak-ar'-pel-a-re*) [πέντε, five; καρπός, fruit]. In biology, having five carpels.

Pentachlorether (*pen-tak-lor-e'-ther*) [πέντε, five; χλωρός, green; αἰθήρ, ether], $C_4H_5Cl_5O$. A substitution-compound of ether, or diethyl oxid, in which five atoms of Cl replace five of H.

Pentacoccus (*pen-tak-ok'-us*) [πέντε, five; κόκκος, a berry, a kernel]. In biology, composed of five cocci, grains, or seeds.

Pentacrinin (*pen-tak-ri'-nin*) [πέντε, five; κρίνον, a lily]. In biology, a purple pigment discovered by Moseley in *Pentacrinus*, the sea-lily.

Pentact (*pen'-takt*) [πέντε, five; ἀκτίς, ray]. In biology, having five rays, arms, or branches.

Pentacyclic (*pen-tas-i'-klik*) [πέντε, five; κύκλος, a circle]. In biology, in five whorls.

Pentad (*pen'-tad*) [πέντε, five]. A quinquivalent element or radicle.

Pentadactylism (*pen-tad-ak'-til-izm*) [πέντε, five; δάκτυλος, finger]. The state of having five digits.

Pentadactylous (*pen-tad-ak'-til-us*) [πέντε, five; δάκτυλος, finger]. Having five fingers.

Pentadelphous (*pen-tad-el'-fus*) [πέντε, five; ἀδελφός, brother]. In biology, arranged in five brotherhoods or sets.

Pentafid (*pen'-taf-id*) [πέντε, five; *findere*, to cleave]. In biology, cleft into five divisions.

Pentaglucose (*pen-tah-glu'-kōs*) [πέντε, five; γλυκύς, sweet]. A glucose group, which differs from the true carbohydrates by yielding furfurol instead of levulinic acid when treated with hydrochloric acid of a certain concentration, and in certain color-reactions.

Pental (*pen'-tal*) [πέντε, five], C_5H_{10}. Trimethylethylene; said by v. Mering to be a safe and effective anesthetic. See *Anesthetic*.

Pentamerous (*pen-tam'-er-us*) [πέντε, five; μέρος, part]. In biology, constructed on the numerical plan of five; five-parted.

Pentamethylendiamin (*pen-tam-eth-il-en-di'-am-in*). See *Ptomains, Table of*.

Pentane (*pen'-tān*) [πέντε, five], C_5H_{12}. A hydrocarbon, the fifth in number, of the paraffin series. See *Hydrocarbons, Table of*.

Pentapetalous (*pen-tap-et'-al-us*) [πέντε, five; πέταλον, a leaf]. In biology, having five petals.

Pentaphyllous (*pen-taf-il'-us*) [πέντε, five; φύλλον, leaf]. In biology, having five leaves.

Pentapterous (*pen-tap'-ter-us*) [πέντε, five; πτερόν, wing]. In biology, having five wing-like expansions.

Pentasepalous (*pen-tas-ep'-al-us*) [πέντε, five; *sepalum*, a sepal]. In biology, having five sepals.

Pentaspermous (*pen-tas-per'-mus*) [πέντε, five; σπέρμα, seed]. In biology, five-seeded.

Pentastichous (*pen-tas'-tik-us*) [πέντε, five; στίχος, a row, line]. In biology, arranged in five vertical ranks.

Pentastoma (*pen-tas'-to-mah*) [πέντε, five; στόμα, mouth]. A genus of entozoa, worm-like parasites, generally referred to the class *Arthropoda*. There are many species, several of which have been found encysted in the human liver and lungs. See *Linguatula* and *Pentastoma* under *Parasites* (*Animal*), *Table of*.

Pentatomic (*pen-tat-om'-ik*) [πέντε, five; ἄτομος, atom]. In chemistry, having five replaceable hydrogen atoms in the molecule.

Pentavalent (*pen-tav'-al-ent*) [πέντε, five; *valens*, having power]. In chemistry, capable of combining with five univalent elements or radicles.

Pentoic Acid (*pen-to'-ik*). Synonym of *Acid, Valeric*.

Pentonville System. See *Ventilation*.

Pentoses (*pen-to'-sēz*) [πέντε, five; *ose*, a characteristic termination of the group of carbohydrates]. In chemistry, bodies containing five carbon atoms and hydrogen and oxygen in the proportion to form water, as $C_5H_{10}O_5$. Pentoses are produced by the hydrolysis of pentosans, which are found in considerable proportion in plants. See *Carbohydrates, Table of*.

Pentosuria (*pen-tōs-u'-re-ah*) [πέντε, five; οὖρον, urine]. The presence of pentoses in the urine.

Pentoxid (*pen-toks'-id*) [πέντε, five; ὀξύς, sharp]. An oxid containing five oxygenations.

Penzoldt and Faber's Test. A test for the absorptive power of the stomach. Two or three grains of potassium iodid enclosed in a gelatin capsule, which is well wiped to remove all trace of the salt from its exterior, are ingested with a wineglassful of water on an empty stomach. The salt is absorbed from the stomach, and appears normally in the saliva in from six and a half to fifteen minutes. In diseased conditions in which absorption is tardy, *e. g.*, gastric catarrh, dilatation, and carcinoma, the saliva may not contain it for several hours. Its presence is recognized by the patient moistening with the saliva filter-paper which has been first saturated with starch-paste and dried. Touch the moistened spot with fuming HNO_3 and a blue coloration shows the presence of iodin.

Penzoldt's Reagent. A reagent for the detection of sugar in the urine. It consists of diazobenzosulphuric acid and caustic potassa. See *Tests, Table of*. **P.'s Test**, a test for dilatation of the stomach. The line of dulness over the empty stomach will not extend to the navel. Now let the patient swallow a quart of water, and in cases of dilatation dulness will be found along a line below the navel.

Peony (*pe'-o-ne*) [παιωνία, the peony]. The root of *Pæonia officinalis*, of reputed value in the convulsions of children. Dose, inf., ʒ ij–ʒ j. Unof. **P.-red.** Same as *Corallin-red*.

Peotomy (*pe-ot'-o-me*) [πέος, penis; τομή, a cutting]. Amputation of the penis.

Pepastic (*pe-pas'-tik*) [πεπαίνειν, to ripen]. Hasten-

ing the process of ripening, or maturation; promoting suppuration; also, of a medicine, digestive.

Peperomia (*pep-er-o'-me-ah*) [πέπερι, pepper]. Pepper elder; a genus of piperaceous plants, widely distributed in South America and the West Indies. Several species have been used medicinally. **P. rotundifolia** is diaphoretic and antispasmodic. **P. umbellata**, a Brazilian species, is used as a diuretic. Unof.

Peplus (*pep'-lus*). Synonym of *Peritoneum*.

Pepo (*pe'-po*) [πέπων, ripe, mellow]. 1. In biology, a gourd-like fruit. 2. Pumpkin-seed. The seed of *Cucurbita pepo*, with properties due to a resin contained in the inner covering of the embryo. It is an excellent teniafuge. Dose of the resin, gr. xv; of the seeds, ℥j–ij, made into a suitable emulsion.

Pepper (*pep'-er*) [ME., *peper*, pepper]. See *Piper*. **P.-mint.** See *Mentha piperita*. **P.-mint Camphor.** See *Menthol*. **P.-mint, Japanese.** See *Menthol*. **P., Nellaguetta.** See *Grains of Paradise*. **P., Red.** See *Capsicum*. **P.-tree**, an anacardiaceous tree, *Schinus molle*, of tropical America, and largely planted in California. Its fruit is diuretic and stimulant, and its gum is purgative and said to remove corneal opacities. Unof.

Pepsin (*pep'-sin*) [πέψις, digestion]. The chief digestive principle of the gastric juice. It converts albuminous substances into peptones in the presence of an acid. It is prepared by treating the mucous lining of mammalian stomachs with water containing .2 to .3 per cent. of hydrochloric acid. **P., Liq.**, contains saccharated pepsin 40, hydrochloric acid 12, glycerin 400, water q. s. ad 1000 parts. Dose ℥ij–iv. **P. saccharatum**, a mixture of pepsin and sugar of milk. Dose gr. v–℥j. **P., Vinum**, a solution of the gastric ferments in sherry. Dose ℥j–iv. See, also, *Lactopeptin*, *Ingluvin*, and *Ferments*.

PEPTIC GLAND FROM STOMACH OF DOG.

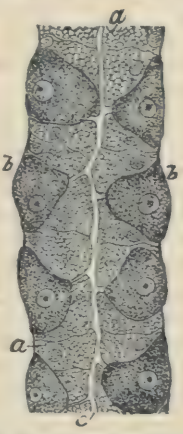
a. Wide mouth and duct which receive the terminal divisions of the gland. *b*, *c*. Neck and fundus of the tubes. *e*. Central or chief cells. *d*. Parietal or acid cells. (*After Piersol.*)

Pepsinate (*pep'-sin-āt*) [πέψις, digestion]. To mix, or prepare, with pepsin.

Pepsinogen (*pep-sin'-o-jen*) [πέψις, digestion; γεννᾶν, to beget]. The mother-substance, zymogen or propepsin, existing in the cells of the peptic glands of the stomach. It is the antecedent of pepsin, into which it is changed by suitable nervous stimuli, by hydrochloric acid, and by sodium chlorid.

Pepsinum (*pep-si'-num*). See *Pepsin*.

Pepsis (*pep'-sis*) [πέψις, digestion]. Digestion.



Peptic (*pep'-tik*) [πέψις, digestion]. Pertaining to pepsin or to digestion. **P. Glands**, the fundus-glands of Heidenhain situated in the middle and cardiac thirds of the stomach; they secrete pepsin and hydrochloric acid. **P. Ulcer**, the ordinary round ulcer of the stomach, by some ascribed to erosion of the mucous membrane by the gastric juice.

Pepticity (*pep-tis'-it-e*) [πέπτειν, to digest]. The state of being peptic; eupepsia.

Peptogaster (*pep-to-gas'-ter*) [πέπτειν, to digest; γαστήρ, belly]. The intestinal canal, or digestive apparatus as a whole.

Peptogastric (*pep-to-gas'-trik*) [πέπτειν, to digest; γαστήρ, belly]. Pertaining to the peptogaster; peptic.

Peptogen (*pep'-to-jen*) [πέψις, digestion; γεννᾶν, to beget]. A substance that favors the production of pepsin.

PORTION OF PEPTIC GLAND OF DOG, HIGHLY MAGNIFIED.

a, *a*. The central or chief cells next the lumen (*c*). *b*, *b*. The parietal or acid cells connected with the lumen of the tube by short lateral branches which extend to the cells. (*After Piersol.*)

Peptogenous (*pep-toj'-en-us*) [πέψις, digestion; γεννᾶν, to produce]. Producing peptones.

Peptogeny (*pep-toj'-en-e*) [πέπτειν, to digest; γεννᾶν, to produce]. The production of peptones.

Peptoglutin Sublimate (*pep-to-glu'-tin sub'-lim-āt*). Mercuric peptoglutin hydrochlorid. It contains twenty-five per cent. of mercuric chlorid, in combination with a kind of semipeptonized gelatin. It is used hypodermatically in syphilis. Dose gr. ⅛, given in a one per cent. solution, a Pravaz syringeful of which is injected.

Peptone (*pep'-tōn*) [πέπτειν, to digest]. A proteid body that is not precipitated by heat or by ammonium sulphate, but which yields the biuret-reaction. This is *Kühne's peptone*. *Brücke's peptone* is a proteid which is not precipitated by potassium ferrocyanid, but which yields the biuret-reaction. It is probably a mixture of the peptone described by Kühne and an albumose. Peptones are produced by the action of proteolytic ferments on albuminous substances, *e. g.*, in gastric and pancreatic digestion. They are, unlike the proteids from which they are derived, soluble, non-coagulable, and dialyzable. The largest part of the albumins ingested in the food is converted into peptones; these, however, are not absorbed as such, but are reconverted into albumins in the gastro-intestinal mucosa. Only a small quantity of peptones passes into the blood. Globulin, acid-albumin, para-peptone, propeptone, albumose, and others are intermediate products formed during the conversion of albumins into peptones. Peptone is not present in the urine normally. **P., Beef**, a substance derived from beef by treating it with an extract of the pancreas. Beef-peptone is extensively used in bacteriologic laboratories in the preparation of media made from meat-infusion. **P., Pancreatic**, a peptone formed by the action of the pancreatic juice; unlike peptones resulting from digestion with gastric juice, it is precipitated by acids and acid salts.

Peptonemia (*pep-to-ne'-me-ah*) [πέπτειν, to cook; αἷμα, blood]. The presence of peptone in the blood.

Peptonization (*pep-to-niz-a'-shun*) [πέπτειν, to digest]. The process of converting proteids into peptones.

Peptonize (*pep'-to-nīz*) [πέπτειν, to digest]. To digest with pepsin; to predigest. Very often an extract of pancreatic juice is used in order to peptonize food; milk especially is thus treated.

Peptonoid (*pep'-to-noid*) [πέπτειν, to digest; εἶδος, like]. A substance resembling or claimed to resemble peptones.

Peptonuria (*pep-to-nu'-re-ah*) [πέπτειν, to digest; οὖρον, urine]. The presence of peptone in the urine. The proteid body found in the urine in peptonuria is really not a peptone but an albumose, and a better term would be albumosuria. Albumose is characterized by yielding the biuret-reaction; it is not precipitated by heat, but is precipitated by ammonium sulphate. For test, see *Tests, Table of*. Peptonuria, *i. e.*, albumosuria, occurs in all conditions attended by the destruction of tissue, especially in suppurative processes, purulent pleurisy, purulent peritonitis, abscesses, cerebro-spinal meningitis, pyelonephritis, bronchoblennorrhea, in some cases of pulmonary tuberculosis with cavity-formation, and during the puerperal state. The blood in leukemia may also contain albumose. Propeptonuria is probably only an albumosuria of high degree. **P., Enterogenous,** peptonuria due to disease of the intestine. **P., Hepatogenous,** that accompanying certain liver-affections. **P., Nephrogenous,** peptonuria of renal origin. **P., Puerperal,** the peptonuria of the puerperal state. **P., Pyogenic,** that produced by suppuration in the body.

Peptotoxin (*pep-to-toks'-in*) [πέψις, digestion; τοξικόν, poison]. A poisonous ptomain found by Brieger in some peptones, in digestion of fibrin, and in putrefying albuminous substances, such as fibrin, casein, brain, liver, and muscles. It is a well-known fact that animal tissues, in the early stages of putrefaction, possess strong toxic properties, even before decomposition has advanced far enough to effect the splitting up of the proteid and carbohydrate molecules. An early peptonization of the proteids by ferments in the tissues, which begin their action at once after death, has been offered as an explanation of this toxicity. Peptotoxin has not as yet, however, been definitely isolated. See *Ptomains, Table of*. **P., Cholera,** a toxic substance, generated by the cholera-bacillus, and chemically allied to peptone.

Pequet's Reservoir. Synonym of *Receptaculum chyli*.

Per- [*per*, through]. A prefix signifying through. Also, more than ordinary.

Pera (*pe'-rah*) [πήρα, scrotum]. The scrotum.

Peracephalus (*per-as-ef'-al-us*) [πέρα, more than; ἀκέφαλος, without a head]. A fetal monstrosity characterized not only by want of upper extremities, but also by malformation or absence of the thorax.

Peracute (*per-ak-ūt'*) [*per*, through; *acutus*, sharp]. More than ordinarily sharp or severe.

Peratodynia (*per-at-o-din'-e-ah*) [πέρας, end; ὀδύνη, pain]. Pain at the cardiac extremity of the stomach.

Perce-membrane [Fr.]. An instrument for piercing the fetal membranes and evacuating the liquor amnii.

Perception (*per-sep'-shun*) [*per*, through; *capere*, to receive]. The act of receiving impressions or obtaining knowledge of external things through the medium of the senses. **P., Differential,** the ability to distinguish differences between slight changes in the intensity of stimulation.

Perceptivity (*per-sep-tiv'-it-e*) [*per*, through; *capere*, to receive]. The faculty or capability of receiving impressions.

Perchloric Acid (*per-klo'-rik*) [*per*, through; χλωρός, green], $HClO_4$. A volatile irritant liquid, the highest oxyacid of chlorin. In contact with organic substances it decomposes with explosion.

Percipient (*per-sip'-e-ent*) [*percipere*, to perceive]. Perceiving; seeing.

Perclusion (*per-klu'-shun*) [*per*, through; *claudere*, to shut up]. Inability to execute any movement.

Percolate (*per'-ko-lāt*) [*percolare*, to strain through]. 1. To submit to the process of percolation. 2. The solution obtained by percolation.

Percolation (*per-ko-la'-shun*) [*percolare*, to strain through]. The process of extracting the soluble constituents of a substance by allowing the solvent to trickle through the powdered mass placed in a long conic vessel, the percolator; a process similar to lixiviation.

Percolator (*per'-ko-la-tor*) [*percolare*, to strain through]. A long conic vessel with a delivery-tube at the lower extremity, employed for the purpose of extracting the soluble constituents of a substance, packed in a percolator, by means of a liquid poured over it.

Percussion (*per-kush'-un*) [*percutere*, to strike through]. A method of physical examination applied by striking upon any part of the body, with a view of ascertaining the conditions of the underlying organs by the character of the sounds elicited. In percussing, attention is paid to the resonance, the pitch and the duration of the sound, and to the resistance of the parts. Percussion is sometimes performed by striking with the entire hand. The method, in the case of the chest, serves to distinguish marked degrees of dulness from resonance. In *massage*, striking or beating the surface. For this purpose the hand or a specially constructed instrument may be used (*percussor* or *muscle-beater*). If the palm of the hand is used the operation is called *clapping;* if the ulnar border is used it is called *chopping;* if the closed fist is used, or the dorsal surfaces of the two last phalanges of the fingers held rather loosely, the procedure is termed *whipping* or *flagellation*. **P., Auscultatory,** percussion combined with auscultation. The method by which fine shades of difference in the quality of sounds may be detected. It is employed for outlining organs, both those containing and those not containing air. It is best applied by placing a double stethoscope at a fixed point and percussing gently all around. The stethoscope may be held with one hand while with a finger of the other immediate percussion is made; or, an assistant can percuss. **P., Deep,** the striking of a firm blow in order to elicit differences in the percussion-note of deep-seated structures. **P., Light,** used to elicit sound from the parts immediately subjacent, or to outline one of the viscera. **P., Finger,** percussion with the fingers of one hand as a plexor, and those of the other as a pleximeter; or, in immediate percussion, the use of the fingers as a plexor. **P., Immediate,** percussion in which the surface is struck directly, without the interposition of a pleximeter. **P., Instrumental,** the use of a special hammer as a plexor, either alone or with a plate as a pleximeter. **P., Mediate,** percussion in which a pleximeter is used. **P.-note,** the sound elicited on percussion. **P., Scholl's Method of.** See *Scholl*. **P.-wave,** the term given to the chief ascending wave of the sphygmographic tracing. Roy and Adami propose to substitute for this name the term *papillary wave*, on the ground that the elevation is due to the contraction of the papillary muscles. Sanson prefers the term *chief ascending wave*.

Percusso-punctator (*per-kus'-o-pungk-ta'-tor*) [*percutere*, to beat; *punctare*, to mark]. An instrument resembling a plexor or hammer, consisting principally of a group of needles by means of which multiple punctures are made into the tissues in rheumatism, lumbago, and neuralgia.

Percussor (*per-kus'-or*) [*percutere*, to strike through]. He who or that which percusses; a percutor.

Percutaneous (*per-ku-ta'-ne-us*) [*per*, through; *cutis*, the skin]. Done through the skin; as *percutaneous* ligation.

Percutor (*per-ku'-tor*) [Fr., *percuteur; percutere*, to strike]. An instrument used in the percussion of massage and in therapeutic flagellation.

Perditio (*per-dish'-e-o*) [*perdere*, to lose]. Abortion.

Pereion (*per-i'-on*) [περί, around; ἰέναι, to go: *pl.*, *Pereia*]. In biology, the thorax of a crustacean, as distinguished from the head (*cephalon*) and abdomen (*pleon*). (Bate.)

Pereiopod (*per-i'-o-pod*) [περί, around; ἰέναι, to go; πούς, foot]. In biology, an appendage of the thorax of a crustacean; an ambulatory leg.

Pereira or **Pao Pereira** (*per-a'-rah, pah'-o per-a'-rah*) [Port., "pear-tree"]. The *Geissospermum læve*, a large apocynaceous tree of Brazil. Its bark is tonic and febrifuge, retarding the heart-beat and respiration. Unof. See also *Pareira*.

Pereirin (*per-a'-rin*) [Port., *pereira*, "pear-tree], $C_{19}H_{24}N_2O$. A somewhat poisonous alkaloid from pereira-bark. Its hydrochlorate (30 gr. per diem) is efficacious in fevers. Unof.

Perelle (*per-el'*) [*parella*, the specific name for the lichen]. In biology, a substance obtained from the lichen, *Lecanora parella*, and employed in the preparation of a red dye.

Perennate (*per-en'-āt*) [*perennis*, lasting through the year]. In biology, to live perennially.

Perennation (*per-en-a'-shun*) [*perennis*, lasting through the year]. In biology, the perennial continuance of life.

Perennial (*per-en'-e-al*) [*per*, through; *annus*, year]. Lasting from year to year.

Perenyi's Solution. A fixing-agent used in histologic research. Its composition is as follows: ten per cent. solution of nitric acid, 4 parts; alcohol, 3 parts; one-half per cent. solution of chromic acid, 3 parts. After a short time this mixture becomes violet-colored.

Pereterium (*per-et-e'-re-um*). Synonym of *Trephine*.

Perfect (*per'-fekt*) [*perfectus*, finished]. Complete, without blemish. In biology, having both stamens and pistils; hermaphrodite. **P. Yellow.** See *Pigments, Conspectus of*.

Perflation (*per-fla'-shun*) [*perflare*, to blow through]. 1. A method of ventilation by which a current of air blowing against a dwelling is made to force its way in. 2. Forcing air into a cavity for the purpose of evacuating fluid.

Perfoliate (*per-fo'-le-āt*) [*per*, through; *folium*, leaf]. In biology: (*a*) applied to a leaf that is united around the stem at its base; (*b*) applied to certain insect-antennæ consisting of a number of circular plates joined by the shaft running through their centers.

Perforans (*per'-fo-ranz*) [*per*, through; *forare*, to bore]. Penetrating or perforating. Applied to various muscles whose tendons pass through other structures. **P., Ulcus.** Perforating ulcer. See *Ulcer*.

Perforate (*per'-fo-rāt*) [*per*, through; *forare*, to bore]. In biology, pierced with small holes.

Perforated (*per'-fo-ra-ted*) [*per*, through; *forare*, to bore]. Pierced through. **P. Space.** See *Space*.

Perforation (*per-fo-ra'-shun*) [*per*, through; *forare*, to bore]. The act of piercing. Also, the opening in the wall of a cavity resulting from traumatism or ulceration. In craniotomy, the opening of the fetal head.

Perforator (*per'-fo-ra-tor*) [*per*, through; *forare*, to bore]. An instrument for boring through the fetal skull; also for perforating other bones.

Perforatus (*per-fo-ra'-tus*). Synonym of *Perforated*.

Perfrication (*per-frik-a'-shun*) [*per*, through; *fricare*, to rub]. Inunction.

Perfrigerium (*per-frij-e'-re-um*) [*perfrigerare*, to make very cold]. Numbness due to cold.

Perfume (*per'-fūm*, or *per-fūm'*) [*per*, through; *fumare*, to give off a vapor]. The odor of a volatile substance, especially if pleasant or agreeable. Most commercial perfumes belong to the *terpene* series, and have the uniform composition $C_{10}H_{16}$. In a few instances they are manufactured synthetically, but in most they are extracted from the petals of flowers.

Perfusion (*per-fu'-zhun*) [*per*, through; *fundere*, to pour]. The passage of a fluid through spaces.

Pergameneous (*per-gam-e'-ne-us*) [*pergameneus*, parchment-like]. Resembling parchment, *e. g.*, the skin in certain cases of xeroderma.

Pergamentaceous (*per-gam-en-ta'-she-us*). Same as *Pergameneous*.

Peri- (*per'-e*) [περί, around]. A prefix signifying around, or surrounding.

Periadenitis (*per-e-ad-en-i'-tis*) [περί, around; ἀδήν, gland; ιτις, inflammation]. Inflammation of the tissues that surround a gland.

Periadventitial (*per-e-ad-ven-tish'-e-al*) [περί, around; *adventitius*, coming from abroad]. Situated, or occurring, around the adventitia, or external coat of a vessel.

Periah (*per-i'-ah*) [Heb.]. The second act in the Jewish rite of circumcision. It is the act of laceration of the mucous membrane.

Perialgia (*per-e-al'-je-ah*) [περί, very; ἄλγος, pain]. Excruciating pain.

Perianal (*per-e-a'-nal*) [περί, around; *anus*, anus]. Situated, or occurring, around the anus.

Periandra (*per-e-an'-drah*) [περί, around; ἀνήρ, a male]. In biology, one of the bracts surrounding the antheridia of mosses.

Periangiocholitis (*per-e-an-je-o-ko-li'-tis*) [περί, around; ἀγγεῖον, vessel; χόλος, bile; ιτις, inflammation]. Inflammation of the connective tissue surrounding the biliary ducts.

Periangioma (*per-e-an-je-o'-mah*) [περί, around; ἀγγεῖον, vessel; ὄμα, tumor]. A tumor surrounding a vessel.

Perianth (*per'-e-anth*) [περί, around; ἄνθος, flower]. In biology, a collective term for the floral envelops, calyx and corolla, or their representative.

Perianthial (*per-e-an'-the-al*) [περί, around; ἄνθος, a flower]. In biology, pertaining to the perianth. Provided with a perianth.

Perianthium (*per-e-an'-the-um*). Same as *Perianth*.

Periaortitis (*per-e-a-or-ti'-tis*) [περί, around; ἀορτή, aorta; ιτις, inflammation]. Inflammation of the tissues surrounding the aorta.

Periarteritis (*per-e-ar-ter-i'-tis*) [περί, around; ἀρτηρία, artery; ιτις, inflammation]. Inflammation of the external sheath of the arteries. **P. nodosa**, thickening of the arterial coats in localized areas, producing nodular swellings.

Periarthritis (*per-e-ar-thri'-tis*) [περί, around; ἄρθρον, joint; ιτις, inflammation]. Inflammation of the tissues about a joint.

Periarticular (*per-e-ar-tik'-u-lar*) [περί, around; *articulus*, joint]. About or around a joint.

Periaxial (*per-e-aks'-e-al*) [περί, around; ἄξις, axis]. Situated or occurring around an axis or axis-cylinder.

Periblast (*per'-ib-last*) [περί, around; βλαστός, a germ]. In biology, the protoplasm surrounding the nucleus of a cell.

Periblastic (*per-ib-las'-tik*) [περί, around; βλαστός, a germ]. In biology, pertaining to the periblast. Germinating from the surface of an ovum.

Periblastula (*per-ib-las'-tu-lah*) [περί, around; βλαστός, germ]. A segmenting ovum in which the outer layer of cells is more highly developed than the inner.

Periblem (*per'-ib-lem*) [περίβλημα, a covering]. In biology, a zone of meristem lying between the plerome and the dermatogen at the growing end of an axial organ.

Periblepsia, Periblepsis (*per-ib-lep'-se-ah, per-ib-lep'-sis*) [περί, around; βλέπειν, to look]. The wild, unnatural look observed in delirium.

Peribole (*per-ib'-o-le*) [περί, around; βάλλειν, to throw]. The elimination of morbific substances through diseased conditions of the skin.

Peribranchial (*per-ib-rang'-ke-al*) [περί, around; βράγχια, gills]. In biology, arranged about the branchiæ.

Peribronchial (*per-ib-rong'-ke-al*) [περί, around; βρόγχος, bronchus]. Pertaining to the tissue about the bronchus; surrounding a bronchus. **P. Lymphangitis,** inflammation of the peribronchial lymphatic vessels.

Peribronchitis (*per-ib-rong-ki'-tis*) [περί, around; βρόγχος, bronchus; ιτις, inflammation]. Inflammation of the pulmonary tissue immediately surrounding the bronchi. **P., Caseous,** a peribronchitis due to tuberculosis, and usually accompanying caseous broncho-pneumonia. **P., Purulent,** a peribronchial inflammation with the formation of pus. **P., Tuberculous,** peribronchitis due to the tubercle-bacillus.

Peribrosis (*per-ib-ro'-sis*) [περί, around; βρῶσις, a feeding]. Ulceration at the canthi of the eyelids.

Pericæcal (*per-is-e'-kal*). See *Pericecal.*

Pericæmentitis (*per-is-em-en-ti'-tis*). See *Pericementitis.*

Perical (*per'-ik-al*). See *Fungus-foot.*

Pericambium (*per-ik-am'-be-um*). See *Phloëm-sheath.*

Pericardiac, Pericardial (*per-ik-ar'-de-ak, per-ik-ar'-de-al*) [περί, around; καρδία, heart]. Pertaining to the pericardium.

Pericardiacophrenic (*per-ik-ar-de-ak-o-fre'-nik*) [περί, around; καρδία, heart; φρήν, diaphragm]. Pertaining to the pericardium and the diaphragm.

Pericardial (*per-ik-ar'-de-al*) [περί, around; καρδία, heart]. Pertaining to the pericardium. Surrounding the heart. **P. Cavity,** the space between the pericardium and the heart. **P. Pleura,** that part of the pleura attached to the pericardium. **P. Space.** Same as *P. Cavity.*

Pericardian (*per-ik-ar'-de-an*). Same as *Pericardial.*

Pericardiopneumatosis (*per-ik-ar'-de-o-nu-mat-o'-sis*). Synonym of *Pneumopericardium.*

Pericardiotomy (*per-ik-ar-de-ot'-o-me*) [περί, around; καρδία, heart; τομή, a cutting]. Incision of the pericardium.

Pericarditic (*per-ik-ar-dit'-ik*) [περί, around; καρδία, heart; ιτις, inflammation]. Pertaining to pericarditis.

Pericarditis (*per-ik-ar-di'-tis*) [περί, around; καρδία, heart; ιτις, inflammation]. Inflammation of the pericardium. It may be complicated with myocarditis or endocarditis. It is rarely a primary affection, but is usually secondary to such diseases as rheumatism, chronic nephritis, scarlet fever, measles, pyemia, scorbutus, and hemorrhagic purpura. Many cases are due to extension of inflammation from neighboring organs, as from pleurisy and pleurisy with pneumonia; sometimes, also, to extension of endocardial inflammation. Tuberculosis may affect the pericardium by extension from the lung, but occasionally it appears as a primary disease of the serous membrane. In addition, a pericarditis may follow malignant disease of the pericardium. Actinomycosis may spread to the pericardium from the lung or the mediastinum. Syphilis of the pericardium is usually secondary to myocardial syphilis. It leads to pericardial adhesions. **P., Adhesive,** pericarditis in which the two layers of pericardium tend to adhere. **P., Carcinomatous,** pericarditis due to carcinoma of the pericardium. In rare cases pericarditis may accompany carcinoma of a remote organ. **P., Dry,** pericarditis without effusion. **P., External,** inflammation of the outer layer of the pericardium; it is usually accompanied by inflammation of the contiguous pleura. **P., Fibrinous,** a form in which the membrane is covered with a fibrinous exudate, first soft and buttery in consistence, but later organizing. Tuberculous pericarditis is likely to lead to large deposits of fibrin. **P., Hemorrhagic,** a form in which the fluid is hemorrhagic. This is the case most often in tuberculous pericarditis; also in scorbutus and in cachectic conditions. **P., Internal,** inflammation of the serous surface of the pericardium. **P., Localized,** whitish areas, the so called milk-spots (*q. v.*), due to circumscribed pericarditis. **P., Obliterating,** a form leading to adhesion of the two layers of pericardium and obliteration of the cavity. See *Pericardium, Adherent.* **P., Purulent,** pericarditis in which the effused fluid becomes purulent. This is not very rare in children. **P., Rheumatic,** that due to rheumatism. **P., Sero-fibrinous,** a form in which there is but little lymph or fibrin, but a considerable quantity of serous fluid. **P., Tuberculous,** pericarditis due to tuberculous infection of the pericardium; it is usually secondary, from extension from neighboring organs, but is sometimes primary. The membrane is covered with thick layers of fibrin, beneath which are miliary tubercles; there may also be larger cheesy masses. The quantity of fluid is usually small, but may be large, and the effusion is generally hemorrhagic.

Pericardium (*per-ik-ar'-de-um*) [περί, around; καρδία, heart]. The closed membranous sac or covering that envelops the heart. Its base is attached to the central tendon of the diaphragm; its apex surrounds for a short distance the great vessels arising from the base of the heart. It consists of an ectal fibrous coat, derived from the cervical fascia, and an ental serous coat. The sac normally contains from half a dram to a dram of clear serous fluid. **P., Adherent,** a condition resulting from a previous pericarditis, in which the two layers of the pericardium are bound together by newly-formed connective tissue. **P., Bread-and-butter,** a peculiar appearance produced in fibrinous pericarditis by the rubbing of the two surfaces of the membrane over each other. The surface is rough, like that produced when two pieces of butter-and-bread, that have lain with their spread sides in contact, are pulled apart. **P., Calcified,** calcification of the pericardium, occurring in spots or diffusely. **P., Parietal,** the reflection of the pericardium not in direct contact with the heart; the portion in contact with the pleura and the diaphragm. See *P., Visceral.* **P., Shaggy,** a pericardium upon which, as the result of fibrinous pericarditis, thick, loose, shaggy layers of fibrin are deposited. **P., Visceral,** the epicardium, *i. e.*, the layer of pericardium attached to the surface of the heart.

Pericarp (*per'-ik-arp*) [περί, around; καρπός, fruit]. In biology: (*a*) the shell or cover of a fruit; (*b*) the wall of a ripened ovary.

Pericarpial (*per-ik-ar'-pe-al*). Same as *Pericarpic.*

Pericarpic (*per-ik-ar'-pik*) [περί, around; καρπος, fruit]. Pertaining to the pericarp.

Pericarpium (*per-ik-ar'-pe-um*). Same as *Pericarp.*

Pericarpoidal (*per-ik-ar-poid''-al*) [περί, around; καρπός, fruit; εἶδος, like]. In biology, resembling a pericarp.

Pericecal (*per-is-e'-kal*) [περί, around; *cæcus*, blind]. Surrounding the cecum.

Pericellular (*per-is-el'-u-lar*) [περί, around; *cellula*, a small cell]. Surrounding a cell.

Pericementitis (*per-is-em-en-ti'-tis*) [περί, around; *cementum*, cement; ιτις, inflammation]. Inflammation of the peridental membrane and tissues around a tooth. **P., Phagedenic,** a specific infectious inflammation, having its beginning at the gingival or gum margin, and accompanied with destruction of the peridental membrane and alveolar walls. **P., Traumatic,** inflammation of the peridental membrane resulting from injuries.

Pericementum (*per-is-em-en'-tum*) [περί, around; *cementum*, cement]. The layer of true bone covering the fangs of the teeth; it is formed beneath the peridental membrane.

Pericentral (*per-is-en'-tral*) [περί, around; κέντρον, center]. Situated around a center, or centrum.

Pericerebricity (*per-is-er-e-bris'-it-e*). See *Polyparesis.*

Perichæte (*per-ik-e'-te*). See *Perichætium.*

Perichætial (*per-ik-e'-she-al*) [περί, around; χαίτη, a long hair]. In biology, pertaining to the perichætium.

Perichætium (*per-ik-e'-she-um*) [περί, around; χαίτη, long hair, foliage: *pl.*, *Perichætia*]. In biology, the involucre of modified leaves surrounding the reproductive organs in mosses; perichæte, perichete.

Perichætous (*per-ik-e'-tus*) [περί, around; χαίτη, a long hair]. Surrounded by bristles.

Perichareia (*per-ik-ar-i'-ah*) [περιχαρής, very glad]. Sudden, vehement, or morbid rejoicing; a symptom in certain insanities.

Perichete (*per-ik-e'-te*). See *Perichætium.*

Pericholecystitis (*per-ik-ol-e-sis-ti'-tis*) [περί, around; χόλος, bile; κύστις, bladder; ιτις, inflammation]. Inflammation near or around the gall-bladder.

Pericholous (*per-ik'-o-lus*) [περί, very; χόλος, bile]. Excessively bilious.

Perichondrial (*per-ik-on'-dre-al*) [περί, around; χόνδρος, cartilage]. Pertaining to or resembling perichondrium.

Perichondriodynia (*per-ik-on-dre-o-din'-e-ah*) [περί, around; χόνδρος, cartilage; ὀδύνη, pain]. Pain in the perichondrium.

Perichondritic (*per-ik-on-drit'-ik*) [περί, around; χόνδρος, cartilage; ιτις, inflammation]. Pertaining to or affected with perichondritis.

Perichondritis (*per-ik-on-dri'-tis*) [περί, around; χόνδρος, a cartilage; ιτις, inflammation]. Inflammation of the perichondrium. **P. auriculæ,** hæmatoma auris, *q. v.*

Perichondrium (*per-ik-on'-dre-um*) [περί, around; χόνδρος, gristle, cartilage]. An envelop of connective tissue covering the surface of cartilage. It consists of a dense external or fibrous layer, and an inner looser stratum which is intimately concerned in the production of new cartilage and is known as the chondrogenic layer.

Perichondroma (*per-ik-on-dro'-mah*) [περί, around; χόνδρος, cartilage; ὄμα, tumor]. A tumor of the perichondrium.

Perichord (*per'-ik-ord*) [περί, around; χορδή, cord]. The sheath of the notochord.

Perichordal (*per-ik-or'-dal*) [περί, around; χορδή, a cord]. Pertaining to the perichord.

Perichoroid, Perichoroidal (*per-ik-o'-roid, per-ik-o-roi'-dal*) [περί, around; χόριον, chorion; εἶδος, like]. Surrounding the choroid.

Perichrisis (*per-ik'-ris-is*). Synonym of *Inunction.*

Pericladium (*per-ik-la'-de-um*) [περί, around; κλάδος, a young slip: *pl.*, *Pericladia*]. A sheathing petiole.

Periclasis (*per-ik'-las-is*) [περικλᾶν, to twist around]. A comminuted fracture.

Periclinal (*per-ik-li'-nal*) [περί, around; κλίνειν, to bend, to slope]. In biology, applied to layers, cell-walls or lines when parallel to the external surface.

Pericnemious (*per-ik-ne'-me-us*) [περί, around; κνήμη, leg]. Surrounding the calf of the leg.

Pericolitis (*per-ik-o-li'-tis*) [περί, around; κῶλον, colon; ιτις, inflammation]. Inflammation of the tissues around the colon.

Pericolonitis (*per-ik-o-lon-i'-tis*). Same as *Pericolitis.*

Pericolpitis (*per-ik-ol-pi'-tis*) [περί, around; κόλπος, vagina; ιτις, inflammation]. Inflammation of the areolar tissue surrounding the vagina.

Periconchal (*per-ik-ong'-kal*) [περί, around; κόγχη, a shell]. Surrounding the concha of the ear. **P. Sulcus,** a sulcus separating the helix and the convex hinder surface of the concha.

Pericorneal (*per-ik-or'-ne-al*) [περί, around; *corneus*, honey]. Surrounding the cornea.

Pericowperitis (*per-e-kow-per-i'-tis*) [περί, around; *Cowper*, an anatomist; ιτις, inflammation]. Inflammation of the tissues about Cowper's glands.

Pericrane (*per'-ik-rān*) [περί, around; κρανίον, skull]. The pericranium; the skull. [Old.]

Pericranial (*per-ik-ra'-ne-al*) [περί, around; κρανίον, skull]. Surrounding the cranium. Pertaining to the pericranium.

Pericranitis (*per-ik-ra-ni'-tis*) [περί, around; κρανίον, skull; ιτις, inflammation]. Inflammation of the pericranium.

Pericranium (*per-ik-ra'-ne-um*) [περί, around; κρανίον, skull]. The periosteum of the skull.

Pericrany (*per'-ik-ra-ne*). Same as *Pericranium.*

Pericystitis (*per-is-is-ti'-tis*) [περί, around; κύστις, bladder; ιτις, inflammation]. Inflammation of the peritoneum or the connective tissue surrounding the bladder.

Pericystomatitis (*per-is-is-to-mat-i'-tis*) [περί, around; κύστις, bladder; ὄμα, tumor; ιτις, inflammation]. An inflammation of the outer envelop of an ovarian cystoma.

Pericytula (*per-is-it'-u-lah*) [περί, around; κύτος, a cell]. A fecundated ovum before the beginning of superficial segmentation, while the formative yolk encloses the nutritive segmentation.

Peridectomy (*per-id-ek'-to-me*). Synonym of *Peritomy.*

Peridental (*per-id-en'-tal*). Synonym of *Periodontal.*

Peridentitis (*per-id-en-ti'-tis*). Synonym of *Periodontitis.*

Peridentium (*per-id-en'-she-um*). See *Periodontium.*

Periderea (*per-id-er-e'-ah*) [περί, around; δέρη, neck.] The coiling of the umbilical cord round the fetal neck.

Periderm (*per'-id-erm*) [περί, around; δέρμα, skin]. In biology: (*a*) a cell-wall or enclosing membrane; (*b*) the epiphlœum; (*c*) the cortical layer of the cenosarc of a hydrozoan.

Peridermal, Peridermic (*per-id-er'-mal, per-id-er'-mik*) [περί, around; δέρμα, skin]. Surrounding the cuticle. Pertaining to the periderm.

Peridesmica (*per-id-ez'-mik-ah*) [περί, around; δεσμός, band]. Retention of urine as a result of stricture of the urethra.

Peridesmitis (*per-id-es-mi'-tis*) [περί, around; δεσμός, band; ιτις, inflammation]. Inflammation of the peridesmium.

Peridesmium (*per-id-ez'-me-um*) [περί, around; δεσμός, band]. The delicate membrane or covering that invests a ligament.

Peridiastole (*per-id-i-as'-to-le*) [περί, about; διαστολή,

dilatation]. The short interval that succeeds the diastole in the cycle of the heart's action.

Perididymis (*per-id-id'-im-is*) [περί, around; δίδυμος, testicle]. The tunica albuginea testis.

Perididymitis (*per-id-id-im-i'-tis*) [περί, around; δίδυμος, testicle; ιτις, inflammation]. Inflammation of the peridídymis.

Perididymium (*per-id-id-im'-e-um*). Synonym of *Perididymis.*

Peridiiform (*per-id'-e-if-orm*) [πηρίδιον, a small leather pouch; *forma*, form]. In biology, having the form of a peridium.

Peridiodynia (*per-id-e-o-din'-e-ah*). Synonym of *Cardialgia.*

Peridiole (*per-id'-e-ōl*). Same as *Peridiolum.*

Peridiolum (*per-id-i'-o-lum*) [dim. of πηρίδιον, a little pouch]. In biology, the tunic of the sporangium in the *Nidulariaceæ;* a secondary or smaller peridium containing a hymenium.

Peridium (*per-id'-e-um*) [πηρίδιον, dim. of πήρα, a leather pouch, wallet: *pl.*, *Peridia*]. In biology, the covering of a spore-case, as a puff-ball.

Periencephalitis (*per-e-en-sef-al-i'-tis*) [περί, around; ἐγκέφαλον, brain; ιτις, inflammation]. *Phrenitis mania gravis; Typhomania, Bell's Disease* (*Luther Bell*). Inflammation of the pia and of the superficies of the brain. The acute form is usually fatal, and is attended by stupor, wild delirium, general disturbance of the psychic functions, restlessness, convulsions, and fever. The chronic form is the so-called *General Paralysis of the Insane.*

Periendymal (*per-e-en'-dim-al*). Same as *Periependymal.*

Perienteric (*per-e-en-ter'-ik*) [περί, around; ἔντερον, intestine]. Situated around the enteron; perivisceral.

Perienteritis (*per-e-en-ter-i'-tis*) [περί, around; ἔντερον, intestine; ιτις, inflammation] Inflammation of the intestinal peritoneum.

Perienteron (*per-e-en'-ter-on*) [περί, around; ἔντερον, intestine]. The primitive perivisceral cavity; the space between the entoderm and the ectoderm, the forerunner of the schizocele or enterocele.

Periependymal (*per-e-ep-en'-dim-al*) [περί, around; ἐπένδυμα, ependyma]. Situated, or occurring, outside the ependyma.

Perieresis (*per-e-er'-es-is*) [περιαιρεῖν, to take off]. A circular incision around a tumor or abscess.

Periesophageal (*per-e-e-so-fa-je'-al*) [περί, around; οἰσοφάγος, esophagus]. Situated, or occurring, just outside of, or around, the esophagus.

Periesophagitis (*per-e-e-sof-aj-i'-tis*) [περί, around; οἰσοφάγος, esophagus; ιτις, inflammation]. Inflammation of the tissues that surround the esophagus.

Perifascicular (*per-e-fas-ik'-u-lar*) [περί, around; *fasciculus*, a fascicle]. Surrounding a fasciculus.

Perifibral, Perifibrous, (*per-if-i'-bral, per-if-i'-brus*) [περί, around; *fibra*, a fiber]. Surrounding a fiber.

Perifolliculitis (*per-if-ol-ik-u-li'-tis*) [περί, around; *folliculus*, follicle; ιτις, inflammation]. Inflammation around the hair-follicles. **P., Conglomerative Pustular,** a rare skin-affection, characterized by an eruption usually on the backs of the hands and on the buttocks, of from one to a dozen oval or roundish patches, from half an inch to two inches in diameter, and raised from about a line to a quarter of an inch. The surface is smooth or slightly mammillated and cribriform, the orifices being filled at first with pus, while the hairs, if any, have generally fallen out. There are also numerous unruptured superficial pustules. There is some itching and heat, but no pain or glandular enlargement. The disease is a local one of short duration and leaves no scar. The etiology is unknown.

Perifolliculosis (*per-if-ol-ik-u-lo'-sis*) [περί, around; *folliculus*, a follicle; νόσος, disease]. A follicular skin-affection.

Perigamium (*per-ig-a'-me-um*) [περί, around; γάμος, marriage]. In biology, an involucre in certain cryptogams, inclosing both male and female reproductive organs.

Perigangliitis (*per-ig-ang-gle-i'-tis*) [περί, around; γάγγλιον, ganglion; ιτις, inflammation]. Inflammation of the tissues surrounding a ganglion.

Periganglionic (*per-ig-ang-gle-on'-ik*) [περί, around; γάγγλιον, ganglion]. Situated, or occurring, around a ganglion. **P. Glands,** tubular glands found in the the spinal ganglia of frogs and other animals. They contain a milky, calcareous fluid.

Perigastric (*per-ig-as'-trik*) [περί, around; γαστήρ, stomach]. In biology, pertaining to the tissues or spaces about the alimentary canal.

Perigastritis (*per-ig-as-tri'-tis*) [περί, around; γαστήρ, stomach; ιτις, inflammation]. Inflammation of the peritoneal coat of the stomach.

Perigastrula (*per-ig-as'-tru-lah*) [περί, around; γαστήρ, belly, stomach: *pl.*, *Perigastrulæ*]. In biology, the form of gastrula which results from the surface-cleavage of the egg; a bladder-gastrula, the common form among arthropods.

Perigastrular (*per-ig-as'-tru-lar*) [περί, around; γαστήρ, stomach]. Pertaining to the perigastrula.

Perigastrulation (*per-ig-as-tru-la'-shun*) [περί, around; γαστήρ, belly, stomach]. In biology, the formation of a bladder-gastrula.

Perigenesis (*per-ij-en'-es-is*) [περί, about; γένεσις, origin]. In biology, a dynamic theory of reproduction proposed by Cope and adopted by Hæckel. It explains inheritance by the transmission of the type of growth-force from one generation to another.

Periglottic (*per-ig-lot'-ik*) [περί, around; γλῶσσα, the tongue]. Situated around the base of the epiglottis.

Periglottis (*per-ig-lot'-is*) [περί, around; γλῶσσα, the tongue]. The mucous membrane or villous coating of the tongue.

Perignathic (*per-ig-na'-thik*) [περί, around; γνάθος, jaw]. Situated about the jaw.

Perigone (*per'-ig-ōn*) [περί, around; γονή, seed, generation.] See *Perianth.*

Perigonium (*per-ig-o'-ne-um*) [περί, around; γονή, seed: *pl.*, *Perigonia*]. In biology: (*a*) the sac formed by the ectodermal layers of the gonophore of a hydroid; (*b*) the leafy envelop surrounding the perianth of the antheridia in mosses.

Perigraph (*per'-ig-raf*) [περί, around; γράφειν, to inscribe]. The linea alba and lineæ transversæ of the rectus abdominis muscle.

Perigyne (*per'-ij-in*). Same as *Perigynium.*

Perigynium (*per-ij-in'-e-um*) [περί, about; γυνή, a female: *pl.*, *Perigynia*]. In biology, a term applied to the scale-like or bristle-like bodies surrounding the pistils in sedges. Also, the envelop that in liverworts invests the archegonia.

Perigynous (*per-ij'-in-us*) [περί, around; γυνή, a female]. In biology, applied to stamens and petals when they are adnate to the throat of the calyx, and therefore borne around the pistil instead of at its base.

Perigyny (*per-ij'-in-e*) [περί, about; γυνή, female]. In biology, the state or condition of being perigynous.

Perihepatic (*per-e-he-pat'-ik*) [περί, around; ἡπαρ, liver]. Surrounding, or occurring around, the liver.

Perihepatitis (*per-e-hep-at-i'-tis*) [περί, around; ἡπαρ, liver; ιτις, inflammation]. Inflammation of the serous covering of the liver. It may be local, or a part of a general peritonitis. It is marked by severe pain,

tenderness, some fever, slight jaundice, and a friction-sound.

Perikeratic (*per-ik-er-at'-ik*) [περί, around; κέρας, cornea]. Surrounding the cornea.

Perilaryngeal (*per-e-lar-in'-je-al*) [περί, around; λάρυγξ, larynx]. Situated, or occurring, around the larynx.

Perilaryngitis (*per-il-ar-in-ji'-tis*) [περί, around; λάρυγξ, larynx; ιτις, inflammation]. Inflammation of the areolar tissue surrounding the larynx.

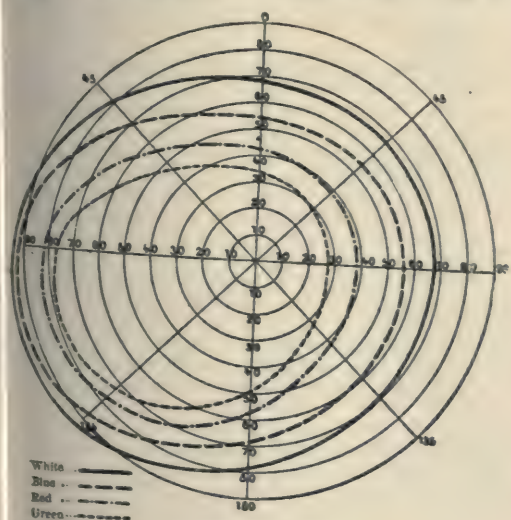
Perilymph (*per'-il-imf*) [περί, around; λύμφα, lymph]. The fluid separating the membranous from the osseous labyrinth. It is secreted by the delicate fibro-serous membrane lining the osseous labyrinth. See *Liquor cotunnii*.

Perilymphangial (*per-il-im-fan'-je-al*) [περί, around; λυμφα, lymph; ἀγγεῖον, vessel]. Situated, or occurring, around a lymphatic vessel.

Perilymphangitis (*per-il-im-fan-ji'-tis*) [περί, around; λύμφα, lymph; ἀγγεῖον, vessel; ιτις, inflammation]. Inflammation of the tissues surrounding a lymphatic vessel.

Perilymphatic (*per-il-im-fat'-ik*) [περί, around; λυμφα, lymph]. Pertaining to the perilymph.

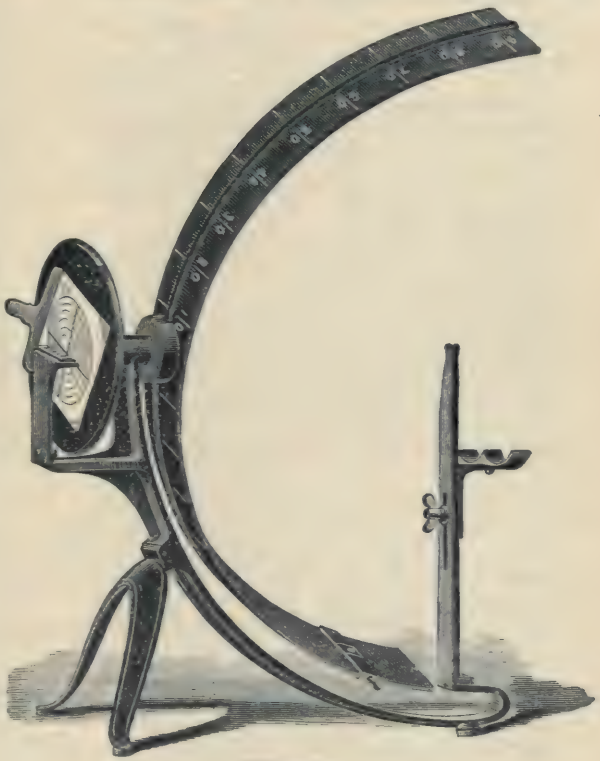
Perimenia (*per-im-e'-ne-ah*) [περί, around; μηνια, menses]. Hemorrhage around the uterus, occurring usually at the menstrual epoch.



Perimeningitis (*per-im-en-in-ji'-tis*) [περί, around; μῆνιγξ, membrane; ιτις, inflammation]. Inflammation of the dura, and surrounding tissues.

Perimeningoencephalitis (*per-im-en-in'-go-en-sef-al-i'-tis*). Synonym of *Periencephalitis*.

Perimeninx (*per-im-en'-inks*). Synonym of *Dura*.



Perimeristem (*per-im-er'-is-tem*) [περί, around; μερίζειν, to divide; μέρος, a part]. In biology, that part of the meristem from which is derived the ectal cortex and the dermatogen.

Perimeter (*per-im'-et-er*) [περί, around; μέτρον, measure]. An instrument for measuring the extent of

PERIMETRIC CHART.

the field of vision. It consists ordinarily of a flat, narrow metal plate, bent in a semicircle, graduated in degrees, and fixed to an upright at its center by a pivot, on which it is movable. Variously colored

PERIMETER.

discs are moved along the metal plate and the degree noted at which the person, looking directly in front of him, distinguishes the color.

Perimetral (*per-im-e'-tral*). Same as *Perimetric*.

Perimetric (*per-im-et'-rik*) [περί, around; μήτρα, womb; μέτρον, measure]. Situated around the uterus. Pertaining to perimetry.

Perimetritic (*per-im-et-rit'-ik*) [περί, around; μήτρα, womb; ιτις, inflammation]. Pertaining to perimetritis.

Perimetritis (*per-im-et-ri'-tis*) [περί, around; μήτρα, womb; ιτις, inflammation]. *Pelvic Peritonitis;* inflammation of the peritoneal covering of the uterus. It is always secondary to inflammatory affections of the uterus, tubes, or ovaries. Three forms are described, viz.: the *adhesive*, or most common variety; the *serous*, or least common, and the *suppurative*, or most serious form. Pain, chills and fever are the main symptoms presented.

Perimetrium (*per-im-e'-tre-um*) [περί, around; μήτρα, womb]. The serous covering of the uterus.

Perimetry (*per-im'-et-re*) [περί, around; μέτρον, measure]. The measuring of the field of vision.

Perimonerula (*per-im-on-er'-u-lah*) [περί, around; μονήρης, single, solitary: *pl.*, *Perimonerulæ*]. In biology, a developmental cytode at the monerula stage, having formative yolk in the ectal wall and deutoplasm in the ental. It is succeeded by a *pericytula*, *perimorula*, *periblastula*, and *perigastrula*.

Perimonerular (*per-im-on-er'-u-lar*) [περί, around; μονήρης, single, solitary]. Pertaining to the perimonerula.

Perimorula (*per-im-or'-u-lah*) [περί, around; μόρον,

mulberry]. The ovum in the morula stage, in which the nutritive yolk is covered by a layer of cells developed from the formative yolk.

Perimorular (*per-im-or'-u-lar*) [περί, around; μόρον, mulberry]. Pertaining to the perimorula.

Perimyelis (*per-im-i'-el-is*) [περί, around; μυελός, marrow]. The medullary membrane or endosteum; the areolar envelop of the bone-marrow.

Perimyelitis (*per-im-i-el-i'-tis*) [περί, around; μυελός, marrow; ιτις, inflammation]. Spinal meningitis.

Perimysial (*per-im-iz'-e-al*) [περί, around; μῦς, muscle]. Of the nature of, or pertaining to, perimysium; enveloping a muscle.

Perimysiitis (*per-im-iz-e-i'-tis*) [περί, around; μῦς, muscle; ιτις, inflammation]. Inflammation of the perimysium.

Perimysium (*per-im-iz'-e-um*) [περί, around; μῦς, muscle: *pl.*, *Perimysia*]. In biology, the bands of connective tissue that envelop and separate the primary bundles of muscle-fibers from each other, as distinguished from the *endomysium*, which holds together the individual muscle-fibers, and the *epimysium*, which invests the entire muscle.

Perin (*per'-in*) [περίν, a serous sac]. Perineum; also the scrotum.

Perinæum (*per-in-e'-um*). See *Perineum*.

Perineal (*per-in-e'-al*) [περίναιον, perineum]. Pertaining to the perineum. **P. Aponeurosis.** Same as *P. Fascia*. **P. Artery.** See *Arteries, Table of*. **P. Body,** the peculiar structure in the female, composed of skin, muscle, and fascia, and occupying the interval between the vagina and the rectum. **P. Cystotomy,** cystotomy performed through a perineal incision. **P. Fascia,** the fascia of the pelvic outlet. **P. Flexure,** a sharp bend in the rectum immediately above the anus. **P. Fossa,** the ischio-rectal fossa, situated between the rectum and the perineal muscles. **P. Hernia,** a rare form of hernia perforating the perineum by the side of the rectum or between the rectum and the bladder or the vagina. **P. Nerve.** See *Nerves, Table of*. **P. Region,** the perineum. **P. Section,** incision through the perineum for the relief of urethral stricture, the removal of calculi from the bladder, or the relief of other morbid conditions. **P. Spasm.** See *Vaginodynia*. **P. Strait,** the inferior pelvic strait.

Perineauxesis (*per-in-e-awks-e'-sis*) [περίναιον, perineum; αὔξησις, growth]. The bulging of the perineum during labor.

Perineocele (*per-in-e'-o-sēl*) [περίναιον, perineum; κήλη, tumor]. Perineal hernia.

Perineoplasty (*per-in-e'-o-plas-te*) [περίναιον, perineum; πλάσσειν, to form]. Plastic operation upon the perineum.

Perineorrhaphy (*per-in-e-or'-a-fe*) [περίναιον, perineum; ῥαφή, suture]. Suture of the perineum, usually in repair of a laceration caused during childbirth.

Perineosynthesis (*per-in-e-o-sin'-thes-is*) [περίναιον, perineum; συνθέσις, a placing together]. A plastic operation upon the perineum in which a graft of vaginal mucosa is made to cover the wound.

Perineotomy (*per-in-e-ot'-o-me*) [περίναιον, perineum; τομή, a cutting]. Incision through the perineum.

Perinephral (*per-in-ef'-ral*). Same as *Perinephric*.

Perinephrial (*per-in-ef'-re-al*) [περί, around; νεφρός, kidney]. Pertaining to the perinephrium.

Perinephric (*per-in-ef'-rik*) [περί, around; νεφρός, kidney]. Situated, or occurring, around the kidney. **P. Abscess,** an abscess in the tissues about the kidney.

Perinephritic (*per-in-ef-rit'-ik*) [περί, around; νεφρός, kidney; ιτις, inflammation]. Pertaining to perinephritis; improperly, same as perinephric.

Perinephritis (*per-in-ef-ri'-tis*) [περί, around; νεφρός, the kidney; ιτις, inflammation]. Inflammation of the tissues surrounding the kidney. It may be either *primary* or *secondary*, usually the latter. It is marked by pain in one lumbar region, dull, aching in character, with tenderness over that region, slight fever, and slight rigors. If pus forms the symptoms are aggravated, and burrowing may occur in various directions.

Perinephrium (*per-in-ef'-re-um*) [περί, around; νεφρός, kidney]. The connective and adipose tissue surrounding the kidney.

Perineum (*per-in-e'-um*) [περίνεον, or περίναιον]. That portion of the body included in the outlet of the pelvis, bounded in front by the pubic arch, behind by the coccyx and great sacro-sciatic ligaments, and at the sides by the tuberosities of the ischium. It includes all of the structures between the ischial tuberosities on either side, the anus posteriorly, and the vagina in the female and the scrotum in the male anteriorly. It is separated from the pelvic cavity by the recto-vesical fascia. It is occupied by the terminations of the rectum, the urethra, and the root of the penis, together with their muscles, fasciæ, vessels, and nerves. In a more restricted sense, the term perineum is applied to the space in advance of the anus (true perineum); in the female it is occupied by the termination of the vagina, the vulva, and the clitoris. The median line of the perineum presents a slight ridge, the raphé.

Perineurial (*per-in-ew'-re-al*) [περί, around; νεῦρον, nerve]. Relating to or resembling the perineurium. **P. Lymph-channels,** lymph-spaces surrounding the nerve-trunks, as in the cornea.

Perineuritis (*per-in-ew'-ri'-tis*) [περί, around; νεῦρον, nerve; ιτις, inflammation]. Inflammation of the perineurium.

Perineurium (*per-in-ew'-re-um*) [περί, around; νεῦρον, nerve: *pl.*, *Perineuria*]. The connective-tissue sheath investing each funiculus or primary bundle of nerve-fibers; as distinguished from the *endoneurium*, which extends among and around the individual fibers, and the *epineurium*, which holds together and envelops the several funiculi of the nerve-trunk.

Perinium (*per-in'-e-um*) [περί, around; ἰς (ἰν), muscle, fibrous tissue in muscle]. In biology, the outer cell-wall of the spores of *Hepaticæ*, often beautifully sculptured.

Perinuclear (*per-in-ew'-kle-ar*) [περί, about; *nucleus*, a kernel]. In biology, of or pertaining to the protoplasm or other substances surrounding the nucleus of a cell. Surrounding the nucleus.

Perinyctis (*per-in-ik'-tis*) [περί, around; νύξ, night]. Same as *Epinyctis*.

Periocular (*per-e-ok'-u-lar*) [περί, around; *oculus*, eye]. Surrounding the eye. **P. Space,** the space between the globe of the eye and the orbital walls.

Period (*pe'-re-od*) [περίοδος, period]. The space of time during which anything is in progress or at which an event takes place. Also the menses. **P., Childbearing,** the period, from puberty to the menopause, during which the female is capable of reproducing offspring. **P., Dodging,** a colloquial term for the menopause. **P., Incubation.** See *Incubation*. **P., Menstrual, P., Monthly,** the act of menstruation. **P., Reaction.** See *Reaction-period*. **P., Respiratory,** the interval between two successive inspirations.

Periodeusis (*pe-re-od-ew'-sis*) [περιοδεύειν, to go all round]. Synonym of *Quackery*.

Periodic, Periodical (*pe-re-od'-ik, pe-re-od'-ik-al*) [περιοδικός, periodic]. Recurring at stated periods. Having periods of recurrence and of intermission. **P. Acid,** H_5O_6. An oxyacid of iodin not yet obtained in the free state. **P. Disease,** one occurring at stated

periods or times of the year, or one of which the manifestations recur at regular intervals, *e. g.*, the malarial fevers, relapsing fever. **P. Swelling.** See *Angio-neurotic Edema.* **P. Vomit of Leyden.** See *Angio-neurotic Edema.*

Periodicity (*pe-re-o-dis'-it-e*) [περίοδος, a period]. The tendency of certain diseases or morbid phenomena to recur at regular intervals.

Periodontal (*per-e-o-don'-tal*) [περί, around; ὀδούς, tooth]. 1. Surrounding a tooth or its root. 2. The periosteum of an alveolus, or some other membrane or tissue surrounding a tooth.

Periodontitis (*per-e-o-don-ti'-tis*) [περί, about; ὀδούς, tooth; ιτις, inflammation]. Inflammation of the peridental membrane, the lining membrane of the cavity of a tooth. See *Pericementitis.*

Periodontium (*per-e-o-don'-she-um*) [περί, around; ὀδούς, tooth]. The membrane surrounding a tooth.

Periodoscope (*pe-re-od'-o-skōp*) [περίοδος, a period; σκοπεῖν, to inspect]. A kind of dial to show the probable time of confinement.

Periodynia (*per-e-o-din'-e-ah*) [περί, around; ὀδύνη, pain]. Severe general pain throughout the body.

Periœsophagitis (*per-e-e-sof-aj-i'-tis*). See *Periesophagitis.*

Perionychia (*per-e-o-nik'-e-ah*) [περί, around; ὄνυξ, nail]. Inflammation around the nails.

Perionyx (*per-e-on'-iks*) [περί, about; ὄνυξ (ὀνυχ-) a nail, claw, talon, hoof]. In biology, a small band of the epitrichium (eponychium) which persists across the root of the nail in the development of that organ.

Perionyxis (*per-e-o-niks'-is*). Synonym of *Perionychia.*

Perioöphoritis (*per-e-o-off-o-ri'-tis*) [περί, around; ὠόν, egg; φορός, bearing; ιτις, inflammation]. Inflammation of the peritoneum and connective tissue covering the ovary. It may be acute or chronic, and leads to the formation of adhesions. It is usually due to tubal disease.

Periophthalmitis (*per-e-off-thal-mi'-tis*) [περί, around; ὀφθαλμός, eye; ιτις, inflammation]. Inflammation of the tissues surrounding the eye.

Perioptic (*per-e-op'-tik*) [περί, around; ὀπτικός, seeing]. 1. Surrounding the orbit, or the eye. 2. Of, or pertaining to, the tissues about the eye.

Periopticon (*per-e-op'-tik-on*) [περί, about; ὀπτικός, of seeing]. In biology, a complex nerve-structure just back of the basilar membrane in the eyes of insects. (S. J. Hickson.)

Perioptometry (*per-e-op-tom'-et-re*) [περί, around; ὄπτος, visible; μέτρον, measure]. The measurement of the limits of the visual field in its several dimensions. It includes, also, the detection and measurement of defects in the field of vision.

Perioral (*per-e-o'-ral*) [περί, around; *os, oris*, the mouth]. Surrounding the mouth; circumoral.

Periorbita (*per-e-or'-bit-ah*) [περί, around; *orbita*, orbit]. The periosteum of the eye-socket.

Periorbital (*per-e-or'-bit-al*) [περί, around; *orbita*, orbit]. Pertaining to the periosteum of the socket of the eye or to the tissues about the orbit.

Periorbitis (*per-e-or-bi'-tis*) [περί, around; *orbita*, orbit; ιτις, inflammation]. Inflammation of the periorbita.

Periorchitis (*per-e-or-ki'-tis*) [περί, around; ὄρχις, testicle; ιτις, inflammation]. Inflammation of the tissues surrounding the testicle, especially of the tunica vaginalis testis. **P. adhæsiva**, a form in which adhesions between the two layers of the tunica vaginalis are formed.

Periosteal (*per-e-os'-te-al*) [περί, around; ὀστέον, bone]. Pertaining to the periosteum. **P. Bone**, the bone formed by the cells of the osteogenic layer of the periosteum, as distinguished from the central spongy endochondral bone. **P. Reflex.** See *Reflexes. Table of.*

Periosteëdema (*per-e-os-te-e-de'-mah*) [περί, around; ὀστέον, bone; οἴδημα, edema]. Edema of the periosteum.

Periosteitis (*per-e-os-te-i'-tis*). See *Periostitis.*

Periosteoma (*per-e-os-te-o'-mah*) [περί, around; ὀστέον, bone; ὄμα, tumor]. An osteoma developed from the periosteum.

Periosteo-osteomyelitis (*per-e-os'-te-o-os'-te-o-mi-e-li'-tis*) [περί, around; ὀστέον, bone; μυελός, marrow; ιτις, inflammation]. Inflammation of the periosteum and medulla of a bone.

Periosteophyma (*per-e-os-te-o-fi'-mah*) [περί, around; ὀστέον, bone; φῦμα, growth]. Swelling of the periosteum; also, a periosteophyte.

Periosteophyte (*per-e-os'-te-o-fīt*) [περί, around; ὀστέον, bone; φυτόν, growth]. A morbid osseous formation upon or proceeding from the periosteum.

Periosteosis (*per-e-os-te-o'-sis*). Synonym of *Periostosis.*

Periosteotome (*per-e-os'-te-o-tōm*) [περί, around; ὀστέον, bone; τομή, a cutting]. A cutting instrument for use in periosteotomy.

Periosteotomy (*per-e-os-te-ot'-o-me*) [περί, around; ὀστέον, bone; τομή, a cutting]. Surgical incision of the periosteum.

Periosteous (*per-e-os'-te-us*). Same as *Periosteal.*

Periosteum (*per-e-os'-te-um*) [περί, around; ὀστέον, bone]. A fibrous membrane that invests the surfaces of bones, except at the points of tendinous and ligamentous attachment, and on the articular surfaces, where cartilage is substituted. At the attachment of tendons the periosteum blends with the fibers of the tendons. The periosteum consists of two layers, an ectal, fibrous, and an ental, osteogenetic layer. The periosteum serves as a medium for the attachment of tendons, and as the means of nourishment and regeneration of bone.

Periostitic (*per-e-os-tit'-ik*) [περί, around; ὀστέον, bone; ιτις, inflammation]. Pertaining to, resembling, or affected with, periostitis.

Periostitis (*per-e-os-ti'-tis*) [περί, around; ὀστέον, bone; ιτις, inflammation]. Inflammation of the periosteum. **P., Dental**, inflammation of the investing membrane of the roots of the teeth. **P., Diffuse**, a serious inflammation usually involving the periosteum of long bones. **P., Hemorrhagic**, a condition accompanied by bleeding between the periosteum and the bone.

Periostoma (*per-e-os-to'-mah*) [περί, around; ὀστέον, bone; ὄμα, tumor]. Any morbid osseous growth occurring on or surrounding a bone.

Periostosis (*per-e-os-to'-sis*) [περί, around; ὀστέον, bone]. The formation of periostoma. Inflammatory hypertrophy of bone.

Periostotomy (*per-e-os-tot'-o-me*). Synonym of *Periosteotomy.*

Periostracal (*per-e-os'-trak-al*) [περί, around; ὄστρακον, a shell]. Pertaining to the periostracum.

Periostracum (*per-e-os'-trak-um*) [περί, around; ὄστρακον, shell]. In biology, the horny epidermis investing the shells of molluscs.

Periotic (*per-e-o'-tik*) [περί, around; οὖς, ear]. 1. Situated or occurring around the ear. A term also applied to the petrous and mastoid parts of the temporal bone. 2. Of or pertaining to the region or tissues immediately about the internal or true ear. **P. Capsules**, Huxley's name for the independent cartilages that appear very early around the otocysts and later become integral parts of the primitive chondrocranium by coalescing with the occipital cartilage. It

is not known whether they represent primarily distinct skeletal pieces or merely separate centers of chondrification of a larger mesochymal skeletal piece; probably the latter.

Periovular (*per-e-o′-vu-lar*) [περί, around; *ovum*, egg]. Surrounding the ovum.

Peripachymeningitis (*per-ip-ak-im-en-in-ji′-tis*) [περί, around; παχύς, thick; μῆνιγξ, membrane; ιτις, inflammation]. Inflammation of the connective tissue between the spinal dura and the vertebræ.

Peripancreatitis (*per-ip-an-kre-at-i′-tis*) [περί, around; πάγκρεας, pancreas; ιτις, inflammation]. Inflammation of the tissue about the pancreas.

Peripapillary (*per-ip-ap′-il-a-re*) [περί, around; *papilla*, a papilla]. Occurring or situated around the circumference of a papilla, and especially of the optic disc.

Peripatetic (*per-ip-at-et′-ik*) [περι, about; πατεῖν, to walk]. Walking about, as in "walking typhoid." Also, a disciple of Aristotle, who instructed his pupils while walking.

Peripenial (*per-ip-e′-ne-al*) [περί, around; *penis*, penis]. Surrounding the penis.

Peripetalous (*per-ip-et′-al-us*) [περί, around; πέταλον, a leaf]. In biology, situated (*a*) about the petals of a flower, or (*b*) about the petaloid ambulacra of a sea-urchin.

Peripetasma (*per-ip-et-az′-mah*) [περιπέτασμα, a covering]. Sick-bed.

Periphacitis (*per-if-a-si′-tis*) [περί, around; φακός, crystalline lens; ιτις, inflammation]. Inflammation of the periphacus.

Periphacus (*per-if-a′-kus*) [περί, around; φακός, crystalline lens]. The capsule surrounding the crystalline lens.

Peripharyngeal (*per-if-ar-in′-je-al*) [περί, around; φάρυγξ, the throat]. In biology, surrounding the pharynx.

Peripherad (*per-if′-er-ad*) [περιφέρεια, circumference]. Toward some peripheral part, or the peripheral aspect. See *Position and Direction, Table of.*

Peripheral (*per-if′-er-al*) [περιφέρεια, circumference]. Pertaining to or placed near the periphery. In anatomy, pertaining to the parts, nerves, or blood-vessels located distally, in contradistinction to central. See *Position and Direction, Table of.* **P. Akinesia**, akinesia due to some lesion of the anterior cornua of the gray matter of the cord, the motor nerves, or the muscles. **P. Anesthesia**, anesthesia due to lesion of the sensory nerves or end-organs. **P. Epilepsy**, epilepsy due to lesion of the brain-cortex. **P. Neuritis**, neuritis of the peripheral nerves. **P. Organs**, in biology, organs distinctly separated from the main part of the body.

Peripheren (*per-if′-er-en*) [περιφέρεια, circumference]. Belonging to the periphery in itself.

Peripheric (*per-if′-er-ik*). Synonym of *Peripheral.*

Peripheritis (*per-if-er-i′-tis*). Synonym of *Periophthalmitis.*

Periphery (*per-if′-er-e*) [περιφέρεια; περί, around; φέρειν, to carry]. The line bounding any surface. The ectal part in contradistinction to the ental; the surface of the body.

Periphimosis (*per-if-i-mo′-sis*). Synonym of *Paraphimosis.*

Periphlebitic (*per-if-leb-it′-ik*) [περί, around; φλέψ, vein; ιτις, inflammation]. Pertaining to, affected with, or of the nature of, periphlebitis.

Periphlebitis (*per-if-leb-i′-tis*) [περί, around; φλέψ, vein; ιτις, inflammation]. Inflammation of the ectal coat of a vein.

Periphoranthium (*per-if-or-an′-the-um*) [περιφορά, a circuit; ἄνθος, a flower]. See *Periclinium.*

Periphractolichen (*per-if-rak-to-li′-ken*) [περίφρακτος, fenced around; λιχήν, lichen]. Circumscribed lichen.

Periphyllum (*per-if-il′-um*) [περί, around; φύλλον, a leaf]. See *Lodicule.*

Periphyse (*per′-if-īz*). Same as *Periphysis.*

Periphysis (*per-if′-is-is*) [περί, around; φύεσθαι, to grow: *pl.*, *Periphyses*]. In biology, one of the filamentous structures arising from the hymenium of a fungus at places where there are no asci, for example, in the region of the neck. Sometimes the periphyses protrude through the osteole. They are always present in greater or less numbers except, according to Füsting, in *Massaria;* while *Paraphyses* are absent from a number of genera both of fungi and lichens. (Bennett and Murray.)

Periplasm (*per′-ip-lazm*) [περί, around; πλάσμα, anything formed]. In biology, a peripheral layer of protoplasm, as that surrounding the oösphere, or the gonoplasm of the antherid, in the *Oömycetes.*

Periplast (*per′-ip-last*) [περί, around; πλάσσειν, to mold, form]. In biology, the periblast or matrix of a part or organ; the intercellular substance, or stroma.

Periplastic (*per-ip-las′-tik*) [περί, around; πλάσσειν, to mold, to form]. In biology: (*a*) Of or pertaining to or resembling the matrix or periplast of a part or organ: (*b*) The cell-substance about the nucleus or endoplast; perinuclear protoplasm.

Peripleuritis (*per-ip-lu-ri′-tis*) [περί, around; πλευρόν, side; ιτις, inflammation]. Inflammation of the tissues surrounding the pleura.

Peripneumonia (*per-e-nu-mo′-ne-ah*) [περί, around; πνεύμον, lung]. See *Pneumonia.* **P. notha**, the *false pneumonia* of the older writers; the same as capillary bronchitis. See *Bronchitis; Capillary.*

Peripneustic (*per-e-nūs′-tik*) [περί, about; πνευστικος, of or for breathing]. In biology, applied to that state of the tracheal system in the majority of insect larvæ which undergo complete metamorphosis, in which the stigmata of those segments which in the imago carry wings, are closed, the stigmatic strands belonging to these parts being present as rudiments. Cf. *amphipneustic, apneustic, holopneustic, metapneustic.*

Peripolar (*per-ip-o′-lar*) [περί, around; πόλος, pivot]. Surrounding poles. **P. Zone.** See *Zone.*

Periportal (*per-ip-or′-tal*) [περί, around; *porta*, door]. Surrounding the portal vein. **P. Carcinoma**, a primary carcinoma developing around the portal vein, beginning at its entrance into the liver, thence extending along the portal vessels to the remotest branches.

Periproct (*per′-ip-rokt*) [περί, around; πρωκτός, the anus]. In biology, the parietal region surrounding the anus in an echinoderm.

Periproctal, Periproctic (*per-ip-rok′-tal, per-ip-rok′-tik*) [περί, around; πρωκτός, anus]. Surrounding the anus or rectum.

Periproctitis (*per-ip-rok-ti′-tis*) [περί, around; πρωκτός, anus; ιτις, inflammation]. Inflammation of the areolar tissue about the rectum or anus.

Periproctous (*per-ip-rok′-tus*) [περί, around; πρωκτός, the anus]. In biology, circumanal.

Periprostatic (*per-ip-ros-tat′-ik*) [περί, around; προστάτης, one standing before]. Situated or occurring around the prostate.

Periprostatitis (*per-ip-ros-tat-i′-tis*) [περί, around; προστάτης, standing before; ιτις, inflammation]. Inflammation of the tissues situated around the prostate.

Peripsyxis (*per-ip-siks′-is*) [περί, around; ψῦξις, a cooling]. The shivering of fever; a general fall of the temperature of the body.

Peripterous (*per-ip′-ter-us*) [περί, around; πτερόν, a wing]. In biology, feathered on all sides, or surrounded by a wing-like expansion.

Peripyemia (*per-ip-i-e'-me-ah*) [περί, around; πύον, pus; αἷμα, blood]. Suppuration about an organ or tissue.

Peripylephlebitis (*per-ip-i-le-fleb-it'-tis*) [περί, around; πύλη, gate, porta; φλέψ, vein; ιτις, inflammation]. Inflammation of the tissues surrounding the portal vein, or of its ectal coat.

Perirectal (*per-ir-ek'-tal*) [περί, around; *rectum*, rectum]. Surrounding the rectum.

Perirenal (*per-ir-e'-nal*) [περί, around; *ren*, kidney]. Around the kidney.

Perirhinal (*per-ir-i'-nal*) [περί, around; ῥίς, nose]. Situated about the nose or nasal fossæ.

Perirrhepsis (*per-ir-eps'-is*) [περιῥῥέπειν, to slip to one side]. The slipping of a bandage from its proper place.

Peris (*pe'-ris*) [πηρίς]. Vagina; scrotum; perineum.

Perisalpingitis (*per-is-al-pin-ji'-tis*) [περί, around; σάλπιγξ, tube; ιτις, inflammation]. Inflammation of the peritoneal covering of the oviduct.

Perisalpinx (*per-is-al'-pingks*) [περί, around; σάλπιγξ, tube]. The peritoneum covering the upper border of the Fallopian tube.

Perisarc (*per'-is-ark*) [περί, around; σάρξ, flesh]. In biology, the chitinous sheath or horny exoskeleton of a hydrozoan polyp.

Perisarcoma (*per-is-ar-ko'-mah*). Same as *Rhinosclerama*.

Perisarcous (*per-is-ar'-kus*) [περί, around; σάρξ, flesh]. In biology, consisting of perisarc; having the character or function of perisarc.

Periscopic (*per-is-kop'-ik*) [περί, around; σκοπεῖν, to see]. Applied to lenses having a concave surface upon one side and a convex upon the other, either having the smaller radius of curvature, so that the lens may as a whole be positive or negative (concavo-convex, or convexo-concave); it is called, also, *meniscus*. The object of such lenses is to eliminate spheric aberration, and allow the observer to look more obliquely through them. **P. Ocular.** See *Ocular*.

Periscopism (*per'-is-ko-pizm*) [περί, around; σκοπεῖν, to see]. The power or faculty of periscopic vision.

Periscythismus (*per-is-si-thiz'-mus*) [περί, around; σκυτίον, the skull]. Scalping,—an old operation for headache.

Perisialdochitis (*per-is-si-al-do-ki'-tis*) [περί, around; σίαλον, saliva; δοχεῖον, holder; ιτις, inflammation]. Inflammation of connective tissue around Stenson's duct.

Perisigmoiditis (*per-is-ig-moi-di'-tis*) [περί, around; σίγμα, the letter ς; εἶδος, like; ιτις, inflammation]. Inflammation of the tissues, especially the peritoneum, covering the sigmoid flexure of the colon.

Perisinusitis (*per-e-si-nu-si'-tis*) [περί, around; *sinus*, a curve, fold; ιτις, inflammation]. Inflammation about a cerebral sinus.

Perisoma (*per-is-o'-mah*) [περί, around; σῶμα, body: *pl.*, *Perisomata*]. In biology, the body-wall of an echinoderm.

Perisomatic (*per-is-o-mat'-ik*) [περί, around; σῶμα, body]. In biology, of or pertaining to the body-wall of an echinoderm. **P. Plates,** portions of the coriaceous or calcareous exoskeleton of an echinoderm.

Perisome (*per'-is-ōm*). Same as *Perisoma*.

Perisomial (*per-is-o'-me-al*). Same as *Perisomatic*.

Perisperm (*per'-is-perm*) [περί, around; σπέρμα, the seed]. In biology, the albumin of a seed outside the embryo-sac.

Perispermatitis (*per-is-per-mat-i'-tis*) [περί, around; σπέρμα, seed; ιτις, inflammation]. Inflammation around the spermatic cord, with an effusion of fluid; a funicular hydrocele.

Perispermic (*per-is-per'-mik*) [περί, around; σπέρμα, seed]. In biology, characterized by perisperm.

Perisphalsis (*per-is-fal'-sis*). Synonym of *Circumduction*.

Perispheric (*per-is-fer'-ik*) [περί, around; σφαῖρα, sphere]. Having the form of a ball; globular.

Perisphinxis (*per-is-finks'-is*) [περί, around; σφίγξις, constriction]. Ligation.

Perisplenic (*per-is-plen'-ik*) [περί, around; σπλήν, spleen]. Situated or occurring near the spleen.

Perisplenitis (*per-is-ple-ni'-tis*) [περί, around; σπλήν, spleen; ιτις, inflammation]. Inflammation of the serous or peritoneal coat of the spleen.

Perispore (*per'-is-por*) [περί, around; σπόρος, seed]. In biology, the limiting membrane of a spore.

Perissad (*per-is'-ad*) [περισσός, odd, not even]. Any atom or element of uneven quantivalence, *e.g.*, nitrogen, capable of grasping three or five, boron three, and chlorin one, monad atom. In biology, a perissodactyl.

Perissodactyl (*per-is-o-dak'-til*) [περισσός, beyond the regular number, odd; δάκτυλος, finger]. In biology, an odd-toed quadruped; a member of well-defined groups of ungulate mammals, the only living representatives of which are the tapirs, rhinoceroses, and horses, which are but the surviving remnants of a very extensive and much varied assemblage of animals which flourished during the tertiary period.

Perissodactylous (*per-is-o-dak'-til-us*) [περισσός, odd; δάκτυλος, digit]. Resembling a perissodactyl.

Perissoma (*per-is-o'-mah*) [περισσός, odd, superfluous; ὄμα, tumor]. An excretion.

Peristalsis (*per-is-tal'-sis*) [περί, around; στάλσις, constriction]. The peculiar movements of the intestine and other tubular organs, consisting in a vermicular shortening and narrowing of the tube, thus propelling the contents onward. It is due to the successive contractions of bundles of longitudinal and circular muscular fibers. See *Antiperistalsis*, *Aperistalsis*, *Dysperistalsis*, *Euperistalsis*. **P., Reversed,** peristaltic movement opposite to the normal direction.

Peristaltic (*per-is-tal'-tik*) [περί, around; στάλσις, constriction]. Pertaining to or resembling peristalsis. **P. Movements,** vermicular movements of hollow viscera. **P. Unrest,** an extremely common and distressing symptom of neurasthenia. It consists of increased peristaltic movements of the stomach coming on shortly after eating, with borborygmi and gurgling. **P. Wave,** the wave produced by the rapid advance of the peristaltic movements.

Peristaphyleus (*per-is-taf-il-e'-us*) [περί, around; σταφυλή, uvula]. A muscle connected with the uvula. **P. externus, P. inferior,** the abductor of the Eustachian tube. **P. internus, P. superior,** the levator palati. See *Muscles, Table of*.

Peristaphyline (*per-is-taf'-il-in*) [περί, about; σταφυλή, uvula]. Pertaining to or situated near the uvula.

Peristaphylo-pharyngeus (*per-is-taf'-il-o-far-in-je'-us*) [περί, around; σταφυλή, uvula; φάρυγξ, pharynx]. The palato-pharyngeus muscle. See *Muscles, Table of*.

Peristem (*per'-is-tem*). An abbreviation of *Perimeristem*.

Peristethium (*per-is-te'-the-um*) [περί, around; στῆθος, the breast: *pl.*, *Peristethia*]. See *Mesosternum*.

Peristole (*per-is'-to-le*) [περιστολή]. Peristalsis.

Peristoma (*per-is'-to-mah*). See *Peristome*.

Peristomal (*per-is-to'-mal*) [περί, around; στόμα, mouth]. Surrounding the mouth.

Peristomatic (*per-is-to-mat'-ik*) [περί, around; στόμα, mouth]. In biology, pertaining to the peristome.

Peristome (*per'-is-tōm*) [περί, around; στόμα, the mouth]. In biology: (*a*) the parietal region surrounding the mouth, as the oral disc of a polyp; (*b*) the

fringe of hair-like appendages about the orifice of a moss capsule.

Peristomial (*per-is-to'-me-al*) [περί, around; στόμα, mouth]. In biology: (*a*) pertaining to a peristome; (*b*) situated around the mouth.

Peristomium (*per-is-to'-me-um*) [περί, around; στόμα, a mouth: *pl.*, *Peristomia*]. In biology, a peristome.

Peristroma (*per-is-tro'-mah*) [περί, around; στρῶμα, covering]. The internal layer of a tube-like organ. The villous coat of the intestines.

Perisynovial (*per-is-i-no'-ve-al*) [περί, around; σύν, with; ᾠόν, egg]. Situated or occurring around a synovial membrane.

Perisystole (*per-is-is'-to-le*) [περί, around; συστολή, contraction]. The slight interval between the systole and diastole.

Peritendineum (*per-it-en-din'-e-um*) [περί, around; *tendo*, tendon]. The tissue surrounding the tendons like a sheath.

Periterion (*per-it-e'-re-on*). Synonym of *Trephine*.

Peritestis (*per-it-es'-tis*) [περί, around; *testis*, testicle]. The tunica albuginea.

Perithece (*per'-ith-ēs*). Same as *Perithecium*.

Perithecial (*per-ith-e'-se-al*) [περί, around; θήκη, cover]. Pertaining to or of the nature of a perithecium.

Perithecium (*per-ith-e'-se-um*) [περί, around; θήκη, cover: *pl.*, *Perithecia*]. In biology, the envelop covering the fructification of various species of fungus. The flask-shaped organs seen in ergot are perithecia. The receptacle for the asci in *Ascomycetes* and lichens.

Perithelium (*per-ith-e'-le-um*) [περί, around; θηλή, nipple]. The layer of cells surrounding the capillaries and smaller vessels.

Perithoracic (*per-ith-o-ras'-ik*) [περί, around; θώραξ, thorax]. Situated or occurring around the thorax.

Perithral Cells (*per-ith'-ral*). Plasma-cells surrounding the walls of blood-vessels.

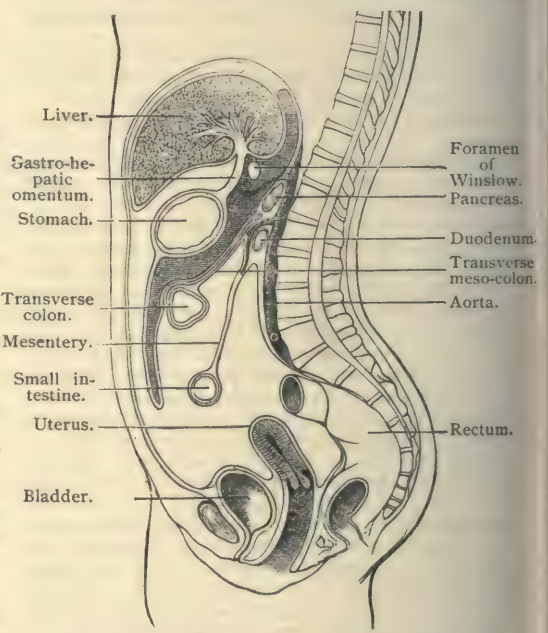
Perithyroiditis (*per-ith-i-roid-i'-tis*) [περί, around; θυρεός, shield; εἶδος, like; ιτις, inflammation]. Inflammation of the capsule of the thyroid gland.

Peritomist (*per-it'-o-mist*) [περί, around; τομή, a cutting]. A circumciser. One who practises peritomy.

Peritomy (*per-it'-o-me*) [περί, around; τομή, a cutting]. 1. The removal of a riband of conjunctival and subconjunctival tissue from about the cornea, for the relief of pannus. 2. Circumcision.

Peritonæum (*per-it-on-e'-um*). See *Peritoneum*.

Peritoneal (*per-it-on-e'-al*) [περιτόναιον, peritoneum]. Pertaining to the peritoneum. **P. Cavity**, the space within the peritoneal folds. **P. Fever.** Synonym of *Peritonitis*.



Peritonealgia (*per-it-on-e-al'-je-ah*) [περιτόναιον, peritoneum; ἄλγος, pain]. Neuralgia of the peritoneum.

Peritoneoclysis, Peritoneoklysis (*per-it-o-ne-ok'-lis-is*) [περιτόναιον, peritoneum; κλύσις, injection]. The injection of liquids into the peritoneal cavity.

Peritoneorrhexis (*per-it-on-e-or-eks'-is*) [περιτόναιον, peritoneum; ῥῆξις, rupture]. Rupture of the peritoneum.

Peritoneotomy (*per-it-on-e-ot'-o-me*) [περιτόναιον, peritoneum; τομή, a cutting]. Incision into the peritoneum.

Peritoneum (*per-it-on-e'-um*) [περί, around; τείνειν, to stretch]. The serous membrane lining the interior of the abdominal cavity and surrounding the contained viscera. The peritoneum forms a closed sac, but is rendered complex in its arrangement by numerous foldings produced by its reflection upon the viscera. In tracing its extension we may begin at the diaphragm and take two layers. From the diaphragm two layers of peritoneum proceed to the liver, forming its *lateral ligaments*; they separate to enclose the liver, meet again on its under aspect, and pass on, as the *gastro-hepatic omentum*, to the lesser curvature of the stomach. Separating here, they embrace the stomach, and, meeting again at its greater curvature, pass down, like an apron, in front of the small intestine, forming the *great omentum*. At the lower edge of the latter they are reflected upward as far as the transverse colon, which they enclose, meeting again at the back of the colon, and proceeding to the spine as the *transverse mesocolon*. Here the two layers diverge; the upper ascends in front of the pancreas to the under surface of the diaphragm, the starting-point. The lower layer is reflected from the spine, over the small intestines, and back again to the spine, to form the *mesentery*. From the root of the mesentery it passes into the pelvis, invests the upper part of the rectum, and is thence reflected on the bladder, forming between the two the *recto-vesical pouch*. In the female it is reflected from the rectum to the upper part of the vagina, and thence

PERITONEUM, VERTICAL SECTION. (*Allen Thomson.*)

over the uterus, from which it proceeds to the bladder. Two pouches are thus formed, the *recto-uterine*, or *Douglas's pouch*, and the *vesico-uterine*; between the sides of the uterus and the sides of the pelvic cavity it forms two additional folds, the *broad ligaments*. From the bladder it passes up the anterior wall of the abdomen to the diaphragm. From the cardiac end of the stomach two layers proceed to the spleen, enclosing it, and forming the *gastro-splenic omentum*. A few minor folds need yet to be mentioned—the *hepato-renal*, passing from the right lobe of the liver to the kidney; the *gastro-phrenic*, from the diaphragm to the cardiac extremity of the stomach; the *costo-colic*, from the diaphragm to the splenic flexure of the colon. The following structures are completely invested by peritoneum:—The stomach, liver, spleen, first portion of the duodenum, the jejunum, the ileum, transverse colon, sigmoid flexure, the upper part of the rectum, and of the uterus, and the ovaries.

Peritonism (*per'-it-on-izm*) [περιτόναιον, peritoneum]. A form of pseudo-peritonitis, in which apparently perito-

nitic symptoms yield readily to treatment. Also, the complexus of symptoms occurring during peritonitis.

Peritonitic (*per-it-on-it'-ik*) [περιτόναιον, peritoneum; ιτις, inflammation]. Pertaining to or affected with peritonitis.

Peritonitis (*per-it-on-i'-tis*) [περιτόναιον, peritoneum; ιτις, inflammation]. Inflammation of the peritoneum. It may be acute or chronic, general or local. **P., Acute,** is sudden in its onset, with agonizing pain that compels the patient to remain in bed on his back with the shoulders raised and the knees and hips flexed—the characteristic position. The pulse is small, hard, and wiry; there is some fever; and the abdomen becomes tense and tympanitic. Acute peritonitis may terminate in death, recovery, or chronic peritonitis. **P., Adhesive,** peritonitis with adhesion between the parietal and visceral layers. **P., Carcinomatous,** that due to carcinoma of the membrane. **P., Chronic,** a form that has no well-defined symptoms; there is tenderness, pain not so acute, impairment of appetite, and constipation. Fluid may be present in the abdominal cavity and adhesions may form. This chronic form usually follows an acute attack, but may develop insidiously. It is often tuberculous. **P., Circumscribed,** that limited to a part of the membrane. **P. deformans,** chronic peritonitis accompanied by thickening and contraction of the mesentery and omentum. **P., Diaphragmatic,** inflammation of the peritoneum covering the under surface of the diaphragm. **P., Diffuse,** a form affecting the entire peritoneum. **P., Encysted,** a collection of serum or pus surrounded by peritoneal adhesions. **P., Hemorrhagic,** peritonitis with hemorrhages into the membrane; it may lead to the formation of a so-called hematoma. **P., Pelvic.** See *Perimetritis.* **P., Perforative,** peritonitis due to perforation of a hollow viscus, an abscess, or a cyst, and the extrusion of the contents into the cavity of the peritoneum. **P., Phlegmonous.** Synonym of *P., Purulent.* **P., Puerperal,** that following septic infection in the woman in childbed. It rapidly ends in death from asthenia. **P., Purulent,** peritonitis accompanied by the production of pus. **P., Pyemic,** peritonitis due to the localization of pyogenic microörganisms in the peritoneum. **P., Rheumatic,** a peritonitis occurring in the course of acute rheumatic fever. **P., Septic,** peritonitis due to the microörganisms of suppuration. **P., Specific,** that due to tuberculosis or syphilis, though the term is usually limited to the latter condition. **P., Syphilitic,** an indurative form due to syphilis. **P., Tuberculous,** that form due to the deposit of miliary tubercles upon the peritoneum. According to Fagge, it is more common in children than in adults, and in men than in women. It is insidious in onset, is attended with great emaciation and the effusion of considerable lymph and fluid. The omentum is always much thickened.

Peritonsillar (*per-it-on'-sil-ar*) [περί, around; *tonsilla,* tonsil]. Occurring or situated around or near the tonsil.

Peritonsillitis (*per-it-on-sil-i'-tis*) [περί, about; *tonsilla,* tonsil; ιτις, inflammation]. Inflammation of the tissues surrounding the tonsil.

Peritracheal (*per-it-ra'-ke-al*) [περί, around; τραχεῖα, trachea]. Surrounding the trachea.

Peritracheitis (*per-it-ra-ke-i'-tis*) [περί, around; τραχεῖα, trachea; ιτις, inflammation]. Inflammation of the connective tissue about the trachea.

Peritrema (*per-it-re'-mah*). Same as *Peritreme.*

Peritrematous (*per-it-re'-mat-us*) [περί, around; τρῆμα, a hole]. In biology, surrounding a hole; pertaining to a peritreme.

Peritreme (*per'-it-rēm*) [περί, around; τρῆμα, a hole]. In biology, the margin of a spiracle of an insect or of the orifice of a univalve shell.

Peritrichous (*per-it'-rik-us*) [περί, around; θρίξ(τριχ-), a hair]. In biology, having a band of cilia around the body.

Peritroch (*per'-it-rok*) [περί, around; τροχός, a wheel]. In biology: (*a*) a circlet of cilia; (*b*) an embryo bearing such a circlet.

Peritrochal (*per-it-ro'-kal*) [περί, around; τροχός, a wheel]. Pertaining to a peritroch.

Peritropal (*per-it'-ro-pal*). Same as *Peritropous.*

Peritrope (*per-it'-ro-pe*) [περί, around; τρέπειν, to turn]. A synonym of *Circulation.*

Peritropous (*per-it'-ro-pus*) [περί, around; τρέπειν, to turn]. In biology, horizontal in the pericarp, as a seed.

Perittoma (*per-it-to'-mah*). Synonym of *Perissoma.*

Perityphlitic (*per-it-if-lit'-ik*) [περί, around; τυφλός, cecum; ιτις, inflammation]. Of the nature of or affected with perityphlitis.

Perityphlitis (*per-it-if-li'-tis*) [περί, around; τυφλός, cecum; ιτις, inflammation]. Inflammation of the peritoneum surrounding the cecum. This is a disease most frequently encountered in the young and in males. It is usually due to some inflammatory disease of the vermiform appendix. It is marked by pain in the right iliac fossa, and a tumor, elongated, sausage-shaped, dull on percussion, and very tender, in the same region. It may give rise to general peritonitis from escape of pus into the general peritoneal cavity. The abscess may burst through the abdominal wall, into the bowels, bladder, or pleural cavity.

Periurethritis (*per-e-u-re-thri'-tis*) [περί, around; οὐρήθρα, urethra; ιτις, inflammation]. Inflammation of the connective tissue about the urethra.

Periuterine (*per-e-u'-ter-in*) [περί, around; *uterus,* uterus]. Situated or occurring around the uterus.

Perivaginitis (*per-iv-aj-in-i'-tis*). Synonym of *Paracolpitis.*

Perivascular (*per-iv-as'-ku-lar*) [*peri,* around; *vasculum,* a vessel]. Surrounding or enclosing a vessel.

Perivasculitis (*per-iv-as-ku-li'-tis*) [περί, around; *vasculum,* vessel; ιτις, inflammation]. Inflammation of the vessel-walls, or of the perivascular sheaths.

Perivenous (*per-iv-e'-nus*) [περί, around; *vena,* vein]. Investing or surrounding a vein; occurring around a vein.

Perivesical (*per-iv-es'-ik-al*) [περί, around; *vesica,* bladder]. Situated about or surrounding the bladder.

Perivisceral (*per-iv-is'-er-al*) [περί, around; *viscus,* viscus]. Surrounding a viscus or viscera; occurring about a viscus.

Perivitelline (*per-iv-it'-el-in*) [περί, around; *vitellus,* yolk]. Surrounding the vitellus or yolk. **P. Space,** the space between the zona pellucida and the vitellus.

Perizoma (*per-iz-o'-mah*) [περί, around; ζῶμα, girdle]. 1. A girdle, *q. v.*; also, a truss. 2. Herpes zoster.

Perizonium (*per-iz-o'-ne-um*) [περί, around; ζώνη, girdle: *pl., Perizonia*]. In biology, the thin non-silicious membrane of a young auxospore in the *Diatomaceæ.*

Perizostra (*per-iz-os'-trah*) [περιζώστρα, a belt]. A bandage, especially for the head or trunk.

Perkin's Violet. Same as *Mauvein.*

Perkinism (*per'-kin-izm*) [after Elisha *Perkins,* the originator of the method]. Also called *Tractoration.* A method of empiric treatment devised by a Connecticut physician. It consists in drawing over the affected part the extremities of two rods ("metallic tractors") of different metals. Cf. *Metallotherapy.*

Perkinist (*per'-kin-ist*) [after Elisha *Perkins,* an

American physician]. A believer in, or practiser of, Perkinism.

Perkinistic (*per-kin-is'-tik*) [after Elisha *Perkins*, an American physician]. Pertaining to Perkinism.

Perla (*per'-lah*) [L.: *pl.*, *Perlæ*]. Pearl. **Perlæ textiles**, small pearls sometimes used in pharmacy.

Perlèche (**la**) (*lah pär-lāsh*) [Fr.]. A peculiar contagious disease of the mouth occurring in children, and first described by Lemaistre in 1886. It consists in a thickening and peeling off of the epithelium at the angles of the mouth, with occasionally the formation of small fissures, giving rise to a smarting sensation in the lips. The disease is probably microbic in origin, numerous spherobacteria being found in the thickened epithelium. The microörganisms are probably derived from drinking-water.

Perles' Anemia-bodies. Small club-shaped, actively motile bodies, 3–4 μ in length, found by Perles in the blood in three cases of pernicious anemia.

Perles, Lænnec's, the rounded gelatinous masses of sputum seen in the early stage of an attack of bronchial asthma.

Perlia, Central Nucleus of. The nuclear center for ocular movement.

Permanent (*per'-man-ent*) [*permanens*, remaining]. Lasting indefinitely; fixed; enduring. In biology, always present in a species or group. **P. Blue.** Same as *French Blue*. **P. Teeth,** the teeth of the second dentition. See *Teeth*. **P. White.** See *Pigments, Conspectus of*.

Permanganate (*per-man'-gan-āt*) [*per*, through; *manganese*]. A salt of permanganic acid. See *Manganese*.

Permanganic (*per-man-gan'-ik*) [*per*, through; *manganese*]. Obtained from manganese. **P. Acid,** $HMnO_4$; a monobasic acid occurring chiefly as a salt.

Permeable (*per'-me-a-bl*) [*per*, through; *meare*, to pass]. Capable of affording passage. **P. Stricture,** a stricture that permits the passage of an instrument.

Permutation (*per-mu-ta'-shun*) [*per*, through; *mutare*, to change]. The reciprocal substitution between two compounds of one element or radicle for another.

Pernicious (*per-nish'-us*) [*perniciosus*, destructive]. That which is highly destructive or mischievous. **P. Anemia,** a disease of the blood characterized by a great diminution in the number of red corpuscles, and a relatively smaller diminution of the hemoglobin, by the presence in the blood of poikilocytes, macrocytes, microcytes, and nucleated red corpuscles. The diminution in red corpuscles exceeds that met with in any other disease—the number may fall below 400,000. A case is reported in which the red corpuscles numbered only 143,000 in the cu. mm. As regards the etiology of the disease, two varieties must at present be admitted—a *symptomatic* and an *idiopathic*. A symptomatic pernicious anemia, one in which the blood presents characters indistinguishable from those of the idiopathic form, may be produced by parasites in the intestinal canal, such as the *Dochmius duodenalis*, *Trichocephalus hominis*, or the *Bothriocephalus latus* (Cf. *Parasites* (*Animal*), *Table of*), by atrophy of the gastric mucous membrane, and by hemorrhage. The nature of primary pernicious anemia is still obscure. Many believe that the disease is dependent upon increased hemolysis, *i. e.*, blood-destruction. In favor of this view, is the presence in the liver and spleen of cases that have died from the disease, of large quantities of iron, clearly derived from the blood. The hemolytic agent, according to Hunter, is a poison, in all probability of specific origin, absorbed from the intestinal canal. Others ascribe the impoverished state of the blood to imperfect hemogenesis, adducing poikilocytosis and the presence of nucleated corpuscles, in proof. While defective hemogenesis may play a rôle, it is probable that increased hemolysis is the more important factor. The pathologic lesions found, are a yellow color of the skin, fatty degeneration of the liver and heart, deposits of iron in the spleen and liver, peculiar changes in the spinal cord, hemorrhages into the retina; more rarely hemorrhages into the stomach, serous membranes, and lungs, and occasionally an embryonal state of the bone-marrow. The symptoms of the disease are those of a profound anemia, with the blood-changes noted in the definition; there is not much wasting; the skin is of a lemon-yellow color; febrile movements may occur; also retinal hemorrhages as well as hemorrhages elsewhere; the urine is frequently of a dark color due to an excess of urobilin. The disease, most common in middle life, is usually fatal, although recoveries are reported in several instances, under the influence of large doses of arsenic. Intestinal antiseptics are suggested on the ground that the disease is the result of autoinfection from the alimentary tract. **P. Malaria.** See *Malaria*.

Pernio (*per'-ne-o*). Synonym of *Chilblain*.

Pernoctation (*per-nok-ta'-shun*) [*pernoctatio*, wakefulness]. Wakefulness; insomnia.

Pero (*pe'-ro*) [*pero*, boot]. The soft ectal layer of the olfactory bulb whence the olfactory nerves arise.

Perobrachia (*pe-ro-bra'-ke-ah*). See *Perobrachius*.

Perobrachius (*pe-ro-bra'-ke-us*) [πηρός, maimed; βραχίων, arm]. A developmental defect in which the forearms and hands are malformed or wanting.

Perocephalus (*pe-ro-sef'-al-us*) [πηρός, maimed; κεφαλή, head]. A monster with an abnormality of the conformation of the head.

Perocheirus, Perochirus (*pe-ro-ki'-rus*) [πηρός, maimed; χείρ, hand]. A defect in the development consisting in absence or stunted growth of the hand.

Perocormus (*pe-ro-kor'-mus*) [πηρός, maimed; κορμός, trunk]. A monster characterized by defective development of the trunk.

Perodactylia (*pe-ro-dak-til'-e-ah*) [πηρός, maimed; δάκτυλος, finger]. Defective development of the fingers or toes.

Perodactyly (*pe-ro-dak'-til-e*). Same as *Perodactylia*.

Perodynia (*pe-ro-din'-e-ah*) [πήρα, pouch; ὀδύνη, pain]. Cardialgia.

Perogaster (*pe-ro-gas'-ter*) [πήρα, a pouch or wallet; γαστήρ, stomach]. In biology, the coronal intestine or circumferential sinus of gastric pouches in the *Peromedusæ*.

Peromelia (*pe-ro-me'-le-ah*) [πηρός, maimed; μέλος, limb]. Teratic malformation of the limbs.

Peromelus (*pe-rom'-el-us*) [πηρός, maimed; μέλος, limb]. A monster with deficient, stunted, or misshapen limbs.

Peronæus (*per-o-ne'-us*). Same as *Peroneus*.

Peronarthrosis (*per-on-ar-thro'-sis*) [περόνη, pin; ἄρθρον, joint]. A joint in which the articular surfaces are both concave and convex, as in the carpometacarpal joint of the thumb.

Peronate (*per'-o-nāt*) [*peronatus*, rough-booted]. In biology, having the stipe thickly covered with a mealy or woolly substance.

Perone (*per'-o-ne*) [περόνη, pin]. The fibula.

Peroneal (*per-o-ne'-al*) [περόνη, pin]. Pertaining, or relating, to the fibula. **P. Artery.** See *Arteries, Table of*. **P. Nerve.** See *Nerves, Table of*. **P. Reflex.** See *Reflexes, Table of*.

Peroneo- (*per-o-ne'-o-*) [περόνη, *peronæus*, fibula]. A prefix denoting connection with or relation to the fibula.

Peroneo-calcaneus (*per-o-ne'-o-kal-ka'-ne-us*) [περόνη,

pin; *calx*, heel]. Pertaining to the fibula and the os calcis. **P. externus anterior.** See *Muscles, Table of.* **P. internus.** See *Muscles, Table of.*

Peroneo-phalangeus (*per-o-ne'-o-fa-lan-je'-us*) [περονη, pin; φάλαγξ, phalanx]. The muscle in lower animals corresponding to the tibialis anticus in man.

Peroneo-præphalangeus (*per-o-ne'-o-pre-fa-lan-je'-us*) [περονη, pin; *præ*, before; φάλαγξ, phalanx]. The muscles in lower animals corresponding to the peroneus brevis in man.

Peroneo-tibialis (*per-o-ne'-o-tib-e-a'-lis*). See *Muscles, Table of.*

Peroneum (*per-o-ne'-um*). Synonym of *Perone.*

Peroneus (*per-o-ne'-us*) [περόνη, pin]. Pertaining to the fibula. **P. Muscle.** See *Muscles, Table of.*

Peronia (*pe-ro'-ne-ah*) [πηροῦν, to maim]. Mutilation; malformation.

Peronium (*per-o'-ne-um*) [περόνη, a brooch, a pin: *pl.*, *Peronia*]. In biology, one of the processes of the urticating-ring of the umbrella-margin in *Narcomedusæ* called the "*umbrella-clasp*," which divides it into a number of collar lobes.

Peronodactylius (*per-o-no-dak-til'-e-us*) [περόνη, pin; δάκτυλος, finger]. Synonym of flexor longus digitorum muscle. See *Muscles, Table of.*

Peronospora (*per-o-nos'-po-rah*) [περόνη, point; σπόρος, spore]. A genus of fungi, of which there are some seventy species recognized under the general name of downy mildews (*q. v.*: under *Mildew*), among which **P. viticola**, parasitic on the grape, is the most destructive. The cholera-microbe of Ferran has been referred to **P. ferrani** or **P. barcinonæ**, and the yellow-fever microörganism of Carmona y Valle to **P. lutea.**

Peroplasia (*pe-ro-pla'-ze-ah*) [πηρός, maimed; πλάσσειν, to mold]. A malformation due to an error of development.

Peropus (*pe'-ro-pus*) [πηρός, maimed; πούς, foot]. A developmental defect in which the feet are malformed.

Perosis (*pe-ro'-sis*) [πηρός, maimed]. The condition of abnormal or defective formation.

Perosomus (*pe-ro-so'-mus*) [πηρός, maimed; σῶμα, body]. A monster presenting malformation of the entire body.

Perosplanchnica (*pe-ro-splank'-nik-ah*) [πηρός, maimed; σπλάγχνον, viscus]. Malformation of the viscera.

Peroxid (*per-oks'-id*) [*per*, through; ὀξύς, sharp]. That oxid of any base which contains the most oxygen. **P. of Hydrogen.** See *Hydrogen.*

Perpendicular (*per-pen-dik'-u-lar*) [*perpendicularis*, vertical]. A term applied to a line or plane, forming a right angle with another line or plane. **P. Plate**, the mesal vertical plate of the ethmoid bone.

Perplication (*per-plik-a'-shun*) [*per*, through; *plicare*, to fold]. Folding or turning an incised vessel upon or within itself by drawing its end through an incision in its own wall.

Perradial (*per-ra'-de-al*) [*per*, through; *radius*, a ray]. In biology, primarily or fundamentally radial.

Perradius (*per-ra'-de-us*) [*per*, through; *radius*, ray: *pl.*, *Perradii*]. In biology, one of the primary radial structures of a hydrozoan.

Perrigation (*per-rig-a'-shun*) [*per*, through; *irrigare*, to irrigate]. The name given to the method of open drainage in empyema. There is a continuous evacuation of the pus by means of single or double openings in the chest at different or opposite points, selected with the view of securing the advantage of gravity. The tubes, when situated at opposite points, allow of injections of antiseptic fluids to irrigate the whole pleural space.

Perry (*per'-e*) [Fr., *poire*, pear]. Pear-cider.

Persecution (*per-se-ku'-shun*) [*persecutio*, a pursuit]. Persistent or repeated injury of any kind. **P., Delusions of**, the imaginary belief of an individual that he is being persecuted. **P.-mania**, monomania characterized by doubt, suspicion, and a belief on the part of the patient that he is subject to, or the victim of, some conspiracy.

Persecutory Insanity. See *Persecution-mania.*

Perseïte (*per'-se-īt*), $C_7H_{16}O_7$. An heptahydric alcohol found in the leaves and seeds of *Laurus persea.* It crystallizes in needles, melting at 184° C.

Persian (*per'-zhan*) [Περσίς, Persia]. Pertaining to Persia. **P. Pellitory.** See *Pyrethrum roseum.* **P. Red.** Same as *Ocher.*

Persicot (*per'-sik-ot*) [Fr.; *persicum*, peach]. A cordial, or *liqueur*, of alcohol flavored with peach-stones and various aromatics.

Persimmon (*per-sim'-on*) [Amer. Ind.]. The tree *Diospyros virginiana;* also its fruit, edible when fully ripe, but otherwise highly astringent; it is useful in diarrheas. From the fruit a beer is made, and whisky is distilled. Unof.

Persio (*per'-se-o*). See *Cudbear.*

Persistent (*per-sis'-tent*) [*persistero*, to persist]. Constant; not undergoing any diminution or cessation.

Person (*per'-son* or *per'-sn*) [*persona*, a mask for actors, hence a personage]. In biology, an independent and indivisible organic unit, a complete individual from a morphologic and physiologic standpoint. Among simpler animals we have to do with structures which from their development must be termed individuals, but which are fused into a common stock, forming what is known as a colony, to which they are related physiologically, as organs are to an organism. The individuals of such stocks are, however, generally not similar, but as a consequence of more or less division of labor, dimorphism or polymorphism takes place; we may thus distinguish: (1) sterile *nutritive persons*, or *protective persons*, which perform the functions of taking in food, of digestion, of protection, touch, locomotion, etc., *e. g.*, the so-called "protective," or "bract," the "gastric peduncle," the "tentacle" or capturing filament, the "taster," "feeler," or "palpon," the "swimming bell" or "nectophore" of a siphonophore; (2) *Sexual persons* or gonophores, to which belong exclusively the function of forming the sexual products. They are male or female. These heteromorphic individuals are frequently arranged in groups called *cormidia*, and then again into *siphonanth*, *q. v.* On the other hand the same groups of organs or similar parts of the same organ may be repeated in a radial or longitudinal direction; the body thus obtains a segmentation and is divisible into sections (see *antimere*, *metamere*, *paramere*, *proglottis*, *strobila*), or segments which may in structure and function appear completely equivalent and represent *persons* or individuals of a lower order, which on a severance of their mutual connection can acquire independence and remain alive for a longer or shorter period.

Personal (*per'-son-al*) [*persona*, a person]. Pertaining to a person. **P. Equation**, the peculiar difference of each individual in his reaction to various orders of stimuli. **P. Identity.** See *Identity.*

Personate (*per'-son-āt*) [*personatus*, assumed, counterfeited, masked]. In biology, masked; applied to labiate flowers in which the throat is closed by a projection of the lower lip called the palate; or to animals having the face colored so as to suggest a mask.

Perspicil (*per'-spis-il*). Same as *Perspicilium.*

Perspicilium (*per-spis-il'-e-um*) [*perspicere*, to see through]. An eyeglass, a microscope. In the plural, spectacles.

Perspiration (*per-spi-ra'-shun*) [*perspiratio; perspirare*, to perspire]. Excretion of liquid from the skin, mainly by sweat-glands; sweating. The liquid so excreted; the sweat.

Perspiratory (*per-spi'-ra-to-re*) [*perspirare*, to perspire]. Pertaining to perspiration. Causing perspiration.

Perspire (*per-spīr'*) [*perspirare*, to perspire]. To sweat; to evacuate the fluids of the body through the emunctories of the skin.

Persultation (*per-sul-ta'-shun*) [*persultare*, to leap]. A sudden, profuse sweat.

Perturbation (*per-ter-ba'-shun*) [*perturbatio; perturbare*, to disturb]. Restlessness or disquietude. The employment of means that arrest or modify the development of a morbid state.

Pertusate (*per-tu'-sāt*) [*pertundere*, to bore through]. In biology, having a perforated apex.

Pertuse (*per-tūs'*) [*per*, through; *tundere*, to strike]. In biology, having perforations, holes, or slits.

Pertusorium (*per-tus-o'-re-um*) [*pertundere*, to pierce]. An instrument for perforating the fetal membranes.

Pertussal (*per-tus'-al*) [*per*, intensive; *tussis*, a cough]. Pertaining to or of the nature of whooping-cough.

Pertussis (*per-tus'-is*) [*per*, through; *tussis*, cough]. Whooping-cough, a contagious disease, confined usually to childhood and youth, and marked by spasmodic coughing ended by a "whoop," and sometimes by vomiting. Its course lasts usually for a period of six or seven weeks. It is rarely fatal. It is divided into a *catarrhal* or *prodromal* stage, and a *paroxysmal* stage. The period of incubation is about two weeks. During the height of the disease, hemorrhages may occur from the nose, mouth, or ears, or into the subconjunctival tissues, even into the brain or its meninges. Bronchopneumonia is a frequent complication. Affanasiew has found a small bacillus in the expectoration, which he considers the etiologic factor. The presence of this bacillus has been confirmed by others. See *Bacillus tussis convulsivæ* under *Bacteria, Synonymatic Table of.*

Peru, Balsam of. See *Balsam.*

Perulate (*per'-u-lāt*) [*perula*, a scale]. In biology, having scales (*perulæ*), such as bud-scales.

Perule (*per'-ūl*) [πήρα, a purse, wallet]. In biology, a bud-scale.

Peruvian (*pe-ru'-vin*) [*Peru*]. Pertaining to Peru. **P. Bark.** See *Bark, Peruvian*, and *Cinchona.* **P. Wart.** See *Verruga peruana* and *Bacillus of Verruga peruana* under *Bacteria, Synonymatic Table of.*

Peruvin (*pe-ru'-vin*) [*Peru*]. The name given to the cinnamic alcohol derived from balsam of Peru.

Perversion (*per-ver'-zhun*) [*per*, through; *vertere*, to turn]. The state of being turned away from the normal course, as in the modifications of function in disease. **P., Sexual,** abnormality of the sexual instinct; desire for unnatural methods of sexual gratification.

Pervert (*per'-vert*) [*per*, through; *vertere*, to turn]. One who has turned from the right way. **P., Sexual,** a person whose sexual instincts are perverted.

Pervigilium (*per-vij-il'-e-um*) [*per*, through; *vigilium*, a watch]. Insomnia; wakefulness.

Pervious (*per'-ve-us*) [*per*, through; *via*, way]. Open; permeable.

Pes (*pēz*) [L.]. A foot, or foot-like part or organ. **P. accessorius,** the *Eminentia collateralis*, a smooth, white eminence in the brain, situated at the junction of the posterior and descending cornua of the lateral ventricle. **P. anticus.** Same as *Manus.* **P. contortus.** Synonym of *Club-foot.* **P. depressus.** Synonym of *Flat-foot.* **P. equino-varus.** Same as *Talipes equino-varus.* **P. equinus.** See *Talipes equinus.* **P. hippocampi major,** the large, lower portion of the hippocampus major. **P. hippocampi minor.** Same as *Hippocampus minor.* **P. planus.** Synonym of *Flat-foot.* **P. valgus.** Synonym of *Talipes valgus.* **P. varus.** Synonym of *Talipes varus.*

Pessary (*pes'-ar-e*) [πεσσός, an oval-shaped stone]. An instrument placed in the vagina to hold the uterus in position.

Pessima (*pes'-im-ah*) [L.]. A skin-affection characterized by pustular lesions, hard and yellowish and surrounded by areolæ of inflammation, appearing over the whole surface of the body.

Pessimism (*pes'-im-izm*) [*pessimus*, worst]. A morbid disposition to put the worst construction upon everything; a symptom common among insane people. Opposite of *Optimism.*

Pessulus (*pes'-u-lus*) [πάσσαλος, a peg, pin, gag: *pl.*, *Pessuli*]. In biology, the cross-bone of the syrinx of a bird; the "bolt-bar" or "bar of divarication" across the lower end of the trachea where it divides into the right and left bronchi.

Pest [*pestis*, a pest]. A plague; pestilence. **P.-house,** a hospital for persons sick with pestilential diseases.

Pesta (*pes'-tah*) [L.]. A pest. **P. magna.** Synonym of *Smallpox.*

Pestichia, Pesticia (*pes-tik'-e-ah, pes-tis'-e-ah*). Synonyms of *Petechia.*

Pestiduct (*pes'-tid-ukt*) [*pestis*, pest; *ductus*, conveyance]. A channel, or means of conveyance, for a contagion; fomites. [Rare.]

Pestiferous (*pes-tif'-er-us*) [*pestis*, pest; *ferre*, to bear]. Causing pestilence; destructive.

Pestilence (*pes'-til-ens*) [*pestilentia*]. Any deadly epidemic disease or the prevalence of such a disease.

Pestilent, Pestilential (*pes'-til-ent, pes-til-en'-shal*) [*pestis*, plague]. Having the nature of a pestilence or epidemic disease. **P. Fever.** Synonym of the *Plague, q. v.*

Pestilentia (*pes-til-en'-she-ah*). Synonym of the *Plague.*

Pestis (*pes'-tis*) [L.]. A plague. **P. americana,** yellow fever. **P. bubonica, P. inguinaria, P. orientalis,** the plague. **P. variolosa.** Synonym of *Variola.*

Pestle (*pes'-l*) [*pistillum*]. The instrument with which substances are rubbed in a mortar.

Petal (*pet'-al*) [πέταλον, a leaf]. In biology: (*a*) A leaf of a corolla. (*b*) The leaf-shaped ambulacrum of an echinoderm.

Petaled, Petalled (*pet'-ald*) [πέταλον, a leaf]. In biology, having petals.

Petaliform (*pet'-al-if-orm*) [πέταλον, a leaf; *forma*, form]. In biology, shaped like a petal.

Petaline (*pet'-al-in*) [*petalum*, a petal]. In biology, pertaining or attached to a petal.

Petalody (*pet'-al-o-de*) [πέταλον, a leaf; εἶδος, shape]. In biology, the assumption of petal-like characters by other parts of a flower.

Petaloid (*pet'-al-oid*) [πέταλον, a leaf; εἶδος, shape]. In biology, resembling a petal, either in color, texture or form.

Petalomania (*pet-al-o-ma'-ne-ah*). Same as *Petalody.*

Petalous (*pet'-al-us*) [πέταλον, a leaf]. In biology, furnished with petals; petaled.

Petasma (*pet-az'-mah*) [πέτασμα, a curtain]. In biology, a membranous development attached to the first pair of pleopoda in the male of certain crustaceans. (Bate.)

Petechia (*pe-te'-ke-ah*) [It., *peteche*, a flea-bite: *pl.*, *Petechiæ*]. A small, round, oval, or irregular spot of ecchymosis beneath the epidermis, varying in size from a flea-bite to an area having a diameter of half an inch or more. It is not raised above the level of the

skin, but is of a reddish or purple shade, and does not alter on pressure by the finger.

Petechial (*pe-te'-ke-al*) [It., *peteche*, flea-bite]. Characterized by or of the nature of petechiæ. **P. Fever.** Synonym of *Fever, Cerebro-spinal*, and of *Fever, Typhus*. **P. Scurvy.** Synonym of *Purpura simplex*.

Petechianosis (*pe-te-ke-an-o'-sis*). Synonym of *Petechial Fever*.

Petechiate (*pe-te'-ke-āt*) [It., *petecchia*, a spot]. Having petechiæ; spotted.

Petersen's Bag. A rubber bag with a capacity of about 15 ounces, to be inserted into the rectum and then distended, so as to elevate the bladder in the operation of supra-pubic cystotomy.

Petiolaceous (*pet-e-o-la'-se-us*). Same as *Petiolate*.

Petiolar (*pet'-e-o-lar*) [*petiolus*, a petiole]. In biology, belonging to a petiole or attached to one.

Petiolary (*pet'-e-o-la-re*). Same as *Petiolar*.

Petiolate (*pet'-e-o-lāt*) [*petiolus*, a petiole]. In biology, possessing a petiole; mounted upon a foot-stalk, or peduncle.

Petiole (*pet'-e-ōl*) [*petiolus*, a stem, or stalk of fruits]. In biology: (1) A leaf-stalk or foot-stalk. (2) The slender part of a wasp or ant, joining the thorax and abdomen.

Petiolulate (*pet'-e-o-lu-lāt*) [*petiolulus*, petiolulus]. In biology, mounted upon a little leaf-stalk of its own; applied to a leaflet or foliole.

Petiolule (*pet'-e-o-lūl*) [*petiolulus*, dim. of *petiolus*, petiole]. In biology, a small leaf-stalk, such as those of the leaflets or folioles of compound leaves. **P. epiglottidis**, the narrow, attached, stalk-like portion of the epiglottis.

Petiolus (*pet-i'-o-lus*) [*petiolus*, a stem or stalk of fruit; *pl.*, *Petioli*]. In biology, a stem, stalk, or petiole; as the petiolus of the epiglottis.

Petiotization (*pet-e-o-tiz-a'-shun*). A method of improving wines by adding sugar and water to the marc from which the juice has been separated, and fermenting again. The process may be repeated several times, the different infusions being mixed.

Petit, Canal of (*pet-e'*). The narrow annular cleft, triangular in section, bounded in front by the zone of Zinn, mesially by the crystalline lens, and behind by the substance of the vitreous body in the eye. See *Canal*. **P.'s Hernia.** See *Hernia*. **P.'s Operation**, an operation for the relief of strangulated hernia. It consists in a division of the stricture without opening the sac. See *Operations, Table of*. **P., Triangle of.** See *Triangles, Table of*.

Petit Mal (*pet-e'-mal*) [Fr.]. See *Epilepsy*.

Petiveria (*pet-iv-e'-re-ah*) [after J. *Petiver*, a London apothecary]. A genus of phytolaccaceous plants, growing in tropical America and Africa. **P. alliacea**, of the West Indies and Guinea, is stimulant, diuretic, sudorific, anodyne, and depurative. **P. tetandra**, of Brazil, has similar uses. Its tincture has been recommended for external use after baths, and as a local stimulant in paralysis. Unof.

Petri's Capsules, Dishes, Plates, or Saucers. Receptacles for cultures in bacteriologic investigation; shallow cylindric covered glass vessels, in which the colonies may be counted without removing the cover. **P.'s Sand-filter**, a small filter used in the bacteriologic examination of air. A glass tube, 9 centimeters long, is provided with two portions of sand (previously passed through a sieve with meshes 0.25 millimeter wide) each 3 cm. long, and 0.5 cm. apart, little plates of brass-gauze keeping the portions in position. The tube and its contents, the end having been plugged with cotton, are sterilized in an oven, at 150° C. A rubber stopper, through which passes a glass tube, is then fitted into one end of the tube, and the apparatus is connected with an aspirator of known capacity.

Petricolous (*pet-rik'-o-lus*) [*πέτρα*, rock; *colere*, to inhabit]. In biology, inhabiting rocks.

Petrifaction (*pet-rif-ak'-shun*) [*πέτρα*, a stone; *facere*, to make]. The condition resembling stone-calcification. In obstetrics, conversion of the fetus into a lithopedion. Petrifaction of tissues is brought about by the deposit in them of salts of lime and magnesium.

Pétrissage (*pa-tre-sahzh'*) [Fr., kneading]. A form of "soft *attachement*," in massage, the hand of the operator "climbing" like a caterpillar.

Petrobasilar (*pet-ro-baz'-il-ar*) [*πέτρα*, stone; *βάσις*, base]. Pertaining to the petrous portion of the temporal bone and the basilar portion of the occipital bone.

Petroccipital (*pet-rok-sip'-it-al*). Synonym of *Petro-occipital*.

Petrohyoid (*pet-ro-hi'-oid*) [*πέτρα*, a rock; *ὑοειδής*, shaped like the letter upsilon]. Related to the hyoid bone and the petrous portion of the temporal bone. **P. Muscle**, a muscle of some batrachians.

Petrolardium (*pet-ro-lar'-de-um*). Synonym of *Petrolatum*.

Petrolatum (*pet-ro-la'-tum*) [*πέτρα*, rock; *oleum*, oil]. *Petroleum ointment; Cosmolin*. A jelly-like preparation obtained from the residium of petroleum, soluble in ether, insoluble in water and alcohol, and known commercially as vaselin and as cosmolin. It is an excellent basis for ointments and a valuable emollient. **P. molle**, soft petrolatum. **P. spissum**, hard petrolatum.

Petrolene (*pet'-ro-lēn*) [*πέτρα*, rock; *oleum*, oil]. A liquid hydrocarbon mixture obtained from petroleum.

Petroleum (*pet-ro'-le-um*) [*πέτρα*, rock; *oleum*, oil]. *Rock-oil; Naphtha;* probably a product of the dry distillation of coal-beds caused by the earth's heat; or of the dry distillation of the fatty constituents of fossil organisms. In a crude condition, it is a thick, oily liquid, of brownish color, with greenish luster. On exposure to air, its more volatile constituents are lost; it then thickens and passes into asphaltum. **P., American**, consists almost exclusively of normal paraffins. In a crude form, it has a specific gravity of from 0.8 to 0.92, and distils over at from 300° to 360° C. and beyond this. **P. Benzine** (not to be confounded with the benzene of coal-tar), a product of petroleum obtained by fractional distillation; it has a specific gravity of from 0.68 to 0.72, and distils at from 70° to 90° C., and consists of hexane and heptane. **P., Caucasian** (from Baker), has a higher specific gravity than American petroleum; it contains less of the light volatile constituents and distils at about 150° C. **P. Ether**, a product of petroleum obtained by fractional distillation; it has a specific gravity of from 0.665 to 0.67, distilling at from 50° to 60° C.; it consists of pentane and hexane. **P., Galician**; in composition, intermediate in position between American and Caucasian petroleum. **P. gelatum**, petrolatum. **P., German**, contains benzene hydrocarbons, but consists chiefly of the saturated hydrocarbons and naphthenes. **P. Oil, Light**, a liquid resembling *P. Benzine*, having a specific gravity of 0.70 or 0.71. **P., Refined; Kerosene**; a product of petroleum by fractional distillation; it boils at from 150° to 300° C., and has a specific gravity of from 0.78 to 0.82. **P. Spirit.** Synonym of *Benzine*.

Petroliferous (*pet-ro-lif'-er-us*) [*πέτρα*, rock; *oleum*, oil; *ferre*, to bear]. Producing petroleum.

Petrolin (*pet'-ro-lin*) [*πέτρα*, a rock; *oleum*, oil]. The commercial name for a combination of hydrocarbons derived from petroleum.

Petromastoid (*pet-ro-mas'-toid*) [πέτρα, stone; μαστός, nipple; εἶδος, like]. Pertaining to the petrous and mastoid portions of the temporal bone. **P. Bone,** a bone of fetal and early infantile life, which in the human species soon becomes merged into the temporal bone. **P. Canal,** a short passage connecting the mastoid sinuses and the tympanic cavity. **P. Foramen,** the tympanic orifice of the petro-mastoid canal.

Petroöccipital (*pet-ro-ok-sip'-it-al*) [πέτρα, stone; *occiput*, occiput]. Pertaining to the petrous portion of the temporal bone and to the occipital bone.

Petropharyngeus (*pet-ro-far-in'-je-us*) [πέτρα, rock; φάρυγξ, pharynx]. A small muscle arising from the lower surface of the petrous portion of the temporal bone, and blending with the constrictors of the pharynx.

Petrosa (*pet-ro'-sah*) [πέτρα, rock]. The petrous portion of the temporal bone.

Petrosal (*pet-ro'-zal*) [πέτρα, rock]. Pertaining to the petrous portion of the temporal bone. As a noun, the petrous portion of the temporal bone itself. **P. Bone,** in biology, one of several portions of the temporal bone in the human fetus and in other animals. **P. Nerves.** See *Nerves, Table of.* **P. Sinus,** a name given to two venous sinuses, superior and inferior. The former is situated along the superior border of the petrous portion of the temporal bone; the latter, near the posterior border. **P. Vein.** Same as *P. Sinus.*

Petrosalpingopharyngeus (*pet'-ro-sal-ping'-go-far-in'-je-us*). Same as *Petropharyngeus.*

Petrosalpingostaphylinus (*pet'-ro-sal-ping'-go-staf-il-i'-nus*). Synonym of *Levator palati.* See *Muscles, Table of.*

Petroselinum (*pet-ro-se-li'-num*) [πέτρα, rock; σέλινον, parsley]. A genus of umbelliferous plants including the common parsley.

Petrosomastoid (*pet-ro-so-mas'-toid*). Synonym of *Petromastoid.*

Petrosphenoid (*pet-ro-sfe'-noid*) [πέτρα, rock; σφήν, wedge; εἶδος, like]. Pertaining to the petrous portion of the temporal bone and the sphenoid bone. **P. Suture,** the suture between the temporal bone and the great wing of the sphenoid bone.

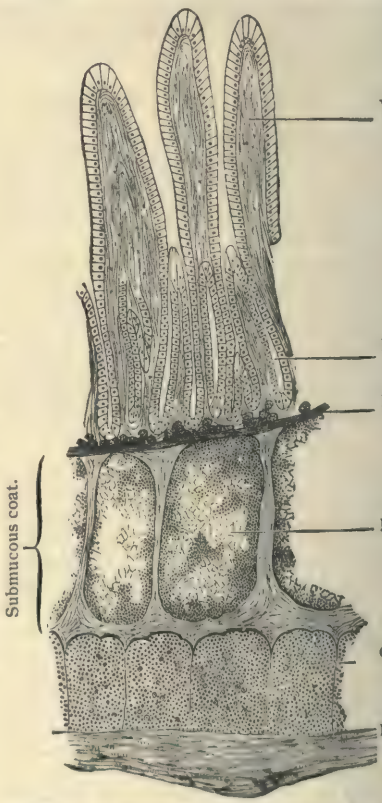
Petrosquamosal, Petrosquamous (*pet'-ro-skwa-mo'-sal, pet-ro-skwa'-mus*) [πέτρα, rock; *squama*, scale]. Pertaining to the petrous and squamous portions of the temporal bone. **P. Fissure.** Same as *P. Suture.* **P. Sinus,** a venous passage formed in the dura at the junction of the petrous and squamous portions of the temporal bone. It opens into the lateral sinus. **P. Suture,** the line of juncture of the squamous and petrous portions of the temporal bone.

Petrostaphylinus (*pet-ro-staf-il-i'-nus*). Synonym of *Levator palati Muscle.* See *Muscles, Table of.*

Petrous (*pe'-trus*) [πέτρα, rock]. Stony; like a rock. See *Petrosal.* **P. Portion.** See *Temporal Bone.* **P. Ganglion.** See *Ganglia, Table of.* **P. Sinus.** See *Petrosal Sinus.*

Pettenkofer's Method. A method of estimating CO_2 in the air. See *Ventilation.* **P.'s Test.** A qualitative test for the presence of biliary acids. A few drops of the suspected liquid, as the urine, are dropped into a fresh solution of sugar and dilute sulphuric acid. If biliary acids be present a purplish-crimson color is produced. See *Tests, Table of.* **P.'s Theory.** A theory of the development of cholera. It is that cholera is not communicable from man to man, but requires certain conditions of the soil in order to develop its infectious character. These conditions are, in the main, a low stage of the subsoil water, a certain porosity of the soil, and the presence of substances that can serve as food for low organisms. Pettenkofer succinctly states his theory as follows: The cholera germ, "X," by reason of certain local and chronologic conditions of the soil, "Y," produces the cholera-poison, "Z," just as the yeast-plant, "X," develops from the sugar-solution, "Y," the poisonous alcohol, "Z." The cholera-poison, "Z," enters the human body with the inspired air. Pettenkofer's theory is not generally accepted, as it has been proved that the cholera-bacillus is the cause of the disease, and enters the body chiefly with the drinking-water.

Petticoat Tube. A device for arresting hemorrhage after lithotomy. It consists of a vulcanite tube, the open end of which is thrust through a small hole in the middle of a piece of linen about four inches square, the linen being firmly tied around the tube about half an inch from the end. This end is lubricated and thrust into the bladder, and the space between the tube and the petticoat is stuffed with strips of lint, thus producing compression.



Peucedanin (*pu-sed'-an-in*) [πευκέδανον, hog-fennel], $C_{12}H_{12}O_3$. A crystalline body obtained from the root of species of *Peucedanum.*

Peucedanum (*pu-sed'-an-um*) [πευκέδανον, hog-fennel]. An umbelliferous plant, of which several species have slight medicinal value. It is now rarely used; it yields peucedanin. Unof.

Peumus (*pu'-mus*) [native Chilean name]. A genus of apetalous monimiaceous plants. **P. boldus.** See *Boldo.*

Pexis (*peks'-is*). Synonym of *Concretion.*

Peyer's Gland or **Peyer's Patch** [Johann K. *Peyer*, Swiss anatomist 1653–1712]. The agminated glands

LONGITUDINAL SECTION THROUGH A PEYER'S PATCH OF THE SMALL INTESTINE OF A DOG. (*From Stirling.*)

of the small intestine, consisting of large, oval groups of closely aggregated lymph-follicles, bound together by adenoid tissue. The patches vary in size and number; they are usually limited to the lower two-thirds of the small intestine, reaching their highest development in the ileum, where they may attain a length of 9–11 cm. each; between twenty and thirty patches generally are present; they are relatively better developed in young than in old subjects. (Piersol.)

Peyerian Glands. See *Peyer's Gland.*

Pfeiffer's Bacillus. See *Bacteria, Synonymatic Table of.*

P.'s Test. See *Gout.*

Pflüger's Cords, or Loops. Cord-like ingrowths of epithelium into the connective-tissue stroma of the cortex of the ovary, containing the germinal cells.

P.'s Law. See *Law.*

P.'s Sacs, tubular passages in the fetal ovaries.

P.'s Salivary Tubes, the intralobular ducts of the salivary glands.

P.'s Tubes, or **Tubules.** Same as *P.'s Sacs.*

Phacella (*fa-sell'-ah*) [φάκελος, a bundle]. In biology, one of the gastric filaments of hydrozoans.

Phacellate (*fas'-el-āt*) [φάκελος, a bundle]. In biology, provided with phacellæ.

Phacellus (*fas-ell'-us*) [φάκελλος, a bundle: *pl.*, *Phacelli*]. In biology, one of the tufts of mobile gastral filaments or mesenterial filaments found in many Cnidarians. Cf. *Acontia.*

Phacentocele (*fa-sen'-to-sēl*) [φακός, lens; ἐντός, within; κήλη, hernia]. Displacement of the crystalline lens into the anterior chamber of the eye.

Phacia (*fa'-se-ah*). Synonym of *Lentigo.*

Phacitis (*fa-si'-tis*). See *Phakitis.*

Phacocyst (*fa'-ko-sist*) [φακός, lens; κύστις, bladder]. 1. The capsule of the crystalline lens. 2. An old term for the often somewhat lenticular nucleus of a plant-cell.

Phacocystectomy (*fa-ko-sis-tek'-to-me*) [φακός, lens; κύστις, cyst; ἐκτομή, excision]. Excision of a part of the capsule of the crystalline lens.

Phacocystitis (*fa-ko-sis-ti'-tis*) [φακός, lens; κύστις, cyst; ῖτις, inflammation]. Inflammation of the capsule of the crystalline lens.

Phacoglaucoma (*fa-ko-glaw-ko'-mah*) [φακός, lens; γλαυκός, green; ὄμα, tumor]. Structural changes in the crystalline lens induced by glaucoma.

Phacohydropiesis (*fa-ko-hi-drop-i-e'-sis*). Synonym of *Cataract, Morgagnian.*

Phacohymenitis (*fa-ko-hi-men-i'-tis*) [φακός, lens; ὑμήν, membrane; ῖτις, inflammation]. Inflammation of the capsule of the crystalline lens.

Phacoid (*fa'-koid*) [φακός, lens; εἶδος, like]. Lens-shaped.

Phacoidoscope (*fa-koid'-o-scōp*). Synonym of *Phacoscope.*

Phacomalacia (*fa-ko-mal-a'-se-ah*) [φακός, lens; μαλακία, softness]. Soft cataract.

Phacometachoresis (*fa-ko-met-ak-or-e'-sis*) [φακός, lens; μετα χώρησις, change of place]. Dislocation of the crystalline lens.

Phacometecesis (*fa-ko-met-es-e'-sis*). Synonym of *Phacometachoresis.*

Phacometer (*fa-kom'-et-er*) [φακός, lens; μέτρον, measure]. An instrument for determining the refractive power of lenses.

Phaconin (*fa'-ko-nin*) [φακός, lens]. The albuminoid body of the crystalline lens; it seems to be a globulin.

Phacopalingenesis (*fa-ko-pal-in-jen'-es-is*) [φακός, lens; πάλιν, again; γένεσις, genesis]. Reproduction of the crystalline lens.

Phacoplasma (*fa-ko-plaz'-mah*) [φακός, lentil; πλάσσειν, to mold]. A cataplasm made of lentil-meal.

Phacoscleroma (*fa-ko-skle-ro'-mah*). Synonym of *Phacosclerosis.*

Phacosclerosis (*fa-ko-skle-ro'-sis*) [φακός, lens; σκληρός, hard]. Hardening of the crystalline lens.

Phacoscope (*fa'-ko-skōp*) [φακός, lens; σκοπεῖν, to inspect]. An instrument used in observing the accommodative changes of the lens.

Phacoscopic (*fa-ko-skop'-ik*) [φακός, lens; σκοπεῖν, to inspect]. Pertaining to the phacoscope.

Phacoscotasmus (*fa-ko-sko-taz'-mus*) [φακός, lens; σκότος, darkness]. Clouding of the crystalline lens.

Phacoscotoma (*fa-ko-sko-to'-mah*). Synonym of *Cataract.*

Phacosis (*fa-ko'-sis*) [φακός, lentil]. A freckle or black spot.

Phacydrops, Phacydropsia (*fak'-id-rops, fak-id-rop'-se-ah*). Synonyms of *Cataract, Morgagnian.*

Phacymenitis (*fak-im-en-i'-tis*). Synonym of *Phacohymenitis.*

Phæ- (*fe-*). See *Phe-.*

Phænogam, Phænogamic (*fen'-o-gam, fen-o-gam'-ik*). See *Phenogam, Phenogamic.*

Phænogamous (*fe-nog'-am-us*). See *Phenogamous.*

Phænozygous (*fen-o-zi'-gus*). See *Phenozygous.*

Phæochrous (*fe-ok'-rus*) [φαιός, dusky; χρώς, the skin]. In biology, dark, dusky.

Phæodellum (*fe-o-del'-um*) [φαιός, dusky; εἶδος, form: *pl.*, *Phæodella*]. In biology, one of the large pigment-granules of the *Phæodium.*

Phæodium (*fe-o'-de-um*) [φαιός, dusky; εἶδος, form: *pl.*, *Phæodia*]. In biology, a collection of dark pigment-bodies in the calymna of certain radiolarians.

Phæophyl, Phæophyll (*fe'-o-fil*) [φαιός, dusky; φύλλον, leaf]. In biology, Schütt's name for the compound pigment of the *Fucaceæ* and *Laminariaceæ.* The reddish-brown portion, soluble in water, is called *phycophæin* by Schütt and Millardet. The yellow portion, soluble in alcohol, is called *phycoxanthin.*

Phagæna (*faj-e'-nah*). Synonym of *Phagena.*

Phagedena (*faj-ed-e'-nah*) [φαγέδαινα; φαγεῖν, to eat]. A spreading and destructive ulceration, often obstinately and rapidly disintegrating soft parts.

P. gangrænosa. See *Gangrene, Hospital.*

P. nosocomialis, hospital-gangrene. See *Gangrene.*

P. tropica, *Aden Ulcer; Malabar Ulcer;* a formidable skin-affection of the tropics, attacking chiefly those who live under depressing influences. It is probably due to a microbe that produces a vesicle or bulla that rapidly assumes a sloughing or gangrenous nature. It quickly invades the neighboring tissues, destroying the soft parts and even the bones. The ulcers generally begin on the feet, ankles, or legs, but the thighs or arms may be attacked. Finally, an indurated atonic ulcer is left which, after a variable period of weeks or months, gradually cicatrizes. Death is frequent from exhaustion.

Phagedenic (*faj-ed-en'-ik*) [φαγέδαινα; φαγεῖν, to eat]. Of the nature of a phagedena.

P. Chancre, a syphilitic chancre which has become phagedenic; it is a rare condition.

P. Chancroid, a chancroid that spreads rapidly and destroys a large amount of tissue. Nearly the entire penis may be lost in a short time.

Phagedermia, Phagædermia (*faj-ed-er'-me-ah*) [φαγεῖν, to eat; δέρμα, skin]. A phagedenic ulceration of the skin.

Phagedermic, Phagædermic (*faj-ed-er'-mik*) [φαγεῖν, to eat; δέρμα, skin]. Pertaining to phagedermia.

Phagena, Phagæna (*faj-e'-nah*) [φαγεῖν, to eat]. Bulimia.

Phagocytal (*fag'-o-si-tal*) [φαγεῖν, to eat; κύτος, a cell]. Pertaining to a phagocyte.

Phagocyte (*fag'-o-sīt*) [φαγεῖν, to eat; κύτος, cell]. In

biology, Metschnikoff's name for one of the motile, ameboid, digestive cells of metazoans, moving from place to place in the organism under the influence of thermotaxis, or of what Stahl called *positive trophotropism*, when it was a question of attraction, and *negative trophotropism*, in cases of repulsion. Pfeiffer included the phenomena with that of the attraction of spermatozoids to the female cell, and other forms of sensibility to chemic agents, under the general heading *chemiotaxis* (positive or negative). Phagocytes are derived from the endodermal or mesodermal tissues in all animals. They are believed to englobe wrecks of larval organs, degradation-products or excretion-products, foreign particles, schizomycetes, hematozoa, etc.—their activity varying as the logarithm of the excitation. They digest the soluble parts and reject the insoluble residue. They play an active part in the metamorphosis of tissues and organs, in inflammation, and as prophylactic agents. Phagocytes are *fixed*—endothelial cells, fixed connective-tissue cells, and *free*—the wandering cells or leukocytes. In man the colorless blood-cells, as well as other kinds of cells, are credited with playing the rôle of phagocytes. A large phagocytic leukocyte is termed a *macrophage*, a small one, a *microphage*.

Phagocytella (*fag-o-si-tel'-ah*) [φαγεῖν, to eat, devour; *cytella*, dim. of κύτος, a cell]. In biology, Metschnikoff's term for the simplest, primitive stage of a metazoan, in which it is composed of two layers, the ectal, an enveloping membrane, the other forming, by the ental cells collected into a mass, a kind of parenchyma composed of ameboid elements. This stage readily passes into the gastrula-stage.

Phagocytic (*fag-o-sit'-ik*) [φαγεῖν, to eat; κύτος, cell]. In biology, of, pertaining to, or caused by phagocytes; cell-devouring; cytophagous.

Phagocytism (*fag'-o-si-tizm*) [φαγεῖν, to eat; κύτος, a cell]. In biology, the function of a phagocyte. The doctrine that inflammation and other vital processes, normal or abnormal, are due to phagocytes.

Phagocytoblast (*fag-o-si'-to-blast*) [φαγεῖν, to eat; κύτος, a cell; βλαστός, a germ]. A cell giving rise to one or more phagocytes.

Phagocytosis (*fag-o-si-to'-sis*) [φαγεῖν, to eat; κύτος, cell]. The destruction or taking up of microörganisms or other solid elements by living cells, as by colorless blood-corpuscles. This theory has been advanced by Metschnikoff and others to explain immunity. It has been found that if microörganisms, such as anthrax-bacilli, are introduced into an insusceptible animal, some of them will be found within the bodies of leukocytes, while this does not occur in a susceptible animal. This fact has led to the enunciation of the doctrine that immunity or susceptibility depends on the ability or inability, respectively, of the body-cells to destroy microörganisms. Immunity may be congenital or acquired; in the latter case it is brought about by an adaptation of the cells to the end that they can consume virulent organisms without harm. Several arguments have been advanced against Metschnikoff's views. It has been said that the bacteria sometimes found in leukocytes are probably dead; if a living microörganism enters a colorless blood-corpuscle, the latter is more likely to suffer than the former. Again, the symptoms of infectious diseases are due to peculiar poisons rather than to the bacteria as such. Immunity can be conferred upon an animal by injections of appropriate doses of such poisons, a fact that cannot readily be explained by the phagocytic theory. It has also been demonstrated that the blood-serum possesses bactericidal properties, and that the blood-serum of artificially immune animals is capable of immunizing other animals, and if given in sufficient strength and dose, even of arresting the disease when already established. The tendency at present is to ascribe the causation of immunity to a peculiar property of the body-fluids—whether bactericidal or antitoxic in nature, *i. e.*, counteracting the bacterial poison; this is not fully established.

Phagomania (*fag-o-ma'-ne-ah*) [φαγεῖν, to eat; μανία, madness]. An insatiable craving for food.

Phagosite (*fag'-o-sīt*) [φαγεῖν, to eat; σῖτος, food]. An animal organism that feeds on but does not dwell within or on its host, *e. g.*, the leech, lamprey, camel-tick, vampire bat.

Phakitis (*fa-ki'-tis*) [φακός, lens; ιτις, inflammation]. Hypothetically, inflammation of the crystalline lens of the eye; practically, however, no such condition has been observed.

Phakometer (*fa-kom'-et-er*) [φακός, lens; μέτρον, measure]. An instrument for measuring the curvatures and refractive powers of lenses.

Phakosclerosis (*fa-ko-skle-ro'-sis*) [φακός, lens; σκληρός, hard]. Induration or hardness of the crystalline lens.

Phakoscope (*fa'-ko-skōp*) [φακός, lens; σκοπεῖν, to see]. An instrument for observing and estimating the change in the shape of the crystalline lens produced by accommodative influences.

Phalacra, Phalacrosis (*fal'-ak-rah, fal-ak-ro'-sis*) [φαλακρός, bald]. Baldness.

Phalacroma (*fal-ak-ro'-mah*). Synonym of *Phalacrosis*.

Phalangagra (*fa-lang-ga'-grah*). Synonym of *Phalangarthritis*.

Phalangal (*fa-lang'-gal*). Same as *Phalangeal*.

Phalangarthritis (*fa-lang-gar-thri'-tis*) [φάλαγξ, phalanx; ἄρθρον, joint; ιτις, inflammation]. Inflammation of phalangeal joints.

Phalange (*fa-lanj'*) [φάλαγξ, the bone of a finger or toe]. In biology: (*a*) one of the bones of a finger or toe; (*b*) one of the joints of an insect's tarsus; (*c*) a bundle of stamens united by their filaments.

Phalangeal (*fa-lan'-je-al*) [φάλαγξ, phalanx]. Pertaining to a phalanx, or to phalanges. **P. Bone**, a phalanx. **P. Process**, in biology: (*a*) a slender prolongation of Deiter's cells attached to the phalanx of the reticular lamina of the organ of Corti; (*b*) the external process of the head of an outer rod of Corti.

Phalangean (*fa-lan'-je-an*). Same as *Phalangeal*.

Phalanges (*fa-lan'-jēz*) [φάλαγξ, phalanx]. Plural of *Phalanx*. **P. of Ear**, the minute cuticular fibers in the organ of Corti.

Phalangette, Phalanget (*fal-an-jet'*) [Fr.]. The third phalanx or terminal bone of the finger.

Phalangial, Phalangian (*fa-lan'-je-al, fa-lan'-je-an*). Same as *Phalangeal*.

Phalangic (*fa-lan'-jik*). Synonym of *Phalangeal*.

Phalangiform (*fa-lan'-jif-orm*) [φάλαγξ, phalanx; *forma*, form]. Having the shape of a phalanx.

Phalangigrade (*fa-lan'-jig-rād*) [φάλαγξ, phalanx; *gradi*, to go]. In biology, walking on the phalanges.

Phalangine (*fal'-an-jin*) [Fr.]. The second phalanx or second bone of the finger.

Phalangitis (*fa-lan-jī'-tis*) [φάλαγξ, phalanx; ιτις, inflammation]. Inflammation of a phalanx.

Phalango-phalangeal (*fa-lan'-go-fa-lan'-je-al*) [φάλαγξ, phalanx]. Pertaining to the successive phalanges of the digits. **P. Amputation**, removal of a finger or toe at the first or second phalangeal joints.

Phalangosis (*fal-an-go'-sis*) [φάλαγξ, phalanx]. 1. A disease of the eyelids in which the lashes are arranged in rows. 2. Ptosis.

Phalanx (*fa'-lanks*) [φάλαγξ, phalanx: *pl.*, *Phalanges*]. Any one of the bones of the fingers or toes. **P.**

Basilar. Synonym of *P., Proximal.* **Ps. of Deiters.** Synonym of *Phalanges of Ear, q. v.* **P., Distal,** the phalanx farthest removed from the metacarpus or metatarsus. **P., Metacarpal,** *P., Proximal,* of the hand. **P., Metatarsal,** *P., Proximal,* of the foot. **P., Middle,** the middle phalanx of the four fingers or four outer toes. **P., Proximal,** the one nearest to the metacarpus or metatarsus. **P., Terminal.** Synonym of *P., Distal.* **P., Ungual, P., Unguicular,** the distal phalanx, so called because it bears the nail.

Phallalgia (*fal-al'-je-ah*) [φαλλός, penis; ἄλγος, pain]. Pain in the penis.

Phallanastrophe (*fal-an-as'-tro-fe*) [φαλλός, penis; ἀναστροφή, upturning]. Twisting or distortion of the penis.

Phallaneurysm (*fal-an'-u-rizm*) [φαλλός, penis; ἀνεύρυσμα, aneurysm]. Aneurysm of a vessel of the penis.

Phallankylosis (*fal-an-kil-o'-sis*) [φαλλός, penis; ἀγκύλωσις, ankylosis]. Adhesion of the penis to a neighboring structure. Also chordee.

Phalledema (*fal-e-de'-mah*) [φαλλός, penis; οἴδημα, edema]. Edematous infiltration of the tissues of the penis.

Phallic (*fal'-ik*) [φαλλός, penis]. Pertaining to the phallus, or penis.

Phallitis (*fal-i' tis*) [φαλλός, penis; ιτις, inflammation]. Inflammation of the penis.

Phalloblennorrhea (*fal-o-blen-or-e'-ah*) [φαλλός, penis; βλέννα, mucus; ῥοία, a flow]. A purulent discharge from the urethra.

Phallocampsis (*fal-o-kamp'-sis*) [φαλλός, phallus; κάμψις, a bending]. Chordee.

Phallocarcinoma (*fal-o-kar-sin-o'-mah*) [φαλλός, penis; καρκίνωμα, carcinoma]. Carcinoma of the penis; it is usually an epithelioma.

Phallocrypsis (*fal-o-krip'-sis*) [φαλλός, phallus; κρύψις, concealment]. Concealment of the penis by retraction.

Phallodynia (*fal-o-din'-e-ah*) [φαλλός, penis; ὀδύνη, pain]. Pain in the penis.

Phalloid (*fal'-oid*) [φαλλός, penis; εἶδος, like]. Resembling the penis.

Phallology (*fal-ol'-o-je*) [φαλλός, penis; λόγος, science]. The science treating of the penis.

Phalloncus (*fal-ong'-kus*) [φαλλός, penis; ὄγκος, a tumor]. Any tumor or swelling of the penis.

Phalloplasty (*fal'-o-plas-te*) [φαλλός, phallus; πλάσσειν, to mold]. Plastic or restorative surgery of the penis.

Phallopsophia (*fal-op-so'-fe-ah*) [φαλλός, penis; ψόφος, noise]. A discharge of gas from the penis.

Phallorrhagia (*fal-or-a'-je-ah*) [φαλλός, penis; ῥηγνύναι, to burst forth]. Hemorrhage from the penis.

Phallorrhea (*fal-or-e'-ah*) [φαλλός, phallus; ῥοία, flow]. Blennorrhea; a flow of purulent matter from the male urethra.

Phallus (*fal'-us*) [φαλλός, penis]. Penis.

Phanakistoscope (*fan-ak-is'-to-skōp*). See *Zoetrope.*

Phanerobiotic (*fan-er-o-bi-ot'-ik*) [φανερός, visible; βίος, life]. Presenting evidences of life.

Phanerocodonic (*fan-er-o-ko-don'-ik*) [φανερός, visible; κώδων, a bell]. In biology, bell-shaped, campanulate; applied to the gonophores or medusiform buds of hydroid polyps.

Phanerogam (*fan'-er-o-gam*) [φανερός, visible; γάμος, marriage]. In biology, a plant bearing true flowers.

Phanerogamia (*fan-er-o-ga'-me-ah*) [φανερός, apparent; γάμος, marriage]. A division of the vegetable kingdom comprising all vascular plants, whether flowering or not, with exposed sexual organs. It is subdivided into two classes, endogenous and exogenous. See *Cryptogamia.*

Phanerogamic (*fan-er-o-gam'-ik*) [φανερός, visible; γάμος, marriage]. In biology, flowering.

Phanerogamous (*fan-er-og'-am-us*) [φανερός, visible; γάμος, marriage]. Pertaining to the phanerogams.

Phanerogenetic (*fan-er-o-jen-et'-ik*). Same as *Phanerogamous.*

Phanerogenous (*fan-er-oj'-en-us*) [φανερός, visible; γενής, producing]. Visibly producing. **P. Tissue,** special material forming the pulp of the teeth.

Phaneroscope (*fan'-er-o-skōp*) [φανερός, visible; σκοπεῖν, to see]. An instrument devised by Liebreich to render a small patch of skin very translucent and thus to test the color of the blood, condition of anemia, etc.

Phaneroscopy (*fan-er-os'-ko-pe*) [φανερός, visible; σκοπεῖν, to see]. The use of the phaneroscope.

Phanerozöous (*fan-er-o-zo'-us*). Synonym of *Phanerobiotic.*

Phantasia (*fan-ta'-ze-ah*) [φαντασία, a showing]. An imaginary appearance.

Phantasm (*fan'-tazm*) [φαντάζειν, to render visible]. An illusive perception of an object that does not exist. A vision or apparition.

Phantasmagoria (*fan-taz-mag-o'-re-ah*) [φάντασμα, phantasm; ἀγορά, assembly]. A series or succession of fantastic and illusory mental pictures.

Phantasmatomoria (*fan-taz-mat-o-mo'-re-ah*) [φάντασμα, phantasm; μωρία, folly]. Childishness, or dementia, with absurd fancies.

Phantasmogenesis (*fan-taz-mo-jen'-es-is*) [φάντασμα, phantasm; γένεσις, genesis]. The origination of phantasms or spectral illusions.

Phantasmologic (*fan-taz-mo-loj'-ik*) [φάντασμα, phantasm; λόγος, science]. Pertaining to phantasmology.

Phantasmology (*fan-taz-mol'-o-je*) [φάντασμα, phantasm; λόγος, science]. The science of phantasms.

Phantasmophrenosis (*fan-taz-mo-fren-o'-sis*) [φάντασμα, phantasm; φρένωσις, thought]. The presence of dreamy fancies in the waking state.

Phantasmoscopia (*fan-taz-mo-sko'-pe-ah*) [φάντασμα, phantasm; σκοπεῖν, to see]. The seeing of phantasms, in insanity or delirium.

Phantasmoscopy (*fan-taz-mos'-ko-pe*). Synonym of *Phantasmoscopia.*

Phantom (*fan'-tum*) [φαντάζειν, to make visible]. An apparition. A model, manikin or effigy upon or by which to illustrate bandaging, surgical, obstetric, and other operations. **P. Aneurysm,** *Mimic Aneurysm;* a pulsating tumor simulating subclavian or axillary aneurysm, occasionally met with under the lateral half of the left clavicle. It is associated with thrill, murmur, and dilated veins above, but is apt to disappear suddenly, and return after excitement and after movement of the arms. It is thought to be due to temporary dilatation of the artery from vaso-motor paralysis. **P. Brain,** a cork and wire model of the brain devised by Aeby. **P. Cell,** a "shadow," or skeletonized blood-cell. **P. Child,** a doll used to illustrate the phenomena of labor. **P. Face or Head,** a metal effigy of a face, with eye-sockets devised to hold animal eyes, wherewith to practice operations in ophthalmic surgery. **P. Stricture,** erroneous subjective symptoms of the patient who believes he has rectal stricture. **P. Tumor,** an apparent tumor, usually of the abdomen though occurring elsewhere, which vanishes spontaneously, and which usually consists of a partially and spasmodically contracted muscle. Accumulations of gas and a thickened omentum have simulated ovarian tumor.

Pharaoh's Serpents. Mercury thiocyanate enveloped in a cone of tinfoil and burnt; it is used as a toy. The fumes are said to be poisonous.

Pharmacal (*far'-mak-al*) [φάρμακον, a drug]. Pertaining to pharmacy.

Pharmaceutic (*far-mas-u'-tik*) [φαρμακεύειν, to administer a drug]. Pertaining to pharmacy.

Pharmaceutics (*far-mas-u'-tiks*) [φαρμακεύειν, to administer a drug]. Pharmacy.

Pharmaceutist (*far-mas-u'-tist*). Synonym of *Pharmacist.*

Pharmacic (*far'-mas-ik*) [φάρμακον, drug]. Pharmaceutic; poisonous.

Pharmacist (*far'-mas-ist*) [φάρμακον, a drug]. An apothecary.

Pharmacocatagraphology (*far-mak-o-kat-ag-raf-ol'-o-je*) [φάρμακον, drug; κατά, according to; γράφειν, to write; λόγος, science]. The art of prescription-writing.

Pharmacochymia (*far-mak-o-ki'-me-ah*) [φάρμακον, drug; χημεία, chemistry]. Pharmaceutic chemistry.

Pharmacocollocyst (*far-mak-o-kol'-o-sist*) [φάρμακον, drug, κόλλα, glue; κύστις, bladder]. A gelatinous capsule for receiving medicines.

Pharmacodynamic (*far-mak-o-di-nam'-ik*) [φάρμακον, drug; δύναμις, force]. Pertaining to pharmacodynamics.

Pharmacodynamics (*far-mak-o-di-nam'-iks*) [φάρμακον, drug; δύναμις, force]. The science of the powers and effects of medicines.

Pharmacognosia, Pharmacognosis (*far-ma-kog-no'-ze-ah, far-ma-kog'-no-sis*). See *Pharmacognosy.*

Pharmacognostics (*far-mak-og-nos'-tiks*). Synonym of *Pharmacognosy.*

Pharmacognosy (*far-mak-og'-no-ze*) [φάρμακον, medicine; γνῶσις, knowledge]. The science or sum of knowledge of drugs.

Pharmacography (*far-mak-og'-ra-fe*). Synonym of *Pharmacognosy.*

Pharmacokoniantron (*far-mak-o-kon-e-an'-tron*) [φάρμακον, drug; κονία, powder; ἄντρον, hole]. An instrument used for spraying the Eustachian tube and middle ear.

Pharmacologic (*far-mak-o-loj'-ik*) [φάρμακον, drug; λόγος, science]. Pertaining to pharmacology.

Pharmacologist (*far-mak-ol'-o-jist*) [φάρμακον, drug; λόγος, science]. One versed in pharmacology.

Pharmacology (*far-mak-ol'-o-je*) [φάρμακον, drug; λόγος, science]. The science of the nature and properties of substances used as medicines; pharmacy and pharmacodynamics.

Pharmacomania (*far-mak-o-ma'-ne-ah*) [φάρμακον, drug; μανία, madness]. A morbid craving for medicines.

Pharmacomaniac (*far-mak-o-ma'-ne-ak*) [φάρμακον, drug; μανία, mania]. One excessively fond of the use of drugs.

Pharmacomathy (*far-mak-om'-ath-e*) [φάρμακον, drug; μάθη, learning]. Pharmacognostics.

Pharmacometry (*far-mak-om'-et-re*) [φάρμακον, drug; μέτρον, measure]. The measuring and weighing of drugs.

Pharmacomorphic (*far-mak-o-morf'-ik*) [φάρμακον, drug; μορφή, form]. Pertaining to the form in which medicines are prepared.

Pharmacon (*far'-mak-on*) [φάρμακον, drug]. A drug; a poison.

Pharmacopeia (*far-mak-o-pe'-ah*) [φάρμακον, drug, medicine; ποιεῖν, to make.] A standard code containing a selection of medicinal substances, preparations and formulas. The United States (1890), and the British (1885), are among the most comprehensive published. All except the United States pharmacopeia have been issued under government authority.

Pharmacopeial (*far-mak-o-pe'-al*) [φάρμακον, drug; ποιεῖν, make]. Pertaining to the pharmacopeia.

Pharmacopolist (*far-mak-op'-o-list*) [φάρμακον, medicine; πωλεῖν, to sell]. A dealer in medicines.

Pharmacopolium (*far-mak-o-po'-le-um*) [φάρμακον, drug; πωλεῖν, to sell]. A drug-store.

Pharmacoposia (*far-mak-o-po'-ze-ah*) [φάρμακον, drug; πόσις, a drinking]. Drinking of medicine.

Pharmacotheca (*far-mak-o-the'-kah*) [φάρμακον, drug; θήκη, case]. A medicine-chest.

Pharmacotherapeutic (*far-mak-o-ther-ap-u'-tik*) [φάρμακον, drug; θεραπεία, treatment]. Pertaining to treatment with drugs.

Pharmacotherapia (*far-mak-o-ther-a'-pe-ah*) [φάρμακον, drug; θεραπεία, therapy]. Pharmaceutic therapeutics.

Pharmacum (*far'-mak-um*). Same as *Pharmacon.*

Pharmacurgus (*far-mak-ur'-gus*) [φάρμακον, drug; ἔργειν, to work]. A pharmacist; also a physician who relies entirely on drugs in the treatment of disease.

Pharmacy (*far'-mas-e*) [φαρμακεία, the use of drugs]. 1. The art or practice of preparing, compounding, and dispensing medicines. 2. The occupation of a pharmacist. 3. A drug-store; an apothecary's shop.

Pharus (*far'-us*). Synonym of *Pharynx.*

Pharyngalgia (*far-in-gal'-je-ah*) [φάρυγξ, pharynx; ἄλγος, pain]. Pain in the pharynx.

Pharyngeal (*far-in'-je-al*) [φάρυγξ, pharynx]. Pertaining to the pharynx. **P. Aponeurosis,** the connective tissue layer of the pharynx, under the mucous surface. **P. Arches,** the post-oral arches, *q. v.* **P. Arteries,** two in number; the superior and the inferior. See *Arteries, Table of.* **P. Bones,** in biology, the bones behind the last branchial arch in fishes. **P. Bursa,** a small sac situated in the dorsal wall of the naso-pharynx. **P. Cavity,** the space within the pharyngeal walls. **P. Choke,** in farriery, lodgment of a foreign body in the upper portion of the esophagus of a horse, attended with symptoms of great distress. **P. Clefts.** Same as *P. Slit.* **P. Fascia,** the fascia covering the walls of the pharnyx. **P. Ganglion.** See *Ganglia, Table of.* **P. Glands.** See *Gland.* **P. Jaws,** jaw-like organs in the pharynx, as in certain worms. **P. Nerve,** a branch of the vagus. See *Nerves, Table of.* **P. Plexus.** See *Plexuses, Table of.* **P. Reflex.** See *Reflexes, Table of.* **P. Sac,** a sac in the head of a butterfly, at the base of the spiral tongue. By its alternate contraction and expansion the insect is able to suck up the nectar. **P. Slits,** the post-oral visceral clefts or gill-slits of vertebrates and chordate animals. They are also called *Visceral Clefts.* **P. Spine.** Same as *P. Tubercle.* **P. Teeth,** the teeth on the pharyngeal bones. **P. Tonsil.** See *Luschka's Tonsil.* **P. Tubercle,** a small elevation near the middle of the under surface of the basilar process of the occipital bone. The fibrous raphé of the pharynx is attached to it. **P. Vault.** See *Naso-pharynx.* **P. Veins,** branches of the pharyngeal plexus of veins, emptying into the internal jugular vein. **P. Voice,** the falsetto voice.

Pharyngectomy (*far-in-gek'-to-me*) [φάρυγξ, pharynx; ἐκτομή, excision]. Excision of a part of the pharynx.

Pharyngemphraxis (*far-in-gem-fraks'-is*) [φάρυγξ, pharynx; ἐμφραξις, obstruction]. Obstruction of the pharynx.

Pharyngeurisma (*far-in-gu-riz'-mah*). Synonym of *Pharyngocele.*

Pharyngeus (*far-in-je'-us*). See *Petro-pharyngeus,* etc., under *Muscles, Table of.*

Pharyngismus (*far-in-jiz'-mus*) [φάρυγξ, pharynx] Spasm of the pharynx.

Pharyngitic (*far-in-jit'-ik*) [φάρυγξ, pharynx; ιτις,

inflammation]. Pertaining to, affected with, or of the nature of, pharyngitis.

Pharyngitis (*far-in-ji'-tis*) [φάρυγξ, pharynx; ιτις, inflammation]. Inflammation of the pharynx. It may be *acute* or *chronic*. In the former there is a frequent desire to swallow, with pain and the sensation of a foreign body in the throat. Malaise, stiffness of the neck, anorexia, fever, and fulness of the head are other symptoms. The *chronic* form is not so severe as the acute, but there is a more annoying accumulation of viscid mucus, with frequent hawking. **P., Apostematous,** inflammation of the pharynx attended with the formation of an abscess. **P., Atrophic,** a form in which there is atrophy of the mucous membrane. **P., Catarrhal,** inflammation of the pharynx, accompanied by abundant secretion. **P., Diphtheric,** pharyngitis, due to the *Klebs-Loeffler Bacillus*. **P., Follicular,** inflammation of the mucous glands of the pharynx. **P., Gangrenous,** a form of inflammation of the mucous membrane of the pharynx, tonsils, and palatine folds, ending in the formation of gangrenous patches. Fatal hemorrhage may result from erosion of blood-vessels. It is also called *Putrid Sore-throat*. **P., Granular,** *Clergymens' Sore-throat*, a chronic form of pharyngitis, characterized by granular bodies on the mucous membrane of the pharynx. It is common among public speakers, and is due to improper use of the voice. **P., Hypertrophic,** chronic pharyngitis, with overgrowth, local or general, of the mucous membrane. **P. maligna.** Synonym of *P., Gangrenous*. **P., Membranous,** pharyngitis characterized by the formation of false membrane; it is generally due to the diphtheria-bacillus. **P., Phlegmonous,** acute infectious phlegmon of the pharynx. A serious form of inflammation of the pharyngeal tissues, with grave constitutional symptoms, the inflammation rapidly passing on to suppuration. **P. sicca,** chronic pharyngitis, with a dry and glistening state of the mucous membrane, and, generally, with enlargement of the lymph-follicles. **P., Ulcerative,** a form that may be a simple ulceration of the follicles; or it may be syphilitic, tuberculous, diphtheric, or carcinomatous; or it may be due to such infectious diseases as typhoid fever, or to extension of lupus.

Pharyngo- (*far-in'-go-*) [φάρυγξ, pharynx]. A prefix signifying connection with or relation to the pharynx.

Pharyngocace (*far-in-gok'-as-e*). Synonym of *Pharyngitis, Gangrenous*.

Pharyngocele (*far-in'-go-sēl*) [φάρυγξ, pharynx; κήλη, tumor]. A tumor or pouch of the pharynx.

Pharyngocenterium (*far-in-go-sen-te'-re-um*) [φάρυγξ, pharynx; κεντήριον, a pricker]. A trocar for puncturing the pharynx.

Pharyngocephale (*far-in-go-sef'-al-e*). A synonym of *Pharynx*.

Pharyngo-cynanche (*far-in-go-sin-an'-ke*) [φάρυγξ, pharynx; κυνάγχη, cynanche]. Angina of the pharynx.

Pharyngodynia (*far-in-go din'-e-ah*) [φάρυγξ, pharynx; ὀδύνη, pain]. Pain referred to the pharynx.

Pharyngo-epiglottic (*far-in'-go-ep-ig-lot'-ik*) [φάρυγξ, pharynx; ἐπιγλωττίς, epiglottis]. Pertaining to the pharynx and the epiglottis.

Pharyngo-epiglotticus (*far-in'-go-ep-ig-lot'-ik-us*) [φάρυγξ, pharynx; ἐπιγλωττις, epiglottis]. Muscular fibers derived from the stylo-pharyngeus and inserted into the side of the epiglottis and the pharyngo-epiglottic ligament.

Pharyngo-esophageal (*far-in'-go-e-sof-aj'-e-al*) [φάρυγξ, pharynx; οἰσοφάγος, gullet]. Pertaining to the pharynx and esophagus.

Pharyngo-esophagus (*far-in'-go-e-sof'-ag-us*) [φάρυγξ, pharynx; οἰσοφάγος, esophagus]. The pharynx and esophagus considered as one organ.

Pharyngo-glossal (*far-in'-go-glos'-al*) [φάρυγξ, pharynx; γλῶσσα, tongue]. Pertaining conjointly to the pharynx and the tongue.

Pharyngo-glossus (*far-in'-go-glos'-us*) [φάρυγξ, pharynx; γλῶσσα, tongue]. A muscle of lower animals corresponding to the palato-glossus of man.

Pharyngographic (*far-in-go-graf'-ik*) [φάρυγξ, pharynx; γράφειν, to write]. Pertaining to pharyngography.

Pharyngography (*far-in-gog'-ra-fe*) [φάρυγξ, pharynx; γράφειν, to write]. A description of the pharynx.

Pharyngo-laryngeal (*far-in'-go-lar-in'-je-al*) [φάρυγξ, pharynx; λάρυγξ, larynx]. Pertaining both to the pharynx and the larynx. **P. Cavity,** the lowest portion of the pharynx. **P. Sinus,** the pyriform sinus.

Pharyngo-laryngitis (*far-in'-go-lar-in-ji'-tis*) [φάρυγξ, pharynx; λάρυγξ, larynx; ιτις, inflammation]. Inflammation of both larynx and pharynx at the same time.

Pharyngolith (*far-in'-go-lith*) [φάρυγξ, pharynx; λίθος, stone]. A calcareous concretion in the walls of the pharynx.

Pharyngologic (*far-in-go-loj'-ik*) [φάρυγξ, pharynx; λόγος, science]. Pertaining to pharyngology.

Pharyngology (*far-in-gol'-o-je*) [φάρυγξ, pharynx; λόγος, science]. The science of the pharyngeal mechanism, functions and diseases.

Pharyngolysis (*far-in-gol'-is-is*) [φάρυγξ, pharynx; λύσις, a loosing]. Paralysis of the pharyngeal muscles.

Pharyngomycosis (*far-in'-go-mi-ko'-sis*) [φάρυγξ, pharynx; μύκης, fungus]. Fungous growths in the pharynx. **P. leptothricia.** See *Mycosis tonsillaris benigna*.

Pharyngo-nasal (*far-in'-go-na'-sal*) [φάρυγξ, pharynx; *nasus*, nose]. Pertaining to the pharynx and the nose. **P. Cavity,** the upper portion of the pharynx; the naso-pharynx.

Pharyngo-oral (*far-in'-go-o'-ral*) [φάρυγξ, pharynx; *os, oris*, mouth]. Oropharyngeal; pertaining to both pharynx and mouth. **P. Cavity,** the oropharynx; the middle portion of the pharynx, communicating with the mouth.

Pharyngopalatinus (*far-in'-go-pal-at-i'-nus*). Synonym of *Palatopharyngeus*. See *Muscles, Table of*.

Pharyngopathy (*far-in-gop'-ath-e*) [φάρυγξ, pharynx; πάθος, disease]. Any disease of the pharynx.

Pharyngoperistole (*far-in'-go-per-is'-to-le*). Synonym of *Pharyngostenia*.

Pharyngoplegia (*far-in'-go-ple'-je-ah*) [φάρυγξ, pharnyx; πληγή, a stroke]. Paralysis of the muscles of the pharynx.

Pharyngoplethora (*far-in'-go-pleth'-or-ah*) [φάρυγξ, pharynx; πληθώρη, fulness]. Fulness of the vessels of the pharynx.

Pharyngorhinitis (*far-in'-go-ri-ni'-tis*) [φάρυγξ, pharynx; ῥίς, nose; ιτις, inflammation]. Pharyngitis with rhinitis; inflammation of the pharynx and the nose.

Pharyngorhinoscopy (*far-in'-go-ri-nos'-ko-pe*). Synonym of *Rhinoscopy, Posterior*.

Pharyngorrhagia (*far-in-gor-a'-je-ah*) [φάρυγξ, pharynx; ῥηγνύναι, to burst forth]. Hemorrhage from the pharynx.

Pharyngorrhea (*far-in-gor-e'-ah*) [φάρυγξ, pharynx; ῥοία, a flow]. A mucous discharge from the pharynx.

Pharyngoscope (*far-in'-go-skōp*) [φάρυγξ, pharynx; σκοπεῖν, to inspect]. An instrument for use in the visual examination of the pharynx.

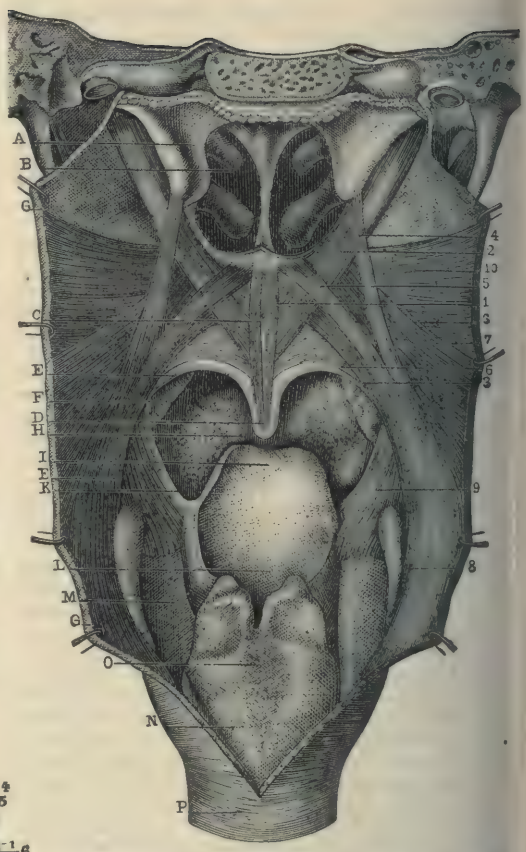
Pharyngoscopy (*far-in-gos'-ko-pe*) [φάρυγξ, pharynx; σκοπεῖν, to examine]. Examination of the pharynx.

Pharyngospasm (*far-in'-go-spazm*) [φάρυγξ, pharynx;

σπασμός, spasm]. Spasmodic contraction of the pharyngeal muscles.

Pharyngostaphyleus, Pharyngostaphylinus (*far-in'-go-staf-il-e'-us, far-in'-go-staf-il-i'-nus*). Synonym of *Palatopharyngeus*. See *Muscles, Table of.*

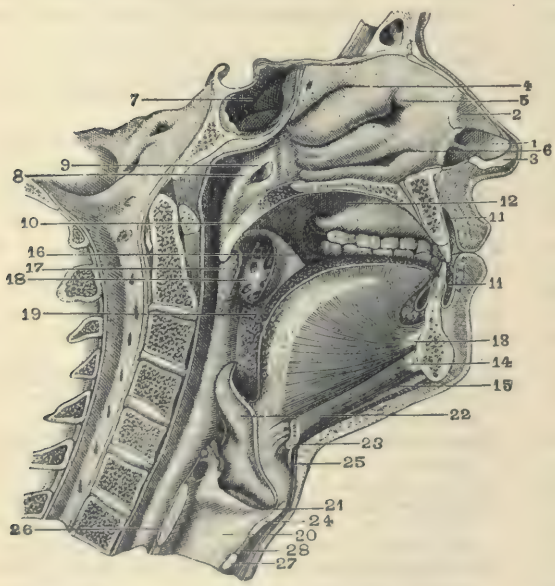
Pharyngostenia (*far-in-go-ste'-ne-ah*) [φάρυγξ, pharynx; στενός, narrow]. Narrowing or stricture of the pharynx.



Pharyngotome (*far-in'-go-tōm*) [φάρυγξ, pharynx; τομή, a cutting]. A cutting-instrument used for incising the pharynx.

Pharyngotomy (*far-in-got'-o-me*) [φάρυγξ, pharynx; τομή, a cutting]. Incision into the pharynx. **P., Inferior,** a form in which the tissues between the hyoid bone and the cricoid cartilage are divided. **P., Lateral,** incision into one side of the pharynx. **P., Subhyoidean,** pharyngotomy through the thyro-hyoid membrane. **P., Superior,** pharyngotomy in which the incision is made between the anterior border of the sterno-cleido-mastoid muscle and the trachea.

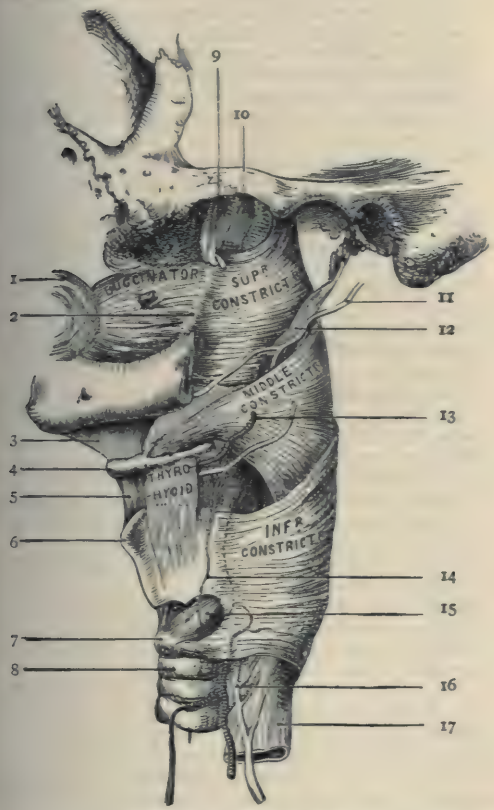
Pharyngotonsillitis (*far-in'-go-ton-sil-i'-tis*) [φάρυγξ, pharynx; *tonsilla*, tonsil; ιτις, inflammation]. Inflammation of the pharynx and the tonsil.



Pharyngotyphus (*far-in'-go-ti'-fus*) [φάρυγξ, pharynx; τύφος, stupor]. Whitish elevations on the tonsils which tend to ulcerate, seen sometimes in typhoid fever and probably due to localization of the typhoid poison in the tonsils.

Pharynx (*far'-inks*) [φάρυγξ, throat]. The musculomembranous pouch situated back of the nasal cavities, mouth, and larynx, extending from the base of the skull to a point opposite the sixth cervical vertebra, where it becomes continuous with the esophagus. It is about five inches long and is narrowed at its termination. It has four coats—an external fascia; a muscular layer, consisting of the three constrictors, together with the stylo-pharyngeal and palato-pharyngeal muscles; a fibrous connective-tissue layer; and a mucous membrane extending to the base of the uvula, that is covered in its upper part with columnar ciliated epithelium, in its lower part with stratified epithelium. Mucous glands and lymphatic follicles are abundant in the mucous membrane. A group of follicles extends across the

PHARYNX, OPENED POSTERIORLY, SHOWING LARYNX, TONGUE, AND SOFT PALATE.



A. Cartilaginous expansion of the Eustachian tube. B. Posterior nasal openings. C. Soft palate. D. Uvula. E. Posterior pillar of the palate. F. Tonsil. G, G. Pharynx, opened in median line. H. Base of the tongue. I. Epiglottis. K. Left glosso-epiglottidean fold. L. Superior opening of the larynx. M. Thyroid cartilage. N. Posterior surface of the larynx. O. Group of grape-like glands constantly found in this position. P. Upper extremity of the esophagus. 1. Azygos uvulæ muscle. 2. Levator palati muscle. 3, 3. Palato-pharyngeus muscle. 4. Salpingo-pharyngeus muscle. 5. Internal portion of the palato-pharyngeus muscle. 6. Fibers proceeding from the middle of the palate and ending in the palato-pharyngeus muscle. 7. Superior fibers of the palato-pharyngeus muscle, going to interlace on the lateral and posterior surface of the pharynx with those of the opposite side. 8. Inferior fibers of the palato-pharyngeus muscle, being inserted into the posterior margin of the thyroid cartilage near the base of the superior cornu and pharyngeal aponeurosis. 9. Anterior fibers of the stylo-pharyngeus muscle, attached, 1st, to the lateral side of the epiglottis; 2d, to the superior cornu of the thyroid cartilage at the base and superior margin. 10. Superior constrictor of the pharynx.

MEDIAN SECTION OF MOUTH, PHARYNX AND LARYNX.

1. Left nostril. 2. Upper lateral cartilage. 3. Inner portion of lower cartilage. 4. Superior turbinated bone and meatus. 5. Middle turbinated bone and meatus. 6. Inferior turbinated bone and meatus. 7. Sphenoid sinus. 8 Posterior nasal fossa. 9. Internal orifice or pavilion of Eustachian tube. 10. Velum palati. 11, 11. Vestibule of mouth. 12. Palatine vault. 13. Genio-glossus muscle. 14. Genio-hyoid. 15. Mylo-hyoid. 16. Anterior pillar of velum palati. 17. Posterior pillar. 18. Tonsil. 19. Circumvallate papillæ of tongue. 20. Cavity of larynx. 21. Ventricle. 22. Epiglottis. 23. Hyoid bone. 24. Thyroid cartilage. 25. Thyro-hyoid membrane. 26. Posterior portion of cricoid cartilage. 27. Anterior portion. 28. Crico-thyroid membrane.

back of the pharynx between the orifices of the Eustachian tubes.

MUSCLES OF THE PHARYNX.

1. Orbicularis oris. 2. Pterygo-maxillary ligament. 3. Mylo-hyoideus. 4. Os hyoides. 5. Thyro-hyoid ligament. 6. Pomum Adami. 7. Cricoid cartilage. 8. Trachea. 9. Tensor palati. 10. Levator palati. 11. Glosso-pharyngeal nerve. 12. Stylo-pharyngeus. 13. Superior laryngeal nerve and artery. 14. External laryngeal nerve. 15. Crico-thyroideus. 16. Inferior laryngeal nerve. 17. Esophagus.

Phase (*fāz*) [*φάσις*, appearance]. The condition or stage of a disease or physiologic function at a given time.

Phaseomannite (*fa-ze-o-man'-it*). See *Inosite*.

Phasura (*fa-zu'-rah*). Synonym of *Phantasm*.

Phatne (*fat'-ne*) [*φάτνη*, socket]. Same as *Alveolus*.

Phatnorrhagia (*fat-nor-a'-je-ah*) [*φάτνη*, socket; *ῥηγνύναι*, to burst forth]. Hemorrhage from a tooth-socket.

Phausinx (*faw'-singks*) [*φαίζειν*, to roast]. A bleb or blister.

Pheduretin (*fe-du-re'-tin*) [*phenol* (*φοῖνιξ*, purple-red); *διά*, through; *οὐρέειν*, to make water]. A phenol-derivative, occurring in fine, white, silky, acicular crystals, tasteless, hardly soluble in cold water, readily soluble in hot water. It is said to be a powerful diuretic. Dose gr. vij–xv. Unof.

Phelloderm (*fel'-o-derm*) [*φελλός*, cork; *δέρμα*, skin]. In biology, a layer of green cells beneath the cork of certain stems (*Ribes*, *Lonicera*, *Spiræa*, *Deutzia*, etc.). It is formed from the ental layer of the phellogen.

Phellogen (*fel'-o-jen*) [*φελλός*, cork; *γενής*, producing]. In biology, cork-forming tissue; cork-cambium, cork-meristem; the ental layers of cork-tissue, possessing cellular activity.

Phellogenetic (*fel-o-jen-et'-ik*) [*φελλός*, cork; *γενής*, producing]. In biology, relating to the formation of phellogen.

Phenacetein, see *Phenacetolin*.

Phenacetin (*fe-nas'-et-in*) [*phenol* (*φοῖνιξ*, purple-red); *acetum*, vinegar], $C_{10}H_{13}NO_2$. *Acetphenetidin;* a compound derived from carbolic acid, having antipyretic and antineuralgic properties. It is crystalline, tasteless, and almost insoluble in water. Dose gr. iv–xxx. Unof.

Phenacetolin (*fe-nas'-et-o-lin*), $C_{16}H_{12}O_2$. A somewhat irregularly formed name of a compound produced by the interaction of phenol, acetic acid, and zinc chlorid. It is used as an indicator in determining acidity and alkalinity. It is also called phenacetein.

Phenanthrene (*fe-nan'-thrēn*) [*phenol* (*φοῖνιξ*, purple-red); *ἄνθραξ*, coal], $C_{14}H_{10}$. A hydrocarbon isomeric with anthracene, and found with it in the last fraction of coal-tar. It crystallizes in colorless, shining plates, melting at 100° C. and boiling at 340° C.; it is insoluble in water, but soluble in fifty parts of alcohol in the cold, and in ten parts on boiling; it is easily soluble in ether and benzene. **P.-red.** See *Pigments, Conspectus of*.

Phenate (*fe'-nāt*) [*phenol* (*φοῖνιξ*, purple-red)]. Any salt-like compound of carbolic acid; a carbolate.

Phenazin (*fe'-naz-in*) [*phenol* (*φοῖνιξ*, purple-red)], $C_{12}H_8N_2$. A substance prepared by conducting anilin vapors through a tube heated to redness. It crystallizes and sublimes in bright-yellow needles, melting at 171° C. The *phenazins* are chromogenic parent-substances that yield dyes by the entrance of salt-forming groups (especially the amido-group). The eurhodins and safranins are included in this series.

Phenazonum (*fe-naz-o'-num*). See *Antipyrin*.

Phenetidin (*fe-net'-id-in*) [*phenol* (*φοῖνιξ*, purple-red)], $C_8H_{11}NO$. The body from which phenacetin is prepared by substitution.

Phenetol (*fe'-net-ol*) [*phenol* (*φοῖνιξ*, purple-red); *oleum*, oil], $C_2H_5S.OC_6H_5$. A volatile aromatic-smelling liquid. **P.-red.** See *Coccinin* and *Pigments, Conspectus of*.

Phengophobia (*fen-go-fo'-be-ah*) [*φέγγος*, light; *φόβος*, fear]. See *Photophobia*.

Phenic (*fe'-nik*) [*phenol* (*φοῖνιξ*, purple-red)]. Obtained from coal-tar. **P. Acid.** See *Acid, Carbolic*, and *Phenol*.

Phenicin (*fe'-nis-in*) [*φοῖνιξ*, purple-red]. A brown coloring-matter produced by the action of nitro-sulphuric acid on carbolic acid. Same as *Phenyl-brown*. See *Pigments, Conspectus of*.

Phenicious (*fe-nish'-us*) [*φοῖνιξ*, purple-red]. Of the color of phenicin.

Phenigmus (*fe-nig'-mus*) [*φοίνιξ*, purple-red]. *Red Jaundice;* a skin-disease, characterized by diffuse redness, without fever.

Phenixis, Phœnixis (*fe-niks'-is*) [*φοῖνιξ*, purple-red] Red color of the skin from irritation.

Phenocoll (*fe'-no-kol*) [*phenol* (*φοῖνιξ*, purple-red)]. $C_6H_4{<}^{OC_2H_5}_{NH.OC}{>}(NH_2)CH_2$. $C_{10}H_{14}N_2O_2$. The hydrochlorate of phenol-glycocoll, a rapid and powerful antipyretic and a valuable nervine. Dose gr. viij–xv, repeated at hourly intervals. It is also used as the hydrochlorid. Phenocoll appears as a white crystalline powder soluble in water and alcohol. Unof.

Phenogamous (*fen-og'-am-us*). Synonym of *Phanerogamous*.

Phenol (*fe'-nol*) [*φοῖνιξ*, purple-red], $C_6H_5.OH$. *Benzene Phenol, Carbolic Acid, Creasote;* a substance obtained from amidobenzene, etc., and occurring already formed in *Castoreum* and in the urine of herbivora. It is a colorless, crystalline mass, which gradually

acquires a reddish color, and deliquesces on exposure to the air. It melts at 42° C. and boils at 183° C.; its sp. gr. at 0° is 1.084. It possesses a characteristic odor, burning taste, and poisonous and antiseptic properties. It is slowly soluble in water, readily so in alcohol and ether. In a general sense the word is applied to the homologous series of which phenol or carbolic acid is the first member. The *phenols* are compounds formed from benzene and its homologues by the substitution of hydroxyl for hydrogen in the benzene nucleus. They correspond to tertiary alcohols, as they contain the group COH, and all have weak acid properties. They may be *monatomic*, such as ordinary phenol, cresol, etc.; *diatomic*, as pyrocatechin, resorcin, hydroquinone; or *triatomic*, as pyrogallol, phorglucol. **P.-blue,** $C_{14}H_{14}N_2O$, a paste-like substance of blue color. See *Pigments, Conspectus of.* **P.-camphor,** camphor combined with carbolic acid. **P. Colors.** See *Pigments, Conspectus of.* **P. Sodique,** an antiseptic substance said to be composed of carbolic acid, gr. 188; caustic soda, gr. 31; distilled water, ℥iv.

Phenolate (*fe'-no-lāt*) [*phenol* (φοῖνιξ, purple-red)]. A salt of carbolic acid.

Phenologic (*fe-no-loj'-ik*) [φαίνειν, to bring to light; λόγος, science]. Pertaining to phenology.

Phenologist (*fe-nol'-o-jist*) [φαίνειν, to bring to light; λόγος, science]. One versed in phenology.

Phenology (*fe-nol'-o-je*) [φαίνειν, to bring to light; λόγος, science]. In biology, the science of the behavior of plants and animals to the periodic changes in meteorologic conditions.

Phenolphthalein (*fe-nol-tha'-le-in*) [φοῖνιξ, purple-red]. A substance derived from phenol and phthalic acid and used as a delicate test for acids and alkalies. One gram is dissolved in one liter of 50 per cent. alcohol. It is very delicate.

Phenolsulphonic Acid (*fe-nol-sul-fon'-ik*) [*phenol* (φοῖνιξ, purple-red); *sulphur*]. The "phenol-forming substance" found sometimes in urine from which phenol is obtained.

Phenolsulphuric Acid (*fe-nol-sul-fu'-rik*) [*phenol* (φοῖνιξ, purple-red); *sulphur*]. An acid that exists in the urine in very small amount.

Phenomena (*fe-nom'-en-ah*) [φαινόμενον, that which is seen]. Plural of *Phenomenon, q. v.* **Phenomena of Transfer.** Peculiar phenomena observed in hysterical patients. It has been found, in some cases, that the laying of a metal plate upon an anesthetic portion of the skin restores to this its sensibility, while simultaneously a corresponding area on the opposite side of the body, previously normal, becomes anesthetic. Frequently the sensibility oscillates from one side to the other. If the metal is placed first on an area possessing normal sensibility, this becomes anesthetic, while a corresponding zone on the anesthetic side regains its sensibility. Other hysterical symptoms may present these same transfer-phenomena. Nor is their production confined to metallic plates; other so-called esthesiogenic substances produce the same effect—thus, large magnets, weak galvanic currents, static electricity, vibrating tuning-forks, mustard-plasters, and others. As to the nature of the curious phenomena, it is generally believed that they are due to suggestion.

Phenomenal (*fe-nom'-en-al*) [φαινόμενον, that which is seen]. Pertaining to phenomena. Also extraordinary, startling, or exceptional to the ordinary course of events in nature.

Phenomenogenia (*fe-nom-en-o-je'-ne-ah*) [φαίνειν, to show; γίγνεσθαι, to be born]. The origin of phenomena.

Phenomenon (*fe-nom'-en-on*) [φαινόμενον, that which is seen; from φαίνειν, to shine: *pl. Phenomena*]. An event or manifestation, generally of an unusual character. **P., Cheyne-Stokes'.** Synonym of *Cheyne-Stokes' Respiration.* **P., Knee.** Synonym of *Patellar Tendon-reflex.* **P., Porret's,** a wave-like motion seen in a muscle through which a galvanic current passes in a longitudinal direction. **P., Westphal's.** Synonym of *Patellar Tendon-reflex.*

Phenomenoscopia (*fe-nom-en-o-sko'-pe-ah*) [φαίνειν, to show; σκοπεῖν, to examine]. The investigation of phenomena, especially of disease.

Phenone (*fe'-nōn*) [*phenol* (φοῖνιξ, purple-red)]. A ketone formed by the union of phenyl and a hydrocarbon of the marsh-gas series.

Phenophobia (*fe-no-fo'-be-ah*). Synonym of *Photophobia.*

Phenoquinone (*fe-no-kwin'-ōn*) [*phenol* (φοῖνιξ, purple-red); *quinone*], $C_{18}H_{14}O_4$. An oxidation-product of phenol.

Pheno-resorcin (*fe-no-res-or'-sin*) [*phenol* (φοῖνιξ, purple-red); *resorcin*]. A mixture containing carbolic acid 67, resorcin 33 per cent. Unof.

Phenosafranin (*fe-no-saf'-ran-in*) [*phenol* (φοῖνιξ, purple-red); Fr., *safran*, saffron], $C_{18}H_{15}N_4Cl$. The lowest member of the safranins, formed from phenylene, diamin, and anilin. It consists of needles, green in color and having a metallic luster. It dissolves in water and alcohol with a beautiful red color. See *Pigments, Conspectus of.*

Phenose (*fe'-nōz*) [*phenol* (φοῖνιξ, purple-red)], $C_6H_6(OH)_6$. A substance obtained by the action of a soda solution upon hexahydrobenzene. It is an amorphous, readily soluble substance, deliquescing in the air. It has a sweet taste, and reduces Fehling's solution, but is not capable of fermentation.

Phenozygous (*fe-noz'-ig-us*) [φαίνειν, to show; ζύγον, yoke]. In craniometry, "having the zygomatic arches visible directly from above; having the bizygomatic diameter greater than the maximum transverse frontal diameter, and the angle of Quatrefages positive."

Phenyl (*fe'-nil*) [φοῖνιξ, purple-red; ὕλη, matter], C_6H_5. A univalent organic radical. **P.-acetic Acid.** See *Acid.* **P.-amid,** a compound formed by the substitution of one or more amido-groups for the hydrogen of benzene; anilin is a phenylamid. **P.-amin.** Synonym of *Anilin.* **P.-auramin.** See *Pigments, Conspectus of.* **P. Bisulphate.** See *Acid, Sulphocarbolic.* **P.-brown.** See *Pigments, Conspectus of.* **P.-carbamate of Ethyl.** See *Phenylurethane.* **P.-endiamin** $C_6H_4(NH_2)_2$. Preferably *diamidobenzene;* a chemic substance of which there are three isomeric forms, distinguished by the prefixes *ortho-, meta-, para-.* **P.-ethylene.** See *Styrol.* **P.-glucosazone,** $C_{18}H_{22}N_4O_4$; a compound of dextrose with phenyl-hydrazin. It crystallizes in yellow needles, is almost insoluble in water, very slightly soluble in hot alcohol, melts at about 205° C., and is levo-rotatory when dissolved in glacial acetic acid. **P.-glycerol.** See *Stycerin.* **P.-glycuronic Acid,** a levo-rotatory, crystalline body occurring in the urine after the administration of carbolic acid. Dilute acid decomposes it into carbolic and glycuronic acids. **P.-hydrazin,** $C_6H_8N_2$, a substance obtained from benzene diazochlorid by reduction with sodium sulphite or stannous chlorid. It is a colorless, peculiar-smelling oil, solidifying, when cooled, to plate-like crystals, melting at 23° C.; sp. gr. 1.091 at 21° C. It boils at 241–242° C. It dissolves with great difficulty in cold water, but readily in alcohol and ether. **P.-h. Test** (for sugar). Into a test-tube put ½ in. dry phenyl-hydrazin hydrochlorate; add pulverized sodium acetate an equal volume; and fill one-half of the tube

with urine. Agitate until the sodium acetate is dissolved, gently heating up to the boiling-point and boil for 30 seconds. Examine the sediment with the microscope for yellow, branching, needle-shaped crystals of phenyl-glucosazone. See *Tests, Table of.* **P. Hydrid,** C_6H_6, benzene. **P.-lactosazone,** $C_{24}H_{32}N_4O_9$, a compound of lactose with phenyl-hydrazin; it is soluble in 80–90 parts of boiling water, and melts at about 200° C. It crystallizes readily in the form of yellow needles usually aggregated into clusters. **P.-maltosazone,** $C_{24}H_{32}N_4O_9$, a compound of maltose obtained by the action of phenyl-hydrazin upon it in the presence of acetic acids. It crystallizes readily in minute yellow needles, is soluble in about 75 parts of boiling water, and still more soluble in hot alcohol. Its melting-point is 206° C. **P.-mercaptan.** See *Thiophenol.* **P.-methane,** $(CH_2(C_6H_5)_2$, a crystalline hydrocarbon with the odor of oranges. It has the effects of antipyrin, in half the dose, being antirheumatic and analgesic, as well as antipyretic. Dose from 3 to 7 gr., in wine. **P.-propionic Acid,** $C_9H_6O_2$, a crystalline body which, when injected subcutaneously, causes albuminuria, glycosuria, vomiting, diarrhea, and sometimes death. If the sodium salt is given, large amounts of indican appear in the discharges. **P. Salicylate.** See *Salol.* **P.-urethane,** $C_9H_{11}NO_2$, a white, crystalline substance made by the action of chlorocarbonic acid on carbanilic ether. It is also known chemically as *phenylcarbamate of ethyl* and *euphorin.* It has the flavor of benzine, with an acrid after-taste; it is almost insoluble in cold water, but is soluble in boiling water, alcohol and ether; 1–500 hinders alcoholic fermentation. See *Euphorin.* **P.-violet.** Same as *Rosanilin-violet.*

Phenylene (*fe'-nil-ēn*) [φοῖνιξ, purple-red], C_6H_4. A bivalent organic radicle. **P.-blue.** See *Pigments, Conspectus of.* **P.-brown.** See *Pigments, Conspectus of.*

Phenylia (*fe-nil'-e-ah*). Same as *Anilin.*

Phenylic (*fe-nil'-ik*) [φοῖνιξ, purple-red]. Pertaining to phenyl. Same as *Phenic.* **P. Acid.** Synonym of *Carbolic Acid.* **P. Alcohol.** Synonym of *Carbolic Acid.*

Pheocyst (*fe'-o-sist*) [φαιός, dusky; κύστις, bladder]. Decaisne's term for the nucleus of a vegetable cell.

Pheomyelitis (*fe-o-mi-el-i'-tis*) [φαιός, gray; μυελός, marrow; ιτις, inflammation]. Inflammation of the gray matter of the spinal cord.

Phial (*fi'-al*) [φιάλη, a saucer]. A small glass bottle.

Phialine (*fi'-al-in*) [φιάλη, a saucer, or patera]. In biology, saucer-shaped.

Philanthrope (*fil'-an-thrōp*) [φιλάνθρωπος, humane]. A philanthropist.

Philanthropic (*fil-an-throp'-ik*) [φιλάνθρωπος, humane]. Pertaining to philanthropy; benevolent.

Philanthropism (*fil-an'-thro-pizm*). Same as *Philanthropy.*

Philanthropist (*fil-an'-thro-pist*) [φιλάνθρωπος, humane]. One who loves mankind.

Philanthropy (*fil-an'-thro-pe*) [φιλάνθρωπος, humane]. The love of mankind; benevolence; charity.

Philermum (*fil-ur'-mum*). Synonym of *Mercaptan.*

Philetron (*fi-le'-tron*). Synonym of *Philtrum.*

Philiater (*fil'-e-a-ter*) [φιλεῖν, to love; ἰατρός, physician]. An amateur student of medical science; a non-professional observer of disease-phenomena.

Phillips' Muscle. See *Muscles, Table of.*

Philœnia (*fil-e'-ne-ah*) [φιλεῖν, to love; οἶνος, wine]. Morbid addiction to strong drink.

Philogynist (*fil-oj'-in-ist*) [φιλεῖν, to love; γυνή, women]. A lover of women; the opposite of misogynist.

Philogyny (*fil-oj'-in-e*) [φιλεῖν, to love; γυνή, women]. Admiration for women; the opposite of misogyny.

Philomimesia (*fil-o-mi-me'-ze-ah*) [φιλεῖν, to love; μίμησις, imitation]. A morbid or insane love of mimicry.

Philomimetic (*fil-o-mi-met'-ik*) [φιλεῖν, to love; μίμησις, imitation]. Characterized by philomimesia.

Philoneism (*fil-o-ne'-izm*) [φιλέειν, to love; νέος, new]. Abnormal love of novelty; the reverse of misoneism.

Philopatridalgia (*fil-o-pa-trid-al'-je-ah*) [φιλεῖν, to love; πατρίς, fatherland; ἄλγος, pain]. Homesickness, or nostalgia.

Philopatridomania (*fil-o-pa-trid-o-ma'-ne-ah*) [φιλεῖν, to love; πατρίς, fatherland; μανία, madness]. An insane desire to return home; excessive nostalgia, or homesickness.

Philosopher (*fil-os'-o-fer*) [φιλεῖν, to love; σοφία, wisdom]. A metaphysician; one who is devoted to philosophy.

Philosophic (*fil-o-sof'-ik*) [φιλεῖν, to love; σοφία, wisdom]. Pertaining to philosophy.

Philosophy (*fil-os'-o-fe*) [φιλεῖν, to love; σοφία, wisdom]. The coördination of human knowledge. Science in its widest sense; also, any important branch of science. **P., Natural.** See *Physics.* **P., Positive,** Comteism, or the philosophy of Auguste Comte.

Philter, Philtre (*fil'-ter*) [φίλτρον, a love-charm]. A love-potion; a preparation supposed to be efficacious in exciting sexual passion.

Philtrum (*fil'-trum*) [φίλτρον, a love-charm]. The depression on the surface of the skin of the upper lip immediately below the septum of the nose. Also, the same as *Filter.*

Philydrous (*fil-i'-drus*) [φιλεῖν, to love; ὕδωρ, water]. In biology, living in or frequenting water.

Philypostrophous (*fil-ip-os'-tro-fus*) [φιλεῖν, to love; ὑπόστροφος, turning back]. Recurring, as of a disease.

Phimosientomy (*fi-mo-se-en'-to-me*) [φιμοῦν, to constrict; ἐντομή, incision]. Incision of a constricted prepuce.

Phimosis (*fi-mo'-sis*) [φιμοῦν, to constrict]. Elongation of the prepuce and constriction of the orifice, so that the foreskin cannot be retracted to uncover the glans penis. **P. oris,** narrowing of the opening of the mouth. **P. palpebrarum.** Synonym of *Blepharophimosis.* **P. vaginalis,** atresia of the vagina.

Phlasma (*flaz'-mah*) [φλάσμα, bruise]. Synonym of *Contusion.*

Phleb- (*fleb-*) [φλέψ, vein]. A prefix meaning vein.

Phlebangioma (*fleb-an-je-o'-mah*) [φλέψ, vein; ἀγγεῖον, vessel; ὄμα, tumor]. A venous aneurysm.

Phlebarteriectasia (*fleb-ar-te-re-ek-ta'-ze-ah*) [φλέψ, vein; ἀρτηρία, artery; ἔκτασις, dilatation]. Varicose aneurysm.

Phlebarteriodialysis (*fleb-ar-te-re-o-di-al'-is-is*) [φλέψ, vein; ἀρτηρία, artery; διάλυσις, separation]. Arteriovenous aneurysm.

Phlebectasia, Phlebectasis (*fleb-ek-ta'-ze-ah, fleb-ek'-tas-is*) [φλέψ, vein; ἔκτασις, dilatation]. Dilatation of a vein or veins. See *Varix.* **P. hæmorrhoidalis.** Synonym of *Hemorrhoid.*

Phlebectomy (*fleb-ek'-to-me*) [φλέψ, vein; ἐκτομή, excision]. Excision of a vein or portion of a vein.

Phlebectopia (*fleb-ek-to'-pe-ah*) [φλέψ, vein; ἐκ, out; τόπος, place]. The displacement or abnormal position of a vein.

Phlebemphraxis (*fleb-em-fraks'-is*) [φλέψ, vein; ἔμφραξις, obstruction]. Plugging of a vein.

Phlebepatitis (*fleb-ep-at-i'-tis*) [φλέψ, vein; ἧπαρ, liver; ιτις, inflammation]. Inflammation of the portal or hepatic veins.

Phlebeurisma (*fleb-u-riz'-mah*). Synonym of *Varix.*

Phlebic (*fleb'-ik*) [φλέψ, vein]. Venous.

Phlebin (*fleb'-in*) [φλέψ, vein]. Hoppe-Seyler's term for the venous blood-pigment as contained in the red corpuscles. See *Pigments, Conspectus of.*

Phlebion (*fleb'-e-on*) [φλέψ, vein]. A small vein, or venule.

Phlebismus (*fleb-iz'-mus*) [φλέψ, vein]. Undue prominence or swelling of a vein.

Phlebitic (*fleb-it'-ik*) [φλέψ, vein; ιτις, inflammation]. Pertaining to, of the nature of, or affected with phlebitis.

Phlebitis (*fleb-i'-tis*) [φλέψ, vein; ιτις, inflammation]. Inflammation of a vein. **P., Crural,** inflammation of the veins of the lower limb. See *Phlegmasia alba dolens.* **P., Gouty,** that dependent on gout. **P., Hyperplastic.** Synonym of *P., Proliferative.* **P., Obstructive,** phlebitis leading to occlusion of the vein. **P., Portal.** Synonym of *Pylephlebitis.* **P., Proliferative,** inflammation of a vein characterized by hyperplasia of the connective tissue of the vessel. It may be due to thrombosis—*thrombophlebitis,* or to inflammation of the surrounding tissue—*periphlebitis.* **P., Puerperal,** inflammation of the uterine veins following parturition. It generally follows thrombosis and is nearly always septic in origin. **P., Sclerotic,** diffuse or localized thickening of the intima of a vein, analogous to arteriosclerosis. **P., Simple,** phlebitis not due to microorganisms. **P., Sinus,** inflammation of a cerebral venous sinus. **P., Suppurative,** phlebitis going on to suppuration; this is a dangerous form on account of the distribution of septic emboli to distant organs that may take place. **P., Syphilitic,** phlebitis due to syphilis, generally seen in the portal radicles and umbilical veins of syphilitic new-born children. **P., Tuberculous,** a round-celled infiltration in the walls of a vein, due to the presence of the tubercle-bacillus. It may proceed to induration of the wall or to caseation; it may also burst through the intima into the blood-stream. **P., Uterine.** See *P., Puerperal.* **P., Varicose,** inflammation of a varicose vein.

Phlebocarcinoma (*fleb-o-kar-sin-o'-mah*) [φλέψ, vein; καρκίνωμα, carcinoma]. Extension of carcinoma to the walls of a vein.

Phlebocholosis (*fleb-o-ko-lo'-sis*) [φλέψ, a vein; χώλωσις, lameness]. Paralysis of the veins.

Phlebodes (*fleb-o'-dēz*) [φλέψ, vein; εἶδος, like]. Resembling a vein; made up of veins.

Phlebodiastasis (*fleb-o-di-as'-tas-is*) [φλέψ, vein; διάστασις, separation]. Separation of the ends of a cut vein; also, separation of two normally contiguous veins.

Phlebogenous (*fleb-oj'-en-us*) [φλέψ, a vein; γενής, producing]. Producing veins; a term applied to certain angiomatous tumors.

Phlebogram (*fleb'-o-gram*) [φλέψ, vein; γράμμα, a marking]. A tracing of the pulsation of a vein by the sphygmograph.

Phlebographic (*fleb-o-graf'-ik*) [φλέψ, vein; γράφειν, to unite]. Pertaining to phlebography.

Phlebography (*fleb-og'-ra-fe*) [φλέψ, vein; γράφειν, to write]. The anatomy and physiology of the veins.

Phleboid (*fleb'-oid*) [φλέψ, vein; εἶδος, like]. Pertaining to a vein. See also *Phlebodes.*

Phleboidal (*fleb-oi'-dal*) [φλέψ, vein; εἶδος, form]. In biology, resembling veins.

Phlebolite, Phlebolith (*fleb'-o-līt, fleb'-o-lith*) [φλέψ, vein; λίθος, stone]. Vein-stone, a hard concretion sometimes found in veins, and produced by calcareous infiltration of a thrombus.

Phlebolithiasis (*fleb-o-lith-i'-as-is*) [φλέψ, vein; λίθος, stone]. The formation of phleboliths.

Phlebolitic (*fleb-o-lit'-ik*) [φλέψ, a vein; λίθος, a stone]. Of the nature of, containing, or characterized by, phlebolites.

Phlebologic (*fleb-o-loj'-ik*) [φλέψ, a vein; λόγος, science]. Pertaining to phlebology.

Phlebology (*fleb-ol'-o-je*) [φλέψ, vein; λόγος, science]. The science of the anatomy and physiology of the veins.

Phlebometritis (*fleb-o-met-ri'-tis*). Synonym of *Phlebitis, Uterine.*

Phlebopaly (*fleb-op'-al-e*) [φλέψ, vein; πάλλειν, to beat]. Venous pulsation.

Phlebophlogosis (*fleb-o-flo-go'-sis*). Synonym of *Phlebitis.*

Phlebophthalmotomy (*fleb-off-thal-mot'-o-me*) [φλέψ, vein; ὀφθαλμός, eye; τομή, a cutting]. Scarification of the conjunctival vein.

Phleboplerosis (*fleb-o-ple-ro'-sis*) [φλέψ, a vein; πλήρωσις, a filling]. Distention of the veins.

Phleborrhage (*fleb'-or-āj*). See *Phleborrhagia.*

Phleborrhagia (*fleb-or-a'-je-ah*) [φλέψ, vein; ῥηγνύναι, to burst forth]. Venous hemorrhage.

Phleborrhexis (*fleb-or-eks'-is*) [φλέψ, vein; ῥῆξις, rupture]. Rupture of a vein.

Phlebosclerosis (*fleb-o-skle-ro'-sis*). Synonym of *Phlebitis, Sclerotic.*

Phlebostenosis (*fleb-o-sten-o'-sis*) [φλέψ, vein; στενός, narrow]. Constriction of a vein.

Phlebostrepsis (*fleb-o-strep'-sis*) [φλέψ, vein; στρέψις, a twisting]. Torsion, or twisting, of a vein.

Phlebothrombosis (*fleb-o-throm-bo'-sis*) [φλέψ, vein; θρόμβος, lump]. The formation of a thrombus in a vein.

Phlebotomania (*fleb-ot-o-ma'-ne-ah*) [φλέψ, vein; τομή, a cutting; μανία, madness]. A rage for blood-letting; excessive fondness for phlebotomy.

Phlebotome (*fleb'-o-tōm*) [φλέψ, vein; τομή, a cutting]. A cutting-instrument used in bleeding; a fleam.

Phlebotomic (*fleb-o-tom'-ik*) [φλέψ, a vein; τομή, a cutting]. Pertaining to phlebotomy.

Phlebotomist (*fleb-ot'-o-mist*) [φλέψ, vein; τομή, a cutting]. One who lets blood; a bleeder.

Phlebotomy (*fleb-ot'-o-me*) [φλέψ, vein; τομή, a cutting]. Blood-letting from a vein. It was formerly performed with a spring-lancet; at present a straight bistoury or a scalpel is used. The vein most often selected is the median cephalic at the bend of the elbow.

Phlebs (*flebs*) [φλέψ, a vein: *pl.*, *Phlebes*]. Vein.

Phlebypectasia (*fleb-ip-ek-ta'-se-ah*) [φλέψ, vein; ὑπό, slight; ἔκτασις, dilatation]. Slight distention of a vein.

Phlebyperectasia (*fleb-i-per-ek-ta'-se-ah*) [φλέψ, vein; ὑπέρ, excessive; ἔκτασις, dilation]. Great distention of the veins.

Phlebypostenosis (*fleb-ip-os-ten-o'-sis*) [φλέψ, vein; ὑπό, slight; στενός, narrow]. Slight constriction of a vein.

Phlĕdonia (*fle-do'-ne-ah*) [φλεδονεία, babble]. Delirium, or delirious utterance.

Phlegm (*flem*) [φλέγμα, phlegm]. A viscid, stringy mucus, secreted by the mucosa of the upper air-passages and which is expectorated or vomited; also, one of the four humors of old writers.

Phlegmagogic (*fleg-mag-oj'-ik*) [φλέγμα, phlegm; ἀγωγός, leading]. Having the qualities of a phlegmagogue; tending to expel phlegm.

Phlegmagogue (*fleg'-mag-og*) [φλέγμα, phlegm; ἀγωγός, leading]. 1. Expelling phlegm. 2. A medicine that expels phlegm.

Phlegmasia (*fleg-ma'-se-ah*) [φλέγειν, to burn]. Inflammation. **P. alba dolens.,** popularly called milk-leg. A painful swelling of the leg, beginning

either at the ankle and ascending, or at the groin and extending down the thigh. Its usual cause is septic infection of the genital region after labor. Two forms are described: The most common and most dangerous is a thrombosis of the veins of the thigh; the other involves the connective tissues and lymphatic vessels. The dangers of the first form are embolism, general infection, or the extension of the thrombus into the inferior cava. **P. malabarica.** Synonym of *Elephantiasis arabum.*

Phlegmasic (*fleg-ma'-zik*) [φλέγειν, to burn]. Characterized by or pertaining to phlegmasia. **P. Affection,** Gouley's term for a morbid process, one of the local nutritional changes, which, when visible and tangible, is ordinarily characterized by heat, redness, swelling, and pain, and which is now believed to be generally caused by microbic invasion.

Phlegmatic (*fleg-mat'-ik*) [φλεγματικός, like phlegm]. Unfeeling, indifferent, apathetic. Abounding in phlegm. **P. Temperament,** the lymphatic temperament.

Phlegmatoid (*fleg'-mat-oid*). Synonym of *Phlegmatous.*

Phlegmatorrhagia (*fleg-mat-or-a'-je-ah*) [φλέγμα, inflammation; ῥηγνύναι, to burst forth]. Coryza.

Phlegmatorrhea (*fleg-mat-or-e'-ah*). Synonym of *Phlegmatorrhagia.*

Phlegmatous (*fleg'-mat-us*) [φλέγμα, inflammation]. Pertaining to or having the nature of phlegm.

Phlegmon (*fleg'-mon*) [φλεγμονή, inflammation]. An inflammation characterized by the spreading of a purulent or fibrino-purulent exudate within the tissues.

Phlegmonoid (*fleg'-mon-oid*) [φλεγμονοειδής, like phlegmon]. Resembling phlegmon.

Phlegmonous (*fleg'-mon-us*) [φλεγμονή, inflammation]. Of the nature of or pertaining to phlegmon.

Phlegmorrhagia (*fleg-mor-a'-je-ah*). Synonym of *Phlegmorrhea.*

Phlegmorrhea (*fleg-mor-e'-ah*) [φλέγμα, phlegm; ῥοία, a flow]. A profuse discharge of mucus.

Phlegmymen (*fleg-mi'-men*) [φλέγμα, phlegm; ὑμήν, membrane]. Mucous membrane.

Phlegmymenitis (*fleg-mi-men-i'-tis*) [φλέγμα, phlegm; ὑμήν, membrane; ιτις, inflammation]. Inflammation of a mucous membrane.

Phlobaphene (*flo'-baf-ēn*), $C_{50}H_{46}O_{25}$. A dark-red amorphous substance derived from hops, from the bark of various trees, and from sugar by the action of various chemicals. See *Oak-bark,* and *Pigments, Conspectus of.*

Phloëm (*flo'-em*) [φλοιός, bark]. In biology, that portion of a fibro-vascular bundle which consists of bast-tissue and sieve-tissue; leptome. Cf. *Xylem.* **P.-ray,** a plate of phloëm-tissue between two medullary rays. **P.-sheath,** in biology, a layer of thin-walled cells surrounding the phloëm-tissue; bast-sheath; peri-phloëm; vascular bundle sheath. **P.-tissue,** phloëm.

Phlogia (*flo'-je-ah*) [φλογία, a burning]. Inflammation.

Phlogistic (*flo-jis'-tik*) [φλογιστός, burnt]. Pertaining to phlogiston; inflammatory.

Phlogiston (*flo-jis'-ton*) [φλογιστός, burnt]. A term formerly used by chemists to denote the inflammable element which was contained in combustible substances, and which was separated from them during combustion. The term disappeared with the discovery of oxygen.

Phlogmocausus (*flog-mo-kaw'-sus*) [φλογμός, flame; καῦσος, burning heat]. Inflammatory fever.

Phlogochroma (*flog-o-kro'-mah*) [φλογός, burning; χρῶμα, color]. The color due to inflammation.

Phlogochymia (*flog-o-ki'-me-ah*) [φλογός, burning; χυμεία, chemistry]. The metabolic changes induced by inflammation.

Phlogogenic (*flog-o-jen'-ik*) [φλογός, burning; γεννᾶν, to produce]. Causing inflammation.

Phlogogenous (*flo-goj'-en-us*) [φλογός, burning; γενής, producing]. Producing inflammation.

Phlogoma (*flo-go'-mah*) [φλογός, burning; ὄμα, tumor]. An inflammatory swelling.

Phlogopyra (*flo-gop'-ir-ah*). Synonym of *Phlogocausus.*

Phlogosin (*flo-go'-sin*) [φλόξ (φλογ-), flame; φλόγωσις, inflammation]. In biology, the name given by Leber to the crystalline body isolated from cultures of pyogenic staphylococci. It induces suppuration when injected hypodermatically.

Phlogosis (*flo-go'-sis*) [φλόγωσις, a burning]. Inflammation; also erysipelatous inflammation.

Phlogotic (*flo-got'-ik*) [φλογός, burning]. Pertaining to or marked by phlogosis, or inflammation.

Phlogozelotism (*flo-go-zel'-ot-izm*) [φλογός, burning; ζηλοῦν, to be eager]. A mania for ascribing to every disease an inflammatory origin.

Phloraglucin (*flo-rag-lu'-sin*). See *Phloroglucin.*

Phloretin (*flor-e'-tin*) [φλοιός, bark; ῥίζα, root]. A product of the treatment of phloridzin by dilute acids. Like that of phloridzin, its administration in suitable doses is followed by glycosuria or true diabetes.

Phloretinic Acid (*flor-et-in'-ik*). See *Acid.*

Phloridzin, Phlorizin (*flor-id'-zin, flor'-iz-in*) [φλοιός, bark; ῥίζα, root], $C_{21}H_{24}O_{10}.2H_2O$. A bitter crystalline glucosid occurring in the root and trunk of the apple, pear, and similar fruit-trees. It has reputed value in intermittent fevers and in glycosuria. Its exhibition is, however, very liable to cause glycosuria or true diabetes. In dogs large doses also produce marked fatty infiltration of the liver. Dose gr. 10–20. Unof.

Phloroglucin (*flo-ro-glu'-sin*) [φλοιός, bark; γλυκύς, sweet], $C_6H_6O_3$, or $C_6H_3(OH)_3$. A trivalent phenol found in many plants, especially in the bark of the cherry, pear, apple, and plum, and the leaves of the apple. It may also be obtained from different resins (catechu, kino) on fusion with caustic potash, or by fusing resorcinol with caustic soda. It crystallizes from water in hard, orthorhombic, yellowish crystals, sweeter than ordinary sugar, melting at 22° C. and subliming unaltered. It is employed as a test for lignin, giving a violet or purple coloration to lignified cell-walls previously acted on by hydrochloric acid. It is also employed as a decalcifying agent. See *Stains, Table of,* and *Tests, Table of.*

Phloroglucinol, Phloroglucol (*flo-ro-glu'-sin-ol, flo-ro-glu'-kol*). Synonym of *Phloroglucin.*

Phlorol (*flo'-rol*) [φλοιός, bark; *oleum,* oil], $C_8H_{10}O$. A phenol found in creasote.

Phlorose (*flo'-rōz*) [φλοιός, bark]. A glucose which is probably identical with dextrose.

Phlorrhizin (*flor'-iz-in*). Synonym of *Phloridzin.*

Phloxin (*floks'-in*) [φλόξ, a flame]. A coal-tar color; the potassium salt of tetra-brom-di-chlor-fluorescein. It is similar to eosin. See *Pigments, Conspectus of.*

Phlyctena (*flik-te'-nah*) [φλύκταινα, blister]. An elevation of the skin formed by an effusion of serum under the epidermis; blister; vesicle. **P. pallida.** See *Ophthalmia, Spring.*

Phlyctenar (*flik'-ten-ar*) [φλύκταινα, blister]. Affected with phlyctena; pertaining to phlyctena.

Phlyctenoid (*flik'-ten-oia*) [φλύκταινα, blister; εἶδος, like]. Resembling phlyctena. (Applied to a variety of herpes.)

Phlyctenophthalmia (*flik-ten-off-thal'-me-ah*). Synonym of *Conjunctivitis, Phlyctenular.*

Phlyctenosis (*flik-ten-o'-sis*) [φλύκταινα, blister]. An eruption characterized by vesicles. **P. aggregata,** an

herpetic eruption in which the vesicles are situated closely together. **P. labialis.** Synonym of *Herpes labialis.* **P. sparsa,** a form in which the vesicles are few and at considerable distances from each other.

Phlyctenous (*flik-te′-nus*) [φλύκταινα, a blister]. Pertaining to, affected with, or of the nature of, a phlyctena.

Phlyctenula (*flik-ten′-u-lah*) [dim. of φλύκταινα, blister]. A little vesicle or blister.

Phlyctenular (*flik-ten′-u-lar*) [φλύκταινα, blister]. Having the nature of phlyctenula. **P. Conjunctivitis, P. Ophthalmia.** See *Conjunctivitis, Phlyctenular.*

Phlyctenule (*flik-ten′-ūl*). Synonym of *Phlyctenula.*

Phlyctis (*flik′-tis*). Synonym of *Phlyctenula.*

Phlysis (*fli′-sis*) [φλύσις, eruption]. 1. A phlyctenula 2. A whitlow.

Phlyzacion, Phlyzacium (*fli-za′-se-on, fli-za′-se-um*) [φλύζειν, to inflame]. A pustular vesicle on an indurated base. **P. acutum.** Synonym of *Ecthyma acutum.*

Phobanthropy (*fo-ban′-thro-pe*). See *Anthropophobia.*

Phobodipsia (*fo-bo-dip′-se-ah*) [φόβος, fear; δίψα, thirst]. Hydrophobia.

Phobodypson (*fo-bo-dip′-son*). Synonym of *Hydrophobia.*

Phobophobia (*fo-bo-fo′-be-ah*) [φόβος, fear; φόβος, fear]. Dread of being afraid.

Phocenin (*fo′-sen-in*). Synonym of *Trivalerin.*

Phocomelia (*fo-ko-me′-le-ah*). See *Phocomelus.*

Phocomelus (*fo-kom′-el-us*) [φώκη, a seal; μέλος, limb]. A monster with shortened or rudimentary arms and thighs, the hands and feet being attached almost directly to the trunk.

Phœniceous (*fe′-nis-e-us*) [φοῖνιξ, purple-red]. Same as *Phenicious.*

Phœnicin (*fen′-is-in*) [φοῖνιξ, purple-red]. A name sometimes given to the coloring-matter of the blood.

Phœnicism (*fe′-nis-izm*) [φοῖνιξ, red]. A synonym of *Measles.*

Phœnigmus (*fe-nig′-mus*) [φοῖνιξ, purple-red]. See *Phenigmus.*

Phœnodin (*fe′-no-din*) [φοινώδης, blood-red]. Synonym of *Hematin.*

Pholis (*fo′-lis*) [φολίς, a scale]. A horny scale.

Phonal (*fo′-nal*) [φονή, voice]. Pertaining to the voice or to sound.

Phonascetics (*fo-nas-et′-iks*) [φωνασκεῖν, to exercise the voice]. Systematic exercise for the restoration or improvement of the voice.

Phonate (*fo′-nāt*) [φωνή, voice]. To utter vocal sounds.

Phonation (*fo-na′-shun*) [φωνή, voice, or sound]. The production of vocal sound. The larynx is the organ of phonation.

Phonatory (*fo-na′-tor-e*) [φωνή, voice]. Pertaining to phonation.

Phonautogram (*fo-naw′-to-gram*) [φωνή, voice; αὐτός, self; γράμμα, inscription]. The diagram of a phonautograph.

Phonautograph (*fo-naw′-to-graf*) [φωνή, voice; αὐτός, self; γράφειν, to write]. An apparatus consisting essentially of a membranous diaphragm, a lever, and a revolving drum, by means of which the vibrations of the air produced by the voice are recorded.

Phonautographic (*fo-naw-to-graf′-ik*) [φωνή, voice; αὐτός, self; γράφειν, to write]. Pertaining to a phonautograph.

Phone (*fōn*) [φωνή, sound, voice]. A vocal sound.

Phoneidoscope (*fo-ni′-do-skōp*) [φωνή, sound; εἶδος, form; σκοπεῖν, to see]. An instrument for showing "the lights and shadows of musical sounds."

Phoneidoscopic (*fo-ni-do-skop′-ik*) [φωνή, sound; εἶδος, form; σκοπεῖν, to see]. Pertaining to the phoneidoscope.

Phonetic (*fo-net′-ik*) [φωνή, voice]. Pertaining to sound.

Phonetics (*fo-net′-iks*) [φωνή, voice]. The science of the voice.

Phonic (*fon′-ik*) [φωνή, voice]. Pertaining to the voice or to articulate sounds of the voice. **P. Spasm,** a rare form of laryngeal spasm occurring on attempts to speak, generally in those of a neurotic habit, or from over-exertion of the voice.

Phonics (*fon′-iks*). Synonym of *Phonetics.*

Phonism (*fo′-nizm*) [φωνή, voice]. A sensation, of sound or hearing, due to the effect of sight, touch, taste, or smell, or even to the thought of some object, person, or general conception.

Phonocamptic (*fo-no-kamp′-tik*) [φωνή, voice; καμπτός, a bending]. Reflecting or deflecting sound.

Phonocamptics (*fo-no-kamp′-tiks*) [φωνή, sound; καμπτός, bending]. That branch of physics treating of the reflection of sound.

Phonochorda (*fo-no-kor′-dah*) [φωνή, sound; χορδή, cord: *pl.*, *Phonochordæ*]. A vocal band.

Phonogram (*fo′-no-gram*) [φωνή, voice; γράμμα, a writing]. 1. The record of a phonograph. 2. A graphic character representing a vocal sound.

Phonograph (*fo′-no-graf*) [φωνή, sound; γράφειν, to record]. An instrument consisting of a wax-coated cylinder revolving under a stylus attached to a diaphragm. The vibrations of the diaphragm, set in motion by the voice, cause the cylinder to be indented by the stylus. When the cylinder is again revolved the movement of the stylus upon the cylinder throws the diaphragm into vibration and reproduces the original sounds of the voice.

Phonographic (*fo-no-graf′-ik*) [φωνή, sound; γράφειν, to write] Pertaining to the phonograph.

Phonography (*fo-nog′-ra-fe*) [φωνή, sound; γράφειν, to write]. A scheme of short-hand writing in which the words are spelled according to their sounds.

Phonologic (*fo-no-loj′-ik*) [φωνή, voice; λόγος, science]. Pertaining to phonology.

Phonologist (*fo-nol′-o-jist*) [φωνή, voice; λόγος, science]. One versed in phonology.

Phonology (*fo-nol′-o-je*) [φωνή, voice; λόγος, science]. The science of vocal sounds.

Phonomania (*fo-no-ma′-ne-ah*) [φωνή, slaughter; μανία, madness]. Homicidal mania.

Phonometer (*fo-nom′-et-er*) [φωνή, voice; μέτρον, measure]. An instrument for measuring the intensity of the voice, or current of air expired during phonation.

Phonometry (*fo-nom′-et-re*) [φωνή, voice; μέτρον, measure]. The measurement of the quality of the voice in thoracic disease.

Phononosus (*fo-non′-o-sus*). Synonym of *Phonopathy.*

Phonopathy (*fo-nop′-ath-e*) [φωνή, voice; πάθος, disease]. Any disorder or disease of the voice.

Phonophobia (*fo-no-fo′-be-ah*) [φωνή, sound; φόβος, fear]. A fear of speaking, in paresthesia of the larynx, because of the painful sensation produced during phonation.

Phonophore (*fo′-no-for*) [φωνή, sound; φορός, bearing: *pl.*, *Phonophori*]. An auditory ossicle, viewed as a transmitter of sound. See *P., Paladino's.* **P., Paladino's,** an instrument to facilitate hearing, consisting in a rod which connects the larynx of the speaker with the teeth of the listener.

Phonophorous (*fo-nof′-or-us*) [φωνή, voice; φόρος, bearing]. Conveying sound.

Phonopore (*fo′-no-por*). Same as *Phonophore.*

Phonopsia (*fo-nop′-se-ah*) [φωνή, sound; ὄψις, vision].

The perception of photisms or subjective color-sensations, due to the actual sensation of hearing.

Phonospasm (*fo'-no-spazm*). Synonym of *Phonic Spasm.*

Phoradendron (*fo-rad-en'-dron*) [φώρ, thief; δένδρον, tree]. A genus of apetalous plants including the mistletoe. **P. flavescens,** *American Mistletoe*, parasitic on the elm and hickory. It is poisonous, producing gastro-enteritis; it is also said to possess oxytocic and hemostatic properties.

Phoranthium (*fo-ran'-the-um*) (φορός, bearing; ἄνθος, flower: *pl.*, *Phoranthia*]. Same as *Clinanthium.*

Phormia (*for'-me-ah*). Same as *Pseudomorphin.*

Phorometer (*fo-rom'-et-er*) [φορά, motion; μέτρον, measure]. An instrument for measuring the intensity of light; also one for measuring the relative strengths of the ocular muscles.

Phorone (*fo'-rōn*), $C_9H_{14}O$. A substance prepared by saturating acetone with HCl and permitting it to stand. It crystallizes in large, yellow prisms, melting at 28° C. and boiling at 196° C.

Phoronomia, Phoronomics (*for-o-no'-me-ah, for-o-nom'-iks*). Same as *Phoronomy.*

Phoronomy (*fo-ron'-o-me*) [φορά, motion; νόμος, law]. Kinematics. Also, the sequence of movements of the presenting part in the passage of the fetus through the parturient canal.

Phosgen, Phosgene (*fos'-jen, fos'-jēn*) [φῶς, light; γεννᾶν, to produce]. Producing light. **P. Gas,** $COCl_2$, carbonyl chlorid; a compound formed by the action of light on a mixture of carbonic oxid and chlorin; it is a colorless gas with a suffocative odor; on cooling it condenses to a liquid that boils at + 8° C.

Phosphammonium (*fos-fam-o'-ne-um*) [φωσφόρος, phosphorus; *ammonium*]. A compound of the radicles phosphonium and ammonium.

Phosphane Biscuits. A chemic food prepared in England from oat-meal.

Phosphanilin (*fos-fan'-il-in*) [φωσφόρος, phosphorus; *anilin*], $C_6H_5.PH_2$. Phenylphosphin; a substance obtained by the action of hydriodic acid upon phosphenyl chlorid. It is a liquid, boiling at 160° C. in a current of hydrogen, and possessing an extremely disagreeable odor. It sinks in water.

Phosphate (*fos'-fāt*) [φωσφόρος, phosphorus]. A salt of phosphoric acid. As phosphoric acid has three replaceable hydrogen atoms, we have three kinds of salts: (1) **P., Normal,** in which the three hydrogen atoms, or the six of two molecules, are substituted by metals, *e. g.*, Na_3PO_4, $Ca_3(PO_4)_2$. (2) **P., Dibasic,** or **P., Monohydric,** in which two hydrogen atoms are replaced by a base, as Na_2HPO_4. (3) **P., Monobasic,** or **P., Dihydric,** in which only one hydrogen atom of the acid molecule is replaced by a metal or radicle, *e. g.*, NaH_2PO_4. **P., Acid,** a dihydric or monohydric phosphate. **P., Acid Sodium,** the salt to which the acidity of urine is chiefly due. **P., Alkaline,** a normal or acid phosphate of the alkaline metals. **P., Ammonio-magnesium,** a double salt of ammonium and magnesium combined with phosphoric acid. **P., Bone,** $Ca_3(PO_4)_2$, the normal calcium ortho-phosphate found in bone. **P., Disodic,** the phosphate of the blood. **P., Earthy,** a phosphate, normal or acid, of one of the alkaline earths, calcium or magnesium. Earthy phosphates, as well as the alkaline, occur in the urine, the ratio being about one part of the former to two of the latter. For test, see *Tests, Table of.* **P., Triple,** ammonio-magnesium phosphate, occurring in the urine, often in the form of crystals, generally in the shape of a coffin, hip-roof, or envelop. See *Urinary Sediments, Table of.*

Phosphatic (*fos-fat'-ik*) [φωσφόρος, phosphorus]. Relating to or having the nature of phosphates. **P. Calculus.** See *Urinary Calculi, Table of.* **P. Diabetes.** See *Diabetes mellitus.* **P. Diathesis,** that condition of the body favoring the deposition of phosphates in the urine.

Phosphatid (*fos'-fat-id*) [φωσφόρος, phosphorus]. Any member of a large group of phosphorus-compounds, found in brain-substance, and resembling the phosphates. They contain phosphoric acid in which one, two, or three molecules of hydroxyl are replaced by various radicles. The phosphatids differ widely from each other in physical properties.

Phosphaturia (*fos-fat-u'-re-ah*) [φωσφόρος, phosphorus; οὖρον, urine]. A condition in which an excess of phosphates is passed in the urine. It can be diagnosticated by a quantitative analysis of the urine for phosphates by the uranium method.

Phosphene (*fos'-fēn*) [φῶς, light; φαίνειν, to show]. A subjective luminous circle or sensation of light caused by pressure upon the eyeball. See also *Parafolyl.* **P. of Accommodation,** a phosphene produced by the effort of accommodation. **P., Pressure.** See *Phosphene.*

Phosphenylic Acid (*fos-fen-il'-ik*) [φωσφόρος, phosphorus; φοῖνιξ, purple-red], $C_6H_5H_2PO_3$. A compound of phenyl and phosphorous acid.

Phosphid (*fos'-fid*) [φωσφόρος, phosphorus]. 1. Any compound of phosphorus with a single element or radicle. 2. A substitution compound of phosphin.

Phosphin (*fos'-fin*) [φωσφόρος, phosphorus]. 1. Hydrogen phosphid, PH_3. 2. A substitution-compound of PH_3, bearing to it the same relation that an amin does to ammonia. The phosphins are colorless, strongly-refracting, volatile liquids, possessing an extremely powerful odor. They are nearly insoluble in water. On exposure to air they are energetically oxidized, and usually inflame spontaneously. They readily combine with sulphur and carbon disulphid. They form salts with acids. 3. A yellow substance occurring as a by-product in the preparation of fuchsin.

Phosphite (*fos'-fit*) [φωσφόρος, phosphorus]. Any salt of phosphorous acid. On account of the three replaceable hydrogen atoms, we have normal, dibasic or monohydric, and monobasic or dihydric phosphites, of which the first are least known.

Phospho-glyceric Acid (*fos-fo-glis-e'-rik*) [φωσφόρος, phosphorus; γλυκύς, sweet], $C_3H_9PO_6$. A liquid body obtained from lecithin.

Phosphonium (*fos-fo'-ne-um*) [φωσφόρος, phosphorus]. The hypothetic, univalent radicle, PH_4; it is analogous to ammonium, NH_4.

Phosphorated (*fos'-for-a-ted*) [φωσφόρος, phosphorus]. Synonym of *Phosphorized.* **P. Oil,** a one per cent. solution of phosphorus in expressed oil of almonds, with the addition of a small quantity of ether.

Phosphorenesis (*fos-for-en'-es-is*) [φωσφόρος, phosphorus: *pl.*, *Phosphoreneses*]. Baumer's name designating any disease due to excess or deficiency of calcium phosphate in the system.

Phosphorescence (*fos-for-es'-ens*) [φωσφόρος, phosphorus]. The spontaneous luminosity of certain substances, like that of phosphorus, in the dark. It is observed in decomposing organic matter, such as dead fish, wood, etc.; in the bodies of certain plants and animals, such as the marigold, fire-fly; in the excreta of some animals; in the growth of several species of bacteria; in natural or artificial media. The process is accompanied by oxidation. Several bacteria are known to produce phosphorescence. Thus, the *Bacillus phosphorescens* (Fischer) is found in the sea-water of the West Indies. Another phosphorescent organism was found by Fischer in the harbor of Kiel. The

most common is the *Bacterium phosphorescens* (Fischer), which occurs on the decomposing flesh of fishes, on beef, or fat. The *Photobacterium sarcophilum* also has the property of producing phosphorescence. See *Photogenic.*

Phosphoreted (*fos'-for-et-ed*) [φωσφόρος, phosphorus]. Combined with phosphorus.

Phosphorhidrosis (*fos-for-hid-ro'-sis*) [φῶς, light; φορεῖν, to bear; ἱδρώς, sweat]. Phosphorescent sweat. A rare condition sometimes seen in the later stages of pulmonary tuberculosis and in malaria.

Phosphoric (*fos-for'-ik*) [φῶς, light; φορός, bearing]. Pertaining to phosphorus. **P. Acid.** See *Acids* and *Stains, Table of.*

Phosphoridrosis (*for-for-id-ro'-sis*). See *Phosphorhidrosis.*

Phosphorism (*fos'-for-izm*) [φωσφόρος, phosphorus]. Chronic phosphorus-poisoning.

Phosphorized (*fos'-for-izd*) [φωσφόρος, phosphorus]. Containing phosphorus.

Phosphorogenic (*fos-for-o-jen'-ik*) [φωσφόρος, phosphorus; γεννᾶν, to generate]. Producing phosphorescence, as certain rays of the spectrum.

Phosphorous Acid (*fos-for'-us*). See *Acid.*

Phosphoruria (*fos-for-u'-re-ah*) [φωσφόρος, phosphorus; οὖρον, urine]. Phosphorescence of the urine. Also, urine containing an excess of phosphates.

Phosphorus (*fos'-for-us*) [φῶς, light; φορεῖν, to bear]. A non-metallic element, having a quantivalence of 3 or 5, and an atomic weight of 31. Symbol P. See *Elements, Table of.* Phosphorus does not occur in the free state, but is widely distributed in rocks, in fertile soils, in animal and vegetable tissues, in urine and in guano. The human body contains a large quantity of calcium phosphate, in the form of complex organic compounds. Phosphorus is an important constituent of nervous tissue. In commerce it is prepared from bone-ash, or from sombrerite, an impure calcium phosphate found in West Indian guano. Phosphorus may be obtained in several allotropic forms. *Ordinary phosphorus* is a yellowish-white, waxy solid, of a specific gravity of 1.837. It melts at 44.2° C., and boils at 290° C. It is insoluble in water, soluble to a slight extent in olive-oil and in ether, freely in carbon disulphid. *Red or amorphous phosphorus* is formed when ordinary phosphorus is heated to 240° C. in an atmosphere free from oxygen; also by the addition of a trace of iodin at 200° C. It is a dark-red powder, having a specific gravity of 2.11, insoluble in carbon disulphid, non-inflammable, non-luminous, non-poisonous. *Metallic rhombohedral phosphorus* is an allotropic form produced by heating phosphorus in a sealed tube with melted lead. Its specific gravity is 2.34. Other modifications have been described. Phosphorus combines with other elements to form phosphids, with hydrogen and oxygen to form a series of acids, known chiefly through their salts. Medicinally, phosphorus is used as an alterative in osteomalacia and in rickets. It is also employed in sexual impotence, in threatened cerebral degeneration, and in neuralgia. Dose $\frac{1}{100}$ to $\frac{1}{20}$ grain. Ordinary phosphorus is exceedingly poisonous; it causes a wide-spread fatty degeneration, most marked in the liver. Vomiting is one of the earliest symptoms, the material ejected being generally luminous in the dark. Jaundice appears usually within 36 hours, sometimes, however, much later. The liver is at first enlarged, but subsequently diminishes in size. Cerebral symptoms of an intense type occur—wild delirium, convulsions, coma. Death is generally due to failure of respiration and circulation. The urine in phosphorus-poisoning is albuminous, contains bile acids and pigments, and leucin and tyrosin. The treatment of phosphorus-poisoning consists in the administration of emetics and purgatives and of the antidote—copper sulphate or French oil of turpentine. **P., Amorphous.** See *Phosphorus.* **P., Baldwin's,** calcium nitrate. **P., Black,** a so-called allotropic form of phosphorus described by Thénard. It is believed to consist of a phosphid of mercury or another metal. **P., Bolognian, P., Bononian,** barium sulphate ignited with combustible substances such as charcoal. **P., Brand's,** ordinary phosphorus, so-named after its discoverer. **P., Canton's,** calcium sulphid. **P., Elixir,** spirit of phosphorus 210 c.c., oil of anise 2 c.c., glycerin 550 c.c., aromatic elixir q. s. **P., English,** ordinary phosphorus. **P., Homberg's,** calcium chlorid. **P., Kunkel's,** ordinary phosphorus. **P.-necrosis,** a necrosis, chiefly of the jawbone, which affects workmen exposed to the fumes of phosphorus. **P. oxychlorid,** $POCl_3$. A fuming liquid of pungent odor. **P. pentabromid,** a yellow, crystalline substance of pungent odor. **P. pentachlorid,** PCl_5; a white, crystalline, unstable powder, with an unpleasant, pungent odor. **P. pentafluorid,** PF_5; a colorless irritant gas. **P. pentasulphid,** P_2S_5; an unstable crystalline compound. **P. pentoxid,** P_2O_5; a colorless, amorphous substance produced by the combustion of oxygen. On account of its affinity for water it is used as a desiccating agent. **P., Red.** See under *Phosphorus.* **P., Spt.,** phosphorus 1:2 grams, absolute alcohol q. s. ad 1000 c.c. **P., Thompson's Solution of.** Synonym of *P., Tinct.* **P. tribromid, P. trichlorid, P. tri-iodid,** PBr_3, PCl_3, PI_3; halogen compounds of phosphorus; the first two are pungent liquids, the last a solid. **Calcii hypophosphis,** $Ca_4(PO_2)_3$. Dose gr. x–xxx. **Calcii lactophosphat., Syr.,** of the preceding 22, lactic acid 33, orange-flower water 80, sugar 600, hydrochloric acid, water of ammonia and water āā q. s. ad 1000. Dose ʒj–ʒij. **Calcii phosphas præcipitat.,** $Ca_3(PO_4)_2$. Dose gr. ij–x. **Ferri hypophosphis,** $Fe_2(H_2PO_2)_6$, soluble in sodium citrate. Dose gr. v–x. **Ferri, quininæ et strychninæ phosphat., Syr.,** phosphates of iron and quinin āā 133, strychnin 4, phosphoric acid 800, sugar 6000, distilled water q. s. ad 10,000 parts. Dose ʒj–ij. **Hypophosphitum cum ferro, Syr.,** ferrous lactate 10, potass. citrate 10, syr. of hypophosphites q. s. ad 1000. Dose ʒj–ʒj. **Hypophosphitum, Syr.,** calcium hypophosphite 45, potassium hypophosphite 15, sodium hypophosphite 15, dilute hypophosphorous acid 2, sugar 500, spirit of lemon 5, water q. s. Dose ʒj–ʒj. **Phosphatum, Syr., Comp.,** *Parish's Chemical Food,* unof., has in each ʒj phosphate of iron gr. ijss, phosphate of calcium gr. j. Dose ʒj–ij. **Oleum phosphoratum,** phosphorated oil, contains phosphorus 1, stronger ether 8, expressed oil of almond q. s. ad 100. Dose ♏j–v. **P., Pil.,** each contains gr. $\frac{1}{100}$ of the drug. Dose j–v. **P., Tinct.** (Bellevue Hosp.), unof., contains phosphorus gr. xxxij, absolute alcohol ʒxlvj, essence of vanilla ʒj, oil of orange-peel, ʒiij, alcohol q. s. ad ʒxlviij. Dose ♏x–ʒj. **P., Tinct.** (Thompson's), unof., contains phosphorus gr. j, absolute alcohol ʒv, glycerin ʒjss, spt. peppermint ♏xl. Dose ♏xx–ʒj. **Potassii hypophosphis,** KH_2PO_2. Dose gr. v–x. **Sodii hypophosphis,** $NaH_2PO_2H_2O$. Dose gr. v–x. **Sodii phosphas,** $Na_2HPO_4.12H_2O$. Dose ʒj–ʒj. **Sodii pyrophosphas,** $Na_4P_2O_7.10H_2O$. Dose ʒss–ʒss. **Zinci phosphidum,** Zn_3P_2, soluble in hydrochloric acid, irritant and poisonous. Dose gr. $\frac{1}{10}$–$\frac{1}{20}$.

Phosphotage (*fos'-fo-tahj*) [Fr.]. A method of improving wines by adding dicalcic phosphate instead of gypsum, as in the process of "plastering." This does not increase the percentage of sulphuric acid nor decrease that of phosphoric acid.

Phosphotungstic Acid (*fos-fo-tung'-stik*), $H_{11}PW_{19}O_{39} + H_2O$). A crystalline compound of phosphoric acid and tungstic acid used as a test for alkaloids and peptones. See *Tests, Table of.*

Phosphuret (*fos'-fu-ret*) [φωσφόρος, phosphorus]. A phosphid.

Phosphureted (*fos'-fu-ret-ed'*). Synonym of *Phosphuretted.*

Phosphuria (*fos-fu'-re-ah*). Synonym of *Phosphaturia.*

Photalgia (*fo-tal'-je-ah*) [φῶς, light; ἄλγος, pain]. Pain arising from too great intensity of light.

Photastrography (*fo-tas-trog'-ra-fe*) [φῶς, light; ἀστήρ, a star; γράφειν, to write]. Astronomic photography.

Photesthesia (*fo-tes-the'-ze-ah*) [φῶς, light; αἴσθησις, sensation]. Sensitiveness to light.

Photics (*fo'-tiks*). Synonym of *Optics.*

Photism (*fo'-tism*) [φώτισμα, a lighting]. A sensation, as of color or light, produced by hearing, taste, smell, touch, or temperature, or even by the thought of some object, person, or general conception. Cf. *Phonism.*

Photo- (*fo'-to-*) [φῶς, light]. A prefix denoting connection with or relation to light.

Photobiotic (*fo-to-bi-ot'-ik*) [φῶς, light; βιωτικός, belonging to life]. In biology, living habitually in the light.

Photocampsis (*fo-to-kamp'-sis*) [φῶς, light; κάμψις, a bending]. Refraction of light.

Photocautery (*fo-to-kaw'-ter-e*) [φῶς, light; καυτήριον, cautery]. A cauterizing agency whose heat is derived from the rays of the sun by means of concentration by lenses.

Photo-chemic (*fo-to-kem'-ik*) [φῶς, light; χημεία, chemistry]. Pertaining to the chemic action of light, as manifested in its action on silver salts and certain other compounds.

Photochemist (*fo-to-kem'-ist*) [φῶς, light; χημεία, chemistry]. One versed in photochemistry.

Photochemistry (*fo-to-kem'-is-tre*) [φῶς, light; χημεία, chemistry]. That branch of chemistry treating of the chemic action of light.

Photochromatic (*fo-to-kro-mat'-ik*) [φῶς, light; χρῶμα, color]. Pertaining to colored light. **P. Treatment,** treatment of disease by colored light.

Photochronography (*fo-to-kro-nog'-ra-fe*) [φῶς, light; χρόνος, time; γράφειν, to write]. The taking of successive photographs of moving objects.

Photodermatic (*fo-to-der-mat'-ik*) [φῶς, light; δέρμα, skin]. In biology, having a luminous skin or exterior; phosphorescent.

Photodynamic (*fo-to-di-nam'-ik*) [φῶς, light; δύναμις, power]. Pertaining to the energy of light.

Photodysphoria (*fo-to-dis-fo'-re-ah*) [φῶς, light; δυσφορία, excessive pain]. Intolerance of light.

Photo-epinastic (*fo-to-ep-in-as'-tik*) [φῶς, light; ἐπί, upon; ναστός, solid]. Pertaining to photo-epinasty.

Photo-epinasty (*fo-to-ep'-in-as-te*) [φῶς, light; ἐπί, upon; ναστός, pressed close, solid]. In biology, downward curvature due to exposure to light.

Photogene (*fo'-to-jēn*) [φῶς, light; γεννᾶν, to produce]. 1. A retinal picture, or impression. 2. *Shale-naphtha,* a substance derived from bituminous shales, having a specific gravity of .800 to .810, boiling at 145° to 150° C., with a slight ethereal odor and peppery taste. It dissolves sulphur, phosphorus, iodin, fats, resins, caoutchouc, etc. It is sometimes used for illuminating purposes and for dissolving the fat from bones, and bleaching them, in the preparation of artificial ivory.

Photogenic (*fo-to-jen'-ik*) [φῶς, light; γενής, producing]. In biology, light-producing; phosphorescent, as certain *Schizomycetes.* See under *Bacteria, Synonymatic Table of.*

Photogenous (*fo-toj'-en-us*) [φῶς, light; γενής, producing]. Producing light.

Photogram (*fo'-to-gram*) [φῶς, light; γράμμα, a writing]. A photographic representation of an enlargement obtained by the microscope.

Photograph (*fo'-to-graf*) [φῶς, light; γράφειν, to record]. The likeness of any object produced by the chemic action of light reflected from the object upon a surface coated with a chemically sensitive material.

Photographers' Cramp. See *Cramp.*

Photography (*fo-tog'-ra-fe*) [φῶς, light; γράφειν, to write]. The art of producing images of objects by throwing the rays of light reflected from them upon a surface coated with a film of a chemically sensitive substance such as a silver salt.

Photohemotachometer (*fo'-to-hem'-o-tak-om'-et-er*) [φῶς, light; αἷμα, blood; τάχος, swiftness; μέτρον, measure]. An instrument for estimating the velocity of the blood and at the same time photographing the changes in the level of the blood produced by the movements of the heart and of respiration.

Photohyponastic (*fo-to-hi-po-nas'-tik*) [φῶς, light; ὑπό, under; ναστός, solid]. Pertaining to photohyponasty.

Photohyponasty (*fo-to-hi'-po-nas-te*) [φῶς, light; ὑπό, under; ναστός, closely pressed, solid]. In biology, upward curvature due to exposure to intense light.

Photokinetic (*fo-to-kin-et'-ik*) [φῶς, light; κινητικός, causing movement]. Causing movement by means of the luminous rays of light.

Photo-laryngoscopy (*fo-to-lar-in-gos'-ko-pe*) [φῶς, light; λάρυγξ, larynx; σκοπεῖν, to examine]. The process of photographing the larynx by the aid of the laryngoscope.

Photologic (*fo-to-loj'-ik*) [φῶς, light; λόγος, science]. Pertaining to photology.

Photologist (*fo-tol'-o-jist*) [φῶς, light; λόγος, science]. One versed in photology.

Photology (*fo-tol'-o-je*) [φῶς, light; λόγος, science]. The science of the nature and laws of light; optics.

Photolysis (*fo-tol'-is-is*) [φῶς, light; λύσις, a loosing, setting free]. In biology, the movements of protoplasm under the influence of light. **P., Apostrophe,** when the chlorophyl-grains collect on the cell-walls which are parallel to the plane of incident light. **P., Epistrophe,** when the chlorophyl-grains collect on the cell-walls which are at right angles to the plane of incident light.

Photomagnetic (*fo-to-mag-net'-ik*) [φῶς, light; μαγνήτης, magnet]. Pertaining to the power of certain rays of the spectrum to render magnetic a steel needle.

Photomagnetism (*fo-to-mag'-net-izm*) [φῶς, light; μαγνήτης, magnet]. The relation of magnetism to light.

Photomania (*fo-to-ma'-ne-ah*) [φῶς, light; μανία, madness]. The increase of maniacal symptoms under the influence of light.

Photometer (*fo-tom'-et-er*) [φῶς, light; μέτρον, measure]. An instrument for measuring the intensity of light.

Photometric (*fo-to-met'-rik*) [φῶς, light; μέτρον, measure]. Pertaining to photometry or the measurement of light.

Photometry (*fo-tom'-et-re*) [φῶς, light; μέτρον, measure]. The measurement of light, its rapidity, intensity, etc.

Photomicrograph (*fo-to-mi'-kro-graf*) [φῶς, light; μικρός, small; γράφειν, to write]. A photograph of a small or microscopic object, usually made with the aid of a microscope, and of sufficient size for observation with the naked eye. Compare *Microphotograph.*

Photo-micrographic (*fo-to-mi-kro-graf'-ik*) [φῶς, light; μικρός, small; γράφειν, to write]. Pertaining to photomicrography.

Photomicrography (*fo-to-mi-krog'-ra-fe*) [φῶς, light; μικρός, small; γράφειν, to write]. The production of photographs of very small or microscopic objects, usually by the aid of a microscope, the photographs being of sufficient size for observation with the naked eye. In English this correct form is now almost invariably used, but in French and German the term *microphotography* (*q. v.*) is more commonly used with the meaning given.

Photonosus (*fo-ton'-o-sus*) [φῶς, light; νόσος, disease]. A diseased condition arising from continued exposure to intense or glaring light, *e.g.*, snow-blindness, etc.

Photoparesthesia (*fo-to-par-es-the'-ze-ah*) [φῶς, light; παρά, beside; αἴσθησις, sensation]. Defective, or perverted, retinal sensibility.

Photophobia (*fo-to-fo'-be-ah*) [φῶς, light; φόβος, fear]. Intolerance of light; a symptom of inflammatory conditions of the eye, of certain diseases of the brain, and of hysteria.

Photophobic (*fo-to-fo'-bik*) [φῶς, light; φόβος, fear]. Affected with, or pertaining to, photophobia.

Photophobophthalmia (*fo-to-fo-boff-thal'-me-ah*) Synonym of *Nyctalopia*.

Photophone (*fo'-to-fōn*) [φῶς, light; φωνή, sound]. 1. An apparatus for the graphic representation of the character of sound-waves by means of a sensitive flame. 2. An instrument for the transmission of sounds to a long distance by means of rays of light.

Photophysical (*fo-to-fiz'-ik-al*) [φῶς, light; φυσικός, natural]. Pertaining to the physical effect of light; opposed to *Photochemic*.

Photophore (*fo'-to-fōr*) [φῶς, light; φορεῖν, to bear]. An instrument for examination of the cavities of the body by means of the electric light.

Photopsia (*fo-top'-se-ah*) [φῶς, light; ὄψις, sight]. Subjective sensations of light, as sparks or flashes of fire, occurring in certain morbid conditions of the optic nerve, the retina, or the brain. It may be produced by sudden mechanical irritation of the eyeball.

Photopsy (*fo'-top-se*). Same as *Photopsia*.

Photoptometer (*fo-top-tom'-et-er*) [φῶς, light; ὤψ, eye; μέτρον, measure]. An instrument for determining visual acuity.

Photoptometry (*fo-top-tom'-et-re*) [φῶς, light; ὄψ, eye; μέτρον, measure]. The measurement of the perception of light.

Photorrhexis (*fo-tor-eks'-is*). Synonym of *Photocampsis*.

Photosantonin, or Photosantoninic Acid (*fo-to-san'-to-nin, fo-to-san-to-nin'-ik*) [φῶς, light; σαντονικόν, a kind of wormwood], $C_{23}H_{34}O_6$. Sestini's name for one of the products of the decomposition of santonin as the result of exposure to sunlight. It occurs as quadrate plates, which melt at 64–65° C., and boil at 305° C. It is insoluble in cold water, slightly soluble in hot water, and easily soluble in alcohol and ether.

Phototactic (*fo-to-tak'-tik*) [φῶς, light; τάξις, arrangement]. In biology, pertaining to phototaxis.

Phototactism (*fo-to-tak'-tizm*) [φῶς, light; τάσσειν, to arrange]. Same as *Phototaxis*.

Phototaxis (*fo-to-taks'-is*) [φῶς, light; τάξις, arrangement]. In biology, the assumption of a definite position with reference to the direction of the rays of incident light, as noticed in the compass-plant (*Silphium laciniatum*), and in the zoöspores of certain plants (*Protococcoideæ*, *Ulotrichaceæ*, *Desmideaceæ*).

Phototherapeutics (*fo-to-ther-ap-u'-tiks*) [φῶς, light; θεραπεία, treatment]. A method of treating disease by concentration of the rays of light through a lens. Local excitement, proportional to the degree of the exciting cause, *i. e.*, from a slight excitement to cauterization, may be produced in this way.

Phototonic (*fo-to-ton'-ik*) [φῶς, light; τόνος, tension]. In biology, exhibiting increased vital activity under the stimulus of light; the opposite of *paratonic*.

Phototonus (*fo-tot'-o-nus*) [φῶς, light; τόνος, tension]. In biology, a condition of increased vital irritability or motility due to exposure to light, in contrast with the rigidity or quiescence produced by darkness.

Photoxylin, Photoxylon (*fo-toks'-il-in, fo-toks'-il-on*) [φῶς, light; ξύλον, wood]. A substance derived from wood pulp by the action of sulphuric acid and potassium nitrate. It serves as a substitute for collodion in minor surgery, and as a medium for mounting microscopic specimens.

Photuria (*fo-tu'-re-ah*) [φῶς, light; οὖρον, urine]. Phosphorescence of the urine.

Phoxos (*foks'-os*) [φοξός, pointed]. An individual with a pointed or peaked head.

Phragma (*frag'-mah*) [φράγμα, a fence, partition: *pl.*, *Phragmata*]. In biology: (1) a false dissepiment in a pericarp or other organ; (2) any partition, septum, dissepiment, or diaphragm.

Phragmidiothrix (*frag-mid-e-o'-thriks*) [φράγμα, fence; ἴδιος, one's own; θρίξ, hair]. A name given to a genus of *Schizomycetes* resembling the *Beggiatoa*. See under *Bacteria*, *Synonymatic Table of*.

Phren (*fren*) [φρήν]. 1. Diaphragm. 2. Mind.

Phrenalgia (*fren-al'-je-ah*) [φρήν, mind; ἄλγος, pain] Melancholia; psychalgia.

Phrenasthenia (*fren-as-the'-ne-ah*) [φρήν, diaphragm or mind; ἀσθένεια, weakness]. Paresis of the diaphragm. Also congenital mental weakness.

Phrenatrophia (*fren-at-ro'-fe-ah*) [φρήν, mind; ἀτροφία, atrophy]. Atrophy of the brain; idiocy.

Phrenesiac (*fren-e'-ze-ak*) [φρήν, mind]. One who is affected with phrenesis; an insane person.

Phrenesis (*fren-e'-sis*) [φρένησις, insanity; φρήν, mind]. Frenzy; delirium; insanity.

Phrenetic (*fren-et'-ik*) [φρήν, mind]. Maniacal; delirious.

Phreniatric (*fren-e-at'-rik*) [φρήν, mind; ἰατρικός, therapeutic]. Relating to the curing of mental disorders.

Phrenic (*fren'-ik*) [φρήν, diaphragm; mind]. 1. Pertaining to the diaphragm. 2. Pertaining to the mind. 3. A mental disease; or a remedy for mental disease. **P. Artery.** See *Arteries, Table of*. **P. Nerve.** See *Nerves, Table of*.

Phrenicocolic (*fren-ik-o-kol'-ik*). Same as *Phrenocolic*.

Phrenicogastric (*fren-ik-o-gas'-trik*). Same as *Phrenogastric*.

Phrenicosplenic (*fren-ik-o-splen'-ik*). Same as *Phrenosplenic*.

Phrenicula (*fren-ik'-u-lah*) [φρήν, mind]. Brain-fever.

Phrenismus (*fren-iz'-mus*). Synonym of *Encephalitis*.

Phrenitic (*fren-it'-ik*) [φρήν, mind, diaphragm; ῖτις, inflammation]. Pertaining to, or affected with phrenitis.

Phrenitis (*fren-i'-tis*) [φρήν, mind, diaphragm; ῖτις, inflammation]. 1. Acute delirium; inflammation of the brain, or its meninges. 2. Inflammation of the diaphragm. **P. aphrodisiaca**, erotomania. **P. calentura**, insolation. **P. potatorum**, delirium tremens. **P. mania gravis.** See *Periencephalitis*. **P. typhodes.** Synonym of *Fever, Cerebro-spinal*.

Phrenoblabia (*fren-o-bla'-be-ah*) [φρήν, mind; βλάβη, hurt]. Any disorder of the mind.

Phrenocolic (*fren-o-kol'-ik*) [φρήν, diaphragm; κῶλον, colon]. Pertaining to the diaphragm and the colon.

Phrenocostal (*fren-o-kos'-tal*) [φρήν, midriff; *costa*, rib]. Pertaining to the diaphragm and the ribs.

Phrenogastric (*fren-o-gas'-trik*) [φρήν, diaphragm; γαστήρ, stomach]. Pertaining conjointly to the stomach and the diaphragm.

Phrenoglottismus (*fren-o-glot-iz'-mus*) [φρήν, diaphragm; γλῶττα, tongue]. Spasm of the glottis ascribed to disease of the diaphragm.

Phrenograph (*fren'-o-graf*) [φρήν, diaphragm; γράφειν, to record]. An instrument for registering the movements of the diaphragm.

Phrenography (*fren-og'-ra-fe*). Synonym of *Psychography*.

Phrenoin (*fren'-o-in*). Synonym of *Phrenosin*.

Phrenolepsia (*fren-o-lep'-se-ah*) [φρήν, mind; λῆψις, seizure]. Insanity.

Phrenologic (*fren-o-loj'-ik*) [φρήν, mind; λόγος, science]. Pertaining to phrenology.

Phrenologist (*fren-ol'-o-jist*) [φρήν, mind; λόγος, science]. One versed in phrenology.

Phrenology (*fren-ol'-o-je*) [φρήν, mind; λόγος, science]. The theory that the various faculties of the mind occupy distinct and separate areas in the brain-cortex, and that the predominance of certain faculties can be predicated from modifications of the parts of the skull overlying the areas where these faculties are located.

Phreno-magnetism (*fren-o-mag'-net-izm*) [φρήν, mind; μαγνήτης, magnet]. Excitement of the organs of the brain by mesmeric passes.

Phreno-mesmerism (*fren-o-mez'-mer-izm*). Synonym of *Phreno-magnetism*.

Phrenonarcosis (*fren-o-nar-ko'-sis*) [φρήν, mind; νάρκωσις, stupor]. A dulling of the intellect.

Phrenopath (*fren'-o-path*) [φρήν, mind; πάθος, disease]. One who devotes himself to phrenopathy; an alienist.

Phrenopathic (*fren-o-path'-ik*) [φρήν, mind; πάθος, disease]. Pertaining to phrenopathy.

Phrenopathy (*fren-op'-ath-e*) [φρήν, mind; πάθος, disease]. Mental disease; psychopathy.

Phrenoplegia (*fren-o-ple'-je-ah*) [φρήν, mind; πληγή, stroke]. A sudden failure of mental power.

Phrenoplexia (*fren-o-pleks'-e-ah*) [φρήν, mind; πλῆξις, stroke]. Guislain's name for ecstasy, the patient being motionless, the muscles tense, and the physiognomy expressive of strong emotion.

Phrenosin (*fren'-o-zin*) [φρήν, mind], $C_{34}H_{67}NO_8$; a nitrogenous substance, one of the cerebrins, obtained from brain-substance.

Phrenosis (*fren-o'-sis*). Synonym of *Phrenopathy*.

Phrenosplenic (*fren-o-splen'-ik*) [φρήν, diaphragm; σπλήν, spleen]. Pertaining to the diaphragm and the spleen.

Phrenotherapy (*fren-o-ther'-ap-e*) [φρήν, mind; θεραπεία, therapy]. Guislain's term for *psychiatry*.

Phrensic (*fren'-zik*). Same as *Phrenetic*.

Phrensy (*fren'-ze*) [φρήν, mind]. Insanity, mania, frenzy.

Phricasmus (*frik-az'-mus*) [φρίκη, shivering]. Gooseskin.

Phriciasis (*frik-i'-as-is*). Synonym of *Phricasmus*.

Phricogen (*frik'-o-jen*) [φρίκη, shivering; γεννᾶν, to produce]. A hypothetic principle of cold.

Phronemophobia (*fron-e-mo-fo'-be-ah*) [φρόνημα, a thought; φόβος, fear]. Morbid dread of thinking.

Phronesis (*fron-e'-sis*) [φρόνησις; φρονεῖν, to think]. Soundness of mind, or of judgment.

Phrynin (*frin'-in*). See *Bufidin*.

Phthalate (*thal'-āt*). Any salt of phthalic acid. **P. of Morphin**, used by subcutaneous injection. Dose, gr. ½ in 2 per cent. solution.

Phthaleïns (*thal'-e-inz*). The derivatives of phthalin, containing two phenol residues. They are dyes of great technical value, and are generally colorless, crystalline bodies.

Phthalic Acid (*thal'-ik*). See *Acid*.

Phthalin (*thal'-in*). A colorless body produced by the reduction of phthaleïn by means of nascent hydrogen.

Phthaluric Acid (*thal-u'-rik*), $C_{10}H_7NO_4$. A colorless crystalline substance, fusible at 192° C.

Phtharma (*thar'-mah*) [φθείρειν, to corrupt]. A morbid alteration of structure.

Phtharsis (*thar'-sis*) [φθάρσις, corruption]. Decomposition.

Phtheiræmia (*thi-re'-me-ah*). Synonym of *Phthiremia*.

Phtheiriasic (*thi-ri-az'-ik*). Synonym of *Phthiriasic*.

Phthinodes (*thi-no'-dēz*) [φθίνειν, to waste; εἶδος, like]. Hectic; phthisical or tuberculous.

Phthinoplasm (*thi'-no-plazm*) [φθίνειν, to waste; πλάσμα, plasm]. Degraded bioplasm; a proposed name for the irritant material that causes degeneration of the lung-tissue, as opposed to that caused by tubercle.

Phthiremia (*thi-re'-me-ah*) [φθείρειν, to corrupt; αἷμα, blood]. A depraved state of the blood, with diminished plasticity.

Phthiriasic (*thi-ri-as'-ik*) [φθείρ, louse]. Produced by lice.

Phthiriasis (*thi-ri'-as-is*) [φθείρ, louse]. Lousy disease; morbus pediculosus. See *Pediculosis*.

Phthirius (*thi'-re-us*) [φθείρ, a louse]. A genus of *Pediculidæ* or true lice. See *Parasites* (*Animal*), *Table of*.

Phthisic (*tiz'-ik*) [φθισικός, consumptive]. 1. Consumptive or tuberculous; affected with phthisis or tuberculosis. 2. A popular name for asthma.

Phthisical (*tiz'-ik-al*) [φθίσις, a wasting]. 1. Pertaining to or affected with phthisis or tuberculosis. 2. Popularly, same as *Asthmatic*. **P. Frame, P. Habit**, a long, narrow, flat chest, with depressed sternum, acute costal angle, a fair, transparent skin, light complexion, blue eyes, winged scapulæ, slender limbs. As to internal organs, the heart is relatively small, the arteries narrow, the pulmonary artery relatively wider than the aorta, and the lung-volume rather large.

Phthisiogenesis (*tiz-e-o-jen'-es-is*) [φθίσις, wasting; γένεσις, genesis]. The production of phthisis or wasting.

Phthisiology (*tiz-e-ol'-o-je*) [φθίσις, a wasting; λόγος, science]. The study or science of phthisis or tuberculosis; its causes, pathology, hygiene, and therapeutics.

Phthisiophobia (*tiz-e-o-fo'-be-ah*) [φθίσις, phthisis; φόβος, dread]. Morbid dread of pulmonary consumption or tuberculosis.

Phthisipneumonia (*thiz-ip-nu-mo'-ne-ah*) [φθίσις, phthisis; πνεύμων, lungs]. Phthisis or pulmonary tuberculosis.

Phthisis (*thi'-sis, ti'-sis* or *te'-sis*) [φθίσις, φθίνειν, to waste]. Formerly any dyscrasia producing emaciation and death; a wasting or consumption. The term has been restricted to designate all pulmonary lesions followed by disorganization of lung-tissue, the formation of cavities, loss of function of the lungs, loss of health, and death. It is usually tuberculous in nature, due to the action of a specific vegetable microörganism, the bacillus of tuberculosis. The onset of phthisis is usually very insidious, with gradual loss of strength and flesh, and with cough and expectoration and loss of appetite; it may commence with a bronchitic attack or with one or more attacks of pleurisy; very rarely it follows an acute croupous pneumonia. The

most important symptoms of the fully-developed disease are cough, at first hacking, later loud, hollow, and paroxysmal; expectoration, frothy and viscid at first, later profuse, purulent, and nummular; fever of hectic type; emaciation often very rapid, hemoptysis, dyspnea, pain, night-sweats, anorexia, and digestive disorders. The physical signs are flattening and retraction of the supra-clavicular and infra-clavicular regions, restricted movement of these regions, dulness on percussion over one or both apices extending to other parts of the lungs, altered rhythm of the respiratory sounds, adventitious sounds on auscultation, such as the presence of râles of various kinds according to the progress of the disease. The duration of the disease varies from the rapidly fatal, in which death may occur in a few weeks, to the very chronic, lasting for years. The pathology usually consists in a deposit of tuberculous nodules, especially in and around the walls of the smallest bronchi; these nodules coalesce and eventually undergo caseation and softening. More rarely a fibrous change takes place, with the production of the more chronic form of the disease, *fibroid phthisis*. Phthisis may occur at any age, and especially attacks those in whom there is an inherited predisposition or those who have been weakened by previous disease, poor food, poor hygienic surroundings, frequent pregnancies and prolonged lactation or the inhalation of poisonous vapors or irritating particles. Those in whom there is a strong family history of phthisis generally develop the disease before the twenty-fifth year. It may occur in those of middle age, however, or in old age. The usual seat for the primary lesion is in one of the apices, the right a little more frequently than the left. After one apex has been attacked, the disease usually extends, first to the apex of the lower lobe of the same side, then to the other apex. The base is rarely primarily affected. **P., Abdominal.** See *Tabes mesenterica*. **P., Acute.** See *P., Acute Pneumonic*. **P., Acute Pneumonic,** a variety that occurs in two forms: (*a*) the *pneumonic* or *lobar* and (*b*) the *broncho-pneumonic* or *lobular*. In the former (*a*), a lobe or an entire lung may be converted into a dry, opaque, white or yellowish-white, cheesy substance, in which tubercles are scattered here and there. Very often there exists a cavity at the apex. The bronchial glands may be tuberculous. The cases usually begin with a chill and for a time run a course like that of croupous pneumonia. The crisis, however, does not occur; the fever becomes irregular, the sputum mucopurulent, soon presenting tubercle-bacilli and elastic tissue. Death may occur in a few weeks or in two or three months. (*b*) *Acute tuberculous broncho-pneumonia* is most common in children and forms most cases of so-called *phthisis florida*. The smaller bronchi and air-cells become filled with a caseous material, constituting small grayish-white areas. These may coalesce and produce a lobar caseous broncho-pneumonia; but usually some unaffected tissue can be seen among the caseous areas. The symptoms of the disease are similar to those of catarrhal pneumonia; the temperature, however, is high; there is rapid loss of flesh and strength; evidences of softening become manifest; tubercle-bacilli appear in the sputum. Death may occur within three weeks or the disease may lead to chronic phthisis. In children the disease commonly follows one of the infectious fevers, particularly measles and whooping-cough. **P., Amphiblestroid,** atrophy of the retina. **P., Bacillary,** phthisis due to a bacillus. **P., Basic,** phthisis affecting primarily the base of the lung. **P., Black,** anthracosis. **P., Bronchial,** tuberculosis of the bronchial glands. **P. bulbi,** progressive shrinkage and atrophy of the eyeball. **P. calculosa,** pulmonary tuberculosis in which the exudates in the smallest lobules become infiltrated with lime. **P., Cerebral,** tuberculosis of the brain or its membranes. **P., Chronic,** phthisis running a slow course. **P. combinata.** Synonym of *P., Acute Pneumonic*. **P., Diabetic,** pulmonary tuberculosis in a diabetic patient, manifesting itself as a caseous broncho-pneumonia. **P., Embolic,** degeneration of areas in the lung, the seat of emboli from other organs. **P. enterica,** tuberculosis of the intestines. **P., Fibroid, P., Fibrous;** 1. Interstitial pneumonia. 2. Chronic tuberculosis of the lungs attended with the formation of fibrous tissue, which contracts, causes shrinking of the affected lobe, and sometimes bronchiectasis by eccentric traction on the bronchi. The pleura is usually very much thickened and the layers may adhere so tightly that it is impossible to separate them. **P., Flax-dressers',** tabacosis occurring in flax-dressers. **P. florida,** acute phthisis speedily fatal—also known as galloping consumption. **P., Galloping.** Synonym of *P. florida*. **P., Glandular,** tuberculosis of lymphatic glands. **P., Gouty,** a chronic inflammation of the bronchial tubes supposed to be due to gout. **P., Granular.** Synonym of *Tuberculosis, Acute Miliary*. **P., Grinders'.** See *Grinders' Asthma*. **P. ab hæmaptoē,** pulmonary tuberculosis apparently following hemorrhage from the lungs. It is not now believed that pulmonary hemorrhage can be the starting-point of tuberculosis, but it is looked upon rather as a possible very early sign, or as accidental and having no connection with the tuberculosis subsequently developed. **P., Hemorrhagic,** pulmonary tuberculosis in which extravasated blood is believed to have undergone caseous degeneration. Its existence is questionable. **P., Hepatic,** tuberculosis of the liver; formerly, also the term meant abscess of the liver. **P. ex inanitione,** phthisis depending on inanition. **P. intestinalis.** Synonym of *P. enterica*. **P., Knife-grinders'.** Synonym of *P., Grinders'*. **P. laryngea.** Synonym of *Tuberculosis, Laryngeal*. **P., Latent.** Synonym of *Tuberculosis, Latent*. **P. lienalis,** tuberculosis of the spleen; also splenic abscess. **P. mammæ,** disorganization of the mammary gland from suppuration. **P. medullæ spinalis.** Synonym of *Tabes dorsalis*. **P. mesaraica, P. mesenterica.** Synonym of *Tabes mesenterica*. **P., Miners'.** See *Miners' Phthisis*. **P., Mucous.** Synonym of *Tuberculosis, Miliary*. **P., Neurotic,** phthisis occurring in the course of neurasthenia. **P., Neuro-vascular,** phthisis associated with neuro vascular disease. **P. nodosa,** miliary tuberculosis of the lungs. **P., Non-bacillary,** pulmonary destruction not due to bacilli. Miners' phthisis and grinders' phthisis are due to fibroid changes in the lung induced by the irritation of the dust inhaled. Ulcerative phthisis is probably always bacillary. **P. oculi,** atrophy of the eye. **P. pancreatica,** marked emaciation and general cachexia from disease of the pancreas. **P. pharyngea,** tuberculosis of the pharynx. **P., Phlegmatic,** phthisis occurring in persons who in the earlier stages do not present emaciation. **P. pituitosa.** Synonym of *P., Mucous*. **P. prostatica.** tuberculosis of the prostate gland. **P. psoasum.** psoas abscess due to tuberculous infection. **P. pulmonalis,** pulmonary tuberculosis. **P., Pulmonary.** See *Phthisis*. **P. pulmonum.** Synonym of *P., Pulmonary*. **P. renalis,** tuberculosis of the kidneys. **P., Rheumatic,** phthisis said to be dependent upon a rheumatic diathesis. **P., Senile,** pulmonary tuberculosis in the aged. **P., Specific,** breaking down of the lungs due to the bacillus of tuberculosis. **P.**

splenica. Synonym of *P. lienalis.* **P., Stone-masons'.** See *Grinders' Asthma.* **P., Syphilitic,** syphilis of the lung is quite rare. See *Syphilis of the Lung.* **P. of teeth,** a condition of the teeth characterized by especial clearness and transparency, with frailness of structure, caries being favored by constitutional weakness. **P. testis,** tuberculosis of the testicle. **P. trachealis,** tuberculosis of the trachea. **P., Traumatic,** pulmonary tuberculosis developing in a lung, shortly after a chest-injury without any external wound. **P., Tuberculous,** phthisis due to the bacillus of tuberculosis. **P. ventriculi,** atrophy of the mucous membrane and thinning of the coats of the stomach, with retention or even increase of the size of the organ.

Phthisuria (*tiz-u'-re-ah*) [φθίσις, wasting; οὖρον, urine]. A wasting state resembling that caused by pulmonary tuberculosis, but due to renal disease.

Phthoë (*tho'-e*). Synonym of *Phthisis.*

Phthoicus (*tho'-ik-us*). Synonym of *Phthisical.*

Phthois (*tho'-is*) [φθόις, a pill]. Bolus, pill.

Phthongodysphoria (*thong-go-dis-fo'-re-ah*) [φθόγγος, sound; δυσφορία, annoyance]. Morbid sensitiveness to sounds.

Phthongometer (*thong-gom'-et-er*) [φθόγγος, voice; μέτρον, measure]. An instrument used for measuring vocal sounds.

Phthora (*tho'-rah*) [φθορά, decomposition]. 1. Corruption. 2. Synonym of the *Plague.* 3. Abortion.

Phthoric (*thor'-ik*) [φθορά, decomposition]. Causing decomposition. **P. Acid.** Synonym of *Hydrofluoric Acid.* See *Acid.*

Phthoroctonos (*thor-ok'-to-nos*) [φθορά, decomposition; κτείνειν, to kill]. Feticide.

Phulluah (*ful'-u-ah*) [E. Ind.]. An oleaginous substance obtained from a wild East Indian plant. It is largely used by the hill-tribes for the cure of frost-bite and chilblains, and has been used with benefit in rheumatism, sprains, sciatica, etc. Unof.

Phycinic Acid (*fi-sin'-ik*) [φῦκος, seaweed]. The name given by Lamy to the crystalline acid found by him in the Alga *Protococcus vulgaris.* It occurs as white, opaque, tasteless, odorless needles, melting at 136° C.; insoluble in water, but soluble in alcohol, ether and oils. It forms crystalline salts with alkalies. Its silver salt is white and insoluble. Analysis gives C, 70.22 per cent.; H, 11.76 per cent.; N, 3.72 per cent.; O, 14.30 per cent.

Phycit (*fi'-sit*) [φῦκος, seaweed], $C_{12}H_{30}O_{12}$. A substance found by Lamy along with phycinic acid in the alga *Protococcus vulgaris.* Wagner suspects its identity with *Erythrit* or *Erythroglucin,* and Lamy's later investigations confirm this view. It crystallizes in colorless, right-angled prisms, has a sweet, fresh taste, and neutral reaction. It melts at 120° C. Cf. *Erythrol.*

Phycochrome (*fi'-ko-krōm*) [φῦκος, seaweed; χρῶμα, color]. In biology, the complex blue-green pigment that masks the pure green of the chlorophyl in certain *Algæ* (*Cyanophyceæ*). It is composed of phycocyanin, scytonemin, etc.

Phycocyanin (*fi-ko-si'-an-in*) [φῦκος, seaweed; κυανός, blue]. In biology, a beautiful blue pigment, characteristic of the *Cyanophyceæ* among *Algæ.*

Phycocystitis (*fi-ko-sis-ti'-tis*). Synonym of *Capsulitis.*

Phycoerythrin (*fi-ko-er'-ith-rin*) [φῦκος, seaweed; ἐρυθρός, red]. In biology, the name given by Kützing, Askenay, Sorby and Schütt to the red portion of the compound pigment of the red *Algæ* (*Florideæ*), which is soluble in water. Kramer, who first described it, called it *rhodospermin.* The entire pigment is called by Schütt *rhodophyl* and the part soluble in alcohol, *Florideæ green.*

Phycography (*fi-kog'-ra-fe*) [φῦκος, seaweed; γράφειν, to write]. A description of *Algæ.*

Phycohematin (*fi-ko-hem'-at-in*) [φῦκος, seaweed; αἱμάτινος, of blood, bloody]. In biology, the name given by Kützing to the peculiar blood-red pigment obtained from the marine alga *Rytiplæa tinctoria.* It is precipitated in flakes by alcohol from the cold watery solution which has been evaporated to a syrupy consistency.

Phycologist (*fi-kol'-o-jist*) [φῦκος, seaweed; λόγος, science]. One versed in phycology.

Phycology (*fi-kol'-o-je*) [φῦκος, seaweed; λόγος, science]. The botany of the *Algæ* or seaweeds.

Phycomater (*fi-ko-ma'-ter*) [φῦκος, seaweed; μήτηρ, mother]. The gelatinous substance surrounding the sporules of *Algæ.*

Phycomyces (*fi-kom'-is-ēz*) [φῦκος, seaweed; μύκης, fungus]. A genus of *Mucorini.*

Phycophæin (*fi-ko'-fe-in*) [φῦκος, seaweed; φαιός, dusky, dun]. In biology, that reddish-brown pigment, soluble in water, which forms part of the coloring-matter (*phæophyl*) of the *Fucaceæ* and *Phæosporeæ* among *Algæ.* Cf. *Phycoxanthin, Fucoxanthin.*

Phycoxanthin (*fi-koks-an'-thin*) [φῦκος, seaweed; ξανθός, yellow]. In biology, the yellow coloring-matter, soluble in alcohol, forming part of the compound pigment (*phæophyl; diatomin*) of certain *Algæ* (*Fucaceæ, Phæosporeæ, Diatomaceæ*).

Phyganthropia (*fi-gan-thro'-pe-ah*) [φυγή, flight; ἄνθρωπος, men]. Morbid dread of human society.

Phygantrus (*fi-gan'-trus*) [φείγειν, to flee; ἄντρον, cave]. Lissauer's term for a skull in which the distance between the perpendicular drawn from the most prominent point of the torus frontalis to the radius fixus, and that from the nasion to the same line is between 6 and 12 mm.

Phygedema (*fi-ge-de'-mah*) [φείγειν, to flee; οἴδημα, edema]. Transient edema.

Phygethlon (*fi-geth'-lon*) [φύγεθλον, a glandular swelling]. An inflammatory nodule of the skin.

Phygogalactic (*fi-go-gal-ak'-tik*) [φυγεῖν, to avoid; γάλα, milk]. 1. Stopping the secretion of milk. 2. An agent that checks the secretion of milk.

Phygometopus (*fi-go-met-o'-pus*) [φείγειν, to flee; μέτωπον, forehead]. Lissauer's term for a skull in which the angle between the radius fixus and the line joining the bregma and the nasal point is between 8° and 33.5°.

Phygopisthius (*fi-go-pis'-the-us*) [φείγειν, to flee; ὄπισθε, behind]. Lissauer's term for a skull in which the angle formed between the radius fixus and the line joining the lambda and the inion is between 106° and 127°.

Phygoprosopus (*fi-go-pros'-o-pus*) [φείγειν, to flee; πρόσωπον, face]. Lissauer's term for a skull in which the angle formed between the radius fixus and the line joining the nasion and the alveolar point is between 38° and 66.5°.

Phygorrhinus (*fi-gor-i'-nus*) [φείγειν, to flee; ῥίς, nose]. Lissauer's term for a skull in which the angle formed between the radius fixus and the line joining the nasion and the subnasal point is between 36° and 66.5°.

Phylacterion (*fi-lak-te'-re-on*) [φύλαξ, guard]. The same as *Phylactery.*

Phylactery (*fi-lak'-ter-e*) [φύλαξ, guard]. A charm or amulet.

Phylaxin (*fi-laks'-in*) [φύλαξ, a guardian, protector]. In biology, the name given by Hankin to an antitoxin or defensive proteid—called *alexin* by Buchner—found in animals that have acquired an artificial immunity to a given infectious disease; as distinguished

from a *sozin*, *i. e.*, a defensive proteid that occurs naturally in normal animals. Hankin recognizes two forms of phylaxin: (1) a *Mycophylaxin*, or defensive proteid produced in the body of an animal which has an acquired immunity to a given infectious disease, which has the power of *destroying the pathogenic bacteria* to which the disease is due; (2) a *Toxophylaxin*, or defensive proteid produced in the body of an animal which has an acquired immunity to a given infectious disease, which has the power of *destroying the toxic products of the pathogenic bacteria* to which the disease is due. (Sternberg.)

Phyletic (*fi-let'-ik*) [φυλή, a tribe]. In biology, phylogenic; relating to the tribal or ancestral history of an organism.

Phyllæscitannin (*fil-es-it-an'-in*) [φύλλον, leaf; *æsculus*, the genus of trees of which the horse-chestnut is a species; *tannin*, tannin], $C_{26}H_{24}O_{13}H_2O$. A tannin found by Rochleder in the young leaves of the leaf-buds of the horse-chestnut.

Phyllanthus (*fil-an'-thus*) [φύλλον, leaf; ἄνθος, flower]. A genus of euphorbiaceous plants of some 450 species. **P. emblica** affords the so-called emblic myrobalans. (See *Myrobalan.*) **P. niruri** and **P. urinaria** are strongly diuretic. Unof.

Phyllary (*fil'-ar-e*) [φυλλάριον, a leaflet: *pl.*, *Phyllaries*]. In biology, a leaflet of the involucre of a composite flower-head.

Phyllerythrin (*fil-er'-ith-rin*) [φύλλον, leaf; ἐρυθρός, red]. The red coloring-matter of plants, especially that of the leaves in autumn. See *Erythrophyl.*

Phyllidium (*fil-id'-e-um*) [φύλλον, leaf; dim. suffix–ίδιον: *pl.*, *Phyllidia*]. In biology, a rudimentary ctenidium, as of a limpet; a capito-pedal body.

Phylline (*fil'-in*) [φύλλον, leaf]. Leaf-like; partaking of the characteristics of a leaf.

Phyllobranchia (*fil-o-brang'-ke-ah*) [φύλλον, a leaf; βράγχια, branchia, gill]. In biology, a gill in which the folia are arranged in rows upon a stem, as in crabs.

Phyllocladе (*fil'-o-klād*). Same as *Phyllocladium.*

Phyllocladium (*fil-o-kla'-de-um*) [φύλλον, leaf; κλάδος, branch: *pl.*, *Phyllocladia*]. In biology, a leaf-like branch, as in the *Cactaceæ*, *Ruscus*, or *Psilotum.*

Phyllocyanic Acid (*fil-o-si-an'-ik*). Same as *Phyllocyanin.*

Phyllocyanin (*fil-o-si'-an-in*) [φύλλον, a leaf; κύανος, blue]. The bright-blue pigment of flowers, obtained from chlorophyl by the action of alkalies and of alkaline earths.

Phyllocyst (*fil'-o-sist*) [φύλλον, leaf; κύστις, bladder]. In biology, the cavity of a hydrophyllium.

Phyllode (*fil'-ōd*). Same as *Phyllodium.*

Phyllodium (*fil-o'-de-um*) [φύλλον, leaf; εἶδος, form: *pl.*, *Phyllodia*]. In biology, a dilated or flattened petiole taking on the character of a blade.

Phyllodoce (*fil-od'-o-se*) [L., a sea-nymph]. 1. A genus of oceanic hydrozoans. 2. A genus of polychetous annelids. **P.-green**, a green pigment found in *Phyllodoce viridis*, not referable to any class of animal pigments, and not chlorophyl. See *Pigments*, *Conspectus of.*

Phyllody (*fil'-o-de*) [φυλλώδης, like leaves]. In biology, the reversion of floral organs to leaves; frondescence; phyllomorphy.

Phyllogen (*fil'-o-jen*) [φύλλον, leaf; γενής, producing]. Same as *Phyllophore.*

Phyllogenous (*fil-oj'-en-us*) [φύλλον, leaf; γενής, producing]. Growing upon leaves.

Phylloid (*fil'-oid*) [φύλλον, leaf; εἶδος, form]. In biology, leaf-like.

Phyllomania (*fil-o-ma'-ne-ah*) [φύλλον, leaf; μανία, madness]. In biology, an abnormal condition, as to the abundance or position of leaves. Cf. *Pleiophylly.*

Phyllome (*fil'-ōm*) [φύλλον, leaf]. In biology, any organ that may be regarded morphologically as a leaf.

Phyllomic (*fil-om'-ik*) [φύλλον, leaf]. In biology, of the nature of or resembling a phyllome.

Phyllomorphy (*fil'-o-mor-fe*) [φύλλον, leaf; μορφή, form]. Same as *Phyllody*; also *Phyllomorphosis.*

Phyllophagous (*fil-off'-ag-us*) [φύλλον, a leaf; φαγεῖν, to eat]. In biology, feeding on leaves.

Phyllophore (*fil'-o-for*) [φύλλον, leaf; φορεῖν, to bear]. In biology, any leaf-bearing organ, especially the budding summit of a stem, as the palm.

Phyllophorous (*fil-off'-o-rus*) [φύλλον, leaf; φέρειν, to bear]. In biology, producing leaves, or leaf-like or foliaceous parts or organs.

Phyllopode (*fil'-o-pōd*) [φύλλον, leaf; πούς, foot]. In biology, the dilated sheathing base of the frond of certain plants (*Isaëtes*).

Phyllopodiform (*fil-o-pod'-if-orm*) [φύλλον, leaf; πούς, foot; *forma*, form]. In biology, resembling a phyllode.

Phylloptosis (*fil-op-to'-sis*) [φύλλον, leaf; πτῶσις, a falling]. In biology, the fall of the leaf.

Phyllosteophyte (*fil-os'-te-o-fīt*) [φύλλον, leaf; ὀστέον, bone; φυτόν, plant]. A flat or laminated osteophyte.

Phyllostomatous (*fil-o-sto'-mat-us*) [φύλλον, a leaf; στόμα, mouth]. Leaf-nosed, as a bat.

Phyllotactic (*fil-o-tak'-tik*) [φύλλον, leaf; τάξις, order]. In biology, pertaining to phyllotaxis.

Phyllotaonin (*fil-o-ta'-o-nin*) [φύλλον, leaf]. A crystalline product obtained by the decomposition of chlorophyl.

Phyllotaxis (*fil-o-taks'-is*) [φύλλον, leaf; τάξις, order; τάσσειν, to arrange]. In biology, the order of arrangement of the leaves upon the stem.

Phyllotaxy (*fil'-o-taks-e*). Same as *Phyllotaxis.*

Phylloxanthin (*fil-oks-an'-thin*) [φύλλον, leaf; ξανθός, yellow]. The yellow pigment associated with phyllocyanin in chlorophyl.

Phylloxera (*fil-oks-e'-rah*) [φύλλον, leaf; ξηρός, dry]. A genus of plant-lice (*Aphididæ*), nearly all the species of which are natives of North America. The *grape-vine phylloxera* or *vine-pest* (*Phylloxera vastatrix*, Planchon) has caused great damage to all varieties of grapes. **P.-mite**, an acaridan (*Rhizoglyphus phylloxeræ*) frequently found in association with the *Phylloxera* of the vine, feeding, in its young state, on the juices of roots injured by the *phylloxera*, and, when older—according to Riley and Planchon—preying on the root-inhabiting type of that insect. This is denied by Foumouse and others.

Phylloxerize (*fil-oks'-er-īz*) [φύλλον, leaf; ξηρός, dry]. To contaminate or infest with *Phylloxeræ.*

Phyllula (*fil'-u-lah*) [diminutive of φύλλον, a leaf]. In biology, the stage in the embryo of vascular plants at which the first leaf and root have appeared. (T. J. Parker.)

Phylogenesis (*fi-lo-jen'-es-is*) [φῦλον, φυλή, race, tribe; γένεσις, origin]. Same as *Phylogeny.*

Phylogenetic (*fi-lo-jen-et'-ik*) [φῦλον, tribe; γένεσις, birth]. Pertaining to phylogeny.

Phylogenic (*fi-lo-jen'-ik*) [φῦλον, tribe; γενής, producing]. Pertaining to phylogeny.

Phylogeny (*fi-loj'-en-e*) [φῦλον, φυλή, a tribe; γενής, producing]. In biology, the evolution of the phylum, race, group, or species; paleontologic evolution, as distinguished from *ontology* or individual evolution. According to Weismann's theory each phyletic variation is due to a variation in the structure of the "*id*" of germ-plasm.

Phylogony (*fi-log'-on-e*) [φῦλον, tribe; γονή, offspring].

The branch of embryology dealing with the origin of species by evolution.

Phylum (*fi'-lum*) [οὖλον, οὐλή, a tribe: *pl.*, *Phyla*]. In biology, a primary division of the animal or vegetable kingdom.

Phyma (*fi'-mah*) [φῦμα, a growth: *pl.*, *Phymata*]. A circumscribed suppurative swelling of the skin. The word was formerly also used to designate any one of a class of diseases including erysipelas, edema, emphysema, scirrhus, etc. Also, a genus of diseases including hordeolum, sycosis, and anthrax. The term now denotes a localized plastic exudate larger than a tubercle.

Phymacerite (*fi-mas'-er-it*) [φῦμα, a tumor; κέρας, horn]. In biology, the tubercle at the base of the second antenna, containing the external orifice of the green gland in *Crustacea*. (Bate.)

Phymatoid (*fi'-mat-oid*) [φῦμα, growth; εἶδος, like]. Resembling a phyma or tubercle; a term describing a condition of carcinomatous growth distinguished by a dull-yellow color and a consistence resembling that of tubercle.

Phymatorhusin (*fi-mat-or-u'-sin*) [φῦμα, growth]. A pigment found by Nencki in the metastatic deposits of a melanotic sarcoma of the skin. It contains sulphur, is insoluble in alcohol, in water, and in ether, but dissolves readily in ammonia, and in alkaline carbonates. It is free from iron.

Phymatosis (*fi-mat-o'-sis*) [φῦμα, tubercle; νόσος, disease: *pl.*, *Phymatoses*]. Any tuberculous or scrofulous disease.

Phymocnidosis (*fi-mok-nid-o'-sis*). Synonym of *Erythema nodosum*.

Phymolepra (*fi-mo-lep'-rah*). Synonym of *Leprosy*, *Tuberculous*.

Phymosis (*fi-mo'-sis*). Synonym of *Phimosis*.

Phypella (*fi-pel'-ah*) [φῦμα, growth; πέλλα, skin]. An old name for boil.

Phyraliphore (*fi-ral'-if-or*). One of certain cells containing vesicles or cavities called by Virchow *Physalides*, and supposed to take part in endogenous cell-formation (Von Korsinsky). See *Physalis*.

Physa (*fi'-sah*) [φῦσα, air]. Bulla or pustule.

Physagogue (*fis'-ag-og*) [φῦσα, wind; ἀγωγός, leading]. 1. Carminative. 2. An agent that expels flatus.

Physalide (*fis'-al-id*) [φυσαλλίς, bladder]. The vesicular tuft of the chorion as seen in the vesicular mole. Synonym of *Physalis*.

Physalidocnidosis (*fis-al-id-ok-nid-o'-sis*). Synonym of *Urticaria bullosa*.

Physalin (*fis'-al-in*) [φυσαλλίς, a bladder], $C_{14}H_{16}O_5$. A non-nitrogenous body found in 1852 by Dessaigues and Chautard in *Physalis alkekengi*; it has been used in place of quinin.

Physalis (*fis'-al-is*) [φυσαλλίς, a bladder]. A genus of solanaceous herbs, mostly American. **P. alkekengi**, the strawberry tomato, Jerusalem cherry, or Judenkirsche of Europe, and **P. viscosa**, of N. America, are diuretic. Unof.

Physalis (*fis'-al-is*) [φυσαλλίς, bladder: *pl.*, *Physalides*]. A name given by Virchow to the large giant epithelial cell of giant-cell carcinoma.

Physasthma (*fis-ast'-mah*) [φῦσα, wind; ἄσθμα, asthma]. Asthma due to, or complicated with, emphysema.

Physconia (*fis-ko'-ne-ah*) [φύσκων, paunch]. Any abdominal enlargement, especially from tympanites. **P. adiposa**, corpulency. **P. aquosa**, ascites. **P. biliosa**, distention of the gall-bladder. **P. mesenterica**. Synonym of *Tabes mesenterica*.

Physechema (*fis-ek-e'-mah*). Synonym of *Sound*, *Bruit*.

Physechos (*fis-ek'-os*) [φυσᾶν, to blow; ἠχώ, sound]. Vesicular murmur.

Physema (*fi-se'-mah*) [φύσημα; φυσᾶν, to blow]. A bellows-like action of the lungs.

Physesis (*fi-se'-sis*). Synonym of *Physema*.

Physianthropy (*fiz-e-an'-thro-pe*) [φύσις, nature; ἄνθρωπος, man]. The study of the human constitution and of the diseases of man.

Physiatrics (*fiz-e-at'-riks*) [φύσις, nature; ἰατρεία, treatment]. The power of nature in curing disease: *vis medicatrix naturæ*.

Physiautocracy (*fiz-e-aw-tok'-ra-ce*) [φύσις, nature; αὐτός, self; κρατεῖν, to rule]. The power of nature.

Physiautotherapia (*fiz-e-aw-to-ther-a'-pe-ah*) [φύσις, nature; αὐτός, self; θεραπεύειν, to cure]. Strictly expectant treatment.

Physic (*fiz'-ik*) [φύσις, nature]. The science of medicine. Also, a medicine, especially a cathartic. Also, stannic tetrachlorid, a mordant used in dyeing. **P. Nut.** See *Barbadoes Nut*. **P.-root.** See *Leptandra*.

Physical (*fiz'-ik-al*) [φυσικός, physical]. Pertaining to nature or to physics. Also, pertaining to the body or material things, in contradistinction to the mind, or metaphysical things. **P. Diagnosis**, the investigation of disease by the direct aid of the senses, sight, touch, hearing. **P. Education**, the training of the body by means of gymnastics, etc. **P. Examination**, examination of the patient's body to determine the condition of the various organs and parts. **P. Signs**, the phenomena observed on inspection, palpation, percussion, auscultation, mensuration, or combinations of these methods, etc.

Physicalist (*fiz'-ik-al-ist*) [φύσις, nature]. One who maintains that the physical constitution dominates the intellectual and moral nature.

Physician (*fiz-ish'-an*) [φύσις, nature]. One who practices medicine. Formerly, a natural philosopher. **P.-ship**, the office of physician.

Physicist (*fiz'-is-ist*) [φῦσις, nature]. In biology, one who holds that vital phenomena are purely physical and chemic. One learned in the science of physics.

Physick's Encysted Rectum. A rare disease of advanced age consisting in an hypertrophy, and sometimes of an inflammation, of the natural rectal sacs, which become dilated also. It is attended with burning pain at the anus and adjacent parts and an increased mucous secretion. See *Diseases, Table of*. **P.'s Splint.** A long splint, a modification of Desault's splint for fracture of the femur.

Physico-chemic (*fiz'-ik-o-kem'-ik*) [φύσις, nature; χημεία, chemistry]. Being both physical and chemic.

Physicomental (*fiz'-ik-o-men'-tal*) [φύσις, nature; *mens*, mind]. Pertaining to physical and mental phenomena and their interdependence.

Physics (*fiz'-iks*) [φύσις, nature]. The science that treats of the properties of matter, and of the laws governing it in conditions of rest and motion, and in its fluid, solid, and gaseous states. **P., Chemic**, that branch of physics which is used by chemists to define substances. **P., Medical**, that part of physics having bearing upon medicine in any of its branches.

Physiogenesis (*fiz-e-o-jen'-es-is*). See *Physiogeny*.

Physiogenetic (*fiz-e-o-jen-et'-ik*). See *Physiogenic*.

Physiogenic (*fiz-e-o-jen'-ik*) [φύσις, nature; γεννᾶν, to beget]. Pertaining to physiogeny, or the development of functions.

Physiogeny (*fiz-e-oj'-en-e*) [φύσις, nature; γεννᾶν, to produce]. In biology, the science of the development, genesis, or evolution of functions.

Physiognomic (*fiz-e-og-nom'-ik*) [φύσις, nature; γνώμη, knowledge]. Pertaining to physiognomy.

Physiognomist (*fiz-e-og'-no-mist*) [φύσις, nature; γνώμη, knowledge]. One skilled in physiognomy.

Physiognomonic (*fiz-e-og-no-mon'-ik*). Same as *Physiognomic*.

Physiognomonics (*fiz-e-og-no-mon'-iks*) [φύσις, nature; γνώμη, knowledge]. The science of physiognomy.

Physiognomy (*fiz-e-og'-no-me*) [φύσις, nature; γνώμη, knowledge]. 1. The art of reading character by a study of the face. 2. The countenance itself.

Physiogony (*fiz-e-og'-o-ne*) [φύσις, nature; γονή, generation]. The production of nature.

Physiologic, Physiological (*fiz-e-o-loj'-ik, fiz-e-o-loj'-ik-al*) [φύσις, nature; λόγος, science]. Pertaining to physiology; pertaining to natural or normal processes, as opposed to those that are pathologic. **P. Antidote,** an antidote that neutralizes not by its chemic power, but through its effects on the system. **P. Excavation,** the funnel-shaped depression at the center of the optic papilla, at the bottom of which the retinal vessels enter; it varies in size and form, but always has sloping walls, which distinguish it from a pathologic excavation, exhibiting vertical or overhanging walls. **P. Selection.** See *Evolution*. **P. Units of Herbert Spencer,** in biology, hypothetic, complex, protean units, intermediate between chemic units and morphologic units or cells. They are supposed to possess a polarity or aptitude to aggregate in the form of the particular species of organism to which they belong, just as the molecules of a salt possess the intrinsic aptitude to crystallize in a particular way. The entire body is supposed to be composed of these units, making regeneration of lost parts possible, while the germ-cells are supposed to contain small groups of them, giving each germ-cell the power of reproducing the whole. The theory is one of epigenesis. See *id, idant, idioplasm, plasome, microsomata, heredity, epigenesis, pangenesis*, etc.

Physiologism (*fiz-e-ol'-o-jizm*) [φύσις, nature; λόγος, science]. The abuse of physiology.

Physiologist (*fiz-e-ol'-o-jist*) [φύσις, nature; λόγος, science]. One who is expert in physiology.

Physiology (*fiz-e-ol'-o-je*) [φύσις, nature; λόγος, science]. The science that treats of the functions of organic beings, as distinguished from *morphology, etiology*, etc. **P., Animal,** the physiology of animals. **P., Cellular,** the physiology of cells. **P., Comparative,** the comparative study of the physiology of different animals and of animals and plants. **P., Morbid,** the study of diseased functions or of functions modified by disease. **P., Pathogenetic, P., Pathologic,** pathology. **P., Special,** the physiology of special organs. **P., Vegetable,** the physiology of plants.

Physiolysis (*fiz-e-ol'-is-is*) [φύσις, nature; λύειν, to dissolve]. The disintegration of dead tissue by the natural processes of decomposition.

Physiomedicalism (*fiz-e-o-med'-ik-al-izm*) [φύσις, nature; *medicari*, to heal]. The professed use of natural remedies only, poisons and minerals being rejected.

Physiomedicalist (*fiz-e-o-med'-ik-al-ist*) [φύσις, nature; *medicari*, to heal]. One who professes physiomedicalism.

Physionomy (*fiz-e-on'-o-me*) [φύσις, nature; νόμος, law]. The science of the laws of nature.

Physiophilosophy (*fiz'-e-o-fil-os'-o-fe*). Synonym of *Physics*.

Physiophyly (*fiz-e-off'-il-e*) [φύσις, nature; φῦλον, a tribe]. In biology, the tribal history or paleontologic evolution of function, without reference to form.

Physique (*fiz-ēk'*) [Fr.]. Physical structure or organization.

Physocele (*fi'-so-sēl*) [φῦσα, air; κήλη, tumor]. A swelling or tumor containing air or flatus; emphysema of the scrotum; a hernia filled with flatus.

Physocelia (*fi-so-se'-le-ah*). Synonym of *Tympanites*.

Physocephalus (*fi-so-sef'-al-us*) [φῦσα, air; κεφαλή, head]. Emphysematous swelling of the head.

Physocolic (*fi-so-kol'-ik*) [φῦσα, air; κωλική, colic]. Colic caused by flatus.

Physode (*fi'-sōd*) [φῦσιγξ, a bladder]. In biology, the name applied by Crato to minute, refractive, bladder-like formations, found gliding about within the watery fluid in the lamellar systems of certain vegetable cells. In the brown *Algæ* the physodes contain substances analogous to phenol.

Physodin (*fi'-so-din*) [*physodes*, from φυσα, air; φῦσιγξ, a bladder]. A substance found by Gerding associated with *Ceratophyllin*, in the lichen *Parmelia ceratophylla* var. *physodes*, Ach.

Physodyspnea (*fi'-so-disp-ne'-ah*) [φῦσα, air; δυς-, difficult; πνέειν, to breathe]. Dyspnea due to emphysema.

Physohematometra (*fi'-so-hem'-at-o-me'-trah*) [φῦσα, air; αἷμα, blood; μήτρα, uterus]. An accumulation of gas, or air, and blood in the uterus, as in decomposition of retained menses, or placental tissue.

Physohydrometra (*fi'-so-hi'-dro-me'-trah*) [φῦσα, air; ὕδωρ, water; μήτρα, womb]. An accumulation of gas and water in the uterus.

Physology (*fi-sol'-o-je*) [φῦσα, air; λόγος, science]. The study of flatulence.

Physometer (*fi-som'-et-er*) [φῦσα, air; μέτρον, a measure]. An instrument for determining variations in the volume of a confined body of air.

Physometra (*fi-so-me'-trah*) [φῦσα, air; μήτρα, womb]. A distention of the womb with gas, produced by the decomposition of its contents.

Physomycetes (*fi-so-mi-se'-tēz*) [φῦσα, bellows; μύκης, fungus]. A class of *Fungi* characterized by a total absence of hymenium.

Physoncus (*fi-song'-kus*) [φῦσα, air; ὄγκος, tumor]. A swelling due to the presence of air.

Physoscheocele (*fi-sos'-ke-o-sēl*) [φῦσα, air; ὀσχεον, scrotum; κήλη, tumor]. Emphysema of the scrotum.

Physospasmus (*fi-so-spaz'-mus*) [φῦσα, air, flatus; σπασμός, spasm]. Flatulent colic.

Physosterin (*fi-sos'-ter-in*) [φῦσα, bellows; στέαρ, fat]. An inert fatty or cholesterin-like substance occurring in the Calabar bean.

Physostigma (*fi-sos-tig'-mah*) [φῦσα, bellows; στίγμα, stigma]. Calabar Bean, Ordeal Nut. The seed of *P. venenosum*, native of West Africa. The properties of the drug depend upon two alkaloids, *physostigmin* or *eserin*, $C_{15}H_{21}N_3O_2$, which paralyzes the motor functions of the spinal cord and stimulates muscle-fiber, and *calabarin*, which acts similarly to strychnin. Locally applied to the eye, physostigmin causes contraction of the pupil and diminishes intraocular tension. On account of its action on muscles it causes increased peristaltic movements of the intestines. In toxic doses, death is produced by failure of respiration. Its therapeutic uses are: In diseases of the eye, as in glaucoma, in iritis, to contract the pupil, and, alternated with atropin, to break up adhesions after iritis; in convulsive diseases, as tetanus and strychnin-poisoning; in constipation from atony of the intestines; in bronchitis and dyspnea, from weakness of the bronchial muscles. It is also used as an antidote to atropin and to strychnin. For poisoning, give an emetic and inject atropin. **P., Ext., Alcoholic.** Dose gr. ⅙–j. **P., Injectio, Hypodermica;** 10 grains of the extract in ½ ounce. Dose ♏iij–xij. **P., Tinct.,** 15 per cent. in strength. Dose ♏v–xx. **Eserina (Physostigmina,** B. P.), unof.

A myotic. Dose gr. $\frac{1}{60}$–$\frac{1}{12}$. **Lamellæ Physostigminæ** (B. P.), each contains $\frac{1}{1000}$ grain of physostigmin. **Physostigminæ Salicylas.** Dose gr. $\frac{1}{100}$–$\frac{1}{60}$. **Injectio P. salicylat. hypodermica;** 1 in 160. Dose ♏j–vj. **Physostigminæ Sulphas,** very soluble. Dose gr. $\frac{1}{100}$–$\frac{1}{60}$. **Injectio P. Sulphat. hypoderm.,** 4 grains to one ounce. Dose ♏j–iv.

Physostigmin (*fi-so-stig'-min*). Synonym of *Eserin.*

Physothorax (*fi-so-tho'-raks*). Synonym of *Pneumothorax.*

Phytalbumose (*fi-tal'-bu-mōz*) [φυτόν, plant; *albumen*]. A vegetable peptone or albumose, found in seeds of the *Leguminosæ*, in flour, and in papaw juice. *α-phytalbumose* agrees with the hemialbumose of Vines, being soluble in cold and boiling water; yielding also the biuret reaction, and a precipitate by saturation with sodium chlorid only in an acid solution. *β-phytalbumose* is soluble in cold but not in boiling distilled water; hence it is precipitated by heat. It is also readily thrown down by saturation with sodium chlorid, and gives a faint biuret reaction.

Phyterythrin (*fi-ter'-ith-rin*) [φυτόν, plant; ἐρυθρός, red]. The red coloring-matter of plants, especially of leaves, in autumn.

Phythelminthus (*fi-thel-min'-thus*). Synonym of *Bothriocephalus.*

Phytiatrica (*fit-e-at'-rik-ah*) [φυτόν, plant; ἰατρική, medicine]. Treatment by means of medicinal herbs; botanic medicine.

Phytiform (*fi'-tif-orm*) [φυτόν, plant; *forma*, form]. Resembling a plant.

Phytivorous (*fi-tiv'-or-us*). Same as *Phytophagous.*

Phyto- (*fi'-to-*) [φυτόν, plant]. A prefix signifying connection with or relation to vegetable organisms.

Phyto-alopecia (*fi-to-al-o-pe'-she-ah*). Synonym of *Alopecia areata.*

Phytobiology (*fi-to-bi-ol'-o-je*) [φυτόν, plant; βίος, life; λόγος, science]. The science of plant-life.

Phytoblast (*fi'-to-blast*) [φυτόν, plant; βλαστός, germ]. The living protoplasm constituting a cell.

Phytocerosium (*fi-to-ser-o'-ze-um*) [φυτόν, plant; κηρός, wax]. Vegetable wax.

Phytochemic, Phytochemical (*fi-to-kem'-ik, fi-to-kem'-ik-al*) [φυτόν, plant; χημεία, chemistry]. Pertaining to vegetable chemistry or to changes of vegetable origin, the plants acting by chemic force, or effecting a chemic change. Ferment-fungi are phytochemic, and so are the poisonous or pathogenic principles associated with the presence and growth of microbes in the body.

Phytochemistry (*fi-to-kem'-is-tre*) [φυτόν, plant; χημεία, chemistry]. Vegetable chemistry.

Phytochimy (*fi'-to-kim-e*). Same as *Phytochemistry.*

Phytochlore (*fi'-to-klor*) [φυτόν, plant; χλωρός, pale-green]. In biology, same as chlorophyl.

Phytochrome (*fi'-to-krōm*) [φυτόν, plant; χρῶμα, color]. In biology, a general term for those vegetable pigments necessary to the fundamental processes of vegetable assimilation, and for the synthesis of protoplasm and amylum. Cf. *chlorophyl, erythrin, phæophin, phyllocyanin, phylloxanthin.*

Phytocolla (*fi-to-kol'-ah*) [φυτόν, plant; κόλλα, glue]. Same as *Gliadin.*

Phytocyst (*fi'-to-sist*) [φυτόν, plant; κίστις, cyst]. In biology, a cyst or envelop of cellulose containing the phytoblast.

Phytoderma (*fi-to-der'-mah*) [φυτόν, plant; δέρμα, skin: *pl.*, *Phytodermata*]. Any cutaneous disease produced by microscopic vegetation, or by dermatophytes.

Phytogenesis (*fi-to-jen'-es-is*) [φυτόν, plant; γένεσις, origin]. In biology, the science of the origin and development of plants.

Phytogenetic (*fi-to-jen-et'-ik*) [φυτόν, plant; γεννᾶν, genesis]. Pertaining to phytogenesis.

Phytogeny (*fi-toj'-en-e*). Same as *Phytogenesis.*

Phytogeographic (*fi'-to-je-o-graf'-ik*) [φυτόν, plant; γεωγραφία, geography]. Pertaining to phytogeography.

Phytogeography (*fi'-to-je-og'-ra-fe*) [φυτόν, plant; γεωγραφία, geography]. In biology, the geographic distribution of plants.

Phytogony (*fi-tog'-o-ne*) [φυτόν, plant; γονή, generation]. In biology, the development of the species in plants.

Phytographer (*fi-tog'-ra-fer*) [φυτόν, plant; γράφειν, to write]. One who describes and classifies plants.

Phytographic (*fi-to-graf'-ik*) [φυτόν, plant; γράφειν, to write]. Pertaining to phytography.

Phytography (*fi-tog'-ra-fe*) [φυτόν, plant; γράφειν, to write]. Botany. Also, a treatise on the geographic distribution of plants.

Phytoid (*fi'-toid*) [φυτόν, plant; εἶδος, like]. In biology, plant-like; *e.g.*, certain animals and organs.

Phytolacca (*fi-to-lak'-ah*) [φυτόν, plant; *lacca*, lac: gen., *Phytolaccæ*]. Poke. The root and the fruit of *P. decandra.* It is an emetic, cathartic, and motor depressant. Toxic doses cause death by paralysis of the organs of respiration. Its action is antagonized by alcohol, opium, and digitalis. It is serviceable in malignant tumors, eczema, and similar skin-affections. Dose of the root as an emetic gr. x–xxx; as an alterative gr. j–v. **P. bacca** (U. S. P.), the berry or fruit of *Phytolacca decandra.* Dose of a saturated tincture, a fluidram three times a day; serviceable in rheumatism. **P. radix** (U. S. P.), the root of *Phytolacca decandra.* **P., Ext., Fld., Rad.** Dose ♏v–ʒj. **P., Tinct.,** unof. Dose ♏x–ʒj.

Phytolaccic Acid (*fi-to-lak'-sik*) [φυτόν, plant; *lacca*, lac]. Oxalic acid as found in *Phytolacca.*

Phytolaccin (*fi-to-lak'-sin*) [φυτόν, plant; *lacca*, lac]. The precipitate from a tincture of the root of *Phytolacca decandra.* It is alterative, anti-syphilitic, laxative, etc. Dose 1 to 3 grains. Unof.

Phytolithology (*fi-to-lith-ol'-o-je*) [φυτόν, plant; λίθος, stone; λόγος, science]. The science of fossil plants.

Phytologic (*fi-to-loj'-ik*) [φυτόν, plant; λόγος, science]. Pertaining to phytology.

Phytologist (*fi-tol'-o-jist*) [φυτόν, plant; λόγος, science]. One versed in phytology.

Phytology (*fi-tol'-o-je*) [φυτόν, plant; λόγος, science]. Same as *Botany.*

Phytolysis (*fi-tol'-is-is*) [φυτόν, plant; λύειν, to loose]. In biology, the change in position occurring in the pigment in a living cell in consequence of changes in the intensity of the light,—such as the changes in the chlorophyl coincident with the alternation of day and night.

Phytomentagra (*fi-to-men-ta'-grah*). Synonym of *Sycosis.*

Phytomer (*fi'-to-mer*) [φυτόν, plant; μέρος, part]. See *Phyton.*

Phytomycetes (*fi-to-mi-se'-tēz*) [φυτόν, plant; μύκης, fungus]. Molds occurring in putrid urine.

Phyton (*fi'-ton*) [φυτόν, plant; φύειν, to produce]. In biology, Gaudichaud's name for the pieces which by their repetition make up a plant, on the theory that the plant is a compound individual. Compare the use of *person* by zoölogists.

Phytonomatotechny (*fi-to-no-mat'-o-tek-ne*) [φυτόν, plant; ὄνομα, name; τέχνη, art]. In biology, the nomenclature of plants.

Phytonomy (*fi-ton'-o-me*) [φυτόν, plant; νόμος, law]. In biology, the laws of plant-life.

Phytoparasite (*fi-to-par'-as-it*) [φυτόν, a plant; παρά-

σιτος, a parasite]. In biology, a plant of parasitic habit. See *Epiphyte.*

Phytoparasitic (*fi-to-par-as-it'-ik*) [φυτόν, plant; παρά, beside; σιτος, food]. Pertaining to phytoparasites.

Phytopathologic (*fi-to-path-o-loj'-ik*) [φυτόν, plant; πάθος, disease; λόγος, science]. Pertaining to phytopathology.

Phytopathologist (*fi-to-path-ol'-o-jist*) [φυτόν, plant; πάθος, disease; λόγος, science]. One versed in phytopathology.

Phytopathology (*fi-to-path-ol'-o-je*) [φυτόν, plant; πάθος, disease; λόγος, science]. The science of plant-disease, or of diseases due to vegetable organisms; also, the science of the diseases of plants; vegetable pathology.

Phytophagous (*fi-toff'-ag-us*) [φυτόν, a plant; φαγεῖν, to eat]. In biology, herbivorous; feeding on plants.

Phytophagy (*fi-toff'-aj-e*) [φυτόν, a plant; φαγεῖν, to eat]. The habit of feeding on plants.

Phytophilous (*fi-toff'-il-us*) [φυτόν, a plant; φιλεῖν, to love]. In biology, applied to animals that are fond of plants.

Phytophysiology (*fi-to-fiz-e-ol'-o-je*). Synonym of *Physiology, Vegetable.*

Phytoplasm (*fi'-to-plazm*) [φυτόν, plant; πλάσμα, plasma]. The vegetable protoplasm.

Phytosis (*fi-to'-sis*) [φυτόν, plant; νόσος, disease: *pl.*, *Phytoses*]. 1. Any disease due to the presence of vegetable parasites. 2. The production of disease by vegetable parasites. 3. The presence of vegetable parasites.

Phytosterin (*fi-tos'-ter-in*) [φυτόν, plant; στερός, solid]. A substance, present in plant-seeds and sprouts, very similar to cholesterin.

Phytotaxy (*fi'-to-taks-e*) [φυτόν, plant; τάξις, order, arrangement]. In biology, systematic botany.

Phytotechny (*fi'-to-tek-ne*) [φυτόν, plant; τέχνη, art]. Industrial botany.

Phytotomous (*fi-tot'-o-mus*) [φυτόν, plant; τόμος, a cutting]. In biology, leaf-cutting, or plant-cutting, *e. g.*, certain birds or insects.

Phytotomy (*fi-tot'-o-me*) [φυτόν, plant; τομή, a cutting]. The anatomy of plants.

Phytovitellin (*fi-to-vit-el'-in*) [φυτόν, plant; *vitellus*, yolk]. The vegetable analogue of vitellin.

Phytozoaria (*fi-to-zo-a'-re-ah*) [φυτόν, plant; ζῷον, animal]. Same as *Infusoria.*

Phytozoön (*fi-to-zo'-on*) [φυτόν, plant; ζῷον, animal]. A plant-like animal; a zoöphyte.

Pia (*pi'-ah*) [native Polynesian]. The plant *Tacca pinnatifida*, from which a variety of arrowroot is prepared; it is said to be of special value in the treatment of certain cases of diarrhea and dysentery. Unof.

Pia, or, more fully, **Pia Mater** (*pe'-ah mah'-ter* or *pi'-ah-ma'-ter*) [L., "pious, or tender, mother."] The vascular membrane, consisting of a plexus of blood-vessels held by a fine areolar tissue, enveloping the entire surface of the brain and spinal cord. It dips into the fissures of the brain and forms the velum interpositum and the choroid plexus of the fourth ventricle. **P., Cerebral,** the pia mater covering the brain. **P., External,** that which covers the external portion of the brain. **P., Internal,** that which passes into the ventricles. **P. intima,** the inner layer of the spinal pia mater. **P., Spinal,** the pia of the spinal cord. **P. of Testis.** See *Tunica.*

Pia-arachnitis (*pi'-ah-ar-ak-ni'-tis*) [*pia*, pia; ἀράχνη, spiders' web; ιτις, inflammation]. Inflammation of the pia-arachnoid; leptomeningitis.

Pia-arachnoid (*pi'-ah-ar-ak'-noid*) [*pia*, pia; ἀράχνη, a spider's web; εἶδος, like]. The pia and arachnoid considered as one structure.

Pial (*pi'-al*) [*pia*, pia]. Pertaining to the pia mater.

Pialyn (*pi'-al-in*) [πῖαρ, fat; λύειν, to split up or decompose]. An enzyme contained in both the pancreatic substance and fluid, which has not as yet been isolated. It is capable of effecting a hydrolytic decomposition of neutral fats into glycerin and free fatty acids. It is most actively present in the substance of the fresh gland or its secretion, and its activity is greatest at about 40° C.

Pia-matral (*pi'-ah-ma'-tral*). See *Pial.*

Pian (*pi'-an*). See *Frambesia.*

Pianists' Cramp. See *Cramp.*

Piano-players' Cramp. See *Cramp.*

Piarachnoid (*pi-ar-ak'-noid*) [*pia*, pia; ἀράχνη, spiders' web; εἶδος, like]. The pia mater and arachnoid considered as one membrane.

Piarolytic (*pi-ar-o-lit'-ik*) [πῖαρ, fat; λυτικός, dissolving]. Forming emulsions with fat.

Piarrhemia (*pi-ar-e'-me-ah*) [πῖαρ, fat; αἷμα, blood]. See *Lipemia.*

Pica (*pi'-kah*) [L., "magpie"]. The craving for unnatural and strange articles of food; a symptom present in certain forms of insanity, in hysteria, and chlorosis, and during pregnancy.

Picacismus (*pik-as-iz'-mus*) [*pix*, pitch]. Depilation by means of pitch-plaster.

Picamar (*pik-am'-ahr*) [*pix*, pitch; *amarus*, bitter]. A bitter, oily substance obtained in the distillation of wood-tar.

Picea (*pi'-se-ah*) [L., the pitch-pine]. A genus of coniferous trees. **P. alba,** the white spruce. **P. excelsa,** the common fir or pitch-pine. It yields resin and turpentine. **P. nigra,** the black spruce. **P. vulgaris.** Synonym of *P. excelsa.*

Picene (*pi'-sēn*) [*picea*, the pitch-pine], $C_{22}H_{14}$. A hydrocarbon formed by the distillation of lignite, coal-tar and petroleum residues. It is very sparingly soluble in most of the solvents, but most readily in crude cumene; it crystallizes in blue, fluorescent leaflets, melting at 338° C., and boiling at 519° C.

Piceous (*pish'-e-us*) [*pix*, pitch]. In biology, having the nature of pitch. Viscous. Pitch-black; black with a faint reddish tinge.

Pichi (*pe'-che*) [native Chilean]. The stems and leaves of *Fabiana imbricata*, growing in Chile. It is a terebinthin having tonic properties, and is of repute in the treatment of catarrhal inflammations of the genito-urinary tract. Dose of the fld. ext. ʒj; of the extract gr. v–x. Unof.

Pick (*pik*) [ME., *picken*, to pick]. To pluck with the fingers; a symptom in certain typhoid states. See *Carphology.*

Pick's Liniment. *Linimentum exsiccans*: a liniment used in the treatment of eczema. Its formula is: Tragacanth, 75 grains; glycerin, 30 minims; water, 25½ drams. It is of service in the dry forms of eczema. **P.'s Salicylated Soap-plaster,** a preparation used in the treatment of eczema. It is composed as follows: Emplast. saponis liq., 2½ ounces; olive-oil, 5 drams.; salicylic acid, 37 grains. It is applied on strips of muslin.

Picolin (*pik'-o-lin*) [*picea*, the pitch-pine; *oleum*, oil], C_6H_7N. *Methyl-pyridin*, a liquid alkaloid; a product of acroleïn-ammonia.

Picolinic Acid (*pik-o-lin'-ik*) [*picea*, the pitch-pine; *oleum*, oil], $C_6H_5NO_2$. A monobasic acid made from picolin and other pyridin-derivatives.

Picotement (*pe-kōt'-mon(g)*) [Fr.]. A pricking sensation; tingling; formication.

Picra (*pik'-rah*). Same as *Hiera picra.*

Picræna (*pik-re'-nah*). See *Quassia.*

Picramic Acid (*pik-ram'-ik*) [πικρός, bitter; *amin*], C_6·

$H_5N_3O_5$. Picric acid in which one NO_2 radicle has been replaced by NH_2.

Picramid (*pik'-ram-id*) [πικρός, bitter; *amid*]. An amid of picric acid; trinitranilin.

Picranisic Acid (*pik-ran-is'-ik*). Synonym of *Picric Acid*.

Picrate (*pik'-rāt*) [πικρός, bitter]. Any salt of picric acid. See *Ammonium Picrate*.

Picric (*pik'-rik*) [πικρός, bitter]. Same as *Carbazotic*. **P. Acid.** See *Acid* and *Pigments, Conspectus of*. **P. Acid Test.** See *Tests, Table of*.

Picroaconitin (*pik-ro-ak-on'-it-in*) [πικρός, bitter; *aconitum*], $C_{31}H_{45}NO_{10}$. An amorphous substance extracted from the bulbs of *Aconitum napellus*. It is slightly poisonous.

Picrocarmin (*pik-ro-kar'-min*) [πικρός, bitter; *carmin*, carmin]. A preparation for staining microscopic specimens. Its composition is as follows: carmin 1.0; ammonia 5.0; distilled water 50.0. After solution, add saturated watery solution of picric acid 50.0. Allow to stand in a wide-mouthed bottle until the ammonia has evaporated; then filter. See *Stains, Table of*.

Picroerythrin (*pik-ro-er'-ith-rin*) [πικρός, bitter; ἐρυθρός, red], $C_{12}H_{16}O_7 + 3H_2O$. A crystalline, bitter substance, soluble in hot water, insoluble in absolute alcohol, and melting at 158° C.

Picroglycin, Picroglycion (*pik-ro-gli'-sin, pik-ro-gli'-se-on*) [πικρός, bitter; γλυκύς, sweet]. A crystalline, bitter substance, found in *Solanum dulcamara*. It may be impure solanin.

Picrolithium - carmin (*pik-ro-lith'-e-um-kar'-min*). A solution used in staining microscopic sections. It is composed of carmin 2.5–5.0; saturated watery solution of lithium carbonate 100.0; to which is added saturated watery solution of picric acid 2.0.

Picromel (*pik'-ro-mel*) [πικρός, bitter; μέλι, honey]. A mixture of unknown composition containing salts of glycocholic and taurocholic acids.

Picronitric Acid (*pik-ro-ni'-trik*). Synonym of *Picric Acid*.

Picropodophyllin (*pik'-ro-po-do-fil'-in*) [πικρός, bitter; πούς, foot; φύλλον, leaf]. A crystalline substance obtained from *Podophyllum peltatum*.

Picrorocellin (*pik-ro-ros-el'-in*) [πικρός, bitter; *roccellin*], $C_{27}H_{29}N_3O_5$. A crystalline, bitter substance obtained from *Roccella tinctoria*, or one of its varieties.

Picro-saccharimeter (*pik'-ro-sak-ar-im'-et-er*) [πικρός, bitter; σάκχαρον, sugar; μέτρον, measure]. An instrument for determining the amount of sugar in a given sample of urine by comparison with the color of a permanent standard solution of perchlorid of iron—that of a picric acid reduction of the urine brought to a similar tint as the standard by dilution with water—the amount of the latter required indicating the amount of sugar present.

Picro-saccharometer (*pik'-ro-sak-ar-om'-et-er*). See *Picro-saccharimeter*.

Picrotin (*pik'-ro-tin*) [πικρός, bitter], $C_{15}H_{18}O_7$. A decomposition-product of picrotoxin, formed when the latter is treated with benzene.

Picrotoxic Acid (*pik-ro-toks'-ik*). Synonym of *Picrotoxin*.

Picrotoxin (*pik-ro-toks'-in*) [πικρός, bitter; τοξικόν, poison; *Picrotoxinum*, U. S. P.; gen. *Picrotoxini*]. A neutral principle prepared from *Anamirta paniculata* (*Cocculus indicus*). Picrotoxin stimulates the motor and inhibitory centers in the medulla, especially the respiratory and vagus centers; it causes epileptiform spasms by irritation of the motor centers of the cerebrum or cord and medulla, the spasms often having the character of *manège* movements. Its action is much like that of strychnin. It has been used in an ointment (10 grains to one oz. of lard) in tinea capitis and in pediculosis. It is useful for the night-sweats of phthisis, and in the complex of symptoms known as vaso-motor ataxia, *q. v.* Dose gr. $\frac{1}{60}$ to $\frac{1}{30}$. It has been tried in epilepsy, but has proved useless. **Cocculi, Ext., Fld.** Dose ♏j–iij. **C., Tinct.,** tincture of cocculus, 12½ per cent. in strength. Dose ♏ij–xv. **Cocculi, Planat's Tinct.,** strength 25 per cent. Dose ♏–v. **Injectio Picrotox. Hypodermica,** 1 grain in 240 minims of water. Dose ♏ij–viij.

Picrotoxinin (*pik-ro-toks'-in-in*). See *Picrotoxin*.

Pictet Liquid (*pik'-tet*) [*pix*, pitch]. A liquid consisting of a mixture of sulphurous acid gas and carbon dioxid liquefied under pressure. It has been used in the treatment of pulmonary tuberculosis. A small quantity allowed to escape into a closed room quickly resumes the gaseous state, and is inhaled by the tuberculous patient. It appears to give good results.

Pictura (*pik-tu'-rah*) [*pictura*, painting, picture]. In biology, the pattern or coloration of a particular part (as a feather) or of an entire animal.

Piddle (*pid'-l*) [origin obscure]. To urinate (a childish word).

Piebald (*pi'-bawld*) [ME., *pyebald*, piebald]. Of various colors. **P. Iris,** an iris which has spots of different colors, generally small dark spots on a lighter background. **P. Skin.** See *Leukoderma*, and *Vitiligo*.

Piedra (*pe-a'-drah*) [S. Amer.]. A disease of the hair marked by the formation of hard, pin-head-sized nodules on the shaft of the hair, thought to be due to the presence of a species of micrococcus. It occurs in the Andean plateau.

Piezometer (*pi-e-zom'-et-er*) [πιέζειν, to press; μέτρον, measure]. An apparatus for measuring the degree of compression of gases.

Pigback Kidney. See *Kidney*.

Pigeon (*pij'-un*) [ME., *pigeon*, pigeon]. A bird of the family *Columbidæ*. **P.-breast.** Synonym of *Pectus carinatum;* it occurs in rickety children and in mouth-breathers. **P.-breasted,** affected with pigeon-breast. **P.-toe.** See *Hallux varus*. **P.-toed,** having the toes directed inward.

Pigment (*pig'-ment*) [*pigmentum, pingere*, to paint]. In biology, a pigment is any organic coloring-matter in the tissues of plants or animals, *e.g.*, the coloring-matter occurring in the iris, retina, hair, and in the rete mucosum of the skin. It may be of mimetic value, or concerned in assimilation and metabolism, or in respiration. **P., Color, and Dye-stuff;** a *pigment* is any substance that is employed in the arts for the purpose of imparting color to bodies. The term is properly restricted to the dry coloring-matter, which when mixed with a vehicle becomes a *paint*. O. N. Witt assumes the presence of certain characteristic groups—chromophorous groups—in all dyestuffs, which, by introduction into colorless bodies, give rise to the basis-structure of dyestuffs—chromogenous groups. When these chromogenous groups are joined to salt-forming groups, such as hydroxyl or amidogen, dyestuffs are formed. *Color* is applied to any hue, especially a pure tint, other than black or white. A *dye-stuff* is any dyewood, lichen, powder, or dyecake used in dyeing and staining dress-materials. A *fast color* is one which resists the weather, light, soap-lye, dilute alkalies, and very dilute acids; a *fugitive color* is one which is dissipated under similar circumstances. A *substantive coloring-matter* is one which passes into an insoluble state upon the fiber without the intervention of a mordant; examples, all the mineral coloring-matters, indigo, turmeric, annatto, safflower, and most

of the coal-tar colors. An *adjective coloring-matter* is one which requires a mordant or mediating agent in order to become insoluble upon the fiber. A *mordant* is a substance which has an affinity for or which can at least penetrate the tissue to be colored, and which possesses also the property of combining with the coloring-matter employed, and of forming with it an insoluble compound within or about the fibers. Mordants may be iron salts (copperas, ferrous acetate, iron pyrolignite, ferric sulphate, and nitrates), nickel (nickel-ammonium chlorid, nickel nitro-acetate), chromium (chromium sulphate, fluorid, chlorate, potassium di-chromate and chromate), tin (stannous and stannic chlorid, "pink salt," sodium stannate), manganese ($MnCl_2$, $KMnO_4$), lead, copper (nitrate), antimony (tartar emetic), or tannin. *Raising* is the process or method of intensifying colors by means of mordants. *Dunging* is a term applied to the mordanting of goods by passing them through a *dung-bath*, which is a bath composed of water in which a small proportion of cows' or pigs' dung, or some substitute for it, has been dissolved, with a certain amount of chalk to remove the acetic acid from the printed material. A *discharge* is some compound, such as the chlorid of lime, which has the property of bleach-

Pigment-cells of Frog. A, Contracted; B, C, Partially relaxed pigment-cells. (*From Stirling.*)

ing or taking away the color already communicated to a fabric, by which means white patterns are produced on colored grounds. A *lake* is a pigment formed by the absorption of animal, vegetable, or coal-tar coloring-matter from an aqueous solution by means of metallic bases. *Application-colors.* See *Spirit-colors*. *Coal-tar colors* is a name given to a numerous class of colors derived from coal-tar by various complex chemic processes. *Distemper*, or *fresco*, *colors* are colors ground in water to a creamy consistency, with the addition of a sizing of glue or white of egg to make them adhere to the surface to which they are applied. They are generally used for decorating plastered walls or ceilings. *Graining-colors* are colors ground in linseed-oil with the addition of a small amount of wax to prevent their spreading when manipulated with a graining-comb to imitate the graining of various woods. *Japan-colors* are those ground in the medium called japan. An *oil-color* is a pigment of any kind ground in linseed-oil or poppy-oil. *Spirit-colors* (also called "*spirits*," or *application-colors*) are certain colors obtained in calico-printing, so-called from the use of "spirits," the technical name for the acid solutions of tin, in applying the colors. *Water-colors* are pigments ground in water containing a small amount of glue, glycerin, honey, or molasses, to cause them to bind and adhere to the surface to which they are applied. When pressed into molds and dried, they are called *cake-colors;* but when sold in the form of stiff pastes, they are called *moist colors.* Very many of the materials used for dyeing purposes are extremely poisonous, and have been productive of eczema and other skin-diseases, or even of systemic poisoning. Recently the use of dyes as staining reagents in bacteriologic, physiologic, and biologic researches has assumed such marked importance that it has been deemed advisable to introduce the following conspectus (pages 1085 et seq.), which contains the more important pigments and dye-stuffs. **P., Bile.** See under *Bile*. **P., Blood,** hemoglobin and its derivatives. **P., Brown.** Same as *Soudan Brown*. **P.-cell,** a cell specialized for the secretion or retention of a pigment; a chromatophore. **P.-granule,** a minute, structureless mass of pigment. **P., Hematogenous,** any pigment derived from the blood. Hematogenous pigments are hemoglobin, hematoidin, hemosiderin; the bile-pigments, which are indirectly derived from the blood-pigment; ferrous sulphid, which stains the abdominal walls and the serous coat of the abdominal organs after death, is also derived from hemoglobin. **P.-liver,** a coloration of the liver occurring in the course of malarial fevers, and in the morbid condition of the blood described as melanemia. The liver is also deeply pigmented in pernicious anemia and in chronic valvular heart-disease, with long-continued congestion of the organ. **P., Metabolic,** a pigment formed by the metabolic action of cells. Melanin is the type of metabolic pigments. **P.-molecule.** Same as *P.-granule*. **P., Respiratory,** a pigment resulting from oxidation of the tissues, or a pigment by means of which oxygen is absorbed. Hemoglobin may be considered a respiratory pigment. **P.-spot,** in biology, a small mass of pigment in the spores of certain plants and protozoans. **P., Urinary,** urobilin, urochrome, uroerythrin, and others. **P., Uveal.** See under *Uvea*.

Pigmental, Pigmentary (*pig-men'-tal, pig'-men-ta-re*) [*pingere*, to paint]. Pertaining to or containing pigment. **P. Atrophy,** atrophy of adipose tissue with deposit of pigment in the fat-cells. **P. Layer,** the external layer of the retina. See *Retina*. **P. Mole.** See *Nævus pigmentosus*.

Pigmentation (*pig-men-ta'-shun*) [*pingere*, to paint]. Deposition of or discoloration by pigment. See also *Chromatosis*.

Pigodidymus (*pi-go-did'-im-us*) [πυγή, buttock; δίδυμος, double]. A double monster united at the buttocks.

Piitis (*pi-i'-tis*) [*pia*, pia; ιτις, inflammation]. Inflammation of the pia; leptomeningitis.

Pike (*pik*) [ME., *pike*, a sharp point]. In biology, a thorn or prickle.

Pilar, Pilary (*pi'-lar, pi'-lar-e*) [*pilaris; pilus*, hair]. Pertaining to the hair.

Pilastered (*pi-las'-terd*) [*pila*, a small supplemental pillar]. In anatomy, flanged so as to have a fluted appearance; arranged in pilasters or columns. **P. Femur,** a condition observed in the femur of individuals of certain races in which the backward concavity of the femoral shaft is exaggerated, and the linea aspera prominent. This exaggeration of structure causes the pilastered appearance.

Pilastri (*pi-las'-tre*) [*pl.* of *Pilastrum*, a small pillar]. In biology, strong gelatinous columns placed between the subgenital openings in *Medusæ*.

Pilatio (*pi-la'-she-o*) [*pilus*, hair]. A cranial fissure.

CONSPECTUS OF PIGMENTS.

I. INORGANIC.

NAME.	FORMULA.	COMPOSITION, PREPARATION, ETC.	COLOR.
Antimonial cinnabar (*antimonial vermilion, red lead*).	$Sb_6S_6O_3$.	Action of sodium calcium dithionæ on antimonious chlorid.	Red.
Artificial ultramarine (*French blue, Guimet blue, new blue, permanent blue*).		Mixture of clay, sodium carbonate, sulphur, and rosin.	Blue.
Azurite (*azure malachite, blue malachite, copper lazulite, mountain-blue*).	$2CuCO_3.Cu(OH)_2$.	Copper hydroxycarbonate.	Blue.
Berlin blue (*Erlangen blue, Hamburg blue, kali blue, Milori blue, royal blue, steel blue, Turnbull's blue*).		Action of potassium ferocyanid on ferrous salts.	Blue.
Bismuth-white (*pearl white, Spanish white*).	BiOCl.	Bismuth oxychlorid.	White.
Bloodstone.	Fe_2O_3.	Found in nature; a hematite.	Red.
Blue ocher (*native Prussian blue*).		Iron hydroxyphosphate.	Dull-blue.
Blue vitriol (*blue stone, Cyprus vitriol*).	$CuSO_4$.	Copper sulphate; found in nature.	Blue.
Bremen blue (*blue verditer*).	$Cu(HO)_2$.	Copper hydroxid; action of lime on copper nitrate.	Blue.
Bremen green (*Erlaw green, green bice, green verditer*).		Copper hydroxid.	Green.
Brunswick green (*mountain-green*).	$3CuO.CuCl_2$.	Copper oxychlorid.	Light-green.
Cadmium-red.	CdS.	Cadmium sulphid.	Orange-red.
Cadmium-yellow (*Jaune brilliant*).	CdS.	Cadmium sulphid.	Orange-yellow.
Caledonia brown.		Natural ore.	Russet-brown.
Cappagh brown.		From bog-earth containing manganese.	Brown.
Casall green.	C_2O_3.	Chromic oxid.	Green.
Cassel yellow (*mineral yellow, Montpellier yellow, patent yellow, Turner's yellow*).	$PbCl_2.7PbO$.	Lead oxychlorid.	Yellow.
Casselmann's green.		Copper sulphate with potassium or sodium acetate.	Green.
Cassius' purple (*gold purple*).		Gold and tin.	Purple.
Cerulean blue.		Cobaltous-stannic oxid.	Blue.
China clay (*kaolin*).		Aluminum hydroxysilicate.	White.
Chrome-alum.	$K_2SO_4.Cr_2(SO_4)_3.24H_2O$.	Potassium and chromium sulphate.	Violet.
Chrome chlorid.	Cr_2Cl_6.	Action of chlorin on chromium sulphid.	Violet.
Chrome-green (*chromium-green, cinnabar-green, emerald green, Guignet's green, Victoria green*).	Cr_2O_3.	Chromic oxid.	Bright-green.
Chrome-red (*chrome-carmin, chrome-garnet, chrome-orange, chrome-vermilion*).	$PbCrO_4.PbO$.	Lead oxychromate.	Red.
Chrome-yellow (*crown-yellow, Hamburg yellow, Leipsic yellow, Paris yellow*).	$PbCrO_4$.	Lead chromate.	Brilliant yellow.
Cobalt-blue (*azure-blue, cobalt-ultramarine, Hungary blue, Leithner's blue, Leyden blue, Paris blue, Thénard's blue*).		Aluminum cobaltate.	Blue.
Cobalt-red.		Cobalt phosphate.	Red.
Cobalt-yellow.		Potassium-cobalt nitrite.	Bright-yellow.
Colcothar (*English red, Indian red, iron minium, Paris red, polishing red, red vitriol*).	Fe_2O_3.	Ferric oxid; from iron sulphate.	Red.
Copperas-black.		Mordanting with ferrous and copper sulphate and dyeing with logwood.	Black.
Cyanin-blue (*Leitch's blue*).		Compound of Prussian blue and cobalt blue.	Blue.

CONSPECTUS OF PIGMENTS.—*Continued.*

NAME.	FORMULA.	COMPOSITION, PREPARATION, ETC.	COLOR.
Dingler's green.		Chromium-calcium phosphate.	Green.
Egyptian blue (*Alexandria blue, copper-glass*).		Copper-calcium silicate.	Blue.
Fol's yellow.		Heating together phenol and arsenous oxid.	Yellow.
Gentele's green.		Action of sodium stannate on copper sulphate.	Green.
Green cinnabar (*Naples green*).		Chrome-yellow and Prussian blue.	Green.
Hamburg white (*Dutch white, Tyrol white, Venice white*).		White lead with heavy spar.	White.
Iodin-scarlet (*pure scarlet*).	HgI_2.	Mercuric iodid.	Brilliant red.
King's yellow (*Chinese yellow*).	As_2S_3.	Sublimating a mixture of sulphur and arsenous oxid.	Yellow.
Litharge (*Massicot*).	PbO.	Lead oxid; found in nature.	Yellow.
Lithophan.	$BaSO_4.ZnS$.	Barium sulphate and zinc sulphid.	White.
Malachite-green (*copper-green, mountain-green*).	$CuCO_3$.	Copper carbonate.	Green.
Manganese-brown.		Action of sodium hypochlorite and caustic soda on manganous chlorid.	Brown.
Manganese-green (*baryta-green, Cassel green, Rosenstrehl's green*).	$BaMnO_4$.	Barium manganate.	Green.
Mars' brown.		Calcining ferrous sulphate with alum, and potash.	Brown.
Mineral blue (*Antwerp blue, Haarlem blue*).		Prussian blue mixed with clay.	Green-blue.
Mineral gray.		From lapis lazuli.	Pale blue-gray.
Mineral lake.		Glass flux colored with tin chromate.	Pink.
Mineral purple (*Mars' violet, purple ocher*).		Artificially prepared iron oxid.	Dark-red.
Minium (*gold cinnabar, mineral orange, orange-minium, Paris red, red lead, Saturn cinnabar, saturnine red*).	Pb_3O_4.	Red oxid of lead.	Red.
Mittler's green (*Arnandon green, emerald green, Matthieu Plessy's green, Pannetier's green, Schnitzer green*).	$Cr_2(HO)_6$.	Chiefly chromium hydroxid.	Green.
Mosaic gold.	SnS_2.	Stannic sulphid.	Yellow.
Naples yellow.		Lead antimonate.	Pale orange-yellow.
Napoleon blue (*Raymond's blue*).		Action of basic ferric sulphate and potassium ferrocyanid.	Blue.
Ocher (*Indian ocher, Indian red, light red, Mars' red, Naples red, Persian red, Pompeian red, red bole, ruddle, scarlet ocher, terra di sienna*).		Ferruginous clays, especially those containing ferric hydroxid.	Red.
Ocher (*burnt ocher, Chinese yellow, gold ocher, Lemnian earth, orange ocher, Roman ocher*).		Clay containing ferric hydroxid.	Orange-yellow.
Oil-blue (*copper indigo*).	CuS.	Copper sulphid.	Blue.
Orpiment.	As_2S_3.	Natural ore; arsenious sulphid.	Yellow.
Pattison's white lead.	$PbCl_2.PbH_2O_2$.	Adding saturated lime-water to a hot solution of lead chlorid.	White.
Perfect yellow.	$ZnCrO_4$.	Zinc chromate.	Bright light-yellow.
Permanent white (*blanc fixe, mineral white, new white*).	$BaSO_4$.	Barium sulphate.	White.
Pink salt (*pink crystals*).	$SnCl_4.2NH_4Cl$.		Pink.
Prussian blue (*ball-blue, Monthier's blue, navy blue, royal blue, soluble blue*).		Precipitating ferric sulphate with potassium ferrocyanid.	Blue.

CONSPECTUS OF PIGMENTS.—*Continued.*

NAME.	FORMULA.	COMPOSITION, PREPARATION, ETC.	COLOR.
Prussian brown.		A compound of ferric oxid and alumina.	Orange-brown.
Prussian green.		Imperfect iron ferrocyanid.	Green.
Purple-brown (*maroon oxid*).	Fe_2O_3.	Ferric oxid.	Purplish-brown.
Realgar.	As_2S_2.	Natural ore; arsenium disulphid.	Red.
Rinmann's green (*cobalt green, Gellert's green, green smalt, mineral green, Paris green, Saxony green, Scheele's green, Swedish green, zinc-green*).	$CuHAsO_3$.	Copper arsenite.	Bright-green.
Satin white.		Lime, zinc oxid, and a little indigo.	White.
Schweinfurth blue (*Rebouleau's blue*).		Fusion of copper arsenate, potassium arsenate, and niter.	Blue.
Schweinfurth green (*Bâle green, emerald green, French green, imperial green, Kirschberg green, Leipsic green, Mitis green, Neuwied green, Paris green, royal green, Vienna green*).		Copper aceto-arsenite.	Vivid light-green.
Siderine yellow.		Ferrous chromate.	Yellow.
Sienna.		Ferruginous ocherous earth.	Orange-yellow.
Smalts (*Dumont's blue, enamel blue, Eschel blue, King's blue, royal blue*).		Glass tinged by cobaltous oxid.	Blue.
Spanish brown.		Highly adulterated dark ferric oxid.	Dark brown.
Strontian yellow.	$SrCrO_4$.	Addition of potassium chromate to a solution of a strontium salt.	Yellow.
Ultramarine (*Armenian blue, azure-blue, lazulite blue*).		From lapis lazuli.	Blue.
Ultramarine green.		Mixture of alumina, soda, silica, sulphur, iron, calcium, etc.	Green.
Ultramarine yellow (*barium yellow*).	$BaCrO_4$.	Barium chromate.	Yellow.
Umber.		Clayey, brown iron ore.	Red.
Umber (*colognese, lignite*).			Red.
Vanadium bronze.		An acid derivative of vanadium.	Fine yellow.
Venetian red (*English red, Prussian red, Spanish red*).	$Fe_2O_3.CaSO_4$.	Calcining a mixture of lime and iron sulphate.	Red.
Verdigris.	$Cu_2(HO)(C_2H_3O_2)$ H_2O.	Copper hydroxyacetate or subacetate.	Green.
Vermilion (*Chinese red, cinnabar*).	HgS.	Sulphid of mercury.	Red.
Verona brown.		A calcined ferruginous earth.	Reddish-brown.
Veronese green (*French Veronese green, viridian*).	$Cr_2(HO)_6$.	Chromic hydroxid.	Blue-green.
Vienna white (*Bologna lime, Vienna lime*).	$CaCO_3$.	Prepared chalk.	White.
White lead (*blanc d'argent, China white, Clichy white, Cremnitz white, French white, Kremnitz white, Krem's white, London white, pearl white, Roman white, silver white*).	$2PbCO_3Pb(HO)_2$.	Lead carbonates.	White.
White lead substitute.	Sb_2O_3.	Antimonous oxid.	White.
White vitriol.	$ZnSO_4 + 7H_2O$.	Zinc sulphate.	White.
Zinc carbonate.	$2ZnCO_3 Zn(HO)_2$.		White.
Zinc-green.		Zinc-yellow and Prussian blue.	Green.
Zincolith (*Griffith's snow-white*).	$BaSO_4.ZnS$.	Zinc sulphid and barium sulphate.	White.
Zinc-white (*Chinese white, snow-white*).	ZnO.	Zinc oxid.	White.
Zinc-yellow.	$ZnCrO_4$.	Zinc chromate.	Yellow.

CONSPECTUS OF PIGMENTS.—*Continued.*

II. ORGANIC.

1. ANIMAL PIGMENTS.

Name.	Composition, Preparation, Etc.	Color.
Actiniochrome.	Found in certain invertebrates (*e.g.*, in the tentacles of *Anthea cerus*).	Violet.
Actiniohematin.	Found in certain *Actinozoa* (*Anthea cerus*).	Red.
Animal black (*animal charcoal, bone-black*).	Calcination of bones in closed vessels.	Black.
Bilicyanin (*Cholecyanin, choleverdin*).	Obtained from bilirubin.	Blue.
Biliflavin.	Obtained from biliverdin.	Yellow.
Bilifuscin.	Obtained from bile and gall-stones.	Brown.
Biliphein (*Cholophein*).	Obtained from bile.	Gray.
Biliprasin.	Found in gall-stones, icteric urine, and bile.	Brownish-green.
Bilipurpurin.	Obtained from biliverdin.	Purple.
Bilirubin.	The chief pigment of the bile.	Red.
Biliverdin.	Obtained from bile, icteric urine, and gall-stones.	Green.
Bone-brown.	Roasting bones until brown throughout.	Brown.
Bonellein.	Found in certain *Annelids: e.g., Bonellia viridis.*	Green.
Chlorocruorin.	Found in the blood of certain invertebrates (*e.g., Sabella ventrilabrum, Siphonostoma* sp.).	Green.
Chlorofucin.	Found in *Anthea cereus, Bunodes ballii*, and *Sagartia bellis*, and other invertebrates containing symbiotic algæ.	Yellow.
Chlorophan.	A chromophan found in certain invertebrates, and in the retinal cones of vertebrates.	Green.
Cholepyrrhin (*bilepyrrhin*).	Obtained from bile.	Brown.
Cholohematin.	Found in the bile of ruminants.	Red.
Chromophan.	Found in the retinal cones of certain animals, and in certain invertebrates. Cf. *Chlorophan, Rhodophan, Xanthophan.*	Red, green, yellow.
Cochineal (*carmin-red, cochenille, mestica*).	From the female insect—*Coccus cacti.*	Crimson.
Cyanein.	Found in certain invertebrates (*e.g., Rhizostoma, Cyanea, Velella*).	Blue.
Echinochrome.	A respiratory pigment of certain *Echinoderms.*	Brown.
Enterochlorophyl.	Found in the liver in many invertebrates; pancreatic or hepatic tissues.	Red to green.
Enterohematin. Synonymous with *hemochromogen* and *helicorubin* Krukenberg.	Found in the pancreas or liver of many invertebrates.	Red.
Frankfort black (*German black*).	Better grade of bone-black.	Black.
Helicorubin.	One of the enterohematins of invertebrates.	Red.
Hemacyanin.	Found in the blood and bile of vertebrates.	Blue.
Hemaphein.	A decomposition-product of hematin.	Brown.
Hematin.	Obtained from blood.	Bluish-black.
Hematoidin.	Found in old blood-clots, corpora lutea, hematuria, etc. Cf. *Bilirubin* and *Hemolutein.*	Red to orange.
Hematoporphyrin.	A metabolite of *myohematin, enterohematin, histohematin* and other intrinsic coloring-matters of invertebrates.	Red.
Hemerythrin.	Found in the blood of many invertebrates; *e.g., Sipunculus balanorophus, Phaseolosoma elongatum.*	Burgundy-red.
Hemocyanin.	A proteid found in the blood of many invertebrates, worms, molluscs, crustaceans.	Blue.
Hemochromagen.	One of the enterohematins of invertebrates.	Red.
Hemoglobin.	The coloring-matter of vertebrate blood-corpuscles.	Red to purple.

CONSPECTUS OF PIGMENTS.—*Continued.*

Name.	Composition, Preparation, Etc.	Color.
Hemolutein.	Obtained from corpora lutea. Cf. *Hematoidin.*	Yellow.
Hemorhodin.	An albuminoid giving color to the blood of certain invertebrates, as *Aplysia depilans.*	Rose.
Hemosiderin.	Obtained from extravasations and thrombi.	Red.
Histohematin.	Found in various tissues and organs of invertebrate animals.	Red.
Indian purple.	Precipitation of cochineal extract with copper sulphate.	Deep purple.
Ivory-black.	Calcination of ivory-dust.	Black.
Ivory-brown.	Roasting ivory until brown throughout.	Brown.
Lac-dye.	Resinous substance from lac-insect—*Carteria lacca.*	Scarlet.
Lutein.	A lipochrome found in the digestive gland of certain invertebrates (*e. g.*, *Holothuria nigra*).	Red.
Melanin.	Found normally in epidermal structures, and pathologically in the skin and certain tumors, also in the hematozoa of men and animals.	Black.
Murexid (*purple-carmin, ammonium purpurate*).	From uric acid by the action of nitric acid and ammonium hydroxid.	Purple.
Myohematin.	The true intrinsic coloring-matter of invertebrate muscle. It occurs (*e. g.*,) in all the *Pulmo-gastero-poda.*	Red.
Pentacrinin.	Found in certain invertebrates (*e. g.*, *Pentacrinus caput medusæ*).	Purple.
Phlebin.	The venous blood-pigment contained in red blood-corpuscles.	Blue.
Phœnicin.	A name sometimes given to the coloring-matter of the blood.	Red.
Phyllodoce-green.	Found by MacMunn in the worm *Phyllodoce viridis.*	Green.
Polyerythrin.	Discovered by Moseley in various *Cœlenteratæ.*	Red.
Purree (*euxanthin, Indian yellow*).	Impure magnesium euxanthate, obtained from urine of cows fed on mango-leaves.	Bright yellow.
Rhodophan.	A chromophan found in the retina of certain animals.	Red.
Retronerythrin.	A series of lipochrome pigments found in many invertebrates.	Red to green.
Turacin	From the feathers of the cape lory.	Crimson.
Tyrian purple (*purple of mollusca*).	From the juice of the shell-fish, *murex* or *conchylium*, of the genus *Purpura.*	Crimson.
Urobilin.	Found in urine.	Red or reddish-yellow.
Urochrome.	Found in urine.	Yellow.
Uroerythrin.	Found in urine.	Red.
Urohematin.	Found in urine.	Red.
Uromelanin.	Found in urine.	Dark-red.
Urorubin.	Found in urine.	Garnet-red.

2. TAR COLORS.

a. Anthracene Colors (from anthracene, $C_{14}H_{10}$).

The Alizarins.		
Alizarin-blue (*anthracene-blue*).	Heating nitro-alizarin with glycerol and sulphuric acid.	Blue.
Alizarin-blue S.	Sodium salt of alizarin-blue.	Blue.
Alizarin-brown.	Alizarin-red with potassium ferrocyanid.	Brown.
Alizarin-carmin (*alizarin W S*).	Sodium alizarin monosulphonate.	Carmin.
Alizarin-green (*anthracene-green, cerulein*).	Action of strong sulphuric acid on gallein.	Olive-green.

CONSPECTUS OF PIGMENTS.—*Continued.*

NAME.	COMPOSITION, PREPARATION, ETC.	COLOR.
Alizarin-orange (*alizarin N*).	Action of nitric acid on alizarin.	Orange-red.
Alizarin-purple.	Treating alizarin with ferrous sulphate.	Lilac.
Alizarin-red.		Flesh-color.
Alizarin-violet (*anthracene-violet, gallein*).	Action of phthalic anhydrid on pyrogallol.	Violet.
b. Purpurin.	Oxidation of alizarin.	Yellowish-red.
Flavo-purpurin.	Similar to alizarin.	Yellowish-red.
	b. Azo-dyes.	
Acid yellow (*fast yellow*).	Treating amidoazotoluene hydrochlorid with fuming sulphuric acid.	Olive and moss-green.
Anilin-yellow (*spirit-yellow*).	Heating diamidoazobenzene with anilin hydrochlorid.	Yellow.
Azarin.	Compound of naphthol-azo-dichlorphenol and ammonium acid sulphite.	Brilliant red.
Azo-blue.	Action of tetraza-ditolyl chlorid on potassium β-naphthol-sulphonate.	Dark-blue.
Benzo-purpurin.	Formed from orthotolidin and two molecules of naphthionic acid.	Scarlet.
Biebrich scarlet (*Ponceau B*).	Action of diazoazobenzene upon β-naphthol.	Scarlet.
Brilliant yellow.	Formed from one molecule of diamidostilbenedisulphonic acid with two molecules of phenol.	Yellow.
Buffalo rubin.	Derived from α-naphthylamin and naphthol.	Red.
Carmin-naphtha.	Derived from α-naphthylamin and naphthol.	Carmin.
Chrysamin.	Action of tetrazodiphenyl chlorid on sodium salicylate.	Sulphur-yellow.
Chrysoidin.	Diamidoazobenzene hydrochlorid.	Bright yellow.
Chrysolin.	Sodium benzyl-fluorescein.	Yellow.
Chrysophanin.	By ethylating brilliant yellow.	Orange-yellow.
Claret-red.	Sodium α-azonaphthalene, β-naphthol disulphonate.	Red.
Congo G R.	From benzidin, amidobenzolsulphonic acid, and naphthionsulphuric acid.	Red.
Congo-red.	Sodium benzidin and naphthionate.	Red.
Crocein-scarlet.	Diazotizing amidoazobenzolmonosulphonic acid with hydrochloric acid and sodium nitrite.	Scarlet.
Double brilliant scarlet G.	From the diazo-compound of β-naphthylamin-monosulphonic acid and β-naphthol.	Scarlet.
Double scarlet S.	From the diazo-compound of β-naphthylamin-monosulphonic acid and α-naphtholmonosulphonic acid.	Scarlet.
Fast brown G.	Sodium α-naphtholdisazo, *p*-azobenzenesulphonate.	Brown.
Fast red (*orseillin, rauracienne, roccellin, rubidin*).	Sodium β-naphtholazonaphthalene sulphonate.	Garnet-red.
Fast red B (*Bordeaux B*).	Derived from α-naphthylamin and naphthol.	Red.
French red.	Mixture of claret-red and naphthol-orange.	Red.
Hessian purple N.	One molecule of diamidostilbenedisulphonic acid with two molecules of β-naphthylamin.	Purple.
Hessian purple P.	One molecule of diamidostilbenedisulphonic acid with two molecules of naphthionic acid.	Purple.
Hessian violet.	One molecule of diamidostilbenedisulphonic acid with one molecule of α-naphthylamin and one molecule of β-naphthol.	Violet.
Hessian yellow.	One molecule of diamidostilbenedisulphonic acid with two molecules of salicylic acid.	Yellow.
Metanil-yellow.	Sodium phenylamidoazobenzene-*m*-sulphonate.	Yellow.

CONSPECTUS OF PIGMENTS.—*Continued.*

Name.	Composition, Preparation, Etc.	Color.
New coccin R (*coccinin, phenetol-red*).	Derived from α-naphthylamin and naphthol.	Red.
Orange I (*α-naphthol orange, chrysoin, resorcinol-yellow, tropæolin ooo No. 1*).	Sodium α-naphthol-azobenzene.	Reddish-orange.
Orange II (*β-naphthol orange, chrysamin, gold orange, mandarin, tropæolin ooo No. 2*).	Sodium β-naphthol-azobenzene.	Bright reddish-orange.
Orange III (*gold orange, helianthin, methyl-orange, tropæolin D*).	Ammonium dimethyl-anilin-azobenzene sulphonate.	Fiery orange.
Orange IV (*diphenylamin-orange, orange N, tropæolin oo*).	Potassium phenylated acid yellow.	Orange-yellow.
Orange G.	Sodium benzene-azo-β-naphthol-β-disulphonate.	Bright orange.
Palatin orange.	Ammonium tetranitrodiphenol.	Orange-yellow.
Ponceau 2 R (*Hylidin red*).	Action of hydrochlorid of diazo-*m*-xylene upon β-naphthol-disulphonic acid.	Red.
Ponceau 3 R (*Cumidin red*).	Action of diazo-*m*-cumene hydrochlorid upon β-naphthol-disulphonic acid.	Red.
Soudan brown (*Pigment-brown*).	Derived from α-naphthylamin and naphthol.	Brown.
Wool-black.	Combining paratolyl-β-naphthylamin with diazotized azobenzoldisulphonic acid.	Blue-black.
c. Benzene Colors (from benzene, C_6H_6).		
Anilin or *Amin colors*.		
Anilin-black (*Collin's black, jetolin*).	Oxidation of anilin hydrochlorid with potassium dichromate.	Black.
Nigrosin (*one of the indulins*).	Heating amidoazobenzene with anilin hydrochlorid.	Black.
Anilin blue.	Rosanilin heated with anilin and benzoic acid.	Blue.
Alkali blue (*fast blue, Guernsey blue, Nicholson blue*).	Sodium triphenylrosanilin-monosulphonate.	Bright blue.
Alkali blue D.	Sodium triphenylpararosanilin-monosulphonate.	Blue.
Bâle blue.	From nitrosodimethylanilin with ditolylnaphthylendiamin.	Blue.
Bavarian blue (*spirit diphenylamin blue*).		Blue.
Bavarian blue D S F.	Sodium triphenylpararosanilin disulphonate.	Blue.
China blue.	Similar to soluble blue.	Blue.
Coupier's blue (*acetin-blue, anilin-gray, azodiphenyl-blue, bengaline, fast blue, indulin-blue, printing blue, Roubaix blue*).	Heating amidoazobenzene with anilin hydrochlorid.	Blue.
Ethyl-blue.	Treating spirit-blue with ethyl chlorid.	Pure blue.
Light blue.		Blue.
Marine blue.		Blue.
Methyl-blue.	Treating spirit-blue with methyl chlorid.	Blue.
Neutral blue.	From nitrosodimethylanilin with phenylnaphthylamin.	Blue.
Night-blue (*Victoria blue*).		Blue.
Soluble blue (*Blackley blue, cotton blue, green-blue, liquid indigo-blue, navy-blue*).	Heating spirit-blue with sulphuric acid and the product with oxalic acid.	Blue.
Spirit-blue (*basic blue, gentian-blue, Humboldt blue, imperial blue, Lyons blue, opal-blue, Parma blue, rosanilin-blue*).	Triphenylrosanilin and triphenylpararosanilin hydrochlorids.	Blue.
Water-blue.	Similar to soluble blue.	Blue.
Anilin-brown.		Brown.

CONSPECTUS OF PIGMENTS.—*Continued.*

Name.	Composition, Preparation, Etc.	Color.
Phenylene-brown (*Bismarck-brown, Canelle-brown, cinnamon-brown, gold-brown, leather-brown, Manchester brown, Vesuvin*).	Triamidoazobenzene hydrochlorid.	Brown.
Anilin-green.		Green.
Acid green (*Guinea green, Helvetia green, light-green S F*).	Sodium diethyldibenzyl diamidotriphenyl carbinol-trisulphonate.	Bright green.
Aldehyd green.	Action of aldehyd on magenta with sulphuric acid.	Green.
Alkali green.	Derived from diphenylamin.	Green.
Brilliant green (*emerald green, new Victoria green*).	Tetramethyl-diparamidotriphenylcarbinol hydrochlorid with zinc or iron chlorid.	Green.
Ethyl-green (*new Victoria green, solid green*).	Tetrethyldiparamidotriphenylcarbinol sulphonate.	Green.
Fast green.	Sodium tetramethyl dibenzyl pseudrosanilin disulphonate.	Green.
Iodin-green (*crystallized green*).	Chlormethylhexmethylrosanilin hydrochlorid and zinc chlorid.	Green.
Light green.	Zinc chlorid and chlormethylhexamethylpararosanilin hydrochlorid.	Green.
Liquid acid green.	10–20 per cent. solution of acid green.	Green.
Malachite-green (*benzol-green, benzaldehyd-green, benzoyl-green, bitter-almond green, fast green, solid green, Victoria green*).	Tetramethyldiamidotriphenylcarbinol hydrochlorid. Made by the action of benzaldehyd upon dimethylanilin.	Green.
Methyl-green.	Chlormethylhexamethylpararosanilin hydrochlorid with zinc chlorid.	Green.
Metternich green.	Chlormethylhexamethylrosanilin hydrochlorid with zinc chlorid.	Green.
Night-green.	Chlormethylhexamethylrosanilin hydrochlorid with zinc chlorid.	Green.
Paris green.	Chlormethylhexamethylpararosanilin hydrochlorid with zinc chlorid.	Green.
Anilin-red.		Red.
Acid magenta (*magenta S, rubin S*).	Mixture of rosanilin monosulphonic and disulphonic acids.	Red.
Azalein.	Rosanilin nitrate.	Red.
Cerise.		Cherry color.
Fuchsin (*magenta, new red, rubin*).	Rosanilin hydrochlorid.	Deep red.
Magenta (*harmalin, rosein*).	Pararosanilin and rosanilin hydrochlorids.	Deep red.
Maroon.	From resinous residue after extraction of magenta.	Dark red.
Phenosaffranin (*saffranin B extra*).		Red.
Rosanilin (*anilin-red, Brüning's red, Coupier red, nitrobenzol-red*).	A derivative of anilin.	Red.
Rosein.	Rosanilin acetate.	Red.
Saffranin (*anilin-rose*).	Mixture of tolusafranin and phenotolusafranin.	Red.
Anilin-violet (*Tyrolin*).		Violet.
Acid violet.	Sodium dimethylrosanilintrisulphonate.	Violet.
Crystal violet (*violet 6 B*).	Hexamethylpararosanilin hydrochlorid.	Violet.
Dahlin (*Hofmann's violet, primula*).	The ethyl and methyl derivatives of rosanilin.	Violet.
Ethyl-purple.	Hexa-ethyl-pararosanilin.	Blue violet.
Iodin-violet.		Violet.
Mauvanilin.	From residue from arsenic acid-process of making magenta.	Violet.

CONSPECTUS OF PIGMENTS.—*Continued.*

Name.	Composition, Preparation, Etc.	Color.
Mauvein (*anilin-purple, anilin-violet, indisin, mauve, Paris red, Perkin's violet*).	Oxidation of anilin containing toluidin.	Purple.
Methyl-violet (*Paris violet*).	Pentamethylpararosanilin hydrochlorid.	Violet.
Methyl-violet 6 B (*benzyl-violet*).	Pentamethylbenzylpararosanilin hydrochlorid.	Violet.
Red violet.		Violet.
Rosanilin-violet (*imperial violet, Parma violet, phenyl-violet, regina-purple, spirit-violet*).	Monophenylrosanilin and diphenylrosanilin hydrochlorids.	Dull violet.
Violanilin.	One of the indulins.	Gray-violet.
Violet R.		Violet.
Anilin-yellow.		Yellow.
Acid yellow (*fast yellow*).	Sodium amidoazobenzene sulphonate.	Yellow.
Chrysanilin.	Action of steam on the residue left after extraction of rosanilin.	Yellow.
Flavanilin.	Heating acetanilid with zinc chlorid.	Yellow.
b. The Auramins.		
Auramin.	Tetramethyldiamidobenzophenonimid hydrochlorid.	Brilliant yellow.
Aurantia (*imperial yellow*).	Ammonium hexanitrodiphenylamin.	Orange-yellow.
Dimethylphenylene-green (*Bindscheidler's green*).	Oxidizing dimethyl paraphenylene diamin with dimethylanilin.	Yellow-green.
Ethylene-blue.	Formed from nitrosodimethylanilin.	Blue.
Gallocyanin (*new fast violet, solid violet*).	Formed from nitrosodimethylanilin with gallic acid.	Blue-violet.
Giroflé.	Formed from nitrosodimethylanilin.	Blue.
Indophenol.	Simultaneous oxidation of a phenol and a paradiamin.	Indigo-blue.
Indophenol-blue (*naphthol-blue*).	Action of nitrosodimethylanilin on α-naphthol.	Indigo-blue.
Lauth's violet (*thionin*).	Oxidation of paraphenylendiamin in an acid solution containing hydrogen sulphid.	Violet.
Methylene-blue (*fast blue*).	Tetramethylthionin hydrochlorid with zinc chlorid.	Green-blue.
Muscarin.	A derivative of nitrosodimethylanilin.	Blue.
Neutral red.	Dimethyldiamidotoluphenazin hydrochlorid.	Red.
Neutral violet.	Dimethyldiamidophenazin hydrochlorid.	Violet.
New blue (*cotton-blue R, fast blue for cotton, naphthylenene-blue*).		Blue.
Nile blue.	Action of muscarin on α-naphthylamin.	Blue.
Phenylauramin.	Heating auramin with anilin.	Orange-yellow.
Phenylene-blue.	Oxidation of phenylenediamin with anilin.	Green-blue.
Prune.	Obtained from gallic methyl ether.	
Toluylene-blue.	Oxidation of toluylene diamin.	Blue.
c. Fluorescein colors. The Eosins (ἠώς, morning redness).		
Cyanosin.	Formed by methylating phloxin.	Blue.
Cyanosin B.	Formed by ethylating tetrabromtetrachlorfluorescein.	Blue.
Eosin.	Tetrabromfluorescein.	Red.
Eosin A extra.	Sodium tetrabromfluorescein.	Garnet-red.
Eosin B.	Sodium or ammonium tetrabromfluorescein.	Red.
Eosin-orange.	Sodium dibromfluorescein.	Orange-red.
Eosin-scarlet (*daphnin, eosin B N, lutecienne, rose des Alpes, safrosin*).	Sodium, potassium, or ammonium dibromdinitrofluorescein.	Scarlet.

CONSPECTUS OF PIGMENTS.—*Continued.*

NAME.	COMPOSITION, PREPARATION, ETC.	COLOR.
Erythrosin (*dianthin B, eosin bleuâtre, eosin J, iodeosin B, pyrosin B, rose Bâle'au, soluble primrose*).	Sodium, potassium and ammonium tetraiodofluoresceïn.	Light brick-red to brown-red.
Erythrosin G (*dianthin G, iodeosin G*).	Salts of di-iodofluoresceïn.	Red.
Phloxin P.	Potassium tetrabromdichlorfluoresceïn.	Red.
Phloxin T.	Formed by bromizing tetrachlorfluoresceïn.	Red.
Primrose (*eosin S, ethyl eosin, rose J Bâle alcool, spirit eosin*).	Potassium ethyltetrabromfluoresceïn.	Bright-red.
Rose Bengale (*Bengal red*).	Formed by iodizing dichlorfluoresceïn.	Blue-red.
Rose Bengale B.	Formed by iodizing tetrachlorfluoresceïn.	Blue-red.
Soluble eosin.	Sodium or ammonium tetrabromfluoresceïn.	Reddish-brown.
d. Resorcin colors.		
Resorcin-blue (*fluorescent resorcinal blue, lacmoid*).	Formed by heating resorcin with sodium nitrite.	Blue.
Resorcin-brown.	Combining resorcin with a diazo-compound.	Brown.
Resorcin-violet.	Action of resorcin on tetramethyldiamidobenzophenon.	Violet.
Solid green.	Dinitroresorcin.	Green.
d. Naphthalene Pigments.		
Brilliant yellow.	Treating α-naphtholdisulphonic acid with nitric acid.	Yellow.
Martius' yellow (*golden yellow, naphthalene-yellow, naphthol-yellow, Manchester yellow, saffron-yellow*).	Sodium, ammonium, or calcium dinitro-α-naphthol.	Yellow.
Napthalene-red (*magdala-red, naphthalin-scarlet, Soudan-red*).	Diamido-naphthyl napthazonium chlorid.	Scarlet.
Naphthalene-violet (*naphthameïn*).	Formed by oxidizing α-naphthylamin.	Violet.
Naphthol-blue (*indophenol, naphthol-violet*).	Action of nitrosodimethylanilin on α-naphthol.	Indigo-blue.
Naphthol-green B.	Treating β-naphtholmonosulphonic acid S with nitric acid.	Green.
Naphthol-yellow S (*acid yellow S*).	Treating α-naphtholtrisulphonic acid with nitric acid.	Yellow.
Phenanthrene-red.		Red.
Sungold.		Yellow.
e. Phenol Pigments.		
Aurin (*rosolic acid*).	Heating phenol with sulphuric and oxalic acids.	Orange-red.
Azulin (*azurin, rosolic blue*).	Heating rosolic acid with anilin.	Blue.
Corallin-red (*aurin R, peonin, peony-red*).	Heating aurin with ammonium hydroxid.	Red.
Corallin-yellow.	Formed from aurin.	Orange-yellow.
Flavaurin (*new yellow*).	Ammonium dinitrophenolparasulphonate.	Yellow.
Garnet-brown (*grenate brown*).	Potassium or ammonium cresylpurpurate.	Brown.
Phenol-blue.	Action of dimethyl phenylenediamin on phenol.	Green-blue.
Phenyl-brown (*Havana brown, leather-brown, phenicin, rothein*).	Action of sulphuric and nitric acids on phenol.	Brown.
Picric Acid.	Trinitrophenol.	Yellow.
Quinolin colors.		
Quinolin-blue (*cyanin*).	Reaction of amyl iodid, quinolin and methylquinolin.	Blue.
Quinolin-green.	Tetramethyldiamidodiphenylquinolol hydrochorid.	Green.
Quinolin-red.	Heating benzotrichlorid with quinaldin and isoquinolin in the presence of zinc chlorid.	Red.
Quinolin-yellow.	Heating quinaldin with phthalic anhydrid and zinc chlorid.	Yellow.

CONSPECTUS OF PIGMENTS.—*Continued.*

NAME.	COMPOSITION, PREPARATION, ETC.	COLOR.
Salicylic acid colors. Salicyl-orange.		Orange-yellow.
Salicyl-yellow.	Monobromsalicylic acid or its sodium salt.	Yellow.
Victoria yellow (*anilin-orange, saffron-substitute, Victoria orange*).		Orange-yellow.
	3. VEGETABLE PIGMENTS.	
Adansonia-red.	Obtained by Walz from the bark of *Adansonia digitata*, L.	Blood-red.
Æthylpurpurin.	Obtained by Schützenberger and Schiffert from purpurin.	Red.
Alder-red.	Obtained from the wood of *Alnus glutinosa*. Gaert.	Red.
Alizarin.	Discovered in 1826 by Colin and Robiquet in madder (*Rubia tinctoria*); named from *Ali-zari*, the Oriental commercial name for madder.	Red.
Alkanna-green.	Obtained from madder-root.	Green.
Alkanna-red (*Alkanet, Anchusin, Pseudalkannin, "Acid anchusique,"* Pelletier).	Obtained from the roots of *Anchusa tinctoria* or *Alkanna tinctoria* of southern Europe.	Red.
Anthocyan (*Flower-blue*).	The coloring-matter, according to Marquart, of many blue, red, and violet flowers, the tint depending on the amount of acid present. Cf. *Cyanin*.	Blue.
Anthoxanthin (*Flower-yellow*).	Obtained by Marquart from yellow flowers. Cf. the *Xanthin* of Cloez, and *Xanthëin* of Fremy.	Yellow.
Antwerp-brown.	Asphaltum mixed with a drying-oil.	Brown.
Archil (*French purple, orchil, orchil-purple*).	From *Roccella tinctoria* and *R. fuciformis*.	Violet, mauve-purple.
Arnatto (*annatto, annotto, orleans*).	The fruit-pulp of *Bixin orellana*, L. Employed by silk-dyers and varnish-makers; also for coloring cheese, cream, chocolate, confectionery, etc. See *Bixin*.	Yellowish-red.
Azale (*pincoffin*).	Crude alizarin.	Red.
Azolitmin.	From litmus.	Deep blood-red.
Bacterio-purpurin.	Obtained from the protoplasm of *Beggiatoa roseo-persicina*.	Peach-color.
Barwood-red (*mock Turkey red*).	Wood of *Baphia nitida*.	Orange-red.
Bezette (*turnesol rag*).	Juice of *Croton tinctorium*.	Blue.
Bioxyalizarin.	Obtained from Alsatian madder by treatment with alcohol and benzol.	Orange-red.
Bixin (*orellin, orlean-red*).	Obtained from *Bixa orellanna*.	Cinnabar-red.
Bladder-green (*iris-green, sap-green*).	From berries of *Rhamnus catharticus*.	Green.
Brasilin (*brazilin*).	Obtained by Chevreul and Bolley from the wood of *Cæsalpinia sappan*, L.; *C. brasiliensis*, S. W.; *C. echinata*, Lam.	Golden-yellow.
Brown madder.	Lake from madder-root.	Rich brown.
Brown pink (*stil de grain*).	From *Rhamnus infectorius*, or from quercitrin bark.	Dark-pink.
Canarin.	Oxidation of potassium sulphocyanid with potassium chlorate in the presence of sulphuric and hydrochioric acids.	Orange-yellow.
Capsicum-red.	First obtained by Braconnot from *Capsicum annuum*, L.	Red.
Capucine madder.	Lake from madder-root.	Reddish-orange.
Carotin.	The coloring-matter of the root of the cultivated carrot, *Daucus carota*, discovered, in 1832, by Wackenroder.	Deep-red to golden-red.
Carthamin (*rouge végétal, safflower-carmin*).	Obtained from saffron (*Carthamus tinctorius*), L.	Dark brownish-red to yellowish-red and purple, according to mordant.
Catechu (*cashoo*).	Extract from *Acacia catechu*.	Brown.

CONSPECTUS OF PIGMENTS.—*Continued.*

NAME.	COMPOSITION, PREPARATION, ETC.	COLOR.
Cerulein (*azulene*).	A vegetable principle.	Blue.
Chelidoxanthin.	Obtained by Probst from *Chelidonium majus*, L.	Yellow.
Chemic black.	Gall-nuts with ferric nitrate and pyroligneous acid.	Black.
Chica-red (*carajura, chico-red*).	Leaves of *Bignonia chica.*	Orange-red.
Chinese green (*laokao*).	From *Rhamnus chlorophorus* and *R. utilis.*	Green.
Chlorogenin.	Obtained from madder-root by Schunck.	Green.
Chlorophyl (*Leaf-green*).	From the leaves or other green parts of plants, and certain invertebrates. A complex coloring-matter composed of varying mixtures of *phyllocyanin*, and *phylloxanthin.* Cf. *phycoxanthin, phycophäin.*	Green.
Chlorrubiadin.	Obtained by Schunck from madder-root.	Yellow.
Chlorrubian.	Obtained by Schunck from madder-root.	Yellow.
Chrome-black.	Produced by mordanting with potassium dichromate and dyeing with logwood.	Black.
Chrysophan.	Obtained from the roots of rhubarb (*Rheum palmatum*).	Gold or sulphur-yellow.
Chrysophanic acid.	Discovered by Schrader (1819); found in the lichens, *Parmelia parietina, Parmelia caparata, Squamaria elegans*, and *Cassia bijuga, Andira araroba*, (Goa powder), *Rheum palmatum.*	Yellow.
Chrysorhamnin.	Obtained from the fruit of *Rhamnus amygdalenus, R. infectorius*, and *R. saxatilis.*	Golden yellow.
Cinchona-red (*Chinaroth, rosso di China, cinchofulvic acid*).	A phlobophene discovered by Reuss (1812) in cinchona bark.	Red.
Cissotannic-acid.	Obtained by Wittstein from reddened autumn leaves and from strawberries.	Brown-red or red-brown.
Colorin.	Dry alcoholic extract of garancin.	Red.
Common black.	From logwood, sumac, and fustic, by adding a mixture of green and blue vitriol.	Black.
Cork black.	Burning cork in closed vessels.	Black.
Crocin (*Polycroit*).	Obtained from *Crocus sativus, Gardenia grandifolia*, and *Fabiana imbricata.*	Yellow.
Cudbear.	From *Lecanora tartarea* and other lichens.	Purple or violet.
Curcumin (*Curcuma-yellow, Turmeric*).	Obtained from the roots of *Curcuma longa*, and other species; cultivated throughout Eastern tropics; used in cookery, and for test-paper.	Yellow.
Cyanin (*Flower-blue*).	Found by Fremy and Cloez in blue flowers, *e.g.*, corn-flower, violets, etc. This appears to be a pure form of the *anthocyan* of Marquart. The scarlet-red of some flowers appear to be a mixture of *cyanin* and *xanthin.*	Blue.
Dragon's blood.	Resin from *Dracæna draco.*	Red.
Dutch-pink.	From *Reseda luteola.* See *Luteolin.*	Pink.
Dyer's broom.	From *Genista tinctoria.*	Yellow.
Erythrin.	Obtained from *Roccella fuciformis.*	Red.
Erythrophyl (*Leaf-red*).	Obtained by Berzelius from reddened autumn leaves (*e.g.*, cherry, currant).	Red.
Etiolin.	The yellow pigment of etiolated leaves. Cf. *xanthophyl, phylloxanthin.*	Yellow.
Filix-red.	Obtained from the rhizomes of *Aspidium filix mas.*	Dark brick-red.
Florence lake (*Florentine lake*).	Lake from logwood.	Deep brown-red.
Florideæ-green.	That portion of the compound pigment (*Rhodophyl*) of the *red algæ* which is soluble in alcohol.	Green.
Fucoxanthin.	Sorby's name for the principal coloring-matter of the olive-green sea-weeds (*Fucaceæ* and *Laminarasceæ*).	Amber.
Fustin (*fisetin*).	Obtained from the root of *Rhus cotinus.*	Yellow.

CONSPECTUS OF PIGMENTS.—*Continued.*

NAME.	COMPOSITION, PREPARATION, ETC.	COLOR.
Galloflavin.	Oxidation of gallic acid in alkaline solution.	Yellow.
Gambier (*gambir, pale catechu, terra japonica*).	Extract from leaves of *Uncaria gambier*.	Yellowish-brown.
Gamboge.	Gum-resin from *Garcinia hanburyi*.	Brownish-yellow.
Garanceux.	From the waste madder of the dye-houses.	Red, deep-brown, lilac, black.
Garancin.	Action of conc. sulphuric acid on pulv. madder.	Red.
Gas-black (*hydrocarbon-black*).	Burning natural gas against a revolving iron cylinder.	Black.
Glaucotin.	Obtained by Probst from the flowers of *Glaucium luteum*, Scop.	Yellow.
Guaiac-yellow.	Obtained by Pelletier and Hadelich from the resin of *Guaiacum officinale*, L.	Yellow.
Harmal-red (*Harmalin*).	Obtained by Göbel as an oxidation-product of harmalin from *Ruta graveolens*, and other species of *Rutaceæ*.	Red.
Hematein.	Obtained from hematoxylin by the action of ammonia.	Black-violet.
Hematoxylin.	From logwood, *Hæmatoxylon campechianum*.	Red, blue, purple.
Hooker's green.	Mixture of Prussian blue and gamboge.	Green.
Ilixanthin.	Obtained by Moldenhauer from *Ilex aquifolium*.	Yellow.
Indigo (*Indian blue*).	From leguminous plants of the genus *Indigofera*.	Blue.
Indigo-brown.	Mixture of Indihumin and indiretin.	Brown.
Indigo-carmin.	Sodium salt of indigo-extract.	Blue-red.
Indigo-extract (*disulphonic acid, indigotin*).	Solution of indigo in strong sulphuric acid.	Blue.
Indigo-red (*indigo-purple, indirubin*).	Decomposition of Indican by oxalic or tartaric acid.	Reddish-purple.
Indigotin (*Indigo-blue, liquid blue, Saxony blue, oat-blue*).	A pigment known to the ancients, and obtained from many plants, *Indigofera tinctoria*, L.; *Indigofera anil*, L.; *Indigofera argentea*, L.; *Indigofera disperma*, L.; *Isatis tinctoria, Isatis lusitanica* (see *Woad*), *Nerium tinctorium*, or *Wrightia tinctoria, Polygonum tinctorium, Polygonum fagopyrum, Polygonum chinense, Marsdenia tinctoria, Asclepias tingens, Galega tinctoria, Mercurialis perennis, Melampyrum arvenæ, Melampyrum cristatum, Polygola bracteolata, Croton tinctorium, Croton verbascifolium, Phytolacca decandra, Phytolacca mexicana, Monotropa hypopitys, Tephrosia apollinea, T. toxicaria, Randia aculeata, Amorpha fruticosa*; also found in animal fluids, urine, sweat, milk, pus. This pigment is not a direct product of the plant-juices or animal fluids, but a decomposition-product, the result of the action of bacteria upon indican or other glucosids. Cf. *Bacillus indigoferus*, Classen, and *Bacillus indigogenus*, Alvarez, under *Bacteria, Synonymatic Table of*.	Blue.
Indigo-white (*indigogen*).	Action of reducing agents on commercial indigo.	Blue.
Isatrin-yellow.	Action of phenylhydrazinparasulphonic acid on dioxitartaric acid.	Yellow.
Japan black (*asphaltum, Brunswick black, Japan lacquer*).	Cooking asphaltum with linseed-oil and adding turpentine.	Black.
Kyanophyl.	Wiesner's name for nearly pure chlorophyl freed from its yellow pigment, *xanthophyl*. Cf. *Phyllocyanin*.	Blue-green.
Lamp-black (*soot*).	Imperfect combustion of resin, oils, gas, tar, etc.	Black.
Ligulin.	Obtained by Nicklès and Reinsch from the berries of *Ligustrum vulgare*. Cf. *Œpholin*.	Carmin-red.
Lithospermum-red.	First obtained by Ludwig and Kromayer from the bark of the root of *Lithospermum arvense*.	Red.
Litmus.	From *Roccella tinctoria*, and other lichens.	Blue.
Logwood-black.	Mordanting with iron salts and dyeing with logwood.	Black.

CONSPECTUS OF PIGMENTS.—*Continued.*

Name.	Composition, Preparation, Etc.	Color.
Lutein (*Egg-yellow*).	A red lipochrome obtained by Thudicum from many kinds of yellow flowers, seeds, the flesh of berries, and the yellow bodies in the ovaries of mammals, egg-yolks, and other animal substances.	Yellow.
Luteolin.	Discovered by Chevreul in 1830. The yellow coloring-matter of *Reseda luteola*, L. (Ash of Jerusalem, Dyers' Rocket, Dyers' Weed, Dyers' Yellow-weed, Goud, Green-weed, Italian Rocket, Weld, Woad, Wolds, Woulds, Woold, Yellow Rocket, Yellow Weed, Yellows); chiefly used for paper-hangings. The color called Dutch pink is also obtained from it.	Green, yellow, or blue, according to the mordants employed.
Madder (*Adrianople red, madder-red, Turkey red*).	From the roots of *Rubia tinctorum*.	Red.
Madder-brown.	From catechu worked with madder-colors.	Brown.
Madder-carmin.	Lake from madder-root with an aluminum base.	Carmin.
Madder-orange.	Lake from madder-root.	Orange.
Madder-purple (*Field's purple, purple rubiate*).	Lake from madder-root.	Deep-purple.
Madder-yellow.	Lake from madder-root.	Bright yellow.
Marennin.	The green coloring-principle absorbed by oysters from diatoms (*Navicula ostrearia*) in "greening." Cf. *Diatomin*.	Green.
Morin.	From the Heart-wood of mulberry (*Morus tinctoria*).	Yellow.
Morindin.	Discovered by Anderson, in 1849, in the bark of the root of *Morinda citrifolia*.	Sulphur-yellow to red, according to mordant.
Munjistin (*Indian madder, mungeet, munjeet*).	Obtained from the East India madder (*Rubia munjista*, or *Rubia cordifolia*).	Golden-yellow to red, according to mordant.
Nemours blue.	Dyeing with sandal-wood and afterward with indigo.	Blue.
Nitropurpureïn.	Obtained by Stenhouse from *Purpureïn* by the action of nitric acid.	Scarlet.
Œnolin (*œnolinic acid, Berry-blue, Berry-red*).	Obtained by Mulder and Glénard from grapes, whortleberries, bilberries, blackberries, mulberries, elderberries, etc. Cf. *Ligulin*.	Blue-black, violet-red to red-brown.
Orcin (*orcinol*).	From orchella weed and other lichens.	Blood-red.
Orellin.	From *Bixa orellana*, L. See *Bixin*.	Red.
Orlean-red.	Obtained from *Bixa orellana*. See *Bixin*.	Red.
Oxyrubian.	Obtained by Schunck from madder-root.	Brown.
Peach-black.	Calcination of peach-stones.	Black.
Pheophyl (*Phæophyl*).	The compound pigment of the *Fucaceæ* and *Phæosporeæ*. Cf. *Phycophæin* and *Phycoxanthin*.	Olive or brown.
Phlobaphene (*Bark-pigment*).	Obtained from the bark of various trees and shrubs, by Stahelin, Hofstetter, Hesse, Hlasiwetz, Grabowski, etc.	Brown-red.
Phycochrome.	A complex pigment of the *Cyanophyceæ*, or *Phycochromaceæ*. Cf. *Phycocyanin*.	Blue-green.
Phycocyanin.	Obtained from various phycochromaceous algæ and from certain invertebrates (*Chætopterus*). Cf. *Scytonemin*.	Blue in transmitted light, blood-red in reflected light.
Phycoerythrin.	That portion of the compound pigment (*Rhodophyl*) of the red *Algæ* which is soluble in water. Cf. *Florideæ-green*.	Red.
Phycohematin.	Obtained from the sea-weed *Rhytiplæa tinctoria*.	Blood-red.
Phycopheïn.	Obtained from the *Fucaceæ* and *Phæosporeæ*. Schutt confines the name to that part of pheophyl which is soluble in water.	Reddish-brown.
Phycoxanthin.	That portion of the pheophyl of the *Fucaceæ* and *Phæosporeæ* which is soluble in alcohol.	Yellow.
Phyllerythrin.	A general term for the red pigment of leaves.	Red.

CONSPECTUS OF PIGMENTS.—*Continued.*

NAME.	COMPOSITION, PREPARATION, ETC.	COLOR.
Phyllocyanin (*Cyanophyl*).	The acid constituent of chlorophyl. Cf. *Phylloxanthin*.	Blue or greenish-blue.
Phylloxanthin (*Xanthophyl*).	One of the constituents of *Chlorophyl*. Cf. *Phyllocyanin*.	Yellow.
Phymatorhusin.	From metastatic deposits in the skin.	
Phyterythrin.	Same as *Erythrophyl*.	Red.
Pink madder.	Lake from madder-root.	Pink.
Pittacal.	From beechwood tar.	Blue.
Pseudopurpurin.	Obtained from Alsatian madder by treatment with alcohol and benzol.	Red.
Puccoon.	The Indian term for the dye obtained from various North American herbs, *e.g.*, *Lithospermum hirtum*, *Lithospermum canescens*, *Sanguinaria canadensis*, *etc.*	Red to yellow.
Purple-madder.	Lake from madder-root.	Purple.
Purpurein.	From *Purpurin* by the action of ammonium hydroxid.	Carmin-red.
Purpurin (*Oxyalizarin*, *Madder purple*, *Field's purple*, *Purple rubiate*).	Obtained by the action of yeast on Alsatian or Avignon madder.	Cherry-red to purple, according to mordant.
Quercetin (*Meletin*).	Obtained from the heart-wood of *Rhus cotinus*, the berries of *Hippophæa rhamnoides*, the green parts of *Calluna vulgaris*, the flowers of *Cornus mascula*, horsechestnut leaves and flowers, etc.	Citron-yellow.
Quercitrin.	Discovered by Chevreul and Brandt. It occurs in the bark of the black-oak (*Quercus tinctoria*, Mich.), as well as other species of oak, also in tea-leaves, and as queræscitrin in the leaves, flowers, and cotyledons of the horsechestnut.	Sulphur-yellow to chrome-yellow.
Quinora-red.	Obtained from cinchona bark by Pelletier and Caventon (1820).	Red.
Rhodophyl.	The compound pigment of the red *Algæ*. Cf. *Phycoerythrin* and *Florideæ-green*.	Carmin-red in transmitted light, green or reddish-yellow in reflected light.
Rhodospermin.	The red coloring-matter of the *Florideæ*, obtained by Rosanoff, Cramer, Askenasy, Sorby, and others. Cf. *Phycoerythrin*.	Red.
Rose-lake.	From logwood.	Deep brown-red.
Rose-madder.	Lake from madder-root.	Rose.
Rottlera-red.	Obtained from the dust-like hairs of the capsules of *Rottlera tinctoria*, Pixby, and used in India as a dye for silk.	Red, orange, or, by special process, scarlet.
Ruben's madder.	Lake from madder-root.	Brown.
Ruberythrinic acid.	An acid glucosid, isolated by Rochleder, in 1851, from the madder *Rubia tinctoria*, L., of which it appears to be the primary chromogen.	Brick-red, cherry-red.
Rubiacinic acid.	Obtained from *Rubiafin* by Schunck.	Citron-yellow.
Rubiadin.	Obtained by Schunck from madder-root.	Golden-yellow.
Rubiadipin.	Obtained from madder-root by Schunck.	Yellowish-brown; it yields a blood-red color with alkalies.
Rubiafin.	Obtained from madder-root by Schunck.	Yellow.
Rubiagin.	Obtained by Schunck from madder-root.	Citron-yellow.
Rubian.	Obtained by Schunck from madder-root (*Rubia tinctoria*).	Dark-yellow; it yields with an alum mordant a bright orange, with iron a clear brown.
Rubianic acid.	Obtained by Schunck from *Rubian*, and held by him to be identical with Rochleder's *Ruberythrinic acid*.	Citron-yellow.
Rubianin.	Obtained by Schunck from madder-root.	Bright-yellow.
Rubidehydran and Rubihydran.	Obtained by Schunck from madder-root.	Dark-yellow.

CONSPECTUS OF PIGMENTS.—*Continued.*

Name.	Composition, Preparation, Etc.	Color.
Rubiretin.	Obtained by Schunck by treating *Rubian*, *Rubidehydran*, and *Rubihydran* with dilute acids and alkalies, or by the action of *erythrozym* on *rubian*.	Dark reddish-brown.
Saffron-yellow.	Obtained from saffron (*Carthamus tinctorius*, L.), by lead acetate and ammonium hydroxid.	Brown-yellow.
Santalin.	From hard red-woods—*Bar-wood*, *Calliatura wood*, *Cam-wood*, *Santal-wood*.	Red.
Sawwort.	From foliage of *Serratula tinctoria*.	Yellow.
Sedan black.	Ferrous sulphate on wood, logwood, and sumac.	Intense black.
Spanish black.	Burnt cork.	Black.
Spiræïn (*Spiræa yellow*).	Obtained by Löwig and Weidmann from *Spiræa ulmaria*, L.	Yellow.
Spirit-brown.	Dyeing with quercitrin and then with peachwood, logwood, and alum.	Brown.
Styrogallol.	By the union of cinnamic and gallic acids.	Pale green.
Tallochlor.	Obtained from thistle-heads, artichokes, and flower-buds, by Verdeil, and from various lichens by Schnedermann and Knop.	Green.
Tartrazin.	Action of phenylhydrazinparasulphonic acid on dioxitartaric acid.	Yellow.
Thujetin.	Obtained from *Thujin;* perhaps identical with *Quercetin*.	Yellow.
Thujin.	Obtained from the green portions of the common Arbor vitæ (*Thuja occidentalis*).	Citron-yellow.
Vandyke-brown (*Cassel-brown*).	Species of peat or lignite.	Reddish-brown.
Verantin.	Obtained by Schunck from madder-root (*Rubia tinctoria*).	Reddish-brown.
Woad.	Leaves of *Isatis tinctoria*. Cf. *Luteolin*.	Blue.
Wongshy.	From seed-pods of *Gardenia florida*.	Yellow.
Xanthëin (Fremy), Xanthin (Cloez) (*Flower-yellow*).	Obtained by Fremy and Cloez from yellow flowers (*e. g.*, sunflowers and yellow dahlias). Cf. *Anthoxanthin*.	Yellow.
Xanthin.	Obtained by Higgin and Kuhlmann from madder-root. Schunck holds this to be an impure *Rubian*, and Rochleder an impure *Ruberythrinic acid*.	Yellow.
Xanthophyl (*Leaf-yellow*).	Obtained by Berzelius from yellow autumn leaves, and other parts of plants. Krauss uses it as synonymous with *Phylloxanthin*.	Yellow.
Xanthorhamnin.	Fruit of *Rhamnus amygdalinus*, *R. infectorius*, and *R. saxatilis*.	Olive-yellow.
Xanthotannic acid.	Obtained by Ferrein from the reddened autumn leaves of the elm.	Yellow.
Xylochloric acid (*Wood-green*).	Isolated from old wood by Bley, Jr.	Green.
Yellow carmin.	Lake from Persian berries or quercitrin bark.	Yellow.

Pile (*pīl*) [*pilus*, hair]. The hair, or hairs collectively, of any part of the integument; a hemorrhoid; a battery. **P., Matteuci's Muscular**, a voltaic battery or pile, the elements of which are formed of longitudinal and transverse sections of muscle connected alternately.

Pileate (*pil'-e-āt*) [*pileus*, a cap]. In biology, having a pileus, or cap, as certain fungi.

Pileiform (*pil'-e-if-orm*) [*pileus*, a cap; *forma*, form]. In biology, pileate; having the form of a pileus.

Pileolus (*pil-e'-o-lus*) [*dim.* of *pileus*, a cap: *pl.*, *Pileoli*]. In biology, a little pileus.

Pileorhiza (*pil-e-or-i'-zah*) [*pileus*, a cap; *ῥίζα*, a root]. In biology, the root-cap.

Pileous (*pil'-e-us*) [*pilus*, hair]. Pertaining to hair.

Piles (*pīlz*). See *Hemorrhoids*.

Pileum (*pil'-e-um*) [*pileum*, a cap: *pl.*, *Pilea*]. In biology, the cap or whole top of the head of a bird, from bill to nape, including the forehead, vertex, and occiput.

Pileus (*pil'-e-us*) [*pileus* also *pileum*, a cap: *pl.*, *Pilei*]. In biology, a term first introduced by Rondelet (1554) to designate the disc of the *Medusæ*, for which many writers have substituted the name *umbrella* or *disc*. It

is also applied to the cap-like or umbrella-like summit of the stipe of many fungi. The hymenium-bearing portion is the same as *cap*. **P. hippocraticus**, the capeline bandage.

Pilewort (*pil'-wert*). See *Ficary*.

Pili (*pi'-li*) [*pilus*, a hair]. Hairs. **P., Congenital**, hair existing at birth. **P., Post-genital**, that appearing some time after birth.

Piliation (*pil-e-a'-shun*) [*pilus*, hair]. The formation and production of hair.

Pilidium (*pil-id'-e-um*) [πιλίδιον, a little hat or cap]. In biology: (1) A free-swimming, helmet-shaped larva, occurring among the *Nemertina*. It holds a position intermediate between the young *Turbellarian* larva of the *Polyclada* (cf. *Müller's Larva*) and the typical *Trochophoran Larva*. (2) A hemispheric apothecium in certain lichens.

Piliferous (*pi-lif'-er-us*) [*pilus*, a hair; *ferre*, to bear]. In biology, bearing a slender bristle or hair, or beset with hairs. **P. Cyst**, a dermoid cyst.

Piliform (*pi'-lif-orm*) [*pilus*, hair; *forma*, a form]. Having the form or appearance of hair; filiform.

Piligerous (*pi-lij'-er-us*) [*pilus*, hair; *gerere*, to carry]. Piliferous; covered with hair.

Pilimiction (*pi-lim-ik'-shun*) [*pilus*, hair; *mingere*, to urinate]. The passing of urine containing hair-like filaments.

Pill (*pil*) [ME., *pille*, pill]. See *Pilula*. **P., Blair's**, an empiric English preparation containing colchicum and used in the treatment of gout. **P., Blaud's.** See *Blaud*. **P., Blue.** See *Hydrargyrum*. **P.-box**, a box for holding pills. **P.-coater**, a machine for coating pills with sugar, gelatin, or other material. **P., Compound Cathartic.** See *Colocynth*. **P., Compressed**, a pill made by compressing the powdered substance into proper shape by means of a powerful press, without the use of an excipient. **P., Dupuytren's**, a pill containing extract of opium, bichlorid of mercury, and extract of guaiac. **P., Friable**, a pill that crumbles into powder on slight pressure. **P., Griffith's.** See *Ferrum*. **P.-mass**, a cohesive mass into which the ingredients of the pills are worked. **P.-tile**, a metallic plate with semi-cylindric grooves on its upper surface. It is used in the manufacture of pills.

Pillar (*pil'-ar*) [*pila*, a pillar]. In biology, a columnar structure, a columella, modiola, crus, peduncle. **P. of the Abdominal Ring**, one of the columns on either side of the abdominal ring. **P., Anterior, of the Fauces**, the fold on each side of the uvula formed by the projection of the palatoglossus muscle covered by mucosa. **P., Anterior, of the Fornix**, the band of white matter on either side that passes from the anterior extremity of the fornix to the base of the brain, forming part of the corpus albicans, and that curves upward into the optic thalamus of the corresponding side. **P. of Corti**, one of the rods of Corti, two greatly modified epithelial cells in the organ of Corti; they are slender, slightly S-shaped, longitudinally striated bodies, consisting of a denser substance—the pillar proper—and a thin, imperfect protoplasmic envelop. **P. of the External Abdominal Ring**, one of the two columns or pillars forming the free borders of the aponeurosis at the site of the external abdominal ring. The *external pillar* is formed by that portion of Poupart's ligament which is inserted into the spine of the pubis. The *internal*, or *superior pillar* is a broad, thin, flat band, which interlaces with its fellow on the opposite side in front of the symphysis pubis. **P., External, of the Diaphragm.** See *Crus of the Diaphragm*. **P. of the Fauces**, one of the folds of mucous membrane on either side of the fauces. **P., Flexible**, a jointed pillar for inclining the body of the microscope. **P., Internal, of the Abdominal Ring.** See *P. of the External Abdominal Ring*. **P., Muscular.** See *Muscle-column*. **P., Posterior, of the Fauces**, a fold at each side of the uvula formed by the palato-pharyngeus muscle, covered by mucosa. **P., Posterior, of the Fornix**, one of the two bands which pass from the posterior extremities of the fornix downward into the descending horn of the lateral ventricle. **P., Superior, of the Abdominal Ring.** Synonym of *P., Internal, of the Abdominal Ring*.

Pillicoshy (*pil'-ik-o-she*). A vulgar corruption of *pilulæ cochiæ*, cochia pills (see *Cochia*); hence, powder of aloes and canella, or hiera picra.

Pilliocausia (*pil-e-o-kaw'-se-ah*). See *Pillicoshy*.

Pilocarpidin (*pi-lo-kar'-pid-in*) [πίλος, a cap; καρπός, fruit], $C_{10}H_{10}N_2O_{30}$. A syrupy, alkaline basic substance, obtained from jaborandi leaves; it is weaker in its action than pilocarpin.

Pilocarpin (*pi-lo-kar'-pin*). See *Pilocarpus*.

Pilocarpus (*pi-lo-kar'-pus*) [πίλος, a cap; καρπός, fruit]. Jaborandi. The young leaves of *P. selloanus*, *P. pennatifolius*, and *Piper jaborandi*, containing a volatile oil and 2 alkaloids, *jaborin* and *pilocarpin*. Jaborin is similar to atropin in action, and antagonistic to pilocarpin, but it is present in the leaves in only small amounts. Pilocarpin stimulates the peripheral ends of the secreting nerves going to glands, perhaps also the centers. It thus causes an increased flow of saliva, marked sweating, secretion of tears, of mucus from the nose and the bronchi, of the gastric and intestinal juices. It also stimulates involuntary muscle; on the vagus it acts as a stimulant, causing slowing of the pulse; in large doses it paralyzes the vagus. Vomiting is produced by jaborandi and sometimes by pilocarpin alone. Pilocarpin causes contraction of the pupil. Its action is antagonized very completely by atropin. Therapeutically, pilocarpin is used chiefly in renal dropsy to produce sweating, also in uremia, for the same purpose. It probably causes an elimination of urea, and other waste-products, both in the sweat and in the saliva. As a diaphoretic it is also employed in coryza and bronchitis. It has been used most successfully in erysipelas. **Pilocarpus, Ext., Fld.**, dose ♏v–ʒj. **J., Ext.** (B. P.) Dose gr. iij–x. **J., Infus.** (B. P.) Dose ʒj–ij. **J., Tinct.** (B. P.) Dose ʒ ¼–½. **Pilocarpinæ hydrochloras**, the alkaloid. Dose gr. ⅛–½. **P. nitras.** Dose hypodermatically gr. ⅛–¼. **Injectio P. nitrat. hypodermica**; 1 grain in 20 minims. Dose ♏ij–vj.

Pilocystic (*pi-lo-sis'-tik*) [*pilus*, hair; κύστις, a sac]. A term applied to encysted tumors containing hair and fatty matters, *e. g.*, some dermoid cysts.

Pilo-motor (*pi-lo-mo'-tor*) [*pilus*, hair; *movere*, to move]. Causing movement of the hair. **P. Nerves**, nerves causing contraction of the erectores pilorum, as in horripilation of animals.

Pilonidal (*pi-lo-ni'-dal*) [*pilus*, hair; *nidus*, nest]. Containing an accumulation of hairs in a cyst. **P. Fistula**, a fistula in the neighborhood of the rectum depending upon the presence of a tuft of hair in the tissues. It is also known as *Coccygeal Fistula*.

Pilose, Pilous (*pi'-lōz, pi'-lus*) [*pilosus*, hairy]. In biology, covered with long, straight, soft hairs; hairy; hirsute.

Pilosis (*pi-lo'-sis*) [*pilus*, hair]. The development, and especially the abnormal or excessive development, of hairs.

Pilosity (*pi-los'-it-e*) [*pilus*, a hair]. The state of being pilose.

Pilous (*pi'-lus*). See *Pilose*.

Pilula (*pil'-u-lah*) [L.: *pl.*, *Pilulæ*]. A pill. **In**

pharmacy, a spheric mass containing a prescribed medicinal substance with the excipient necessary to make it cohesive. The excipient may be soap and water, a gum, or one of the various syrups. There are 15 official *pilulæ*. See names, constituents, etc., under principal ingredient.

Pilular (*pil'-u-lar*) [*pilula*, dim. of *pila*, ball]. Of the nature or form of a pill.

Pilule (*pil'-ūl*) [*pilula*, a small pill]. A small pill, pellet, or parvule.

Pilulous (*pil'-u-lus*). Same as *Pilular*.

Pilum (*pi'-lum*) [L.]. In pharmacy, a pestle.

Pilus (*pi'-lus*) [*pilus*, a hair: *pl.*, *Pili*]. In biology, a fine, slender, hair-like body. **Pili gossypii**, cotton staple. **Pili tactiles**, tactile hairs.

Pimeladen (*pim-el'-ad-en*) [πιμελή, fat; ἀδήν, gland: *pl.*, *Pimeladenes*]. Any sebaceous gland.

Pimelecchysis (*pim-el-ek'-kis-is*) [πιμελή, fat; ἐκχυσις, a pouring out]. An excessive discharge of fat or of sebaceous matter.

Pimelic Acid (*pim-el'-ik*). See *Acid*.

Pimelitis (*pim-el-i'-tis*) [πιμελή, fat; ιτις, inflammation]. Inflammation of any adipose tissue; also, of connective tissue in general.

Pimeloma (*pim-el-o'-mah*) [πιμελή, fat; ὄμα, tumor: *pl.*, *Pimelomata*]. A fatty tumor; lipoma.

Pimelopterygium (*pim'-el-o-ter-ij'-e-um*) [πιμελή, fat; πτερύγιον, a small wing]. A fatty outgrowth on the conjunctiva.

Pimelorrhea (*pim-el-or-e'-ah*) [πιμελή, fat; ῥοία, a flow]. An excessive fatty discharge. Fecal discharge of undigested fat.

Pimelorthopnea (*pim-el-or-thop-ne'-ah*) [πιμελή, fat; ὀρθόπνοια, orthopnea]. Orthopnea due to obesity.

Pimelosis (*pim-el-o'-sis*) [πιμελή, fat; νόσος, disease]. Conversion into fat. The fatty degeneration of any tissue; obesity, or corpulence.

Pimelotic (*pim-el-ot'-ik*) [πιμελή, fat]. Affected with pimelosis.

Pimeluria (*pim-el-u'-re-ah*) [πιμελή, fat; οὖρον, urine]. The excretion of fat in the urine; lipuria.

Pimenta (*pi-men'-tah*) [Sp., *pimiento*, the pepper-plant: *gen.*, *Pimentæ*]. Allspice. The immature fruit of *Pimenta officinalis*. It contains an aromatic, pungent, volatile oil that is much used as a flavor and condiment. It is useful in flatulence and to prevent the griping of purgatives. Dose gr. x–xl. **P., Aqua** (B. P.) Dose ʒss–ij. **P., Oleum** (B. P.) Dose ♏j–iv.

Pimento (*pi-men'-to*). Synonym of *Pimenta*.

Pimpernel (*pim'-per-nel*) [ME., *pympyrnel*, pimpernel]. See *Anagallis arvensis*.

Pimpinella (*pim-pin-el'-ah*) [Fr., *pimpernel*]. A genus of umbelliferous plants, the pimpernels.

Pimple (*pim'-pl*) [AS., *pipel*, a pimple]. A small pustule or papule. See *Papule* and *Pustule*. **P., Maggot**, a popular term for *Comedo*. **P. Mite.** See *Demodex folliculorum*, under *Parasites* (*Animal*), *Table of*.

Pimply (*pim'-ple*) [AS., *pipel*, a pimple]. Spotted; covered with pimples.

Pin [ME., *pinne*, a pin]. A metal instrument shaped like a needle, but with a globular head, used for fastening or holding parts together. **P.-buttock**, a sharp, angular buttock. **P., Center**, the pointed steel rod projecting from the center of the trephine-saw, used for fixing the trephine. **P., Harelip**, a strong, long pin passed through the lips of a wound in order to form a support for the sutures which are wound around it. **P.-sensation.** See *Pins and Needles*. **P.-worm.** See *Oxyuris vermicularis* among *Parasites* (*Animal*), *Table of*.

Pinacocytal (*pin-ak-o-si'-tal*) [πίναξ, a tablet; κύτος, a cell]. Pertaining to pinacocytes.

Pinacocyte (*pin'-ak-o-sit*) [πίναξ, a tablet; κύτος, a cell]. In biology, one of the simple, pavement, epithelial cells composing the ectoderm of most sponges.

Pinacolin (*pin-ak'-o-lin*), $C_6H_{12}O$. A ketone obtained from pinacone by the action of hydrochloric acid with heat. The *pinacolins* are ketones containing a tertiary, alkyl group, formed from the pinacones.

Pinacone (*pin'-ak-ōn*), $C_6H_{14}O_2$. A diatomic alcohol which crystallizes from its aqueous solution in the form of the hydrate, $C_6H_{14}O_2+CH_2O$, which consists of large, quadratic plates, melting at 42° C. and gradually efflorescing on exposure. In the anhydrous state it is a crystalline mass that melts at 38° C. and boils at 171° or 172° C. The *pinacones* are glycols that contain two hydroxyl groups attached to two adjoining carbon atoms, which in turn are linked to two alkyls.

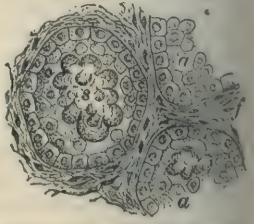
Pinalic Acid (*pin-al'-ik*). See *Acid*, *Valeric*.

Pince-cystotome (*pans'-sis'-to-tōm*) [*pince* (Fr.), forceps; κύστις, bladder; τομή, a cutting]. An instrument terminating in two triangular cutting-blades, and which is used as a cystotome in cataract-operations.

Pincement (*pans'-ma(n)g*) [Fr., "pinching"]. In massage, a pinching or nipping of the tissues; it is useful in neurasthenia.

Pince-nez (*pans'-na*) [Fr.]. Eyeglasses kept in place on the nose by a spring.

Pincers (*pin'-sers*) [Fr., *pince*]. Forceps.

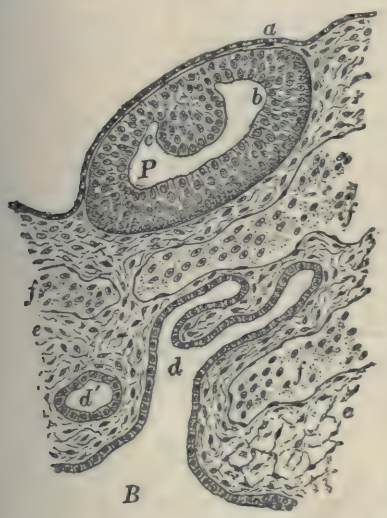


Pincet, Pincette (*pin-set'*) [Fr.]. Small forceps.

Pincoffin (*pin'-koff-in*). Same as *Azale*.

Pindal, Pindar, Pinder (*pin'-dal*, *pin'-dar*, *pin'-der*). See *Arachis hypogæa*.

Pine (*pīn*) [*pinus*, pine]. See *Pix*. **P.-apple Fiber**, the leaves of the several varieties of *Bromelia* yield a fine, nearly colorless, fiber, which is worked, especially in Brazil, for the manufacture of the so-called "silk-grass." **P.-apple Oil**, an alcoholic solution of ethyl butyric ether. **P.-bark**, a bark that is much used in Austria, Bavaria, and Southern Germany in the manufacture of leather. It contains from seven to ten per cent. of tannin and considerable resinous extractive matter. It does not yield as good a leather as oak-bark. **P.-bath.** See *Bath*. **P.-gum**, a variety of sandarach, from the Australian trees *Callitris robusta* and *C. rhomboidea*. **P.-needle Bath**, a bath in which pine or fir needles are mixed with the water; it is used in Germany as a stimulant tonic.



Pineal (*pi-ne'-al*) [*pinus*, a pine-cone]. Belonging to or shaped like a pine-cone. **P. Body** (so called from its resemblance in shape to a pine-cone), a small, reddish-gray, vascular body situated behind the third ventricle, which is embraced by its two peduncles; it is also called the *conarium*, from its conic shape. It rests upon the pregeminum, and is connected with the thalami by two peduncles. Its function is unknown. It is considered to be the remains of the pineal eye of lower vertebrates. **P. Eye**, a rudimentary third, median or unpaired eye of certain lizards (*Anguis*, *Hatteria*, *Veranus*, *Calotes*, *Seps*, *Leiodera*), connected with the homologue of the pineal

SECTION OF HUMAN PINEAL BODY.

a, *a*. Acini lined and partially filled with epithelium and calcareous concretions (*s*). *f*. Intertubular fibrous tissue. (*After Piersol.*)

gland of higher animals by the pineal stalk. It is the vestige of what was a functionating sense-organ in extinct reptiles (*Labyrinthodonta*), and perhaps in mesozoic mammals (*Tritylodon*), or possibly an organ for the perception of warmth; the *pineal body*, *epiphysis*, or *conarium*, *epiphysial eye*, *parietal eye*, *third eye*. **P. Gland.** See *P. Body*. **P. Peduncles**, the *habenæ* or *habenulæ*. **P. Sand**, the brain-sand, often found in the pineal body. **P. Ventricle**, the cavity occasionally found within the pineal body; it represents the persistence of a fetal condition.

SAGITTAL SECTION THROUGH PART OF HEAD OF EMBRYO LIZARD, showing so-called pineal eye.

P. Specialized isolated extremity of pineal diverticulum from brain-vesicle (*B*). *b.c*. So-called retinal and lenticular areas of its walls. *a*. Ectoderm. *d*. Remains of diverticulum undergoing division into tubules (*d'*). *f*. Blood-vessels. *e*. Mesodermic tissue. (*After Piersol.*)

Pinenchyma (*pin-en'-kim-ah*) [πίναξ, tablet; ἔγχυμα, infusion]. Tissues composed of flat cells.

Pinene (*pi'-nēn*) [*pinus*, pine], $C_{10}H_{16}$. A hydrocarbon, the chief ingredient of the turpentine-oil prepared from the different varieties of pine, of eucalyptus-oil, juniper-berry oil, sage-oil, etc.

Ping Ping. The root of a Chinese plant, used in vesical affections. Unof.

Pinguecula, Pinguicula (*pin-gwek'-u-lah*, *pin-gwik'-u-lah*) [*pinguis*, fat]. A small, yellow-white tumor of the conjunctiva, situated between the cornea and the canthus of the eye.

Pinguefaction (*pin-gwe-fak'-shun*) [*pinguis*, fat; *facere*, to make]. Conversion into fat.

Pinguicula (*pin-gwik'-u-lah*) [*pinguis*, fat]. 1. A genus of some thirty species of plants of wide geographic distribution; the butterworts. They have vulnerary and aperient properties, and are locally used in thickening milk. They are insectivorous plants, and contain one or more digestive ferments. 2. A small tumor of the conjunctiva.

Pinguid (*ping'-gwid*) [*pinguis*, fat]. Fat; unctuous.

Pinguidinous (*ping-gwid'-in-us*) [*pinguis*, fat]. Containing fat.

Pinguitude (*ping'-gwit-ūd*) [*pinguis*, fat]. Fatness.

Pinguoleum (*ping-gwo'-le-um*) [*pinguis*, fat; *oleum*, oil]. A fatty or fixed oil.

Pinhole (*pin'-hōl*) [ME., *pinne*, pin; AS., *hol*, a hole]. A minute perforation, like that made by a pin. **P. Os**, an extreme degree of atresia of the os uteri, seen in young and undeveloped women. **P. Pupil, Pin-point Pupil**, contraction of the iris to an extent that the pupil is scarcely larger than a pin's head. It is seen in opium-poisoning, after the use of myotics, in certain cerebral diseases, in locomotor ataxy, etc.

Pinic Acid (*pin'-ik*) [*pinus*, pine], $C_{20}H_{30}O_2$. A resinous body obtained from pine-resin, having the same formula as pinearic acid, with which it may be identical.

Pinicoline (*pin-ik'-o-lin*) [*pinus*, a pine-tree; *colere*, to inhabit]. In biology, inhabiting pine forests, *e.g.*, the Capercally, or Cock-of-the-wood (*Tetrao urogallus*).

Piniform (*pi'-nif-orm*) [*pinus*, pine; *forma*, form]. Pine-shaped; resembling a pine-cone. **P. Decussation**, a decussation of fibers in the oblongata between the central gray matter and the pyramids.

Pining (*pi'-ning*) [ME., *pinen*, pain]. Vulgar synonym for tuberculosis of cattle. Also applied to a peculiar melancholic longing of pregnant women, commonly called "*longings*."

Pinion (*pin'-yun*) [*penna*, *pinna*, wing, feather]. In biology, the *manus* or distal segment of a bird's wing (*carpus*, *metacarpus*, *phalanges*) bearing the primary remiges.

Pinipicrin (*pin-ip-ik'-rin*) [*pinus*, pine; πικρός, bitter], $C_{22}H_{36}O_{11}$. A bitter glucosid obtained from the needles and the bark of *Pinus sylvestris* and other plants.

Pinitannic Acid (*pin-it-an'-ik*) [*pinus*, pine; ME., *tannen*, tan], $C_{14}H_{16}O_8$. A yellowish-red powder, a variety of tannic acid, found in *Pinus sylvestris* and other plants.

Pinite (*pin'-it*) [*pinus*, pine], $C_2H_{12}O_5$. A substance that occurs in the resin of *Pinus lambertina*. It melts at 150° C. It is a pentahydric phenol of hexahydrobenzene.

Pinites (*pin-i'-tēz*) [*pinus*, pine]. A genus of extinct coniferous trees, of which *P. succinifer* is thought to have been the source of amber.

Pink (*pingk*) [origin obscure]. A shade of pale-red. **P. Crystals.** Same as *P. Salt*. **P.-eye**, the popular term for a contagious muco-purulent conjunctivitis of horses, characterized by a red color of the eyeball. It may occur in man. **P.-madder.** See *Pigments, Conspectus of*. **P.-root.** See *Spigelia*. **P. Salt.** See *Pigments, Conspectus of*.

Pinna (*pin'-ah*) [*pinna*, *penna*, feather, wing: *pl.*, *Pinnæ*]. In biology, a name applied to various wing-like or feather-like organs; as a wing, feather, fin, flipper, the *ala auris* or external cartilaginous flaps of the ear, the ala of the nose, one of the primary divisions of a pinnately-compound leaf. **P. nasi.** Synonym of *Ala nasi*.

Pinnadiform (*pin-ad'-if-orm*) [*pinna*, feather, wing; *ad*, to; *forma*, form]. In biology, applied to certain fishes in which the skin extends out on some or all of the fins.

Pinnaglobulin (*pin-ah-glob'-u-lin*) [πίννα, a kind of mussel; *globulus*, a round body]. A respiratory pigment containing manganese found in the blood of *Pinna squamosa*.

Pinnate (*pin'-āt*) [*pinna*, a feather]. In biology, feathered or shaped like a feather.

Pinnatifid (*pin-at'-if-id*) [*pinna*, a feather; *findere*, to cleave]. In biology, cleft in a pinnate manner, with the marginal divisions reaching at least half way to the midrib; pinnatisected.

Pinnatilobate (*pin-at-il-o'-bāt*). Same as *Pinnatilobed*.

Pinnatilobed (*pin-at'-il-ōbd*) [*pinna*, a feather; *lobus*,

a lobe]. In biology, having several alternating rounded lobes and sinuses on each side of the midrib.

Pinnation (*pin-a'-shun*) [*pinna*, feather]. In biology, the state or condition of being constructed in a pinnate manner.

Pinnatipartite (*pin-at-ip-ar'-tīt*) [*pinna*, a feather; *partiri*, to divide]. In biology, pinnately parted; having the divisions reaching almost to the midrib.

Pinnatiped (*pin-at'-ip-ed*) [*pinna*, a feather; *pes*, foot]. In biology, pin-footed or flipper-footed; lobiped.

Pinnatisect (*pin-at'-is-ekt*) [*pinna*, a feather; *secare*, to cut]. In biology, divided down to the midrib.

Pinnatulate (*pin-at'-u-lāt*) [dim. of *pennatus*, feathered]. In biology, bearing secondary pinnations or subdivisions.

Pinniform (*pin'-if-orm*) [*pinna*, feather; *forma*, form]. In biology, resembling a feather, wing or flipper.

Pinnigrade (*pin'-ig-rād*) [*pinna*, feather; *gradi*, to walk]. In biology, moving by means of fins.

Pinninerved (*pin'-in-ervd*) [*pinna*, feather; *nervum*, nerve]. Same as *Penninerved*.

Pinniped (*pin'-ip-ed*) [*pinna*, feather, fin; *pes* (*pedis*), foot]. In biology, having feet like fins or flippers.

Pinnitarsal (*pin-it-ar'-sal*) [*pinna*, feather; *tarsus*, tarsus]. In biology, having pinnate feet.

Pinnitentaculate (*pin-it-en-tak'-u-lāt*) [*pinna*, a feather; *tentaculum*, a tentacle]. In biology, having pinnate tentacles.

Pinnula (*pin'-u-lah*) [L., a little plume: *pl.*, *Pinnulæ*]. In biology, a small or secondary pinna.

Pinnule (*pin'-ūl*) [*pinnula*, a little plume]. In biology, a small or secondary pinna; a pinnula, as a small pin or one of the ultimate divisions of a bipinnate or tripinnate leaf.

Pins and Needles. The popular name for those abnormal sensations of tingling experienced by patients in various diseased conditions of the nervous system, or after an injury of a nerve.

Pint (*pīnt*) [Fr. *pinte*, a spot]. The eighth part of a gallon. Octarius. Symbol O.

Pinta Disease [Sp. "painted"]. *Spotted Sickness;* a tropical, contagious disease, due to a fungus, that produces various discolorations of the skin. The spots are scaly, very variable in color, shape, number, and size, and the disease appears to be allied in its characters to tinea versicolor. It usually begins on uncovered parts such as the face and extremities, but may affect the scalp or other parts of the body. The color of the patches is black, grayish-blue, red, or dull-white. The disease is very chronic.

Pinus (*pī'-nus*). See *Pix*.

Pioscope (*pī'-o-skōp*) [πίων, fat; σκοπεῖν, to see]. A variety of galactoscope.

Piotrowski's Reaction. The "biuret-reaction" for proteids, developed by the addition of a few drops of dilute cupric sulphate and the subsequent addition of an excess of caustic potash or soda. It gives a reddish-violet color like that given by the substance biuret, a derivative of urea. The color deepens on boiling.

Pip [ME., *pippe*, pip]. A disease of fowls, characterized by a secretion of thick mucus in the throat and mouth.

Piper (*pī'-per*) [L.]. Pepper; Black Pepper. The unripe fruit of *P. nigrum*, shriveled and dried. The plant is a native of the East Indies and contains an oleo-resin, an alkaloid, and a volatile oil. It is stimulant to the stomach, and irritant to the skin and is used mainly to correct flatulence, and locally for hemorrhoids. Dose gr. v–xx. **P. æthiopicum**, the guinea corn (*Habzelia æthiopica*). **P. album.** See *Pepper, White.* **P. angustifolium.** See *Matico.* **P. anisatum**, a species of *Piper* substituted for cubebs. **P. betel.** See *Betel.* **P. clusii**, the Ashanti-pepper of West Africa. **P., Confectio.** (B. P.) Dose ʒj–ij. **P. cubeba.** See *Cubeb.* **P. jaborandi**, Baillon's name for a species of *Piper* yielding *jaborandi.* **P. longum**, an East Indian plant, no longer employed in medicine, but infused in milk as a poison for flies. **P. methysticum.** See *Kava-kava.* **P. nigrum.** See *Pepper, Black.* **P., Oleo-resina**, contains the volatile oil. Dose ♏¼–j. **P. umbellatum**, one of the sources of the Brazilian *Caapeba*, or *Periparola*, which is also obtained from *Cissampelos caapeba*.

Piperazin (*pi-per-a'-zin*), $C_3H_{10}N_2$. Diethylene diamin; a crystalline solid melting at 104° C, and boiling at 145–146°C. It is reported to be a powerful solvent of uric acid, and its dilute solution is prescribed in cases of urinary lithiasis. Dose gr. v–viij. Unof.

Piperic (*pi-per'-ik*) [*piper*, pepper]. Pertaining to, or containing pepper. **P. Acid**, $C_{12}H_{10}O_4$, a monobasic acid obtained by boiling piperin with alcoholic potash in the presence of hydrochloric acid.

Piperidin (*pi-per'-id-in*) [*piper*, pepper], $C_5H_{11}N$. A substance that occurs attached to piperic acid as piperin in pepper. It is artificially prepared by reducing pyridin. It is an alkaline liquid that dissolves quite easily in water and alcohol. Its odor is like that of pepper. It boils at 106° C.

Piperin (*pī'-per-in*) [*piperina; piper*, pepper], $C_{17}H_{19}NO_3$. The alkaloid of pepper (*Piper nigrum* and other varieties). It is artificially produced by the action of piperic acid chlorid upon piperidin. It crystallizes in prisms and melts at 128° C. Its medical virtues are those of black pepper; it has also febrifuge properties. Dose gr. j–x.

Piperinal (*pip-er-in'-al*). See *Piperonal.*

Piperitious (*pip-er-ish'-us*) [*piper*, pepper]. Peppery; having a pungent taste.

Piperoid (*pip'-er-oid*) [πίπερι, pepper; εἶδος, like]. Any resin resembling the oleo-resin of pepper.

Piperonal (*pip-er-o'-nal*) [*piper*, pepper], $C_8H_6O_3$. *Heliotropin;* the flavoring principle of heliotrope; a crystalline body, obtained by oxidizing piperic acid. It dissolves with difficulty in water, melts at 37° C. and boils at 263° C. It is largely used in perfumery, and is also antipyretic and antiseptic. Dose gr. xv. Unof.

Pipet, Pipette (*pip-et'*) [Fr., dim. of *pipe*]. A glass tube open at both ends, but usually drawn out to a smaller size at one end. It may be graduated or not and it may or may not have a central expanded bulb. It is used for transferring small portions of a liquid from one vessel to another.

Pipmenthol (*pip-men'-thol*) [*piper*, pepper; *mentha*, mint]. A name for the menthol obtained from peppermint.

Pipsissewa (*pip-sis'-e-wah*). See *Chimaphila.*

Piptonychia (*pip-to-nik'-e-ah*) [πίπτειν, to fall; ὄνυξ, a nail]. Shedding of the nails.

Pique (*pēk*) [*pique*, a point]. See *Sarcopsylla penetrans* under *Parasites* (*Animal*), *Table of.*

Piqûre (*pik-ūr'*) [Fr.]. Puncture.

Piriform (*pir'-if-orm*). Synonym of *Pyriform.*

Pirogoff's Operation. A method of amputation at the ankle in which the greater part of the calcaneum is retained to give length and surface to the stump. See *Operations, Table of.*

Piscatology (*pis-kat-ol'-o-je*) [*piscis*, fish; λόγος, science]. The scientific study of fishes.

Piscicolous (*pis-ik'-o-lus*) [*piscis*, fish; *colere*, to inhabit]. In biology, parasitic upon fishes.

Pisciculture (*pis'-ik-ul-chūr*) [*piscis*, a fish; *cultura*, care]. The artificial breeding and culture of fish, es-

pecially for the purpose of stocking streams and littoral waters with edible varieties of fish.

Pisciculus (*pis-ik'-u-lus*) [L.]. An old name for the biceps muscle of the arm.

Piscidia (*pis-id'-e-ah*) [*piscis*, fish; *cædere*, to kill]. Jamaica Dogwood; the bark of *P. erythrina*. Its active principle is thought to be a glucosid, *piscidin*. It resembles opium in its physiologic properties, which, however, are much less intense and without unpleasant after-results. It is useful in whooping-cough and neuralgia, but sometimes causes gastric distress. Dose of the (proprietary) fld. ext. ʒss-j, cautiously increased. **Liquor sedans.** See *Viburnum*. Unof.

Piscidin (*pis-id'-in*) [*piscis*, a fish; *cædere*, to kill], $C_{29}H_{24}O_8$. A crystalline body, the active principle of *Piscidia erythrina*. Its action is chiefly on the spinal cord. It is said to paralyze the sensory ganglia, and to excite the motor ganglia; it also depresses the heart.

Pisciform (*pis'-if-orm*) [*piscis*, fish; *forma*, form]. In biology, resembling a fish in form.

Piscivorous (*pis-iv'-or-us*) [*piscis*, fish; *vorare*, to eat]. In biology, living upon fish.

Pisiform (*pis'-if-orm*) [*pisum*, a pea; *forma*, form]. Resembling a pea in shape. **P. Bone**, a small, nearly circular bone on the inner and anterior aspect of the carpus.

Piso (*pi'-so*) [L.]. Mortar.

Pisohamatus (*pi-so-ha-ma'-tus*) [πίσος, a pea; *hamatus*, hooked]. Same as *Piso-uncinatus*.

Piso-uncinatus (*pi-so-un-sin-a'-tus*) [πίσος, a pea; *uncinatus*, hooked]. A rare muscle, passing from the pisiform to the unciform bone.

Piss (*pis*) [ME., *pissen*, to piss]. 1. To urinate. 2. Urine.

Pisse, Chaude (*shōd pēs*) [Fr.]. The scalding and painful urination of the acute stage of gonorrhea.

Pissocopy (*pis-sok'-o-pe*) [ME., *picchen*, pitch; κόπτειν, to strike]. The process of covering with pitch; also epilation through the action of a pitch-plaster.

Pistacia (*pis-ta'-she-ah*) [πιστάκη, lentisk]. A genus of anacardiaceous trees of warm regions. **P. vera**, yields the edible pistachio-nut, which is used in pharmacy in the preparation of emulsions. Mastic and Chian turpentine are also produced by trees of this genus.

Pistation (*pis-ta'-shun*) [*pistare*, to pound]. The act of bruising in a mortar.

Pistic (*pis'-tik*) [πιστικός, a word of doubtful meaning; it may signify "drinkable," *i.e.*, liquid, or "faithful," *i.e.*, genuine]. A qualification applied to the best and purest nard, or true spikenard.

Pistil (*pis'-til*) [*pistillum*, a pistle]. In biology, a modified leaf or leaves forming the central organ of a flower, bearing the ovules and seeds. It consists of the seed-containing portion, the *ovary;* the pollen-receiving portion, the *stigma;* and generally an intervening portion, the *style*.

Pistillary (*pis'-til-a-re*) [*pistillum*, a pistle]. In biology, of or pertaining to the pistil.

Pistillate (*pis'-til-āt*) [*pistillum*, a pistle]. In biology, applied to flowers that possess pistils but not stamens.

Pistillidium (*pis-til-id'-e-um*). See *Archegonium*.

Pistilliferous (*pis-til-if'-er-us*) [*pistillum*, a pistle; *ferre*, to bear]. Same as *Pistillate*.

Pistillody (*pis'-til-o-de*) [*pistillum*, pistil; εἶδος, form]. In biology, the metamorphosis of other organs into pistils or carpels.

Piston Pulse. See *Corrigan's Pulse*.

Pit [ME., *pit*, a pit]. 1. A hole, depression, or cavity in the body; *e.g.*, the pit of the stomach, the armpit. One of the pores in the more or less liquefied cell-walls of many glands. 3. Parts are said to *pit* on pressure where they preserve for a time the indentation made in them by pressing with the finger. Pitting on pressure is seen in edema. **P. of the Stomach**: (1) a name popularly given to that part of the abdomen just below the sternum and between the cartilages of the false ribs. It is also termed *Scrobiculus cordis;* (2) any one of the openings of gastric tubules visible on the mucous surface of the stomach. **P., Tear**, the lacrymal sinus.

Pitch (*pich*) [ME., *picchen*, pitch]. 1. That quality of sound which depends upon the relative rapidity of the vibrations that produce the sound. In percussion, variations in the pitch of the sounds elicited may have a high diagnostic importance; *e.g.*, in the case of the lungs, a high-pitched note on percussing the chest usually indicates either consolidation of the lung-tissue or the presence of something abnormal between the lung and the chest-wall. 2. [*Pix*, pitch.] The residue remaining in the still after nearly all the volatile constituents have been driven off in the fractional distillation of coal-tar. It has a specific gravity of from 1.09 (soft pitch) to 1.12 (hard pitch). **P., Burgundy**, the prepared resin of *Abies excelsa*. When pure, it is a brittle, yellowish-brown, adhesive substance, readily soluble in water, in absolute alcohol, and in glacial acetic acid. It is used in the preparation of pitch-plaster. **P., Canada**, the prepared resin of *Abies canadensis*. It is a brittle, reddish, opaque substance, containing traces of a volatile oil. It is used for the manufacture of plasters. **P., Jew's, P., Mineral,** asphalt. **P.-plaster,** emplastrum picis.

Pitcher (*pich'-er*) [ME., *picher*, a small jug]. See *Ascidium*. **P.-plant.** See *Parracenia*, and *Nepenthes*.

Pith [ME., *pith*, pith]. The soft cellular tissue found in the center of the stalks of plants. It has a very low specific gravity. Also, the marrow of bones.

Pithecanthropi (*pith-ek-an'-thro-pe*) [πίθηκος, an ape; ἄνθρωπος, man; *pl.* of *Pithecanthropus*]. In biology, ape-men, the hypothetic prehistoric men, *alali*.

Pithing (*pith'-ing*) [ME., *pith*, pith]. 1. The removal of the cerebral lobes of a frog or animal for the purpose of physiologic experimentation; decerebration. 2. The slaughter of animals by penetrating the cerebro-spinal axis.

Pithode (*pith'-ōd*). See *Karyokinesis*.

Pitres' Method. The method of post-mortem examination of the brain by means of vertical transverse sections from before backward. The first or *prefrontal* section is carried down two and a quarter inches in front of the fissure of Rolando; the second, or *pedunculo-frontal* section is made three-quarters of an inch in front of that fissure and divides the second and third convolutions near their insertion into the ascending frontal convolution. The third or *frontal* section is made at the level of the ascending frontal convolution. The fourth or *parietal* section passes through the ascending parietal convolution. The fifth or *pedunculo-parietal* section is carried down an inch behind the fissure of Rolando. The sixth or *occipital* section is made a little less than half an inch in front of the parieto-occipital fissure. A vertical antero-posterior incision through the superior vermiform process of the cerebellum opens the fourth ventricle.

Pittacal, Pittical (*pit'-ak-al, pit'-ik-al*) [πίττᾱ, πίσσᾱ, pitch; καλός, beautiful]. One of the aurin series of dyes, first obtained in oxidizing the fractions of beechwood-tar boiling at high temperatures. It consists of the dark blue salts of eupittonic acid. See *Pigments, Conspectus of*.

Pittacium (*pit-a'-she-um*) [πίττᾱ, πίσσᾱ, pitch]. Pitch-plaster.

Pitted (*pit'-ed*) [ME., *pit*, a pit]. Marked by indentations or pits, as from smallpox.

Pitting (*pit'-ing*) [ME., *pit*, a pit]. The formation of pits; also the quality of preserving, for a short time, indentations made by pressing with the finger.

Pituita (*pit-u'-it-ah*) [L.]. Phlegm; mucus.

Pituitary (*pit-u'-it-a-re*) [*pituita*, phlegm]. Mucus; secreting or containing mucus. **P. Body**, a small, reddish-gray vascular body, weighing about ten grains, contained within the sella turcica. The pituitary body consists of two portions, the large *anterior, oral* and the small *posterior, cerebral division*. The anterior lobe is derived as a diverticulum from the primitive oral cavity, and, as such, is lined with oral ectoderm, while the posterior lobe descends as an outgrowth from the floor of the primary interbrain. The stalk of this outgrowth remains as the *infundibulum*. The pituitary body has attracted much attention on account of pathologic changes in its structure in certain obscure diseases, such as acromegalia, myxedema, and others. In some cases of the affection first named, it has been much enlarged. It is called also *hypophysis cerebri* and *pituitary gland*. **P. Diverticulum**, a flask-like outgrowth of the middle of the upper posterior portion of the buccal cavity of the embryo. It takes part in the formation of the pituitary body. **P. Fossa.** See *Fossa*. **P. Gland.** See *P. Body* and *Gland*. **P. Membrane**, the Schneiderian membrane. **P. Space**, in the embryo, the open space at the base of the skull that subsequently becomes the seat of the pituitary body. It corresponds to the sella turcica of the sphenoid bone.

Pituitous (*pit-u'-it-us*) [*pituita*, phlegm]. Containing or resembling mucus.

Pituri (*pit-u'-re*). Same as *Duboisia*.

Piturin (*pit'-u-rin*). A liquid alkaloid obtained from *Duboisia hopwoodii*. It is probably identical with nicotin.

Pityriasis (*pit-ir-i'-as-is*) [πίτυρον, bran]. A term formerly applied to various pathologically dissociated skin-affections, the most striking clinical feature of which is the presence of fine, branny desquamation. Also a synonym of *Seborrhea*. **P. cachecticorum.** Same as *Seborrhea*. **P. capillitii, P. capitis.** See *Alopecia furfuracea*. **P. circinata et marginata**, an eruption of rose-colored spots on the trunk, the limbs, and in the axillæ. It is of parasitic origin. **P. gravidarum**; *Chloasma gravidarum*; the discoloration of the skin sometimes observed during pregnancy. **P. infantilis**, a desquamative eruption attacking infants; it is probably eczema. **P. maculata et circinata.** See *P. rosea*. **P. nigra**, pityriasis with pigmentation occurring in the aged. Also, a papular eruption terminating in slight desquamation, which attacks children brought to England from India. **P. nigricans.** Synonym of *Chromidrosis*. **P. pilaris.** See *Keratosis pilaris*. **P. rosea**; *P. maculata et circinata; Herpes tonsurans maculosus*; an acute inflammatory skin-disease characterized by macular or circinate lesions, occurring mostly on the trunk. The eruption consists at first of rosy-red spots, which later become brownish. The lesions are round, but owing to their tendency to recover at the center and to extend peripherally, gyrate and irregular figures are formed. Furfuraceous desquamation is a marked feature. **P. rubra**; *Dermatitis exfoliativa*; a chronic inflammatory skin-disease, beginning in one or more localized patches, which coalesce and gradually invade the whole body. The skin may be of a dark or vivid red or bluish-red. There is no infiltration and no moisture, but there may be edema of the lower limbs. The desquamation is very free; the scales are thin and papery on the general surface, imbricated, and from a line to an inch or more in diameter. The disease lasts months or years, and generally ends fatally from progressive emaciation and exhaustion, or from some intercurrent affection. **P. rubra pilaris**; *Lichen ruber acuminatus*; a primarily non-inflammatory disease of the skin, characterized by follicular papules, with horny centers, tending to become general or even universal in distribution. The papules are hard, dry, brownish-red, and seated at the hair-follicles. An atrophied hair occupies the center, and is surrounded by a sort of horny sheath which penetrates into the follicle. The papules vary in size from a small pin's head to a millet-seed, and are most abundant on the limbs. Deep folds are formed at the joints. Pruritus is absent or only slight. The course is slow and irregular; the pathology is unknown. **P. simplex.** See *Alopecia furfuracea*. **P. senilis**, pityriasis of the aged. **P. tabescentium.** See *Seborrhœa universalis*. **P. versicolor.** See *Tinea versicolor*.

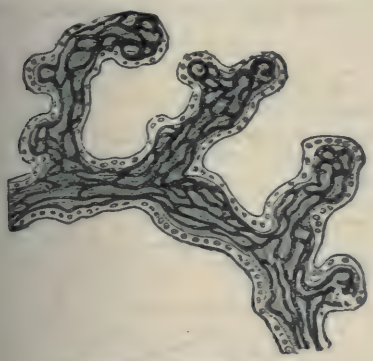
Pityrisma (*pit-ir-is'-mah*). Synonym of *Pityrisasis*.

Pityroid (*pit'-ir-oid*) [πίτυρον, bran; εἶδος, like]. Furfuraceous, branny.

Pivot (*piv'-ot*) [Fr., *pivot*, a pivot]. A pin on which a wheel turns. **P.-joint.** See *Cyclarthrosis*. **P. Tooth**, an artificial crown, designed to be applied to the root of a natural tooth, by means of what is usually termed a pivot, but more properly a dowel or tenon.

Pivoting (*piv'-ot-ing*) [Fr., *pivot*, a pivot]. The fixation of an artificial crown to a tooth by means of a pivot or pin.

Pix (*piks*) [L.: gen., *Picis*]. Pitch. The resinous exudation of certain coniferous trees. The varieties in common use are chiefly *Burgundy Pitch*, from the Norway spruce, *Abies excelsa*, and *Canada Pitch*, from *A. canadensis*. Pitch melts at about the temperature of boiling water and softens by the heat of the human body. It is soluble in glacial acetic acid and in absolute alcohol, and is used mainly as the base of plasters. **Picis burgundicæ, Emplast.**, Burgundy pitch 80, olive oil 5, yellow wax 15. **P. canadensis, Emp.**, contains Canada pitch, 90, yellow wax 10 parts. **Picis cantharidatum, Emp.**, Burgundy pitch 92, cantharides cerate 8 parts. **P. liquida**, tar, an empyreumatic oleo-resin obtained by the destructive distillation of various species of pine; it is blackish-brown in color and possesses a well-known taste and odor. It yields oil of tar, pyroligneous acid, creasote, and carbolic acid. It is a complex mixture of resins and hydrocarbons. Externally, it is a stimulant to the skin; internally, a gastro-intestinal irritant. It is serviceable in scaly diseases of the skin and of benefit in bronchitis. Dose ʒj–ij. **P. liq., Infus.**, unof., made by shaking 1 part of tar with 4 of water frequently for 24 hours. Dose Oj–ij daily. **P. liq., Ol.**, a volatile oil distilled from tar; it consists of various hydrocarbons, phenols, etc, and is used locally. **P. liq., Syr.**, contains 6 per cent. of tar in syrup. Dose ʒij–ʒss. **P. liq., Ung.**, equal parts of tar and suet. **P. Liq., Vin.**, wine of pitch, unof., tar ʒxvj, glycerin, white wine, honey ää ʒviij, acetic acid ʒj, boiling water Ovj. **Carbonis detergens, Liq.**, unof., an alcoholic solution of coal-tar, a useful antiseptic in putrid sore-throat, etc. **Vapor olei pini sylvestris.** (B. P.) Inhalation of fir-wood oil, used in sore-throat and chronic laryngitis.



Pixol (*piks'-ol*) [*pix*, pitch; *oleum*, oil]. A disinfectant prepared by dissolving a pound of green soap in three pounds of tar and slowly adding a solution of a little over three ounces and a half of either potash or soda in three pounds of water. For use one part of the syrupy liquid thus formed is added to 19 parts of

water, forming a five per cent. solution of pixol, and in this strength it is used for disinfecting linen and washing the hands. For the disinfection of dejecta a ten per cent. solution is required.

Pizzle (*piz'-l*) [ME.]. The penis, especially of a domestic mammal.

Placebo (*pla-se'-bo*) ["I will please:" fut. of *placere*, to please]. Anything prescribed for the purpose of pleasing or humoring the whim of a patient rather than for its therapeutic effect.

Placenta (*pla-sen'-tah*) [a particular use of *placenta*, πλακοῦς, a cake: *pl.*, *Placentæ* or *Placentas*]. In biology: (*a*) the organ of attachment of an embryo or fetus to the wall of the uterus, and by means of which it is nourished; (*b*) the ovule-bearing portion of the ovary of a plant. The mammalian placenta is a spongy mass of tissue derived from the chorion and decidua, its evolution having begun with the differentiation of the ectoderm of the germinative area by the formation of a thickened region called the *area placentalis*. It is a flat, circular, spongy body, adherent during gestation to the inner wall of the uterus and connected by the umbilical cord to the fetus, and forming for it the organ of nutri-

HUMAN PLACENTAL VILLI.
Blood-vessels black. (*From Stirling.*)

ion and respiration. The placenta is developed about he third month of embryonal life. The chorionic illi in contact with the decidua reflexa cease to grow, while at the decidua serotina the villi become exceedngly numerous. The uterine mucous membrane in which the villi are embedded contributes a share to he formation of the placenta. This is known as the maternal, in contradistinction to the chorionic or fetal ortion. At term the placenta weighs one pound, is ne inch thick at its center, and seven inches in diamter. The fetal side is covered by the amnion and enetrated by the umbilical cord. The maternal rface is dark-red, irregular, and covered by the pper layers of cells of the decidua serotina. The lacenta is normally situated at the fundus, anteriorly r posteriorly. In the lower animals the placenta is mewhat different. Of the *Choriata*, those possessg a villous chorion, one class, including the horse, e pig, the camel, etc., presents the villi uniformly stributed; there is no special accumulation anywhere. the other class the villi are aggregated and specialized a particular region to form the placenta. Three rieties of placentæ are generally described: (*a*) hat with numerous cotyledons (cow, deer, etc.);) zonal placenta (carnivora); (*c*) discoid placenta onkey, man). The zonal and the discoid placentæ deciduate. **P., Adherent,** abnormal adherence the placenta to the uterine wall after childbirth. **, Allantoic,** a placenta in which the chorion acquires vessels by growing together with the vascular walls of the allantoic vesicle (*Ungulata*), as distinguished from a *chorionic placenta*, *q. v.* **P., Annular,** a placenta extending around the interior of the uterus in the form of a belt. **P., Battledore,** one in which the insertion of the cord is at the margin of the placenta. **P., Bell-shaped,** one in which there is a partial persistence of the chorionic villi in the upper portion of the chorion. **P. biloba, P. bipartita.** See *Placenta duplex*. **P., Chorionic,** a placenta in which the chorion has its own vessels (*Unguiculata*). It is regarded as the most primitive type, as distinguished from an *allantoic placenta*. **P. cirsoides,** one in which the umbilical vessels have a cirsoid arrangement. **P., Cordiform,** a heart-shaped placenta. **P., Cotyledonary, P., Cotyledonous,** a placenta the villi of which are collected into groups; this variety is confined to the *Pecora*. In the giraffe, the placenta is partly diffused and partly cotyledonous. The *Bovidæ* possess a large number of cotyledons (*polycotyledonous*), while the *Cervidæ* have only a few. **P., Deciduate,** a placenta in which the fetal villi are so intimately connected with the uterine wall, that at birth a greater or less portion is brought away with the allantois (after-birth). It occurs in all those *Eutheria* not included among those mentioned as having non-deciduate placentas. **P., Diffused,** a placenta which extends over the whole of the chorion. It is characteristic of the *Perissodactyla*, the *Suina*, the *Tragulina*, the *Tylopoda*, the *Sirenia*, the *Cetacea*, and the *Lemuroidea*. **P., Discoid,** a placenta which is disc-shaped. It occurs in the *Rodentia*, *Insectivora*, *Chiroptera*, and the *Loricata* among the *Edentata*. The discoid chorionic placenta is regarded as the most primitive type, as distinguished from the zonary placenta of carnivora, the diffuse placenta of the lower primates, and the metadiscoid placenta of man, which have been evolved from it. **P., Disseminated,** one in which the cotyledons are not distinctly localized to one area, but are scattered. **P., Dome-like.** Synonym of *P., Bell-shaped*. **P., Double.** Synonym of *P. duplex*. **P. duplex,** *Placenta bipartita;* an anomaly of the placenta, in which it is divided into two portions. **P. evanida,** the placenta of a blighted ovum in which all structure has been lost from pressure by the surviving ovum, as is seen in some cases of fœtus papyraceus. **P. fenestrata,** one in which the true placental tissue is lacking in one or more places, and the chorion, being free from villi, forms a transparent membrane. **P. fœtalis,** the smooth amniotic surface of the placenta. **P., Fundal,** one attached at the fundus. **P., Horse-shoe,** in twin pregnancy, a condition in which the two placentæ are united by a strip of placental tissue. **P., Hydatigenous,** a placenta the seat of myxomatous degeneration, as in hydatidiform mole. **P., Incarcerated,** a placenta retained in the uterus on account of irregular contraction of that organ. **P., Lateral,** one attached to the lateral wall of the uterus. **P. marginata,** an anomaly of the placenta in which that organ is surrounded by a margin or collar of placental tissue. **P., Maternal,** the portion of the placenta contributed by the part of the mucous membrane of the uterus known as the decidua serotina. At birth the maternal portion is only a thin, grayish layer on the uterine surface of the placenta, and can only be stripped off in small pieces. **P. membranacea;** occasionally there is a failure of the atrophy of a portion of the chorion which normally occurs, and, instead, placental villi are developed over the entire surface of the chorion. Such a placenta is called *placenta membranacea*, and is thinner than the normal placenta. **P., Metadiscoid, P., Secondary Discoid,** a form of placenta found in the *Anthropoidea*.

in which the villi are at first diffuse, but ultimately become restricted to the ventral surface. **P. multiloba**, a placenta consisting of more than three lobes in an animal in which the organ normally is one-lobed. **P., Non-deciduate**, the simplest form of placenta, in which the papilla-like elevations of the chorion fit into corresponding depressions in the uterus, and in which the chorion can be withdrawn from the placenta at birth. The *Artiodactyla*, *Perissodactyla*, *Sirenia*, *Cetacea*, *Lemuroidea*, and some *Edentata* (*Squamata*) have a non-deciduate placenta. In some of them the villi are more or less branched and complicated, at times interlocking so closely that the parts of the epithelium of the maternal cotyledons may be carried away at birth. **P. obsoleta**, in a twin pregnancy the condition in which the two placentæ are entirely distinct and separate. **P. panduriformis**, one shaped like a violin. **P., Polycotyledonary, P., Polycotyledonous**, a placenta such as is seen in ruminants, in which the chorionic villi are collected in a number of large separate tufts, the latter dipping into corresponding crypts in the uterine mucosa. **P. prævia**, a term applied to a placenta when it is fixed to that part of the uterine wall that becomes stretched as labor advances, so that it precedes the advance of the presenting part of the fetus. **P., Retained**, one not expelled by the uterus after labor. **P. sanguinis.** See *Blood-clot.* **P., Secondary Discoid.** See *P., Metadiscoid.* **P. spuria.** See *Placenta succenturiata.* **P., Subsidiary**, a distinct and separate lobe in addition to the usual placental mass; such lobes are called *Placentæ succenturiatæ.* **P. succenturiata**, an accessory growth to the placenta. When this does not act as true placental tissue it is termed *Placenta spuria.* **P. tripartita**, an anomaly of the placenta in which there are three portions of that organ. **P., Triple**, the united placentæ of a triple gestation. **P., Twin.** Synonym of *P. duplex.* **P. uterina**, the rough cotyledonous or uterine surface of the placenta derived from the decidua serotina. **P., Velamentous**, one in which the cord is inserted between the layers of the fetal membranes, presenting a broad surface of attachment in place of the normal round insertion. **P., Villous.** See *P., Disseminated.* **P., Zonary**, a placenta which occupies a broad band around the chorion; it is found in the *Carnivora*, *Hyrax*, *Elephas*, and in the *Tubulidentata* among the *Edentata.* Same as *P., Annular.*

PLACENTA AND MEMBRANES (STRIPPED UPWARD).

Placental (*pla-sen'-tal*) [*placenta*, πλακοῦς, a flat cake]. Pertaining to the placenta. **P. Dystocia**, difficult birth of the placenta. **P. Murmur.** Same as *P. Souffle.* **P. Souffle**, a sound erroneously attributed to the circulation of blood in the placenta.

Placentalia (*pla-sen-ta'-le-ah*) [*placenta*, πλακοῦς, a cake]. Mammals in which the fetus is nourished through the medium of a placenta.

Placentary (*pla'-sen-ta-re*) [*placenta*, πλακοῦς, a flat cake]. Pertaining to the placenta.

Placentate (*pla'-sen-tāt*) [*placenta*, πλακοῦς, a placenta] Having a placenta.

Placentation (*pla-sen-ta'-shun*) [*placenta*, πλακοῦς, a placenta]. In biology: (*a*) the process of attachment of the embryo or fetus to the uterus; (*b*) the type of placenta or the manner in which it is constructed; the arrangement of the seeds in the pericarp or the arrangement of the placenta itself.

Placentiferous (*pla-sen-tif'-er-us*) [*placenta*, πλακοῦς, placenta; *ferre*, to bear]. In biology, bearing a placenta.

Placentiform (*pla-sen'-tif-orm*) [*placenta*, πλακοῦς, placenta; *forma*, form]. In biology, resembling a placenta; discoid with biconcave surfaces.

Placentigerous (*pla-sen-tij'-er-us*). Same as *Placentiferous.*

Placentitis (*pla-sen-ti'-tis*) [*placenta*, πλακοῦς, a flat cake; ιτις, inflammation]. Inflammation of the placenta. **P. decidualis**, placentitis secondary to inflammation of the decidua.

Placentoid (*pla-sen'-toid*) [*placenta*, πλακοῦς, a flat cake; εἶδος, like]. Resembling a placenta.

Placentula (*pla-sen'-tu-lah*) [dim. of *placenta*, πλακοῦς, placenta]. A small placenta.

Placoderm, Placodermal (*plak'-o-derm, plak-o-der'-mal*) [πλάξ, a plate; δέρμα, skin]. In biology, having the skin covered with broad flat plates, as a fish.

Placoid (*plak'-oid*) [πλάξ, (πλακ-), a tablet; εἶδος, form]. In biology, plate-like; applied to the ectoskeletal pieces of certain fishes.

Placula (*plak'-u-lah*) [πλάξ, a tablet, plate: *pl.*, *Placulæ*]. In biology, a little plate; applied to certain discoid embryos, which consist of a plate of cleavage cells.

Placular (*plak'-u-lar*) [πλάξ, a plate]. Plate-like; like a placula.

Placulate (*plak'-u-lāt*) [πλάξ, a plate]. Having the form of a placule.

Placuntechos (*plak-unt-ek'-os*) [πλακοῦς, a flat cake; ἦχος, echo]. The uterine souffle.

Placuntitis (*plak-un-ti'-tis*). Synonym of *Placentitis.*

Pladaroma (*plad-ar-o'-mah*) [πλαδάρωμα, wetness, softness: *pl.*, *Pladaromata*]. A soft wart, or tumor of the eyelid.

Pladarosis (*plad-ar-o'-sis*) [πλαδαρός, soft]. Synonym of *Pladaroma.*

Plaga (*pla'-gah*) [πληγή, stroke: *pl.*, *Plagæ*]. Wound; plague. In biology, a stripe or streak. **P. ignis.** Anthrax. **P. scapularis.** Same as *Parapsis.*

Plagiobolia (*pla-je-o-bol'-e-ah*) [πλάγιος, oblique; βάλειν, to throw]. Imperfect or indirect emission of spermatic fluid into the vagina.

Plagiocephalia (*pla-je-o-sef-a'-le-ah*). See *Plagiocephaly.*

Plagiocephalic (*pla-je-o-sef-al'-ik*) [πλάγιος, oblique, twisted; κεφαλή, head]. Exhibiting or dependent on plagiocephaly.

Plagiocephalous (*pla-je-o-sef'-al-us*). Synonym of *Plagiocephalic.*

Plagiocephaly (*pla-je-o-sef'-al-e*) [πλάγιος, sidewise, slanting, oblique; κεφαλή, head]. In biology, a malformation of the head, produced by the closing of

half of the coronal suture, giving an oblique growth to the cranial roof.

Plagiodont (*pla'-je-o-dont*) [πλάγιος, oblique; ὀδούς, tooth]. In biology, having the teeth oblique, as in the converging series seen in serpents.

Plagiopatagium, of Kolenati (*pla-je-o-pat-a'-je-um*) [πλάγιος, oblique; παταγεῖον, a border, as of a gown]. In biology, that portion of the wing-membrane of bats included in the *endopatagium* and *mesopatagium*.

Plagiotropic (*pla-je-o-trop'-ik*) [πλάγιος, oblique; τροπος, a turning]. In biology, exhibiting plagiotropism.

Plagiotropism (*pla-je-ot'-ro-pizm*) [πλάγιος, oblique; τροπος, a twining]. In biology, oblique geotropism; growth at an angle from the vertical axis, either upward or downward, Cf. *Orthotropism*.

Plague (*plāg*) [πληγή, a stroke]. A pest, or pestilence. A contagious and highly fatal epidemic which occurred in Europe in the 14th century, and also at later periods. The disease had many of the characteristic symptoms of malignant typhus fever, accompanied by buboes, carbuncles, pustules, petechiæ, and similar skin-affections. The period of incubation is from two to seven days; the disease appears in a *grave* or *ordinary* form, a *fulminant* form, and a *larval* or *abortive* form. **P., Black**, the plague which decimated the European nations in the 14th century. **P., Bubonic**, a very fatal, contagious epidemic disease, formerly prevalent in various parts of the world. It is characterized by fever, pain, swelling of the axillary, cervical, or inguinal lymphatic glands, delirium, coma, and in the majority of cases ends in death. **P., Cold**, a fatal form of bilious pneumonia. **P., Hunger**, relapsing fever. **P., Indian.** Synonym of *Pali*. **P., Levantine**, the plague of the eastern part of Europe. **P., Lung**, pleuropneumonia of cattle. **P.-sore**, a sore resulting from the plague. **P.-spot**, a spot characteristic of the plague. **P., Swine**, hog-cholera. **P., Syrian.** Synonym of *Aleppo boil*.

Plagycephalus (*pla-je-sef'-al-us*). See *Plagicephalus*.

Planæa (*pla-ne'-ah*) [*planus*, flat]. In biology, a hypothetic, astomatous metazoan, having the form of a ciliated planula; morphologically, a simple diaderm; a *blastæa*.

Planar, Planary (*pla'-nar, pla'-nar-e*) [*planus*, flat]. Lying in a plane.

Planarthragra (*plan-ar-thra'-grah*) [πλανᾶν, to cause to wander; ἄρθρον, joint; ἄγρα, a seizure]. Gout which wanders from one joint to another.

Planat's Tincture. See *Picrotoxin*.

Planate (*pla'-nāt*) [*planus*, flat]. In biology, flat, flattened.

Plane (*plān*) [*planus*, flat]. Any flat and smooth surface, especially any assumed or conventional surface, whether tangent to the body, or dividing it. **P. of Aeby**, in craniometry, that passing through the nasion and the basion perpendicular to the median plane. **P., Alveocondylean**, in craniometry, a plane passing through the alveolar point and tangent to the condyles. **P., Anterior Focal.** See under *P., Focal*. **P., Auriculo-infraorbital**, in craniometry, that passing through the upper edge of the auricular foramen and the lower edge of the orbit. **P. of Baer**, in craniometry, that passing through the upper border of the zygomatic arches. **P., Barclay's.** See *P., Palatine*. **P. of Blumenbach**, the surface parallel with the base of a cranium deprived of the lower jaw. **P. of Broca.** See *P., Visual* (*of Broca*). **P. of Busk.** See *P., Horizontal* (*of Busk*). **P., Camper's**, in craniometry, the plane passing through the auricular points and the base of the inferior nasal spine. **P. of the Chasma**, the plane drawn tangent to the punctum spinæ nasalis posterioris and the punctum foraminis magni anterius. **P., Coccygeal.** See under *P., Parallel* (*of the pelvis*). **P. of Daubenton**, in craniometry, that passing through the opisthion and the inferior borders of the orbits. **P., Double-inclined**, two rectangular boards united at an angle at their short sides. It is used in the treatment of fractures of the femur to support the limb and to relax certain muscles. **P., Dumontier's.** See *P., Horizontal* (*of Dumontier*). **P. of Dürer**, in craniometry, a plane tangent to the lobules of the ear and the base of the nose. **P., Focal**, one of the two planes drawn through the principal foci of a dioptric system, perpendicular to the axis, or line joining the two foci. **P., Frankfort**, in craniometry, the auriculo-infraorbital plane. **P., Glabello-lambdoidean** (*of Hamy*), in craniometry, the plane of the glabella and the lambda, perpendicular to the median plane. **P., Glabello-occipital**, in craniometry, the vertical plane passing through the line joining the glabella and the occiput. **P. of Hamy.** See *P., Glabello-lambdoidean*. **P., Holder's.** See *P., Horizontal* (*of Holder*). **P., Horizontal** (*of Busk*), in craniometry, that which, passing through the auricular points, is vertical to a plane drawn through those points and the bregma. **P., Horizontal** (*of Dumontier*), in craniometry, a plane tangent to the superior borders of the zygomatic arches. **P., Horizontal** (*of Holder*), in craniometry, the auriculo-infraorbital plane. **P., Horizontal** (*of Lucæ*), in biology, that passing through the axis of the zygomatic arches. **P., Horizontal** (*of Van Shering*), a plane tangent to the lower rim of the orbit and passing through the auricular points. **P., Inclined**, a plane forming an angle with the plane of the horizon; one of the mechanical powers. **P., Inclined** (*of the pelvis*); the ischiatic spines divide the pelvic cavity into two unequal sections. In the larger anterior section the walls slope toward the symphysis and pubic arch, and are known as the *anterior inclined planes*. Behind the spines, the lateral slopes are known as the *posterior inclined planes*. They slope in the direction of the sacrum and coccyx. **P. of the Ischium**, the lateral wall of the true pelvis. **P. of Lucæ.** See *P., Horizontal* (*of Lucæ*). **P. of Mastication**, that tangent to the masticating surface of the teeth of the upper jaw. **P., Meckel's**, in craniometry, that passing through the auricular and alveolar points. **P., Medial, P., Median, P., Mesial**, a plane, generally antero-posterior, dividing a body into two symmetric halves. The median plane of the animal body is termed the *meson*. **P., Merkel's**, in craniometry, that passing through the auricular points and the lower borders of the orbits. **P. of Morton**, in craniometry, that passing through the most prominent points of the occipital and parietal protuberances. **P., Munich.** See *P., Auriculo-infraorbital*. **P., Naso-iniac**, in craniometry, a plane passing through the nasion and the inion. **P., Naso-opisthiac**, a plane passing through the nasion and the opisthion. **P., Nuchal**, the surface of the occiput between the foramen magnum and the superior curved line. **P., Orbital**, the orbital portion of the upper maxilla, or the maxillary portion of the orbit. The visual plane of Broca. **P., Occipital**, the surface of the occiput above the superior curved line. **P., Palatine** (*of Barclay*), in craniometry, the plane tangent to the arch of the palate along the middle line. **P., Parallel** (*of the pelvis*), any plane intersecting the pelvic axis at a right angle, hence really not parallel. There are four parallel planes: one corresponds to the superior strait; the second extends from the middle of the sacrum to the level of the sub-pubic ligament; the third passes through the spines of the ischia; the fourth is the inferior strait.

Ps. of the Pelvis, four planes are generally described: the plane of the inlet, that of the outlet, the plane of pelvic expansion, and that of pelvic contraction. *The plane of the inlet, or brim,* is bordered by the linea terminalis, and has an elliptic contour, with a depression posteriorly, produced by the projection of the sacral promontory. Its diameters are—the *antero-posterior,* or *conjugate,* from the upper edge of the promontory of the sacrum to a point an eighth of an inch below the upper border of the symphysis, measuring 11 cm.; the *transverse,* the longest possible transverse distance, measuring 13½ cm.; and the *oblique,* from the upper edge of one sacro-iliac junction to the opposite ilio-pectineal eminence, measuring 12¾ cm. The *plane of the outlet* is bounded by the sub-pubic ligament, the pubic rami, the rami and tuberosities of the ischia, the sciatic ligaments, and the coccyx. Its diameters are—the *antero-posterior,* measuring 9½ cm (during labor 11 cm.), and the *transverse,* measuring 11 cm. The *plane of pelvic expansion* perforates the middle of the symphysis, the tops of the acetabula, and the sacrum between the second and third vertebræ. Its diameters are—the *antero-posterior,* measuring 12¾ cm., and the *transverse,* measuring 12½ cm. The *plane of pelvic contraction* passes through the tip of the sacrum, the spines of the ischia, and the under surface of the symphysis. Its diameters are—the *antero-posterior,* measuring 11½ cm., and the *transverse,* measuring 10½ cm. See *Pelvis.* **P. of Refraction,** a plane passing through a refracted ray of light and drawn perpendicular to the surface of the refracting medium. **P. of Regard,** a plane cutting the center of rotation of the eye and the point of fixation **P. of Rolle,** in craniometry, that passing through the auricular and the alveolar points. **P., Sagittal,** any antero-posterior (cephalo-caudal) plane parallel with the meson or median plane. **P., Single-inclined,** a board arranged as an inclined plane, with the distal end elevated; it is used in the treatment of fractures of the lower limb. **P.-symmetric,** in chemistry, a term introduced by Wislicenus to indicate that class of unsaturated stereo-isomers in which similar substituting radicles lie on the same side of a *plane* passing through the points of junction of the linked carbon atoms. The contrasting condition is *central* (or *axial*) *symmetric* in which similar radicles are symmetric to an *axis* passing through the linked atoms. Maleïc and fumaric acids are respectively plane-symmetric, and central-symmetric stereo-isomers. **P., Van Shering's.** See *P., Horizontal* (*of Van Shering*). **P., Visual,** the plane passing through the visual axis. **P., Visual** (*of Broca*), the orbital plane.

Planesis (*plan-e′-sis*) [πλάνησις, wandering]. Wandering; mental aberration; metastasis.

Planicaudate (*plan-ik-aw′-dāt*) [*planus,* flat; *cauda,* tail]. In biology, having a flattened tail.

Planicipital (*plan-is-ip′-it-al*) [*planus,* flat; *caput,* head]. In biology, having a flat head.

Planidorsate (*plan-id-or′-sāt*) [*planus,* flat; *dorsum,* back]. In biology, having a flat back.

Planiform (*plan′-if-orm*) [*planus,* flat; *forma,* form]. In anatomy, presenting a flat surface.

Planipennate (*plan-ip-en′-āt*) [*planus,* flat; *penna,* wing]. In biology, having flat wings.

Planipetalous (*plan-ip-et′-al-us*) [*planus,* flat; πέταλον, petal]. In biology, having flat petals.

Planirostral (*plan-e-ros′-tral*) [*planus,* flat; *rostrum,* beak]. In biology, having a flattened beak.

Planispiral (*plan-is-pī′-ral*) [*planus,* flat; *spira,* a coil]. In biology, coiled in one plane.

Planities (*plan′-it-ēz*) [*planus,* flat]. Plane; also, the sole of the foot.

Planktology (*plank-tol′-o-jē*) [*plankton,* the drifting life of the sea, from πλαγκτός, wandering, roaming; λόγος, science]. In biology, the department of science which treats of the constituents, character, distribution, evolution and relations of the plankton or drifting organisms of the ocean.

Plankton (*plank′-ton*) [πλαγκτός, wandering, roaming]. In biology, the term proposed by Hensen and adopted by Hæckel to designate all plants and animals found at the surface of the ocean and which are carried about involuntarily in the water (*ploteric*). It corresponds to the German terms *Auftrieb* and "*pelagischer Mulder*" introduced by Johannes Müller; and is employed in contradistinction to *benthos* (βένθος, the bottom of the ocean; hence the organisms living there) and *nekton* (the *actively swimming surface* organisms). Plankton may be separated into **Limnoplankton,** the swimming and floating population of fresh water, and **Haliplankton** or that of salt water; or again into **Oceanic Plankton** or that of the open ocean, and **Neritic Plankton,** or that of the coast regions. Hæckel also distinguishes: (*a*) **Pelagic Plankton,** those actively swimming or passively floating animals or plants which are taken at the surface of the sea; no matter whether they are found alone or at a variable depth below the surface, they constitute the *superficial* and *interzonary* organisms of Chun. (*b*) **Zonary Plankton,** those organisms which occur only at definite depths of the ocean, and are only occasionally found above and below this, *e. g.,* many *Phæodaria and Crustacea* and *Siphonophora.* (*c*) **Bathybic Plankton,** animals of the deep sea, which only hover upon the bottom but never touch it, whether they stand in definite relation to the abyssal benthos or not, *e. g., Tomapteris euchæta, Megalocereus abyssorum.* (*d*) **Autopelagic Plankton,** the constant superficial fauna and flora of the sea, *e. g., Eucopidæ, Forskalidæ, Eucharis, sp., Bolina, sp., Sagitta punctata, Pontellina, sp., etc.* (*e*) **Bathypelagic Plankton,** all those organisms which occur not merely at the surface, but extend down into the depths; these are called by Chun interzonary pelagic animals. Here belongs properly the chief mass of the plankton. These last organisms may be distinguished as: (1) *Nyctipelagic,* those which rise to the surface only at night, living in the depths during the day; very many *Medusæ, Siphonophora, Pyrosoma,* most *Pteropoda* and *Heteropoda,* very many *Crustacea,* etc. (2) *Chimopelagic,* those which appear at the surface only in winter, and in summer are hidden in the depths; *Radiolaria, Medusæ, Siphonophora, Ctenophora,* a part of the *Pteropoda,* and *Heteropoda,* many *Crustacea,* etc. (3) *Allopelagic,* those which perform irregular vertical wanderings, sometimes appearing at the surface, sometimes in the depths, independently of changes of temperature. (*f*) **Spanipelagic Plankton,** those animals which always live in the ocean depths (zonary or bathybic) and come to the surface only exceptionally and rarely. **Holoplanktonic** organisms, those that pass their whole life and whole cycle of development hovering in the ocean, with no relation whatever to the benthos; here belong the greater part of the diatoms, and oscillaria, all *Murraycites* and *Peridinea,* all *Radiolaria,* many *Globigerina,* the hypogenetic *Medusæ,* all *Siphonophora* and *Ctenophora,* all *Chætognatha, Pteropoda,* the *Copelata, Pyrosoma,* and *Thalidia,* etc. **Meroplanktonic** organisms, on the contrary, are found in the sea only for a part of their life, passing the other part vagrant or sessile in the benthos, *e. g.,* a part of the diatoms and oscillaria, the planktonic fucoids, the metagenetic medusæ, some turbellarians and annelids,

the "pelagic larvæ" of hydroids and corals, many helminthes, echinoderms, acephala, gasteropods, etc. Plankton may be **Monotonic** (simple tow-stuff), showing a homogeneous composition, or it may be **Polymixic** (mixed tow-stuff), composed of organisms of different species and classes in such a way that no one form or group of forms composes more than one-half of the whole volume.

Planktonic (*plank-ton'-ik*) [*plankton*, the drifting life of the sea]. In biology, pertaining to plankton.

Planoblast (*plan'-o-blast*) [πλάνος, wandering; βλαστός, germ]. In biology, the free swimming medusoid bud, or gonophore of a gymnoblastic hydrozoan, as distinguished from the sedentary bud or *hedrioblast*, *q. v.*

Planoblastic (*plan-o-blas'-tik*) [πλάνος, wandering; βλαστός, germ]. In biology, pertaining to a planoblast.

Plano-cellular (*plan-o-sel'-u-lar*) [*planus*, flat; *cellula*, cell]. Flat-celled.

Plano-concave, Plano-convex (*pla'-no-kon-kāv'*, *pla'-no-kon-veks'*). See *Lens*.

Planodia (*plan-o'-de-ah*) [πλάνη, a wandering; ὁδός, a way]. Any false or artificial passage made by an instrument.

Planogamete (*plan'-o-ga-mēt*) [πλάνη, a wandering; γαμεῖν, to marry]. In biology, a ciliated form of gamete, or protoplasmic conjugating body; a zoögamete. Cf. *Gamete*.

Planogastrula (*plan-o-gas'-tru-lah*) [*planula* (πλάνος, wandering); *gastrula*, a two-layered, saccular germ (γαστήρ, belly)]. The name applied by Hæckel in his gastræa theory to that stage in the evolution of the *gastrula* from the *planula*, characterized by the hollowing out of the endoderm of the latter.

Planomania (*plan-o-ma'-ne-ah*) [πλάνος, wandering; μανία, madness]. A morbid and insane desire for wandering.

Plant [*planta*, a plant]. Any member of the vegetable kingdom. **P., Aerial, P., Air**, a plant which derives its nourishment from the air. **P., Carnivorous.** Synonym of *P., Insectivorous*. **P., Flowering.** See *Phanerogam*. **P., Flowerless.** See *Phanerogam*. **P., Insectivorous**, a plant which entraps and digests insects: *e.g.*, *Drosera rotundifolia*. **P., Pitcher.** See *Pitcher-plant*. **P., Sensitive**, *Mimosa pudica*, and other species, the leaves of which contract when they are touched.

Planta (*plan'-tah*) [L.]. 1. A plant. 2. The sole of the foot. **P. pedis**, the sole of the foot.

Plantago (*plan-ta'-go*) [L., gen. *plantaginis*]. The leaves of *P. major* and *P. lanceolata*, or common ribbed grass, or plantain. The bruised fresh leaves are a popular remedy for hemorrhage, painful abrasions of the skin, burns, erysipelas, etc. Dose ɱv-xv. Unof.

Plantain (*plan'-tān*) [ME., *planteyne*, plantain]. 1. Same as *Plantago*. 2. The tropical plant *Musa paradisiaca*, and its fruit; they are of great economic importance in the tropic regions as a food for mankind.

Plantar (*plan'-tar*) [*plantaris; planta*, sole of the foot]. Pertaining to the sole of the foot. **P. Aponeurosis.** Synonym of *P. Fascia*. **P. Arch**, a name given to one of the parts into which the external plantar artery is divided. **P. Arteries.** See *Arteries, Table of*. **P. Fascia**, the dense, triangular-shaped aponeurosis occupying the middle and sides of the sole of the foot beneath the integument. **P. Muscle.** See *Muscles, Table of*. **P. Nerve.** See *Nerves, Table of*. **P. Reflex.** See *Reflexes, Table of*. **P. Tubercle**, the tubercle of the first metatarsal bone, and to which the tendon of the peroneus longus muscle is attached.

Plantaria (*plan-ta'-re-ah*). Synonym of *Dengue*.

Plantaris (*plan-ta'-ris*) [*planta*, sole of the foot]. See *Plantar*. **P. Muscle.** See *Muscles, Table of*.

Plantigrade (*plan'-tig-rād*) [*planta*, sole; *gradi*, to walk]. Bringing the entire length of the sole of the foot to the ground in walking, as is seen in the bear and in certain birds which apply the back of the tarsus as well as the toes to the ground in walking.

Plantivorous (*plan-tiv'-o-rus*) [*planta*, plant; *vorare*, to devour]. In biology, living on plants, *e.g.*, caterpillars.

Plantosseous (*plan-tos'-e-us*) [*planta*, sole; *osseosus*, bony]. Both plantar and interosseous.

Plantosseus (*plan-tos'-e-us*) [*planta*, sole; *osseosus*, bony]. Any plantar interosseous muscle.

Plantula (*plan'-tu-lah*) [*planta*, the sole of the foot: *pl.*, *Plantulæ*]. In biology, the appendage, generally cushion-like, between the claws of certain insects; it corresponds to the structure in other forms called *onychium* and *pulvillus*.

Plantular (*plan'-tu-lar*) [*plantula*, a little plant]. Pertaining to a plantula.

Planula (*plan'-u-lah*) [πλάνος, wandering: *pl.*, *Planulæ*]. In biology, the globular or oval, free-swimming, two-layered, solid larva of certain of the *Porifera* and *Cœlenterata*. It is destitute of a mouth or blastopore, and succeeds the *blastula* in those metazoans in which gastrulation takes place by immigration and delamination, instead of by invagination. The planula is succeeded by the *Planogastrula* and this in turn by the gastrula stage proper, with its blastopore. Salensky describes a three-layered planula in the *Rotatoria* and other forms. The term planula was first applied by Dalzell to the motile larvæ of certain hydrozoans ("zoöphytes"), but it has come to have a broader application. Planula may be regarded as the ancestral form of the *Cnidaria*. It appears to correspond to the *parenchymula* of Metschnikoff.

Planulan (*plan'-u-lan*) [πλάνος, wandering]. A planula.

Planular (*plan'-u-lar*) [πλάνος, wandering]. Pertaining to a planula.

Planuliform (*plan'-u-lif-orm*) [πλάνος, wandering; *forma*, form]. In biology, resembling a planula.

Planuloid (*plan'-u-loid*) [πλάνος, wandering; εἶδος, like]. Resembling a planula.

Planum (*plan'-um*) [L.]. A plane or surface.

Planuria (*pla-nu'-re-ah*) [πλάνος, astray; οὖρον, urine]. The discharge of urine through passages other than the normal duct.

Plaque (*plak*) [Fr.]. A plate, patch or spot. **P., Blood.** See *Blood-plaque*. **P., Mucous, P. muqueuse** [Fr.]. Mucous patch; condyloma latum. **Plaques, Pterygoidean.** See *Pterygoidean*. **Ps., Sclérose en.** See *Sclérose en plaques*.

Plasm (*plazm*) [πλάσμα, a figure molded from clay or wax]. In biology, same as *Plasma*. **P., Germ**, a distinct form of protoplasm acting as the vehicle of inheritance.

Plasma (*plaz'-mah*) [πλάσμα, a thing molded]. 1. The original undifferentiated substance of nascent living matter. The primordial protoplasm or "physical basis of life." 2. The fluid part of the blood and the lymph; the blood and lymph exclusive of the corpuscles. See *Blood-plasma* and *Liquor sanguinis*. **P.-cells of Waldeyer**, the highly vacuolated connective-tissue cells, irregular, extended or spindle-shaped. They probably bear a somewhat constant relation to young tissues in which the formation of new blood-vessels is still progressing. **P.-fibrin**, Landois' term for fibrin formed in the usual way, as distinguished from *stroma-fibrin*, or that formed directly from stroma.

P.-globulin. Same as *Paraglobulin, q. v.* **P., Histogenetic, P., Lymph,** the fluid part of the lymph. **P. of Invertebrates,** that perivascular or intercellular fluid of invertebrates which corresponds to the blood of vertebrates. It is both respiratory and nutritive in function, clots like vertebrate blood, contains fibrinogen and a substance corresponding to hemoglobin, and is called by Fredericq *hemocyanin*; it is also in some instances a reddish lipochrome pigment *tetronerythrin*. **P., Muscle,** the fluid obtained from muscle by pressure at a low temperature, 1° C. It is spontaneously coagulable, forming *myosin*. **P., Nutritive,** the portion of the cell devoted to nutritive functions. **P. sanguinis,** blood-plasma. **P., Somatic.** Synonym of *P., Histogenetic.*

Plasmasome (*plaz'-mas-ōm*) [πλάσμα, a molded figure; σῶμα, body]. In biology, a protoplasmic corpuscle.

Plasmatic (*plaz-mat'-ik*) [πλάσμα, a molded figure]. Same as *Plasmic.* **P. Stain.** See *Plasmic Stain.*

Plasmatoparous (*plas-mat-op'-ar-us*) [*plasma*, a molded figure; *parere*, to bring forth]. In biology, a term applied to certain species of fungi (*e.g.*, *Peronospora densa*, Rab., and *P. pygmæa*, Ung.), in which the whole protoplasm escapes from the spore in a mass through the opening of a papilla-like point in the wall, and at once becoming globular, secretes a cellulose membrane and subsequently germinates by the emission of a short, thick germ-tube. (Bennett and Murray.)

Plasment (*plaz'-ment*) [πλάσμα, something molded]. A proprietary emollient and lubricant application made from Iceland moss.

Plasmic (*plaz'-mik*) [πλάσμα, a molded figure]. In biology, of or pertaining to protoplasm; formative, protoplasmic. **P. Stain,** a pigment which colors the tissue uniformly throughout, employed in microscopy as a ground or counter-stain, following and in contrast with a nuclear stain. Thus, after *blue* or *green* nuclear or specific stains, use benzo-purpurin (brownish red), eosin (yellowish-red), erythrosin (pink), orange, or acid fuchsin (orange); after red use picric acid (yellow). See *Stains, Table of,* also, *Stain, Nuclear Stain, Specific Stain.*

Plasmin (*plaz'-min*) [πλάσμα, a molded figure]. Denis mixed uncoagulated blood with a saturated solution of sodic sulphate, and allowed the corpuscles to subside. The salted plasma thus obtained he precipitated with sodic chlorid. The precipitate, when washed with a saturated solution of sodic chlorid, he called *plasmin*. Mixed with water, it coagulates spontaneously, resulting in the formation of fibrin, another proteid remaining in solution. According to Denis' view, fibrin is produced by the splitting up of plasmin into two bodies—fibrin and a soluble proteid. (Landois and Stirling.)

Plasmochyma (*plaz-mok'-im-ah*) [πλάσμα, plasma; χύμα, juice]. The portions in the cytochylema rich in proteids; paraplasm; heteroplasm; the fluid substance of a cell.

Plasmode (*plaz'-mōd*). Same as *Plasmodium.*

Plasmodiblast (*plaz-mo'-dib-last*). See *Trophoblast.*

Plasmodieresis (*plaz-mo-di-er'-es-is*) [πλάσμα, plasma; διαιρεῖν, to divide in two parts]. The division of the cell-body, in contradistinction to the division of the cell-nucleus.

Plasmodiocarp (*plas-mo'-de-o-karp*) [πλάσμα, a molded figure; εἶδος, form; καρπός, a fruit]. In biology, applied to the fructification of fungi when of irregular shape.

Plasmodiocarpous (*plaz-mo-de-o-kar'-pus*) [πλάσμα, a molded figure; εἶδος, form; καρπός, a fruit]. Resembling a plasmodiocarp.

Plasmodium (*plaz-mo'-de-um*) [πλάσμα, a molded figure; εἶδος, form: *pl.*, *Plasmodia*]. In biology: (*a*) the naked, motile mass of protoplasm formed by the organic fusion of two or more amebiform bodies, as in the mesodermic cells of young *Spongillæ*, *Bipinnaria*, many *Annelida* and by phagocytes in general; (*b*) the colossal ameboid organism or vegetative body (also called *plasmode*) formed by the coalescence of peculiar swarm-spores in the *Myxomycetes* (*e.g.*, *Fuligo varians*, or, as it is more commonly called, *Æthalium septicum* or "flowers of tan"), or by the mere aggregation of such swarm-spores in the *Acrasieæ*. **P. malariæ.** Synonyms, *Hæmatophyllum malariæ*, *Hematozoön of Malaria*, *Laveran's Bodies*, *Laveran's Organisms;* a parasite found in the blood of persons suffering from malaria. Many different forms have been observed, which by some are held to be stages in the life-history of the same organism, by others to be different species. As to the nature of the parasite it is generally admitted that it is a *Protozoön*. See *Polimitus malariæ*, Danilewsky, under *Parasites* (*Animal*), *Table of.* The development and multiplication of the organism take place within the red corpuscles. Typical intermittent fever is associated with large forms of the parasite, which differ somewhat according as the fever is a tertian or quartan intermittent. In the former case the developmental cycle of the organism occupies two days, in the latter three. In both forms the small intracorpuscular ameboid body enlarges and gradually fills the entire cell, becoming pigmented at the same time. The pigment-granules are formed from the hemoglobin of the blood corpuscle. When the plasmodia have acquired a certain size, the pigment-granules begin to aggregate at the center of the body. At this time, in the quartan form, the organism becomes radially striate, or rosette-shaped. The further step consists in the breaking up of the organisms into a number of small spheric bodies, the young plasmodia. The blood-corpuscle is destroyed, and the small free elements enter other red cells. In the tertian form the cycle is similar, but more rapid and active; the blood-corpuscle becomes decolorized much sooner; the pigment-granules are smaller, and the parasite forms from 15 to 20 new cells, while in the quartan only from 6 to 12 are produced. In quotidian intermittent, the organisms are small, possess very active ameboid movements (that can be observed within the red corpuscles), and become pigmented just before each paroxysm. Then they divide into spores. Peculiar crescentic bodies, endoglobular and ectoglobular, have also been described. They occur in acute forms, but are most constant in malarial cachexia. The significance of certain flagellate bodies has not been fully determined. The Italian writers generally believe that the various forms are distinct species, while Laveran and others look upon them as developmental variations of the sporozoön. As to the relation of the parasite to malaria, the evidence of its being an etiologic one is very strong. The constant presence of the organisms, the fact of their causing rapid destruction of the red corpuscles, their disappearance coincidently with the symptoms on the administration of quinin, and the successful inoculation of the disease from man to man, are points strongly in favor of their etiologic relation to the disease. The organism has not yet been cultivated artificially outside of the body. **P., Small,** a variety or species present in remittent and pernicious forms of malaria.

Plasmogen (*plaz'-mo-jen*) [πλάσμα, a molded figure; γενής, producing]. In biology, germ-plasm, true protoplasm, bioplasm, anabolic perfection in plasma.

Plasmogony (*plaz-mog'-o-ne*) [πλάσμα, a molded

figure; γονεία, generation]. In biology, the generation of an organism from plasma.

Plasmokinesis (*plaz-mo-kin-e'-sis*) [πλάσμα, plasma; κίνησις, motion]. Indirect protoplasmic cell-division.

Plasmology (*plaz-mol'-o-je*) [πλάσμα, a molded figure; λόγος, science]. In biology, the study of cells and cell-stuff, or plasma; histology.

Plasmolysis (*plaz-mol'-is-is*) [πλάσμα, plasm; λύειν, to loose]. In biology: (*a*) the separation of cell-protoplasm from the inclosing cell-wall; (*b*) the contraction of living protoplasm under the influence of reagents.

Plasmolytic (*plaz-mo-lit'-ik*) [πλάσμα, plasm; λύσις, a loosing]. In biology, exhibiting or characterized by plasmolysis. **P. Agent**, any substance that causes contraction of protoplasm.

Plasmoma (*plaz-mo'-mah*) [πλάσμα, plasm; ὄμα, tumor; *pl.*, *Plasmomata*]. A fibro-plastic tumor.

Plasmon (*plaz'-mon*) [πλάσμα, a thing molded]. An albuminous food-product, introduced by Siebold, of high nutritive property and easily absorbed.

Plasmoschisis (*plaz-mos'-kis-is*) [πλάσμα, plasma; σχίσις, cleavage]. A name given by Löwit to the separation of protoplasmic particles from the bodies of leukocytes, first observed by him in the blood of crabs kept at a low temperature.

Plasmosoma (*plaz-mo-so'-mah*) [πλάσμα, plasm; σῶμα, body: *pl.*, *Plasmosomata*]. A karyosoma, especially one which is safranophilous.

Plasodermatosis (*plaz-o-der-mat-o'-sis*) [πλάσσειν, to form; δέρμα, skin; νόσος, diseases]. A skin-affection characterized by the formation of new tissue.

Plasodermitis (*plaz-o-der-mi'-tis*) [πλάσμα, plasma; δέρμα, skin; ιτις, inflammation]. A neoplasm of the skin, of inflammatory origin.

Plasome (*pla'-sōm*) [πλάσμα, a molded figure; σῶμα, body, matter]. In biology, one of the hypothetic, minute vital particles of Wiesner and Brücke, resembling, as regards their properties, the *pangenes* of De Vries and the *biophors* of Weismann.

Plasson (*plas'-son*) [πλάσσειν, to form or mold]. In biology, primitive or undifferentiated protoplasm; the cell in the cytode stage.

Plastauxia (*plas-tawks'-e-ah*) [πλάσσειν, to mold; αὐξη, increase]. An increase of plasticity.

Plaster (*plas'-ter*) [ἔμπλαστρον, *emplastrum*, plaster]. An adhesive, solid or semi-solid medicinal substance spread upon cloth or other flexible substance, for application to the external part of the body. According to the principal ingredient, it is called Emplastrum Aconiti, Ammoniaci, Arnicæ, Belladonnæ, Capsici, Hydrargyri, Picis cum cantharidæ, Resinæ, Saponis, etc. **P., Adhesive**, resin-plaster. The adhesive plaster used by surgeons must be warmed before being applied; it will also stick after having been dipped in ether. **P., Antiseptic**, a plaster consisting of the ordinary adhesive plaster dipped in a hot solution of carbolic acid (1 to 60). **P., Black**, lead plaster. **P.-cast**, a model of an object produced by pouring plaster-of-Paris mixed with water into a mold of that object. **P., Court**, a plaster prepared by dissolving 30 grams of isinglass in enough water to make 360 grams, and spreading the mixture thinly upon silk in two portions, one the watery solution, the other mixed with 120 grams of alcohol and three of glycerin. The reverse side of the silk is painted with tincture of benzoin. It adheres firmly to the skin when moistened. **P., Diachylon.** Synonym of *P., Lead.* See *Plumbum.* **P., English.** Synonym of *P., Court.* **P., Isinglass**, a substitute for adhesive plaster, used in superficial wounds. **P. Jacket**, a bandage surrounding the trunk, and made of plaster-of-Paris. It is used in caries of the vertebræ. **P., Lead.** See *Plumbum.* **P., Logan's**, a plaster containing litharge, lead carbonate, Castile soap, butter, olive-oil, and mastic. **P.-machine**, an apparatus used by pharmacists for spreading plasters. **P., Mahy's**, one containing lead carbonate, olive-oil, yellow wax, lead-plaster, and Florentine orris. **P., Mercurial.** See *Hydrargyrum.* **P., Miraculous**, one containing red oxid of lead, olive-oil, alum, and camphor. **P.-mull**, a plaster made by incorporating with mull or thin muslin a mixture of gutta-percha and some medicament dissolved in benzin. **P., Mustard**, one made by spreading upon muslin powdered mustard, or a mixture of mustard with flour or other powder, reduced to the consistency of paste by the addition of water. **P.-of-Paris**, gypsum, or calcium sulphate, used for making stiff or immovable bandages or dressings, or for the preparation of casts. **P., Pitch**, a plaster containing Burgundy pitch, frankincense, resin, yellow wax, oil of nutmeg, and olive-oil. See *Pix.* **P., Rademacher's**, a plaster composed of red lead, olive-oil, amber, camphor, and alum. **P., Resin**, a plaster composed of resin, lead-plaster, and yellow wax or hard soap. See *P., Adhesive*, and *Resina.* **P., Rubber**, a plaster in which the adhesive material is spread on thin muslin, and which sticks without being previously warmed. **P., Soap**, soap and lead-plaster, with or without resin. **P., Spice**, a plaster composed of yellow wax, suet, turpentine, oil of nutmeg, olibanum, benzoin, oil of peppermint, and oil of cloves. **P., Sticking**, emplastrum resinæ. See *Resina.* **P., Stomach.** See *P., Spice.* **P., Strengthening**, emplastrum ferri. **P., Surgeons'**, adhesive plaster. **P., Thapsia**, one containing yellow wax, Burgundy pitch, resin, terebinthina cocta, Venice turpentine, glycerin, and thapsia resin. **P., Vesicating.** Same as *Cantharides Plaster.* **P., Vigo**, one containing lead-plaster, yellow wax, resin, olibanum, ammoniac, bdellium, myrrh, saffron, mercury, turpentine, liquid storax, and oil of lavender. **P., Warm, P., Warming**, emplastrum picis cum cantharide.

Plastering (*plas'-ter-ing*) [ἔμπλαστρον, a plaster]. A method of improving wines largely practised in Southern Europe. It consists in adding plaster-of-Paris (burnt gypsum) either to the unpressed grapes or to the must. The plaster takes up water, and so increases the alcoholic strength of the fermenting must. The wine is given better keeping-qualities, as well as deeper color. However, soluble acid sulphate of potassium is left dissolved in the wine, and has an injurious effect upon the consumers of the wine.

Plastic (*plas'-tik*) [πλάσσειν, to mold]. Capable of being formed or molded; plasmic; formative; easily modified; applied to morbid processes attended with fibrinous exudate. **P. Bronchitis**, pseudo-membranous bronchitis. **P. Linitis**, a name given to cirrhosis of the stomach. **P. Lymph**, the inflammatory exudate that covers wounds or inflamed serous surfaces, and which becomes organized by the development in it of blood-vessels. **P. Operation**, the restoration of lost parts by the transfer of tissue from an adjacent part or by transplantation. **P. Surgery**, the art of performing plastic operations; the surgical replacement of lost parts.

Plasticity (*plas-tis'-it-e*) [πλάσσειν, to mold]. Plastic force. The quality of being plastic.

Plasticule (*plas'-tik-ūl*) [πλάσσειν, to mold]. A molecule of plastic material not yet fully organized.

Plastid (*plas'-tid*) [πλαστός, verbal adj. of πλάσσειν, to mold or form]. In biology: (*a*) any unicellular elementary organism, cell, or cytode; a cell; a mass of protoplasm or of plastic material; (*b*) one of a class of protoplasmic granules in the protoplasm of certain plant-cells; they are referred to three

types the synonymy of which is given by Goodale as follows:—

	Older Nomenclature.	Schimper.	Meyer.	Van Tieghem
General Term.		Plastid.	Trophoplast.	Leucite.
	Colorless protoplasmic granule.	Leukoplastid.	Anaplast.	Leucite proper.
Special Term.	Chlorophyl-granule.	Chloroplastid.	Autoplast.	Chloroleucite.
	Color-granule.	Chromoplastid.	Chromoplast.	Chromoleucite.

P., Connective-tissue, the connective-tissue corpuscles.

Plastidium (*plas-tid'-e-um*) [dim. of πλαστός, formed: *pl.*, *Plastidia*]. The cell, or plastid, considered with reference to its evolutionary or developmental possibilities. See *Plastid.*

Plastidular (*plas-tid'-u-lar*) [πλαστός, formed]. Pertaining to plastidules.

Plastidule (*plas'-tid-ûl*) [πλαστός, verbal adj. of πλάσσειν, mold, form]. In biology: (*a*) a protoplasm-molecule; (*b*) a term proposed by Elsberg as a substitute for *gemmule* as used by Darwin. See *Heredity, Gemmule, Biophor, Pangene, Plasome.* **P. of Elsberg,** the ultimate physical units of living matter. See *Heredity.*

Plastilytic (*plas-til-it'-ik*) [πλαστός, molded; λύειν, to dissolve]. Diminishing plasticity, or tending to soften plastic materials.

Plastin (*plas'-tin*) [πλαστός, verbal adj. of πλάσσειν, to form, mold]. In biology, one of the nucleins or special nitrogenous proteids more insoluble in alkalies and poorer in phosphorus than others; called *cytoplasm* by Schwartz. Cf. *nuclein, histon, adenin.*

Plastocolysis (*plas-to-kol'-is-is*) [πλαστός, molded; κώλυσις, hindrance]. Arrest of development.

Plastodynamia (*plas-to-di-nam'-e-ah*) [πλαστός, molded; δύναμις, power]. Nutritive plastic power.

Plastodynamic (*plas-to-di-nam'-ik*) [πλαστός, molded; δύναμις, force]. Pertaining to nutritive power.

Plastoprolepsis (*plas-to-pro-lep'-sis*) [πλαστός, molded; πρόληψις, anticipating]. Premature development of an organ or part.

Plastral (*plas'-tral*) [*plastron*, a breast-plate]. In biology, of or pertaining to the *plastron, q. v.*

Plastron (*plas'-tron*) [Fr., "breast plate"]. The sternum and costal cartilages, with the attached parts, such as are removed when a post-mortem examination is made of the condition of the thorax. In biology: (*a*) the ventral portion of the exo-skeleton of a tortoise or turtle; (*b*) one of the similar ventral, exoskeletal plates of certain amphibia; (*c*) the ventral shield of the fossil armadillo; (*d*) a colored area on the ventral surface of a bird.

Plastrum (*plas'-trum*) [an accom. form of *plastron*, a breastplate: *pl.*, *Plastra*]. Same as *Plastron.*

Plate (*plāt*) [ME., *plate*, a plate]. The horizontal plate of the ethmoid bone constituting the floor of the olfactory fossa and perforated for the passage of the olfactory nerves. **P., Abdominal.** See *P., Lateral Mesoblastic.* **P., Ambulacral,** one of the coronal plates of a sea-urchin, which are perforated to form part of an ambulacrum. **P., Approximation,** one of the plates of decalcified bone or other material, leaving a central hole and openings for sutures in the margin, which are used in enterectomy to bring the resected ends of intestine together. Also known as *Senn's Plate.* **P., Auditory,** the plate of bone forming the roof of the auditory meatus. **P., Axial,** the primitive streak of the embryo. **P., Basilar, P., Basicranial,** in embryology, the cartilaginous plate at the anterior end of the notochord, formed by the latter and the parachordal cartilages. **P., Blood.** See *Blood-plaque.* **P., Bone.** Synonym of *P., Approximation.* **P., Branchial,** one of the branchial arches of the embryo. **P., Cathammal,** in biology, one of the vascular lamellæ of certain *Medusæ*, formed by the pressing together of the two layers of the persistent endoderm by the subumbrellar and exumbrellar jelly. **P., Cribriform,** the anterior fossa of the base of the skull. **P.-culture,** in biology, a method devised by Koch to separate bacteria by pouring the liquid, gelatin culture-medium upon a sterilized glass plate, after inoculation. The plates of Koch have been replaced somewhat by *Petri's Dishes, q.v.* **P., Dorsal,** each of the two longitudinal ridges on the dorsal surface of the embryo, which subsequently join to form the neural canal. **P., Electric,** the finely granular end-plates composed of nerve-endings and large cells, found in the electric organs of electric fishes. **P., End,** a term given to the termination of a motor nerve in a muscle-fiber. **P., Equatorial,** in biology, the compressed mass of chromatic segments, aggregated about the equator of the nuclear spindle at a certain stage of karyokinesis. It is also called *nuclear plate, nuclear disc, mother-star.* **Ps., Facial,** the fronto-nasal and external group of nasal and maxillary plates of the embryo. **P., Flesh.** See *Lamella carnosa.* **P., Foot,** the flat, plate-like portion of the stapes which fills the fenestra ovalis. **P., Frontal,** in the fetus, a cartilaginous plate interposed between the lateral parts of the ethmoid cartilage and the lesser wings and anterior portion of the sphenoid bone. **P., Fronto-nasal,** the middle of the facial plates, which subsequently forms the external nose. **P., Gill,** a bronchial lamina of molluscs. **P., Gray.** Synonym of *Lamina cinerea.* **P., Ground,** the ground-substance of connective tissue and endothelial cells, in which are embedded the nucleus and intracellular network. **P., Hair.** Synonym of *Scales, Hair.* **Ps., Hyoid,** the second pair of the subcranial plates of the embryo, from which the hyoid bone is in part developed. **P., Inferior Maxillary,** in the embryo, the first pair of subcranial plates from which the mandible is developed. **P., Internasal.** Synonym of *P., Fronto-nasal.* **P., Intervertebral,** the disc of fibro-cartilage between adjacent vertebræ. **P., Intrafissural** (*of the pia*), the fold of pia passing into the ventral fissure of the spinal cord. **P., Lateral Mesoblastic,** the thick portion of the mesoblast situated one on each side of the notochord. Each plate splits into two portions, the ectal divisions coalescing to form the body-wall, or *Somatopleure*, the ental, to form the *Splanchnopleure*, or visceral covering. **P., Ligamentous,** one of the intervertebral fibrous discs of the embryo. **P., Mandibular.** Synonym of *P., Inferior Maxillary.* **P., Maxillary.** Synonym of *P., Inferior Maxillary.* **P., Medullary.** Synonym of *P., Dorsal.* **P., Mesenteric, P., Mesentery, P., Mesial.** Synonyms of *P., Lateral Mesoblastic.* **P., Motor.** Synonym of *P., End.* **P., Muscle, P., Muscular.** See *Myocomma.* **P., Negative,** of a *storage cell*, that plate which by the action of the changing current is partly covered with a coating of spongy lead; of a *voltaic cell*, that element of a voltaic couple which is negative in the electrolyte of the cell. **P., Nuclear.** Synonym of *P., Equatorial.* **P., Orbital:** (1) the smooth plate of the ethmoid bone forming part of the inner wall of the orbit; (2) of the frontal bone, a horizontal plate forming the roof of the

orbit. **P., Palate,** of the palate bone, the horizontal portion which, with its fellow of the opposite side, forms the greater part of the hard palate. **P., Parachordal.** Synonym of *P., Lateral Mesoblastic.* **P., Positive,** of a *voltaic cell*, the electro-positive element of a voltaic couple. **P., Protovertebral.** Synonym of *P., Lateral Mesoblastic.* **P., Pterygoid,** one of the processes of the sphenoid bone. **P., Senn's.** Synonym of *P., Approximation.* **P., Sieve.** See under *Sieve.* **P., Spindle,** the part of a cell-plate located within the cell-nucleus. **P., Subcranial.** See *Post-oral Arches.* **P., Tympanic.** The plate of bone forming the sides and floor of the auditory meatus. **P., Uteroplacental.** Synonym of *Decidua serotina.* **P., Valvular,** a valve-like fold of tissue which fills the foramen ovale in the fourth month of fetal life, permitting the passage of blood from the right to the left auricle, but not in the contrary direction. **P., Vascular.** Synonym of *Lamina, Vascular.* **Ps., Vertebral,** undivided masses of mesoblast, running longitudinally between the lateral mesoblastic plates and the medullary ridges. Also, the laminæ on each side of the primitive groove by the union of which the vertebræ are formed. **P., Visceral,** the splanchnopleure layers of the lateral mesoblastic plates. **P., Vitelline,** the peculiar, doubly refractive crystals, probably albuminoid in character, found in the egg-yolk of turtles, frogs, and certain fishes.

Plated (*plat'-ted*) [ME., *plate*, a plate]. In biology, covered with dermal scales or scutes; scutate, loricate.

Platelet (*plāt'-let*) [dim. of ME., *plate*]. In biology, a blood-plate. Haliburton and Lilienfield regard the platelets as probably disintegration-products of leukocytes. They are composed of a substance rich in phosphorus, which by gastric digestion is separated into nuclein and albumin.

Platesyntropy (*plat-es-sin'-tro-pe*) [πλάτις, flat; σύν, together; τρέπειν, to turn]. In biology, Wilder's term for the morphotropic relation between parts upon the same side of the meson; *e. g.*, the brachium and the cubitum.

Platetrope (*plat'-et-rōp*) [πλατύς, flat; τρέπειν, to turn]. In biology, one of two symmetrically related parts on opposite sides of the meson; a lateral homologue.

Platetropy (*plat'-et-ro-pe*) [πλατύς, flat; τρέπειν, to turn]. In biology, bilateral symmetry; Wilder's term for the antitropical relation between parts upon opposite sides of the meson; *e.g.*, the relation between the right and the left ear.

Platiasmus (*plat-e-az'-mus*) [πλατύς, broad]. An impediment to speech, due to a defect of the tongue, causing thickness of speech.

Platina (*plat-e'-nah*) [Sp., *platina*]. The older name of platinum.

Platinamin (*plat-in'-am-in*) [Sp., *platina*, platina; *amin*]. An amin-compound of platinum in which the metal is quadrivalent.

Platinammonium (*plat-in-am-o'-ne-um*) [Sp., *platina*, platina; *ammonium*], PtN_2H_6. A quadrivalent radicle.

Platinate (*plat'-in-āt*) [Sp., *platina*, platina]. A salt of platinic oxid—a compound of platinum dioxid and basic oxid.

Platinic (*plat-in'-ik*) [Sp., *platina*, platina]. Containing platinum as a quadrivalent element. **P. Chlorid** is used to distinguish potassium from sodium and to precipitate salts of ammonium and of compound ammonias, such as alkaloids.

Platiniferous (*plat-in-if'-er-us*) [Sp., *platina*, platina; *ferre*, to bear]. Producing platinum.

Platinous (*plat'-in-us*) [Sp., *platina*, platina]. Containing platinum as a divalent element.

Platinum (*plat'-in-um*) [Sp., *platina*, platina]. Pt. = 197; quantivalence II, IV; sp. gr. 21.5. A metal of silver-white luster, only soluble in nitro-hydrochloric acid. It is employed in making vessels for chemic and pharmaceutic use. In the form of wire, affixed to a glass rod, it is used as the platinum needle or *Oese* in bacteriologic work. Platinum salts are poisonous. See *Elements, Table of.* **P., Black,** a very finely divided metallic platinum, which has a great capacity for absorbing hydrogen and for condensing oxygen upon its surface. It is used for testing amylic alcohol by oxidizing it into valerianic acid.

Platode, Platoid (*plat'-ōd, plat'-oid*) [πλατύς, broad; εἶδος, form]. In biology, broad or flat, as a worm.

Plattner's Bile-crystals. A whitish semi-crystalline mass obtained from an extract of bile-acids, by distilling off the alcohol, dissolving the residue in a little absolute alcohol, and adding ether until the solution becomes turbid.

Platula (*plat'-u-lah*). Synonym of *Pediculus pubis.*

Platurous (*pla-tu'-rus*) [properly, *platyurous*; πλατύς, broad; οὐρά, tail]. In biology, having a broad tail.

Platy- (*plat'-e-*) [πλατύς, broad]. A prefix, signifying broad.

Platybasic (*plat-ib-a'-sik*) [πλατύς, broad; βάσις, base]. Having a flat base, as certain skulls.

Platybrachycephalic (*plat-ib-rak-is-ef-al'-ik*) [πλατύς, broad; βραχύς, short; κεφαλή, head]. Having a flat and broad skull.

Platybregmate (*plat-ib-reg'-māt*) [πλατύς, broad; βρέγμα, bregma]. Having a wide bregma.

Platybregmatic (*plat-ib-reg-mat'-ik*). Synonym of *Platybregmate.*

Platycarpous (*plat-ik-ar'-pus*)[πλατύς, broad; καρπός, fruit]. In biology, having broad fruit.

Platycelian, Platycelous (*plat-is-el'-e-an, plat-is-el'-us*). Synonym of *Opisthocelous.*

Platycephalia (*plat-is-ef-a'-le-ah*). Synonym of *Platycephaly.*

Platycephalic, Platycephalus (*plat-is-ef-al'-ik, plat-is-ef'-al-us*) [πλατύς, wide; κεφαλή, head]. Having a broad skull; with a vertical index of less than 70°.

Platycephaly (*plat-is-ef'-al-e*) [πλατύς, broad; κεφαλή, head]. The quality of being platycephalous.

Platycnemia (*plat-ik-ne'-me-ah*) [πλατύς, broad; κνήμη, leg]. The quality of being platycnemic; broadness of the tibia. Platycnemia is a characteristic of many tribes of the African race, and is generally associated with pilastered femur.

Platycnemic (*plat-ik-ne'-mik*) [πλατύς, broad; κνήμη, leg]. Having a tibia which is exaggerated in breadth.

Platycnemism (*plat-ik-ne'-mizm*). See *Platycnemia.*

Platycoria, Platycoriasis (*plat-ik-o'-re-ah, plat-ik-o-ri'-as-is*) [πλατύς, broad; κόρη, pupil]. Expansion of the pupil; mydriasis.

Platycyte (*plat'-is-īt*) [πλατύς, broad; κύτος, cell]. A cell intermediate in size between a giant-cell and a leukocyte, found in tubercle-nodules.

Platydactyl (*plat-id-ak'-til*) [πλατύς, broad; δάκτυλος, finger]. In biology, having broad or thick digits.

Platyelminthes, Platyhelminthes (*plat-e-el-min'-thēz, plat-e-hel-min'-thēz*) [πλατύς, broad; ἕλμινς, a worm]. Flat-bodied, more or less elongated worms, usually containing both sexual elements at the same time. They include flat-worms, flukes, and tape-worms.

Platygastric (*plat-ig-as'-trik*) [πλατύς, broad; γαστήρ, belly]. In biology, having a broad, gastric cavity.

Platyglossal (*plat-ig-los'-al*) [πλατύς, broad; γλῶσσα, tongue]. In biology, having a broad tongue.

Platyhieric (*plat-e-hi-er'-ik*) [πλατύς, broad; ἱερός, holy, sacrum]. Having a broad sacrum, in distinction

from *dolichohieric*, having a narrow sacrum. As a rule, females are *platyhieric*.

Platynosis (*plat-in-o'-sis*) [πλατύνωσις, from πλατύνειν, to make broad]. Amplification; enlargement.

Platynotal, Platynote (*plat-in-o'-tal, plat'-in-ōt*) [πλατύς, broad; νῶτος, back]. In biology, broad-backed.

Platyodont (*plat'-e-o-dont*) [πλατύς, broad; ὀδούς, (ὀδοντ-) tooth]. In biology, having broad teeth; an animal with broad teeth.

Platyope (*plat'-e-ōp*) [πλατύς, broad; ὤψ,(ὀπ-) face]. In biology, a broad-faced individual, or skull.

Platyopia (*plat-e-o'-pe-ah*) [πλατύς, broad; ὤψ, face]. Broadness of the face; the quality of being platyopic.

Platyopic (*plat-e-op'-ik*) [πλατύς, broad; ὤψ (ὀπ-), face]. In biology, having a face wide across the eyes, as in the Mongolian races; having the naso-malar index below 107.5°.

Platypellic (*plat-ip-el'-ik*) [πλατύς, wide; πέλλα, basin, a pelvis]. Having a pelvis very broad transversely, in distinction from *dolichopellic*, having a narrow pelvis.

Platypelvic (*plat-ip-el'-vik*). Same as *Platypellic*.

Platypetalous (*plat-ip-et'-al-us*) [πλατύς, broad; πέταλον, a leaf]. In biology, having broad petals.

Platyphyllous (*plat-if-il'-us*) [πλατύς, flat; φύλλον, leaf]. In biology, having broad leaves.

Platypod (*plat'-ip-od*) [πλατύς, broad; πούς, foot]. In biology, a broad-footed animal, as a syndactylous bird.

Platypodia (*plat-ip-o'-de-ah*) [πλατύς, broad; πούς, foot]. Flat-footedness.

Platypygous (*plat-ip-i'-gus*) [πλατύς, broad; πυγή, rump]. In biology, having broad buttocks.

Platyrrhine (*plat'-ir-in*) [πλατύς, broad; ῥίς, nose]. Having the nose broad and flat. The *Platyrrhini* are a tribe of apes with broad and flat noses. See *Index*.

Platyrrhinic (*plat-ir-in'-ik*) [πλατύς, broad; ῥίς, nose]. Applied to individuals characterized by a width of nose the index of which exceeds 53°. See *Index*.

Platyrrhiny, Platyrhiny (*plat'-ir-i-ne*)[πλατύς, broad; ῥίς, nose]. The condition of having a platyrrhine skull.

Platyscopic (*plat-is-kop'-ik*) [πλατύς, broad; σκοπεῖν, to view]. In optics, having a broad field of view.

Platysma (*plat-iz'-mah*) [πλάτυσμα; πλατύς, broad]. Anything of considerable superficial dimensions. Also, a plaster. **P. myoides.** See *Muscles, Table of*. The platysma of man is the homologue of part of the *Panniculus carnosus* of quadrupeds. **P. Reflex.** See *Reflexes, Table of*.

Platysternal (*plat-is-ter'-nal*)[πλατύς, broad; στέρνον, breast-bone]. In biology, having a broad flat breast-bone.

Platystomous (*plat-is'-to-mus*) [πλατύς, wide; στόμα, mouth]. Having a broad mouth.

Plaut's Method. A method of staining actinomyces. Either (1) place sections in Gibbes' magenta-solution, or carbolized fuchsin-solution for ten minutes at 45° C.; wash in distilled water, place in a mixture of equal volumes of saturated aqueous solution of picric acid and absolute alcohol for from five to ten minutes, wash again in water, pass gradually up to absolute alcohol; clear in cedar-oil, mount in balsam; or (2) place sections in carbolized fuchsin for ten minutes and decolorize in fluorescin alcohol. Stain the nuclei with Ehrlich's hematoxylin, and counterstain faintly with benzo-purpurin. (*After Squire.*)

Plax (*plaks*) [πλάξ]. A genus of microscopic fungi. **P. scindens**, a name given by Eklund to a microörganism which he found in the blood and urine of scarlet-fever patients.

Playfair's Food. A food for infants composed of rennet-whey, plus milk, cream, and lactose. The casein is diminished in amount, but that remaining is unaltered in quality, hence the coagulum is objectionable. **P.'s Treatment.** See *Rest-cure*.

Plecolepidous (*plek-o-lep'-id-us*) [πλέκειν, to twine, twist; λεπίς, a scale]. In biology, applied to *Compositæ* in which the bracts of the involucre are coherent.

Plectana (*plek'-tan-ah*) [πλεκτάνη, coil]. A cornu of the uterus.

Plectrum (*plek'-trum*) [πλῆκτρον, a spur: *pl.*, *Plectra*]. The styloid process of the temporal bone; the tongue; the uvula.

Pledget (*plej'-et*) [origin obscure]. A small flattened compress of lint, wool, cotton, or other fiber, sometimes medicated, designed for application to the surface of a wound to prevent contact with the air, and to absorb discharges or to still hemorrhage.

Plegaphonia (*pleg-af-o'-ne-ah*) [πληγή, stroke; φωνή, sound]. The sound produced in auscultatory percussion of the larynx, the glottis being open.

Plegometer (*pleg-om'-et-er*). Synonym of *Pleximeter*.

Pleiochasium (*pli-o-ka'-ze-um*) [πλείων, more: χάσις, separation]. In biology, a cyme with several lateral axes; a multiparous cyme.

Pleiochromia (*pli-o-kro'-me-ah*) [πλείων, more; χρῶμα, color]. Increased secretion of biliary coloring-matter.

Pleiomazia (*pli-o-ma'-ze-ah*). Same as *Polymastia*.

Pleiomorphism (*pli-o-mor'-fizm*) [πλείων, more; μορφή, form]. In biology: (*a*) change of form due to excessive growth of an organism; (*b*) polymorphism; the occurrence of several distinct forms in the life-cycle of an individual; *e.g.*, no less than three form-genera (*Æcidium*, *Uredo*, and *Puccinia*) were established to denote the stages of the life-cycle of *Puccinia graminis*, the well-known corn mildew. Such transformation or pleiomorphism does not exist in the animal kingdom. Cf., *Polymorphism*.

Pleiomorphy (*pli'-o-mor-fe*) [πλείων, more; μορφή, form]. In biology: (*a*) same as *Pleiomorphism*; (*b*) the state of regularity in the flowers of plants normally irregular. Cf. *Peloria*.

Pleiophyllous (*pli-off'-il-us*) [πλείων, more; φύλλον, leaf]. In biology, exhibiting pleiophylly.

Pleiophylly (*pli-off'-il-e*) [πλείων, more; φύλλον, leaf]. In biology, the state in which, starting from a given point the leaves of a plant are found abnormally increased in number.

Pleiospermous (*pli-o-sper'-mus*) [πλείων, more; σπέρμα, seed]. In biology, containing an abnormally large number of seeds.

Pleiosporous (*pli-o-spo'-rus*) [πλείων, more; σπόρος, spore]. In biology, producing an abnormally large number of spores.

Pleiotaxy (*pli'-o-taks-e*) [πλείων, more; τάξις, arrangement]. In biology, an abnormal multiplication in the number of whorls in a plant.

Pleiothalamous (*pli-o-thal'-am-us*) [πλείων, more; θάλαμος, a bed-chamber]. In biology, having more chambers or cells than usual.

Pleiotrachea (*pli-o-tra'-ke-ah*) [πλείων, more; τραχεία, windpipe]. In biology, Cooke's term for a membranous trachea containing a compound spiral fiber.

Plemmyria (*plem-ir'-e-ah*). Synonym of *Plethora*.

Plenalvia (*plen-al'-ve-ah*) [*plenus*, full; *alvus*, belly]. Overfilling or impaction of the stomach in lower animals.

Plenck's Digestive. A preparation consisting of 10 parts of clarified turpentine, 8 parts of yolk of egg, 2 parts of honey, 32 parts of spring-water, and 48 parts of alcohol. It is used as an injection for fistulæ.

P's. Solution, a solution for application to condylomata and other hypertrophic syphilitic lesions. The formula is: Bichlorid of mercury and alum, each one ounce; acetate of lead and camphor, each one dram; alcohol and vinegar, each 12 ounces. This is applied with a camel's hair pencil. It is likely to produce pain and should be used only in hospitals.

Pleocatantes (*ple-o-kat-an'-tēz*) [πλέων, more; κατάντης, downward]. Lissauer's term for a skull in which the angle formed between the radius fixus and the line joining the hormion and the staphylion is between 45° and 67°.

Pleochroism (*ple-ok'-ro-izm*) [πλείων, more; χροιά, color]. The property possessed by some bodies, especially crystals, of presenting different colors when viewed in the direction of different axes, due to the fact that the rays having vibrations in different planes, suffer absorption in different degrees.

Pleochromatic (*ple-o-kro-mat'-ik*) [πλέων, more; χρώμα, color]. Pertaining to pleochroism.

Pleocleis (*ple'-o-klis*) [πλέων, pp. of πλέειν, πλεῖν, to sail, swim; κλείς, a bar, bolt, or hook]. In biology, the tubercle attached to the first somite of the pleon in crustaceans and precluding the carapace from being raised posteriorly.

Pleokatantes (*ple-o-kat-an'-tēz*). See *Pleocatantes*.

Pleomastia, Pleomazia (*ple-o-mas'-te-ah, ple-o-ma'-ze-ah*) [πλέων, more; μαστός, or μαζός, breast]. The condition of having more than two mammæ. See *Polymastia*.

Pleomorphic (*ple-o-mor'-fik*) [πλέων, more; μορφή, form]. Having more than one form.

Pleomorphism (*ple-o-mor'-fizm*). See *Pleiomorphism*.

Pleon (*ple'-on*) [πλέων, πλείων, more]. In biology, Nægeli's term for aggregates of organic matter which cannot be increased or diminished without changing their chemic nature.

Pleon (*ple'-on*) [πλεῖν, to sail, to swim]. In biology: (*a*) the abdomen of a crustacean, as distinguished from the *cephalon* or head and *pereion* or thorax; (*b*) the telson of certain crustaceans, as *Limulus*, so called by Owen from the idea that it represents the abdomen.

Pleonasm (*ple'-o-nazm*) [πλεονασμός, an exaggeration]. Any deformity marked by superabundance of certain organs or parts.

Pleonectic (*ple-o-nek'-tik*) [πλεονεξία, greediness]. Characterized by pleonexia.

Pleonexia (*ple-o-neks'-e-ah*) [πλεονεξία, greediness]. Greediness or arrogance due to mental disease.

Pleopod (*ple'-o-pod*) [πλέειν, to swim; πούς, foot]. In biology, one of the swimmerets or abdominal swimming-legs of a crustacean.

Plerocercus (*ple-ro-sir'-kus*) [πλήρης, full; κέρκος, tail]. In biology, the second larval stage of certain platodes, *e. g.*, *Bothriocephalus latus*. (Braun.)

Plerom. Pleroma (*ple'-rōm, ple-ro'-mah*) [πλήρωμα, that which fills]. Same as *Plerome*.

Plerome (*ple'-rōm*) [πλήρωμα, that which fills]. In biology, the axial portion of the growing point; the cylinder or shaft of nascent fascicles; *plerom, pleroma*. **P.-sheath**, in biology, the phloëm-sheath in its nascent state.

Plerosis (*ple-ro'-sis*) [πλήρωσις, a filling]. 1. The restoration of lost tissue. 2. Plethora.

Plerotic (*ple-rot'-ik*) [πλήρωσις, a filling]. Tending toward, or pertaining to, a plerosis. As a noun, a drug promoting the filling up of wounds by new tissue.

Plesiopia (*ples-e-o'-pe-ah*) [πλησίος, near; ὤψ, eye]. Increased convexity of the crystalline lens, producing myopia, and due to long-continued accommodation-strain.

Plessimeter (*ples-im'-et-er*). Synonym of *Pleximeter*.

Plessor (*ples'-or*). Synonym of *Plexor*.

Plessy's Green. Same as *Mittler's Green*.

Plethomeria (*pleth-o-mer'-e-ah*) [πλῆθος, fulness; μέρος, part]. Redundancy or over-growth of an organ or part.

Plethora (*pleth'-o-rah*) [πλησθώρη, πλῆθος, fulness]. Abnormal fulness of the blood-vessels, or superabundance of blood. See *Polyemia*. **P. apocoplica**, the condition that follows major amputations attended with little loss of blood. **P., Hydremic.** Synonym of *Hydremia*. **P. hyperalbuminosa**, an increase of the albuminoid elements of the blood-plasma. **P. polycythæmica.** Synonym of *Polycythemia*. **P., Serous**, an excess of serum in the blood. **P. universalis**, plethora affecting all the body.

Plethoric (*pleth'-o-rik*) [πλῆθος, fulness]. Pertaining to plethora.

Plethysmograph (*pleth-iz'-mo-graf*) [πληθυσμός, increase; γράφειν, to record]. An instrument for ascertaining changes in the volume of any organ or part, dependent upon changes in the quantity of the blood.

Plethysmographic (*pleth-iz-mo-graf'-ik*) [πληθυσμός, increase; γράφειν, to write]. Pertaining to the plethysmograph.

Pleumonia (*plu-mo'-ne-ah*) [πλεύμων, the lung]. Synonym of *Pneumonia*.

Pleura (*plu'-rah*) [πλευρά, a side]. The serous membrane which envelops the lung (*P., Pulmonary*), and, which being reflected back, lines the ental surface of the thorax (*P., Costal*). In biology: (*a*) the lateral portion of the integumentary segments of an arthropod. It lies between the *tergum* and *sternum*, and consists of the *epimeron* and *episternum*; (*b*) one of the lateral tracts of the rachis of the lingual ribbon of gastropod molluscs. **P. costalis.** See *P., Costal*. **P., Diaphragmatic**, the reflection of the pleura upon the upper surface of the diaphragm. **P., Parietal.** Synonym of *P., Costal*. **P., Pericardial**, the portion of the pleura contiguous to the pericardium. **P. phrenica.** Synonym of *P., Diaphragmatic*. **P. pulmonalis.** Synonym of *P., Pulmonary*. **P., Visceral.** Synonym of *P., Pulmonary*.

Pleural (*plu'-ral*) [πλευρά, pleura]. 1. Pertaining to the pleura. 2 [πλευρόν, rib]. Pertaining to a rib, or the ribs; costal. **P. Eclampsia.** See *P. Epilepsy*. **P. Epilepsy**, a convulsion sometimes following the procedure of washing out the pleural cavity. It may terminate fatally, or may end in monoplegia or hemiplegia. **P. Reflexes**, grave nervous phenomena which develop in the course of removal of a pleural effusion, either at the time of aspiration or, more often, during the process of washing out the pleural cavity. Sudden unconsciousness, with tonic and clonic convulsions, hemiplegia, with or without aphasia, paralysis of the arm on the affected side, sometimes with hemichorea, are some of the conditions that have been observed.

Pleuralgia (*plu-ral'-je-ah*) [πλευρά, side; ἄλγος, pain]. Intercostal neuralgia.

Pleuralgic (*plu-ral'-jik*) [πλευρά, side; ἄλγος, pain]. Pertaining to or affected with pleuralgia.

Pleurapophyseal (*pul-rap-off-iz'-e-al*) [πλευρόν, rib; ἀπόφυσις, offshoot]. Pertaining to a pleurapophysis.

Pleurapophysis (*plu-rap-off'-is-is*) [πλευρόν, a rib; ἀπόφυσις, a process: *pl., Pleurapophyses*]. In biology, one of the lateral processes of a vertebra, having the morphologic valence of a rib; a true rib.

Pleurapostema (*plu-rap-os-te'-mah*) [πλευρά, pleura; ἀπόστημα, abscess]. A collection of pus in the cavity of the pleura.

Pleurarthrocace (*plu-rar-throk'-as-e*) [πλευρόν, rib;

ἄρθρον, joint; *κακός*, evil]. Disease of the costo-vertebral joints; also, caries of the ribs.

Pleurarthron (*plu-rar'-thron*) [*πλευρόν*, rib; *ἄρθρον*, joint]. The articulation of a rib.

Pleurenchyma (*plu-reng'-kim-ah*) [*πλευρά*, side; *ἔγχυμα*, infusion]. In biology, woody tissue.

Pleurenchymatous (*plu-reng-kim'-at-us*) [*πλευρά*, side; *ἔγχυμα*, that which is poured in]. Pertaining to, or of the nature of pleurenchyma.

Pleurisy (*plu'-ris-e*) [*πλευρά*, side]. Pleuritis; inflammation of the pleura. It may be acute or chronic. Three chief varieties are usually described, depending upon the character of the exudate: (*a*) *Fibrinous or Plastic*; (*b*) *Sero-fibrinous*; (*c*) *Purulent*. In **Fibrinous Pleurisy**, the pleura is covered with a layer of lymph of variable thickness, which, in the acute form, can be readily stripped off. This form is usually secondary to another disease, as pneumonia. Carcinoma, abscess, and gangrene of the lungs usually give rise to a plastic pleurisy when the disease reaches the surface of the lung. Then there seems to be an apparent idiopathic form, following exposure to cold. **P., Sero-fibrinous**, is generally due to tuberculosis, either of the lung, or, more rarely, primarily of the pleura. Other infectious diseases such as measles, scarlet fever, influenza, rheumatic fever, and sepsis sometimes cause a sero-fibrinous pleurisy. In a few cases no microörganismal cause can be discovered. **P., Purulent**, or **Empyema**, may be (1) a sequence of the acute sero-fibrinous form; (2) it may arise as a purulent pleurisy in the beginning, especially in acute infectious diseases — thus in scarlet fever, typhoid fever, pneumonia, influenza, measles, whooping-cough; tuberculous pleurisy is often purulent; (3) empyema may be due to local disease, as fracture or caries of the ribs, caries of the vertebræ, penetrating wounds, malignant disease of the lung or esophagus, or to perforation into the pleura of tuberculous cavities, of perityphlitic abscesses, of subdiaphragmatic abscesses, of hepatic abscesses, and of gastric ulcers. The onset of acute pleurisy is marked by agonizing pain in the side, sharp and stabbing, increased on coughing, and in its milder forms called a "stitch;" there may be an initial chill, followed by fever; or the disease may begin insidiously; friction-fremitus may be felt on palpation and a to-and-fro friction-sound is heard on auscultation. In the sero-fibrinous variety a liquid effusion takes place, varying in amount. The pain now stops and the signs of effusion become marked: bulging of the intercostal spaces and chest-wall, absence of vocal fremitus, displacement of the heart, movable dulness with a curved upper line, and a tympanitic percussion-note (*skodaic resonance*) beneath the clavicle and above the level of the effusion. *Chronic pleurisy* may be sero-fibrinous, coming on insidiously or following an acute sero-fibrinous pleurisy. A *dry chronic pleurisy* is a sequence of acute sero-fibrinous pleuritis, or is a primitive plastic inflammation. Tuberculosis and syphilis may cause chronic plastic pleurisy. Peripleuritis is a rare affection in which the connective tissue between the costal pleura and the thoracic wall becomes the seat of an inflammation that generally proceeds to suppuration. The etiology is obscure. **P., Areolar.** Synonym of *P., Multilocular*. **P., Calcareous,** a process characterized by the deposition of lime-salts in a thickened pleura. **P., Costo-pulmonary,** pleurisy affecting both the costal and the pulmonary pleura. **P., Diaphragmatic,** a form of the disease which is restricted to the pleural surface of the diaphragm. Vomiting, hiccough, and icterus are occasionally present. **P., Double,** pleurisy on both sides of the chest. **P., Dry,** that form in which there is little or no effusion of fluid. It is common in rheumatic and tuberculous patients. **P., Dyscrasic,** the presence of a fetid exudate in the pleural, as well as in the pericardial and peritoneal sacs, of still-born infants. It is a septic condition, and is most frequent in, if not confined to, hospitals in which puerperal sepsis rages. **P., Encysted,** pleurisy in which the effusion is circumscribed by adhesions or separated into pockets or loculi. It is most common in empyema. **P., Gangrenous,** pleurisy in which the exudate and the pleural membrane become gangrenous. **P., Hemorrhagic,** a variety in which the exudate contains a varying proportion of blood. It occurs: (*a*) in the pleurisy of asthenic states, such as carcinoma, chronic nephritis, and in the malignant infectious fevers; sometimes also in hepatic cirrhosis; (*b*) in tuberculous pleurisy; (*c*) in carcinomatous pleurisy; (*d*) blood may become accidentally mixed with the effusion from the wounding of the lung during aspiration. **P., Ichorous;** *Putrid Pleurisy;* a form characterized by the presence of a gray or dirty-brown fluid which gives off an offensive odor. It is usually dependent upon pyemia, septicemia, pulmonary gangrene, or putrid bronchitis. **P., Interlobar,** inflammation of the pleural layers between adjoining lobes of the lung. **P., Latent,** a form in which the subjective symptoms are absent. **P., Mediastinal,** inflammation of the pleural layers about the mediastinum. **P., Metapneumonic,** pleurisy dependent upon a pneumonia. **P., Multilocular,** an encysted pleurisy in which connective-tissue bands separate the effusion into several, usually intercommunicating, sacs. **P., Postpneumonic.** Synonym of *P., Metapneumonic*. **P., Putrid.** See *P., Ichorous*. **P., Pulsating.** Synonym of *Empyema, Pulsating*. **P.-root.** See *Asclepias*. **P., Spurious.** Synonym of *Pleurodynia*. **P., Suppurative.** Synonym of *P., Purulent*. See under *Pleurisy*. **P., Tuberculous,** pleurisy due to the tubercle-bacillus.

Pleuritic (*plu-rit'-ik*) [*πλευρά*, pleura; *ιτις*, inflammation]. Pertaining to, or affected with, or of the nature of, pleuritis.

Pleuritis (*plu-ri'-tis*) [*πλευρά*, pleura; *ιτις*, inflammation]. Inflammation of a pleura. See *Pleurisy*. **P. deformans,** chronic inflammation with great thickening and induration of the pleura, usually accompanying fibroid pneumonia. **P. duplicata,** bilateral pleurisy. **P. humida,** pleurisy with effusion. **P. incapsulata.** Synonym of *Pleurisy, Encysted*. **P. pulsans,** a form that usually, but not always, occurs in chronic cases, and in which the fluid is purulent. The pulsation is generally universal. It occurs more frequently among men, and between the ages of twenty and thirty years. It may be confounded with aneurysm. Its seat, however, is different; there is no *bruit;* it grows smaller under pressure and larger after coughing. **P. sicca,** dry pleurisy. **P. spuria.** Synonym of *Pleurodynia*. **P. vera,** simple pleurisy without complication.

Pleuro- (*plu'-ro-*) [*πλευρά*, side]. A prefix to denote connection with the pleura, or with a side.

Pleuroblastic (*plu-ro-blas'-tik*) [*πλευρά*, the side; *βλαστός*, a germ]. In biology, applied to certain fungi (*Peronosporeæ*) that produce globular or branched lateral outgrowths which act as haustoria.

Pleurocarpous (*plu-ro-kar'-pus*) [*πλευρά*, the side; *καρπός*, fruit]. See *Cladocarpous*.

Pleurocele (*plu'-ro-sēl*) [*πλευρά*, pleura; *κήλη*, tumor]. 1. Hernia of the lung; pneumocele. 2. A serous effusion into the pleural cavity.

Pleurocentral (*plu-ro-sen'-tral*) [πλευρά, side; κέντρον, center]. Pertaining to a pleurocentrum.

Pleurocentrum (*plu-ro-sen'-trum*) [πλευρά, side; κέντρον, center: *pl.*, *Pleurocentra*]. A hemi-centrum; the lateral element in a vertebral centrum.

Pleurocerebral (*plu-ro-ser'-e-bral*) [πλευρά, side; *cerebrum*, cerebrum]. In biology, connecting the side of the body with the head.

Pleuroclysis, Pleuroklysis (*plu-rok'-lis-is*) [πλευρά, rib, side; κλύσις, a wash]. The injection of fluids into the pleural cavity.

Pleurocœnadelphus (*plu-ro-sen-ad-el'-fus*) [πλευρά, side; κοινός, common; ἀδελφός, brother]. A double monster consisting of two nearly perfect bodies joined laterally by the trunk.

Pleurocolic (*plu-ro-kol'-ik*) [πλευρά, side; κῶλον, colon]. Costo-colic; joining the side and the colon.

Pleurocollesis (*plu-ro-kol-e'-sis*) [πλευρά, pleura; κόλλησις, a glueing]. Adhesion of the pleural layers.

Pleuro-cutaneous (*plu'-ro-ku-ta'-ne-us*) [πλευρά, pleura: *cutis*, skin]. In relation with the pleura and the skin, as a pleuro-cutaneous fistula.

Pleurodiscous (*plu-ro-dis'-kus*) [πλευρά, the side; δίσκος, a disc]. In biology, growing upon the sides of the disc, as the ray-flowers in the *Compositæ*.

Pleurodont (*plu'-ro-dont*) [πλευρά, the side; ὀδούς, (ὀδοντ-), tooth]. In biology, a tooth, or an animal bearing teeth, fastened into the jaw by a lateral ankylosis; as in certain lizards.

Pleurodyne (*plu'-ro-din*). See *Pleurodynia*.

Pleurodynia (*plu-ro-din'-e-ah*) [πλευρά, side; ὀδύνη, pain]. A sharp pain seated in the intercostal muscles. It is considered a myalgia of rheumatic origin.

Pleurogenic, Pleurogenous (*plu-ro-jen'-ik, plu-roj'-en-us*) [πλευρά, side; γενής, producing]. Originating in the pleura. **P. Pneumonia.** See *Pneumonia, Pleurogenous.* **P. Phthisis,** pulmonary tuberculosis starting from a pleurisy.

Pleurogynous (*plu-roj'-in-us*) [πλευρά, the side; γυνή, female]. In biology, bearing some peculiar structure alongside the ovary.

Pleurohepatitis (*plu-ro-hep-at-i'-tis*) [πλευρά, pleura; ἧπαρ, liver; ιτις, inflammation]. Inflammation of the pleura and the liver.

Pleuroid (*plu'-roid*) [πλευρόν, a rib; εἶδος, form]. One of the lateral elements of the pleural arch of a vertebrate. Cf. *Neuroid*.

Pleuroklysis (*plu-rok'-lis-is*). See *Pleuroclysis*.

Pleurolepida (*plu-ro-lep'-id-ah*) [πλευρά, the side; λεπίς, a scale]. In biology, the peculiar dermal ribs in extinct ganoids (*Pycnodonts*) that covered the whole body, or the anterior portion, with a sort of lattice-work.

Pleuromelus (*plu-rom'-el-us*) [πλευρά, side; μέλος, limb]. A monster possessing supernumerary thoracic limbs, the scapulæ of which are in contact with the properly developed arms.

Pleuron (*plu'-ron*) [πλευρόν, a rib: *pl.*, *Pleura*]. In biology: (*a*) a rib; (*b*) the lateral piece of a somite of an arthropod. Cf. *Mesopleuron, Metapleuron, Propleuron.*

Pleuro-œsophageus (*plu-ro-e-sof-aj-e'-us*) [πλευρά, side; οἰσόφαγος, esophagus]. A band of smooth muscle-fibers joining the left pleura posteriorly with the esophagus.

Pleuropathia, Pleuropathy (*plu-ro-pa'-the-ah, plu-rop'-ath-e*) [πλευρά, pleura; πάθος, disease]. A disease of the pleura.

Pleuropedal (*plu-ro-pe'-dal*) [πλευρά, side; *pes*, foot]. In biology, joining the side of the body with the foot.

Pleuropericarditis (*plu-ro-per-ik-ar-di'-tis*) [πλευρά, pleura; περί, around; καρδιά, heart; ιτις, inflammation]. Pleurisy associated with pericarditis.

Pleuro-peripneumonia (*plu'-ro-per-e-nu-mo'-ne-ah*). Synonym of *Pleuro-pneumonia*.

Pleuroperitoneal (*plu-ro-per-it-on-e'-al*) [πλευρά, side; περιτόναιον, peritoneum]. Pertaining to the pleuro-peritoneum.

Pleuroperitoneum, Pleuroperitonæum (*plu-ro-per-it-o-ne'-um*) [πλευρά, the side; περιτόναιον, peritoneum]. In biology, the lining serous membrane of the pleuro-peritoneal cavity of those vertebrates in which the thoracic and abdominal cavities are not separated by a diaphragm.

Pleuroperitonitis (*plu'-ro-per-it-on-i'-tis*) [πλευρά, pleura; περιτόναιον, peritoneum; ιτις, inflammation]. The simultaneous existence of pleurisy and peritonitis.

Pleuroplegia (*plu-ro-ple'-je-ah*) [πλευρά, side; πληγή, stroke]. Absence of the power of conjugate movement of the eyes to the right or left, though convergence may be preserved.

Pleuropneuma (*plu-ro-nu'-mah*). Synonym of *Pneumothorax*.

Pleuropneumonia (*plu-ro-nu-mo'-ne-ah*) [πλευρά, pleura; πνεύμων, lung]. Conjoined inflammation of the pleura and the lung. The ordinary croupous pneumonia is generally a pleuropneumonia. Usually the term refers to an acute, febrile, contagious disease of cattle. **P. contagiosa.** Synonym of *P., Epizootic.* **P., Epizoötic, P., Exudative,** characterized by lobar pneumonia and by pleurisy, generally plastic in type. The period of incubation is from two to three weeks. The cause of the disease is thought to be the pneumococcus of Frānkel. The disease is very fatal, especially at the beginning of an epidemic, and governments have established rigid quarantine measures against it. **P., Hypostatic,** hypostatic pneumonia associated with pleurisy.

Pleuropous (*plu'-ro-pus*) [πλευρά, side; πούς, foot]. In biology, having lateral supports.

Pleuropyesis (*plu-ro-pi-e'-sis*) [πλευρά, pleura; πύησις, suppuration]. Purulent pleurisy.

Pleurorhizal (*plu-ro-ri'-zal*) [πλευρά, the side; ῥίζα, root]. See *Accumbent*.

Pleurorrhagia (*plu-ror-a'-je-ah*) [πλευρά, pleura; ῥηγνύναι, to burst forth]. Hemorrhage from the pleura.

Pleurorrhea (*plu-ror-e'-ah*) [πλευρά, pleura; ῥοία, a flow]. An effusion of fluid into the pleura.

Pleurorthopnea (*plu-ror-thop-ne'-ah*) [πλευρά, side; ὀρθός, straight; πνοή, breath]. Orthopnea on account of pain in the side, either from pleurisy or pleurodynia.

Pleurosoma (*plu-ro-so'-mah*) [πλευρά, side; σῶμα, a body]. A variety of single autositic monsters of the species celosoma in which there is a lateral eventration occupying principally the upper portion of the abdomen and extending to the ventral portion of the chest, with atrophy or imperfect development of the upper extremity on the side of the eventration.

Pleurospasm (*plu'-ro-spazm*) [πλευρά, side; σπασμός, spasm]. Cramp, or spasm in the side.

Pleurosteal (*plu-ros'-te-al*) [πλευρά, side; ὀστέον, a bone]. Pertaining to the pleurosteon.

Pleurosteon (*plu-ros'-te-on*) [πλευρά, the side; ὀστέον, a bone: *pl.*, *Pleurostea*]. In biology, the anterior lateral portion of the breast-bone of a bird, giving attachment to the ribs; as distinguished from *lophosteon, coracosteon, metosteon*.

Pleurosthotonos (*plu-ros-thot'-o-nos*). See *Pleurothotonos*.

Pleurostosis (*plu-ros-to'-sis*) [πλευρά, pleura; ὀστέον, bone]. Calcification of the pleura.

Pleurothotonic (*plu-ro-tho-ton'-ik*) [πλευρόθεν, from the side; τείνειν, to bend]. Of the nature of or affected with pleurothotonos.

Pleurothotonos (*plu-ro-thot'-o-nos*) [πλευρόθεν, from the side; τείνειν, to bend]. A bending of the body to one side during a tetanic or other convulsion.

Pleurotomy (*plu-rot'-o-me*) [πλευρά, pleura; τομή, a cutting]. Incision into the pleura, as in empyema for the evacuation of the purulent collection. The incision is made between two ribs, usually in the eighth intercostal space dorsad of the posterior axillary line.

Pleurotonus (*plu-rot'-o-nus*). Synonym of *Pleurothotonos*.

Pleurotribe (*plu'-ro-trib*) [πλευρά, the side; τρίβειν, to rub]. In biology, applied to such flowers as have the stamens so arranged that an insect entering will receive the pollen upon its side, as in the pea. Cf., *Nototribe*, *Sternotribe*.

Pleurotyphoid (*plu-ro-ti'-foid*) [πλευρά, pleura; τύφος, stupor]. Pleuritis due to the presence of the bacillus of typhoid fever.

Pleurovisceral (*plu-ro-vis'-er-al*) [πλευρά, pleura, side; *viscus*, an organ or viscus]. Pertaining to the pleura or side, and to the viscera.

Plexal (*pleks'-al*) [*plectere*, to knit]. Pertaining to or of the nature of a plexus.

Plexed (*plekst*) [*plexus*, plaited]. Netted; plexiform.

Plexiform (*pleks'-if-orm*) [*plexus*, plexus; *forma*, form]. Resembling a plexus. **P. Angio-sarcoma,** an angio-sarcoma in which the sarcomatous vessels anastomose, forming a winding network. **P. Glands.** See *Gland*. **P. Neuroma,** a convoluted serpentine enlargement of the peripheral nerves. Generally it is only the connective tissue of the nerves that is involved; these are then fibromatous masses. Rarely, however, the nerves themselves participate, becoming lengthened and increased in number.

Pleximeter (*pleks-im'-et-er*) [πλῆξις, a stroke; μέτρον, measure]. An ivory disc or other hard substance placed on the body to receive the stroke in mediate percussion. Sometimes a pleximeter is used that consists of two flat discs joined at their centers by a short cylinder or rectangular rod.

Pleximetric (*pleks-im-et'-rik*) [πλῆξις, a stroke; πέτρον, measure]. Pertaining to or performed with a pleximeter.

Plexometer (*pleks-om'-et-er*). Same as *Pleximeter*.

Plexor (*pleks'-or*) [πλῆξις, stroke]. The hammer used for striking upon the pleximeter.

Plexure (*pleks'-ūr*) [*plectere*, to interweave]. An interweaving; a plexus.

Plexus (*pleks'-us*) [*plectere*, to knit]. An aggregation of vessels or nerves forming an intricate network. A table of the nerve-plexuses is appended. **P. articularis,** a small venous plexus near the outer aspect of the temporo-maxillary articulation. **P. cerebri,** either of the choroid plexuses. **P., Choroid,** a fringe-like membrane, occupying the margin of a fold of the pia mater in the interior of the brain. In structure, it consists of minute and highly vascular villous processes, composed of large round corpuscles, containing, besides a central nucleus, several yellowish granules and fat-molecules, and covered by a single layer of flattened epithelium. **P. ciliaris.** Synonym of *Canal of Schlemm*. **P. cirsoides.** Synonym of *P., Pampiniform*. **P. digitalis,** one of the venous plexuses on the anterior and posterior surfaces of the second and third phalanges. **P., Fundamental.** See *P., Principal*. **P., Ganglionic,** a nervous plexus in which ganglion-cells are found. **P. gangliosus,** one of the small plexuses formed at the junction of the spinal nerves and the inferior hypogastric plexus. They contain a number of ganglia. **P. glandularis, P. glanduliformis.** Synonym of *P., Choroid*. **P., Hemorrhoidal,** a plexus of veins surrounding the lower part of the rectum, beneath the mucous membrane, and giving origin to the inferior, middle, and superior hemorrhoidal veins. **P., Hovius',** a plexus of veins in the ciliary region of the eye. **P., Interlaminar,** a lymphatic plexus formed by the lymphatic vessels in the muscular coat of the intestines. **P., Lymphatic,** a plexus of lymphatic vessels. **P. Malleal, P., Manubrial,** a plexus of veins surrounding the handle of the malleus. **P., Medulli-spinal,** a venous plexus surrounding the spinal cord. **P., mirabilis.** Synonym of *P., Choroid*. **P. nervorum spinalium,** a plexus formed by the spinal nerves, *e. g.*, the cervical, brachial, lumbar, or sacral. **P., Pampiniform,** the spermatic plexus, collecting the blood from the testicle, and emptying by a single vein, the spermatic, into the right renal vein on the right side, and into the inferior cava on the left. In the female, the plexus collects the blood from the uterus, the oviduct, and the ovary. **P., Parotid.** Synonym of *Pes anserinus*. **P., Perineal,** a superficial and a deep venous plexus are found in the perineum. The *superficial* is formed by veins from the labia majora and some from the prepuce of the clitoris and the bulbs. Its blood is carried to the superficial epigastric, pudic and external obturator veins. The *deep* plexus is formed by the veins from the cavernous bodies, from the bulbs, and a branch from the dorsal vein of the clitoris. **P., Pharyngeal,** a venous plexus surrounding the pharynx. **P. plantaris,** a plexus of veins on the sole of the foot. **P., Principal** or **Fundamental,** a plexus formed by the larger nerves of the body. They frequently contain ganglionic cells which are collected into microscopic ganglia. **P., Prostatic:** (1) A plexus of veins surrounding the prostate gland; it receives the dorsal veins of the penis. (2) See also *P., Prostatic*, in *Table*. **P., Pterygoid,** a plexus of veins formed by branches of the internal maxillary vein, and situated between the temporal and external pterygoid muscles. **P., Pudendal,** a venous plexus into which veins from the clitoris, the labia minora, the urethra, and the vaginal vestibule empty. The corresponding plexus in the male surrounds the prostate and membranous urethra. **P., Santorini's,** the prostatic plexus of veins. **P. seminalis.** Synonym of *Rete testis*. **P. spinalis,** the plexus formed by the spinal veins. There are two, an *anterior* and a *posterior* spinal plexus. **P., Sympathetic,** a plexus formed by sympathetic nerve-fibers. **P. thyroideus impar,** a venous plexus situated beneath the isthmus of the thyroid gland. It is derived from the inferior thyroid veins. **P. tonsillaris:** (1) a venous plexus surrounding the tonsil; (2) See also *P., Tonsillar*, in *Table*. **P., Urethro-vesical,** a venous plexus situated about the urethra and the lower portion of the bladder. It receives the dorsal vein of the clitoris, the pudic veins (right and left), veins from the cavernous bodies of the clitoris, a branch from the obturator vein, and a few small branches from the urethra and the neck of the bladder. **P., Utero-vaginal,** a venous plexus surrounding the vagina, the neck and the body of the uterus. **P., Vaginal:** (1) a venous plexus surrounding the vagina; (2) See also *P., Vaginal*, in *Table*. **P., Venous,** a network or plexus of veins. **P., Vesical:** (1) a plexus of veins in the wall of the bladder, outside of the muscular coat; it communicates with the hemorrhoidal and prostatic plexuses in the male, and with the vaginal plexuses in the female; (2) See also *P., Vesical*, in *Table*.

TABLE OF NERVE-PLEXUSES.

NAME.	LOCATION.	DERIVATION.	DISTRIBUTION.
Aortic (abdominal).	Sides and front of aorta.	Semilunar and lumbar ganglia, renal and solar plexuses.	Inferior mesenteric, spermatic and hypogastric plexuses, filaments to the inferior vena cava.
Aortic (thoracic).	Surrounding the thoracic aorta.	Thoracic ganglia of the sympathetic nerve; cardiac plexus.	Solar plexus, aorta.
Auerbach's.	Between the circular and longitudinal muscular coats of the small intestine.	Sympathetic.	Intestinal walls.
Axillary.	See *Brachial.*		
Brachial.	Lower part of neck to axilla.	Ventral branches of the four lower cervical and the greater part of the first thoracic nerve.	Suprascapular, rhomboid, median, ulnar, musculo-spiral, posterior thoracic, muscular thoracic, subscapular, circumflex, Wrisberg's musculo-cutaneous.
Cardiac (great or deep).	In front of the bifurcation of the trachea.	Cardiac nerves of the cervical ganglia of the sympathetic, branches of the recurrent laryngeal and vagus nerves.	Pulmonary, coronary, and cardiac plexuses.
Cardiac (superficial or anterior).	Beneath the arch of the aorta.	Left superior cardiac, branches of the vagus and deep cardiac plexus.	Coronary and pulmonary plexuses.
Carotid (external).	Around the external carotid artery.	Pharyngeal plexus, superior cardiac nerve, superior cervical ganglion.	External carotid artery and its branches.
Carotid (internal).	Outer side of the internal carotid artery.	Sixth nerve and Gasserian ganglion.	Carotid artery, petrosals, communicating branches.
Caudal.	See *Coccygeal.*		
Cavernous.	Cavernous sinus.	Third, fourth, fifth, and sixth nerves, and ophthalmic ganglion.	Wall of the inferior carotid.
Cavernous (of penis).	Cavernous bodies.	Vesical plexus.	Cavernous bodies.
Celiac.	Celiac axis.	Solar plexus, splanchnic (lesser), vagus.	Coronary, hepatic, pyloric, gastro-duodenal, gastro-epiploic, and splenic plexuses.
Cervical.	Opposite the four upper vertebræ.	Ventral branches of the four upper vertebræ.	*Superficial:* To skin of head and neck. *Deep:* Phrenic, communicans noni, two muscular, two communicating.
Cervical (posterior).	See *Cruveilhier's plexus.*		
Coccygeal.	Dorsal surface of coccyx and caudal end of sacrum.	Fourth and fifth sacral and the coccygeal nerves.	Ano-coccygeal nerves.
Coronary (anterior).	Below arch of aorta.	Superficial and deep cardiac plexuses.	Ventral surface of heart.
Coronary (gastric).	Lesser curvature of stomach.	Celiac, vagus, solar plexus.	Stomach.
Coronary (posterior).	Coronary artery at dorsum of heart.	Deep cardiac plexus.	Filaments to ventricles.
Crural.	Around the upper portion of femoral artery.	Anterior crural nerve.	Adjacent structures.
Crural (of Cruveilhier).	Posterior cervical region.	Great occipital nerve, first and second cervical nerves.	Posterior cervical region.
Cystic.	Gall-bladder.	Hepatic plexus.	Gall-bladder.
Dental (inferior).	Around the roots of the teeth of the mandible.	Inferior dental nerve.	Teeth.
Diaphragmatic.	See *Phrenic.*		
Duct of the ductus choledochus.	Around the common bile-duct.	Hepatic plexus.	Bile-duct.
Epigastric.	See *Solar.*		
Esophageal.	Around the esophagus.	Vagus nerve, thoracic sympathetic ganglia.	Esophagus.
Gangliform.		The roots of origin of the inferior maxillary nerve.	Inferior maxillary nerve.

TABLE OF NERVE-PLEXUSES.—*Continued.*

NAME.	LOCATION.	DERIVATION.	DISTRIBUTION.
Gastric.	Gastric artery.	Celiac plexus.	Stomach.
Gastro-duodenal.	Pancreatico-duodenal artery, right gastro-epiploic artery.	Celiac plexus.	Pancreatico-duodenal, gastro-epiploic plexuses.
Gastro-epiploic.	Near the stomach.	Hepatic plexus.	Filaments to stomach and mesentery.
Gulæ.	See *Esophageal.*		
Hemorrhoidal (inferior).	Rectum.	Pelvic plexus.	Rectum.
Hemorrhoidal (middle).	Sides of rectum.	Pelvic plexus, inferior mesenteric.	Filaments to rectum.
Hepatic.	Hepatic artery.	Celiac plexus, left vagus, right phrenic.	Liver.
Hypogastric.	Promontory of sacrum.	Aortic plexus and lumbar ganglia.	Pelvic plexuses.
Infra-orbital.	Under the levator labii superioris muscle.	Infra-orbital, facial.	Muscular.
Intermesenteric.	See *Aortic.*		
Intestinal submucous.	See *Meissner's.*		
Ischiadic.	See *Sacral.*		
Jacobson's.	See *Tympanic.*		
Lienalis.	See *Splenic.*		
Lingual.	Around the lingual artery.	External carotid plexus.	Tongue and lingual artery.
Lumbar.	Psoas muscle.	Anterior divisions of the four upper lumbar nerves.	Ilio-hypogastric, ilio-inguinal, genito-crural, external cutaneous, obturator and accessory, anterior crural.
Maxillary (inferior).	See *Dental (inferior).*		
Meissner's.	Submucosa of small intestines.	Sympathetic, branches of Auerbach's plexus.	Intestinal walls.
Mesenteric (inferior).	Inferior mesenteric artery.	Left side of the aortic plexus.	Parts supplied by the artery.
Mesenteric (superior).	Superior mesenteric artery.	Solar plexus.	Parts supplied by the artery.
Myenteric.	See *Auerbach's.*		
Naso-palatine.	At the incisor foramen.	Branches of the naso-palatine nerves.	The naso-palatine region.
Of the obturator nerve.	Around the obturator nerve.	Obturator nerve; internal saphenous nerve.	Obturator muscle.
Occipital.	Around the occipital artery.	External carotid plexus.	Posterior portion of parotid gland; occipital region of skull.
Ophthalmic.	Around the ophthalmic artery and optic nerve.	Ciliary nerves; sympathetic fibers.	Optic region.
Ovarian.	See *Spermatic.*		
Pancreatic.	Near pancreas.	Splenic plexus.	Filaments to pancreas.
Pancreatico-duodenal.	Near head of pancreas.	Hepatic plexus.	Filaments to pancreas and duodenum.
Patellar.	In front of the patella.	Internal saphenous; internal, middle, and external cutaneous nerves.	The region around the patella.
Pelvic.	Side of rectum and bladder.	Hypogastric plexus, second to fourth sacral nerves, first two sacral ganglia.	Viscera of pelvis, plexuses of pelvis.
Phrenic.	Phrenic artery.	Solar plexus.	Diaphragm and adrenal capsule.
Prostatic.	Vesical arteries.	Pelvic plexus.	Bladder.
Pudendal.	Lower portion of the pyriformis muscle.	Inferior hypogastric plexus.	Middle and inferior hemorrhoidal nerves.
Pulmonary (anterior).	Root of lungs, ventral side.	Anterior pulmonary branches, vagus and sympathetic.	Ventro-caudal part of lungs.

TABLE OF NERVE-PLEXUSES.—*Continued.*

NAME.	LOCATION.	DERIVATION.	DISTRIBUTION.
Pulmonary (posterior).	Root of lungs, dorsal side.	Posterior pulmonary branches, vagus and sympathetic.	Root of lungs, dorsal side.
Pyloric.	Near pylorus.	Hepatic plexus.	Filaments to pylorus.
Renal.	Renal artery.	Solar and aortic plexuses and semilunar ganglia.	Kidney, post-cava, spermatic plexus.
Sacral.	Ventrad of sacrum.	Lumbo-sacral cord, ventral divisions of the three upper sacral nerves, and part of the fourth.	Muscular, pudic, superior gluteal, great sciatic, small sciatic.
Of Santorini	See *Gangliform.*		
Semilunar.	See *Solar.*		
Solar (*semilunar*).	Dorsad of stomach.	Splanchnics and right vagus.	Semilunar ganglia, phrenic, suprarenal, renal, spermatic, celiac, superior mesenteric, and aortic plexuses.
Spermatic.	Spermatic vessels.	Renal plexus.	Testes (ovaries in female).
Sphenoid.	The upper portion of the *Carotid* (*internal*), *q. v.*		
Splenic.	Splenic artery.	Celiac plexus, left semilunar ganglia, right vagus nerve.	Spleen, pancreatic plexuses, left gastro-epiploic plexus.
Subsartorial.	At the posterior border of the sartorius muscle, a little below the middle of the thigh.	Obturator, long saphenous, and internal cutaneous nerves.	Filaments to adjacent skin.
Subtrapezial.	Beneath the trapezius muscle.	Cervical plexus and spinal accessory nerve.	Trapezius muscle.
Suprarenal.	Around the suprarenal bodies.	Diaphragmatic, solar, and renal plexuses.	Filaments to the medullary portions of the adrenals.
Thyroid (inferior).	Around the external carotid and inferior thyroid arteries.	Middle cervical ganglion.	Larynx, pharynx, thyroid gland.
Thyroid (superior).	Around the thyroid gland.	Superior laryngeal and superior cardiac nerves.	Thyroid region.
Tonsillar.	Tonsil.	Glosso-pharyngeal.	Tonsil, soft palate, fauces.
Tracheal (anterior inferior).	See *Pulmonary* (*anterior*).		
Tympanic.	Tympanum.	Tympanic nerve, sympathetic ganglia.	Tympanum.
Uterine.	Uterine arteries.	Pelvic plexus.	Cervix and lower part of uterus.
Vaginal.	Vagina.	Pelvic plexus.	Vagina.
Vertebral.	Surrounding the vertebral and basilar arteries.	First thoracic ganglion, upper cervical nerves.	Vertebral and cerebellar regions.
Vesical.	Vesical arteries.	Pelvic plexus.	Vesiculæ seminales, vas deferens.
Vidian		Vidian nerve.	

Pli courbe (*ple koorb*) [Fr.]. The angular gyrus.

Plica (*pli'-kah*) [L.: *pl.*, *Plicæ*]. A fold; a convolution of the brain; a valve of a vein. **P. adiposæ**: (1) folds of the costal pleura containing fat; (2) the synovial fringes. **P. aliformes**, the alar ligaments of the knee-joint. See *Ligament.* **P. ary-epiglotticæ.** See *Folds*, *Aryteno-epiglottidean.* **P. centralis retinæ**, a fold found post-mortem in the retina, extending transversely on each side of the optic disc. **P. ciliares**, the choroidal folds posterior to the ciliary processes. **P. coli**, a fold of mucosa forming the upper margin of the ileocecal valve. **P. conniventes.** Synonym of *Valvulæ conniventes.* **P. Douglasii.** See *Douglas's Pouch.* **P. fimbriata**, a fold of mucous membrane, with a fimbriated edge, extending in mammals from the frenum to the tip of the tongue. It is looked upon as the analogue of the sublingua of lower vertebrates. **P. ilei**, a fold of mucosa constituting the lower margin of the ileocecal valve. **P. interarticularis coxæ.** Synonym of *Ligamentum teres.* See *Ligament.* **P. linguæ perpendicularis**, one of the grooves or fissures on the dorsum of the tongue extending laterally on both sides of the median line. **P. longicauda**, a variety of *P. polonica*, in which the hair forms a long, matted or twisted coil. **P. longitudinalis duodeni**, a fold of mucosa extending from the duodenal papilla for a short distance along the posterior wall of the descending portion of

the duodenum. **P. longitudinalis meningis,** the falx cerebri. **P. lunata.** Synonym of *P. semilunaris.* **P. palato-epiglottica of Mojsisovics,** a few thin, wrinkled folds of mucosa running across in front of the epiglottis between the two posterior pillars of the fauces in elephants. **P. palmatæ,** oblique projections of the mucosa of the cavity of the neck of the uterus. **P. petro-clinoidea lateralis,** a fold of dura mater extending from the petrous portion of the temporal bone to the anterior clinoid process. It forms the upper and lateral wall of the cavernous sinus. **P. petro-clinoidea medialis,** a similar fold extending between the upper border of the petrous portion of the temporal bone and the posterior clinoid process. **P. pharyngo-epiglottica,** a fold of mucosa extending from the neighborhood of the pharyngeal opening of the Eustachian tube to the vicinity of the epiglottis. It marks the insertion of the stylo-pharyngeus muscle. **P. polonica,** a matted, entangled condition of the hair, due to want of cleanliness in certain diseases of the scalp, with purulent discharge. **P. pterygo-mandibularis,** a mucous fold on the pterygo-maxillary ligament. **P. recti,** the folds of mucosa in the rectum. **P. recto-uterina.** See *Douglas's Pouch.* **P. recto-vesicalis.** See *Recto-vesical Folds.* **P. salpingo-palatina,** a fold of mucosa passing downward from the anterior margin of the Eustachian orifice. **P. salpingopharyngea,** a prominent fold passing downward from the posterior margin of the Eustachian orifice in the naso-pharynx. **P. saxonica.** Synonym of *P. polonica.* **P. semilunaris,** a conjunctival fold in the inner canthus of the eye, the rudiment of the membrana nictitans of birds. **P. semilunaris Douglasii.** See *Douglas's Pouch.* **P. semilunaris fascialis transversalis,** the fold of transversalis fascia forming the lower edge of the internal abdominal ring. **P. serosæ,** any folds of serous membrane. **P. sigmoidea coli, P. sigmoidea recti,** one of the folds of mucosa in the colon and in the rectum. **P. sublingualis,** the frenum of the tongue. **P. synovialis,** fringes of the synovial membrane. **P. thyroarytenoideæ.** Synonym of *Ligaments, Thyroarytenoid.* See *Ligament.* **P. transversalis recti.** See *P. sigmoidea recti.* **P. urachi,** the peritoneal fold covering the urachus. **P. urogenitalis,** a fold in the posterior wall of the peritoneal cavity of the embryo which surrounds the lower extremity of the Wolffian duct. **P. utero-rectalis.** See *Douglas's Pouch.* **P. vaginalis,** the rugæ of the vaginal mucosa. **P. vasculosæ,** the synovial fringes. **P. vesico-uterinæ.** Synonym of *Vesico-uterine Folds.* **P. villosæ ventriculi,** folds of the mucosa of the stomach forming a ventriculum, in the meshes of which are the openings of the gastric tubules.

Plicate (*pli'-kāt*) [*plicatus*, p.p. of *plicare*, to fold, to bend]. Folded like a fan.

Plicatile (*pli'-kat-il*) [*plica*, a fold]. Capable of being folded.

Plicatio (*pli-ka'-she-o*). Synonym of *Plica polonica.*

Plication (*pli-ka'-shun*) [*plicare*, to fold]. A plica, or fold.

Plicatopapillose (*pli-ka'-to-pap'-il-ōz*) [*plicatus*, plicate; *papillosus*, papillose]. In biology, both plicate and papillose.

Plicatulate (*pli-kat'-u-lāt*) [*plicatulus*, dim. of *plicatus*, folded]. In biology, minutely folded, or plicate; *e. g.*, certain plant-portions.

Plicatura (*pli-kat-u'-rah*) [*plicare*, to fold]. A cerebral convolution; also a ligament; also synonym of *Plica polonica.*

Plicature (*plik'-at-ūr*) [*plicare*, to fold]. Same as *Plication.*

Plicidentine (*plis-id-en'-tin*) [*plica*, fold; *dens*, tooth]. Applied to dentine which is folded so as to form a series of plates.

Pliciferous (*pli-sif'-er-us*) [*plica*, a fold; *ferre*, to bear]. In biology, possessing folds or plicæ.

Pliciform (*plis'-if-orm*) [*plica*, a fold; *forma*, form]. In biology, like a plait or fold.

Plicotomy (*pli-kot'-o-me*) [*plica*, a fold; τομή, a cutting]. Division of the posterior fold of the membrana tympani.

Plombierin. See *Glairin.*

Plongeade (*plon'-jahd*) [Fr.]. The physiologic condition of a diver with suspended respiration. The blood accumulates in the veins and right side of the heart.

Ploteric (*plo-ter'-ik*) [πλωτήρ, drifting]. In biology, applied by Hæckel to those organisms of the ocean (*plankton*) which are carried about involuntarily. Cf. *Necteric.*

Ploucquet's Test. See *Birth, Live.*

Plug [D., *plug*, a bung]. Something that occludes a circular opening or channel. **P., Cervical.** Synonym of *P., Mucous.* **P., Kite-tail,** a tampon resembling a kite-tail. **P., Mucous,** the mass of inspissated mucus which occludes the cervix uteri during pregnancy and is discharged at the beginning of labor. **Ps., Dittrich's;** small, dirty-green masses found in the lowest layer of the sputum in fetid bronchitis.

Plugging (*plug'-ing*) [D., *plug*, a bung]. See *Tamponade.* **P. Instruments,** dental instruments for introducing and consolidating fillings. **P. Teeth.** See *Filling Teeth.*

Pluma (*plu'-mah*) [*pluma*, a small, soft feather; *pl.*, *Plumæ*]. In biology, a quill-feather, or contour feather, as distinguished from a down-feather.

Plumaceous (*plu-ma'-se-us*) [*pluma*, a plume]. In biology, having the character of a pluma; pennaceous.

Plumacoleum (*plu-mak-o'-le-um*) [*pluma*, feather; *oleum*, oil]. A pledget of lint.

Plumage (*plu'-māj*) [*pluma*, plume]. The feather covering of birds.

Plumate (*plu'-māt*) [*pluma*, plume]. In biology, resembling a plume.

Plumbago (*plum-ba'-go*). See *Graphite.*

Plumbeus (*plum'-be-us*) [*plumbum*, lead]. Lead colored.

Plumbi et Opii, Liquor. Lead-and-opium wash—a mixture of a solution of lead acetate and laudanum.

Plumbic (*plum'-bik*) [*plumbum*, lead]. Pertaining to lead. **P. Acid,** PbH_2O_3; a dibasic acid produced during the electrolysis of lead salts.

Plumbiferous (*plum-bif'-er-us*) [*plumbum*, lead; *ferre*, to bear]. Producing lead.

Plumbism (*plum'-bizm*) [*plumbum*, lead]. Lead poisoning. See *Saturnism.*

Plumbous (*plum'-bus*) [*plumbum*, lead]. Containing the element lead in a lesser valency than the plumbic compounds.

Plumbum (*plum'-bum*) [L.]. Lead. Symbol Pb. Atomic weight, 207; quantivalence, II or IV. A bluish-white, soft, malleable metal, having a specific gravity of 11.4, and melting at 332°. See *Elements, Table of.* Lead is obtained from a native sulphid called galena, by roasting. Soluble salts of lead combine with albumin, forming albuminates. In large doses by the stomach they are irritant to the mucous membrane. Upon the intestines they act as powerful astringents. If absorbed into the circulation in small quantities for a considerable period of time, lead causes a very interesting and varied group of symptoms, which are described under *Saturnism, q.* Lead is eliminated through the kidneys and the intestinal mucosa. It appears to check the elim-

nation of uric acid, and is, especially in England, a factor in the causation of gout in lead-workers. In medicine, lead is used locally as a sedative to inflamed parts; as an astringent to mucous surfaces, as in gonorrhea and leukorrhea. Internally, it is used in pyrosis, in diarrhea and dysentery; and for its astringent action on the vessels, in hematemesis, hemoptysis, and bleeding from the kidneys and the uterus. It has also been employed in edema and in gangrene of the lungs. **P. acetas,** $Pb(C_2H_3O_2)_2.3H_2O$, astringent. Dose gr. ss–v. **P. acetat., Ung.** (B. P.), gr. xij to the ounce. **P. carbonas,** $(PbCO_3)_2Pb(HO)_2$, used locally as an ointment. **P. carbonat., Ung.,** finely-powdered lead carbonate 10, benzoinated lard 90 parts. **P., Emplastrum,** lead-plaster, contains lead oxid 32, olive-oil 60, water 10 parts, triturated and boiled until homogeneous. **P. iodidum,** PbI, locally and internally. Dose gr. ¼. **P. iodid., Emplast.** (B.P.), contains iodid of lead, lead-plaster, and resin. **P. iodidi, Ung.,** finely powdered lead iodid 10, benzoinated lard 90 parts. **P. nitras,** $Pb(NO_3)_2$, locally; astringent, escharotic, and disinfectant. **P., Oleatum,** unof., lead oxid 20, oleic acid 80 per cent. **P. cum Opii, Pil.** (B. P.). Dose gr. iij–v. **P. oxidum,** PbO, litharge, a constituent of lead-plaster. **P. subacetat., Ceratum,** Goulard's cerate, has plumbi subacetatis 20, fresh cerate of camphor 80 parts. **P. subacetat., Glycerin** (B. P.) See *Glycerin.* **P. subacetat., Linimentum,** Goulard's extract 40, cotton-seed-oil 60 parts; anodyne. **P. subacetat., Liq.,** Goulard's extract, lead acetate 170, lead oxid 100, distilled water q. s. ad 1000 parts; an astringent and cooling solution. **P. subacetat., Liq., Dil.,** 3 parts of the preceding and 97 of water. **P., Suppos., Comp.** (B. P.) each containing 1 gr. of opium to three grains of lead acetate. **P., Ung. diachylon,** diachylon ointment, contains lead-plaster 60, olive-oil 39, oil of lavender 1.

Plume (*plūm*) [*pluma*, a feather]. A feather; a tuft of feathers; plumage; a plumate hair.

Plumelet (*plūm'-let*) [*pluma*, a feather]. A plumule, or plumula; a small feather or plume.

Plumicorn (*plu'-mik-orn*) [*pluma*, a feather; *cornu*, a horn]. In biology, one of the tufts of feathers on the heads of certain birds, as the so-called *ears* or *horns* of owls.

Plumigerous (*plu-mij'-er-us*) [*pluma*, feather; *gerere*, to bear]. In biology, feathered; having plumes.

Plumiped, Plumipede (*plu'-mip-ed, plu'-mip-ēd*) [*pluma*, feather; *pes*, foot]. In biology, having the feet feathered.

Plummer's Pills. See *Antimonium.*

Plumose, Plumous (*plu'-mōz, plu'-mus*) [*pluma*, feather]. In biology, having feathers; feathery; feathered.

Plumosity (*plu-mos'-it-e*) [*pluma*, feather]. In biology, the state of being plumose.

Plumper (*plum'-per*) [ME., *plomp*, bulky]. One of a pair of pads worn in the hollow of the cheeks to give them a rounded appearance; sometimes attached to a set of artificial teeth.

Plumula (*plu'-mu-lah*) [*plumula*, a little feather: *pl.*, *Plumulæ*]. Same as *Plumule.*

Plumulaceous (*plu-mu-la'-se-us*) [*plumula*, a plumule]. In biology, of or pertaining to a plumule; downy; not pennaceous.

Plumular (*plu'-mu-lar*) [*plumula*, a little feather]. In biology, plumulaceous.

Plumulate (*plu'-mu-lāt*) [*plumula*, a little feather]. In biology, minutely plumose.

Plumule (*plu'-mūl*) [*plumula*, a little feather]. In biology: (*a*) the primary bud or rudimentary stem and leaves in the seed; (*b*) a down-feather; (*c*) any small, plume-like organ.

Plumuliform (*plu'-mu-lif-orm*) [*plumula*, a plumule; *forma*, form]. Having the appearance of a small feather.

Plumulose (*plu'-mu-lōs*) [*plumula*, a little feather]. In biology, resembling a down-feather.

Plunge (*plunj*) [ME., *plungen*, to plunge]. To thrust suddenly into water or other fluid; to immerse. **P.-bath,** a bath in which the person is placed or places himself in a large tub containing sufficient water to cover him all but the head. **P.-tracheotomy.** See *Tracheotomy.*

Plunkett's Caustic, or **Ointment.** A caustic paste composed of the bruised plant of *Ranunculus acris* and of *R. flammula*, each 24 parts; arsenious acid, 3 parts; sulphur, 5 parts. These are mixed into a paste, rolled into balls, and dried in the sun. When used the ball must be reduced to a pasty consistence by rubbing with yolk of egg.

Plural (*plu'-ral*) [*plus; pluris*, more]. More than one. **P. Birth,** the bringing forth of more than one offspring at a time.

Pluricapsular (*plu-rik-ap'-su-lar*) [*plus*, more; *capsula*, capsule]. In biology, having several capsules.

Pluricellular (*plu-ris-el'-u-lar*) [*plus*, more; *cellula*, cell]. In biology, made up of several cells.

Pluriceps (*plu'-ris-eps*) [*plus*, more; *caput*, head]. Many-headed; having more than one stem springing from one root.

Pluricipital (*plu-ris-ip'-it-al*). Synonym of *Pluriceps.*

Pluricuspid (*plu-rik-us'-pid*) [*plus*, more; *cuspis*, a point]. In biology, having several cusps.

Pluridentate (*plu-rid-en'-tāt*) [*plus*, more; *dens*, tooth]. In biology, having several tooth-like processes, as distinguished from *parcidentate* or *paucidentate.*

Pluriflagellate (*plu-rif-laj'-el-āt*) [*plus*, more; *flagellum*, flagellum]. In biology, having several flagella.

Plurifiorous (*plu-rif-lo'-rus*) [*plus*, more; *flos*, a flower]. In biology, having many flowers.

Plurifoliate (*plu-rif-o'-le-āt*) [*plus*, more; *folium*, a leaf]. In biology, having several leaves.

Plurifoliolate (*plu-rif-o'-le-o-lāt*) [*plus*, more; *foliolum*, dim. of *folium*, a leaf]. In biology, applied to a compound leaf which has many leaflets.

Pluriguttulate (*plu-rig-ut'-u-lāt*) [*plus*, more; *guttula*, dim. of *gutta*, a drop]. In biology, characterized by having many drop-like particles or structures.

Plurilocular (*plu-ril-ok'-u-lar*) [*plus*, more; *loculus*, a cell]. In biology, having more than one cell or loculus; multilocular, as the ovaries of some plants.

Plurinominal (*plu-rin-om'-in-al*). Same as *Polynominal.*

Plurinucleate (*plu-rin-u'-kle-āt*) [*plus*, more; *nucleus*, a kernel]. In biology, having more than one nucleus; multinucleate.

Pluripara (*plu-rip'-ar-ah*). Synonym of *Multipara.*

Pluriparity (*plu-rip-ar'-it-e*) [*plus*, more; *parere*, to bring forth]. The condition of having borne several children.

Pluriparous (*plu-rip'-ar-us*) [*plus*, more; *parere*, to bring forth]. Bringing forth several young at once.

Pluripartite (*plu-rip-ar'-tit*) [*plus*, more; *partire*, to divide]. In biology, having more than one septum or partition; pluriseptate.

Pluriradial (*plu-re-ra'-de-al*) [*plus*, more; *radius*, a ray]. Developed from germs that assume a radial arrangement (a term used by Rauber to characterize a hypothetic method of accounting for double monstrosities).

Pluriseptate (*plu-ris-ep'-tāt*) [*plus*, more; *septum*, a partition]. Same as *Pleuripartite.*

Pluto Water. Brinchlock Springs, Indiana, See page 769.

Pluriseriate (*plu-ris-e'-re-āt*) [*plus*, more; *series*, a row]. In biology, arranged in more than one row.

Plurisetose (*plu-ris-e'-tōz*) [*plus*, more; *seta*, a bristle]. In biology, having a number of bristles or setæ.

Plurispiral (*plu-ris-pi'-ral*) [*plus*, more; *spira*, a coil, fold]. In biology, having more than one spiral; multispiral.

Plurisporous (*plu-ris-po'-rus*) [*plus*, more; σπορά, seed]. In biology, having two or more spores.

Plurivalve (*plu'-riv-alv*) [*plus*, more; *valva*, a folding door]. In biology, having more than one valve; multivalve.

Pluteiform (*plu'-te-if-orm*) [*pluteus*, pluteus; *forma*, form]. In biology, resembling or having the morphologic valence of a pluteus.

Pluteus (*plu'-te-us*) [*pluteus, pluteum*, a protective roof or shed used by Roman soldiers: *pl.*, *Plutei*]. In biology, the full-grown larva of the *Ophiuroids*. *Echinoidea*, as distinguished from the *Auricularia* and *Bipinnaria* type of larva of *Holothuroids* and *Asteroids*.

Plutomania (*plu-to-ma'-ne-ah*) [πλοῦτος, wealth; μανία, madness]. An insane belief that one is the owner of much property.

Pluvial (*plu'-ve-al*) [*pluvia*, rain]. Pertaining to rain or telluric moisture. Of flowers, having the property of expanding before a rain.

Plyntriopsora (*plin-tre-op'-so-rah*) [πλύντρια, washerwoman; ψώρα, scurvy]. A psoriatic affection of washerwomen due to the effects of alkalies.

Pneobiognosis (*ne-o-bi-og-no'-sis*) [πνεῖν, to breathe; βίος, life; γνώσις, knowledge]. Docimasia pulmonum.

Pneobiomantia (*ne-o-bi-o-man'-she-ah*). Synonym of *Pneobiognosis*.

Pneodynamics (*ne-o-di-nam'-iks*) [πνεῖν, to breathe; δύναμις, power]. The dynamics of respiration.

Pneogaster (*ne'-o-gas-ter*) [πνεῖν, to breathe; γαστήρ, stomach]. In biology, the respiratory tract.

Pneogastric (*ne-o-gas'-trik*) [πνεῖν, to breathe; γαστήρ, the stomach]. Pertaining to the pneogaster.

Pneograph (*ne'-o-graf*) [πνεῖν, to breathe; γράφειν, to write]. 1. An instrument consisting of a semi-disc, suspended in front of the mouth, for the purpose of recording the force, rhythm, and duration, of the expiration. 2. Synonym of *Pneumograph*.

Pneometer (*ne-om'-et-er*). Synonym of *Spirometer*.

Pneometry (*ne-om'-et-re*). Synonym of *Pulmometry*.

Pneophore (*ne'-o-fōr*) [πνεῖν, to breathe; φορός, carrying]. An instrument to aid artificial respiration in the asphyxiated.

Pneoscope (*ne'-o-skōp*) [πνεῖν, to breathe; σκοπεῖν, to examine]. An instrument for measuring respiratory movements.

Pneuma (*nu'-mah*) [πνεῦμα, breath]. 1. Air; a breath. 2. The vital principle.

Pneumapostema (*nu-map-os-te'-mah*). Synonym of *Pneumonapostema*.

Pneumapyothorax (*nu-map-i-o-tho'-raks*). Synonym of *Pyopneumothorax*.

Pneumarthrosis (*nu-mar-thro'-sis*) [πνεῦμα, air; ἄρθρον, a joint]. A collection of air or gas in an articular cavity.

Pneumatelectasis (*nu-mat-el-ek'-tas-is*) [πνεῦμα, breath; ἀτελής, imperfect; ἔκτασις, expansive]. Atelectasis of the lungs.

Pneumathemia (*nu-math-e'-me-ah*) [πνεῦμα, air; αἷμα, blood]. The presence of air or free gas in the blood-vessels.

Pneumatic (*nu-mat'-ik*) [πνεῦμα, air]. Pertaining to gases or to the atmosphere; pertaining to respiration. **P. Cabinet**, a device for enclosing the whole or a part of the body so that it may be subjected to compressed or rarefied air. **P. Differentiation**, the treatment of disease by inhalation of air more rarefied than that which surrounds the body. **P. Malting.** See *Malting*. **P. Medicine**, the treatment of disease by inhalation of vapors or gases, or by fumigation. **P. Occlusion**, Maisonneuve's plan of dressing stumps. It consists in draining away the accumulation from the wound by aspiration. **P. Physician**, a pneumatist; one of a sect of physicians who regarded health and disease as consisting in the different proportions of an element, *pneuma*. **P. System.** See *Sewage, Disposal of*. **P. Trough**, a trough partly filled with water for facilitating the collection of gases.

Pneumatics (*nu-mat'-iks*) [πνεῦμα, air]. That branch of physics treating of the physical properties of air and gases.

Pneumatism (*nu'-mat-izm*) [πνεῦμα, air]. The doctrine of the pneumatists.

Pneumatist (*nu'-mat-ist*) [πνεῦμα, air]. A pneumatic physician.

Pneumato- (*nu'-mat-o-*) [πνεῦμα, air, breath]. A prefix to denote connection with the air or breath.

Pneumatocardia (*nu-mat-o-kar'-de-ah*) [πνεῦμα, air; καρδία, heart]. The presence of air or gas in the chambers of the heart.

Pneumatocephalus (*nu-mat-o-sef'-al-us*). Synonym of *Physocephalus*.

Pneumatochemia (*nu-mat-o-kem'-e-ah*) [πνεῦμα, air; χημεία, chemistry]. The chemistry of gases.

Pneumatocyst (*nu-mat'-o-sist*) [πνεῦμα, air; κύστις bladder]. In biology, an air-sac; a pneumatophore

Pneumatocystic (*nu-mat-o-sis'-tik*) [πνεῦμα, air; κύστις, bladder]. Pertaining to a pneumatocyst.

Pneumatodic (*nu-mat-o'-dik*) [πνευματώδης]. Filled with air.

Pneumatodyspnea (*nu-mat-o-disp-ne'-ah*) [πνεῦμα air; δύσπνοια, dyspnea]. Emphysematous dyspnea.

Pneumatogram (*nu-mat'-o-gram*) [πνεῦμα, breath γράμμα, writing]. A tracing showing the frequency duration, and depth of the respiratory movements.

Pneumatologic (*nu-mat-o-loj'-ik*) [πνεῦμα, breath λόγος, science]. Pertaining to pneumatology.

Pneumatologist (*nu-mat-ol'-o-jist*) [πνεῦμα, breath λόγος, science]. One versed in pneumatology.

Pneumatology (*nu-mat-ol'-o-je*) [πνεῦμα, breath; λόγος knowledge]. 1. The science of respiration. 2. Th physics and chemistry of gases.

Pneumatometer (*nu-mat-om'-et-er*). An instrume designed by Waldenburg to measure the pressure o inspiration or expiration by the force exerted upon mercuric column contained in a u-tube.

Pneumatometry (*nu-mat-om'-et-re*) [πνεῦμα, air μέτρον, measure]. 1. The measurement of the forc in respiration. It is used as a means of diagnosi 2. The treatment of pulmonary and circulatory di eases by means of a pneumatic apparatus.

Pneumatomphalocele (*nu-mat-om-fal'-o-sēl*) [πνεῦμα air; ὀμφαλός, navel; κήλη, tumor]. An umbilic hernia containing flatus.

Pneumatomphalus (*nu-mat-om'-fal-us*). Synonym *Pneumatomphalocele*.

Pneumatopathy (*nu-mat-op'-ath-e*) [πνεῦμα, air, spiri πάθος, disease]. Mind-cure; the curing of diseases l psychic influence.

Pneumatophore (*nu-mat'-o-for*) [πνεῦμα, air; φόρ bear]. In biology, an air-sac, or swim-bladder. Th hydrostatic apparatus or specialized person of *Siphonophora* colony. It represents a metamorphos *Medusa* umbrella. The contained air can be expell through a pore, and again secreted by the glandul epithelium at its base.

Pneumatophorous (*nu-mat-off'-or-us*) [πνεῦμα, ai

America's Finest
ineral Water Bottling Plant

UR bottling plant is a modern structure that stands as a monument to the highest efficiency of engineering obtainable in the United States, comng the most complete and sanitary plant its kind in this or foreign countries. It uilt of concrete and steel with interior h of white enamel brick and floors of azzo, insuring perfect cleanliness and sani-n. From the reception room on the first is a stairway leading to a balcony overng the bottling room from which the welvisitor is immediately interested in seehe rapidity and mechanical accuracy with all the details of bottling and packing ccomplished. The department is accesat all times to those who desire to witthe bottling of the famous Pluto Water. complete bacteriological analyses of Water are made daily, indicating the acy of our sterilizing process and assure consumer of its constant purity.

Medicinal Value of American Waters Accepted

importance of the Alkaline-Sulphogroup of mineral waters as curative , is becoming more and more recognized.

PLUTO WATER

America's Phys

What It Is and
What It Does

For Sale at All Drug St

φόμος, bear]. In biology, bearing a pneumatocyst; pertaining to or like a pneumatophore.

Pneumatorrachis (*nu-mat-or'-a-kis*) [πνεῦμα, air; ῥαχις, spine]. The presence of air in the spinal canal.

Pneumatosic (*nu-mat-o'-sik*) [πνευμάτωσις, inflation]. Affected with pneumatosis.

Pneumatosis (*nu-mat-o'-sis*) [πνευμάτωσις, inflation]. 1. The presence of gas or air in abnormal places, or of an excessive quantity where a little exists normally. 2. The condition of flatulent distention of the stomach and bowels.

Pneumatotherapeutics (*nu-mat-o-ther-ap-u'-tiks*). See *Aërotherapeutics*.

Pneumatotherapy (*nu-mat-o-ther'-ap-e*) [πνεῦμα, air; θεραπεία, treatment]. The treatment of diseases by means of compressed or rarefied air.

Pneumatothermanter (*nu-mat-o-thur-man'-ter*) [πνεῦμα, air; θερμαίνειν, to warm]. A respirator.

Pneumatothorax (*nu-mat-o-tho'-raks*) [πνεῦμα, air; θώραξ, chest]. Synonym of *Pneumothorax*.

Pneumatotomy (*nu-mat-ot'-o-me*). Synonym of *Pneumotomy*.

Pneumaturia (*nu-mat-u'-re-ah*) [πνεῦμα, air; οὖρον, urine]. The evacuation of free gas with the urine.

Pneumatype (*nu'-mat-īp*) [πνεῦμα, air; τύπος, type]. *Breath-picture*. The deposit formed upon a piece of glass by the moist air exhaled through the nostrils when the mouth is closed. It is employed in the diagnosis of nasal obstruction. Slate-paper may be used, pulverized sulphur or boric acid being blown upon the moistened surface to make a permanent record.

Pneumectasis (*nu-mek'-tas-is*). Synonym of *Pneumonectasis*.

Pneumectomy (*nu-mek'-to-me*) [πνεύμων, lung; ἐκτομή, excision]. Excision of a portion of the lung.

Pneumic (*nu'-mik*) [πνεῦμων, the lung]. Pertaining to the lung. **P. Acid**, a crystalline acid extracted from the pulmonary tissue of mammals. It is thought by Verdeil to be a compound of lactic acid and taurin.

Pneumique (*nu-mēk'*) [Fr.]. Pertaining to air. **P., Osteoarthropathie hypertrophiante.** See *Osteoarthropathy*.

Pneumo- (*nu'-mo-*). Same as *Pneumon-*.

Pneumoactinomycosis (*nu-mo-ak-tin-o-mi-ko'-sis*) [πνεύμων, lung; ἀκτίς, a ray; μύκης, a fungus]. Actinomycosis of the lung.

Pneumobacillus (*nu-mo-bas-il'-us*). See *Micrococcus pasteuri* and *Bacillus pneumoniæ*, in *Bacteria, Synonymatic Table of*.

Pneumocace (*nu-mok'-as-e*) [πνεύμων, lung; κακή, evil]. Gangrene of the lung.

Pneumocarcinoma (*nu'-mo-kar-sin-o'-mah*) [πνεύμων, lung; καρκίνωμα, carcinoma]. Carcinoma of the lungs.

Pneumocele (*nu'-mo-sēl*). Synonym of *Pneumatocele*.

Pneumocentesis (*nu-mo-sen-te'-sis*) [πνεύμων, lung; κέντησις, puncture]. Paracentesis of the lung, especially of a pulmonary cavity.

Pneumochysis (*nu-mok'-is-is*) [πνεύμων, lung; χύσις, a pouring]. Pulmonary edema.

Pneumococcus (*nu-mo-kok'-us*) [πνεύμων, lung; κόκκος, kernel]. A micrococcus of the lung. **P. of Frænkel.** See *Micrococcus pasteuri*. **P. of Friedländer.** See *Micrococcus pneumoniæ*, in *Bacteria, Synonymatic Table of*.

Pneumoconiosis (*nu-mo-ko-ni'-o-sis*) [πνεύμων, lung; κόνις, dust; νόσος, disease]. Lung-disease caused by the inhalation of dust. Examples are: Anthracosis, chalicosis, siderosis.

Pneumocysto-ovarium (*nu-mo-sis'-to-o-va'-re-um*) [πνεῦμα, air; κύστις, cyst; *ovarium*, ovary]. An ovarian cyst containing air or gas.

Pneumoderma, Pneumodermis (*nu-mo-der'-mah, nu-mo-der'-mis*) [πνεῦμα, air; δέρμα, skin]. Air under the skin; subcutaneous emphysema.

Pneumodynamics (*nu-mo-di-nam'-iks*). Synonym of *Pneodynamics*.

Pneumoënteritis (*nu-mo-en-ter-i'-tis*) [πνεύμων, lung; ἔντερον, intestine; ιτις, inflammation]. Inflammation of the lungs and of the intestine. See *Hog-cholera*. **P., Infectious.** Synonym of *Hog-cholera*.

Pneumogastric (*nu-mo-gas'-trik*) [πνεύμων, lung; γαστήρ, stomach]. Pertaining conjointly to the lungs and the stomach, or to the pneumogastric or vagus nerve. **P. Nerve.** See *Nerves, Table of*.

Pneumogram (*nu'-mo-gram*) [πνεύμων, lung; γράμμα, writing]. The tracing afforded by the pneumograph.

Pneumograph (*nu'-mo-graf*) [πνεύμων, lung; γράφειν, to write]. A registering instrument for measuring the movements of the chest in respiration.

Pneumographic (*nu-mo-graf'-ik*) [πνεύμων, lung; γράφειν, to write]. Pertaining to pneumography.

Pneumography (*nu-mog'-ra-fe*) [πνεύμων, lung; γράφειν, to write]. The description of the lungs.

Pneumohemia (*nu-mo-hem'-e-ah*). Synonym of *Pneumonemia*.

Pueumohemothorax (*nu-mo-hem-o-tho'-raks*) [πνεῦμα, air; αἷμα, blood; θώραξ, thorax]. A collection of air or gas, and blood, in the pleural cavity.

Pneumohydropericardium (*nu-mo-hi-dro-per-ik-ar'-de-um*) [πνεῦμα, air; ὕδωρ, water; περί, around; καρδία, heart]. An accumulation of air and fluid in the pericardial cavity.

Pneumohydrothorax (*nu-mo-hi-dro-tho'-raks*) [πνεῦμα, air; ὕδωρ, water; θώραξ, thorax]. A collection of air or gas, and fluid, in the pleural cavity.

Pneumokoniosis. See *Pneumoconiosis*.

Pneumolith (*nu'-mo-lith*) [πνεύμων, lung; λίθος, a stone]. A stony concretion in the lungs, as a calcified tubercle.

Pneumology (*nu-mol'-o-je*) [πνεύμων, lung; λόγος, science]. The sum of scientific knowledge concerning the lungs and air-passages.

Pneumomalacia (*nu-mo-mal-a'-se-ah*) [πνεύμων, lung; μαλακία, softness]. Abnormal softness of the lung.

Pneumomassage (*nu-mo-mas-sahzh'*) [πνεῦμα, air; μάσσειν, to knead]. The application of massage or passive motion to the tympanic membrane and auditory ossicles by pneumatic means.

Pneumometer (*nu-mom'-et-er*). Synonym of *Spirometer*.

Pneumometry (*nu-mom'-et-re*). Same as *Spirometry*.

Pneumomycosis (*nu-mo-mi-ko'-sis*) [πνεύμων, lung; μύκης, fungus]. The presence of fungi in the lung. The etiologic relation of fungi to lung-diseases is not fully determined.

Pneumon- (*nu'-mon-*) [πνεύμων, lung]. A prefix denoting connection with or relation to the lungs.

Pneumonæmia (*nu-mo-ne'-me-ah*). See *Pneumonemia*.

Pneumonalgia (*nu-mo-nal'-je-ah*) [πνεύμων, lung; ἄλγος, pain]. Pain in the lung.

Pneumonapoplexia (*nu-mon-ap-o-pleks'-e-ah*) [πνεύμων, lung; ἀποπληξία, apoplexy]. A sudden hemorrhage into the lung-tissue.

Pneumonatelectasis (*nu-mon-at-el-ek'-tas-is*) [πνεύμων, lung; ἀτελέκτασις, atelectasis]. Atelectasis of the lung.

Pneumonechema (*nu-mon-ek-e'-mah*) [πνεύμων, lung; ἦχημα, sound]. The normal vesicular murmur heard over the lung in respiration.

Pneumonectasia, Pneumonectasis (*nu-mon-ek-ta'-ze-ah, nu-mon-ek'-tas-is*) [πνεύμων, lung; ἔκτασις, distention]. Emphysema of the lung.

Pneumonectomy (*nu-mon-ek'-to-me*) [πνεύμων, lung; ἐκτομή, excision]. Excision of a portion of a lung; pneumectomy.

Pneumonedema (*nu-mon-e-de'-mah*) [πνεύμων, lung; οἰδημα, edema]. Edema of the lungs.

Pneumonemia (*nu-mon-e'-me-ah*) [πνεύμων, lung; αἷμα, blood]. Congestion of the lungs.

Pneumonemphraxis (*nu-mon-em-fraks'-is*) [πνεύμων, lung; ἔμφραξις, obstruction]. Obstruction of the lungs or the bronchi.

Pneumonemphysema (*nu-mon-em-fiz-e'-mah*) [πνεύμων, lung; ἐμφύσημα, inflation]. Emphysema of the lungs.

Pneumonia (*nu-mo'-ne-ah*) [πνεύμων, lung]. Any inflammation of the lungs. Pneumonitis. By usage the word pneumonia, used without qualification, implies croupous pneumonia, *q. v.* **P., Abortive,** a condition of acute congestion, such as is seen in the first stage of pneumonia, but which is not succeeded by the other stages. **P., Acute.** Synonym of *P., Croupous.* **P., Adynamic,** pneumonia attended with debility, depression of the circulation and of the nervous system. **P. alba.** Synonym of *P., White.* **P., Alcoholic,** the croupous pneumonia of drunkards. It is often associated with delirium and is very fatal. **P., Apex, P., Apical,** croupous pneumonia of the apex of a lung, by some believed to be more grave than basal pneumonia; many cases, however, run a favorable course. Cerebral symptoms are said to be more common when the apex is affected. **P., Apoplectic,** pneumonia associated with hemorrhage into the lung. **P., Aspiration,** a broncho-pneumonia due to the inspiration of food-particles or other irritant substances into the lung. The condition is met with in cases in which the sensitiveness of the larynx and trachea is benumbed, as in apoplectic coma or uremia, and in low fevers; also in the insane from stuffing of the mouth with food and in defective deglutition. **P., Ataxic.** Synonym of *P., Adynamic.* **P., Bilious,** pneumonia accompanied by icterus. **P., Broncho-.** See *Broncho-pneumonia.* **P., Caseous Lobular.** Synonym of *P., Desquamative.* **P., Catarrhal.** Synonym of *Broncho-pneumonia.* **P., Central,** a croupous pneumonia beginning in the interior of the lobe of the lung. The physical signs are obscure until the inflammation reaches the surface. **P., Cerebral,** that form of pneumonia associated with marked cerebral symptoms. It is most common in children and in the beginning resembles meningitis. **P., Cheesy.** Synonym of *P., Caseous.* **P., Chronic.** Synonym of *P., Interstitial.* **P., Cirrhotic.** Synonym of *P., Interstitial.* **P., Contusion,** pneumonia following contusion of the chest. **P., Creeping.** See *P., Migratory.* **P., Crossed,** croupous pneumonia of the lower lobe on one side, associated with the same disease in the upper lobe of the other side. **P., Croupous,** *Lobar Pneumonia,* that commonly called simply pneumonia, an acute disease, running a definite course and tending to recovery. It is most often due to a specific microorganism, the pneumococcus of Frænkel, and may be epidemic in certain districts. But besides the pneumococcus, of Frænkel, which is really a lanceolate bacillus occurring in pairs, other microörganisms can give rise to croupous pneumonia, *e. g.*, the bacillus pneumoniæ of Friedländer, the streptococcus and the staphylococcus pyogenes, the bacillus of typhoid fever. The disease occurs more frequently during the winter months, and in males than in females. The lower lobes are the parts usually affected, and especially that of the right side. The apex, however, may be the part involved, especially in children. Occasionally a double or bilateral pneumonia is encountered, both lower lobes or both apices being involved. The disease is ushered in by a chill, followed by high fever, flushed cheeks, dry, coated tongue, rapid, shallow respiration, and pain in the affected side. More or less cough is present, and there is usually the characteristic bloody or rusty expectoration. The respirations are rapid, and quite a characteristic feature is the disturbance of the pulse-respiration ratio—instead of 4 to 1, it may be 3 to 1, or 2 to 1, *i. e.*, we may have a pulse of 84 and respirations 42, or even more. The physical signs are distinctive—immobility of the affected portion of the chest, increased tactile fremitus, dulness on percussion (rarely a peculiar wooden tympany), a fine, crepitant râle in the first stage, bronchial breathing and bronchophony in the second, to which moist râles are added when resolution begins. In nearly every case there is an associated plastic pleurisy, which is responsible for the pain. It may give rise to a friction-sound. The urine is high-colored and deficient in chlorids, the bowels sluggish. A crisis usually occurs on the seventh day. The anatomic change consists in the appearance of a firm or solid exudation in the pulmonary alveoli. The disease proceeds through the following stages: 1. *Congestion,* in which there is intense congestive hyperemia. 2. *Red Hepatization,* in which the lung is bulky, heavy, firm, and airless, and its surface granular, its red tint being due to extravasated corpuscles and distended capillaries. 3. *Gray Hepatization,* due to the degeneration of the exudate and anemia from compression of the capillaries. In the majority of cases resolution takes place and the lung returns to its previous condition. **P., Deglutition.** Synonym of *P., Aspiration.* **P., Desquamative,** a form characterized chiefly by an intense desquamation of the cells lining the air-vesicles, a proliferation of the connective-tissue cells of the septa between the vesicles, and the exudation of a scanty albuminous fluid. The exudate goes on to caseous degeneration. Three sub-varieties are described: the *lobular* form, the *confluent,* or *lobar,* and the *bronchial,* or *caseous broncho-pneumonia.* The cause of the disease is, in the majority of cases, the tubercle-bacillus. **P., Dissecting,** a suppurative inflammation extending along the interlobular and peribronchial tissues. **P., Double,** croupous pneumonia of both lungs. **P., Drunkards'.** Synonym of *P., Alcoholic.* **P., Embolic,** pneumonia due to embolism of the vessels of the lung. **P., Epithelial.** Synonym of *P., Desquamative.* **P. epizoötica,** pneumonia of animals. **P., Erysipelatous,** a severe pneumonia, usually migratory, occurring in connection with, or after exposure to erysipelas, and apparently influenced by that disease. **P., Fibrinous.** See *P., Croupous.* **P., Fibroid, P., Fibrous.** Synonym of *P., Interstitial.* **P., Food,** a form of inspiration-pneumonia, *q. v.* **P., Gangrenous,** gangrene of the lung. **P., Gouty,** pneumonia developing in a gouty subject. **P., Grippal.** See *P., Influenzal.* **P., Hemorrhagic.** See *Hemorrhagic.* **P., Hypostatic,** a pneumonia, generally lobular, occurring in the debilitated and those suffering from other diseases. It usually affects the lower posterior portions of the lung, and is dependent upon the dorsal decubitus, the weak circulation, and the inspiration of food and other particles. Section of the vagus nerve in animals also gives rise to this form of pneumonia, because the paralysis of the air-passages favors the aspiration of foreign matters. **P., Influenzal,** a peculiar condition of the lung observed in association with influenza. There appears to be a failure of function due to pneumoparesis. There may also be inflammation of croup-

ous or catarrhal type. **P., Insular.** Synonym of *P., Lobular.* **P., Intermittent.** Synonym of *P., Bilious.* **P., Interstitial, Acute,** inflammation of the interstitial tissues of the lung, sometimes terminating in suppuration. **P., Interstitial, Chronic,** *cirrhosis of the lung;* a chronic inflammation of the lung, characterized by an increase of the interstitial connective tissue. It may be a termination of acute croupous pneumonia or of pulmonary tuberculosis; it may follow broncho-pneumonia; in some cases it is due to extension of a chronic inflammation from the pleura, the so-called *pleurogenous interstitial pneumonia;* finally, pneumonokoniosis is a form of interstitial pneumonia. Cirrhosis of the lung is often associated with bronchiectasis. **P., Larval,** a term given in epidemics of pneumonia to those cases that present only some of the initial symptoms of the disease, slight chill, moderate fever, and a few indefinite local signs. **P., Latent,** one in which the physical signs are obscure or wanting. **P., Lobar.** Synonym of *P., Croupous.* **P., Lobular.** Synonym of *Broncho pneumonia* and *P., Catarrhal.* **P., Malarial.** Synonym of *P., Bilious.* **P. maligna.** Synonym of *P., Septic.* **P. malleosa,** pneumonia due to the glanders-bacillus. It is a broncho-pneumonia as a rule, but may assume a lobar form or manifest itself as multiple abscesses. **P., Massive,** one in which not only the air-cells, but the bronchi of an entire lobe, or even of a lung, are filled with the fibrinous exudate. The auscultatory physical signs are wanting; percussion yields an absolutely flat note. The condition simulates pleurisy with effusion. **P. migrans, P., Migratory,** a peculiar and well-recognized form, involving one lobe after the other. It seems occasionally to be in some way associated with erysipelas. Synonym of *P., Creeping, P., Wandering.* **P., Necrotic,** Goodhart's name for the non-tuberculous variety of pulmonary disorganization sometimes occurring in diabetic patients. The disease is characterized by rounded patches at the apex or base of the lung, the size of a hazel-nut or larger, in which a cavity rapidly forms containing a central slough. **P. notha.** Synonym of *Capillary Bronchitis.* **P., Periodic.** Synonym of *P., Bilious.* **P., Phreno-,** pneumonia associated with diaphragmitis. **P., Plastic.** Synonym of *P., Croupous.* **P., Pleuritic.** Synonym of *Pleuro-pneumonia.* **P., Pleurogenic, P., Pleurogenous,** a pneumonia secondary to disease of the pleura. **P. potatorum.** Synonym of *P., Drunkards'.* **P., Purulent:** this appears in three varieties: (1) the suppuration may involve the surfaces of the minute bronchi and air-vesicles—*purulent catarrh;* (2) there may be a true *abscess* of the lung; (3) there may be a suppurative lymphangitis and perilymphangitis. The causes of purulent pneumonia are: the aspiration of matters containing pyogenic microörganisms—this producing the first or second form; an abscess may result from the lodgment in the lung of a septic embolus, derived often from a focus of purulent phlebitis; from traumatism; from chronic diseases of the lung, especially tuberculosis with cavity-formation; from extension of suppuration from neighboring organs, as from empyema or hepatic abscess. **P., Pythogenic,** a contagious form rising under miasmatic influences. **P., Scrofulous,** an old name for *P., Caseous Lobular.* **P., Secondary,** that occurring as a complication of some preëxistent disease. **P., Senile,** the broncho-pneumonia of the aged; it may be due, in part at least, to inability to expectorate the phlegm that collects in the smaller bronchi. **P., Septic,** a lobular pneumonia due to the inspiration of septic material. It may also be caused by septic emboli. In the new-born it is usually due to the aspiration of the maternal fluids during labor. **P., Septinous, P., Sewer-gas,** a pneumonia following the inhalation of sewer-gas. **P. serosa,** edema of the lungs. **P., Stripe** [G. *Streifenpneumonie*], a pneumonia in which the affected area has the form of a band or stripe, usually running parallel with the spinal gutter. **P., Syphilitic;** disease of the lung due to syphilis is rare. Three forms are usually described—the *pneumonia alba* of the fetus (*q.v.*); the deposit of gummata in the lung; and an interstitial pneumonia, taking its origin at the root of the lung and passing along the bronchi and vessels. French writers also speak of an acute syphilitic phthisis, analogous to acute pneumonic phthisis. **P., Traumatic,** pneumonia following injury of the lung; also that consecutive to section of the vagus nerves. **P., Tuberculous,** a lobular or lobar inflammation of the lung due to the tubercle-bacillus. **P., Tubular.** Synonym of *Broncho-pneumonia.* **P., Typhoid,** a pneumonia with the symptoms of the typhoid state. It is to be distinguished from *Pneumo-typhus.* **P., Vagus,** that produced by section of the vagus nerves. **P., Wandering,** a form of pneumonia in which different portions of the lung present different stages of the pneumonic process. It seems, according to Guitéras, to be in some way associated with erysipelas. **P., White,** a catarrhal form of pneumonia occurring in a syphilitic fetus and resulting in death. By an overgrowth of epithelium in the air-vesicles the lung dies, and fatty degeneration follows, giving the lungs a dead-white appearance, with the imprint of the ribs on their surface.

Pneumonic (*nu-mon'-ik*) [πνεύμων, lung]. Pertaining to the lungs or to pneumonia. **P. Phthisis,** tuberculous pneumonia of the lungs. **P. Spot,** the circumscribed flush of the cheek in croupous pneumonia.

Pneumonicula (*nu-mon-ik'-u-lah*) [πνεύμων, lung]. A slight inflammation of the lung.

Pneumonique (*nu-mon'-ēk*) [Fr.]. Pertaining to the lung.

Pneumonitic (*nu-mon-it'-ik*) [πνεύμων, lung; ιτις, inflammation]. Pertaining to or affected with pneumonitis.

Pneumonitis (*nu-mon-i'-tis*) [πνεύμων, lung; ιτις, inflammation]. Pneumonia.

Pneumono- (*nu-mon'-o*) [πνεύμων, lung]. A prefix denoting connection with or relation to the lungs.

Pneumonoblenozemia (*nu-mon-o-blen-o-zē'-me-ah*) [πνεύμων, lung; βλέννα, mucus; ζημία, loss]. Pulmonary blennorrhea.

Pneumonocace (*nu-mon-ok'-as-e*) [πνεύμων, lung; κακός, evil]. Gangrene of the lung.

Pneumonocarcinoma (*nu-mon-o-kar-sin-o'-mah*) [πνεύμων, lung; καρκίνωμα, carcinoma]. Carcinoma of the lung.

Pneumonocatarrhus (*nu-mon-o-kat-ar'-us*). Synonym of *Pneumonia, Catarrhal.*

Pneumonocele (*nu-mon'-o-sēl*) [πνεύμων, lung; κήλη, tumor, hernia]. Hernia of the lung.

Pneumonocholosis (*nu-mon-o-kol-o'-sis*). Synonym of *P., Bilious.*

Pneumonochysis (*nu-mon-ok'-is-is*) [πνεύμων, lung; χύσις, a pouring]. Edema of the lungs.

Pneumonocirrhosis (*nu-mon-o-sir-o'-sis*) [πνεύμων, lung; κιρρός, yellowish]. Cirrhosis of the lung, interstitial pneumonia.

Pneumonodynia (*nu-mon-o-din'-e-ah*) [πνεύμων, lung; ὀδύνη, pain]. Pain referred to the lungs.

Pneumonœdema (*nu-mon-e-de'-mah*). See *Pneumonedema.*

Pneumonokoniosis (*nu-mon-o-kon-e-o'-sis*) [πνεύμων, lung; κονία, dust; νόσος, disease]. A general term

indicating chronic disease of the lungs due to the inhalation of dust. Various names have been devised denoting the kind of dust causing the inflammation: *anthracosis*, or coal-miner's disease; *siderosis*, due to inhalation of metallic dust; *chalicosis*, due to inhalation of mineral dust. The dust-particles, when they can no longer be disposed of by the natural protective agencies of the lungs, find their way into the peri-bronchial and peri-arterial lymph-spaces, where they set up an inflammation. This is characterized by a marked tendency to fibroid change, manifesting itself in the formation of hard, indurated nodules of various size. The lungs always present evidences of chronic bronchitis, usually also of emphysema, and, in many cases, of tuberculosis. The fibroid areas may soften and break down, forming the so-called ulcers of the lung. The softening may be due to tuberculosis, but sometimes it is not.

Pneumonolith (*nu-mon'-o-lith*). Synonym of *Pneumolith.*

Pneumonolithiasis (*nu-mon-o-lith-i'-as-is*) [πνεύμων, lung; λίθος, stone]. The formation of pneumoliths.

Pneumonomalacia (*nu-mon-o-mal-a'-se-ah*). Synonym of *Pneumomalacia.*

Pneumonomelanosis (*nu-mon-o-mel-an-o'-sis*) [πνεύμων, lung; μέλας, black; νόσος, disease]. Anthracosis of the lung.

Pneumonometer (*nu-mon-om'-et-er*). Synonym of *Spirometer.*

Pneumonomycosis (*nu-mon-o-mi-ko'-sis*). Same as *Pneumomycosis.*

Pneumonoparalysis (*nu-mon-o-par-al'-is-is*) [πνεύμων, lung; παράλυσις, paralysis]. Paralysis of the lung.

Pneumonopathia (*nu-mon-o-pa'-the-ah*) [πνεύμων, lung; πάθος, disease]. Any disease of the lung.

Pneumonophlebitis (*nu-mon-o-fleb-i'-tis*) [πνεύμων, lung; φλέψ, vein; ιτις, inflammation]. Inflammation of the pulmonary veins.

Pneumonophthisis (*nu-mon-off'-this-is*) [πνεύμων, lung; φθισις, a wasting]. A destructive process in the lungs.

Pneumonophyseter (*nu-mon-o-fi-se'-ter*) [πνεύμων, lung; φυσητήρ, blowpipe]. An apparatus for inflating the lungs.

Pneumonopleuritis (*nu-mon-o-plu-ri'-tis*). Synonym of *Pleuropneumonia.*

Pneumonoptysis (*nu-mon-op'-tis-is*). Synonym of *Hemoptysis.*

Pneumonorrhagia (*nu-mon-or-a'-je-ah*) [πνεύμων, lung; ῥηγνύναι, to burst forth]. Hemorrhage from the lungs.

Pneumonorrhea (*nu-mon-or-e'-ah*) [πνεύμων, lung; ῥοία, a flow]. A chronic mucous discharge from the lung; also small, oft-repeated hemorrhages from the lungs.

Pneumonosaprosis (*nu-mon-o-sap-ro'-sis*). Synonym of *Pneumonocace.*

Pneumonoscirrhus (*nu-mon-o-skir'-us*) [πνεύμων, lung; σκιῤῥός, hard]. Induration of the lung, associated with bronchiectasis.

Pneumonosepsis (*nu-mon-o-sep'-sis*) [πνεύμων, lung; σῆψις, putrefaction]. Septic inflammation of the lung.

Pneumonosis (*nu-mon'-o-sis*) [πνεύμων, lung; νόσος, disease]. Any affection of the lungs.

Pneumonospasmos (*nu-mon-o-spaz'-mos*). Synonym of *Asthma.*

Pneumonostenosis (*nu-mon-o-sten-o'-sis*) [πνεύμων, lung; στένωσις, contraction]. Contraction of a lung.

Pneumonosyrinx (*nu-mon-o-si'-ringks*) [πνεύμων, lung; σῦριγξ, pipe]. A fistula of the lung; also, a syringe for making injections into the lung. Synonym also of *Pneumonophysete.*

Pneumonotelectasis (*nu-mon-o-tel-ek'-tas-is*) [πνεύμων, lung; τέλος, completion; ἔκτασις, dilatation]. Advanced emphysema of the lung.

Pneumonotomy (*nu-mon-ot'-o-me*). Synonym of *Pneumotomy.*

Pneumony (*nu-mo'-ne*). Synonym of *Pneumonia.*

Pneumonyperpathia (*nu-mon-i-per-pa'-the-ah*) [πνεύμων, lung; ὑπέρ, in excess; πάθος, disease]. A grave disease of the lung.

Pneumonypostasis (*nu-mon-i-pos'-tas-is*). Synonym of *Pneumonia, Hypostatic.*

Pneumoparesis (*nu-mo-par'-es-is*) [πνεύμων, lung; πάρεσις, paresis]. Progressive congestion of the lungs apparently depending on vaso-motor deficiency or other fault of innervation; simple respiratory failure.

Pneumopathy (*nu-mop'-ath-e*). Synonym of *Pneumonopathia.*

Pneumopericarditis (*nu-mo-per-ik-ar-di'-tis*) [πνεῦμα, air; περί, about; καρδία, heart; ιτις, inflammation]. Pericarditis with the formation of gas in the pericardial sac.

Pneumopericardium (*nu-mo-per-ik-ar'-de-um*) [πνεῦμα, air; περί, about; καρδία, heart]. The presence of gas in the pericardial sac. It is due to traumatism, or to communication between the pericardium and the esophagus, stomach, or lungs. It is marked by tympanitic resonance over the precordial region, metallic rhythmic gurglings, and friction-sounds.

Pneumoperitonitis (*nu-mo-per-it-on-i'-tis*) [πνεῦμα, air; περιτόναιον, peritoneum; ιτις, inflammation]. Peritonitis with the presence of gas in the peritoneal cavity.

Pneumophthalmos (*nu-moff-thal'-mos*) [πνεῦμα, air; ὀφθαλμός, eye]. The presence of air within the eye.

Pneumophthisis (*nu-moff'-this-is*) [πνεύμων, lung; φθισις, wasting]. A destructive process in the lung.

Pneumophyma (*nu-mo-fi'-mah*) [πνεύμων, lung; φυμα, growth: *pl.*, *Pneumophymata*]. A tubercle of the lung.

Pneumophymia (*nu-mo-fi'-me-ah*) [πνεύμων, lung; φύμα, growth]. Tuberculosis of the lung.

Pneumophyses (*nu-mo-fi'-sēz*) [πνεῦμα, air; φύειν, to produce; φύεσθαι, to grow]. In biology, two membranous sacs, always more or less filled with air, connected with the reproductive organs of the drone-bee. In repose they are bent and flattened, but when swollen they become hard and resistant, and take the form of divergent horns, which, as they expand in undergoing eversion, pass into and fill the bursa copulatrix of the queen. (Cheshire.)

Pneumopleuritis (*nu-mo-plu-ri'-tis*) [πνεύμων, lung; πλευρά, pleura; ιτις, inflammation]. Conjoined inflammation of the lungs and pleura.

Pneumopyopericardium (*nu'-mo-pi'-o-per-ik-ar'-de-um*) [πνεῦμα, air; πῦον, pus; περί, about; καρδία, heart]. The presence of air or gas and pus in the pericardial sac.

Pneumopyothorax (*nu'-mo-pi'-o-tho'-raks*) [πνεῦμα, air; πῦον, pus; θώραξ, chest]. The presence of air and pus in the cavity of the thorax.

Pneumor (*nu'-mor*) [πνεῦμα, air; *amor*, love]. Desire for air, or to breathe.

Pneumorrhagia (*nu-mor-a'-je-ah*). See *Hemoptysis.*

Pneumoscope (*nu'-mo-skōp*). Synonym of *Pneumatograph.*

Pneumoserothorax (*nu'-mo-se'-ro-tho'-raks*) [πνεῦμα, air; *serum*, serum; θώραξ, chest]. The presence of air or gas and serum in the pleural cavity.

Pneumosis (*nu-mo'-sis*). Same as *Pneumonosis.*

Pneumoskeletal (*nu-mo-skel'-et-al*) [πνεύμων, lung; σκελετόν, a dry body]. Pertaining to a pneumoskeleton.

Pneumoskeleton (*nu-mo-skel'-et-on*) [*πνεύμων*, lung; *σκελετόν*, a dry body]. In biology, a skeletal structure developed in connection with a respiratory organ.

Pneumotherapeutic (*nu-mo-ther-ap-u'-tik*) [*πνεῦμα*, air; *θεραπεία*, treatment]. Pertaining to pneumotherapy.

Pneumotherapeutics (*nu-mo-ther-ap-u'-tiks*). Synonym of *Pneumotherapy*.

Pneumotherapy (*nu-mo-ther'-ap-e*) [*πνεῦμα*, air, or *πνεύμων*, lung; *θεραπεία*, treatment]. The treatment of diseases of the lung. Synonym of *Pneumatotherapy*.

Pneumothorax (*nu-mo-tho'-raks*) [*πνεύμα*, air; *θώραξ*, chest]. Distention of the pleural cavity with air or gas. This condition may be due to traumatism or to communication between the pleural cavity and some one of the air-containing organs. It is not rare as a complication of pulmonary tuberculosis, following rupture of a cavity. It is marked by dyspnea, shock, pain, a tympanitic (sometimes a dull) percussion-note over the affected side, displacement of the heart, bell-tympany, and diminished respiratory murmur. If there be also serum or liquid present, as is likely to be the case unless death ensue rapidly, the condition is called *Hydro-pneumothorax*, or pneumothorax with effusion. **P. by Occlusion**, a condition in which there is no apparent communication between the air in the pleural cavity and the external atmosphere. **P., Patent**, a term used when the opening through which the air has entered the pleura is free and unobstructed. **P. subphrenicus**, pneumothorax due to perforation of the diaphragm. **P., Valvular**, a term used when the opening possesses a valvular character.

Pneumotomy (*nu-mot'-o-me*) [*πνεύμων*, lung; *τομή*, a cutting]. 1. Surgical incision of the lung. 2. The anatomy, or dissection, of the lung.

Pneumotoxin (*nu-mo-toks'-in*) [*πνεύμων*, lung; *τοξικόν*, a poison]. Klemperer's term for a poisonous albuminoid body produced by the pneumococcus, and which, when introduced into the circulation of an animal causes elevation of temperature. Subsequently there is produced in the body a substance, *antipneumotoxin*, which possesses the power of neutralizing the poison which is formed by the bacteria.

Pneumotuberculum (*nu-mo-tu-ber'-ku-lum*) [*πνεύμων*, lung; *tuberculum*, tubercle]. A tubercle of the lung.

Pneumo-typhoid (*nu-mo-ti'-foid*). Synonym of *Pneumo-typhus*.

Pneumo-typhus (*nu-mo-ti'-fus*) [*πνεύμων*, lung; *τῦφος*, typhus]. A term given to those cases of typhoid fever that begin with a definite pneumonia dependent upon the typhoid-bacillus.

Pneuobiomantia (*nu-o-bi-o-man'-she-ah*). Same as *Pneusiobiognosis*.

Pneusiobiognosis (*nu-ze-o-bi-og-no'-sis*) [*πνεῦσις*, a blowing; *βίος*, life; *γνῶσις*, knowledge]. Docimasia pulmonum, *q. v.*

Pneusis (*nu'-sis*) [*πνεῖν*, to breathe]. Respiration. **P. pertussis.** Synonym of *Whooping-cough*.

Pneusometer (*nu-som'-et-er*). Synonym of *Spirometer*.

Pnigalion (*ni-ga'-le-on*) [*πνιγαλίων*; *πνίγειν*, to choke]. Nightmare; incubus.

Pnigma (*nig'-mah*) [*πνίγειν*, to choke]. Strangulation.

Pnigophobia (*ni-go-fo'-be-ah*) [*πνίγειν*, to choke; *φόβος*, fear]. The fear of choking that sometimes accompanies angina pectoris.

Pnigos, Pnix, Pnixis (*ni'-gos, niks, niks'-is*). Synonyms of *Pnigma*.

Pock (*pok*) [D., *pok*, a little pouch]. A pustule of an eruptive fever, especially of smallpox. **P., Black.** Synonym of *Black Smallpox*. **P.-broken**, marked with smallpox. **P., Diphtheric**, in smallpox, a pock the seat of coagulation-necrosis with the production of a whitish membrane. **P.-hole, P.-mark**, the pit left by the smallpox pustule. **P., Horn.** Synonym of *Variola verrucosa*. **P.-house**, a smallpox hospital. **P.-marked**, marked with the cicatrices of the smallpox-pustule. **P., Master**, a large pock seen in some cases of smallpox, and which resembles the pustule of inoculation-smallpox. **P.-pitted.** Synonym of *Pock-marked*. **P., Stone**, an obselete term for an acne-pustule.

Pocked (*pokt*) [D., *pok*, a little pouch]. Pitted; marked with pustules.

Pocket (*pok'-et*) [ME., *pocket*, a pocket]. In anatomy, a blind sac, or sac-shaped cavity; the abdominal cavity of certain fish. A diverticulum communicating with a cavity.

Pocketing (*pok'-et-ing*) [ME., *pocket*, a pocket]. A name given by Storer to a mode of treating the pedicle in the operation of ovariotomy. It is accomplished by bringing the extremity of the pedicle between the inner lips of the incision, at its lower angle, thus securing its attachment to the raw surface of the abdominal wall.

Pocky (*pok'-e*) [D., *pok*, a little pouch]. Having pocks or pustules; infected with variola or syphilis.

Poculiform (*pok'-u-lif-orm*) [*poculum*, cup; *forma*, form]. In biology, deeply cup-shaped, goblet-shaped.

Poculum (*pok'-u-lum*) [L.]. A teacup. **P. Diogenis** [Diogenes' cup]. The hollow of the hand.

Pod [origin obscure]. In biology, a more or less elongated cylindric seed-vessel.

Podagra (*pod-a'-grah*) [*πούς*, foot; *ἄγρα*, seizure]. Gout, especially of the great toe or the joints of the foot. **P. aberrans**, retrocedent gout.

Podagral (*pod-a'-gral*). Same as *Podagric*.

Podagric (*pod-a'-grik*) [*πούς*, foot; *ἄγρα*, seizure]. Gouty.

Podagrism (*pod'-ag-rizm*) [*πούς*, foot; *ἄγρα*, seizure]. Goutiness.

Podagrous (*pod-a'-grus*). Synonym of *Podagric*.

Podalgia (*pod-al'-je-ah*) [*πούς* (*gen.* *ποδός*), foot; *ἄλγος*, pain]. Pain in the foot.

Podalic (*pod-al'-ik*) [*πούς*, foot]. Pertaining to the feet. **P. Version**, in obstetrics, the operation of changing the position of the fetus in utero so as to bring the feet to the outlet.

Podanencephalia (*pod-an-en-sef-a'-le-ah*) [*πούς*, foot; *ἀ* priv.; *ἐνγκέφαλος*, headless]. Anencephalia with a pedunculated head.

Podarthral (*pod-ar'-thral*) [*πούς*, foot; *ἄρθρον*, a joint]. Pertaining to the podarthrum.

Podarthritis (*pod-ar-thri'-tis*) [*πούς*, foot; *ἄρθρον*, joint; *ιτις*, inflammation]. Gouty inflammation of the joints of the feet.

Podarthrocace (*pod-ar-throk'-as-e*) [*πούς*, foot; *ἄρθρον*, joint; *κακός*, evil]. Caries of the articulations of the feet.

Podarthrum (*pod-ar'-thrum*) [*πούς*, foot; *ἄρθρον*, a joint: *pl.*, *Podarthra*]. In biology, the foot-joint or metatarso-phalangeal articulation.

Podedema (*pod-e-de'-mah*) [*πούς*, foot; *οἴδημα*, edema]. Edema of the foot.

Podelcoma, Podelkoma (*pod-el-ko'-mah*). See *Fungus-foot*.

Podencephalia (*pod-en-sef-a'-le-ah*) [*πούς*, foot; *ἐγκέφαλος*, brain]. The condition present in a podencephalus.

Podencephalus (*pod-en-sef'-al-us*) [*πούς*, foot; *ἐγκέφαλος*, brain]. A variety of single autositic monsters of the species exencephalus, in which there is a protrusion of the cranial contents from the top of the

head, the tumor assuming a pedunculated character. There is usually a considerable degree of hydrocephalus present.

Podetiiform (*pod-e-te'-if-orm*) [πούς, foot; *forma*, form]. Resembling a podetium.

Podetium (*pod-e'-she-um*) [πούς, a foot]. In biology, the stalk of an apothecium in lichens or a fruit-stalk in *Marchantia*.

Podex (*po'-deks*) [*podex*, the anus: *pl.*, *Podices*]. In biology, the rump, uropygium, or pygidium.

Podical (*pod'-ik-al*) [*podex*, the anus]. Pertaining to the podex.

Podismus (*pod-iz'-mus*) [ποδίζειν, to measure by feet]. Spasm of the muscles of the foot.

Podite (*pod'-īt*) [πούς, foot]. In biology, the limb of a crustacean, usually seven-jointed. Cf., *Endopodite*, *Exopodite*, *Epipodite*, *Basipodite*, *Coxopodite*, *Dactylopodite*, *Ischiopodite*, *Meropodite*.

Poditic (*po-dit'-ik*) [πούς, foot]. Pertaining to a podite.

Podium (*po'-de-um*) [πόδιον, a little foot: *pl.*, *Podia*]. In biology, the foot or supporting organ. Commonly used in compounds, as *Monopodium*, *Sympodium*, *Propodium*, *Mesopodium*, *Metapodium*, *Epipodium*.

Podobranchia (*pod-o-brang'-ke-ah*) [πούς a foot; βράγχια, gills: *pl.*, *Podobranchiæ*]. In biology, a branchial plume or foot-gill; a respiratory organ of crustaceans attached to the coxa.

Podobranchial (*pod-o-brang'-ke-al*) [πούς, foot; βράγχια, gills]. Pertaining to a podobranchia.

Podobranchiate (*pod-o-brang'-ke-āt*) [πούς, foot; βράγχια, gills]. In biology, provided with podobranchiæ.

Podobromhidrosis (*pod-o-brōm-hid-ro'-sis*) [πούς, foot; βρῶμος, stench; ἱδρώς, sweat]. Offensive sweating of the feet.

Podocace (*po-dok'-as-e*). Synonym of *Podarthrocace*.

Podocephalous (*pod-o-sef'-al-us*) [πούς (ποδ-), foot; κεφαλή, head]. In biology, applied to a head of flowers when borne upon a distinct stalk.

Pododynia (*pod-o-din'-e-ah*) [πούς, foot; ὀδύνη, pain]. Pain in the foot, and especially in the sole of the foot; the word is now usually limited to painful heel, a neuralgic condition about the heel, attended with little or no swelling, no discoloration, and no affection of the joints. The pains are very severe, though often limited to a very small area. It may be associated with rheumatism or gout, and with certain occupations requiring much standing.

Podœdema (*pod-e-de'-mah*). See *Podedema*.

Podogyn, Podogynium (*po'-do-jin*, *po-do-jin'-e-um*) [πούς, foot; γυνή, female: *pl.*, *Podogynia*]. See *Gynophore* and *Basigynium*.

Podology (*pod-ol'-o-je*) [πούς, foot; λόγος, science]. The anatomy and physiology, etc., of the foot.

Podophthalmic, Podophthalmous (*pod-off-thal'-mik*, *pod-off-thal'-mus*) [πούς, foot; ὀφθαλμός, eye]. Having the eye fixed at the end of a projecting, movable stalk, as in crustaceans.

Podophthalmite (*pod-off-thal'-mīt*) [πούς, foot; ὀφθαλμός, eye]. In biology, the distal of two joints of the eye-stalk or ophthalmite of a stalk-eyed crustacean, as distinguished from the *basiophthalmite*.

Podophyllic (*pod-o-fil'-ik*) [πούς, foot; φύλλον, leaf]. Derived from podophyllin. **P. Acid**, a resinous, amorphous substance, found in the podophyllin of commerce.

Podophyllin (*pod-o-fil'-in*). See *Podophyllum*.

Podophyllitis (*pod-o-fil-i'-tis*) [πούς, foot; φύλλον, leaf; ιτις, inflammation]. Inflammation of the podophyllous tissues of the hoof.

Podophyllotoxin (*pod-o-fil-o-toks'-in*) [πούς, foot; φύλλον, leaf; τοξικόν, poison]. The principal active constituent of the resin of podophyllum. It is a white, amorphous resin, very poisonous, soluble in alcohol, ether, and chloroform, slightly so in water.

Podophyllous (*pod-o-fil'-us*) [πούς, foot; φύλλον, leaf]. In biology, pertaining to the laminated tissues of the foot, as those inside the hoof; having compressed, leaf-like feet.

Podophyllum (*pod-o-fil'-um*) [πούς, foot; φύλλον, leaf]. May-apple. The root of mandrake, *P. peltatum*. It contains *podophyllin*, and this a poisonous material, *podophyllotoxin*. It is a tonic astringent, cholagogue, and purgative, and is apt to produce nausea. It is recommended in remittent fever, bilious vomiting, and malarial jaundice. Dose of the root gr. v–xx; of the resin, **podophyllin**, gr. ⅛–j. **P., Abstract.** Dose gr. ¼–j. Unof. **P., Ext.** Dose gr. j–v. **P., Ext., Fld.** Dose ♏ij–xx. **P., Tinct.** (B.P.) Dose ♏xv–℥j.

Podorrheumatism (*pod-or-ru'-mat-izm*) [πούς, foot; ῥεῦμα, flux]. Rheumatism of the foot.

Podoscaph (*pod'-o-skaf*) [πούς, foot; σκάφος, a ship]. In biology, a hollow, skiff-like member attached to the foot of certain water birds.

Podosperm, Podospermium (*pod'-o-sperm*, *pod-o-sperm'-me-um*) [πούς, foot; σπέρμα, seed]. In biology, the stalk of an ovule or seed. See *Funicle*.

Podostomatous (*pod-o-sto'-mat-us*) [πούς, foot; στόμα, mouth]. In biology, having foot-like mouth-parts.

Podotheca (*pod-o-the'-kah*) [πούς, foot; θήκη, sheath: *pl.*, *Podothecæ*]. In biology: (*a*) the envelop of the legs and feet of a bird; (*b*) the covering of a leg in the pupa of an insect.

Podotrochilitis (*pod-o-trok-il-i'-tis*) [ποίς, foot; τροχίλια, pulley; ιτις, inflammation]. *Navicular disease;* an inflammatory disease of the fore-foot in the horse, involving the synovial sheath between the sesamoid or navicular bone of the third phalanx and the flexor perforans muscle over it.

Podwyssozki's Theory of Inflammation. See under *Theory*.

Podyperidrosis (*po-di-per-id-ro'-sis*) [πούς, foot; ὑπέρ, over; ἱδρωσις, sweating]. Excessive sweating of the feet.

Pœcilia (*pe-sil'-e-ah*). Same as *Achroma*.

Pœcilocyte (*pe'-sil-o-sīt*). See *Poikilocyte*.

Pœcilocytosis (*pe-sil-o-si-to'-sis*). See *Poikilocytosis*.

Pœcilomelasma (*pe-sil-o-mel-az'-mah*) [ποικίλος, varied; μέλασμα, livid spot]. Synonym of *Gangrene*, *Senile*.

Pœcilonym (*pe'-sil-o-nim*) [ποικίλος, various; ὄνυμα, a name]. In biology, one of many onyms or technical names for the same part.

Pœciloperissoma (*pe-sil-o-per-is-o'-mah*) [ποικίλος, varied; περίσσωμα, superabundance]. An excessive growth of heterogeneous tissues.

Pogoniasis (*po-go-ni'-as-is*) [πώγων, beard]. Excessive growth of the beard; growth of beard in a woman.

Pogoniate (*po-go'-ne-āt*) [πωγωνιάτης, bearded]. In biology, webbed; bearded.

Pogonium (*po-go'-ne-um*) [πώγων, beard]. A small beard; also, the web of a feather.

Pogonology (*po-go-nol'-o-je*) [πώγων, beard; λόγος, science]. Description of the beard.

Pogonotrophy (*po-gon-ot'-ro-fe*) [πώγων, beard; τροφή, nourishment]. Nutrition of the beard.

Poikioblast (*poi'-kil-o-blast*). See *Corpuscle*.

Poikilocyte (*poi'-kil-o-sīt*) [ποικίλος, varied; κύτος, cell]. A large, irregularly shaped red blood-corpuscle. Poikilocytes are most abundant in the blood in pernicious anemia, but also occur in other forms of anemia.

Poikilocythemia (*poi-kil-o-si-the'-me-ah*) [ποικίλος, varied; κύτος, cell; αἷμα, blood]. The presence of poikilocytes in the blood.

Poikilocytosis (*poi-kil-o-si-to'-sis*) [ποικίλος, varied; κύτος, cell]. A condition of the blood marked by irregularity in the shape of the red corpuscles; it occurs preëminently in pernicious anemia, but also in other forms of anemia.

Poikilothermal (*poi-kil-o-ther'-mal*). Synonym of *Poikilothermic*.

Poikilothermic (*poi-kil-o-ther'-mik*) [ποικίλος, varied; θέρμη, heat]. Varying in temperature according to the surroundings. A term applied to cold-blooded animals, the temperature of which adapts itself easily to their environment.

Point [ME., *point*, a point]. The sharp end of an object; in the mathematic sense, that which has position but no dimensions. **P., Alveolar,** the central point in the lower margin of the upper alveolar arch. **P. apophysaire, P., Apophyseal,** a name given by Trousseau to a tender spot over the spinous process of a vertebra, which, in neuralgic affections, corresponds to the origin of the nerve involved. **P., Auricular,** in craniometry, the center of the external auditory meatus. **P., Boiling,** the degree of temperature at which a liquid passes into the vaporous state with ebullition. **P., Cardinal,** in optics, one of the six points that determine the direction of the rays entering or emerging from a series of refracting media. **P., Cardinal,** *of Capuron.* See *Pelvis.* **P., Craniometric.** See *Craniometric Points.* **P., Critical** (*of gases*), a temperature at or above which a gas cannot be liquefied by pressure alone. Different gases have different, but fixed critical points. **P., Critical** (*of liquids*), that temperature at which a liquid, regardless of the pressure to which it is subjected, assumes a gaseous form. **P., Deaf** (*of the ear*), one of certain points near the ear where, as shown by Urbantschitsch, a vibrating tuning-fork cannot be heard. The fork is held perpendicularly and is moved from the zygoma backward toward the occiput. The first point is at the lower end of the tragus; the second, where the helix intersects the line along which the fork is moved. **P., Dew,** the temperature at which the atmospheric moisture is deposited as dew. **P. of Dispersion,** in optics, the virtual focus. **Ps. douloureux,** the tender spots at the exit of nerves the seat of neuralgic pain. See *Ps., Valleix's.* **P. of Election,** in surgery, that point at which a certain operation is done by preference. **P., Erb's,** the *supraclavicular point*, a point above the middle of the clavicle where a group of muscles consisting of the deltoid, biceps, brachialis anticus, and supinator longus can be stimulated to contraction. **P., Eye:** 1. An ocellus, *q. v.* 2. The bright circle seen at the crossing-point of the rays above the microscopic ocular. **P., Far-,** the remotest point of distinct vision; in the emmetropic eye, it is at infinity, but it is practically considered to be at 20 feet from the eye; in the myopic eye at a finite distance in front of the eye; in the hyperopic eye, beyond infinity,—practically beyond 20 feet. **P., Fixation,** that point on the visual axis at which an object is most distinctly seen. **P., Focal,** one of the two principal foci of a dioptric system. In the eye there is an anterior and a posterior focal point. The former is that point at which emerging rays that are parallel in the vitreous would converge in front of the eye; while the posterior is that point in the back of the eye at which entering rays, that are parallel when they strike the cornea, meet. **P., Freezing,** the degree of temperature at which a liquid substance, usually water or watery fluids, becomes solid. **P., Fusing, P., Fusion.** Synonym of *P., Melting.* **P., Hystero-epileptogenous, P., Hysterogenic.** See *Zone.* **P. of Incidence,** in optics, that point on a surface upon which a ray of light falls. **P., Intersuperciliary,** the central point of a line joining the most prominent points of the two superciliary arches. **P., Jugal,** the point of intersection of a line tangent to the upper border of the zygoma and one marking the posterior border of the frontal process of the malar bone. **P. of Least Resistance.** See *Locus minoris resistentiæ.* **P., Malar,** the most prominent point on the external surface of the malar bone. **P., McBurney's,** a point two and a half inches distant from the anterior superior spine of the right ilium, on a line drawn from the spine to the umbilicus. It is often the seat of greatest tenderness in appendicitis. **P., Melting,** the degree of temperature at which fusible solids begin to melt. **P., Metopic,** the glabella, *q. v.* **P., Motor,** the point on the surface of the body corresponding to the place where the motor nerve enters a muscle, and where an electrode must be applied to produce the maximum contraction of the muscle by electric stimulation. See *Motor Point.* **P., Nasal.** Synonym of *Nasion.* **P., Near-,** the nearest point at which the eyes can accommodate to see distinctly. **P., Near-, Absolute,** the nearest point at which accommodation in a single eye is still possible without vision becoming indistinct. **P., Near-, Binocular,** the nearest point at which the means of accommodation and the convergence of the visual axes of an object can be seen distinctly. **P., Nodal,** in optics, the center of curvature of a spherical lens or refracting surface, through which rays of light pass, joining conjugate points. **P., Occipital,** the pointed posterior extremity of the occipital lobe of the brain. **P., Occipital, Maximum,** in craniometry, the point of the longest antero-posterior diameter which is most distant from the glabella. **P., Ophryon.** Synonym of *Ophryon.* **P., Orbital, External,** in craniometry, the most prominent point at the outer edge of the orbit. It is just above the fronto-malar bones. **P. of Ossification,** the center of ossification in a bone. **P., Painful,** the point where a nerve, the seat of neuralgia, is tender on pressure. It is usually at the exit of the nerve from a bony canal, or where it passes through fascia. See *Ps., Valleix's.* **P., Physiologic Middle** (*of the retina*), the fovea centralis. **Ps., Principal,** in optics, the two points in the optic axis of a lens that are so related that lines drawn from these points to the corresponding points in the object and its image are parallel. **P. of Reflection,** in optics, the point from which a ray of light is reflected. **P. of Refraction,** in optics, the point at which a ray of light is refracted. **P. of Regard,** the point at which the eye is directly looking. Its image falls in the middle of the macula lutea. **P., Retinal, Corresponding.** See *P., Retinal, Identical.* **P., Retinal, Disparate,** one of those points on the retinæ whence images are projected, not to the same, but to different points in space. **Ps., Retinal, Identical,** corresponding points on the two retinæ, the images of which are projected to the same spot in space. **P. of Sight.** Same as *P. of Vision.* **P., Subnasal,** in craniometry, the middle of the inferior border of the anterior nares, or the root of the anterior nasal spine. **P., Supra-auricular,** in craniometry, the point at the root of the zygomatic process directly over the auricular point. **P., Supraclavicular.** See *P., Erb's.* **P., Supra-nasal.** Same as *Ophryon.* **P., Supra-orbital,** a tender point in neuralgia just above the supra-orbital notch. **P., Vaccine.** See *Vaccine Point.* **Ps., Valleix's** (*Pointes douloureux*), the points at which neuralgic nerves are tender on pressure. This ten-

derness is of diagnostic significance, and generally persists in the intervals between attacks. In trigeminal neuralgia these points are at the supra-orbital notch, at the infraorbital, and at the mental foramen. **P. of Vision,** the position from which anything is observed. **P., Vital,** a spot in the oblongata corresponding to the seat of the respiratory center, and puncture of which causes immediate death.

Pointed (*point'-ed*) [ME., *point*, a point]. Having a point. **P. Condyloma.** See *Venereal Wart.*

Pointillage (*pwan'-til-yahzh*) [Fr.]. Massage by means of the finger-tips.

Pointing (*point'-ing*) [ME., *point*, a point]. The coming to a point. **P. of an Abscess,** the process by which pus from the deeper structures reaches the surface.

Poiseuille's Space. The peripheral zone in the capillary vessel between the wall of the capillary and the central current of the red blood-discs.

Poison (*poi'-zn*) [ME., *poisoun*, poison]. A substance that destroys the life of an organism or impairs the functions of one or more of its organs. "A substance capable of producing noxious and even fatal effects upon the system, no matter by what avenue it be introduced; and this, as an ordinary result, in a healthy state of the body, and not by a mechanical action." (Reese.) See *Poisons, Table of*, pp. 1136–1149. **P., Aërial.** Same as *Miasm.* **P., Arrow,** a poison, generally a vegetable extract, applied by savages to the heads of their arrows. Curare, employed by the inhabitants of Guiana, is one of the best known of these poisons. **P.-ash.** See *Chionanthus.* **P.-bag.** See *P.-sac.* **P., Blood,** a substance having a destructive action upon the blood. **P., Frog,** an animal poison applied by the Indians of Colombia to their arrow-heads. **P., Gaboon.** See *P. of Pahonias.* **P.-gland,** a gland secreting poison. **P., Hematic.** Synonym of *P., Blood.* **P., Irritant,** one producing irritation or destruction, such as mineral acids, alkalies, caustics, and other corrosive substances. **P.-ivy,** a shrub vine of North America, *Rhus toxicodendron.* It produces a severe cutaneous inflammation. See *Rhus.* **P., Morbid,** the etiologic poisonous element of a specific disease. **P., Muscle:** 1. A substance that impairs or destroys the proper functions of muscles. 2. A poisonous albumin developed during muscular activity. **P., Narcotic,** one affecting the cerebral or cerebral and spinal centers, producing stupor, delirium, etc., such as opium, hydrocyanic acid, and carbon monoxid. See, also, *Antidote*, and *Drug.* **P., Nerve,** one impairing or destroying the conducting-power of nerves. **P.-oak,** a low form of the *poison-ivy.* **P., Ordeal,** any one of the vegetable poisons, such as *Physostigma*, used by savages in the trial of accused persons to determine their guilt or innocence. **P.-organ,** an organic apparatus for producing a poisonous material. **P. of Pahonias,** or **Phonias,** a very virulent poison obtained from the seeds of *Strophanthus hispidus,* and used as an arrow-poison. It is also called *Gaboon poison.* **P., Protoplasmic,** one destroying the vital properties of living protoplasm. **P.-sac,** a sac containing or secreting poison; a poison-gland. **P.-vine.** See *P.-ivy.*

Poisoning (*poi'-zn-ing*) [ME., *poisoun*, a poison]. The act of administering or ingesting any poisonous substance in doses sufficient to destroy life or health. **P., Blood,** a condition in which the quality of the blood is altered by reason of the presence in it of a poison; ordinarily, synonymous with *Septicemia.*

Poisonous (*poi'-zn-us*) [ME., *poisoun*, poison]. Having the properties of a poison; venomous.

Poke-root (*pōk'-rūt*). See *Phytolacca.*

Polar (*po'-lar*) [*polus*, a pole]. Pertaining or belonging to the poles. **P. Crown,** the disc of chromatin-grains at each pole of the nuclear spindle in karyokinesis. **P. Field,** the clear space enclosed by the chromatin-loops of the loose skein, in karyokinesis, and in which the nuclear spindle appears. Cf. *Sphere of Attraction, Centrosome.* **P. Globules,** two masses of nuclear substance detached from the nuclear spindles during karyokinesis. They appear to be necessary to the complete maturation of the ovum, although they ultimately disappear. Only one polar globule occurs in parthenogenetic ova. They have been described by Fleming in white blood-corpuscles. The significance of the polar bodies is not definitely known. According to certain embryologists the ovum is originally hermaphroditic, the polar bodies representing the male element, which the ovum expels in order to prepare for the entrance of the male pronucleus. An analogous condition, leading also to the loss of certain elements, is thought to exist in the spermatozoön, which likewise is originally hermaphroditic. Weismann looks upon the polar bodies as masses of ovogenetic nucleoplasm which are expelled from the ovum, in order that the more important germ-plasm may develop actively. The bodies are also known as the *polar globules of Robin.* **P. Method,** a method of applying electricity in electrotherapeutics, in which the pole whose distinctive effect is wanted is placed over the part to be treated, and the other pole over some indifferent part. **P. Nucleus,** in biology, the fourth nucleus in each group at the two extremities of the embryo-sac. **P. Reaction,** in electricity, the measure of muscular contraction that follows the application of the positive (anode) or negative (kathode) pole to a nerve or muscle. **P. Vesicle.** Same as *P. Globule.* **P. Zone.** See *Zone.*

Polarimeter (*po-lar-im'-et-er*) [*polus*, pole; *μέτρον*, a measure]. An instrument for determining the degree to which an optically active substance changes the plane of polarization to the right or to the left.

Polarimetry (*po-lar-im'-et-re*) [*polus*, pole; *μέτρον*, measure]. The use of the polarimeter.

Polariscope (*po-lar'-is-kōp*) [*polus*, pole; *σκοπεῖν*, to view]. An optic instrument for exhibiting the polarization of light, or for examining substances in polarized light. The essential parts are the polarizing and analyzing prisms.

Polariscopic (*po-lar-is-kop'-ik*) [*polus*, pole; *σκοπεῖν*, to view]. Pertaining to a polariscope.

Polariscopy (*po-lar'-is-kop-e*) [*polus*, pole; *σκοπεῖν*, to view]. The use of the polariscope.

Polaristrobometer (*po-lar-is-tro-bom'-et-er*) [*polus*, pole; *στρόβος*, a whirling round; *μέτρον*, measure]. A form of polarimeter or saccharimeter that furnishes a delicate means of fixing the plane of polarization as rotated by the sugar-solution under examination.

Polarite (*po'-lar-it*) [*polus*, a pole]. A filtering-material containing 50 per cent. of magnetic oxid and iron carbonate; it is used in the artificial filtration of sewage.

Polarity (*po-lar'-it-e*) [*polus*, pole]. The state or quality of having poles or points of intensity with mutually opposite qualities. In electro-therapeutics, that condition of a nerve in which the part nearest the negative pole is in a state of increased, and that nearest the positive is in a state of decreased irritability.

Polarization (*po-lar-iz-a'-shun*) [*polus*, pole]. The act of forming poles or points of intensity having qualities mutually opposite. **P., Chromatic,** polarization accompanied by a play of colors. **P., Circular,** the turning of the plane of polarization to the

right or left. **P. of Light**, the breaking up of a ray of light into two separate parts whose planes of vibration are at right angles to each other. It is usually accomplished by passing the ray through a doubly refracting medium.

Polarizer (*pō'-lar-i-zer*) [*polus*, pole]. In microscopy, one of the Nicol prisms placed beneath the object and by means of which the light is polarized.

Pole (*pōl*) [πόλος, *polus*, a pole]. The extremity of an axis; a point on a sphere equally distant from every part of the circumference of a great circle of the sphere. In electricity, one of the points of a body at which its attractive or repulsive energy is concentrated. In galvanic or dynamic electricity, the electrodes of a cell or of a generator. In magnetism, one of the points of maximum intensity of magnetic force. **P., Antigerminal**, the pole of an ovum opposite the germinal pole; it is the pole at which the food-yolk is situated. **P., Cephalic**, the end of the fetal ellipse where the head of the fetus is situated. **P.-changer**, a switch or key for changing or reversing the direction of a current produced by any electric source, such as a battery. **P. Corpuscles.** See *Polar Globules*. **Ps. of the Eye**, the anterior and posterior poles of the optic axis. **P., Germinal, P., Germinative**, the pole of the egg at which the development of the embryo begins. **P., Lower**, of an egg. See *P., Antigerminal*. **P., Negative**, the electrode or any other termination of the wire which is attached to the positive element in the galvanic cell. **P., North**, in a magnet, the extremity directed toward the north. **P., Nutritive.** Synonym of *P., Antigerminal*. **P., Occipital**, the posterior pointed extremity of the occipital lobe. **P., Pelvic**, the extremity of the fetal ellipse at which the breech is situated. **P., Positive**, the electrode or other terminal portion of the wire which is connected with the negative element of a galvanic battery. **P., South**, in a magnet, the extremity directed toward the south. **P., Upper**, in an egg, the *P., Germinal, q. v.* **P., Vitelline.** Synonym of *P., Antigerminal*.

Polemophthalmia (*pol-em-off-thal'-me-ah*) [πόλεμος, war; ὀφθαλμός, eye]. Military ophthalmia; the ophthalmia of soldiers.

Polenta (*po-len'-tah*) [L.]. In Italy, a maize-meal porridge.

Poliater (*pol'-e-a-ter*) [πόλις, city; ἰατήρ, physician]. Formerly, a physician licensed to practise by the public authorities of a city.

Police (*po-lēs'*) [πόλις, a city]. 1. Public order. 2. An organized civil force for maintaining order. **P., Sanitary**, the body of officials in the employ of a city, state or nation, whose duty it is to look after the hygienic condition as it affects the public health.

Policeman's Disease. Synonym of *Tarsalgia*.

Policlinic (*pol-ik-lin'-ik*) [πόλις, city; κλίνη, couch]. A general city hospital. Cf. *Polyclinic*.

Poliencephalitis (*pol-e-en-sef-al-i'-tis*) [πολιός, gray; ἐγκέφαλον, brain; ιτις, inflammation]. An inflammation of the gray matter of the cortex of the brain. **P. acuta**, an acute inflammation of the cerebral cortex in children, giving rise to infantile cerebral palsy. **P., Anterior Superior**, an inflammatory disease of the gray matter of the third ventricle, of the anterior portion of the fourth, and of that about the Sylvian aqueduct. The condition is usually acute and has, as a rule, a well marked clinical picture, including ophthalmoplegia, chiefly external, and a peculiar somnolent state; there is no other paralysis; sensation is not affected. The disease appears as if caused by infection, and is usually fatal, although recovery may take place. This disease may be related to the African sleeping-sickness, nélavan, and to a similar disease occasionally observed in Switzerland and Lombardy. **P. corticalis**, inflammation of the gray matter of the cerebral cortex. **P., Posterior**, inflammation of the gray matter of the posterior portion of the fourth ventricle.

Polimitus malariæ (*pol-im'-it-us*). See under *Parasites* (*Animal*), *Table of*.

Polioencephalitis (*pol-e-o-en-sef-al-i'-tis*). See *Poliencephalitis*.

Polioencephalo-myelitis (*pol-e-o-en-sef'-al-o-mi-el-i'-tis*). Synonym of *Poliomyelencephalitis*.

Poliomyelencephalitis (*pol-e-o-mi-el-en-sef-al-i'-tis*) [πολιός, gray; μυελος, marrow; ἐγκέφαλος, brain; ιτις, inflammation]. Poliomyelitis and poliencephalitis existing together.

Poliomyelepathy (*pol-e-o-mi-el-ep'-ath-e*) [πολιός, gray; μυελός, marrow; πάθος, disease]. Disease of the gray matter of the spinal cord.

Poliomyelitis (*pol-e-o-mi-el-i'-tis*) [πολιός, gray; μυελός, marrow; ιτις, inflammation]. Inflammation of the gray matter of the spinal cord. **P., Acute Anterior**, acute inflammation of the anterior horns of the gray matter of the spinal cord, leading to a destruction of the large multipolar cells of these horns. It is most common in children, coming on during the period of the first dentition and producing a paralysis of certain muscle-groups or of an entire limb. The onset is sudden, and the paralysis is usually most extensive in the beginning, a certain amount of improvement taking place subsequently. There are no sensory disturbances. The affected muscles atrophy rapidly, the reflexes in them are lost, and reactions of degeneration are present. From contraction of antagonistic muscles deformities develop later in life. The disease is also known as *Infantile Palsy*. **P., Chronic Anterior.** Synonym of *Progressive Muscular Atrophy*.

Poliomyelopathy (*pol-e-o-mi-el-op'-ath-e*) [πολιός, gray; μυελός, marrow; πάθος, disease]. Disease of the gray matter of the cord.

Polioplasm, Polioplasma (*pol'-e-o-plazm, pol-e-o-plaz'-mah*) [πολιός, gray; πλάσμα, plasm]. Granular protoplasm.

Poliosis (*pol-e-o'-sis*) [πολιός, hoary or gray]. A condition characterized by absence of pigment in the hair. See *Canities*.

Poliotes (*pol-e-o'-tēz*) [πολιός, hoary or gray. Synonym of *Canities*.

Poliothrix (*pol'-e-o-thriks*) [πολιός, gray; θρίξ, hair]. Synonym of *Canities*.

Polish (*pol'-lish*) [Pol., *Polski*, Polish]. Pertaining to Poland. **P. Plait.** See *Plica polonica*. **P. Ringworm.** Same as *Plica polonica*.

Polishing Red. Same as *Colcothar*.

Polity (*pol'-it-e*) [πόλις, a city]. A form of government. The functions of the government of a city or town. **P., Medical**, the sanitary regulations of a community.

Politzer's Ear-bag. An instrument for filling the tympanic cavity with air. It consists essentially of a large, gourd-like rubber bulb and a tube with a hard-rubber tip to fit into the nose. **P.'s Method**, a method of inflating the middle ear and clearing the Eustachian tube by filling one nostril with air from a rubber-bag, the other ear being closed and the patient, at the moment of inflation, performing the act of swallowing, during which the pharyngeal end of the Eustachian tube is open.

Politzeration, Politzerization (*pol-its-er-a'-shun, pol-its-er-iz-a'-shun*) [after *Adam Politzer*, an Austrian physician]. The inflation of the middle ear by means of Politzer's bag.

TABLE OF POISONS.

Name.	Character of Poison.	Symptoms of Poisoning.	Fatal Dose.	Mode of Producing Death.	Treatment and Antidotes.
Abrus precatorius. See *Je*	*quirity*.				
Acetanilid.	Corrosive.	Cyanosis; peculiar discoloration of the blood due to formation of methemoglobin.		Sudden cardiac failure.	Strychnin, oxygen, and warmth; heart-stimulants.
Acetic Acid. See *Acid*.					
Acid, Acetic.	Corrosive.	Vomiting, purging; pain in the stomach, foul breath.	Recovery from ℥iij.	Asphyxia.	Alkalies; soap; demulcent drinks; opium.
Acid, Arsenious. / Arsenic. } See *Arsenic*.			gr. ij.		
Acid, Boric.		Nausea, vomiting, erythema, rapid, feeble pulse, collapse.		Cardiac paralysis.	
Acid, Carbolic (*Phenic*).	Corrosive.	Immediate burning pain from mouth to stomach; giddiness, loss of consciousness, collapse; subnormal temperature; partial suppression of urine, which is dark in color; pupils very much contracted; characteristic odor.	℥j.	Respiratory and cardiac paralysis.	Evacuate; magnesium sulphate, syrup of lime, atropin.
Acid, Chromic.	Corrosive.	Yellow stains; abdominal pain; vomiting and purging; collapse.		Cardiac paralysis.	Evacuate; chalk, milk, or albumin; demulcent drinks.
Acid, Hydrochloric (*Muriatic*).	Corrosive.	Pain throughout digestive tract; vomiting, feeble pulse, clammy skin, collapse; eschars externally; yellow stains on clothing, but none on skin.	℥j.		Alkalies; demulcent drinks; oil; stimulants (intravenous injection).
Acid, Hydrocyanic (*Prussic*).	Hyposthenisant.	Dyspnea, vomiting, purging, spasms, rigidity, cessation of heart's action; characteristic odor.	gr. ½.	Asphyxia.	Dilute ammonia; opium, to relieve pain; alternate cold and warm affusions; atropin and heart-stimulants; artificial respiration.
Acid, Lactic.	Corrosive.	Violent irritation of alimentary canal.			Alkalies and demulcents.
Acid, Nitric.	Corrosive.	Yellow stains on skin; otherwise similar to *Acid, Sulphuric*.			Alkalies; demulcents; soap; stimulants.
Acid, Nitrohydrochloric.	Same as *Acid, Nitric*.				
Acid, Oxalic.	Corrosive.	Hot, acrid taste; burning, vomiting, collapse.	℥j.	Paralysis of respiration and of heart.	Lime or chalk.
Acid, Pyrogallic.	Corrosive.	Vomiting, diarrhea, rigors, fever, black urine, great dyspnea.	Over ℥j.	Formation of thrombi.	Mineral acids; alkalies; salts of iron.
Acid, Salicylic.	Corrosive.	Mydriasis; quick and deep respiration; delirium; dyspnea; lessened arterial pressure; deafness.	Recovery from ℥jss.	Respiratory paralysis.	
Acid, Sulphuric.	Corrosive.	Black stains; pain throughout digestive tract, vomiting, feeble pulse, clammy skin, profuse and bloody salivation.	℥j.	Asphyxia.	Chalk; magnesia; soap; demulcent drinks.
Acid, Sulphurous.	Pulmonary irritant.	Cough, bloody expectoration, pulmonary inflammation.			Air; cold to head; artificial respiration; bleeding.
Acid, Tartaric.	Irritant.	Pain in abdomen; vomiting, etc.	℥ss.		Magnesia; lime; soap.

Aconitum (*Aconite*).		feeble.	3j of the tincture.		stimulants; artificial respiration; warmth and friction.
Actæa spicata (*Baneberry*).	Narcotic.	Vomiting; diarrhea; cardiac depression; faintness; dizziness; foul breath; dryness of pharynx.		Cardiac paralysis.	Heart-stimulants.
Agaricus. See *Fungi*.					
Alcohol.	Inebriant.	Confusion of thought, giddiness, tottering gait, flushing, lips livid, convulsions, coma, death often hours or even days after apparent recovery.		Paralysis of heart.	Evacuate; coffee; battery; amyl nitrite; hot and cold douche.
Aloë spicata (*Aloes*).	Simple irritant.	Tenesmus, weight in pelvis, profuse diarrhea.			
Amanita muscaria (*Truffles*). See *Fungi*.					
Ammonium and its compounds.	Corrosive.	Burning pain in the mouth, chest, and stomach; lips and tongue swollen and covered with detached epithelium; violent dyspnea; hematemesis; characteristic odor.	3ij of ammonia.	Asphyxia.	Vegetable acids; demulcents.
Amygdalus communis (*Bitter Almond*).		Similar to *Acid, Hydrocyanic, q. v.*			
Amyl Nitrite.		Throbbing headache, flushed face, sense of heat, tumultuous heart's action; diminished sensibility, mobility, and reflexes.	Recovery from 12 grams.	Paralysis of respiratory centers.	Evacuate; air; recumbent position; artificial respiration; stimulants; strychnin; ergot; digitalis.
Amylene Hydrate.	Anesthetic.	Sleep and coma.		Paralysis of medulla.	Remove vapor; air; stimulants; artificial respiration.
Anilin.		Giddiness, apparent intoxication, sweating, blue color of mucous membrane of mouth; odor of anilin; coma.	3vj.	Asphyxia.	Removal of cause; stimulation; oxygen; artificial respiration.
Antifebrin. See *Acetanilid*.					
Antimony and its compounds.	Corrosive.	Metallic taste, violent vomiting, pain and burning in the stomach, purging, dysphagia; cramps; thirst; great debility.	Tartar emetic gr. 1½.	Paralysis of the heart.	Tannic acid; demulcent drinks; opium; alcohol; ether.
Antipyrin (*Phenazon*).	Corrosive.	Headache, vertigo, drowsiness, deafness, confusion of ideas, cyanosis, collapse.			Recumbent position; warmth; strychnin; stimulants; oxygen; artificial respiration.
Apocynum androsalmifolium (*Dogsbane*).	Narcotic.	Vomiting, nausea, drowsiness.			Evacuate; stimulants.
Apomorphin.	Emetic.	Violent vomiting, paralysis of motor and sensory nerves, delirium, depression of respiration, heart-depression.	gr. $\frac{1}{16}$, hypodermatically, in weak adult.	Cardiac failure.	Cardiac and respiratory stimulants.
Aristolochia clematis (*Birthwort*).	Acronarcotic.	Nausea; griping pains in the bowels; vomiting; dysenteric tenesmus.			Evacuate; demulcent drinks.
Arnica montana (*Leopardsbane*).	Cardiac depressant.	Transient excitement, headache, unconsciousness, pupils dilated, paralysis of the nervous system, collapse.		Paralysis of the nervous system.	Cardiac stimulants.
Arsenic and its compounds.	Corrosive.	Violent burning pain in the stomach, retching, thirst, diarrhea, tenesmus, burning in the urinary organs with suppression of urine; sense of constriction with dryness in throat; pulse small and frequent.	Arsenious acid gr. ij.		Hydrated sesquioxid of iron; precipitated carbonate of iron; emetics; demulcents.
Artemisia absinthium (*Absinthe*).		Tremor, stupor, epileptiform convulsions, involuntary evacuations, stertorous breathing.	Recovery from ℥ss of the oil.		Emetics; stimulants; demulcents.

TABLE OF POISONS.—*Continued.*

Name.	Character of Poison.	Symptoms of Poisoning.	Fatal Dose.	Mode of Producing Death.	Treatment and Antidotes.
Asclepias syriaca (*Swallowwort*).	Acronarcotic.	Purging; weak pulse.		Heart-depressant.	Heart-stimulants.
Aspidium (*Male Fern*).	Gastro-intestinal irritant.	Vomiting, purging, great pain in the abdomen, collapse; giddiness; coma; amaurosis; cramp in extremities.	Extract ℥jss.		Evacuate; stimulants.
Atropa belladonna (*Deadly Nightshade*). Atropin. Belladonna. Homatropin.	Deliriant.	Heat and dryness of the mouth and throat; suppression of saliva, difficulty in swallowing; great thirst, indistinct vision, pupils widely dilated, noisy delirium; skin dr with perhaps a rash.	Atropin gr. ij; belladonna liniment ℥j.	Paralysis of the heart.	Evacuation; stimulants; coffee; pilocarpin; artificial respiration; physostigmin may be of benefit.
Barium and its compounds.	Corrosive.	Pain in the abdomen, purging, vomiting, feeble pulse, short and labored breathing, cramps, convulsions, collapse.	Of the chlorid, one teaspoonful.		Evacuate; Glauber's or Epsom salts; dilute sulphuric acid; warmth.
Bitter Almond (*Amygdalus*).		Similar to *Acid, Hydrocyanic, q. v.*			
Bittersweet. See *Solanum.*					
Bloodroot. See *Sanguina*	*ria.*				
Boric Acid. See *Acid.*					
Bromin and its compounds.	Depressants.	Respiration and heart's action lessened; reflexes sluggish; diminished sensibility; motility and sexual function impaired; acne; fetid breath; mental faculties impaired.	℥j of bromin.	Cardiac and muscular paralysis.	Heat; stimulants; digitalis; ergot; atropin; strychnin; artificial respiration.
Brucea antidysenterica (*False Angostura Bark*).	Acronarcotic.				
Brucin. See *Strychnin.*					
Bryonia dioica (*Bryony*).	Simple irritant.	Giddiness, delirium, vomiting, diarrhea, with watery motions, dilated pupils, coma.		Heart-depression.	Emetics; mustard; salt; ipecacuanha; stimulants, freely.
Caffea arabica. See *Caffein.*					
Caffein.		Burning pain in the throat, giddiness, faintness, nausea, numbness, abdominal pain, great thirst, dry tongue, tremor of extremities, diuresis, weak pulse, cold skin, collapse.		Paralysis of respiration.	Emetics; stimulants; warmth; morphin and atropin.
Calabar Bean. See *Physostigma.*					
Caladium seguinium (*Dumbcane*).	Irritant.				Evacuate; demulcent drinks; cardiac stimulants.
Calcium. See *Lime.*					
Camphine. See *Turpentine.*					
Camphor.	Inebriant.	Characteristic odor; languor, giddiness, disturbance of vision, delirium, convulsions, clammy skin, smarting in the urinary organs, pulse quick and weak; no pain, no vomiting, no purging.	℥ss.	Asphyxia.	Evacuate; stimulants; warmth; hot and cold douches.
Cannabis indica (*Indian Hemp*).	Inebriant.	Pleasurable intoxication; sense of prolongation of time; increased sexual desire; pupils dilated; catalepsy.			Strychnin; faradization; evacuate; stimulants.

(*Spanish Fly*).		stools; vomiting, the vomit containing shining particles of the powder; incessant desire to pass water, but only a little blood or albuminous urine passed at each attempt; priapism, strangury, abortion, convulsions, coma, and insensibility.	der; 3j of the tincture.	ratory centers.	phin.
Carbolic Acid. See *Acid.*					
Carbon Bisulphid.		Headache, vertigo, nervous excitement, anesthesia with great muscular rigidity, characteristic odor of breath, urine, and feces.	3ss.	Paralysis of the respiratory centers and of the heart.	Evacuate; stimulants; warmth; artificial respiration.
Castor-oil. See *Ricinus.*					
Cerbera.	Acronarcotic.	Purging.			Evacuate; demulcent drinks.
Chærophyllum sylvestra (*Bastard Hemlock*).	Acronarcotic.				
Chaillotia toxicana (*Ratsbane*).	Acronarcotic.				
Chelidonium majus (*Celandine*).	Irritant and depressant.	Catharsis; vomiting; cardiac debility.		Paralysis of the heart.	Evacuate; heart-stimulants.
Chenopodium ambrosioïdes (*Wormseed*).	Acronarcotic.				
Cherry Laurel. See *Prunus.*					
Chloral Hydrate.	Anesthetic.	Deep sleep, loss of muscular power, lividity, reflexes diminished, pulse weak, respirations slowed, pupils contracted during sleep, but dilated on waking, temperature low.	20 grs.	Arrest of respiration or paralysis of the heart.	Evacuate; heat to the extremities; massage; coffee per rectum; strychnin; rousing; amyl nitrite; artificial respiration.
Chlorin.	Irritant.	Irritation of the throat, cough, tightness across chest, inability to swallow.		Asphyxia.	Air; steam-inhalations; dilute ammonia-inhalations; ether or chloroform.
Chlorodyne—Compound of *Opium, q. v.*					
Chloroform.	Anesthetic.	Two methods of introduction, inhalation and swallowing; symptoms in latter case delayed. 1, slight stimulation; 2, excitement and incoherence; 3, insensibility and relaxation.	3 drops vapor; 3j swallowed.	Usually paralysis of the heart.	Draw tongue forward; air; artificial respiration; faradic current; hot and cold douche; amyl nitrite; atropin.
Chromium and its compounds. See *Acid, Chromic.*					
Cicuta maculata (*American Hemlock*).	Acronarcotic.	Similar to those of *Conium, q. v.*			
Cicuta virosa (*Water Hemlock*).	Acronarcotic.	Similar to those of *Conium, q. v.*			
Cissus.	Acronarcotic.				
Citric Acid. See *Acid.*					
Clematis vitalba (*Virgin Bower*).	Irritant and vesicant.				
Coal-gas.	Asphyxiant.	Headache, giddiness, loss of muscular power, unconsciousness, pupils dilated, breathing labored, coma, odor of the gas.		Asphyxia.	Air; artificial respiration; ammonia; stimulants; oxygen; coffee; hot and cold douches.

TABLE OF POISONS.—*Continued.*

NAME.	CHARACTER OF POISON.	SYMPTOMS OF POISONING.	FATAL DOSE.	MODE OF PRODUCING DEATH.	TREATMENT AND ANTIDOTES.
Cocain.	Deliriant.	Faintness, giddiness, nausea; pulse small, rapid, and intermittent; severe prostration; respiration slow and feeble.	22 grs. by mouth; ⅔ gr. hypodermatically.	Spasm of heart and muscles of respiration.	Stimulants; amyl nitrite.
Cocculus indicus (*Fish-berries*). Picrotoxin.	Inebriant.	Nausea, vomiting, muscular debility, somnolence, sometimes convulsions, occasionally scarlatinal rash.		Paralysis of heart in diastole.	Evacuate; chloral hydrate; bromid of potassium.
Colchicum autumnale (*Meadow Saffron*).	Depressant.	Not unlike those of malignant cholera; burning pain in the stomach, vomiting and purging, stools mixed with blood, intense thirst, great prostration; pinched face, profuse perspiration, dilated pupils; pain in the extremities.	℥iijss of the wine.	Paralysis of the respiratory centers.	Evacuate; tannic or gallic acid; demulcent drinks; stimulants; morphin.
Colocynth.	Simple irritant.	Persistent vomiting and purging, exhaustion, cold extremities, weak pulse, collapse.	℥jss.		Evacuate; camphor, opium; stimulants; demulcent drinks; warmth.
Conium maculatum (*Hemlock*).	Paralyzant.	Weakness of the legs, gradual loss of all voluntary power, pupils dilated and fixed, loss of sight, inability to swallow.		Paralysis of the respiratory muscles.	Evacuate; tannic or gallic acid; stimulants; warmth; artificial respiration; atropin.
Convallaria majalis (*Lily of the Valley*).		Similar to *Digitalis*, *q. v.*		Cardiac paralyzant; arrests heart in systole.	
Convolvulus jalapæ. See	*Jalap.*				
Convolvulus scammonii.	See *Scammony.*				
Copper and its salts.	Specific irritants.	Metallic taste in mouth, griping and colicky pains, nausea and vomiting, purging with straining, jaundice, hurried breathing, small, rapid pulse, weakness, thirst, giddiness, coma.	℥j of the sulphate or acetate.		Evacuate; barley-water; morphin poultices to abdomen.
Coriaria myrtifolia (*Myrtle-leaved Sumach*). See	*Sumach.*				
Creasote.		Similar to *Acid, Carbolic*, *q. v.*			
Croton tiglium (*Croton-oil*).	Simple irritant.	Intense pain in the abdomen, vomiting, purging, watery stools, pinched face, small and thready pulse, moist skin, collapse.	20 drops.		Evacuate; demulcent drinks; camphor; stimulants; morphin; poultices to abdomen.
Cubebs.		Nausea, vomiting, colicky pains; in some cases purging; in some an eruption resembling urticaria.			
Cucumis colocynthis. See	*Colocynth.*				
Curare (*Indian War-poison*).	Paralyzant.	Complete paralysis of the voluntary muscles, slowing of the heart, gradually diminished respiration.		Arrest of the respiratory movements.	Artificial respiration; stimulants; ligate and wash wound; evacuate bladder frequently.
Cyanogen and its compounds.		Similar to *Acid, Hydrocyanic*, *q. v.*			
Cyclamen europæum (*Sow-bread*).	Irritant.	Inflammation of the alimentary canal; bloody stools; cold sweats; convulsive movements.			Evacuate; opium; poultices to abdomen.
Cynanchum erectum (*Cynanchum*	Acronarcotic.				

num).		Coma or tetany; purging, vomiting, great restlessness; drowsiness and insensibility, convulsive twitchings.		Asphyxia.	Evacuate; stimulants; coffee per rectum; hot and cold douches.
Daphne gnidium (*Sponge Flax*).	Irritant.	Pain; vomiting; purging.			Evacuate; demulcent drinks; heart-stimulants.
Daphne mezereum (*Mezereon*). See *Mezereon.*					
Datura stramonium (*Thorn-apple, Jamestown Weed*).		Symptoms and treatment similar to those of *Atropin, q. v.*			
Delphinium staphisagria (*Stavesacre*). See *Staphisagria.*	*phisagria.*				
Digitalis purpura (*Foxglove*).	Depressant.	Purging, with severe pain, vomiting of matter of a grass-green color; pulse small, slow, and irregular; headache; lethargy followed by delirium and convulsions; pupils dilated, skin cold, coma, death suddenly.	3ix of tincture.	Heart-paralysis.	Evacuate; tannic and gallic acids; stimulants; aconite; recumbent position.
Dinitro-benzin. See *Nitrobenzin.*	*benzin.*				
Dog-bite. See *Saliva.*					
Duboisia (probably identical with *Hyoscyamus*).	See *Hyoscyamin.*				
Elaterium (*Elaterin*).	Simple irritant.	Purging, vomiting, salivation, prostration, clonic spasms; dyspnea.	½ gr. elaterin.		Emetics; stomach-pump; demulcent drinks; opium.
Equisetum hyemale (*Scour-grass*).	Irritant.				
Ergot.	Abortive.	Tingling in the fingers and feet, cramps in the extremities, dizziness, weakness, pupils dilated, pulse small, vomiting, retching, and diarrhea.			Evacuate, quick purgatives, castor-oil or Epsom salts; tannic or gallic acid; recumbent position; stimulants; amyl nitrite.
Ervum ervilia (*Bitter-vetch*).	Acronarcotic.				
Erythroxylon coca. See *Cocain.*	*Cocain.*				
Eserin. See *Physostigma.*					
Ether.	Anesthetic.	Sense of strangulation; cough, stage of excitement (*cerebral intoxication*). Tetanic convulsive stage, complete insensibility, muscles relaxed, reflexes abolished, cerebral functions suspended.		Paralysis of respiration.	Withdraw vapor; lower the head; draw tongue forward; atropin; artificial respiration; amyl nitrite; ammonia; warmth.
Ethidene Dichlorid.	Anesthetic.	Stertorous breathing, dilated pupil, pleasant dreams, depression of pulse.			Remove vapor; draw tongue forward; artificial respiration; lower the head.
Ethyl Bromid.		Very similar to those of *Chloroform, q. v.*			
Euphorbia officinarum (*Euphorbia Spurge*).	Irritant.	Pain; nausea; vomiting; purging; weak pulse.		Paralysis of cardiac and respiratory centers.	Evacuate; heart-stimulants.
Exalgin.		Numbness and tingling, cyanosis, salivation, vomiting, intense dyspnea, feeling of alternate expansion and contraction of the head.	Recovery from 5 grs.	Paralysis of respiration.	Emetics; strychnin; stimulants.
Filix mas (*Male Fern*). See *Aspidium.*	*Aspidium.*				

TABLE OF POISONS.—*Continued.*

Name.	Character of Poison.	Symptoms of Poisoning.	Fatal Dose.	Mode of Producing Death.	Treatment and Antidotes.
Fish, Poisonous. (Several kinds of fish, particularly shell-fish, are constantly poisonous, while some are so only to particular constitutions.)	Irritant.	Nausea, vomiting, irritation of eyes, depression, severe urticaria, or nettle-rash.			Evacuate; quick purgative; stimulants.
Fish-berries. See *Cocculus.*					
Fly, Spanish. See *Cantharis.*					
Foxglove. See *Digitalis.*					
Fungi. (Several forms of fungi, known as mushrooms, toadstools, truffles, etc., are directly poisonous.)	Inebriant.	Gastro-intestinal catarrh, nausea, heat and pain, vomiting and purging, fainting, convulsions, small and frequent pulse; pupils dilated; delirium, stupor, death.			Evacuate; quick purgative; Glauber's or Epsom salts; stimulants.
Fusel-oil.	Irritant.	Rigidity of muscles, respiration shallow and slow, pupils small, odor of breath resembling amyl nitrite.			Evacuate; heart stimulants.
Gamboge.	Irritant.	Violent irritation of alimentary canal; vomiting; griping.			Evacuate; demulcent drinks; opium.
Gaultheria procumbens (*Wintergreen*).		Very similar in action to *Acid. Salicylic, q. v.*			
Gelsemium sempervirens (*Yellow Jessamine*).	Hyposthenisant.	Pain in brows and eyeballs; dimness of vision, ptosis, diplopia, staggering, pain in chest, suffocation, spasm, foaming at mouth, coma.	3iij fld. extract.	Paralysis of the respiratory centers.	Evacuate; atropin; stimulants; artificial respiration; hot and cold douche.
Glass.	Irritant.	Purely irritant; may have hematemesis.			Bread in crumbs, then emetic.
Gold.	Irritant.	Causes a pink stain upon the skin.			Sulphate of iron; albumin; evacuate.
Gratiolus officinalis (*Hedge-hyssop*).	Irritant.	Violent purging; pain.			Evacuate; demulcent drinks.
Hedeoma (*Pennyroyal*).	Abortive.	Unconsciousness, extremities cold, pulse small, pupils slightly dilated, vomiting, delirium, opisthotonos.	Recovery from 3j of oil.		Evacuate.
Hellebore, Green and White. See *Veratrum.*					
Helleborus niger (*Black Hellebore*).	Specific irritant.	Resemble malignant cholera; abdominal pain, vomiting, purging, vertigo, cold sweats, and collapse.	3ss aqueous ext.	Paralysis of heart.	Stomach-pump; tannin; mucilaginous drinks; heart-stimulants.
Hemlock. See *Conium.*					
Henbane. See *Hyoscyamus.*					
Holly Berries (*Ilex aquifolium*).		Vomiting, pain in the head and abdomen, purging, contraction of pupils, loss of consciousness, collapse.			Evacuate; stimulants; warmth; coffee.
Homatropin. See *Atropa.*					
Hura crepitans (*Sandbox*).	Irritant.	Irritation of alimentary tract; vomiting; purging.			Evacuate; demulcent drinks; opium.

Hyoscyamus albus (*White Henbane*). Hyoscyamus niger (*Black Henbane*). Hyoscyamin, Hyoscin.	Deliriant.	Giddiness, sense of weight in head, general loss of power, pupils dilated, diplopia, presbyopia, flashes of light, incoherence of speech, delirium, insensibility, coma.	Not known.	Paralyzes respiration.	Evacuate; quick purgatives.
Insects, Poisonous. (The bite or sting of several varieties of insects is poisonous.)		In most cases slight; in cases of tarantula and scorpion may be more serious; pain, swelling, fever, erysipelas, suppuration, and gangrene, with death.			In *milder* cases ammonia, soap, or other alkali to the wound. In *graver* cases similar to that of snake-bite, *q. v.*
Iodin and its compounds.	Specific irritant.	Pain in throat and stomach; vomiting, purging; vomit yellow from iodin, or blue if starch be present in the stomach; giddiness, faintness, convulsive movements.	℥j of the tincture.	Paralysis of the heart.	Evacuate; starch; amyl nitrite; morphin.
Iodoform.		Slight delirium; drowsiness; emaciation; high temperature, rapid pulse; resembles meningitis.			Wash wound with oil of eucalyptus.
Ipecacuanha(*Ipecacuanha*).	Irritant.	Vomiting, hematemesis, and hemoptysis.			Evacuate.
Iron and its compounds.	Simple irritants.	Metallic taste, pain, vomiting, and purging; vomited matter black.	℥ss of tincture of the chlorid.		Magnesia and diluents; ice and opium.
Jaborandi. Pilocarpin.		Copious sweating, dizziness, salivation, vomiting, diarrhea, tearing pain in eyeballs, myopia, pupils much contracted.			Evacuate; stimulants; atropin or belladonna.
Jalap.	Simple irritant.	Copious watery stools, tormina, and tenesmus.			Evacuate; demulcent drinks.
Jamaica Dogwood. See	*Piscidia.*				
Jatropha curcas (*Indian Nut*).	Irritant.	Purging; vomiting.			Evacuate; demulcent drinks.
Jatropha manihot (*Cassada*).	Irritant.	Same as those of *Prussic Acid*, *q. v.*			
Jequirity. (Contains probably a ferment which is poisonous when introduced into the blood.)					
Juniperus sabina. See	*Savin.*				
Juniperus virginiana (*Red Cedar*).	Irritant.	Gastritis; nephritis; strangury; nervous disturbances; violet-like odor in urine; copaiba-like erythema.			Evacuate; demulcent drinks; stimulants.
Lactic Acid. See	*Acid.*				
Lactuca virosa (*Strong-scented Lettuce*).	Narcotic.	Somewhat similar to those of *Opium*, *q. v.*			
Laudanum. See	*Opium.*				
Laurus camphora. See	*Camphor.*				
Lead and its compounds.	Specific irritants.	Dryness of the throat, metallic taste, great thirst, colic relieved by pressure, abdominal muscles usually rigid, constipation, cramps in the legs, paralysis of the extremities, convulsions; in the chronic forms, a blue line at margin of the gums.			Evacuate; dilute sulphuric acid; Epsom and Glauber's salts; milk; morphin; iodid of potassium to eliminate the poison; poultices to the abdomen.

Name.	Character of Poison.	Symptoms of Poisoning.	Fatal Dose.	Mode of Producing Death.	Treatment and Antidotes.
Lime.	Simple irritant.	Burning pain in the abdomen, great thirst, obstinate constipation.			Vegetable acids; demulcent drinks.
Lobelia inflata (*Indian Tobacco*).	Depressant.	Severe vomiting, with intense depression and prostration, giddiness, tremors, convulsions, collapse, death.	℥j of powdered leaves.	Paralysis of respiration.	Evacuate; tannic or gallic acid; stimulants; strychnin; warmth; recumbent position.
Lolium temulentum (*Darnel*).	Acronarcotic.	Vertigo; dizziness; headache; sleepiness.			
Lytta vittata (*Potato-fly*).		Similar to those of *Cantharis, q. v.*			
Male fern. See *Aspidium.*					
Meat. (Putrefactive changes in meat and some other forms of food produce active poisonous agents known as ptomains. See *Table of Ptomains*, page 1210.)		Gastro-intestinal irritation sometimes very marked; occasionally death.			Evacuate; irrigate stomach; sedatives; supportive treatment when prostration.
Melia azedarach (*Pride of China*).	Acronarcotic.	Giddiness, dimness of vision, stertorous breathing, dilated pupils, stupor.			
Mercury and its compounds.	Specific irritant.	Acrid metallic taste, burning heat in throat and stomach, vomiting, diarrhea, with bloody stools, lips and tongue white and shriveled, pulse small and frequent, death in coma or convulsions; pain may be absent. Secondary symptoms: hectic fever, coppery taste, fetid breath, gums swollen, salivation.	3 grs. of corrosive sublimate.		Albumin in some form; raw white of egg or flour; evacuate; potassium iodid, opium.
Methylene Bichlorid.	Anesthetic.	Symptoms and treatment similar to those of *Chloroform, q. v.*			
Mezereon.	Simple irritant.	Violent purging, vomiting, nephritis, and gastro-enteritis; an exceedingly powerful local irritant.			Evacuate; aperient and demulcent drinks; opium.
Milk. See *Tyrotoxicon.*					
Momordica elaterium (*Squirting Cucumber*).	See *Elaterium.*				
Morphin. See *Opium.*					
Mushrooms. See *Fungi.*					
Mussel. See *Fish.*					
Mydalin. See *Meat.*					
Myristica fragrans (*Nutmeg*).		Thirst; tightness in the chest; vomiting.	Recovery from 1½ nutmegs.		Coffee and stimulants.
Mytilotoxin (*Mussel-poison*). See *Fish.*					
Naphthalin.		Cyanosis, twitching over body, urine dark-brown changing to inky black, strangury.			Demulcent drinks; stimulants.

Narcein. See *Opium.*					
Narcissus pseudonarcissus (*Daffodil*).	Irritant.				Evacuate; demulcent drinks; stimulants.
Nerium oleander (*Oleander*).	Acronarcotic and cardiac depressant.	Similar to those of *Strophanthus, q. v.*			
Neurin. See *Meat.*					
Nicotiana tabacum. See	*Tobacco.*				
Nightshade. See *Atropa.*					
Niter (*Potassium Nitrate*). See also *Potassium and its compounds.*	Simple irritant.	Pain in the abdomen, vomiting, coldness in the limbs, partial paralysis, tremors, convulsions, collapse.	ʒj.	Paralysis of the heart.	Evacuate; mucilaginous drinks; stimulants; warmth; amyl nitrite; atropin.
Nitric Acid. See *Acid.*					
Nitrobenzin. Nitrobenzol.	Inebriant.	May be delayed; weariness, numbness in the head, confusion, marked cyanosis, lips nearly black, convulsions, pupils dilated.	8 to 9 drops.	Asphyxia.	Cold to head; dilute ammonia; hydrated oxid of iron; stimulants; artificial respiration.
Nitroglycerin.		Throbbing headache; pulsation over entire body, dicrotic pulse, flushed face, mental confusion, anxiety, sudden collapse.	Two mouthfuls of crude drug.	Respiratory paralysis.	Recumbent position; cold to head; ergot; atropin.
Nitrohydrochloric Acid.	See *Acid.*				
Nitrous Oxid.	Anesthetic.			Respiratory paralysis.	Pull tongue forward; air; artificial respiration; douche; oxygen.
Nux vomica. See *Strychnos.*					
Opium. Morphin. Narcein. Codein. Laudanum.	Narcotic.	Preliminary mental excitement, acceleration of heart; soon headache, weariness, sensation of weight in the limbs, sleepiness, diminished sensibility, contracted pupils; patient can be roused with difficulty; later this becomes impossible; reflexes abolished, jaw falls; respiration slow, irregular, and stertorous; pulse weak and compressible.	Extract 2½ grs. Powd. op. 4 grs. Hydrochlorate morph. 1 gr. Laudanum ʒj.	Respiratory paralysis.	Evacuate; apomorphin; rousing; ammonia; coffee; douche; atropin; amyl nitrite; artificial respiration; battery; strychnin; potassium-permanganate; oxygen.
Oxalic Acid. See *Acid.*					
Papaver somniferum (*Poppy*). See *Opium.*					
Paraldehyd.		Similar to chloroform-narcosis.	Recovery from ʒiijss.	Paralysis of respiratory center.	Respiratory stimulants; coffee; atropin; battery.
Paris Green. See *Arsenic.*					
Peach-kernel—contains *Acid, Hydrocyanic, q. v.*					
Petroleum.		Burning in course of alimentary tract; excreta covered with layer of oil; skin cold; pulse feeble, but regular; respiration sighing; thirst; restlessness.			Evacuate; stimulants; warmth; stimulation of skin; artificial respiration.
Phenacetin.		Very similar to *Antipyrin* and *Antifebrin, q. v.*			
Phosphorus.	Specific irritant.	Vomiting and pain; vomit may be luminous in the dark; characteristic odor; weakness of the heart's action; tendency to hemorrhage; coma or delirium; albumin in the urine.	1½ gr.	Failure of respiration and circulation.	Sulphate of zinc or copper; Epsom salts; *never give oil or fat.*

NAME.	CHARACTER OF POISON.	SYMPTOMS OF POISONING.	FATAL DOSE.	MODE OF PRODUCING DEATH.	TREATMENT AND ANTIDOTES.
Physostigma venenosum (*Calabar Bean*). Eserin.	Paralyzant.	Giddiness; prostration; loss of power in the lower limbs; muscular twitching; contracted pupils; mind clear.	19 seeds.	Asphyxia.	Evacuate; atropin; chloral; strychnin; stimulants; artificial respiration.
Phytolacca decandra (*Poke*).	Paralyzant.	Nausea; vomiting; depression; heart, as well as respiration, slowed; tetanic convulsions.	6 berries; recovery from f℥ij.	Paralysis of respiration.	Evacuate; alcohol; opium; ether; digitalis.
Picrotoxin. See *Cocculus*.					
Pilocarpin. See *Jaborandi*.					
Pinkroot. See *Spigelia*.					
Piper cubeba. See *Cubeb*.					
Piscidia erythrin (*Jamaica Dogwood*).		Muscular relaxation; accelerated pulse; lowered sensibility; dilated pupils; deep sleep.	Recovery from ℥j of the tincture.	Asphyxia.	Same as for *Opium*, *q. v.*
Pituri.		Slightly narcotic; powerful respiratory poison.			Similar to *Atropin*, *q. v.*
Plumbago europa (*Toothwort*).	Irritant.	Violent emesis.			Evacuate; demulcent drinks; heart-stimulants.
Poison-oak. Poison-vine. } See *Rhus*.					
Poke-berries. See *Phytolacca*.					
Polygala venenosa.	Acronarcotic.				
Poppy. See *Opium*.					
Potassium and its compounds.		The hydrate produces the symptoms of other caustic alkalies, *e. g.*, lime; the other poisonous compounds are to be classed under their various acids.	40 grs. of the hydrate.		*For caustic potash:* Vegetable acids; demulcent drinks.
Potato-fly (*Lytta vittata*).	See *Cantharis*.				
Privet (*Ligustrum vulgare*).	Irritant.	Purging; intestinal inflammation.			Hot water in large draughts; warmth; stimulants.
Prunus laurocerasus (*Cherry Laurel*). Prunus virginiana (*Wild Cherry*).		Both contain *Acid, Hydrocyanic*, *q. v.*			
Prussic Acid. See *Acid, Hydrocyanic*.					
Ptomains. See *Meat*, and also *Table of Ptomains*.					
Pulsatilla.		Lowers heart's action, reduces respiration and temperature; dilates pupils; paralyzes motion and sensibility.		Paralysis of heart.	Alcohol; opium; digitalis.
Pyrogallic Acid. See *Acid*.					
Resorcin.		Giddiness, tingling; insensibility, profuse perspiration; tongue dry; pupils normal; teeth clenched, temperature low; urine black.	Recovery from ℥ij.	Paralysis of respiration.	Evacuate; albumin; stimulants; warmth; atropin; amyl nitrite; red wine.

Rhus radicans (*Poison-vine*). Rhus toxicodendron (*Poison-oak*).	Irritant.	Cutaneous irritation; itching, swelling, vesicular eruption; may involve the throat, producing cough; thirst, vomiting, colicky pains, fever, delirium.			Grindelia robusta locally; also carron-oil and solution of acetate of lead; rest; low diet; laxatives; opium.
Ricinus communis (*Castor-oil*).	Simple irritant.	Burning, nausea, vomiting, colicky pains, small pulse, great prostration; purging may or may not occur.	3 seeds.		Evacuate; morphin, hypodermatically; warmth; stimulants; starch and opium enemata.
Rue. Ruta graveolens (*Rue*).		Violent gastro-enteritis, extreme prostration, convulsions, strangury, suppression of urine.			Evacuate; demulcent drinks; diuretics; heart stimulants.
Salicylic Acid. See *Acid.*					
Saliva of Rabid Animals.		Rarely come on in less than three weeks; may occur between that and years; pain in the bitten part; uneasiness, languor, difficult respiration, difficulty in swallowing, horror of water; violent convulsions; tongue swollen and often protruding; flow of viscid saliva.			*Preventive:* Immediate ligature above wound; excision; cautery; inoculation. *Of hydrophobia:* Chloroform internally; morphin hypodermatically; cocain to throat; nutritive enemata.
Sambucus canadensis (*Elder*).	Irritant.	Emesis; purging.			Demulcent drinks; evacuate.
Sanguinaria canadensis (*Bloodroot*).		Salivation, catharsis, and vomiting, reflexes lowered; pupils dilated; temperature low; great thirst; collapse.		Paralysis of the cardiac and respiratory centers.	Evacuate; opium; amyl nitrite; atropin.
Santonin.	Irritant.	Disturbance of color-vision—objects first assume a bluish tinge, then yellow; singing in ears; dizziness; pain in the abdomen; convulsions; stupor.	gr. ij, to a child.	Asphyxia.	Evacuate; stimulants; chloral.
Savin.	Abortive.	Pain, vomiting, violent straining at stool, coma, and convulsions.			Evacuate; castor-oil in large dose; morphin; poultices to the abdomen.
Scammony.	Irritant.	Vomiting, purging, griping, tenesmus.			Evacuate; stimulants.
Scilla maritima (*Squill*).		Vomiting, purging, strangury, bloody urine, paralysis, and convulsions.		Paralysis of heart in systole.	Evacuate; demulcent drinks; diuretics; stimulants.
Secale cornutum. See *Ergot.*					
Sedum acre (*Stone-crop*).	Irritant and vesicant.	Vomiting and purging.			Evacuate; stimulants.
Silver and its salts.	Simple irritant.	Pain, vomiting, and purging; vomit white and cheesy, rapidly turning black in the sunlight; cramps; cardiac depression; collapse.		Paralysis of respiration.	Salt and water; evacuate; albumin.
Sium latifolium (*Procumbent Water Parsnip*).	Acronarcotic.				
Snake-bite. (The bite of many varieties of serpents is directly poisonous.)		Vary in severity, but are, in the main, sharp pain in the bitten part, rapidly spreading; great swelling of the wounded member, which becomes livid and gangrenous later; fainting, vomiting, and convulsions; pulse small, frequent, and irregular; breathing difficult.		Paralysis of cardiac and respiratory centers.	Removal of poison by sucking or cupping; ligature above wound; cautery or excision; ammonia to wound and internally; warmth; in some cases large doses of ammonia or whisky internally; transfusion of blood.
Soda (Sodium).	Corrosive.	Symptoms and treatment similar to those of other caustic alkalies, as *Lime, q. v.*			
Solanum dulcamara (*Bittersweet*).	Deliriant.	Thirst, headache, giddiness, dimness of vision, dilated pupils, convulsions, vomiting, purging.		Asphyxia.	Evacuate; stimulants; warmth.
Sorbus acuparia (*Mountain Ash*).	Narcotic.				Same as for *Opium, q. v.*

Name.	Character of Poison.	Symptoms of Poisoning.	Fatal Dose.	Mode of Producing Death.	Treatment and Antidotes.
Spanish Fly. See *Cantharis.*					
Spigelia marilandica (*Pink-root*).	Narcotic.	Vertigo, dimness of vision, dilated pupils, spasms, convulsions; delirium; dryness of throat.			Evacuate; stimulants; coffee.
Squill. See *Scilla.*					
Stalagmitis cambogioïdes.	See *Gamboge.*				
Staphisagria.		Heart slow and feeble; breathing difficult; pupils dilated; abdomen distended and painful.	Recovery from ʒjss.	Paralysis of spinal cord and asphyxia.	Cardiac and respiratory stimulants.
Stavesacre. See *Staphisagria.*					
Strophanthus (*Arrow-poison*). Strophanthin.	Muscle-poison and cardiac depressant.	Weakness of pulse; increase of urine; rigidity of the muscles; spasms.	Of *Strophanthus:* Over 1 gr. Of *Strophanthin:* gr. ss.	Paralysis of the heart in systole.	Cardiac stimulants.
St. Ignatius Bean. Strychnos ignatii. Strychnos nux vomica (*Nux vomica*). Nux vomica. Strychnin. Brucin.	Convulsant.	Tetanic convulsions coming on in paroxysms at varying intervals of from five minutes to half an hour; opisthotonos during paroxysm; eyeballs prominent; pupils dilated, respiration impeded, pulse feeble and rapid; anxiety.	Powd. nux vomica ʒss. Ext nux vomica gr. iij. Strychnin gr. iij; gr. ss sometimes fatal; gr. $\frac{1}{2}$ may kill a child.	Asphyxia during paroxysm, or collapse.	Evacuate; animal charcoal or tannic acid ad lib.; follow with emetic; catheterize; keep patient quiet; bromids and chloral; amyl nitrite; chloroform; curare; artificial respiration sometimes indicated.
Sulfonal.		Giddiness, weakness, ptosis, cyanosis, suppression of urine.	gr. xxx.		Stimulants; diuretics.
Sulphuric Acid. See *Acid.*					
Sumach. See *Rhus.*					
Tanacetum vulgare (*Tansy*). Tansy.	Abortive.	Convulsions, insensibility, dilated pupils, respirations hurried and stertorous; pulse full, gradually failing; characteristic odor of breath.	ʒss of the oil.	Heart-paralysis.	Heart-stimulants; evacuate.
Tartar Emetic. See *Antimony.*					
Tartaric Acid. See *Acid.*					
Tin.	Irritant.	Metallic taste, vomiting, and diarrhea; pain; depressed action of heart.			Evacuate; magnesium; mucilaginous drinks.
Tobacco. Nicotin.	Depressant.	Nausea, vomiting, weakness, weak pulse, cold and clammy skin, pupils contracted, then dilated.		Paralysis of respiration; sometimes paralysis of heart.	Evacuate; tannic acid; strychnin; stimulants; warmth; recumbent position.
Truffles. See *Fungi.*					
Turpentine.		Characteristic odor; intoxication; contracted pupils; stertorous breathing: coma; collapse; tetanic convulsions; the urine has the odor of violets.	ʒvj. Child under seven years recovered after a tablespoonful.	Paralysis of respiration.	Evacuate; magnesium sulphate; demulcent drinks; morphin.
Tyrotoxicon.	Simple irritant.	Nausea, vomiting, cramps, diarrhea, collapse.			Evacuate; intestinal antiseptics.
Urethan.		Vomiting; slowing of heart; temperature lowered; muscular resolution and general anesthesia.		Asphyxia.	Evacuate; cardiac stimulants.

Vanilla.						
Veratrum album (*White Hellebore*). Veratrum viride (*Green Hellebore*).	Depressant.	Burning and pain in course of alimentary tract; inability to swallow; vomiting and diarrhea; palpitation; slow, weak pulse; respiration labored; pupils generally dilated; may be convulsions.	Not known.	Paralysis of respiratory centers.	Evacuate; ether, hypodermatically; opium; stimulants; coffee; warmth; recumbent position.
Verdigris. See *Copper*.					
Wild Cherry. See *Prunus*.					
Wintergreen. See *Gaultheria*.					
Woorara. See *Curare*.					
Yew.	Abortive.	Vomiting and delirium; pain in abdomen; irregularity of the heart's action; death may be sudden.	℥j of the leaves.		Evacuate; quick purgation; stimulants.
Zea mays (*Maize*).		Slow heart; dilated pupils; tonic convulsions.		Tetanus of respiratory muscles, or exhaustion.	Cardiac and respiratory stimulants.
Zinc.	Corrosive or irritant.	Corrosion of lips or mouth; pain and burning; incessant vomiting, the vomit blood-stained; acceleration of pulse and respiration; dyspnea; dilatation of the pupils; epileptiform convulsions; paralysis; coma.	6 grs. of chlorid.		Sodium or potassium carbonate; milk; eggs; tannic or gallic acid; morphin hypodermatically; poultices to abdomen.

Politzerize (*pol′-its-er-īz*) [after *Politzer*, an Austrian physician]. To treat by Politzer's method.

Poll (*pōl*) [ME., *poll*, head]. The head, especially the back portion, of an individual or of an animal. **P.-evil**, in farriery, an abscess behind the ears of a horse, producing a fistula.

Pollakiuria (*pol-ak-i-u′-re-ah*) [πολλάκις, often; οὖρον, urine]. Abnormal increased frequency of micturition.

Polled (*pōld*) [ME., *poll*, the head]. A term applied to cattle without horns. **P. Angus**, a race of cattle without horns, indigenous to Great Britain.

Pollemphytensis (*pol-em-fi-ten′-sis*) [πολλός, many; ἐμφυτεύειν, to implant]. Multiple vaccinations in different parts of the body.

Pollen (*pol′-en*) [*pollen*, fine dust]. In biology, the fecundating element produced in the anthers of flowering plants. It occurs as separate one-celled, globular, or irregular grains varying as to species. The central protoplasm is inclosed in two coats, the inner of which is called the *intine*, the outer the *extine*. **P.-basket.** See *Corbiculum*. **P. Catarrh.** See *Hay-fever*. **P.-cell**, in biology, the cell, sac, or chamber of an anther in which the pollen is produced. **P.-chamber**, the cavity at the apex of the ovule of *gymnosperms*, in which the pollen-grains lie after pollination. **P.-fever.** See *Hay-fever*. **P.-grain**, one of the unicellular bodies found in the anthers of flowering plants. They are generally yellow, and may be united into a mass by a viscid material. **P.-mass.** Same as *Pollinium*. **P.-paste**, pollen as it is stored up by bees. **P.-plate.** See *Corbiculum*. **P.-sac.** See *P.-chamber*. **P.-spore.** Same as *P.-grain*. **P. Theory**, a theory first proposed by Gordon in 1829 and finally confirmed by Blackley, in 1873, that hay-fever is due to the irritation of the Schneiderian mucosa produced by the pollen of grasses and other plants. **P.-tube**, in biology, a slender tube formed by a protrusion of the intine of a pollen-grain, after its contact with the stigma, and by means of which the contents of the pollen-grain are conducted into the ovule.

Polleniferous (*pol-en-if′-er-us*). See *Polliniferous*.

Pollenization (*pol-en-iz-a′-shun*). See *Pollination*.

Pollex (*pol′-eks*) [*pollex*, the thumb, the great toe: *pl.*, *Pollices*]. The digit at the radial side of the quinquedigital hand.

Pollical (*pol′-ik-al*) [*pollex*, thumb]. Pertaining to the thumb.

Pollicate (*pol′-ik-āt*) [*pollex*, thumb]. In biology, having thumbs.

Pollinar (*pol′-in-ar*) [*pollen*, pollen]. In biology, covered with a fine dust resembling pollen.

Pollinarium (*pol-in-a′-re-um*) [*pollen*, pollen]. In biology, one of the organs growing on the hymenium of certain fungi (*Agaricini*), thought by some to be male organs; also called *cystidia*, *barren basidia*. Cf. *Antheridium*.

Pollination (*pol-in-a′-shun*) [*pollen*, pollen]. The act of conveying the pollen to the stigma.

Pollinic (*pol-in′-ik*) [*pollen*, pollen]. Pertaining to pollen. **P. Chamber.** See *Pollen-chamber*.

Polliniferous (*pol-in-if′-er-us*) [*pollen*, pollen; *ferre*, to bear]. 1. Producing or containing pollen. 2. Bearing pollen, as certain insects.

Pollinigerous (*pol-in-ij′-er-us*). Same as *Polliniferous*.

Pollinium (*pol-in′-e-um*) [*pollen*, fine flour: *pl.*, *Pollinia*]. In biology, a mass of united pollen-grains, as in orchids, milk-weeds and other plants.

Pollinivorous (*pol-in-iv′-or-us*) [*pollen*, pollen; *vorare*, to devour]. Feeding upon pollen.

Pollinose (*pol′-in-ōs*) [*pollen*, fine flour]. In biology, powdered over as if with pollen.

Pollution (*pol-u'-shun*) [*pollutio; polluere*, to defile]. In sanitary science, the introduction or dissemination of any deleterious or filthy substance about a locality where its presence would be conducive to disease. Especially the defilement of potable water by sewage or excreta. In physiology, the production of the orgasm in either male or female by means other than sexual intercourse. See *Masturbation*. **P., Nocturnal**, a nocturnal, involuntary, seminal discharge. **P., Self**, masturbation.

Polonica (*po-lon'-ik-ah*). See *Plica*.

Polonychia (*pol-o-nik'-e-ah*) [πολής, many; ὄνυξ, nail]. See *Polyonychia*.

Poluboskos (*pol-u-bos'-kos*) [πολύς, much; βοσκός, nutritious]. A pure gluten food for infants and invalids. It has the following composition: Moisture, 7.50; fat, 0.50; mineral salts, almost wholly phosphates, 0.60; carbohydrates, 0.40; nitrogenous substances, 91.

Poluria (*pol-u'-re-ah*). Synonym of *Polyuria*.

Poly- (*pol'-e-*) [πολύς, many]. A prefix that denotes much or many.

Polyacanthid (*pol-e-ak-an'-thid*) [πολύς, many; ἀκανθα, thorn, spine]. In biology, applied to certain echinoderms in which there are several series of adambulacral spines.

Polyacanthus (*pol-e-ak-an'-thus*) [πολύς, many; ἀκανθα, thorn, spine]. In biology, many-spined.

Polyacoustic (*pol-e-ak-oos'-tik*) [πολύς, many; ἀκουστικός, acoustic]. 1. Multiplying sound. 2. An instrument for intensifying sound.

Polyact (*pol'-e-akt*) [πολύς, many; ἀκτίς, ray]. In biology, having numerous rays.

Polyactinal (*pol-e-ak'-tin-al*) [πολύς, many; ἀκτίς, ray]. In biology, many-rayed; multiradiate.

Polyad (*pol'-e-ad*) [πολύς, many]. In chemistry, an element whose valence is greater than two.

Polyadelph (*pol'-e-ad-elf*) [πολύς, many; ἀδελφός, brother]. In biology, a plant having its stamens united into three or more bundles.

Polyadelphous (*pol-e-ad-el'-fus*) [πολύς, many; ἀδελφός, brother]. In biology, having the stamens united by their filaments into several sets.

Polyadenia (*pol-e-ad-e'-ne-ah*) [πολύς, many; ἀδήν, gland]. Pseudo-leukemia, or Hodgkin's disease.

Polyadenitis (*pol-e-ad-en-i'-tis*) [πολύς, many; ἀδήν, gland; ιτις, inflammation]. Inflammation of many glands at once.

Polyadenoma (*pol-e-ad-en-o'-mah*) [πολύς, many; ἀδήν, gland; ὄμα, tumor]. Adenoma of many glands.

Polyadenopathy (*pol-e-ad-en-op'-ath-e*) [πολύς, many; ἀδήν, gland; πάθος, disease]. Any disease affecting many glands at once.

Polyadenous (*pol-e-ad'-en-us*) [πολύς, many; ἀδήν, gland]. In biology, bearing many glands.

Polyæmia (*pol-e-e'-me-ah*). See *Polyemia*.

Polyæsthesia (*pol-e-es-the'-ze-ah*). See *Polyesthesia*.

Polyandric (*pol-e-an'-drik*) [πολύς, many; ἀνήρ, male]. Characterized by polyandry.

Polyandrous (*pol-e-an'-drus*) [πολύς, many; ἀνήρ, male, man]. In biology: (*a*) Having a large number of stamens. Cf. *Icosandrous*. (*b*) Having more than one male mate. Cf. *Monothelious*.

Polyandry (*pol-e-an'-dre*) [πολύανδρος, having many men]. In biology, plurality of husbands or male mates.

Polyangular (*pol-e-ang'-gu-lar*) [πολύς, many; *angulus*, an angle]. Having many angles.

Polyanhemia (*pol-e-an-hem'-e-ah*). Synonym of *Anemia*.

Polyanthous (*pol-e-an'-thus*) [πολύς, many; ἄνθος, a flower]. Many-flowered.

Polyarthritis (*pol-e-ar-thri'-tis*) [πολύς, many; ἄρθρον, joint; ιτις, inflammation]. Inflammation of many joints at once. **P., Acute**, a term given to acute articular rheumatism. **P. rheumatica acuta.** Synonym of *Rheumatism, Acute Articular*. **P. synovialis.** See *Rheumatism, Articular*.

Polyarthrous (*pol-e-ar'-thrus*) [πολύς, many; ἄρθρον, a joint]. In biology, many-jointed; multiarticulate.

Polyarticular (*pol-e-ar-tik'-u-lar*) [πολύς, many; *articulus*, joint]. Affecting many joints together.

Polyatomic (*pol-e-at-om'-ik*) [πολύς, many; ἄτομος, atom]. In chemistry, denoting elements or radicles that have an equivalence greater than two; also, denoting compounds having three or more hydroxyl groups, in which hydrogen is easily replaceable by other elements or radicles without otherwise changing the structure of the original compound.

Polyaxial (*pol-e-aks'-e-al*) [πολύς, many; *axis*, axis]. Having several axes.

Polyaxon (*pol-e-aks'-on*) [πολύς, many; ἄξων, axis]. In biology, having several axes of growth.

Polybasic (*pol-ib-a'-zik*) [πολύς, many; βάσις, base]. Of alcohols or acids, having more than one hydrogen atom replaceable by a base; of a salt, formed from a polybasic acid by the replacement of more than one hydrogen atom by a basic element or radicle.

Polyblennia (*pol-ib-len'-e-ah*) [πολύς, many; βλέννα, mucus]. The secretion of an excess of mucus.

Polyblast (*pol'-ib-last*) [πολύς, many; βλαστός, a germ]. In biology, the mass of embryo-cells resulting from the cleavage of the ovum; the morula stage of development.

Polybrachia (*pol-ib-ra'-ke ah*). Same as *Polymelus*.

Polybrachus (*pol-ib-ra'-kus*) [πολύς, many; βραχίων, arm]. A monster with supernumerary arms.

Polybrephia (*pol-ib-ref'-e-ah*) [πολύς, many; βρέφος, infant]. The condition of having many young.

Polycarpæ (*pol-ik-ar'-pe*) [πολύς, many; καρπός, fruit]. A name given by Fuchs to a class of skin-diseases characterized by the eruption of plastic lesions, such as papules, pustules, vesicles, etc., comprising eczema and herpes.

Polycarpellary (*pol-ik-ar'-pel-a-re*) [πολύς, many; *carpellum*, carpel]. In biology, having many carpels.

Polycarpic (*pol-ik-ar'-pik*) [πολύς, many; καρπός, fruit]. In biology, fruiting many times.

Polycarpous (*pol-ik-ar'-pus*) [πολύς, many; καρπός, fruit]. In biology, having a pistil composed of several distinct ovaries or carpels. Cf. *Monocarpous*.

Polycellular (*pol-is-el'-u-lar*) [πολύς, many; *cellula*, a cell]. In biology, having many cells.

Polycentric (*pol-is-en'-trik*) [πολύς, many; κέντρον, center]. Having many centers or nuclear points.

Polycephalous (*pol-is-ef'-al-us*) [πολύς, many; κεφαλή, head]. In biology, bearing many heads.

Polycephalus (*pol-is-ef'-al-us*) [πολύς, many; κεφαλή, head]. A genus of *Tæniadæ*. See *Parasites (Animal), Table of*.

Polycerus (*pol-is-e'-rus*) [πολύς, many; κέρας, horn]. An animal monstrosity having many horns.

Polychætous (*pol-ik-e'-tus*) [πολύς, many; χαίτη, hair]. In biology, having many chætæ or bristles.

Polychezia (*pol-ik-e'-ze-ah*) [πολύς, many; χίζειν, to evacuate the bowels]. Chronic diarrhea.

Polycholia (*pol-ik-o'-le-ah*) [πολύς, much; χολή, bile]. Excessive secretion of bile.

Polychotomy (*pol-ik-ot'-o-me*) [πολυχόος, manifold; ταυεῖν, to cut]. In biology, division of a taxonomic group of organisms into several sub-groups.

Polychrest, Polychrestus (*pol'-ik-rest, pol-ik-res'-tus*) [πολύς, many; χρηστός, useful]. A medicine re-

garded as efficacious in many diseases. A word employed in many combinations.

Polychrestic (*pol-ik-res'-tik*) [πολύς, many; χρηστός, useful]. Of the nature of a polychrest.

Polychroism (*pol-ik-ro'-izm*) [πολύς, many; χροιά, color]. A property possessed by certain crystals, of exhibiting two shades of color under polarized light, which vary as the polarizing instrument is rotated.

Polychroit (*pol-ik-ro'-it*). See *Crocin*.

Polychromate (*pol-ik-ro'-māt*) [πολύς, many; χρῶμα, color]. A salt of chromic acid, containing several atoms of chromium in the molecule.

Polychromatic (*pol-ik-ro-mat'-ik*) [πολύς, many; χρῶμα, color]. Many-colored.

Polychrome (*pol'-ik-rōm*) [πολύς, many; χρῶμα, color]. 1. A crystalline principle found in quassia and giving rise in a watery solution to a variegated color. 2. Esculin.

Polychromia (*pol-ik-ro'-me-ah*). See *Pleiochromia*.

Polychromic (*pol-ik-ro'-mik*) [πολύς, many; χρῶμα, color]. Same as *Polychromatic*. **P. Acid**, an acid produced by the action of HNO_3 upon aloes.

Polychromous (*pol-ik-ro'-mus*) [πολύς, many; χρῶμα, color]. Having many colors.

Polychylia (*pol-ik-i'-le-ah*) [πολύς, much; χυλός, chyle]. An excessive formation of chyle.

Polychymia (*pol-ik-i'-me-ah*). Same as *Polychylia*.

Polyclad (*pol'-ik-lad*) [πολύς, many; κλάδος, a shoot or branch]. In biology, applied to those platode worms in which the intestine is very much branched (marine *Planaria*).

Polycladous (*pol-ik-la'-dus*) [πολύς, many; κλάδος, a young slip]. In biology, many-branched.

Polyclady (*pol-ik-la'-de*) [πολύς, many; κλάδος, a young slip or shoot]. In biology, the production of an unusually large number of branches.

Polyclinic (*pol-ik-lin'-ik*) [πολύς, many; κλίνη, a bed]. A hospital in which many diseases are treated. Cf. *Policlinic*.

Polycoccous (*pol-ik-ok'-us*) [πολύς, many; κόκκος, berry]. In biology, consisting of several cocci.

Polycopria (*pol-ik-op'-re-ah*) [πολύς, much; κόπρος, dung]. Excessive defecation.

Polycoria (*pol-ik-o'-re-ah*) [πολύς, many; κόρη, pupil]. The existence of more than one pupil or opening in the iris.

Polycotyledon (*pol-ik-ot-il-e'-don*) [πολύς, many; κοτυληδών, cavity]. In biology, a plant which in embryo possesses more than two cotyledons.

Polycotyledonary (*pol-ik-ot-il-e'-don-a-re*) [πολύς, many; κοτυληδών, cavity]. In biology, applied to mammalian placentas having many tufts of fetal villi. See under *Placenta*.

Polycotyledonous (*pol-ik-ot-il-e'-do-nus*) [πολύς, many; κοτυληδών, a hollow]. Of, or pertaining to, a plant or a placenta having many cotyledons. See *Placenta*.

Polycotyledony (*pol-ik-ot-il-e'-do-ne*) [πολύς, many; κοτυληδών, cavity]. In biology, an aberrant increase in the number of cotyledons.

Polycrotic (*pol-ik-rot'-ik*) [πολύς, many; κρότος, pulse]. Applied to a pulse that appears to have more than two waves for each cardiac systole.

Polycruria (*pol-ik-ru'-re-ah*) [πολύς, many; *crus*, leg]. Having supernumerary legs, as certain monsters.

Polycyclic (*pol-is-ik'-lik*) [πολύς, many; κύκλος, a circle]. In biology, having many whorls.

Polycyesia, Polycyesis (*pol-is-i-e'-ze-ah, pol-is-i-e'-sis*) [πολύς, many; κύησις, pregnancy]. 1. The occurrence of frequent pregnancy. 2. Multiple pregnancy.

Polycystic (*pol-is-is'-tik*) [πολύς, many; κύστις, a sac]. Containing many cysts.

Polycythemia (*pol-is-i-the'-me-ah*) [πολύς, many; κύτος, cell; αἷμα, blood]. Excess of red corpuscles in the blood.

Polydacria (*pol-id-ak'-re-ah*) [πολύς, many; δάκρυον, tear]. Excessive lacrymation.

Polydactyl, Polydactyle (*pol-id-ak'-til*) [πολύς, many; δάκτυλος, a finger, a toe]. In biology, an animal having supernumerary fingers and toes.

Polydactylism (*pol-id-ak'-til-izm*) [πολύς, many; δάκτυλος, a finger]. The existence of one or more supernumerary fingers or toes. The condition is sometimes hereditary.

Polydactylous (*pol-id-ak'-til-us*). Same as *Polydactyl*.

Polydactylus (*pol-id-ak'-til-us*) [πολύς, many; δάκτυλος, finger]. A monster having supernumerary digits.

Polydipsia (*pol-id-ip'-se-ah*) [πολύς, much; δίψα, thirst]. Excessive thirst. It is usually present in fever and in diabetes. **P. ebriora**, dipsomania.

Polyembryonate, Polyembryonic (*pol-e-em'-bre-on-āt, pol-e-em-bre-on'-ik*) [πολύς, many; ἔμβρυον, an embryo]. In biology, pertaining to polyembryony; having several embryos.

Polyembryony (*pol-e-em'-bre-o-ne*) [πολύς, many; ἔμβρυον, an embryo]. In biology, the production of more than one embryo in a seed. Parthenogenesis occurs in most instances of polyembryony.

Polyemia, Polyæmia (*pol-e-e'-me-ah*) [πολύς, much; αἷμα, blood]. Abnormal increase of the mass of the blood; plethora. After major amputations, with little loss of blood, there is a transient increase, relatively speaking, and this is called **P. apocoptica.** **P. aquosa**, a simple increase in the amount of water in the blood. **P. hyperalbuminosa**, an excess of albumin in the blood-plasma. **P. polycythæmica**, an increase of the red corpuscles. **P. serosa**, that condition in which the amount of blood-serum is increased.

Polyesthesia, Polyesthesis (*pol-e-es-the'-ze-ah, pol-e-es-the'-sis*) [πολύς, many; αἴσθησις, sensation]. An abnormality of sensation in which a single touch is felt as two or more.

Polyesthetic (*pol-e-es-thet'-ik*) [πολύς, many; αἴσθησις, sensation]. Pertaining to polyesthesia.

Polygala (*pol-ig'-al-ah*) [πολύς, much; γάλα, milk]. A genus of herbaceous or shrubby plants of some 260 species. **P. senega**, of N. America, is therapeutically the most important. See *Senega*.

Polygalactia (*pol-ig-al-ak'-te-ah*) [πολύς, much; γάλα, milk]. The excessive secretion of milk. See *Galactorrhea*.

Polygalic Acid (*pol-ig-al'-ik*) [πολύς, much; γάλα, milk], $C_{32}H_{54}O_{18}$. A glucosid extracted from *Polygala senega*. It is probably the same as saponin.

Polygalin (*pol-ig'-al-in*). See *Senega*.

Polygamarin (*pol-ig-am'-ar-in*) [πολύς, much; γάλα, milk; *amarum*, bitter]. A crystalline bitter principle obtained from *Polygala amara*.

Polygamia (*pol-ig-a'-me-ah*) [πολύγαμος, polygamous]. A class of plants bearing both hermaphrodite flowers and those with the sexes separated.

Polygamous (*pol-ig'-am-us*) [πολύς, many; γάμος, marriage]. In biology: (*a*) having more than one mate of the opposite sex; cf. *Polyandrous, Polygynous;* (*b*) producing perfect flowers, together with staminate or pistillate flowers, on the same plant or species.

Polygamy (*pol-ig'-am-e*) [πολύς, many; γάμος, marriage]. The state or practice of having more than one wife or husband.

Polyganglionic (*pol-ig-gang-gle-on'-ik*) [πολύς, many; γαγγλιον, ganglion]. Having several ganglia.

Polygastria (*pol-ig-as'-tre-ah*) [πολύς, much; γαστήρ, stomach]. Excessive production of gastric juice.

Polygastric (*pol-ig-as'-trik*) [πολύς, many; γαστήρ, stomach]. Having many stomachs.

Polygastrulation (*pol-ig-as-tru-la'-shun*) [πολύς, many; γαστήρ, stomach]. In biology, multiple gastrulation.

Polygenesis (*pol-ij-en'-es-is*) [πολύς, many; γένεσις, origin]. In biology, the doctrine that organisms may arise from cells of different kinds.

Polygenetic (*pol-ij-en-et'-ik*) [πολύς, many; γεννᾶν, to produce]. Pertaining to polygenesis.

Polygenism, Polygeny (*pol'-ij-en-izm, pol'-ij-en-e*) [πολύς, many; γεννᾶν, to beget]. In biology, the theory that the different races of man are descended from distinct species. The independent origin of the human races. Cf. *Monogeny*.

Polyglottides (*pol-ig-lot'-id-ēz*). See *Alternations of Generation*.

Polygnathus (*pol-ig-na'-thus*) [πολύς, many; γνάθος, jaw]. A form of double monster in which the parasite is attached to the jaws of the host. It includes epignathus and hypognathus.

Polygonal (*pol-ig'-o-nal*) [πολύς, many; γωνία, angle]. Having many angles.

Polygonate (*pol-ig'-o-nāt*) [πολύς, many; γόνυ, knee]. In biology, many-jointed.

Polygonatum (*pol-ig-o-na'-tum*). See *Solomon's Seal*.

Polygoneutic (*pol-ig-o-nu'-tik*) [πολύς, many; γόνος, offspring]. In biology, having several broods during the year.

Polygoneutism (*pol-ig-o-nu'-tizm*) [πολύς, many; γόνος, offspring]. In biology, the state of being polygoneutic.

Polygonia (*pol-ig-o'-ne-ah*) [πολύς, many; γόνος, offspring]. Great fecundity, especially of the male.

Polygonum (*pol-ig'-o-num*) [πολύγονον, knot-grass]. A genus of polygonaceous plants. **P. hydropiperoïdes**, *Smart Weed, Water Pepper*, is a plant common in the United States. Its active principle is thought to be polygonic acid. It stimulates the action of the heart and increases arterial tension. It is diuretic, emmenagogue, and aphrodisiac. Externally, it is a rubefacient and vesicant. It is valuable in amenorrhea and impotence. Dose of the ext. gr. j–v; of the fld. ext. ♏x–ʒj. All unof.

Polygraph (*pol'-ig-raf*) [πολύς, many; γράφειν, to record]. A cylindric recording-instrument for multiplying sphygmographic tracings. It is made to rotate upon its axis by clockwork.

Polygraphic (*pol-ig-raf'-ik*) [πολύς, many; γράφειν, to write]. Pertaining to the polygraph.

Polygroma (*pol-ig-ro'-mah*) [πολύς, many; ὑγρός, moist; ὄμα, tumor]. A large hygroma.

Polygynecial (*pol-ij-in-e'-se-al*) [πολύς, many; γυνή, female; οἶκος, house]. In biology, containing the pistils or gynecia of several flowers, as a collective fruit.

Polygynous (*pol-ij'-in-us*) [πολύς, many; γυνή, female, wife]. In biology: (*a*) possessing many pistils; (*b*) having more than one wife or female mate.

Polygyral (*pol-ij-i'-ral*) [πολύς, many; γῦρος, a circle, ring]. In biology, having several whorls.

Polygyria (*pol-ij-i'-re-ah*) [πολύς, many; γύρος, gyre]. Having many gyres.

Polyhemia (*pol-e-hem'-e-ah*). See *Polyemia*.

Polyhidrosis (*pol-e-hid-ro'-sis*) [πολύς, much; ἵδρωσις, sweating]. Excessive perspiration.

Polyhydramnios (*pol-e-hi-dram'-ne-os*) [πολύς, many; ὕδωρ, water; ἀμνίον, amnion]. An excessive production of the amniotic liquor.

Polyhydrate (*pol-e-hi'-drāt*) [πολύς, much; ὕδωρ, water]. A hydrate containing more than one hydroxyl group.

Polyhydric (*pol-e-hi'-drik*) [πολύς, much; ὕδωρ, water]. Containing several hydroxyl groups.

Polyidrosis (*pol-e-id-ro'-sis*). Same as *Polyhidrosis*.

Polykoria (*pol-ik-o'-re-ah*) [πολύς, many; κόρη, pupil]. Multiplicity of pupils of the eye.

Polylepidous (*pol-il-ep'-id-us*) [πολύς, many; λεπίς, a scale]. In biology, having many scales.

Polyleukocythemia (*pol-il-u-ko-si-the'-me-ah*). Same as *Leukocythemia*.

Polylymphia (*pol-il-im'-fe-ah*) [πολύς, much; λύμφα, lymph]. Synonym of *Anasarca*.

Polymania (*pol-im-a'-ne-ah*) [πολύς, many; *manus*, hand]. The condition of having more than two hands; polychiria.

Polymastia (*pol-im-as'-te-ah*) [πολύς, many; μαστός, breast]. The presence in the same person of more than two breasts or nipples. The supernumerary organs may be below the breast proper, in the axilla, or elsewhere about the body. The condition is seen in both sexes.

Polymastigate (*pol-im-as'-tig-āt*) [πολύς, many; μάστιξ (μαστιγ-), a whip]. In biology, having several flagella.

Polymastigous (*pol-im-as'-tig-us*). Same as *Polymastigate*.

Polymastodont (*pol-im-as'-to-dont*) [πολύς, many; μαστός, a nipple; ὀδούς (ὀδοντ-), tooth]. In biology, having numerous tubercles on the molar teeth.

Polymazia (*pol-im-a'-ze-ah*). Synonym of *Polymastia*.

Polymelia (*pol-im-e'-le-ah*) [πολύς, many; μέλος, limb]. A malformation consisting in the presence of more than the normal number of limbs.

Polymelian (*pol-im-e'-le-an*) [πολύς, many; μέλος, a limb]. Having supernumerary limbs.

Polymelianism (*pol-im-e'-le-an-izm*) [πολύς, many; μέλος, a limb]. In biology, having supernumerary limbs.

Polymelius, Polymelus (*pol-im-e'-le-us, pol-im'-el-us*) [πολύς, many; μέλος, a limb]. A monstrosity having more than the normal number of limbs.

Polymely (*pol-im'-el-e*). Synonym of *Polymelus*.

Polymenorrhea (*pol-im-en-or-e'-ah*) [πολύς, much; μήν, month; ῥοία, a flow]. Excessive menstrual flow.

Polymer (*pol'-im-er*) [πολύς, many; μέρος, a part]. A term usually employed to designate a chemic compound, the formula of which is a multiple of that of the lowest compound of a chemic series.

Polymeria (*pol-im-e'-re-ah*). See *Polymerism*.

Polymeric (*pol-im-er'-ik*) [πολύς, many; μέρος, part]. Exhibiting polymerism.

Polymerid (*pol-im'-er-id*). Synonym of *Polymer*.

Polymeride (*pol-im'-er-id*) [πολύς, many; μέρος, a part]. In chemistry, a compound having the properties of polymerism.

Polymerism (*pol-im'-er-izm*) [πολύς, many; μέρος, a part]. 1. The existence of more than a normal number of parts. 2. A variety of isomerism dependent upon a difference in molecular weight. The compounds presenting it have a formula that is a multiple of that of the lowest compound of the respective series.

Polymerization (*pol-im-er-iz-a'-shun*) [πολύς, much; μέρος, a part]. The apparent fusion or union of two or more molecules of a compound, forming a more complex molecule, with a higher molecular weight and somewhat different physical and chemic properties.

Polymerous (*pol-im'-er-us*) [πολύς, many; μέρος, part]. In biology, having many parts or organs in a given arrangement or structure.

Polymetameric (*pol-im-et-am-er'-ik*) [πολύς, many; μετά, beside; μέρος, part]. Extending over or comprising two or more metameres.

olymicrobic (*pol-im-i-kro'-bik*) [πολύς, many; μικρός, small; βίος, life]. Containing many kinds of microorganisms.

olymicroscope (*pol-im-i'-kro-skōp*) [πολύς, many; μικρός, small; σκοπεῖν, to view]. A microscope arranged on the principle of the revolving stereoscope.

olymicrotome (*pol-im-i'-kro-tōm*) [πολύς, many; μικρός, small; τέμνειν, to cut]. An instrument making many microscopic sections in a short time.

olymixic (*pol-im-iks'-ik*) [πολύμικτος, much mixed, complex]. In biology, applied to groups or masses of materials or organisms, consisting of many species and classes; the opposite of *monotonic*, *q. v.*

olymnia (*pol-im'-ne-ah*) [πολύμνια, Polyhymnia, one of the Muses]. A genus of composite plants. See *Bear's Foot*.

olymorph (*pol'-im-orf*) [πολύς, many; μορφή, form]. In biology, a variant form or type.

olymorphic (*pol-im-or'-fik*) [πολύς, many; μορφή, form]. Having, or existing in, many forms. In crystallography, applied to any substance that crystallizes in more than one form. **P. Cells of Carcinoma**, the peculiarly-shaped cells found in the center of cancer-nests. Their modified form is due to pressure. The cells were formerly considered diagnostic of carcinoma, but are no longer so.

olymorphism (*pol-im-or'-fizm*) [πολύς, many; μορφή, form]. In biology, the exhibition of physiologic or morphologic dissimilarity among members of a given group. Sexual dimorphism, trimorphism, or polymorphism is of frequent occurrence in the animal kingdom; it may be permanent, or temporary and seasonal. **P., Colonial**, arises in consequence of a division of labor among the individuals of a colony.

olymorpho-cellular (*pol-im-or'-fo-sel'-u-lar*) [πολύς, many; μορφή, form; *cellula*, cell]. Having cells of many forms.

olymorphous (*pol-im-or'-fus*) [πολύς, many; μορφή, form]. In biology, exhibiting variations in form, either at different stages of individual development, or among the members of a group.

lymorphy (*pol'-im-or-fe*). Same as *Polymorphism*.

lymyositis (*pol-im-i-o-si'-tis*) [πολύς, many; μῦς, muscle; ιτις, inflammation]. A disease of the muscles characterized by pain, tension, deformity, prostration, edema, sweats, insomnia. The extensor muscles are preferably involved; the diaphragm, larynx, tongue, and pharynx are exempt in mild cases. The spleen is enlarged. The disease is generally fatal. The lesion consists in an actual inflammation—the muscle-fibers present all stages of degeneration, and the interstitial tissue is the seat of a marked round-cell infiltration. **P., Acute Progressive**, an acute form in which, in a short time nearly all the muscles are involved. It usually ends fatally. **P., Parenchymatous, Puerperal**. Synonym of *P., Puerperal*. **P., Puerperal**, polymyositis occurring during the puerperium.

yneural (*pol-in-u'-ral*) [πολύς, many; νεῦρον, nerve]. Supplied or innervated by several nerves.

yneuric (*pol-in-u'-rik*) [πολύς, many; νεῦρον, nerve]. In biology, applied to a nerve-cell possessing several processes (or *neurons*) which go to form the axis-cylinder of a nerve-fiber, as distinguished from a *mononeuric* or *dineuric* cell.

yneuritis (*pol-in-u-ri'-tis*). See *Neuritis, Multiple*. **potatorum**; *Pseudo-tabes; alcoholic neuritis; ataxia of drunkards;* a chronic form of neuritis following the immoderate use of alcoholic stimulants. It appears in two distinct varieties, the *paralytic* and the *ataxic*. It is characterized by pain in the lower extremities, ataxia, areas of anesthesia, loss of the deep and at times of the superficial reflexes; later paralysis and atrophy, chiefly of the extensors of the fingers and toes. See *Neuritis, Multiple*.

Polynomial (*pol-in-o'-me-al*) [πολύς, many; *nomen*, name]. In biology, denoting a method of nomenclature in which the technical names of species are not confined to two terms, the *generic* and the *specific*.

Polynuclear (*pol-in-u'-kle-ar*) [πολύς, many; *nucleus*, nucleus]. In biology, having several nuclei; applied to cells in which the nucleus is either lobed or composed of several portions united by such delicate nuclear filaments as to give the impression of a multinucleated cell in distinction from a *mononuclear* cell.

Polynucleate (*pol-in-u'-kle-āt*). Synonym of *Multinuclear*.

Polyodont (*pol'-e-o-dont*) [πολύς, many; ὀδούς, tooth]. In biology, having many teeth; multidentate.

Polyodontia (*pol-e-o-don'-she-ah*) [πολύς, many; ὀδούς, tooth]. The presence of supernumerary teeth.

Polyommatous (*pol-e-om'-at-us*) [πολύς, many; ὄμμα, eye]. In biology, having many eyes.

Polyonychia (*pol-e-o-nik'-e-ah*) [πολύς, many; ὄνυξ, nail]. *Polonychia;* the presence of supernumerary nails.

Polyonym (*pol'-e-o-nim*) [πολύς, many; ὄνυμα, name]. In biology, possessing a technical name composed of several terms, such as *levator anguli oris; iter a tertio ad quartum ventriculum*, etc.

Polyonymic (*pol-e-o-nim'-ik*) [πολύς, many; ὄνυμα, name]. In biology, consisting of more than two terms.

Polyophthalmia (*pol-e-off-thal'-me-ah*) [πολύς, many; ὀφθαλμός, eye]. A monstrosity possessing supernumerary eyes.

Polyopia, Polyopsia (*pol-e-o'-pe-ah, pol-e-op'-se-ah*) [πολύς, many; ὄψις, sight]. A condition of the eye wherein more than one image of an object is formed upon the retina. **P. monophthalmica**, the phenomenon of multiple vision with a single eye.

Polyorchis (*pol-e-or'-kis*) [πολύς, many; ὄρχις, a testicle]. One who has more than two testicles.

Polyorexia (*pol-e-or-eks'-e-ah*) [πολύς, much; ὄρεξις, appetite]. Excessive hunger, or appetite; bulimia.

Polyorganic (*pol-e-or-gan'-ik*) [πολύς, many; ὄργανον, an organ]. In biology, having several organs.

Polyorrhomenitis (*pol-e-or-o-men-i'-tis*) [πολύς, many; ὀρρός, serum; ὑμήν, membrane; ιτις, inflammation]. *Concato's Disease;* a symptom-group defined by Concato as "a phthisis of serous membranes." The patients are said to suffer from a progressive and malignant inflammation of various serous membranes, the disease finally assuming the aspect of a severe type of pneumonia. The post-mortem findings are mainly those of "dry pleurisy."

Polyorrhymenitis (*pol-e-or-i-men-i'-tis*). Synonym of *Polyorrhomenitis*.

Polyosteon, Polyosteum (*pol-e-os'-te-on, pol-e-os'-te-um*) [πολύς, many; ὀστέον, bone]. The tarsus and metatarsus. [Old.]

Polyotia (*pol-e-o'-she-ah*) [πολύς, many; οὖς, ear]. A condition of malformation in which there is more than one auricle on a side.

Polyp, Polype (*pol'-ip*) [πολύς, many; πούς, foot]. In biology, the name given by Reaumur to the fresh-water hydra (*Hydra viridis*) and allied animals. "The word is used ambiguously by writers, being often employed to designate the entire composite fabric, the aggregate result of gemmation [in the *Hydrozoa*], while at other times it is intended to indicate each of those organisms which, almost always furnished with a mouth and tentacles, are developed upon various points of a common living basis, and are eminently

characteristic of the zoöphytic form." (Allman.) See *Polypus*. **P.-colony**, a colony of polyps. **P.-stem**, a polyp-stock. **P.-stock**, in biology, a polypary, or polypidom.

Polypanarthritis (*pol-ip-an-ar-thri'-tis*). Synonym of *Arthritis deformans*.

Polypapilloma (*pol-ip-ap-il-o'-mah*) [πολύς, many; *papilla*, papilla; ὄμα, tumor: *pl.*, *Polypapillomata*]. A disease of the skin characterized by the formation of multiple papillomata. **P. tropicum.** Same as *Yaws*.

Polyparesis (*pol-ip-ar'-es-is*) [πολύς, much; πάρεσις, weakness]. General progressive paralysis of the insane, or paralytic dementia.

Polyparium (*pol-ip-a'-re-um*). Same as *Polypary*.

Polyparous (*pol-ip'-ar-us*). Same as *Multiparous*.

Polypary (*pol'-ip-a-re*) [*polypus*, a polyp, or many-footed animal]. In biology, "The term polypary has been used with just as little precision as polyp, being sometimes employed to express the common connecting basis—*cœnosarc* of a polyp-stock—and at other times being applied exclusively to the solid protective structures, whether forming for the zoöphyte an external covering or constituting an internal axis; the ambiguity which then results will be got rid of by using the word cœnosarc as here defined, and restricting the term polypary to the solid protective structures of the zoöphyte." (Allman).

Polypathia (*pol-ip-a'-the-ah*) [πολύς, many; πάθος, disease]. The presence of several diseases at one time, or the frequent recurrence of disease.

Polypathic (*pol-ip-ath'-ik*) [πολύς, many; πάθος, disease]. Pertaining to polypathia; affected with several diseases at once.

Polypean (*pol-ip'-e-an*) [πολύς, many; πούς, foot]. Pertaining to a polyp.

Polypedia, Polypædia (*pol-ip-e'-de-ah*) [πολύς, many; παῖς, child]. Synonym of *Superfetation*.

Polypedia (*pol-ip-e'-de-ah*) [πολύς, many; *pes*, *pedis*, foot]. Synonym of *Polypodia*.

Polyperemia (*pol-i-per-e'-me-ah*) [πολύς, many; ὑπέρ, in excess; αἷμα, blood]. Plethora.

Polyperia (*pol-ip-e'-re-ah*) [πολύς, many; πηρός, mutilated]. Congenital malformation of many organs or parts.

Polyperythrin (*pol-ip-er'-ith-rin*) [πολύπους, a polyp; ἐρυθραῖος, red]. In biology, a respiratory pigment found by Moseley in various *Cœlenteratæ*; it is identical with the hematoporphyrin of MacMunn. See *Pigments, Conspectus of*.

Polypetalous (*pol-ip-et'-al-us*) [πολύς, many; πέταλον, leaf]. In biology, having several distinct petals; apopetalous, as opposed to *gamopetalous*, *q. v.*

Polyphagia (*pol-if-a'-je-ah*). Synonym of *Bulimia*.

Polyphagic (*pol-if-a'-jik*) [πολύς, many; φαγεῖν, to eat]. Polyphagous.

Polyphagous (*pol-if'-a-gus*). Synonym of *Omnivorous*.

Polyphagy (*pol-if'-aj-e*) [πολυφάγος. eating too much]. The habit of living on various kinds of food.

Polypharmacon, Polypharmacum (*pol-if-ar'-mak-on*, *pol-if-ar'-mak-um*) [πολύς, many; φάρμακον, drug]. A medicine containing many ingredients; a panacea.

Polypharmacus (*pol-if-ar'-mak-us*) [πολύς, many; φάρμακον, drug]. One who uses drugs too freely.

Polypharmacy (*pol-if-ar'-mas-e*) [πολύς, many; φάρμακον, a drug]. The prescription of many drugs at one time; the too free use of drugs.

Polyphemous (*pol-if-e'-mus*) [πολύς, many; φήμη, voice]. One-eyed; cyclopean.

Polyphobia (*pol-if-o'-be-ah*) [πολύς, many; φόβος, fear]. Morbid fear of many things.

Polyphore (*pol'-if-or*) [πολύς, much; φέρειν, to bear]. In biology, a common carrier or receptacle, as of many distinct carpels, *e. g.*, the strawberry.

Polyphrasia (*pol-if-ra'-ze-ah*) [πολύς, much; φράσις, speech]. Morbid excess of speech; insane volubility; verbigeration.

Polyphyletic (*pol-if-il-et'-ik*) [πολύς, many; φυλή, tribe]. In biology, having several lines of descent; of or pertaining to the doctrine of polygenesis, or special creation.

Polyphylline, Polyphyllous (*pol-if-il'-in*, *pol-if-il'-us*) [πολύς, many; φύλλον, leaf]. In biology, many-leaved. Applied to the calyx or corolla, and also to the leaflets of compound leaves.

Polyphylly (*pol'-if-il-e*) [πολύς, many; φύλλον, leaf]. In biology, an abnormal increase of the number of organs in a whorl.

Polyphyodont (*pol-if-i'-o-dont*) [πολύς, many; οἴειν, produce; ὀδούς (ὀδοντ-), tooth]. In biology, applied to animals, as the shark, in which tooth-germs are produced throughout life, and replacement of lost teeth continues indefinitely; opposed to *monophyodont* and *diphyodont*.

Polyphysia (*pol-if-iz'-e-ah*) [πολύς, many; φῦσα, flatus]. Excessive flatulence.

Polypiarium (*pol-ip-i-a'-re-um*). Same as *Polypary*.

Polypide (*pol'-ip-id*) [πολύς, many; πούς, foot]. In biology, the zoöid, consisting of alimentary canal, with tentacles, nervous ganglion, etc., which is developed within the zoëcium of *Polyzoa*; the *polype* of older writers and *bryozoid* of Reichert.

Polypidom (*pol-ip'-id-om*) [πολύς, many; πούς, foot; δόμος, house]. In biology, the aggregate of persons in a cœlenterate colony; a polyp-stock.

Polypier (*pol'-ip-er*) [πολύς, many; πούς, foot]. A polypide; a polypidom.

Polypifer (*pol'-ip-if-er*) [πολύς, many; πούς, foot: φέρειν, to bear]. In biology, a polyp-stock.

Polypiferous (*pol-ip-if'-er-us*) [*polypus*, polyp; *ferre*, to bear]. Bearing or giving origin to a polypus.

Polypiform (*pol'-ip-if-orm*) [*polypus*, polyp; *forma*, form]. Having the form of a polyp.

Polypigerous (*pol-ip-ij'-er-us*). Same as *Polypiferous*.

Polypionia (*pol-ip-i-o'-ne-ah*) [πολύς, much; πίων, fat]. An excessive deposit of fat in the subcutaneous connective tissue.

Polypiosis (*pol-ip-i-o'-sis*) [πολύς, much; πίων, fat]. Obesity.

Polypiparous (*pol-ip-ip'-ar-us*). Same as *Polypiferous*.

Polypite (*pol'-ip-it*) [πολύς, many; πούς, foot]. In biology, an individual zoöid, or person, of the *Hydrozoa* or *Actinozoa*, whether separate or one of a colony.

Polypitrite (*pol-ip'-it-rit*). See *Polypotrite*.

Polyplacid (*pol-ip-las'-id*) [πολύς, many; πλακοῦς, a flat cake]. In biology, bearing more than one madreporic body, as distinguished from *Monoplacid*.

Polyplast (*pol'-ip-last*) [πολύς, many; πλάσσειν, to form]. Composed of many cells.

Polyplastic (*pol-ip-las'-tik*) [πολύς, much; πλάσσειν, to mold]. A term applied to cells having many substances (more than two) in their composition; also to cells that undergo many modifications during their transformation into tissues.

Polyplastid (*pol-ip-las'-tid*). See *Monoplastid*.

Polyplastides (*pol-ip-las'-tid-ēz*) [πολύς, many; πλάσσειν, to form]. Multicellular organisms; the substitute proposed by Götte for *Metazoa*.

Polypnea, Polypnœa (*pol-ip-ne'-ah*) [πολύς, many; πνοία, breathing]. Great rapidity of respiration.

Polypneic (*pol-ip-ne'-ik*) [πολύς, many; πνοία, breathing]. Pertaining to polypnea; hastening the respiration. **P. Center**, a center the stimulation of which

ends to quicken the respiratory movements. Such a center is said to exist in the brain between the striatum and the thalamus.

lypod (*pol'-ip-od*) [πολύς, many; πούς, foot]. In zoology, having many feet.

lypodesme (*pol-ip-o-dez'-me*) [πολύπους, polyp; δεσμός, bond]. An instrument for applying a ligature to the pedicle of a polypus.

lypodia (*pol-ip-o'-de-ah*) [πολύς, many; πούς, foot]. A monstrosity possessing supernumerary feet.

lypoid (*pol'-ip-oid*) [πολύπους, polypus; εἶδος, like]. Resembling a polypus.

lyporous (*pol-ip'-or-us*) [πολύς, many; πόρος, pore]. In biology, having many pores; ethmoid.

lyporus (*pol-ip'-o-rus*) [πολύς, many; πόρος, pore]. A genus of hymenomycetous *Fungi* represented by many species. **P. fomentarius,** *Amadou; German Tinder; Moxa;* a species parasitic on trees, especially the birch. It is a source of amadou.

lyposia, Polyposis (*pol-ip-o'-ze-ah, pol-ip-o'-sis*) [πολύς, much; πόσις, draught]. Polydipsia.

lypostem (*pol'-ip-o-stem*). Same as *Polypstem.*

lypostyle (*pol'-ip-o-stil*) [πολύς, many; πούς, foot; στῦλος, a pillar]. In biology, a *Dactylozoöid, q. v.*

lypotome (*pol-ip'-o-tōm*) [πολύς, many; τομή, a cutting]. An instrument for the excision of polypi.

lypotrite (*pol'-ip-o-trit*) [πολύπους, polypus; τρίβειν, to rub]. An instrument for crushing polypi.

lypous (*pol'-ip-us*) [πολύς, many; πούς, foot]. Of the nature of a polyp.

lyprite (*pol'-ip-rit*) [*polypus,* a polyp]. In biology, the manubrium of a medusa.

yptome (*pol'-ip-tōm*). Synonym of *Polypotome.*

lypus (*pol'-ip-us*) [πολύς, many; πούς, foot: *pl.*, *Polypi*]. A tumor found especially on mucous membranes, as in the nose, bladder, rectum, uterus, etc., and growing from the surface. The majority of polypi are not true tumors, but inflammatory hyperplasias. **P., Blood.** Synonym of *P., Placental.* **P., Carcinomatous,** a polyp which is carcinomatous in character. **P. carnosus.** Synonym of *Sarcoma.* **P., Fibrinous,** a polypoid mass on the uterine wall, resulting from the deposition of fibrin from retained blood. The mass may be attached to portions of an ovum or to a thrombi at the placental site. **P., Fibrous, P., Fleshy,** a polypus composed of fibrous tissue chiefly, and common in the intestines and uterus. **P., Follicular,** one containing many small mucous glands. **P., Gelatinous.** Synonym of *P., Mucous.* **P., Glandular:** 1. A term given by Thomas to a polypus consisting of enlarged mucous glands of the cervix uteri. 2. Adenoma. **P. of the Heart,** a fibrinous heart-clot. [Old.] **P., Lardaceous,** one that has undergone lardaceous, or amyloid, degeneration. **P., Lipomatous,** a pedunculated lipoma. **P., Malignant,** a malignant tumor, usually carcinoma, having a polypoid appearance. **P. mamillæ,** the nipple. **P., Mucous,** a soft polypus containing mucoid tissue. **P., Myomatous,** one consisting largely of unstriped muscle-tissue. **P., Osseous,** one containing bony tissue. **P., Placental,** a fibrinous polyp resulting from the deposit of fibrin upon a portion of placenta retained after parturition. **P., Raspberry Cellular,** the most common variety of aural polypus, consisting of many small, raspberry-like masses, attached to a central stem which forms the pedicle. **P., Sarcomatous,** a sarcoma of polypoid form. **P., Scirrhous,** a dense carcinomatous polypus. **P., Soft.** Synonym of *P., Mucous.* **P., Spongy.** Synonym of *P., Mucous.* **P., Stony,** one the seat of calcareous infiltration. **P., Tooth,** a polyp developed from the pulp of a carious tooth. **P., Vascular,** a polypoid angioma.

Polyrhizal (*pol-ir-i'-zal*). Same as *Polyrhizous.*

Polyrhizous (*pol-ir-i'-zus*) [πολύς, many; ῥίζα, root]. In biology, many-rooted.

Polyrrhea (*pol-ir-e'-ah*) [πολύς, much; ῥοία, flow]. An excessive secretion of fluid.

Polysaccharides (*pol-is-ak-ar'-id-ēz*). See *Carbohydrates.*

Polysalicylic Acids (*pol-is-al-is-il'-ik*) [πολύς, many; *salix,* willow]. Salicylic anhydrids produced by the action of phosphoric oxychlorid on sodium salicylate.

Polysarcia (*pol-is-ar'-ke-ah*) [πολύς, much; σάρξ, flesh]. Excessive corpulency; obesity. **P. cordis,** Synonym of *Cor adiposum.*

Polysarcosis (*pol-is-ar-ko'-sis*). Synonym of *Polysarcia.*

Polysarcous (*pol-is-ar'-kus*) [πολύς, much; σάρξ, flesh]. Corpulent; exhibiting polysarcia.

Polyscelia (*pol-is-ke'-le-ah*) [πολύς, many; σκέλος, leg]. Excess in the number of legs.

Polyscelus (*pol-is'-ke-lus*) [πολύς, many; σκέλος, leg]. A monster having supernumerary legs.

Polyschidia (*pol-is-kid'-e-ah*) [πολύς, many; σχίδιον, splinter]. A tendency to carry classification to excess.

Polyscope (*pol'-is-kōp*) [πολύς, much; σκοπεῖν, to observe]. An instrument for examining the cavities of the body by illuminating them. **P., Electric,** an instrument provided with an electric light which is introduced into a hollow viscus in order to illuminate its internal surfaces. The walls of the organ are protected from the effects of the heat by the presence of water.

Polysepalous (*pol-is-ep'-al-us*) [πολύς, many; *sepalum,* sepal]. Having several or many distinct sepals.

Polysialia (*pol-is-i-a'-le-ah*) [πολύς, much; σίαλον, spittle]. Excessive flow of saliva.

Polysiphonous (*pol-is-i'-fon-us*) [πολύς, many; σίφων, tube]. In biology, having many siphons.

Polysolve (*pol'-is-olv*). See *Sulphoricineolic Acid.*

Polysomatia (*pol-is-o-ma'-she-ah*). Synonym of *Polysarcia.*

Polysomatic (*pol-is-o-mat'-ik*) [πολύς, many; σῶμα, body]. Consisting of an aggregation of grains.

Polysomia (*pol-is-o'-me-ah*) [πολύς, many; σῶμα, body]. A type of monstrosity having more than a single body or trunk.

Polysomitic (*pol-is-o-mit'-ik*) [πολύς, many; σῶμα, body]. In biology, made up of a number of distinct somites.

Polyspaston (*pol-is-pas'-ton*) [πολύς, many; σπᾶν, to draw]. A pulley used for the reduction of dislocations.

Polysperm (*pol'-is-perm*) [πολύς, many; σπέρμα, seed]. In biology, a plant the fruit of which contains many seeds.

Polyspermal (*pol-is-per'-mal*). Same as *Polyspermous.*

Polyspermism (*pol-is-per'-mizm*) [πολύς, much; σπέρμα, seed]. The secretion and discharge of an excessive quantity of seminal fluid.

Polyspermous (*pol-is-per'-mus*) [πολύς, many; σπέρμα, seed]. In biology, containing many seeds, as a berry. Cf. *Pleiospermous.*

Polyspermy (*pol'-is-per-me*) [πολύς, many; σπέρμα, seed]. In biology, impregnation of an ovum by several spermatozoids.

Polyspire (*pol'-is-pir*) [πολύς, many; σπεῖρα, a coil]. In biology, having a continued spiral growth.

Polysporangium (*pol-is-po-ran'-je-um*) [πολύς, many; σπόρος, spore]. In biology, a sporangium containing many spores.

Polyspore (*pol'-is-por*) [πολύς, many; σπόρος, spore]. In biology, a compound spore.

Polyspored (*pol'-is-pord*) [πολύς, many; σπόρος, spore]. In biology, containing or producing many spores.

Polysporic (*pol-is-por'-ik*). Same as *Polysporous.*

Polysporous (*pol-is-por'-us*) [πολύς, many; σπόρος, spore]. In biology, producing many spores.

Polystachous (*pol-is'-tak-us*) [πολύς, many; στάχυς, an ear of corn, a spike]. In biology, having many spikes.

Polystemonous (*pol-is-tem'-o-nus*) [πολύς, many; στήμων, wasp (stamen)]. In biology, having many more stamens than petals. Cf. *Isostemonous, Polyandrous.*

Polystichia (*pol-is-tik'-e-ah*) [πολύς, many; στίχος, row]. A condition in which the eye-lashes are arranged in two or more rows.

Polystichous (*pol-is'-tik-us*) [πολύς, many; στίχος, row, line]. In biology, arranged in many rows. Cf. *Monostichous, Distichous.*

Polystigmous (*pol-is-tig'-mus*) [πολύς, many; στίγμα, mark]. In biology, applied to flowers that present many stigmas, from being polycarpellary.

Polystomatous (*pol-is-to'-mat-us*) [πολύς, many; στόμα, mouth]. Having many mouths or apertures.

Polystylous (*pol-is-ti'-lus*) [πολύς, many; στῦλος, column]. In biology, having several styles.

Polysulphid, Polysulphuret (*pol-is-ul'-fid, pol-is-ul'-fu-ret*) [πολύς, many; *sulphur*, sulphur]. A compound of an element or radicle with one or more molecules of sulphur.

Polysymmetria (*pol-is-im-et'-re-ah*) [πολύς, many; συμμετρία, symmetry]. Symmetry of the two sides of the body at two or more points.

Polytechnic (*pol-it-ek'-nik*) [πολύς, many; τέχνη, an art]. Comprising many arts.

Polyterpene (*pol-it-er'-pēn*) [πολύς, many; *terpene*]. In chemistry, one of a class of substances polymeric with the terpenes. Caoutchouc, gutta-percha, and dammar-resin are polyterpenes.

Polythalamic (*pol-ith-al'-am-ik*) [πολύς, many; θάλαμος, chamber]. In biology, having many chambers; thalamophorous.

Polythalamous (*pol-ith-al'-am-us*) [πολύς, many; θάλαμος, chamber]. In biology, having several chambers or compartments; multilocular.

Polythecial (*pol-ith-e'-se-al*) [πολύς, many; θήκη, case]. In biology, forming or pertaining to a polythecium.

Polythecium (*pol-ith-e'-se-um*) [πολύς, many; θήκη, a box: *pl.*, *Polythecia*]. In biology, a compound zoöthecium.

Polythelia, Polythelism (*pol-ith-e'-le-ah, pol'-ith-el-izm*) [πολύς, many; θηλή, nipple]. The presence of supernumerary nipples.

Polytocia (*pol-it-o'-se-ah*). Synonym of *Fecundity.*

Polytocous (*pol-it'-o-kus*) [πολύς, many; τεκεῖν, to bring forth]. In biology: (*a*) the bringing forth of several young at a birth; (*b*) producing fruit year after year.

Polytomous (*pol-it'-o-mus*) [πολύς, many; ταμεῖν, to cut]. In biology, applied to leaves which are divided into numerous parts, not true leaflets, or to stems repeatedly forked.

Polytomy (*pol-it'-o-me*) [πολύς, many; τέμνειν, to cut]. In biology, division into several parts.

Polytrichia, Polytrichosis (*pol-it-rik'-e-ah, pol-it-rik-o'-sis*) [πολύς, many; θρίξ, hair]. Excessive development of hair.

Polytrichous (*pol-it'-rik-us*) [πολύς, many; θρίξ, a hair]. In biology, bearing numerous hairs or cilia.

Polytrochal (*pol-it'-ro-kal*) [πολύς, many; τροχός, a wheel]. In biology, having several ciliated zones, as certain embryos. Cf. *Mesotrochal, Telotrochal.*

Polytrochous (*pol-it-ro'-kus*). Same as *Polytrochal.*

Polytrophia, Polytrophy (*pol-it-ro'-fe-ah, pol'-it-ro-fe*) [πολύς, much; τροφεῖα, nourishment]. Abundant or excessive nutrition.

Polytypal (*pol-it-i'-pal*) [πολύς, many; τύπος, type]. Exhibiting various types, or forms.

Polyuresia, Polyuresis (*pol-e-u-re'-ze-ah, pol-e-u-re'-sis*). Synonyms of *Polyuria.*

Polyuria (*pol-e-u'-re-ah*) [πολύς, much; οὖρον, urine]. Excessive secretion of urine. The causes of temporary polyuria are, excessive ingestion of fluids, cold, suppression of perspiration, the use of diuretics; it occurs in the crisis of fevers, and in certain neurotic conditions, as hysteria, and in nervous excitement. A permanent polyuria is met with in diabetes mellitus, diabetes insipidus, chronic interstitial nephritis, and in amyloid disease of the kidneys.

Polyuric (*pol-e-u'-rik*) [πολύς, many; οὖρον, urine]. 1. Pertaining to, or affected with, polyuria. 2. One affected with polyuria.

Polyvalent (*pol-iv'-al-ent*). Synonym of *Multivalent.*

Polyzoa (*pol-iz-o'-ah*) [πολύς, many; ζῷον, animal]. The sea-mats, or sea-mosses.

Polyzoan (*pol-iz-o'-an*) [πολύς, many; ζῷον, animal]. In biology: (*a*) a member of the group of *Vermes* more properly termed *Bryozoa*, which are developed in variously-shaped attached stocks; (*b*) one of the segmented tape-worms or cestode stocks arising by strobilation.

Polyzoarium (*pol-iz-o-a'-re-um*) [πολύς, many; ζῷον, an animal: *pl.*, *Polyzoaria*]. Same as *Zoarium.*

Polyzoary (*pol-iz-o'-a-re*) [πολύς, many; ζῷον, animal]. In biology, a compound polyzoan.

Polyzoöid (*pol-iz-o'-oid*) [πολύς, many; ζῷον, animal; εἶδος, form]. In biology, composed of many zoöids.

Poma (*po'-mah*) [πῶμα, lid, cover: *pl.*, *Pomata*]. The name applied to the so-called occipital operculum of the brain of the monkey.

Pomaceous (*po-ma'-se-us*) [*pomum*, apple]. Pertaining to the apple, or to fruits like the apple.

Pomade (*po'-mād*) [*pomum*, apple]. Any perfumed ointment or preparation for inunction of the scalp or other parts. **P., Putz,** a proprietary preparation used to burnish metal.

Pomander (*po-man'-der*) [*pomum*, apple]. A ball composed of aromatics, formerly carried about the person to prevent infection; also, the globular case in which the same was kept.

Pomarine (*pom'-ar-in*). See *Pomatorhine.*

Pomatic (*po-mat'-ik*) [πῶμα, lid]. Pertaining to the poma.

Pomatorhine (*po-mat'-o-rin*) [πῶμα, lid, cover; ῥίς, nose]. In biology, applied to birds which have an operculum over the nostrils.

Pomatum (*po-ma'-tum*). Same as *Pomade.*

Pome (*pōm*) [*pomum*, fruit]. In biology, a fleshy fruit like the apple, which is syncarpous, succulent, and whose bulk is made up chiefly of enlarged and adherent calyx.

Pomegranate (*pom'-gran-et*). See *Granatum.*

Pomiferous (*po-mif'-er-us*) [*pomum*, fruit; *ferre*, to bear]. Pome-bearing.

Pomiform (*po'-mif-orm*) [*pomum*, an apple; *forma*, form]. Having the form of a pome.

Pommade (*pom-ahd'*) [Fr.]. See *Pomade.*

Pommelière (*pom'-le-ār*) [Fr.]. Tuberculosis of cattle.

Pompeian Red. Same as *Ocher.*

Pompholygmus (*pom-fo-lig'-mus*) [πομφόλυξ, bubble]. A bullous eruption.

Pompholygodermatitis (*pom-fo-lig-o-der-mat-i'-tis*). Synonym of *Pemphigus.*

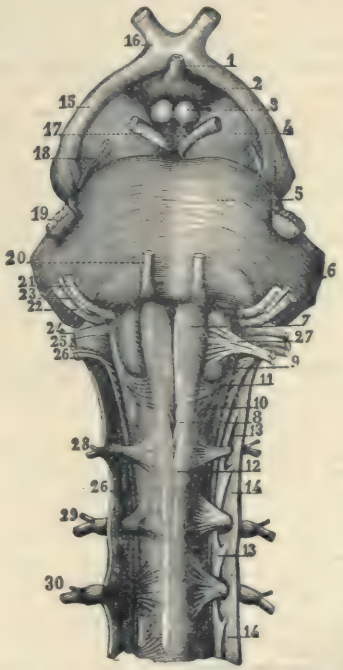
Pompholyx (*pom'-fo-liks*) [πομφόλυξ, bubble]. 1. *Cheiropompholyx; Dysidrosis.* A disease of rare occurrence, characterized by vesicular and bullous eruptions limited to the hands and feet. The disease occurs in depressed states of the nervous system, is

more common in women, but is met with chiefly in adult and middle life. By some it is considered a disease of the sweat-glands, by others not. The disease is curable, but tends to recur. 2. Sometimes used as a synonym for *Pemphigus*. 3. Zinc oxid, called *Flowers of Zinc*, and *Philosophers' Wool*.

Pomphus (*pom'-fus*) [πομφός, blister: *pl.*, *Pomphi*]. *Wheal; Urtica;* a circumscribed edema of the corium, producing a flat elevation of the epidermis at that point; it is usually the result of angio-neurotic irritation. Pomphi vary in size from a pin's head to a goose's egg, are of irregular outline, and of a whitish color with a pink areola. They are evolved rapidly, and usually last only a few hours or days.

Pomum (*po'-mum*) [L., *pl.*, *Poma*]. Apple. **P. adami** [L., *Adam's apple*], the ridge or prominence in the front of the neck caused by the projection of the thyroid cartilage. It is most marked in males. **P. quercina**, nut-gall.

Ponceau (*pon-so'*). See *Pigments, Conspectus of.*



Pond's Extract. See *Hamamelis.* **P.'s Recipe**, a recipe for varnish to preserve sphygmographic and cardiographic tracings. Alcohol, one pint; gum sandarac, three ounces; castor-oil, half ounce. Mix.

Ponding (*pond'-ing*) [ME., *pond*, a pond]. The accumulation of liquid as in a pond. **P. of the Liquor amnii**, the collection of a considerable amount of liquor amnii above the presenting part of the fetus after the membranes have ruptured in the second stage of labor.

Pongamia (*pon-ga'-me-ah*) [E. Ind. *pongam*]. A genus of East Indian trees. Kurung oil is the oil expressed from the seeds of *P. glabra*, native to India, China, and Australia. It is recommended in parasitic diseases of the skin, and is efficacious in pityriasis versicolor, herpes, and rheumatism, and is useful in lepra. Unof.

Ponos (*po'-nos*) [πόνος, pain]. A chronic febrile disease endemic on the Greek islands of Spetzia and Hydra. The disease bears some resemblance to pseudoleukemia and to tuberculosis.

Pons [*pons*, bridge]. A process or bridge of tissue connecting two parts of an organ. **P. cerebelli.** Same as *P. varolii.* **P. hepatis**, the hepatic substance sometimes extending from the quadrate to the left lobe of the liver. **P. tarini**, the *posterior perforated space*, a mass of gray substance lying behind the corpora albicantia and joining the crura cerebri. It helps to form the floor of the third ventricle. **P. varolii** (or simply *Pons*), a convex white eminence situated at the base of the brain, behind its center. It is placed cephalad of the oblongata, ventrad of the cerebellum, and caudad of the cerebrum, and is connected with all three. It rests upon the sphenobasilar groove; it is quadrate in outline, about 25 cm. wide antero-posteriorly, and is marked on its ventral surface by a longitudinal groove for the lodgment of the basilar artery. It is contracted laterally on account of the closer aggregation of its fibers, which converge to form the middle peduncles of the cerebellum. Its cephalic margin is convex and well defined, and arches over the crura. From the cephalad surface of the pons, a little ventral, arises the fifth or trigeminus nerve. In structure the pons consists chiefly of nerve-fibers, but it contains also areas of gray matter, the *pontine nuclei*. On section it consists of two portions, a dorsal and a ventral. The latter contains transverse commissural fibers and is traversed by the ventral pyramids of the oblongata. The pyramidal fibers in the caudal half of the pons are collected into two closely-packed groups of bundles invested in front and behind by a layer of transverse fibers; higher up, above the middle of the pons, the pyramidal tracts become separated by the penetrating transverse bundles into a number of fasciculi. The presence of the pyramids thus gives rise to three sets of fibers—the ventral or *superficial*, the dorsal or *deep*, and the middle or *penetrating*. Interspersed in the gray matter occupying the interstices of the ventral portion of the pons small *multipolar cells* are found. The *dorsal* portion of the pons consists largely of gray matter which is continued up from below, especially the *formatio reticularis* and the *dorsal tracts* of gray substance. In places the gray matter is grouped to form the nuclei of the fifth, sixth, seventh, and eighth nerves. In the lower part of the pons there is a small, folded gray lamina, distinguished as the superior olivary nucleus. It is enclosed by some transverse fibers known as the trapezium. A group of darkly-pigmented cells is found in

Pons and Medulla. Anterior Aspect.

1. Infundibulum. 2. Tuber cinereum. 3. Corpora albicantia, or mammillaria. 4. Cerebral peduncle. 5. Pons varolii. 6. Middle cerebellar peduncle. 7. Anterior pyramid. 8. Decussation. 9. Olivary body. 10. Gray tubercle of Rolando. 11. Arciform fibers. 12. Superior extremity of spinal cord. 13, 13. Denticulate ligament. 14. Spinal dura mater. 15. Optic tract. 16. Optic chiasm. 17. Third nerve. 18. Fourth nerve. 19. Fifth nerve. 20. Sixth nerve. 21. Facial nerve. 22. Auditory nerve. 23. Nerve of Wrisberg. 24. Glossopharyngeal nerve. 25. Vagus nerve. 26, 26. Spinal accessory nerve. 27. Hypoglossal nerve. 28. 1st cervical pair. 29. 2d cervical pair. 30. 3d cervical pair.

the floor of the fourth ventricle; collectively, this is visible to the naked eye as a dark area, known as the *substantia ferruginea;* seen through the floor of the fourth ventricle, this area appears of a bluish-gray color, whence the name *locus cæruleus*. Mesad of the substantia ferruginea lies an angular tract of white matter, the *posterior longitudinal bundle*, which is a continuation upward of the ventral ground-bundle of the cord. The pons is developed from that part of the third brain-vesicle known as the *hind-brain* or *epencephalon*.

Pontal (*pon'-tal*) [*pons*, bridge]. Same as *Pontile.*

Pontibrachium (*pon-tib-ra'-ke-um*) [*pons*, bridge; *brachium*, arm]. The middle peduncle of the cerebellum.

Pontic (*pon'-tik*) [*pons*, bridge]. Same as *Pontile*.

Ponticulus (*pon-tik'-u-lus*) [dim. of *pons*, bridge]. A small, transverse ridge between the pyramids of the oblongata and the pons. **P. auriculæ**, a slight prominence on the eminentia conchæ for the attachment of the retrahens aurem muscle. **P. hepaticus**, a bridge of tissue, containing a plexus of blood-vessels, and extending from the surface of the Spigelian to that of the right lobe of the liver.

Pontile (*pon'-til*) [*pons*, bridge]. Pertaining to the pons. **P. Hemiplegia**, this is very often an *alternate hemiplegia*, in which the arm and leg on one side, and the face on the other, are paralyzed. This condition occurs when the lesion is situated low down in the pons, below the decussation of the fibers of the facial nerve, and above that of the pyramidal tracts. Small lesions high in the pons, produce an ordinary hemiplegia. **P. Nuclei**, a collection of gray matter in the pons.

Pontinal (*pon'-tin-al*) [*pons*, a bridge]. In biology, bridging; applied specifically to one of the bones in the skull of certain fishes, bridging the space between the sub-orbital region and preoperculum (*Dactylopteroidea*).

Pontine (*pon'-tin*) [*pons*, bridge]. Same as *Pontile*.

Ponto-bulbar (*pon'-to-bul'-bar*) [*pons*, bridge; *bulbus*, bulb]. Pertaining to the pons varolii and to the bulbus spinalis (or oblongata).

Ponto-crural (*pon'-to-kru'-ral*) [*pons*, bridge; *crus*, leg]. Pertaining to the pons varolii and the crura cerebri.

Poop, Pope (*poop*, *pōp*) [origin obscure]. A colloquial term used by foot-ball players to designate an injury to the front and outer side of the thigh, which causes more or less disability.

Poor-man's Bandage. See *Galen's Bandage*.

Pop-eyed (*pop'-īd*). Having pop-eyes. **P.-eyes**, full and bulging eyes. See *Exophthalmos*.

Poplar (*pop'-lar*). See *Populus*.

Popies (*pop'-lēz*) [L.]. The back of the knee, or popliteal space.

Popliteal (*pop-lit-e'-al*) [*poples*, ham; *ad*, to]. Toward the popliteal aspect.

Popliteal (*pop-lit-e'-al*) [*poples*, ham, hock, or knee]. Pertaining to the hinder part of the knee-joint or ham.

DEEP VIEW OF THE POPLITEAL SPACE.

1. Popliteal vein. 2. Popliteal artery. 3. Internal popliteal nerve. 4. Vastus internus. 5. Superior internal articular artery. 6. Tendon of semi-membranosus. 7. Inner head of gastrocnemius. 8. Inferior internal articular artery. 9. Popliteal vein. 10. Popliteus. 11. Tendon of plantaris. 12. Short head of biceps. 13. External popliteal nerve. 14. Long head of biceps, cut. 15. Outer head of gastrocnemius. 16. Communicans peronei nerve. 17. Soleus.

P. Aneurysm, aneurysm of the popliteal artery. **P. Artery.** See *Arteries*, *Table of*. **P. Aspect**, the posterior aspect of the knee. **P. Bursa**, one of the bursæ in the popliteal space. **P. Glands**, the lymphatic glands of the popliteal space. **P. Ligament**, the posterior ligament of the knee-joint. **P. Nerve.** See *Nerves*, *Table of*. **P. Region.** Same as *P. Space*. **P. Space**, the lozenge-shaped space occupying the lower third of the thigh and the upper fifth of the leg. Its boundaries are: above, and to the outer side, the tendon of the biceps; on the outer side, and below, the plantaris and the outer head of the gastrocnemius; on the inner side, above, from within outward the semitendinosus, the semimembranosus, and the gracilis, on the inner side, below, the inner head of the gastrocnemius. The roof is formed by the popliteal fascia; the floor, by the lower part of the posterior surface of the shaft of the femur, the posterior ligament of the knee-joint, the upper end of the tibia, and the fascia covering the popliteus muscle. The contents of the space are: the popliteal vessels and their branches, the termination of the external saphenous vein, the internal and external popliteal nerves and their branches, the small sciatic nerve, the articular branch from the obturator nerve, a few lymphatic glands, and some adipose tissue. **P. Surface**, the surface of the femur between the supracondylar lines. **P. Tendons**, the tendons of the muscles forming the boundaries of the popliteal space; the hamstrings. **P. Vein**, the companion vein of the popliteal artery.

Popliteen (*pop-lit-e'-en*) [*poples*, ham]. Belonging to the popies in itself.

Popliteus, Poplitæus (*pop-lit-e'-us*) [*poples*, ham]. Pertaining to the popies. The ham or hinder part of the knee-joint. **P. accessorius**, a small anomalous muscle arising from the external femoral condyle or from a sesamoid bone in the external gastrocnemius, and inserted into the capsular ligament of the knee-joint. **P. biceps, P. geminus.** Synonyms of *P. accessorius*. **P. Muscle.** See *Muscles*, *Table of*.

Poplitic (*pop-lit'-ik*) [*poples*, the ham]. Popliteal.

Poppy (*pop'-e*) [ME., *popy*, poppy]. See *Papaver*. **P.-seed**, the seeds of *Papaver somniferum*, used in Germany, and sometimes among Germans in this country, to strew on the bread-dough in order to give it a certain flavor. **P.-seed Oil**, *Oleum papaveris*, is obtained from the seeds of the opium-poppy by pressure. It is of a pale-yellow color and a slightly sweetish taste; specific gravity, .925 at 15° C. It is used for salads, paints, soaps, and to adulterate olive oil and almond-oil.

Population (*pop-u-la'-shun*) [*populus*, people]. The mass of people dwelling within a given geographic or political area. **P., Malthusian Law of Increase of**, that the number of individuals of a society tends to increase faster than the food-product, so that there is always a pressure on the means of subsistence.

Populin (*pop'-u-lin*) [*populus*, poplar], $C_{20}H_{22}O_8$. 1. Benzosalicin. A substance contained in several varieties of poplar; it is the benzoyl derivative of salicin; it crystallizes in small prisms containing two molecules of water, dissolves with difficulty in water, and possesses a sweet taste. It is said to possess febrifuge properties, and has also been used in dysuria. 2. A precipitate from a tincture of the bark of *Populus tremuloides*; tonic, stomachic, vermifuge, anti periodic, and febrifuge. Dose 2 to 4 grains. Unof.

Populus (*pop'-u-lus*) [L.]. Poplar. The resin of the leaf-buds of several species is used for pectoral and nephritic troubles. Unof.

Porcate (*por'-kāt*) [*porca*, a ridge between two furrows]. In biology, deeply furrowed.

Porcelain (*pors'-len*) [It., *porcellana*, porcelain]. An

impure silicate of aluminum, non-transparent and exceedingly infusible. It is made from porcelain-clay, or kaolin ($H_2Al_2Si_2O_8 + H_2O$), derived from feldspar rock by the atmospheric process known as "weathering." Heated in a furnace, it loses water, and a porous mass is produced. In making porcelain the powdered kaolin is mixed with water to a thick paste, and then molded into the desired shape. A little feldspar, chalk, or gypsum is added to the clay in order to form a fusible silicate, in quantity just sufficient to bind the particles of clay firmly together. Upon firing, as the process is called, a porous "biscuit-ware" is obtained, which is afterward subjected to the process of glazing. For the finest porcelain the glazing material is feldspar; for the cheaper varieties a mixture of clay, chalk, ground-flints, and borax is used. Earthenware is salt-glazed. There are also other methods of glazing. The colors used in decorating porcelain consist of various metallic oxids, and may be applied before or after glazing. **P.-glass,** a glass which resembles porcelain, made by fusing cryolite, a double fluorid of aluminum and sodium, with sand. **P. Teeth,** *mineral teeth; incorruptible teeth; silicious terro-metallic teeth; vitrescent teeth;* dental substitutes, resembling, more or less closely, the shape and color of the natural teeth, so constructed that they may be securely fixed to the various attachments employed for their adjustment and retention in the mouth. They are composed of feldspar, silex, and other mineral substances.

porcupine (*por'-ku-pin*) [*porcus*, a hog; *spina*, spine]. A rodent quadruped of the family *Hystricidæ*. It is covered with sharp spines. **P. Disease.** See *Hystrix*. **P.-men,** persons affected with *Ichthyosis hystrix*. **P.-skin,** an extreme degree of *Ichthyosis hystrix*.

pore (*pōr*) [πόρος, a pore]. In biology, a minute circular opening or perforation. **P., Abdominal,** in certain fishes, the opening by which the abdominal cavity communicates with the exterior, and through which the ova are discharged. **Ps. of the Skin,** the openings of the ducts of the sebaceous and sweat-glands of the skin. **Ps., Sweat,** the orifices of the ducts of the sweat-glands. **P., Vascular,** in the round-worms, a transverse opening situated on the ventral surface and forming the common orifice of the two lateral vessels which are thought to be excretory organs.

porencephalia (*por-en-sef-a'-le-ah*) [πόρος, cavity; ἐγκέφαλος, brain]. The presence of depressions on the surface of the hemispheres of the brain, owing to absence of portions of brain-substance. The defects are covered by pia and arachnoid, except in cases in which a communication with the ventricles exists. The term is generally restricted to limited congenital defects, although by some it is extended to include those that are acquired.

porencephalic (*por-en-sef-al'-ik*). Same as *Porencephalous*.

porencephalous (*por-en-sef'-al-us*) [πόρος, cavity; ἐγκέφαλος, brain]. Affected with porencephalia.

porencephalus (*por-en-sef'-al-us*). See *Porencephalia*.

porencephaly (*por-en-sef'-al-e*). Synonym of *Porencephalia*.

poreutes (*po-ru'-tēz*) [πορεύειν, to convey]. Ameboid cells of Kollmann, derived from aëroblasts, from which the blood and its corpuscles, the endothelium of the vessels, and the wandering cells are developed.

poriferous (*por-if'-er-us*) [πόρος, pore; *ferre*, to bear]. In biology, provided with pores.

poriform (*por'-if-orm*) [πόρος, pore; *forma*, form]. Having the form of a pore.

Poristotropia (*por-is-to-tro'-pe-ah*) [πορίζειν, to provide; τροπή, a turning]. A chemic process by which, according to Ritgen, the existing atoms are destroyed and new atoms produced whenever a new substance is formed.

Pork [*porcus*, hog]. The flesh of swine, *Sus scrofa*. **P., Diseases of,** the parasitic diseases are of interest. Pork may be infested with the scolices of the *Tænia solium* and with the *Trichina spiralis*. The former, known as *cysticercus cellulosæ*, or "*measle*," is contained within a fibrous capsule. If such measly pork is ingested in the raw state by man, the cyst-wall is dissolved in the stomach, and the scolex is set free, and develops into a tape-worm. Pork containing trichinæ, if eaten without proper cooking, gives rise to trichiniasis, a grave and sometimes fatal disease. See *Trichiniasis* and *Measles;* also *Cysticercus* and *Trichina*, under *Parasites* (*Animal*), *Table of*. An important infectious disease of swine is *Rouget du porc*, *Schweinerothlauf*, or *Swine-plague*. See *Rouget du porc*, and *Bacillus erysipelatos suis*, Pasteur, and *Bacillus of Swine-plague*, *Marseilles*, Rietsch and Jobert, under *Bacteria*, *Synonymatic Table of*

Pornograph (*por'-no-graf*) [πόρνη, prostitute; γράφειν, to write]. An obscene picture or writing.

Pornographer (*por-nog'-ra-fer*) [πόρνη, prostitute; γράφειν, to write]. One who writes of prostitutes or obscene subjects.

Pornographic (*por-no-graf'-ik*) [πόρνη, prostitute; γράφειν, to write]. Of or pertaining to pornography.

Pornography (*por-nog'-ra-fe*) [πόρνη, a prostitute; γράφειν, to write]. 1. A treatise on prostitution, with reference to public hygiene. 2. Obscene writing.

Porocele (*po'-ro-sēl*) [πῶρος, callus; κήλη, tumor]. A scrotal hernia in which the coverings are calloused or hardened.

Porodinic (*po-ro-din'-ik*) [πόρος, a pore; δῖνος, rotation, a round area]. In biology, reproduction by means of genital pores; distinguished from *Schizodinic*. Cf. *Nephrodinic*, *Idiodinic*.

Porokeratosis (*po-ro-ker-at-o'-sis*) [πῶρος, callus; κέρας, a horn]. A keratosis appearing in raised or smooth areas, of varying size, irregular form, circumscribed outline, at the summit of which a thin layer of horny tissue of linear arrangement is present. The affection is usually seated on the dorsal aspect of the hands and feet (never on the palmar or plantar surface), the extensor aspect of the forearms and legs, neck, face and scalp.

Poroma (*po-ro'-mah*) [πώρωμα]. A callosity.

Poromphalocele (*po-rom-fal'-o-sel*) [πῶρος, callus; ὀμφαλός, navel; κήλη, tumor]. An umbilical hernia with hardened contents.

Poromphalon, Poromphalos (*po-rom'-fal-on, po-rom'-fal-os*). Synonym of *Poromphalocele*.

Porophyllous (*por-o-fil'-us*) [πόρος, pore; φύλλον, leaf]. In biology, having leaves sprinkled with transparent points.

Poroplastic (*por-o-plas'-tik*) [πόρος, pore; πλάσσειν, to mold]. Porous and plastic. **P. Felt,** a porous felt which is readily molded; it is used in the preparation of splints and jackets. **P. Jacket,** a form of jacket used in the treatment of spinal curvatures.

Porose (*por'-ōz*) [*porus*, a pore]. In biology, perforate.

Porosis (*po-ro'-sis*) [πῶρος, callus]. The formation of callus. **P., Osteo-.** See *Osteoporosis*. **P. palpebræ.** Synonym of *Chalazion*.

Porosity (*por-os'-it-e*) [πόρος, cavity]. The condition of being porous.

Porotic (*po-rot'-ik*) [πῶρος, callus]. Favoring the formation of callus. Of the nature of callus.

Porotomy (*por-ot'-o-me*) [πόρος, pore; τομή, a cutting]. The operation of enlarging by incision the meatus of the urethra.

Porous (*po'-rus*) [πόρος, cavity, pore]. Having small openings, or pores.

Porphyra (*por'-fir-ah*) [πορφύρα, purple]. Porphyry, one of the eruptive rocks. The leaf or tablet of porphyra is used by pharmacists in the preparation of compounds. The name has been used to designate scurvy and purpura, *q. v.* **P. nautica.** Synonym of *Scurvy*. **P. of the Greeks.** Synonym of *Purpura*.

Porphyration (*por-fir-a'-shun*) (πορφύρα, purple]. The term applied by Küss and Duval to the first stage in the gastric digestion of albuminoid substances.

Porphyrin (*por'-fir-in*) [πορφύρα, purple]. An amorphous substance contained in a variety of *Dita bark*.

Porphyrisma (*por-fir-iz'-mah*) [πορφύρα, purple]. Synonym of *Scarlet-fever*.

Porphyrization (*por-fir-iz-a'-shun*) [πορφύρα, purple]. In pharmacy, the pulverization of a substance by crushing it with a muller on a hard surface, usually of porphyry.

Porphyrodermitis (*por-fir-o-der-mi'-tis*) [πορφύρα, purple; δέρμα, skin; ιτις, inflammation]. One of a group of skin-diseases including hemorrhagic maculæ and petechiæ.

Porphyrotyphus (*por-fir-o-ti'-fus*) [πορφύρα, purple; τῦφος, typhus]. Synonym of *Typhus Fever*.

Porphyroxin (*por-fir-oks'-in*) [πορφύρα, purple; ὀξύς, acid]. 1. One of the alkaloids of opium, becoming purple when heated with dilute hydrochloric acid. 2. Porphyrin, *q. v.*

Porphyruria (*por-fir-u'-re-ah*) [πορφύρα, purple; οὖρον, urine]. The discharge of urine colored with purpurin.

Porpoise Oil. See *Oleum delphini*.

Porraceous (*por-a'-se-us*) [*porrum*, leek]. Of stools, green-colored, like leek-leaves.

Porrect (*po'-rekt*) [*por*, forth; *regere*, to stretch]. In biology, outstretched.

Porret's Phenomenon. When a galvanic current is conducted through living, fresh, sarcous substance, the contents of the muscular fiber exhibit a streaming movement from the positive to the negative pole (as in all other fluids), so that the fiber swells at the negative pole. See also *Phenomenon*.

Porrigo (*por-i'-go*) [L., gen. *Porriginis*]. An obsolete term applied to several diseases of the scalp. **P. amiantacea.** Synonym of *Seborrhœa capitis*. **P. contagiosa.** See *Impetigo contagiosa*. **P. decalvans.** See *Alopecia areata*. **P. favosa.** See *Favus*. **P. furfurans.** Synonym of *Tinea tonsurans*. **P. larvalis,** impetigo of the scalp conjoined with eczema. **P. lupinosa.** Synonym of *Tinea favosa*. **P. scutulata.** Synonym of *Favus*. **P. tonsoria.** Synonym of *Alopecia areata*.

Porrigophyta, Porrigophyte (*por-ig-off'-it-ah, por'-ig-o-fit*). Same as *Favus*.

Porrisic Acid (*por-iz'-ik*). See *Euxanthinic Acid*.

Porro's Operation. See *Operation, Porro's*.

Port [after *Oporto*, a city in Portugal]. A wine of Portugal. **P.-wine.** Same as *Port*. See also *Vinum*. **P.-wine Mark** or **Stain.** See *Nævus vascularis* and *N. maternus*.

Porta (*por'-tah*) [L.]. 1. Gate; the hilus of an organ through which the vessels enter. 2. The foramen of Monro. **P. hepatis, P. jecoris,** the transverse fissure of the liver, through which the vessels enter. **P. labyrinthi,** the fenestra rotunda. **P. omenti,** the foramen of Winslow.

Portagion (*por-ta'-je-on*) [*portagium*, portage; *portare*, to carry. Cf. *Contagion*]. A portable *materies morbi*; a disease-germ that may be carried; the transmission or carrying from place to place, of disease-germs.

Portal (*por'-tal*) [*porta*, gate]. Pertaining to the porta or hilus of an organ, especially to the port hepatis. **P. Canals,** tubular passages in the hepati substance, containing each a branch of the portal vein of the hepatic artery, and of the hepatic duct. **P Circulation,** "the passage of venous blood from th capillaries of one organ to those of another befor reaching the heart. There are two such circulations through the liver and through the kidneys, distin guished as *hepatoportal* and *reniportal*. Only th former occurs in man." The portal circulation o the human body includes the venous blood from th chylopoietic viscera (stomach, spleen, and intestines and this is carried to the liver by means of the port vein. **P. Fissure.** See *Fissure*. **P. Fossa,** th transverse fissure of the liver. **P. System,** the syste of veins collecting the venous blood from the dige tive tract. **P. Vein,** the large vein entering the live at the transverse fissure, and bringing to it the bloo from the digestive tract and the spleen.

Portal's Syrup. A syrup used in scurvy, and con taining horseradish-root, scurvy-grass, nasturtium gentian, cinchona, and madder.

Porte-, or **Port-** [*portare*, to carry]. A carrier, o holder. **P.-acid,** an instrument for the local appli cation of an acid. **P.-aiguille.** See *Needle-holder* **P.-caustique,** a holder for the stick of caustic. **P. cordon,** an instrument for replacing a prolapse funis. **P.-crayon.** See *P.-caustic*. **P.-fil.** Syno nym of *P.-ligature*. **P.-fillet,** an instrument fo applying a fillet to some part of the fetal body. **P. ligature,** an instrument for applying a ligature to deep part. **P.-moxa.** See *Moxa*. **P.-nœud,** a instrument for applying a ligature to the pedicle of tumor. **P.-pierre.** Synonym of *P.-caustique*.

Porter (*por'-ter*). See *Malt Liquors*.

Porter's Sign. See *Tracheal Tugging*, and *Signs an Symptoms, Table of*.

Porticus subgenitalis. See *Syndemnium*.

Portio (*por'-she-o*) [L.]. Portion. Also, an abbre viated expression for portio vaginalis uteri—the vagina portion of the uterus. **P. alba cerebri,** the white substance of the brain. **P. aryvocalis,** a short muscle attached anteriorly to the vocal band and posteriorly to the vocal process of the arytenoid cartilage. **P axillaris,** the second part of the axillary artery. **P brachialis,** the third part of the axillary artery. **P cervicalis,** the third part of the subclavian artery **P. cervicis uteri,** the cervix of the uterus. **P. corporis striati externa,** the lenticular nucleus. **P corporis striati interna,** the caudate nucleus. **P dura,** the facial nerve. That part of the seventh pair of nerves of Willis controlling the muscles of facial expression. **P. infravaginalis,** the vaginal por tion of the neck of the uterus. **P. inter duram et mollem,** a small funiculus between the portio dura and portio mollis of the seventh cranial nerve. **P. intermedia wrisbergii.** Synonym of *P. inter duram et mollem*. **P. mollis,** the auditory nerve. **P muscularis,** the second division of the subclavian artery. **P. pectoralis,** the first division of the sub clavian artery. **P. pylorica ventriculi,** the pylori extremity of the stomach. **P. splenica ventriculi,** the cardiac extremity of the stomach. **P. thoracica,** the first part of the axillary artery. **P. ventriculi lienalis.** Synonym of *P. splenica ventriculi*.

Portion (*por'-shun*) [*portio*, a part]. A part or section **P., Descending, of the Duodenum,** the second por tion of the duodenum. It is about three inches in length covered anteriorly by the peritoneum, and attached

laterally to the head of the pancreas. It lies behind the transverse colon and in front of the right kidney. The ductus communis choledochus empties into it. **P., Iliac** (*of the fascia lata*), the portion of the fascia lata to the outer side of the saphenous opening. **P., Infra-vaginal, P., Intravaginal,** the portion of the uterine cervix projecting into the vagina. **P., Membranous** (*of the urethra*), the portion of the urethra enclosed between the two layers of the triangular ligament. **P., Pes,** the lower surface of a crus cerebri (Spitzka). **P., Prostatic** (*of the urethra*), the part of the urethra surrounded by the prostate gland; it is the most dilatable portion and is rarely, if ever, the seat of stricture. **P., Spongy** (*of the urethra*), the part of the urethra anterior to the anterior layer of the triangular ligament, and extending from the latter to the glans. **P., Vaginal** (*of the uterus*), the part of the neck of the uterus projecting into the vagina.

Portiplex, Portiplexus (*por'-tip-leks, por-tip-leks'-us*) [*porta*, gate; *plexus*, plexus]. The plexus or vascular fringe that connects the two lateral choroid plexuses. It passes through the *porta*, or foramen of Monro, whence the name.

Porus (*po'-rus*) [πόρος, *porus*, a pore: *pl.*, *Pori*]. A callosity. Also a canal, duct, or pore. **P. acusticus externus,** the external opening of the external auditory canal. **P. acusticus internus,** the opening of the internal auditory canal. **P. auditorius externus.** Synonym of *P. acusticus externus*. **P. biliaris,** one of the biliary ducts. **P. centralis,** the canal in the optic nerve through which the central artery of the retina passes. **P. cranio-nasalis,** the foramen cæcum of the frontal bone. **P. deferens.** Synonym of *Vas deferens*. **P. opticus,** the large opening in the center of the lamina cribrosa, transmitting the central artery of the retina. **P. pulmoneus,** an air-cell.

Posis (*po'-sis*) [πόσις, a drinking]. A potion.

Position (*po-zish'-un*) [*ponere*, to place]. 1. Location; situation; attitude; posture. See *Posture*. See, also, *Table of Position and Direction*, appended. 2. In chemistry, a term corresponding to that of "union" (linking), formerly used. **P., Articulation.** See *Consonants*. **P., Cadaveric,** of the vocal bands, the position which they assume in paralysis of the recurrent laryngeal nerve. The affected band is in the median position, and is perfectly motionless. **P. of the Fetus,** the relation of the presenting part to the cardinal points of Capuron. For the *vertex*, the *face* and the *breech*, there are each four positions: a *right anterior*, a *right posterior*, a *left anterior* and a *left posterior*. For each of the *shoulders* there is an *anterior* and a *posterior* position. In order to shorten and memorize these positions, the initials of the chief words are made use of as follows: For vertex presentations the word occiput is indicated by the letter *O.*, and preceded by the letter *R.* or *L.*, for right or left, and followed by *A.* or *P.*, according as the presenting part is anterior or posterior. We thus have the initials *L. O. A.*, left-occipito anterior, to indicate that the presenting occiput is upon the anterior left side. In the same way are derived the terms, *L. O. P.*, *R. O. A.*, *R. O. P.* For facial presentations we have in the same way, *L. F. A.* (left fronto-anterior), *L. F. P.*, *R. F. A.*, *R. F. P.* For breech or sacral presentations, *L. S. A.*, *L. S. P.*, *R. S. A.*, *R. S. P.*, and for shoulder (*dorsal*) presentations, *L. D. A.*, *L. D. P.*, *R. D. A.*, *R. D. P.* See *Table of Fetal Positions*, under *Fetus*. **P., Primary** (*of the eyes*), that position in which the eyes can move laterally and vertically without rotating the vertical axis. **P., Roser** (*of the head*), the head dependent over the end of a table. **P., Secondary** (*of the eyes*), that position in which the vertical meridian is rotated away from its vertical position. **P., Shoe-and-Stocking,** a position so named by Allis, in which the limb of one side is crossed upon the other, as in putting on the shoe and stocking, with the external malleolus of one side upon the patella of the opposite side. Inability to do this is diagnostic of disease in the hip-joint on that side. **P.-test,** a test for the function of coördination. If a normal individual be placed in a strictly erect position, with the heels and toes of the two feet closely approximated, a certain amount of swaying of the body occurs, especially if the eyes be shut. If, however, there be loss of coördinating power, this swaying is greatly augmented. See *Romberg's Symptom* in *Signs and Symptoms, Table of*.

POSITION AND DIRECTION—TABLE OF INTRINSIC TERMS

EMPLOYED IN HUMAN AND COMPARATIVE ANATOMY AND ZOÖLOGY. THE TERMS ARE IN PAIRS, AND THE ADVERBIAL FORM FOLLOWS THE LATIN AND ENGLISH ADJECTIVE FORMS.

Latin Adjective Form.	English Adjective and Adverbial Form.	Definitions.	Extrinsic Equivalents.	
			In Human Anatomy.	In Comparative Anatomy.
Afferens.	Afferent.	Conveying or conducting toward.	Same as the intrinsic.	Same as the intrinsic.
Efferens.	Efferent.	Conveying or conducting from.		
Caudalis.	Caudal, caudad.	At or in the direction of the tail end or aspect of the body or part.	Lower; inferior.	Back; backward; posterior.
Cephalicus.	Cephalic, cephalad.	At or in the direction of the head end or aspect of the body or part.	Upper; superior.	Front; forward; anterior.
Centralis.	Central, centrad.	At or in the direction of a center.	Same as the intrinsic.	Same as the intrinsic.
Peripheralis.	Peripheral, peripherad.	At or in the direction of the periphery.		
Dextralis, dexter.	Dextral, dextrad.	At or in the direction of the right side or aspect of the body.	Same as the intrinsic.	Same as the intrinsic.
Sinistralis, sinister.	Sinistral, sinistrad.	At or in the direction of the left side or aspect of the body.		
Distalis.	Distal, distad.	At or in the direction of the extremity of an appendage; peripheral (*q. v.*).	Same as the intrinsic.	Same as the intrinsic.
Proximalis, proximus.	Proximal, proximad.	At or in the direction of the attached or more important end of an appendage; central (*q. v.*).		

POSITION AND DIRECTION—TABLE OF INTRINSIC TERMS.—*Continued.*

Latin Adjective Form.	English Adjective and Adverbial Form.	Definitions.	Extrinsic Equivalents.	
			In Human Anatomy.	In Comparative Anatomy.
Dorsalis.	Dorsal, dorsad.	At or in the direction of the dorsum, or dorsal aspect of the body or of an organ.	Back; backward; posterior.	Upper; upward; superior.
Ventralis.	Ventral, ventrad.	At or in the direction of the ventral aspect of the body or of an organ.	Front; forward; anterior.	Lower; downward; inferior.
Dorsimesalis.	Dorsimesal, dorsimesad.	At or in the direction of the dorsimeson.	Same as the intrinsic.	Same as the intrinsic.
Ventrimesalis.	Ventrimesal, ventrimesad.	At or in the direction of the ventrimeson.		
Dorsimeson.	Dorsimeson.	The dorsal edge of the meson.	Same as the intrinsic.	Same as the intrinsic.
Ventrimeson.	Ventrimeson.	The ventral edge of the meson.		
Ectalis.	Ectal, ectad.	At or in the direction of some surface away from the center or axis.	Outer; superficial; external.	Same as the intrinsic.
Entalis.	Ental, entad.	At or in the direction of some surface nearer a center or axis.	Inner; inward; internal; profound.	
Lateralis.	Lateral, laterad.	At or in the direction of the side (right or left of the body).	Same as the intrinsic.	Same as the intrinsic.
Mesalis.	Mesal, mesad.	At or in the direction of the meson.		
Longisectio.	Longisection.	A section lengthwise of the body or of an organ.	Same as the intrinsic.	Same as the intrinsic.
Medisectio.	Medisection.	A sagittal section at the meson.	Median section.	Median section.
Transectio.	Transection.	A section across the long axis of the body or of an organ.	Same as the intrinsic.	Same as the intrinsic.
Sectio frontalis.	Frontal section.	A section dividing the body into equal or unequal dorsal and ventral parts or sections.	Same as the intrinsic.	Same as the intrinsic.
Sectio sagittalis.	Sagittal section.	A section dividing the body into equal or unequal right and left sections or parts.		

Positive (*poz'-it-iv*) [*positivus*, positive]. In static electricity, a term denoting that quality of the force produced by rubbing glass with silk. In galvanic and dynamic electricity, the current flowing from the less oxidizable element through the wire or conductor. **P. Electrode.** Synonym of *P. Pole.* **P. Element,** the more oxidizable element of a battery—usually a plate of zinc. **P. Ocular.** See *Ocular.* **P. Pole,** the pole connected with the negative plate or element. See *Anode.*

Posologic, Posological (*poz-o-loj'-ik, poz-o-loj'-ik-al*) [πόσος, how much; λόγος, science]. Pertaining to posology or quantitative dosage.

Posology (*poz-ol'-o-je*) [πόσος, how much; λόγος, science]. The science of the dosage of medicines.

Possession (*poz-esh'-un*) [*possedere*, to possess]. The condition of being possessed or possessing; madness, lunacy. **P., Demoniac,** the condition of being possessed or inhabited by demons.

Posset (*pos'-et*) [*posca*, sour wine and water]. A preparation of milk curdled with wine.

Possetting (*pos'-et-ing*) [*posca*, sour wine]. The regurgitation of infants.

Post- (*pōst*) [L.]. A preposition meaning after. Prefixed to words it places them in antithesis to those combined with *pre* or *præ*, and has the force of either an adverb or an adjective. Also as a noun, a mononym for postmortem; as a verb, a popular expression signifying to perform an autopsy.

Postabdomen (*pōst-ab-do'-men*) [*post*, behind; *abdomen*, abdomen]. In biology, the posterior abdominal part of the body in insects or crustaceans.

Postabdominal (*pōst-ab-dom'-in-al*) [*post*, after; *abdomen*, abdomen]. Pertaining to the postabdomen.

Postacetabular (*pōst-as-et-ab'-u-lar*) [*post*, after; *acetabulum*, acetabulum]. Situated behind the acetabulum.

Postanal (*pōst-a'-nal*) [*post*, after; *anus*, anus]. Situated behind the anus.

Postapoplectic (*pōst-ap-o-plek'-tik*) [*post*, after; ἀποπληξία, apoplexy]. Coming on, or occurring, after a stroke of apoplexy. **P. Coma,** the coma that often succeeds an apoplectic stroke.

Postarytenoid (*pōst-ar-i'-te-noid*) [*post*, after; ἀρύταινα, a pitcher; εἶδος, like]. Situated behind the arytenoid.

Postauditory (*pōst-aw'-dit-o-re*) [*post*, behind; *audire*, to hear]. Situated behind the auditory nerve, or chamber. **P. Fossa,** a crescentic notch on the temporal bone, separating the temporal ridge from the auditory plate. **P. Processes,** in biology, processes situated behind the auditory chamber in certain fishes.

Postaxial (*pōst-aks'-e-al*) [*post*, after; *axis*, axes]. Situated posterior to the long axis; in the arm, situated on the ulnar, in the leg, on the fibular side. In the embryo, directed dorsad from the long axis.

Post-boys' Malady. See *Malady.*

Postbrachial (*pōst-bra'-ke-al*) [*post*, after; *brachium*, arm]. Situated posterior to, or beyond, the arm.

Postbrachium (*pōst-bra'-ke-um*) [*post*, after; *brachium*, arm]. The posterior brachium of the corpus quadrigeminum, seen on the lateral slope of the mesencephal. It is between the prebrachium and the lemniscus.

Postbranchial (*pōst-brang'-ke-al*) [*post*, after; βράγχια, gill]. Situated behind the branchiæ.

Postcalcaneal (*pōst-kal-ka'-ne-al*) [*post*, behind; *calcaneum*, the heel]. In biology, back of the calcaneum; applied to part of the patagium of bats.

Postcarpium (*pōst-kar'-pe-um*) [*post*, behind; καρπός, carpus]. The metacarpus.

Postcava (*pōst-kav'-ah*) [*post*, after, behind; *cavus*, hollow]. The vena cava posterior.

Postcaval (*pōst-kav'-al*) [*post*, behind; *cavus*, hollow]. Pertaining to the postcava.

Postcentral (*pōst-sen'-tral*) [*post*, behind; *centrum*, center]. Situated behind the center.

Postcephalic (*pōst-sef-al'-ik*) [*post*, behind; κεφαλή, head]. In biology, situated behind the head, or cephalic segment.

Postcerebellar (*pōst-ser-e-bel'-ar*) [*post*, behind; *cerebellum*, cerebellum]. Situated behind, or in the posterior portion of the cerebellum.

Postcerebral (*pōst-ser'-e-bral*) [*post*, behind; *cerebrum*, cerebrum]. Situated behind, or in the posterior part of the cerebrum.

Postcerviciplex (*pōst-ser-vis'-ip-leks*) [*post*, behind; *cervix*, neck; *plexus*, plexus]. The posterior cervical plexus.

Postcibal (*pōst-si'-bal*) [*post*, after; *cibum*, food]. Occurring after meals.

Postcisterna (*pōst-sis-ter'-nah*) [*post*, behind; *cisterna*, a vessel]. That portion of the spaces separating the ental layer of the arachnoid from the pia of the cerebellum, and communicating with the true encephalic cavities through the metapore, and also with the spinal subarachnoid space; the cisterna magna.

Postclavicle (*pōst-klav'-ik-l*) [*post*, behind; *clavicula*, clavicle]. In biology, the posterior element of the scapular arch of some fishes.

Postclavicular (*pōst-kla-vik'-u-lar*) [*post*, after; *clavicula*, clavicle]. Pertaining to the postclavicle.

Postclitellian (*post-kli-tel'-e-an*) [*post*, behind; *clitellum*, a pack-saddle]. In biology, applied to such earth-worms as have the ducts of the testes opening behind the clitellum.

Postcommissure (*pōst-kom'-is-ūr*) [*post*, behind; *commissura*, commissure]. The posterior commissure of the brain, *q. v.*

Postconnubial (*pōst-kon-nu'-be-al*) [*post*, after; *connubium*, marriage]. Coming on, or occurring, after marriage.

Postconvulsive (*pōst-kon-vul'-siv*) [*post*, after; *convellere*, to tear away]. Coming on after a convulsion.

Postcornu (*post-kor'-nu*) [*post*, after; *cornu*, horn: *pl.*, *Postcornua*]. The occipital horn of the lateral ventricle of the brain.

Postcornual (*pōst-kor'-nu-al*) [*post*, after; *cornu*, horn]. Pertaining to the postcornua (of the ventricles or of the spinal cord).

Postcostal (*pōst-kos'-tal*) [*post*, behind; *costa*, a rib, the side]. In biology, located behind the costal nervure or vein of the wing.

Postcoxal (*pōst-koks'-al*) [*post*, behind; *coxa*, the thigh-bone]. In biology, situated behind the coxæ.

Postcribrum (*post-krib'-rum*) [*post*, behind; *cribrum*, sieve]. The posterior perforated space of the brain.

Postcruciate (*pōst-kru'-se-āt*) [*post*, after; *crux*, a cross]. Situated posterior to the cruciate fissure of the cerebrum.

Postcubital (*pōst-ku'-bit-al*) [*post*, behind; *cubitus*, the forearm]. Situated on the posterior aspect of the forearm.

Postdiastolic (*pōst-di-as-tol'-ik*) [*post*, after; διαστολή, diastole]. Coming after the diastole.

Postdicrotic (*pōst-di-krot'-ik*) [*post*, after; δίκροτος, double-beating]. Coming after the dicrotic wave of the pulse. **P. Wave**, a second recoil-wave in the sphygmographic tracing. It is not always present.

Postdigastricus (*pōst-di-gas'-trik-us*) [*post*, after; δίς, double; γαστήρ, belly]. The posterior belly of the digastric muscle.

Postdilatator (*pōst-di'-la-ta-tor*) [*post*, after; *dilator*, a dilator]. The posterior dilatator alæ nasi.

Postdorsulum (*pōst-dor'-su-lum*) [*post*, after; *dorsulum*, dim. of *dorsum*, the back]. See *Metascutum*.

Postembryonic (*pōst-em-bre-on'-ik*) [*post*, after; ἔμβρυον, embryo]. In biology, subsequent to the embryonic stage.

Postepileptic (*pōst-ep-il-ep'-tik*) [*post*, after; ἐπίληψις, epilepsy]. Occurring after an epileptic attack.

Posterior (*pōs-te'-re-or*) [(neuter, *posterius*) comparative of *posterus*, after, behind]. Having a position to the back or rear; opposed to *anterior* (or *anterius*).

Posterolateral (*pōs'-te-ro-lat'-er-al*) [*posterus*, behind; *latus*, side]. Posterior and lateral at the same time.

Posteroparietal (*pōs-te-ro-par-i'-et-al*) [*posterus*, behind; *paries*, wall]. Posterior and parietal.

Posterosuperior (*pōs'-te-ro-su-pe'-re-or*) [*posterus*, hinder; *superior*, superior]. Posterior and superior.

Posterotemporal (*pōs-te-ro-tem'-por-al*) [*posterus*, behind; *tempus*, temple]. Posterior and temporal, or behind the temporal region. In biology, a bone in the scapular arch of many fishes; also called the *scapula* and the *supraclavicle*.

Posteroterminal (*pōs'-te-ro-ter'-min-al*) [*posterus*, hinder; *terminalis*, terminal]. Situated at the hind end.

Posteroventral (*pōs'-te-ro-ven'-tral*) [*posterus*, hinder; *venter*, stomach]. In biology, situated at the hind end of the ventral surface.

Posterula (*pos-ter'-u-lah*) [*posterus*, posterior]. In biology, Harrison Allen's term for that portion of the naso-pharynx between the posterior nares and the salpingo-palatal fold.

Postesophageal (*pōst-e-sof-aj'-e-al*) [*post*, behind; οἰσοφάγος, the gullet]. In biology, situated behind (dorsad or caudad) the gullet or esophageal ring.

Postfebrile (*pōst-feb'-ril*) [*post*, after; *febris*, fever]. Occurring after a fever.

Postfemoral (*pōst-fem'-or-al*) [*post*, behind; *femur*, thigh]. Situated on the posterior aspect of the thigh.

Postfontanel (*pōst-fon-tan-el'*) [*post*, behind; *fontana*, a spring]. The posterior fontanel.

Postforceps (*post-for'-ceps*) [*post*, behind; *forceps*, forceps]. The name given to the oblique fibers at the posterior extremity of the callosum entering the occipital lobes.

Postfovea (*pōst-fo-ve'-ah*) [*post*, after; *fovea*, pit]. The posterior fovea, a depression in the floor of the fourth ventricle of the brain.

Postfrenum (*pōst-fre'-num*) [*post*, behind; *frenum*, a bridle, curb, bit]. In biology, a part of the metathorax of an insect.

Postfrontal (*pōst-frun'-tal*) [*post*, behind; *frons*, the forehead]. 1. Situated behind the forehead. 2. A bone of the skull in many animals situated at the back portion of the orbit. **P. Process**, a process of bone in many animals on the upper and posterior portion of the brim of the orbital cavity.

Postfurca (*pōst-fir'-kah*) [*post*, behind; *furca*, fork: *pl.*, *Postfurcæ*]. In biology, the hinder sternal apodeme projecting into the cavity of a thoracic somite in certain insects.

Postfurcal (*pōst-fir'-kal*) [*post*, behind; *furca*, a fork]. Pertaining to the postfurca.

Postgeminum (*pōst-jem'-in-um*) [*post*, after; *geminus*, twin]. The posterior pair of bodies of the corpora quadrigemina, considered as forming together a single organ.

Postgeneration (*pōst-jen-er-a'-shun*) [*post*, after; *generare*, to generate]. In biology, the term applied by Roux to a very peculiar regenerative process observed in frogs' eggs, in which a segmentation-cell

may be "re-animated" after it has been deprived of its capacity for development.

Postgeniculatum (*pōst-jen-ik-u-la'-tum*) [*post*, behind; *geniculatum*, the geniculate body]. The internal geniculate body.

Postgeniculum (*pōst-jen-ik'-u-lum*). See *Geniculum*.

Postgenital (*pōst-jen'-it-al*) [*post*, behind; *genitalis*, genital]. In biology, pertaining to those segments of the body behind the openings of the genital pores.

Postgeniture (*pōst-jen'-it-ūr*) [*post*, after; *genitura*, begetting]. The position of a child born after another, as in the second child of twins.

Postglenoid (*pōst-gle'-noid*) [*post*, behind; γλήνη, socket; εἶδος, like]. 1. Behind the glenoid cavity or fossa. 2. A process or tubercle of the temporal bone that descends behind the condyle of the jaw and prevents backward displacement during mastication.

Postgraduate (*pōst-grad'-u-āt*) [*post*, after; *graduare*, to confer a degree]. 1. Belonging to or prosecuting a course of study after graduating. 2. A graduate.

Posthalgia (*pos-thal'-je-ah*) [πόσθη, penis; ἄλγος, pain]. Pain in the penis.

Posthe (*pos'-the*) [πόσθη, foreskin]. 1. Prepuce. 2. Penis.

Posthectomy (*pos-thek'-to-me*) [πόσθη, foreskin; ἐκτομη, excision]. Circumcision of the prepuce.

Posthemiplegia (*pōst-hem-ip-le'-je-ah*) [*post*, after; ἡμι, half; πληγή, stroke]. Following an attack of hemiplegia.

Posthemiplegic (*pōst-hem-ip-le'-jik*) [*post*, after; ἡμι, half; πληγή, stroke]. Appertaining to a condition following an attack of hemiplegia. **P. Chorea**, choreiform movements in paralyzed limbs. They are most marked in the hand and arm, next in the face, rarely in the leg. Almost every variety of motion may occur.

Posthetomist (*pos-thet'-o-mist*) [πόσθη, prepuce; τομή, a cutting]. A circumciser.

Posthetomy (*pos-thet'-o-me*) [πόσθη, penis; τομή, a cutting]. Circumcision.

Posthia (*pos'-the-ah*). Synonym of *Hordeolum*.

Posthioplastic (*pos-the-o-plas'-tik*) [πόσθη, foreskin; πλάσσειν, to shape]. Pertaining to, or involving, plastic surgery of the prepuce.

Posthioplasty (*pos'-the-o-plas-te*) [πόσθη, foreskin; πλάσσειν, to mold]. Plastic surgery of the prepuce.

Posthippocampal (*pōst-hip-o-kam'-pal*) [*post*, behind; ἵππος, horse; κάμπος, a sea-monster]. Pertaining to the calcar or hippocampus minor.

Posthitis (*pos-thi'-tis*) [πόσθη, prepuce; ιτις, inflammation]. Inflammation of the prepuce.

Posthocalymma (*pos-tho-kal-im'-ah*) [πόσθη, penis; κάλυμμα, veil]. Synonym of *Condom*.

Posthocalyptron (*pos-tho-kal-ip'-tron*). Synonym of *Condom*.

Postholith (*pos'-tho-lith*) [πόσθη, prepuce; λίθος, stone]. A preputial calculus.

Posthoncus (*pos-thong'-kus*) [πόσθη, prepuce; ὄγκος, swelling]. A swelling or tumor of the prepuce.

Posthumeral (*pōst-hu'-mer-al*) [*post*, behind; *humerus*, the humerus]. Situated behind the humerus.

Posthumous (*pos'-tu-mus*) [*post*, after; *humus*, the ground; more correctly, *postumus*, latest]. Occurring after death. **P. Child**, one born after the death of its father, or taken by the Cesarean operation from the body of its mother after death.

Posthyoid (*pōst-hi'-oid*) [*post*, behind; ὑοειδής, hyoid]. Posterior to the hyoid bone.

Posthypophysis (*pōst-hi-poff'-is-is*) [*post*, behind; ὑπό, under; φύειν, to grow]. The posterior and cerebral portion of the hypophysis.

Posticous (*pōs'-tik-us*) [*posticus*, hinder, back]. See *Extrorse*.

Posticus (*pōst'-ik-us*) [L.]. Posterior.

Postinsula (*pōst-in'-su-lah*) [*post*, behind; *insula*, island]. The caudal region of the insula.

Postmastoid (*pōst-mas'-toid*) [*post*, behind; μαστός, nipple; εἶδος, like]. Situated behind the mastoid process of the temporal bone. **P. Tenderness**, a tender point located one inch behind and about one-half inch above the external auditory meatus in cases of septic thrombosis of the lateral sinus dependent upon otitis media.

Postmedian (*pōst-me'-de-an*) [*post*, behind; *medius*, the middle]. Behind the middle transverse line of the body.

Postmediastinal (*pōst-me-de-as-ti'-nal*) [*post*, behind; *mediastinum*]. Pertaining to the postmediastinum.

Postmediastinum (*pōst-me-de-as-ti'-num*) [*post*, behind; *mediastinum*]. The posterior dorsal mediastinal space.

Postminimus (*post-min'-im-us*) [*post*, after; *minimus* (sc., *digitus*), the little finger: *pl.*, *Postminimi*]. In biology, an additional little finger or little toe in cases of polydactylism. In anatomy, the ulnar sesamoid bone, commonly called pisiform. Cf. *Prehallux*, *Prepollux*.

Postmortem (*pōst-mor'-tem*) [*post*, after; *mors*, *mortis*, death]. 1. Occurring after death. 2. An examination of the body after death; an autopsy. The general technique of a postmortem is as follows: First, the appearance of the body is described, including sex, height, apparent age, discoloration of the skin, rigor mortis, state of the nutrition, injuries, deformities, and any peculiarities that may be observed. An incision is then made from the top of the sternum to the pubic symphysis, the abdomen being the cavity first opened. Then the position of the viscera, their condition, the presence of hernia, if it exist, the state of the peritoneum, and the quantity of fluid are noted, but all without disturbing the relation of the contents. The thorax is now opened. In order to do this, the ribs are divided at the costo-chondral junction, and the sternum and clavicles disarticulated. The relation of the structures exposed on lifting up the separated portion of sternum and ribs is noted—the presence of fluid in the pleural cavity, pleural adhesions, the extent to which the lung covers the pericardium. The pericardial sac is next opened, and its condition and the quantity of fluid recorded. The opening of the heart is the next step. This may be done in several ways; one of the best is Virchow's method, *q. v.* After noting the character of the blood and clots in the chambers, the heart is excised, close to the origin of the great vessels. After completing the incisions, the state of the valves of the muscle, especially its firmness, and the size of the walls of the two ventricles, are carefully observed and measured. The lungs are next removed, usually the left first. Section of these organs is made by a long sweep of the knife—in the case of the left preferably from the apex to the base; in the case of the right, from the base to the apex. Attention is now directed to the abdomen, the spleen being the first organ removed. Next come the suprarenals and the kidneys. In order to gain access to these, it is wise to dissect off, by a few quick cuts, the entire colon from the sigmoid flexure to the ileo-cecal valve. A double ligature is placed around the sigmoid, and the gut divided between the ligatures. The removal of the kidneys is further facilitated by cutting the diaphragm loose from its costal attachments and throwing it upward, with the liver, into the thoracic cavity. The adrenals and kidneys are then exposed; the course and condition of the ureters are noted. The suprarenals may now be removed separately, or

taken out with the kidneys; in either case it is best to remove the organs on the left side first. Section is made of the adrenals; also of the kidneys. In the latter the capsule is stripped off, and a note is made of the extent, if at all, to which it is adherent; also whether the renal substance is torn on removing the capsule. The next step consists in the removal of the intestines. These are cut closely to their mesenteric attachment, care being taken to leave as little of the mesentery attached to the gut as possible. The fecal contents are then washed out by a running stream of water through the bowel, which is opened at the attachment of the mesentery and examined. In removing the intestines, the rectum and the first and second portion of the duodenum are left in situ. The next step is usually the opening of the stomach and remaining portion of the duodenum. This is accomplished, like the opening of the intestines, by means of the enterotome. After the duodenum is opened, the gall-bladder is pressed until bile is made to flow from the mouth of the common duct in the duodenum. If this is impossible, obstruction exists. The gastric contents are described, and the condition of the walls noted. The pancreas is now examined, the condition of its duct, and the presence of cysts or stones being noted. It is then removed and incised longitudinally. The liver is next taken out, the condition of the vessels entering the portal fissure having been noted before they were divided. The liver is weighed and measured transversely, longitudinally, and vertically, the width of the two large lobes being taken separately. A long incision is now made into the substance of the organ and the conditions noted, especially the relation of the connective tissue to the hepatic substance proper. The pelvic organs are next removed. This is best accomplished by first making a cut into the bladder; into the opening a finger is inserted, while the other fingers grasp the rectum. By making the tissues tense, their separation from the bony wall of the pelvis is facilitated. After removal they are cut open; in the case of a female subject, the uterus is opened by a longitudinal cut through the anterior wall. A fine probe is passed into the oviducts to ascertain their patulousness; they may also be opened by a delicate pair of scissors. Nothing of importance remains now in the abdomen except the vessels and the semilunar ganglia. The latter should be examined in situ and also after removal. The aorta should be opened by a longitudinal incision extending from the beginning of the arch down to its bifurcation, thence prolonged out into the iliac arteries. The thoracic duct should be looked for at the side of the aorta. The trachea, larynx, thyroid gland, pharynx, and tongue can be removed either through a median incision in the front of the neck or from the base of the neck. For the removal of the brain it is necessary to saw out a portion of the cranial vault. It is customary to divide the scalp about on a line with the coronal suture. The vault is sawn through in front and behind, a large, wedge-shaped piece being removed. The dura is then divided on a line with the sawn edge of the bone, and also separated from its attachment to the crista galli in front. The brain is then carefully lifted from its bed, the nerves passing from it divided, and the attachment of the dura to the petrous portion of the temporal bone cut loose. If possible, the pituitary body should be kept attached to the brain. A long knife is now introduced into the spinal canal, and the cord cut as low down as possible. The brain is then lifted out and placed on a board or plate. After a careful survey of its external appearances, the organ is dissected. A number of methods are in vogue. One of the best is that known as Edinger's method; only its general features can be indicated here. The lateral ventricles are first opened; then the cerebral hemispheres are cut away from the basal ganglia. Longitudinal and transverse cuts are made into the cerebral mantle, observing always to make the incisions as near as possible at right angles to the course of the convolutions. The basal ganglia are examined by making multiple incisions into them; the cerebellum is similarly treated. The spinal cord is generally removed from the back; special saws have been devised to cut the pedicles of the vertebræ. The cord itself is removed in its membranes from below upward, the most important point being the avoidance of traction. The membranes are opened, and the cord-substance divided at short intervals by transverse cuts. The eyes, if it be necessary, can be removed without difficulty. The removal of the organ of hearing requires considerable labor. All organs should, if possible, be weighed.

Postmortuary (*pōst-mor′-tu-a-re*) [*post*, after; *mors*, *mortis*, death]. Postmortem.

Postnares [*pōst-na′-rēz*) [*post*, behind; *naris*, nostril]. The posterior nares.

Postnarial (*pōst-na′-re-al*) [*post*, behind; *naris*, a nostril]. Situated behind the nostrils.

Postnasal (*pōst-na′-sal*) [*post*, behind; *nasus*, nose]. Situated behind the nose. **P. Catarrh**, catarrhal inflammation of the naso-pharynx.

Postnasus (*pōst-na′-sus*) [*post*, after; *nasus*, nose]. In biology, a division of the clypeus in certain insects; the supraclypeus.

Postnatal (*pōst-na′-tal*) [*post*, after; *natus*, born]. Subsequent to birth, as a *postnatal* disease.

Postoblongata (*pōst-ob-long-ga′-tah*) [*post*, after; *oblongata*, medulla oblongata]. The caudal or metencephalic portion of the oblongata, forming the floor of the metacele.

Postocular (*pōst-ok′-u-lar*) [*post*, behind; *oculus*, the eye]. In biology, situated back of, behind, or beneath the eye.

Postolivary (*pōst-ol′-iv-a-re*) [*post*, behind; *olivarius*, olivary]. Behind the oliva.

Postomosternal (*pōst-o-mo-ster′-nal*) [*post*, behind; *ὦμος*, shoulder; *στέρνον*, sternum]. Pertaining to the postomosternum.

Postomosternum (*pōst-o-mo-ster′-num*) [*post*, behind; *ὦμος*, shoulder; *στέρνον*, sternum]. A posterior omosternum.

Postoperative (*pōst-op′-er-a-tiv*) [*post*, after; *operatio*, operation]. Occurring after an operation, as postoperative insanity.

Postoperculum (*post-o-per′-ku-lum*) [*post*, after; *operculum*, lid]. That one of the folds covering the insula which is formed of a part of the supertemporal gyrus; the temporal operculum.

Postopticus (*pōst-op′-tik-us*) [*post*, after; *ὤψ*, eye: *pl.*, *Postoptici*]. Either one of the posterior pair of optic lobes, or corpora quadrigemina.

Postoral (*pōst-o′-ral*) [*post*, after; *os*, *oris*, mouth]. Situated either dorsad or caudad of the mouth. **P. Arches.** See *Arch*. **P. Segments**, in biology, the primary segments behind the mouth of certain arthropods.

Postorbital (*pōst-or′-bit-al*) [*post*, behind; *orbita*, orbit]. In biology: (*a*) situated behind the orbit; (*b*) placed back of the compound eye of an insect; (*c*) a separate bone in the orbit of certain reptiles.

Postpalatal (*pōst-pal′-at-al*) [*post*, behind; *palatum*, the palate]. Situated behind the palate bones.

Postpalatine (*pōst-pal′-at-in*) [*post*, behind; *palatum*, palate]. In biology, a bone in the skull of certain reptiles, also called *pterygoid*.

Postparalytic (*pōst-par-al-it′-ik*) [*post*, after; *παράλυσις*, paralysis]. Following an attack of paralysis. **P. Chorea.** Synonym of *Posthemiplegic Chorea.*

Postparietal (*pōst-par-i′-et-al*) [*post*, behind; *paries*, wall]. In biology, situated behind the parietal plate.

Postpartum (*pōst-par′-tum*) [*post*, after; *partus*, birth]. Following childbirth. **P. Chill,** a chill, as a rule of no pathologic significance, closely following the expulsion of the child in some cases. It usually lasts several minutes. **P. Hemorrhage,** hemorrhage following delivery. Its causes are such as interfere with or prevent uterine contraction, as general debility, weakness of the uterine muscle, anomalies of innervation of the uterus, retained placenta or clots, old adhesions, tumors, distention of the bladder and rectum, as well as a hemorrhagic diathesis. The symptoms are a sudden gush of blood from the vulvar orifice, relaxation of the uterus, and the constitutional signs of severe hemorrhage: pallor, vertigo, air-hunger, dimness of vision, sometimes a peculiar vocal sound, a rapid, feeble pulse, rarely a convulsion. The mortality is given as 1 in 300. **P. Shock,** the sense of fatigue and exhaustion immediately succeeding labor.

Postpectoral (*pōst-pek′-to-ral*) [*post*, behind; *pectus*, the breast]. Pertaining to the postpectus.

Postpectus (*pōst-pek′-tus*) [*post*, behind; *pectus*, the breast]. In biology, the hinder part of the breast.

Postpeduncle (*pōst-pe′-dunk-l*) [*post*, behind; *pedunculus*, peduncle]. The inferior cerebellar peduncle.

Postpeduncular (*pōst-pe-dung′-ku-lar*) [*post*, behind; *pedunculus*, peduncle]. Of or pertaining to the postpedunculus.

Postpedunculus (*pōst-pe-dung′-ku-lus*). See *Postpeduncle.*

Postperforatus (*pōst-per-for-a′-tus*) [*post*, behind; *perforare*, to perforate]. The posterior perforated space.

Postpetiole (*post-pet′-e-ōl*) [*post*, behind; *petiolus*, a petiole]. In biology, that portion of the abdomen of an insect just behind the petiole or narrow section.

Postpharyngeal (*pōst-far-in′-je-al*) [*post*, behind; *φαρυγξ*, pharynx]. Situated behind the pharynx.

Postphenomenon (*pōst-fe-nom′-en-on*) [*post*, after; *φαινόμενον*, phenomenon]. The effects following a phenomenon.

Postpituitary (*pōst-pit-u′-it-a-re*) [*post*, behind; *pituita*, phlegm]. Situated behind the pituitary body.

Postpleuritic (*pōst-plu-rit′-ik*) [*post*, behind; *πλευρά*, pleura; *ιτις*, inflammation]. Following pleurisy.

Postplexus (*pōst-pleks′-us*) [*post*, behind; *plexus*, plexus]. In biology, the analogue in lower vertebrates of the lumbo-sacral plexus in man.

Postpone (*pōst-pōn′*) [*post*, after; *ponere*, to place]. In relation with the paroxysm of malarial fever, it means to occur after the regular time.

Postpontile (*pōst-pon′-til*) [*post*, behind; *pons*, bridge]. Situated behind the pons varolii. **P. Recess,** the foramen cæcum.

Postprostatic (*pōst-pros-tat′-ik*) [*post*, after; *πρό*, before; *ιστάναι*, to set]. Situated dorsad of the prostate. **P. Pouch.** See *Trigonum vesicæ.*

Postpubic (*pōst-pu′-bik*) [*post*, behind; *pubis*, pubes]. Pertaining to the postpubis.

Postpubis (*pōst-pu′-bis*) [*post*, behind; *pubis*, pubes: *pl.*, *Postpubes*]. In biology, the postacetabular portion of the pubic bone; used especially in connection with the pubis of certain *Sauropsida.*

Postpuerperal (*pōst-pu-er′-pe-ral*) [*post*, after; *puer*, child; *parere*, to bear]. Occurring after childbirth.

Postpyramidal (*post-pir-am′-id-al*) [*post*, behind; *pyramis*, pyramid]. Situated behind the pyramidal tract. **P. Nucleus,** the nucleus funiculi gracilis, *q. v.*

Postramus (*pōst-ra′-mus*) [*post*, behind; *ramus*, branch]. The caudal or horizontal branch of the stem of the arbor of the cerebellum.

Postremus (*pōs-tre′-mus*) [superlative of *posterus*, behind]. Hindermost. **P. pedis,** the extensor brevis digitorum muscle of the foot. See *Muscles, Table of.*

Postrhinal (*pōst-ri′-nal*) [*post*, behind; *ῥίς*, nose]. Posterior and rhinal. **P. Fissure,** Wilder's term for the basirhinal fissure.

Postrolandic (*pōst-ro-lan′-dik*) [*post*, after; *Rolando*, an anatomist]. Situated behind the Rolandic fissure.

Postrorse (*pōs′-trorz*) [*post*, back; *versus*, turned]. In biology, turned back; retrorse, the antonym of *antrorse.*

Postsacral (*pōst-sa′-kral*) [*post*, behind; *sacrum*, sacrum]. Situated behind the sacrum.

Postscalene (*pōst-ska′-lēn*) [*post*, behind; *σκαληνός*, scalene]. Pertaining to the postscalenus.

Postscalenus (*pōst-ska-le′-nus*) [*post*, after; *σκαληνός*, scalene]. The scalenus posticus muscle.

Postscapula (*pōst-skap′-u-lah*) [*post*, behind; *scapula*, shoulder-blade]. The part of the scapula below or posterior to the spine.

Postscapular (*pōst-skap′-u-lar*) [*post*, behind; *scapula*, shoulder-blade]. Pertaining to the postscapula.

Postscapularis (*pōst-skap-u-la′-ris*) [*post*, behind; *scapula*, shoulder-blade]. Synonym of the infraspinatus muscle.

Postscutellar (*pōst-sku-tel′-ar*) [*post*, behind; *scutellum*, dim. of *scutum*, shield]. Pertaining to the postscutellum.

Postscutellum (*pōst-sku-tel′-um*) [*post*, behind; *scutellum*, dim. of *scutum*, shield: *pl.*, *Postscutella*]. In biology, the last of the four sclerites of which the pronotum, mesonotum, and metanotum of an insect consist.

Postsphenoid (*pōst-sfe′-noid*) [*post*, behind; *σφήν*, wedge; *εἶδος*, like]. Situated behind the sphenoid bone; also, forming its posterior portion.

Postsylvian (*pōst-sil′-ve-an*) [*post*, behind; *Sylvius*, an anatomist]. Situated behind the Sylvian fissure of the brain.

Postsystolic (*pōst-sis-tol′-ik*) [*post*, after; *συστολή*, systole]. Occurring after the systole of the heart.

Posttemporal (*pōst-tem′-po-ral*) [*post*, after; *tempus*, temple]. In biology, situated back of the temporal region; specifically applied to a bone of the scapular arch in certain fishes, forming at times an integral portion of the skull. Also called *supra-scapula* and *supra-clavicle.*

Posttibial (*pōst-tib′-e-al*) [*post*, behind; *tibia*, tibia]. Situated upon the posterior aspect of the tibia.

Posttympanic (*pōst-tim-pan′-ik*) [*post*, after; *tympanum*, drum]. In biology, situated back of the tympanic bone or auditory meatus.

Postumbonal (*pōst-um′-bo-nal*) [*post*, behind; *umbo*, a boss]. In biology, situated behind the umbo.

Postural (*pos′-tu-ral*) [*ponere*, to place]. Pertaining to posture or position. **P. Respiration,** a treatment of apnea by the induction of respiration through changes of posture. **P. Treatment,** treatment by position, as the reposition of a prolapsed funis by placing the woman in a favorable position.

Posture (*pos′-tūr*) [*ponere*, to place]. Position; attitude. An illustrated table of the various postures of the body is appended.

Postuterine (*pōst-u′-ter-in*) [*post*, behind; *uterus*, uterus]. Situated behind the uterus.

Postvermis (*post-ver′-mis*) [*post*, behind; *vermis*, worm]. The inferior vermiform process of the cerebellum.

THE SEMI-PRONE, OR SIMS' POSTURE. Anterior View.

THE SEMI-PRONE, OR SIMS' POSTURE. Posterior View.

THE HORIZONTAL POSTURE.

THE KNEES-ELBOW POSTURE.

EDEBOHL'S POSTURE.

TABLE OF POSTURES AND POSITIONS.

VARIETY.	DESCRIPTION.	WHEN EMPLOYED.
Back posture.	See *Dorsal recumbent.*	
Dorsal elevated.	Patient on back, with head and shoulders elevated at an angle of 30° or more.	1. Digital exploration of the genitalia. 2. Bimanual examination.
Dorsal recumbent.	1. Patient on back, with the extremities moderately flexed and rotated outward.	1. Application of obstetric forceps. 2. Repair of lesions following parturition. 3. Vaginal examination. 4. Bimanual palpation.
Dorso-sacral or lithotomy position.	Patient flat on back, with legs flexed on thighs and thighs on abdomen. The thighs are abducted.	1. Plastic operations on the genital tract. 2. Vaginal hysterectomy. 3. Diagnosis and treatment of diseases of the urethra and bladder.
Edebohl posture.	Same as *Simon's position.*	
English position.	See *Left lateral recumbent.*	
Erect position.	The occiput and heels on a line; also the nose, groins and great toes are in the same vertical plane.	1. In the practice of ballottement. 2. In differentiation of tumors, cystic, solid, and hernial. 3. In diagnosticating loosening of pelvic joints.
Exaggerated lithotomy.	See *Simon's position.*	
Genu-cubital or knee-elbow posture.	Patient upon the knees, with the thighs upright, and the body resting upon the elbows, the head down upon the hands.	1. When not possible to employ the classic knee-chest position.
Genu-pectoral or knee-chest position.	Patient upon the knees, with the thighs upright; the head and upper part of the chest resting upon the table; the arms crossed above the head.	1. Replacement of prolapsed funis. 2. Dislodgment of an impacted head. 3. Management of transverse presentations. 4. Replacement of a retroverted uterus or prolapsed ovary. 5. Flushing of the intestinal canal.
High pelvic posture.	See *Trendelenburg's position.*	
Horizontal abdominal posture.	Patient flat on the belly, with the feet extended.	1. Examination of the back and spinal column.
Horizontal position.	Patient supine on the back, with the feet extended.	1. For employment of palpation. 2. Auscultation of the fetal heart. 3. The position for operative procedures.
"Jack-knife" posture.	Patient reclining on the back with the shoulders elevated, legs flexed on thighs and thighs at right angles to abdomen.	1. For passing the urethral sound.
Knee-chest posture.	See *Genu-pectoral.*	
Knee-elbow posture.	See *Genu-cubital.*	
Kneeling-squatting position.	Patient stooping, with knees pressed upon the abdomen, trunk erect.	1. Childbirth in difficult cases, and in uncivilized nations.
Latero-prone.	Same as *Semi-prone.*	
Latero-semi-prone.	Same as *Semi-prone.*	
Left lateral recumbent, English, or obstetric position.	Patient on left side, with the right knee and thigh drawn up.	1. Childbirth.
Lithotomy.	Same as *Dorso-sacral.*	
Obstetric.	See *Left lateral recumbent.*	
Reclining posture.	Same as *"Jack-knife" posture.*	
Semi-prone or Sims' position, or side posture.	Patient on left side, with right knee and thigh drawn well up above the left; left arm back of patient and hanging over the edge of the table; chest inclined forward so that the patient rests upon it.	1. Curettement of uterus. 2. Intra-uterine irrigation after labor. 3. Tamponnade of vagina. 4. Rectal exploration. 5. Operations upon the cervix.
Side posture.	See *Semi-prone.*	
Simon's position, or exaggerated lithotomy position.	Patient flat on back, with legs flexed on thighs and thighs on abdomen, and hips somewhat elevated. The thighs are strongly abducted.	1. Operations upon the vagina.
Sims'.	See *Semi-prone.*	
Trendelenburg's position.	Patient in dorsal position, with body elevated at an angle of about 45°, feet and legs hanging over the end of the table.	1. In abdominal surgery to favor gravitation upward of the abdominal viscera.

Postzygapophysial (*pōst-zi-gap-off-iz'-e-al*) [*post*, behind; ζυγόν, yoke; ἀπόφυσις, apophysis]. Pertaining to the postzygapophysis.

Postzygapophysis (*post-zi-gap-off'-is-is*) [*post*, behind; ζυγόν, yoke; ἀπόφυσις, apophysis]. An articular process proceeding from the posterior face of the neural arch of a vertebra.

Pot [ME., *pot*, a pot]. A urinal. **P.-bellied**, having a prominent belly. **P.-belly**, a protuberant belly. **P.-gutted**, pot-bellied.

Potable (*pot'-ta-bl*) [*potare*, to drink]. Fit or wholesome to drink—applied to waters for drinking in distinction to those for medicinal use.

Potain's Solution. A solution for diluting the blood in counting the red corpuscles. It consists of three solutions—one of gum arabic, one of sodium sulphate, and one of sodium chlorid, each of a specific gravity of 1020. These liquids are mixed in equal proportions.

Potamopyra (*pot-am-op'-ir-ah*) [ποταμός, river; πῦρ, heat, fire]. Malarial fever.

Potash (*pot'-ash*) [*potassa*, potash]. 1. Potassium carbonate prepared by boiling wood-ashes with water and evaporating the solution. It is also obtained from potassium chlorid and potassium sulphate found in the Stassfurt salt-beds. The residue left behind in the manufacture of beet-root sugar also yields potash. Finally, from the wash-water of sheep's wool, considerable quantities of potash are obtained. 2. Caustic potash, potassium hydroxid.

Potassa (*po-tas'-ah*) [L.]. 1. See *Potash*. 2. Potassium hydroxid. **P. cum calce**, Vienna paste, made by rubbing together equal parts of caustic potash and quick-lime. It is used as a caustic. **Potassæ, Liquor**, "solution of potassa," consists of hydrate 56, distilled water 944 parts; combined with bitter tonics it is useful in atonic dyspepsia. Locally, it is used as a wash in scaly skin-diseases. Dose ♏v–℥ss, diluted.

Potassamid (*po-tas'-am-id*) [*potassa*, potassium; *amid*], NH_2K. A substitution-compound of ammonia; a yellowish-brown, inflammable substance, produced by heating metallic potassium in ammoniacal gas.

Potassic (*po-tas'-ik*) [*potassa*, potash]. Containing *Potassium*.

Potassiferous (*po-tas-if'-er-us*) [*potassa*, potash; *ferre*, to bear]. Containing or yielding potassic salts.

Potassinum (*po-tas'-in-um*). Synonym of *Potassium*.

Potassio-ferric (*po-tas'-e-o-fer'-ik*) [*potassa*, potassium; *ferrum*, iron]. Combined with iron and potassium.

Potassio-mercuric (*po-tas'-e-o-mer-ku'-rik*) [*potassa*, potassium; *Mercury*, a Grecian god]. Combined with potassium and mercury.

Potassium (*po-tas'-e-um*) [*potassa*, potash]. K = 39; quantivalence 1; sp. gr. 0.865. A metallic element, of silvery luster, and characterized by intense affinity for oxygen. See *Elements, Table of*. Its peculiar reactions are: its precipitation when converted into the acid tartrate; its precipitation by platinum perchlorid; the violet color it imparts to the flame. Physiologically, salts of potassium are protoplasmic poisons when applied locally in sufficient concentration. They dialyze more readily than sodium salts. In the body they occur especially in the solid structures, while sodium salts predominate in the fluids. In large doses, by the mouth, potassium salts act as irritants to the gastro-intestinal tract. The circulation is generally depressed by potassium salts—after small doses the primary depression of the pulse-rate and arterial pressure is followed by a rise of both; large doses cause a rapid fall of pressure and pulse-rate. Injected into a vein, salts of potassium cause paralysis of the heart. Potassium salts are obtained from the ash of plants, from saltpeter, from the potassium bitartrate deposited from urine in the process of fermentation, and from the washings of sheeps' wool. The action of the various salts is given under their proper heading. **P. acetas**, $KC_2H_3O_2$, an easily soluble salt having marked diuretic properties. Dose gr. v–℥j. Purgative doses ℥ij–iv. **P. Amalgam**, a mixture, in various proportions, of potassium and mercury. The compound may be a liquid, or an amorphous or crystalline solid. **P. arsenitis, Liquor**, Fowler's solution. See under *Arsenic*. **P. bicarbonas**, $KHCO_3$, a salt with properties like the carbonate, to which it is preferable. Dose gr. v–xxx. **Liq. potas. efferves.** (B. P.) Dose ℥v–x. **P. bichromas**, $K_2Cr_2O_7$, a substance occurring in large, irregular, yellow crystals. It is used in the preparation of hardening fluids, and has been applied externally in syphilis. **P. bitartras**, $KHC_4H_4O_6$. See *P. tartras*. Dose gr. xx–℥ss. **Pulvis effervescens comp.**, compound effervescing powder, "Seidlitz powder," contains of the preceding gr. 120, mixed with sodium bicarb. gr. 40, in the blue paper; and tartaric acid gr. 35 in the white paper. **P.-blue**, the blue color resulting when potassium cyanid and a ferric salt are mixed. It is used in dyeing. **P. bromas**, KBr, a colorless, crystalline, bitter salt, readily soluble in water. It is extensively employed as a sedative in nervous excitement, and is one of the best drugs in epilepsy. Its prolonged use causes the condition known as *Bromism*, *q. v.* **P. carbonas**, $(K_2CO_3)_2.3H_2O$, useful locally in acne and acute eczema, internally in rheumatism, in the uric-acid diathesis, and in jaundice. Dose gr. ij–xx. **P., Caustic**, potassium hydroxid, *q. v.* **P. chloras**, $KClO_3$, a crystalline compound, with a saline, cooling taste. It is soluble in 15 or 16 parts of cold, and readily soluble in boiling water. It is used as a gargle in diseases of the mouth and throat, in mercurial stomatitis, etc. Dose gr. v–xx. In toxic doses it causes disorganization of the blood (converting the hemoglobin into methemoglobin) and intense irritation of the kidneys, with hematuria and blood-casts. Sir James Y. Simpson recommended it in doses of 20 grains thrice daily, in threatened abortion from fatty degeneration of the placenta. **P. chloratis, Troch.**, each containing gr. v. of the salt. Dose j–iij. **P. chlorid.**, KCl, a colorless, crystalline substance, of bitter taste. **P. citras**, $K_3C_6H_5O_7.H_2O$, is used in solution as a febrifuge, a diuretic, and to alkalinize the urine. Dose gr. x–xxx. **P. citratis, Liq.**, citric acid 6, potas. bicarb. 8; filter and add distilled water ad 50 parts. Dose ℥ss–j. **P. citratis, Mist.**, "neutral mixture"—lemon-juice 100, potas. bicarb. q. s. ad saturationem. Dose ℥ss-j. **P. cobalto-nitrite**, unof., has been used successfully in angina pectoris and asthma. Dose gr. ss–j. **P. cyanid.**, KCN, made from potassium ferrocyanid by the action of heat, sometimes with (also without) the addition of potassium carbonate and charcoal. It is very soluble in water, has active reducing powers, and is very poisonous. It has the sedative and antispasmodic action of hydrocyanic acid, and, like it, is used in gastric irritability and cough. Dose $\frac{1}{16}$ grain. **P. dichromas.** Synonym of *P. bichromas*. **P. ethylas**, C_2H_5OK, a crystalline substance, decomposing in the presence of organic matter into metallic potassium and ethyl alcohol. The potassium abstracts oxygen from the tissues, and thus is caustic; the ethyl alcohol is antiseptic. **P. et sodii tartras**, $KNaC_4H_4O_6.4H_2O$, "Rochelle salt," laxative. Dose ℥ss–j. **P. ferricyanid**, $K_3FeC_6N_6$, red prussiate

of potash, made from potassium ferrocyanid by the action of chlorin. The latter is passed through the salt until a blue color with ferric chlorid is no longer obtained. It is poisonous. **P. ferrocyanid,** $K_4FeC_6N_6 + 3H_2O$, yellow prussiate of potash, prepared from blood, and by heating together animal charcoal, iron, and pearl-ash. It occurs in yellow crystals, soluble in water. It has many uses in chemic analysis. **P. hydras,** KHO, potassa, "caustic potash," deliquescent and very alkaline. A powerful escharotic. **P. iodid.,** KI, used in syphilis, metallic poisoning, and as an antirheumatic. Dose gr. ij–xx. **P. Iodid. cum sapone, Lin.** (B. P.), contains potassium iodid, curd soap, glycerin, oil of lemon, and distilled water. **P. iod., Unguent.,** contains iodid and carbonate of potassium, distilled water and benzoated lard. **P. nitras,** KNO_3, saltpeter, niter, crystallizing in long, white prisms. It occurs naturally in the soil of many tropical countries, especially in Egypt and the East Indies. It originates in the decomposition of organic matter rich in nitrogen, in the presence of potassium compounds. Commercially, it is also prepared by double decomposition of potassium chlorid and Chile saltpeter, sodium nitrate. Dose gr. x–xx. **P. nitratis, Charta,** unsized paper saturated with a 20 per cent. solution. It is used, when burnt, by inhalation in asthma. **P. permanganas.** See *Manganese.* **P. picras,** $C_6H_2(NO_2)_3OK$, a yellow, crystalline bitter substance, which explodes on heating. It is insoluble in water; it has been used for tape-worm. **P. platinichlorid.,** K_2PtCl_6, a yellow, crystalline powder. **P. platinochlorid.,** K_2PtCl_4, a compound occurring in rose-colored crystals. **P., Prussiate of:** 1. Potassium ferricyanid, or red prussiate of potash. 2. Potassium ferrocyanid; the yellow prussiate of potash. **P., Red Chromate of.** Synonym of *P. bichromas.* **P. succinas,** has been used internally in hemorrhage. **P. sulphas,** K_2SO_4, an hepatic stimulant and laxative; soluble in 10 parts of water at ordinary temperature. Dose gr. xx–ʒss. **P. sulphis,** several compounds of potassium and sulphur are known. K_2S, the monosulphid, is the one commonly called potassium sulphid. It is used in the treatment of skin-diseases. **P., Sulphurated,** K_2S, potassium sulphid. **P. tartras,** $(K_2C_4H_4O_6)_2.H_2O$, *normal potassium tartrate*, a crystalline, or amorphous substance, soluble in water. The *acid tartrate, potassium bitartrate*, or "*cream-of-tartar*," $C_4H_5O_6K$, is nearly insoluble in water. Both salts are diuretic and laxative. Potassium tartrate is also a remote antacid, that is, it renders the urine alkaline by being converted into a carbonate, in which form it is excreted. Dose gr. xx–ʒss. **P. telluras,** K_2TeO_4, an efficacious antihydrotic in pulmonary tuberculosis. Dose gr. ½–¾. Unof.

Potate (*po'-tāt*) [*potare*, to drink]. In chemistry, liquefied.

Potato (*po-ta'-to*) [Sp., *patata*, sweet potato]. The tuber of *Solanum tuberosum.* **P.-brandy,** a brandy distilled from a mixture of potatoes and barley-malt. **P.-blight.** Same as *P.-rot.* **P.-culture,** a culture of microörganisms on potato. Several methods have been employed, the one now in general use being that known as Bolton and Globig's. It is as follows: Cylinders are cut with a cork-borer out of the center of large potatoes, trimmed of skin and imperfections, and cut obliquely, so as to make two wedge-shaped pieces. These are placed in sterile test-tubes with the thin end upward. The tubes are then sterilized for twenty minutes on three successive days. In *Esmarch's* method, slices of potato are placed in small sterilized glass dishes, and the latter, with the contained discs of potato, are sterilized in the steam sterilizer for an hour. In the original method potatoes were cleaned, then soaked in 1 to 1000 mercuric chlorid solution, and finally steamed for an hour. They were then carefully cut with a sterilized knife and allowed to fall apart in a moist chamber. Whichever method is used, the inoculation with the bacteria is the same, namely, by means of the *Oese* or sterilized needle dipped in the material to be cultivated. **P.-cure.** See *Cure.* **P.-disease:** 1. Same as *P.-rot.* 2. A French term for tuberculosis in cattle. **P.-fungus,** the cause of *P.-rot, q. v.* **P.-mold.** Same as *P.-rot.* **P.-murrain.** Same as *P.-rot.* **P.-paste,** a substitute for the solid potato as a culture-medium for bacteria, when a very extensive surface is desired. It is a stiff paste made with water from the dry, floury centers of well-boiled potatoes. **P.-rot.** See under *Mildew.* **P., Spanish, P., Sweet,** the tuber of *Ipomea batatas.* **P.-spirit.** See *Alcohol, Amyl.* **P.-sugar,** a sugar obtained from potatoes. **P.-treatment.** Same as *P.-cure.*

Potency (*po'-ten-se*) [*posse*, to be able]. Power. Efficacy.

Potential (*po-ten'-shal*) [*potens*, able]. Able or powerful. A term applied to remedies or agents that are energetic. In electricity, the tension or pressure of the current. It is estimated quantitatively in volts. **P. Cautery.** See *Cautery.* **P., Difference of,** a term employed to denote that portion of the electromotive force which exists between any two points in a circuit. **P. Energy,** the force that an organism is capable of exerting under full stimulation. **P., Zero,** in electricity, the potential of a point infinitely distant from all electrified bodies.

Potentilla (*po-ten-til'-ah*). See *Tormentilla*, and *Hardhack.*

Potentiometer (*po-ten-she-om'-et-er*) [*potentia*, power; *μέτρον*, measure]. An instrument used for measuring the difference of electric potential between two points.

Pothopatridalgia (*poth-o-pat-rid-al'-je-ah*) [*πόθος*, longing; *πατρίς*, fatherland; *ἄλγος*, pain]. Homesickness, or nostalgia, experienced in a foreign land.

Potio, Potion (*po'-she-o, po'-shun*) [*potio*, a drink]. A drink or draught of a medicinal preparation.

Potomania (*po-to-ma'-ne-ah*) [*πότος*, drink; *μανία*, madness]. Delirium tremens.

Potometer (*po-tom'-et-er*) [*πότος*, drink; *μέτρον*, measure]. In biology, an instrument for measuring the amount of water absorbed by a plant in a given time.

Pototromania (*po-to-tro-ma'-ne-ah*) [*πότος*, drink; *τρόμος*, tremor; *μανία*, madness]. Delirium tremens.

Pototromoparanoia (*po-to-trom-o-par-an-oi'-ah*) [*πότος*, drink; *τρόμος*, tremor; *παράνοια*, madness]. Delirium tremens.

Potpourri (*po-poo-re'*) [Fr.]. A mixture of aromatic substances formerly used to perfume rooms.

Pott's Aneurysm. See *Aneurysm*, and *Diseases, Table of.* **P.'s Boss,** the projecting spinous process usually found in cases of Pott's disease. See *Signs and Symptoms, Table of.* **P.'s Disease,** or **Curvature,** caries of the vertebræ, generally of tuberculous origin. It originates usually in an osteitis of the bodies of the vertebræ. The symptoms are stiffness of the spinal column, pain on motion, tenderness on pressure, undue prominence of one or more of the spines; spasmodic pain in the abdomen; in late stages, sometimes paralysis. Abscess usually forms; it may appear quite early. **P.'s Fracture.** See *Fracture.* **P.'s Gangrene,** senile gangrane. **P.'s Paralysis,** or **Paraplegia,** the paralysis resulting from pressure on the cord in Pott's disease.

Potters' Asthma. Synonym of a form of pneumonokoniosis prevalent among potters. **P. Bronchitis**

See *Bronchitis*. **P. Clay.** See *Argilla*. **P. Consumption,** a form of pneumonokoniosis prevalent among potters. **P. Lung,** a chronic inflammation of the lungs common among potters, and due to the inhalation of dust.

Pouch (*powch*) [Fr., *poche*, a pouch, pocket]. In biology, a sac, cecum, diverticulum or bag-like structure. **P.-bone,** a marsupial bone. **P.-corona,** the coronal intestine of *Medusæ*. Same as *Canal, Corona*. **P. of Douglas,** the cul-de-sac of Douglas, a pouch formed by the recto-uterine fold of the peritoneum. **P. of Fabricius.** See *Bursa fabricii*. **P.-gestation,** gestation in a pouch, as in marsupials. **P.-gill,** one of the gills of the lamprey, or marsipobranchs. **P., Guttural,** in biology, one of the large mucous bags in solipeds situated between the atlas and the anterior portion of the pharynx and larynx. **P., Hair,** the depression in the skin in which the hair grows. **Ps., Ileo-cecal,** narrow-necked folds of the peritoneum, at the termination of the ileum. **P., Inguinal,** a fold of the peritoneum behind the internal abdominal ring. **P., Laryngeal,** a blind pouch of mucosa opening into the ventral part of the ventricle of the larynx. **P., Marsupial;** in marsupials, the bag on the anterior abdominal wall in which the young are carried. **P., Needham's,** in biology, an enlargement or cecal diverticulum of the seminal duct of a cephalopod. **P., Pararectal,** the lateral portion of Douglas's pouch. **P., Paravesical,** the paravesical fossa. **P. of Rathke,** the diverticulum from the pharynx in the embryo, which goes to form the anterior portion of the hypophysis. **P., Rectal,** of sharks and rays, a vascular and glandular dorsal diverticulum of the rectum, which Wilder thinks may represent the allantois of higher vertebrates. **P., Recto-uterine,** a pouch-like fold of the peritoneum that is reflected over the uterus. **P., Recto-vaginal.** Same as *P., Recto-uterine*. **P., Recto-vesical,** the pouch of the peritoneum that is reflected on the bladder. **P., of Seesel,** a pouch in the embryo behind the summit of the hypophysis. **P., Subcecal,** a fold of the peritoneum behind and below the cecum. **P. of the Tympanic Membrane,** folds of mucosa around the horizontal portion of the chorda tympani nerve as it passes through the tympanic cavity. **P., Utero-vesical, P., Vesico-uterine,** a pouch of peritoneum situated between the uterus and the bladder.

Poudret, Poudrette (*poo-dret'*) [Fr.]. A form of commercial fertilizer formerly made, the basis of which was night-soil, dried and mixed with charcoal, gypsum, and other ingredients.

Poultice (*pōl'-tis*) [πόλτος, porridge]. A mixture of certain substances, as slippery elm, meal, flaxseed, mustard, etc., into a soft, mush-like mass, for application to the skin of a part. The poultice-material should be mixed with hot water into a mass of even consistence, and should be neatly spread upon muslin, linen, or lint, or even upon paper. Flaxseed or elm poultices should not be more than ¼ inch in thickness, and should receive a thin coating of olive-oil before being applied. This prevents their sticking to the surface of the body. **P., Anodyne,** one yielding an anodyne effect; it usually contains some preparation of opium. **P., Antiseptic,** one containing some germ-destroying substance. **P., Fermenting,** a poultice made by mixing wheat or corn flour with half its weight of yeast, and gently warming it until it begins to swell. It is used as an application to sloughing sores. **P., Galvanic.** See *Galvanic*. **P., Porter,** a flaxseed poultice made with a quantity of porter; its uses are those of the fermenting poultice, *q. v.* **P., Vaginal,** a poultice introduced into the vagina in the treatment of gonorrhea in the female.

Pound (*pownd*) [AS., *pund*, pound]. In Troy weight 12 oz. or 5760 grains; in avoirdupois. 16 oz. or 7000 Troy grains, or 453.6 grams. Symbol lb. See *Weights and Measures*. **P., Foot,** the force necessary to raise one pound through the height of one foot. **P.-nose,** a nose that weighs a pound, a vulgarism for hypertrophy of the nose.

Poundal (*pownd'-dal*) [AS., *pund*, pound]. A unit of force; that force which applied to a pound of matter for one second generates in it a velocity of one foot per second. **P., Foot.** See *Poundal*.

Poupart's Ligament. See *Ligament*.

Poverty (*pov'-er-te*) [ME., *povertee*, poverty]. The state or condition of being poor. **P. of the Blood,** a condition of the blood in which there is a deficiency of the red corpuscles or of the coloring-matter of the blood. **P.-plants,** a class of plants the names of which relate either to the fact that they greatly injure the farmer by impoverishing the soil, or to the extremely poor kind of soil in which they grow, *e. g.*, Poverty (*Polemonium cæruleum*), Poverty-weed (*Spergula arvensis*), Hunger-weed (*Ranunculus arvensis*), etc.

Powder (*pow'-der*) [ME., *powder*, powder]. Fine, minute, loose particles, as of dust. See *Pulvis*. **P. of Algaroth,** a powder prepared by adding an excess of water to an aqueous solution of the terchlorid of antimony. It is composed chiefly of the oxychlorid of antimony. **P., Aromatic,** a powder composed of cinnamon, ginger, and cardamom, with or without nutmeg. **P., Bleaching.** Synonym of chlorinated lime. **P.-blower,** an apparatus for blowing powder into cavities, as the ear, the nose, the larynx, etc. **P., Compound Chalk,** a powder containing prepared chalk, acacia and sugar. **P., Compound Effervescing.** Same as *P., Seidlitz*. **P., Compound Licorice,** a powder containing senna, glycyrrhiza and sugar, with or without fennel and washed sulphur. **P., Compound Morphin.** Same as *P., Tully's*. **P., Dover's,** a diaphoretic and sedative powder composed of powdered opium and ipecac, each one part, and eight parts of sugar of milk. **P., Effervescing.** See *P., Soda*. **P., Fever, of James.** See *Pulvis antimonialis*. **P., Goa.** See *Chrysarobin*. **P., Gray.** See *Hydrargyrum*. **P., Insect.** See *Insect Powder*. **P., James's.** Synonym of *Pulvis antimonialis*. **P., Jesuits',** powdered cinchona, so-called because the Jesuit priests distributed it gratuitously to the poor. **P., Knox's:** 1. Calx chlorata; 2. A mixture of 3 parts calcium chlorite (?) and 8 parts sodium chlorid. **P., Pearl.** Bismuth subnitrate. **P., Ringworm.** Synonym of *Chrysarobin*. **P., Seidlitz.** See *Potassium*. (*Pulv. effervesc. comp.*) **P., Soda,** a powder containing sodium bicarbonate, 30 grains, and tartaric acid, 25 grains. **P., Styptic,** a powder containing alum, gum acacia, and colophony, sometimes with the addition of argil and tragacanth. **P., Talcum,** powdered soapstone, used often as a local application to inflamed surfaces. **P., Tennant's,** chlorinated lime. **P., Tully's,** a powder composed of camphor, prepared chalk, and licorice, 20 parts each, and morphin sulphate, 1 part. It is used as a substitute for Dover's powder. **P., Vienna,** potassa and lime. **P., Vigo's,** red oxid of mercury.

Power (*pow'-er*) [ME., *poer*, power]. Strength; energy. **P., Absolute,** the weight which must be attached to a muscle to keep it from contracting when stimulated. **P., Combining,** in chemistry, the number of hydrogen atoms with which an element is able to combine. **P., Mechanical,** either of the elementary powers, the lever and the inclined plane, from

which all other mechanisms are derived. **P., Sensorial,** the power of receiving and emitting impulses. **P., Sexual,** the ability of having sexual intercourse. **P., Specific Refractive,** a quantity which is constant for every refractive substance, and is found by dividing the index of refraction of the substance, minus one, by the specific gravity of the substance. The quotient multiplied by the molecular weight of the substance gives the refraction equivalent. **P., Specific Rotatory,** the amount of rotation of a substance, in degrees of a circle of the plane of polarized light, produced by one gram of the substance dissolved in one c.c. of liquid examined in a column one decimeter long.

Pox (*poks*) [*pocks: pl.* of *Pock*]. 1. A term applied to several infectious eruptive diseases. 2. Syphilis. **P., Ape,** an exanthematous disease of West Indian monkeys, observed during smallpox epidemics. **P., Bastard.** Synonym of *Varicella.* **P., Chicken.** See *Varicella.* **P., Cow.** See *Cow-pox.* **P., False.** Synonym of *Varicella.* **P., French.** See *Syphilis.* **P., Gland, P., Glans.** Synonyms of *Varicella.* **P., Grease.** Synonym of *Horse-pox.* **P., Great.** Synonym of *Syphilis.* **P., Horn.** See *Horn-pox.* **P., Horse.** See *Horse-pox.* **P., Small.** See *Variola.*

Practice (*prak'-tis*) [*practicare,* to practise]. The official duties of a physician or surgeon in his professional work; also, the exercise of these duties.

Practitioner (*prak-tish'-un-er*) [Fr., *practicien; practicare,* to practise]. One who practises a profession, especially that of medicine. (A badly-formed word.) **P., General,** one who treats all ailments, in distinction from the specialist, who treats only one or a few diseases, or the diseases of one or a few organs.

Præ- (*pre-*) [L.]. A Latin preposition meaning *before,* used as a prefix to denote position. It places the words with which it is combined in antithesis to those combined with *post-*. For anglicized words thus beginning see *Pre-*.

Præbium (*pre'-be-um*) [*præbere,* to furnish]. Dose.

Præcava (*pre-ka'-vah*). See *Precava.*

Præcinctum (*pre-sink'-tum*). Synonym of *Diaphragm.*

Præcordia (*pre-kor'-de-ah*). See *Precordia.*

Præcornu (*pre-kor'-nu*). See *Precornu.*

Præcuneus (*pre-ku-ne'-us*). See *Precuneus.*

Præforceps (*pre-for'-seps*). See *Preforceps.*

Prægeniculatum (*pre-jen-ik-u-la'-tum*). See *Pregeniculatum.*

Præglobin (*pre-glo'-bin*). See *Preglobin.*

Præhallux (*pre-hal'-uks*). See *Prehallux.*

Prælabrum (*pre-la'-brum*) [*præ,* before; *labrum,* lip: *pl., Prælabra*]. In biology, the clypeus or epistoma.

Præmaxilla (*pre-maks-il'-ah*). See *Premaxilla.*

Præmedulla (*pre-me-dul'-ah*). Synonym of *Medulla oblongata.*

Præmose (*pre'-mōz*). See *Premose.*

Prænomen (*pre-no'-men*). See *Prenomen.*

Præoperculum (*pre-o-per'-ku-lum*). See *Preoperculum.*

Præpedunculus (*pre-pe-dung'-ku-lus*). See *Prepedunculus.*

Præpelvisternum (*pre-pel-vis-ter'-num*). See *Prepelvisternum.*

Præperforatus (*pre-per-for-a'-tus*). See *Preperforatus.*

Præputium (*pre-pu'-she-um*). See *Prepuce.*

Præscapularis (*pre-scap-u-la'-ris*). Synonym of *Supraspinatus.*

Præscutum (*pre-sku'-tum*) [*præ,* before; *scutum,* a shield: *pl., Præscuta*]. In biology, the most anterior of the sclerites, composing the tergal portion of each thoracic segment of an arthropod.

Præseminal (*pre-sem'-in-al*). See *Preseminal.*

Præsternum (*pre-ster'-num*). See *Presternum.*

Prævia (*pre'-ve-ah*) [*præ,* before; *via,* a way]. First-coming before. **P., Placenta.** See *Placenta.*

Pragmatagnosia (*prag-mat-ag-no'-ze-ah*) [πρᾶγμα, an object; ἀγνωσία, want of recognition]. Inability to recognize an object. **P., Visual,** a term suggested by Dr. John Wyllie for object-blindness.

Pragmatamnesia (*prag-mat-am-ne'-ze-ah*) [πρᾶγμα, an object; ἀμνησια, forgetfulness]. Inability to remember the appearance of an object. **P., Visual,** a term suggested by Dr. John Wyllie for that mental condition in which there is inability to call up the visual image of an object.

Prague Method. A method of delivery of the after-coming head. The child's ankles are grasped above the internal malleoli with the right hand. The index finger of the left hand is flexed over one clavicle, and the remaining fingers of the same hand over the other clavicle. Traction directly down is now made with both hands until the perineum is well distended. The right hand then loosens its hold upon the ankles and again grasps higher up the legs, the child's feet being in contact with the back of the right hand. By a circular movement the feet are now raised toward the mother's abdomen, the obstetrician using the left hand, as originally placed, as a fulcrum around which the head moves.

Prairie (*pra'-re*) [Fr.]. A meadow. **P. Digs.** See *Army Itch.* **P. Itch,** a name given to a combination of pruritus hiemalis and scabies. See *Army Itch.*

Pratal (*pra'-tal*) [*pratum,* a meadow]. In biology, inhabiting meadows. Cf. *Pascual.*

Pratesi's Reagent. A reagent for the detection of sugar in the urine. It consists of potassium bichromate and an alkaline silicate. See *Tests, Table of.*

Pravaz's Syringe. A hypodermatic syringe with a long trocar and cannula.

Praxis (*praks'-is*). See *Practice.*

Pray's Test-letters or Test. A test for astigmatism, consisting of capital letters composed of strokes that run in different directions for each letter.

Prazmowski, Bacillus of. See *Bacteria, Synonymatic Table of.*

Pre-acetabular (*pre-as-et-ab'-u-lar*) [*præ,* before; *acetabulum,* acetabulum]. Situated in front of the acetabulum.

Pre-albuminuric (*pre-al-bu-min-u'-rik*) [*præ,* before; *albumen,* albumin; οὖρον, urine]. A condition or symptom coming or occurring before the appearance of albuminuria.

Pre-anal (*pre-a'-nal*) [*præ,* before; *anus,* anus]. In biology, situated in front of the anus.

Pre-aortic (*pre-a-or'-tik*) [*præ,* before; ἀορτή, aorta]. Situated in front of the aorta.

Pre-aseptic (*pre-as-ep'-tik*) [*præ,* before; ἀ, priv.; σῆψις, sepsis]. Pertaining to the period before the introduction of aseptic surgery.

Pre-ataxic (*pre-at-aks'-ik*) [*præ,* before; ἀ, priv.; τάξις, order]. Occurring before ataxia.

Pre-auditory (*pre-aw'-dit-or-e*) [*præ,* before; *audire,* to hear]. In anatomy, situated in front of the auditory nerve or canal.

Pre-axal (*pre-aks'-al*) [*præ,* before; *axis,* axis]. Prechordal; placed in front of the axon.

Pre-axial (*pre-aks'-e-al*) [*præ,* before; *axis,* axis]. Situated in front of the axis; in a limb, situated on the internal or anterior aspect—in the arm, on the radial; in the leg, on the tibial side.

Prebacillary (*pre-bas'-il-a-re*) [*præ,* before; *bacillus* bacillus]. Occurring before the invasion of the system by bacilli.

Prebasal (*pre-ba'-sal*) [*præ,* before; *basis,* step, pedestal]. In biology, in front of a basal portion.

Prebasilar (*pre-ba'-zil-ar*) [*præ*, before; *basis*, base]. Situated, or occurring, in front of any basilar structure, especially, in front of the basilar process of the occipital bone.

Prebrachial (*pre-bra'-ke-al*) [*præ*, before; *brachium*, upper arm]. (*a*) Located on the anterior aspect of the brachium or upper arm, *e. g.*, the group of prebrachial muscles: biceps, coraco-brachialis, and brachialis anticus. (*b*) A vein in the wings of certain insects.

Prebrachium (*pre-bra'-ke-um*) [*præ*, before; *brachium*, arm]. The anterior brachium of the brain seen on the lateral slope of the mesencephal. The fibers run obliquely dorsoventrad. In biology, the antebrachial membrane or propatagium. The wing-membrane of bats, above the arm or forearm.

Prebranchial (*pre-brang'-ke-al*) [*præ*, before; *branchiæ*, gills]. In biology, located in front of the gills.

Prebronchial (*pre-brong'-ke-al*) [*præ*, before; βρόγχος, bronchus]. Situated in front of the bronchi.

Prebuccal (*pre-buk'-al*) [*præ*, before; *bucca*, cheek]. In biology, placed in front of the mouth; preoral; prostomial.

Precancerous (*pre-kan'-ser-us*) [*præ*, before; *cancer*, carcinoma]. Occurring before the development of a carcinoma.

Precardiac (*pre-kar'-de-ak*) [*præ*, before; καρδία, heart]. Cephalad of the heart.

Precartilaginous (*pre-kar-til-aj'-in-us*) [*præ*, before; *cartilago*, cartilage]. Prior to the formation of cartilage, as in a certain stage of an embryo.

Precaudal (*pre-kaw'-dal*) [*præ*, before; *cauda*, tail]. Situated in front of the tail or tail-vertebræ.

Precava (*pre-ka'-vah*) [*præ*, before; *cavus*, hollow]. The anterior, or superior vena cava; the vena cava descendens.

Precaval (*pre-ka'-val*) [*præ*, before; *cavus*, hollow]. Pertaining to the precava.

Precentral (*pre-sen'-tral*) [*præ*, before; *centrum*, center]. Situated in front of the central fissure. **P. Convolution.** See *Convolutions, Table of.* **P. Fissure.** See *Fissures, Table of.* **P. Sulcus.** Synonym of *P. Fissure.*

Precerebellar (*pre-ser-e-bel'-ar*) [*præ*, before; *cerebellum*, cerebellum]. Situated before (above) the cerebellum.

Precerebral (*pre-ser'-e-bral*) [*præ*, before; *cerebrum*, cerebrum]. Situated, or occurring before (above), the cerebrum.

Prechordal (*pre-kor'-dal*) [*præ*, before; *chorda*, chord, string]. Situated in front of the notochord.

Precipitant (*pre-sip'-it-ant*) [*præ*, before; *caput*, head]. Any reagent causing precipitation.

Precipitate (*pre-sip'-it-āt*) [*præ*, before; *caput*, head]. The solid substance thrown down from a solution of a substance on the addition of a reagent which deprives it of its solubility. [Abbreviation: Ppt.] **P., Atmospheric,** one formed on simple exposure to the air. **P., Red.** See *Hydrargyrum oxidum rubrum.* **P., White,** $N_2(Hg_2)_3Cl_2$, formed by adding ammonium hydrate to a solution of mercuric chlorid. Hydrargyrum ammoniatum.

Precipitate (*pre-sip'-it-it*) [*præ*, before; *caput*, head]. Headlong; hasty. **P. Labor.** See *Labor.*

Precipitation (*pre-sip-it-a'-shun*) [*præcipitatio*]. The process of throwing down solids from the liquids which hold them in solution. It is usually effected by chemic reaction. Precipitates are *crystalline, amorphous, curdy, flocculent, granular,* or *gelatinous,* according to the form assumed. The agent causing precipitation is the *precipitant,* the solid thrown down, the *precipitate.* **P., Fractional,** the process employed in separating a mixture of fatty acids by the addition of small portions of the acetate of a heavy metal. The precipitate consists of a combination of the metal with a large proportion of the less volatile acid and a small proportion of the more volatile acid. In the filtrate the proportions are reversed. The metal is separated from the less volatile acid by dissolving the precipitate in hydrochloric acid. The process is repeated until finally the filtrate contains practically only the more volatile acid, and the precipitate only the less volatile acid. **P., Partial,** a process of separating two soluble salts by precipitation of a portion of each, and subsequent decomposition of the precipitate. The latter is redissolved and again precipitated.

Preclitellian (*pre-kli-tel'-e-an*) [*præ*, before; *clitellum*, a pack-saddle]. In biology, applied to such earthworms as have the ducts of the testes opening in front of the clitellum.

Precloacal (*pre-klo'-a-kal*) [*præ*, before; *cloaca*, a sewer]. In biology, of or pertaining to, the front part of the cloaca.

Precocity (*pre-kos'-it-e*) [*præ*, before; *coquere*, to ripen]. Early development or maturity. It is applied especially to great development of the mental faculties at an early age.

Precommissure (*pre-kom'-is-ūr*) [*præ*, before; *commissura*, commissure]. The anterior commissure of the brain; it is a marked thickening of the parietes, a compact bundle of nerve-fibers extending laterad and dividing a short distance from the meson into two portions, a temporal and an olfactory.

Precoracoid, Præcoracoid (*pre-kor'-ak-oid*) [*præ*, before; κῶραξ, raven; εἶδος, like]. In biology: (*a*) placed in front of the coracoid process of the scapula; (*b*) a specific part of the pectoral arch of certain vertebrates.

Precordia (*pre-kor'-de-ah*) [*præ*, before; *cor*, the heart: either sing., nom., fem., or pl. of *Precordium*]. A name applied to the diaphragm, the thoracic viscera, or the epigastric region, but often more especially to the area of the chest overlying the heart.

Precordial (*pre-kor'-de-al*) [*præ*, before; *cor*, heart]. Situated, or occurring, in the region of the precordia.

Precordialgia (*pre-kor-de-al'-je-ah*) [*præ*, before; *cor*, heart; ἄλγος, pain]. Pain in the precordial region.

Precordium (*pre-kor'-de-um*). Synonym of *Precordia.*

Precorneal (*pre-kor'-ne-al*) [*præ*, before; *corneus*, horny]. Situated on the front of the cornea of the eye.

Precornu (*pre-kor'-nu*) [*præ*, before; *cornu*, a horn]. The anterior cornu of the lateral ventricle of the brain.

Precribrum (*pre-krib'-rum*) [*præ*, before; *cribrum*, sieve]. The anterior perforated space of the brain.

Precuneal (*pre-ku'-ne-al*) [*præ*, before; *cuneus*, wedge]. Situated in front of the cuneus; specifically, pertaining to the precuneus.

Precuneus (*pre-ku'-ne-us*) [*præ*, before; *cuneus*, wedge]. The quadrate lobule of the parietal lobe situated cephalad of the cuneus of the occipital lobe.

Precurrent (*pre-kur'-ent*) [*præ*, before; *currere*, to run]. In biology, extending cephalad; antrorse.

Precursor (*pre-kur'-sor*) [*præ*, before; *currere*, to run]. A forerunner; a premonitory sign.

Precursory (*pre-kur'-sor-e*). Synonym of *Premonitory.*

Predacean (*pre-da'-se-an*) [*prædax*, given to preying]. In biology, a carnivorous or predaceous animal.

Predelineation (*pre-de-lin-e-a'-shun*). Synonym of *Preformation.*

Predentary (*pre-den'-ta-re*) [*præ*, before; *dens*, tooth]. In biology, a portion of the jaw-bone of certain reptiles.

Prediastolic (*pre-di-as-tol'-ik*) [*præ*, before; διαστολή, diastole]. Occuring before the diastole of the heart.

Predicrotic (*pre-di-krot'-ik*) [*præ*, before; δικροτος, double beating]. Preceding the dicrotic. **P. Wave,** the primary wave in the dicrotic curve of a sphygmogram.

Predigastric (*pre-di-gas'-trik*) [*præ*, before; *digastric*]. Pertaining to the predigastricus.

Predigastricus (*pre-di-gas'-trik-us*) [*præ*, before; *digastric*]. The anterior belly of the digastric muscle.

Predigested (*pre-di-jes'-ted*) [*præ*, before; *digerere*, to digest]. Partly digested by artificial means before being taken into the stomach. **P. Foods,** foods that have been prepared by a process of artificial digestion through the agency of various ferments.

Predigestion (*pre-di-jes'-chun*) [*præ*, before, *digerere*, to digest]. Previous digestion.

Predilatator (*pre-dil-at-a'-tor*) [*præ*, before; *dilator*, a dilator]. The anterior dilator muscle of the nostril.

Predisponent (*pre-dis-po'-nent*). Synonym of *Predisposing*.

Predisposing (*pre-dis-po'-zing*) [*præ*, before; *disponere*, to dispose]. A peculiar condition of the system that renders it liable to attack, under a slight exciting cause; making susceptible.

Predisposition (*prē-dis-po-zish'-un*) [*præ*, before; *disponere*, to dispose]. That condition of the body in which causes that leave other persons unaffected call forth an attack of disease in individuals predisposed. Predisposition may be inherited or acquired. The term at the present time refers especially to susceptibility to infectious diseases, and implies a peculiar condition of the bodily juices or cells, in which these are unable to repel the invasion of pathogenic microorganisms.

Predormition (*pre-dor-mish'-un*) [*præ*, before; dormition]. Applied to the stage of unconsciousness immediately preceding actual sleep.

Predorsal (*pre-dor'-sal*) [*præ*, before; *dorsum*, back]. Situated in front of the dorsum or back.

Preëfficients (*pre-ef-fish'-entz*) [*præ*, before; *efficiens* effecting]. In biology, Galton's term for the sum total of predisposing causes, or factors, in the consideration of any given phenomenon.

Pre-esophageal, Præesophageal (*pre-e-so-faj'-e-al*) [*præ*, before; οἰσοφαγος, esophagus]. In biology, placed in front of the gullet or anterior to the esophageal ring of an invertebrate.

Prefloration (*pre-flo-ra'-shun*) [*præ*, before; *florare*, to blossom]. See *Estivation*.

Prefoliation (*pre-fo-le-a'-shun*) [*præ*, before; *foliare*, to put forth leaves]. See *Vernation*.

Prefontanel (*pre-fon-tan-el'*) [*præ*, before; *fontana*, a little fountain]. The anterior fontanel.

Preforceps (*pre-for'-seps*) [*præ*, before; *forceps*, forceps]. Those hooked or curved anterior fibers of the callosum that reach cephalad into the frontal lobe.

Preform (*pre-form'*) [*præ*, before; *formare*, to shape, fashion]. In biology, the antecedent determination of a form or shape.

Preformation (*pre-for-ma'-shun*) [*præ*, before; *formare*, to form]. A previous formation. **P., Theory of,** a theory prevalent at one time, according to which the germs of all individuals of a species were contained in the first individual of that species created; that, *e. g.*, Eve held in her ovary the germs of all human beings, one encased within the other. Those who espoused this theory of *female encasement* were known as *Ovulists*. An opposing school taught that the spermatozoön was the essential element in reproduction; that the ovum simply offered a favorable soil for its development, and that in the spermatozoön of Adam all mankind had been preformed. The adherents of the theory of the *encasement of the male* were styled *Animalculists*. See *Incasement*.

Prefrontal (*pre-frun'-tal*) [*præ*, before; *frons*, forehead]. In biology: (*a*) the fore part of the frontal region; (*b*) one of the anterior cranial bones of certain vertebrates.

Pregeminal (*pre-jem'-in-al*) [*præ*, before; *geminus*, twin]. Relating to the anterior pair of the corpora quadrigemina.

Pregeminum (*pre-jem'-in-um*) [*præ*, before; *geminus*, twin]. The anterior pair of the corpora quadrigemina, considered as forming together a single organ.

Pregeniculatum (*pre-jen-ik-u-la'-tum*) [*præ*, before; *geniculatum*, geniculate]. Same as *Pregeniculum*.

Pregeniculum (*pre-jen-ik'-u-lum*). *The external geniculate body*, on the outer side of the corpora quadrigemina and under the back part of the optic thalamus. It is characterized by the regular alternation of deeply gray and white lamina. The nerve-cells in the gray substance are large, multipolar, and pigmented.

Pregenital (*pre-jen'-it-al*) [*præ*, before; *genitalis*, belonging to generation]. In biology, located in front of the external genital organs.

Preglenoid (*pre-gle'-noid*) [*præ*, before; γλήνη, pit; εἶδος, like]. Situated in front of the glenoid fossa.

Preglobin (*pre-glo'-bin*) [*præ*, before; *globus*, a globe]. An albuminoid derivable from cytoglobin by the influence of dilute acids. It differs from other albuminoids in being insoluble in an excess of acetic acid.

Preglobulin (*pre-glob'-u-lin*) [*præ*, before; *globulus*, a little ball]. An albuminous body present in small amount in cells, insoluble in water, soluble in a ten per cent. sodium chlorid solution and a dilute alkaline solution. It slightly inhibits coagulation.

Pregnancy (*preg'-nan-se*) [*pregnans*, with child]. The state of the female corresponding to the presence within her body of the product of conception; the period from conception to delivery. If delivery is protracted far beyond the normal time and the ovum is dead, the condition of pregnancy cannot be said to exist. The normal duration of pregnancy in woman is 280 days, or ten lunar months of twenty-eight days each, or nine calendar months. Various methods have been devised to estimate the probable termination of pregnancy, one of which, Ely's Table, is here introduced. The period of gestation varies in different animals, as shown in the following table:—

PERIOD OF GESTATION OR INCUBATION (*Schenk*).

	Days.		*Weeks.*
Coluber,	12	Badger, Wolf,	10
Hen, Duck,	21	Lion,	14
Goose,	29	Pig,	17
Stork,	42	Sheep,	21
Cassowary,	65	Goat,	22
Mouse,	24	Roe,	24
Rabbit, Hare,	32	Bear, Small apes,	30
	Weeks.	Deer,	36–40
Rat,	5	Woman,	40
Guinea-pig,	7		*Months.*
Cat, Marten,	8	Horse, Camel,	11
Dog, Fox, Foumart,	9	Rhinoceros,	18
		Elephant,	24

P., Abdominal, the lodgment of the developing ovum in the abdominal or peritoneal cavity; it is *primary*, if the fertilization take place in the cavity, and *secondary*, if the embryo or ovum break through the enclosing walls of a tube or uterine cornu into the peritoneal cavity. **P., Cervical:**

ELY'S TABLE OF THE DURATION OF PREGNANCY.

EXPLANATION.—Find in the upper horizontal row the date of last menstruation; the figure beneath will show the expiration of 280 days or ten months of 28 days each.

primitive, a variety of ectopic gestation wherein the ovum is arrested and developed in the cervical canal; *secondary*, in early abortion the ovum expelled from the uterine cavity, remains in the cervical cavity. **P., Cornual**, pregnancy in one of the horns of a two-horned uterus. **P., Extra-uterine**, *ectopic gestation*; the development of the ovum outside of the cavity of the uterus. It is due to any condition that will prevent the entrance of the ovum into the uterus, as, for instance, inflammation of the Fallopian tubes. Pregnancy may take place within the tube, in the ovary, in the part of the tube that traverses the uterine wall, or in the abdominal cavity. **P., False**, any condition in the abdomen that simulates pregnancy. **P., Fatty**, false pregnancy due to the presence of a large quantity of fat in the abdominal walls. **P., Feigned**, pregnancy simulated by malingerers. **P., Gemellary**, twin pregnancy. **P., Hysterical**, a very deceptive condition of certain hysterical females which simulates pregnancy. There is abdominal enlargement, generally from tympanites, cessation of menstruation, and other symptoms of pregnancy; movements of the intestines may counterfeit fetal movements. The tympany of the abdomen and the modifications of the signs usually produced by anesthetization are important in the diagnosis. **P., Interstitial**, a variety of extra-uterine and tubal pregnancy, the ovum developing in that portion of the oviduct that passes through the wall of the uterus. **P., Molar**, pregnancy in which the ovum is converted into a mole. **P., Multiple**, that form of pregnancy in which the uterus contains two or more fetuses. **P., Mural**, pregnancy in the uterine wall; it is classed as one variety of extra-uterine pregnancy. **P., Nervous.** Synonym of *P., Hysterical.* **P., Ovarian**, the fecundation and growth of the ovum taking place within the ovisac. **P., Phantom.** Synonym of *P., Hysterical.* **P., Plural**, the development of more than one fetus at one time. **P., Precocious**, pregnancy at an early age, sometimes before the establishment of menstruation. **P., Signs of.** See *Hegar's*, *Braxton Hicks and Jorisenne's* in *Signs and Symptoms*, *Table of.* **P., Signs or Tests of**, those clinical manifestations by which the existence of pregnancy may be demonstrated. There are three so-called absolute signs of pregnancy: Ballottement, fetal movements, and the fetal heart-sounds. Hegar's sign and Braxton Hicks' sign are also valuable. Beccaria's sign of pregnancy is an intense pulsating pain in the occipital region. **P., Single or Simple**, the normal development of a single fetus. **P., Spurious.** Synonym of *P., False.* **P., Tubal**, development of the ovum in the oviduct. **P., Tubo-abdominal**, the ovum is developed in the ampulla and extends into the abdominal cavity. **P., Tubo-ovarian**, the ovum is attached to the oviduct and ovary. **P., Tubo-uterine.** Same as *P., Interstitial.* **P., Twin**, the presence of two fetuses in the uterus. **P., Unconscious**, pregnancy, of the existence of which the woman has not become aware.

Pregnant (*preg'-nant*) [*prægnans*]. With child; gravid.

Prehallux (*pre-hal'-uks*) [*præ*, before; *hallex* or *allex*, the great toe: gen., *Prehallucis*; *pl.*, *Prehalluces*]. In biology, the tibial sesamoid bone found in mammals having complete digits. A rudimentary structure corresponding to the prepollux is seen in the human embryo of the second month. Cf. *Prepollex* and *Postminimus*.

Prehalter (*pre-hawl'-ter*) [*præ*, before; *halter*, leaping weights: *pl.*, *Prehalteres*]. In biology, a membran-

ous scale in front of the balancer or halter of dipterous insects.

Prehemiplegic (*pre-hem-ip-le'-jik*) [*præ*, before; *ἡμι*, half; *πληγή*, stroke]. Occurring before an attack of hemiplegia. **P. Chorea**, choreiform movements of a limb, preceding its paralysis. **P. Pain**, painful sensations in a limb which subsequently becomes paralyzed.

Prehensile (*pre-hen'-sil*) [*prehendere*, to lay hold of]. In biology, adapted for grasping or holding.

Prehension (*pre-hen'-shun*) [*prehendere*, to seize]. The act of taking hold or seizing.

Prehensorium (*pre-hen-so'-re-um*) [*prehendere*, to lay hold of, seize]. In biology, a structure adapted for grasping; specifically applied to the hind legs of certain spiders.

Prehensory (*pre-hen'-so-re*). Same as *Prehensile*.

Prehnitic Acid (*pren-it'-ik*). See *Acid*.

Prehnitol (*pren'-it-ol*), $C_{10}H_{14}$. A hydrocarbon, produced by warming durene with concentrated H_2SO_4. It is a liquid boiling at 204° C.

Prehypophysis (*pre-hi-poff'-is-is*) [*præ*, before; *ὑπόφυσις*, hypophysis]. The anterior and larger portion of the hypophysis, derived from the enteron.

Pre-insula (*pre-in'-su-lah*) [*præ*, before; *insula*, insula]. The cephalic region of the insula.

Prelacrymal (*pre-lak'-rim-al*) [*præ*, before; *lacryma*, tear]. Situated in front of the lacrymal bone.

Prelum (*pre'-lum*) [L.]. Press. **P. abdominale**, the squeezing of the abdominal viscera between the diaphragm and the rigid abdominal wall, as in the processes of defecation, micturition, and parturition. **P. arteriole.** Synonym of *Tourniquet*.

Prelumbar (*pre-lum'-bar*) [*præ*, before; *lumbus*, loin]. Anterior to the lumbar vertebræ or the loins.

Premandibular (*pre-man-dib'-u-lar*) [*præ*, before; *mandibula*, mandible]. See *Predentary*.

Premaniacal (*pre-ma-ni'-ak-al*) [*præ*, before; *μανία*, mania]. Previous to insanity, or to an attack of mania.

Premature (*pre-mat-ūr'*) [*præ*, before; *maturare*, to ripen]. Occurring before the proper time. **P. Labor.** See *Labor*. **P. Respiration**, respiration taking place before complete birth of the fetus.

Premaxilla (*pre-maks-il'-ah*) [*præ*, before; *maxilla*, jaw]. The intermaxillary bone.

Premaxillary (*pre-maks'-il-a-re*). See *Intermaxillary*.

Premenstrual (*pre-men'-stru-al*) [*præ*, before; *menstrua*, menstrua]. Preceding menstruation.

Premolar (*pre-mo'-lar*) [*præ*, before; *mola*, millstone]. 1. Situated in front of the molar teeth. 2. One of the two anterior permanent molars. A term applied to the bicuspids (*bicuspidati*, two spear-points) of a horse, from the two eminences on their crowns.

Premonitory (*pre-mon'-it-or-e*) [*præ*, before; *monere*, to warn]. Indicating the approach of an event or the oncoming of a disease.

Premorse (*pre-mors'*) [*præ*, before; *mordere*, to bite]. In biology, irregularly truncate, as if bitten off.

Prenarial (*pre-na'-re-al*) [*præ*, before; *naris*, nostril]. Pertaining to the prenares.

Prenaris (*pre-na'-ris*) [*præ*, before; *naris*, nostril]. The anterior naris.

Prenasal (*pre-na'-zal*) [*præ*, before; *nasus*, nose]. In front of the nose or nasal passages.

Prenatal (*pre-na'-tl*) [*præ*, before; *nasci*, to be born]. Existing previous to birth.

Prenomen, Prænomen (*pre-no'-men*) [*præ*, before; *nomen*, name: *pl.*, *Prenomina*, *Prænomina*]. In biology, the first, or generic, portion of an onym in binominal or polynominal nomenclature.

Pre-occipital (*pre-ok-sip'-it-al*) [*præ*, before; *occiput*, occiput]. Situated anterior to the occipital region. **P. Fissure**, a fissure on the ventral, lateral surface of the cerebrum separating the occipital and sphenotemporal lobes.

Preoccupation (*pre-ok-u-pa'-shun*) [*præ*, before; *occupare*, to occupy]. The condition of being so engrossed in one's own thoughts as not to answer or hear when accosted; a symptom of melancholia.

Preocular (*pre-ok'-ular*) [*præ*, before; *oculus*, eye]. In biology, placed in front of the eye; as the *preocular antennæ* of certain insects.

Preomosternal (*pre-o-mo-ster'-nal*) [*præ*, before; *ὠμος*, shoulder; *στέρνον*, sternum]. Pertaining to the preomosternum.

Preomosternum (*pre-o-mo-ster'-num*) [*præ*, before; *ὠμος*, shoulder; *στέρνον*, sternum]. An anterior omosternum.

Preopercle (*pre-o-per'-kl*). Same as *Preoperculum*.

Preoperculum, Præoperculum (*pre-o-per'-ku-lum*) [*præ*, before; *operculum*, a lid: *pl.*, *Preopercula*]. In biology: (*a*) the fore-lid, or operculum, of a moss-capsule; (*b*) one of the opercular bones of a fish; (*c*) the frontal operculum of the brain, between the presylvian and subsylvian fissures.

Preoptic (*pre-op'-tik*) [*præ*, before; *ὀπτικός*, from *ὀπτάν*, to see]. Pregeminal; anterior to the optic lobes.

Preopticus (*pre-op'-tik-us*) [*præ*, before; *ὄψ*, sight]. The anterior pair of the quadrigeminal bodies.

Preoral (*pre-o'-ral*) [*præ*, before; *os*, *oris*, mouth]. Situated in front of the mouth; prebuccal. **P. Segments**, in biology, certain hypothetic, primitive rings in articulated animals, supposed to be cephalad of those bearing the mouth-organs, and to be folded back, thus forming the top of the head.

Preosseous (*pre-os'-e-us*) [*præ*, before; *os*, a bone]. Preceding the formation of bone. Applied to a transparent substance having the chemic characters of ostein, with cavities containing osteoblasts, from which the bone is formed.

Prepalatal (*pre-pal'-at-al*) [*præ*, before; *palatum*, palate]. Situated in front, or in the anterior part, of the palate.

Prepalatine (*pre-pal'-at-in*) [*præ*, before; *palatum*, palate]. Synonym of *Prepalatal*. Also, as a plural noun, the maxillary processes of the palate bone.

Preparation (*prep-ar-a'-shun*) [*præparare*, to make ready]. Anything made ready. In anatomy, any part of the body prepared or preserved for illustrative or other uses. In pharmacy, any compound or mixture made after a formula.

Prepared (*pre-pārd'*) [*præparare*, to make ready]. Made ready. **P. Cover-glass**, in bacteriology, a thin glass cover upon which a delicate film of the substance to be examined has been spread, and after having dried, has been fixed by passing the cover-glass thrice through the flame of a spirit-lamp or Bunsen-burner. The cover-glass is now ready to be stained.

Preparoccipital (*pre-par-ok-sip'-it-al*) [*præ*, before; *παρά*, beside; *occiput*, the occipital bone]. Lying anteriorly in the paroccipital gyre of the brain, as a certain fissure.

Prepatellar (*pre-pat-el'-ar*) [*præ*, before; *patella*, patella]. Situated in front of the patella, as a bursa.

Prepeduncle (*pre-pe'-dung-kl*) [*præ*, before; *pedunculus*, peduncle]. The anterior of the cerebellar peduncles extending to the mesencephal.

Prepeduncular (*pre-pe-dung'-ku-lar*) [*præ*, before; *pedunculus*, peduncle]. Pertaining to the prepeduculus.

Prepedunculate (*pre-pe-dung'-ku-lāt*) [*præ*, before; *pedunculus*, peduncle]. Same as *Prepeduncular*.

Prepedunculus (*pre-pe-dung'-ku-lus*) [*præ*, before; *pedunculus*, peduncle]. See *Prepeduncle*.

Prepelvisternal (*pre-pel-vis-ter'-nal*) [*præ*, before; *pelvis*, pelvis; *στέρνον*, sternum]. Pertaining to the prepelvisternum.

Prepelvisternum (*pre-pel-vis-ter'-num*) [*præ*, before; *pelvis*, pelvis; *στέρνον*, sternum]. An anterior pelvisternum.

Preperforatus (*pre-per-for-a'-tus*) [*præ*, before; *perforare*, to perforate]. The anterior perforated space.

Prephthisis, Præphthisis (*pre-tiʹ-sis, pre-teʹ-sis*) [*præ*, before; *φθίσις*, phthisis]. The pretuberculous state. The predisposition to tuberculosis.

Prepigmental (*pre-pig-mentʹ-tal*) [*præ*, before; *pigmentum*, a pigment]. Situated within the pigmented layer of the eye.

Prepituitary (*pre-pit-uʹ-it-a-re*) [*præ*, before; *pituita*, phlegm]. Situated in front of the pituitary body.

Preplacental (*pre-plas-enʹ-tal*) [*præ*, before; *πλακοῦς*, *placenta*, placenta]. Previous to the formation of the placenta.

Prepollex (*pre-polʹ-eks*) [*præ*, before; *pollex*, the thumb: gen., *Prepollicis: pl., Prepollices*]. In biology, the radial sesamoid bone of such mammals as have five complete digits. Occasionally, as in *Pedetes caffer*, the so-called prepollex consists of two bones, of which the distal one bears a distinct nail-like horny covering. Cf. *Prehallux*, *Postminimus*.

Prepontile (*pre-ponʹ-til*) [*præ*, before; *pons*, a bridge]. Situated in front of the pons varolii.

Prepotency (*pre-poʹ-ten-se*) [*præ*, before; *posse*, to be powerful]. In biology, dominant "force of heredity." The power that one parent may have of impressing his or her own character upon the offspring, the peculiar characters of the other parent being less obviously transmitted. **P., Individual,** a phenomenon, recognized by breeders of plants and animals, in which it seems that a marked tendency occasionally exists in certain individuals to transmit their special, individual characters to the majority of the offspring. Among plants, Vilmorin distinguishes as "*bons etalons*" individuals that possess the capacity of transmitting their own characters to their offspring in a great degree. One of the best known examples among animals is that of the "otter sheep." **P., Racial,** a particularly marked power of transmission in a given race in contrast to other races; this power is more marked in the pouter pigeon than in the fantail, so that when these two races are crossed, the characters of the pouter predominate in the offspring.

Prepubic (*pre-puʹ-bik*) [*præ*, before; *pubis*, pubis]. In biology, placed in front or in the fore part of the pubis.

Prepubis (*pre-puʹ-bis*) [*præ*, before; *pubis*, pubis: *pl., Prepubes*]. In biology, the pubis of a bird; the preacetabular part of the pubic bone.

Prepuce (*preʹ-pūs*) [*præputium*, prepuce]. The foreskin of the penis. It is lined with mucosa. **P. of the Clitoris,** the superior folds of the nymphæ surrounding the glans clitoris.

Preputial (*pre-puʹ-she-al*) [*præputium*, prepuce]. Pertaining to the prepuce.

Preputium (*pre-puʹ-she-um*). See *Prepuce*.

Prepyloric (*pre-pi-lorʹ-ik*) [*præ*, before; *pylorus*, the distal orifice of the stomach]. Placed in front of the pylorus.

Prepyramid (*pre-perʹ-am-id*) [*præ*, before; *pyramis*, pyramid]. One of the anterior (ventral) pyramids of the oblongata.

Preramus (*pre-raʹ-mus*) [*præ*, before; *ramus*, branch]. The vertical (anterior or cephalic) branch of the stem of the arbor of the cerebellum.

Prerectal (*pre-rekʹ-tal*) [*præ*, before; *rectum*, rectum]. Situated in front of the rectum.

Prerenal (*pre-reʹ-nal*) [*præ*, before; *ren*, kidney]. Situated in front of the kidney.

Preretina (*pre-retʹ-in-ah*) [*præ*, before; *retina*, retina]. The thin lamina which represents the retina on that part of the inner surface of the chamber of the eye which lies anterior to the ora.

Preretinal (*pre-retʹ-in-al*) [*præ*, before; *retina*, retina]. Pertaining to the preretina.

Prerima (*pre-riʹ-mah*) [*præ*, before; *rima*, a fissure]. An extension of the rima cephalad from the porta, as in certain fishes.

Prerimal (*pre-riʹ-mal*) [*præ*, before; *rima*, cleft]. Pertaining to the prerima.

Presacral (*pre-saʹ-kral*) [*præ*, before; *sacrum*, sacrum]. Situated in front of the sacrum.

Presbyacoustic (*prez-be-ak-ooʹ-stik*) [*πρέσβυς*, old; *ἀκούειν*, to hear]. Pertaining to the loss of acoustic acuity in old age, half an octave in range being lost from the maximum to the beginning of old age, the loss continuing during the period of old age.

Presbycusis, Presbykousis (*prez-be-kooʹ-sis*) [*πρέσβυς*, old; *ἀκούειν*, to hear]. The lessening of the acuteness of hearing that occurs in old age.

Presbyonosus (*prez-be-onʹ-o-sus*) [*πρέσβυς*, old; *νόσος*, disease]. Any disease peculiar to old age.

Presbyope (*prezʹ-be-ōp*) [*πρέσβυς*, old; *ὤψ*, eye]. One who is presbyopic.

Presbyophrenia (*prez-be-o-frenʹ-e-ah*) [*πρέσβυς*, old; *φρήν*, mind]. Senile dementia.

Presbyopia (*prez-be-oʹ-pe-ah*) [*πρέσβυς*, old; *ὤψ*, eye]. "Old sight"; the condition reached at about 45–50 years of age, in which from growing inelasticity of the crystalline lens of the eye (failure of accommodation) the near-point of distinct vision is removed to an inconvenient distance from the eye, with consequent diminution in size of the retinal image.

Presbyopic (*prez-be-opʹ-ik*) [*πρέσβυς*, old; *ὤψ*, eye]. Affected with presbyopia.

Presbyopy (*prezʹ-be-o-pe*). Same as *Presbyopia*.

Presbyosphacelus (*prez-be-o-sfasʹ-el-us*) [*πρέσβυς*, old; *σφάκελος*, gangrene]. Senile gangrene.

Presbytia (*prez-bishʹ-e-ah*). Synonym of *Presbyopia*.

Prescapula (*pre-skapʹ-u-lah*) [*præ*, before; *scapula*, scapula]. The part of the scapula anterior or cephalad to its spine or median axis.

Prescapular (*pre-skapʹ-u-lar*) [*præ*, before; *scapula*, shoulder-blade]. 1. Situated in front of the scapula. 2. Pertaining to the prescapula.

Prescapularis (*pre-skap-u-laʹ-ris*) [*præ*, before; *scapula*, scapula]. The supraspinatus muscle.

Prescription (*pre-skripʹ-shun*) [*præ*, before; *scribere*, to write]. A formula written by the physician to the dispenser of medicines, designating the substances to be employed in a mixture or preparation. **P.-blank,** a square or rectangular slip of paper, usually bearing the physician's name, residence, and office hours, and the symbol ℞, and upon which the prescription is written. **P.-book,** a book in which prescriptions are pasted for future reference. **P.-file,** a contrivance for holding prescriptions. **P.-glass:** (1), a graduated glass vessel for administering medicines; (2), a spectacle glass made according to an oculist's prescription.

Prescutal (*pre-skuʹ-tal*) [*præ*, before; *scutum*, a shield]. Pertaining to the prescutum.

Prescutum, Præscutum. See *Præscutum*.

Presemilunar (*pre-sem-il-uʹ-nar*) [*præ*, before; *semilunar*]. Anterior to the semilunar lobe of the cerebellum, as the presemilunar lobe.

Preseminal (*pre-semʹ-in-al*) [*præ*, before; *semen*, seed]. Prior to insemination.

Presentation (*pre-zen-taʹ-shun*) [*præsentare*, to place before]. In obstetrics, that part of the fetal body

which presents itself to the examining finger in the center of the plane of the superior strait of the maternal pelvis. **P., Abdominal,** presentation of the abdomen. **P., Arm,** prolapse of the arm, usually associated with shoulder-presentation. **P., Breast,** presentation of the anterior aspect of the child's chest. **P., Breech,** presentatation of the pelvic extremity of the fetal ellipse. **P., Brow,** presentation of the brow. **P., Cephalic,** presentation of any part of the head. **P., Cheek,** presentation of the cheek. **P., Chin,** presentation of the chin. **P., Coccygeal,** breech-presentation. **P., Complete Foot,** presentation of both feet. **P., Complicated.** Synonym of *P., Compound.* **P., Compound,** the presentation of two or more parts at the same time, as the head and hand, etc. **P., Ear,** presentation of the ear. **P., Face,** presentation of the face. **P., Foot, P., Footling,** presentation of one or both feet. **P., Frontal.** Synonym of *P., Face.* **P., Funis,** presentation of the umbilical cord. **P., Head,** presentation of any part of the head. The vertex-presentation is most common. **P., Incomplete Foot,** presentation of one foot. **P., Knee,** presentation of one or both knees. **P., Longitudinal,** the presentation of either the cephalic or the pelvic extremity of the fetal ellipse. **P., Mouth,** presentation of the mouth. **P., Neck,** presentation of the neck. **P., Occipital,** presentation of the occiput. **P., Occipito-anterior,** a vertex-presentation in which the occiput is anterior. **P., Occipito-lateral,** presentation of the vertex, with the occiput directed toward one or the other side of the pelvis. **P., Occipito-posterior,** a vertex-presentation in which the occiput is directed toward the back of the mother's pelvis. **P., Occipito-sacral,** one in which the occiput has rotated into the hollow of the sacrum. **P., Pelvic,** presentation of the pelvic extremity of the fetal ellipse, including breech, foot, and knee presentations. **P., Placental,** placenta prævia. **P., Polar.** Synonym of *P., Longitudinal.* **P., Preternatural,** a transverse position of the fetus. **P., Primary,** a presentation that has existed from before the beginning of labor. **P., Secondary,** a presentation that is developed while labor is in progress. **P., Shoulder,** presentation of the shoulder. **P., Side,** presentation of the side of the trunk. **P., Transverse,** one in which the axis of the fetus lies transversely. **P., Vertex.** See *Presentation.*

Preservative (*pre-ser'-va-tiv*) [*præservare*, to preserve]. Tending to keep from decay. **P. Fluid** (for section-cuttings of specimens). Many are used. Hamilton recommends equal parts of glycerin and water with about eight minims of carbolic acid to the ounce. One of the best is 80% alcohol. See *Stains, Table of.*

Presis (*pre'-sis*) [πρήθειν, to burn]. Inflammation; tumor.

Presphenoid (*pre-sfe'-noid*) [*præ*, before; σφήν, wedge; εἶδος, like]. In human anatomy the anterior part of the body of the sphenoid bone, with its lesser wings. In some of the lower animals it is a separate bone.

Presphygmic (*pre-sfig'-mik*) [*præ*, before; σφυγμός, pulse]. Pertaining to the period preceding the pulse-wave.

Prespinal (*pre-spi'-nal*) [*præ*, before; *spina*, spine]. In anatomy, ventrad of the spine.

Presse-artère (*pres'-ar-tār*) [Fr.]. An instrument for the compression or temporary occlusion of an artery.

Pressing (*pres'-ing*) [ME., *pressen*, to press]. A passive Swedish movement of great service in the treatment of nervous affections.

Pressions (*presh'-unz*) [ME., *pressen*, to press]. In massage, exercises in pressing and squeezing the tissues, either by the ends of the fingers, by the whole hand, or by means of the roulet.

Pressor (*pres'-or*) [*premere*, to press]. Stimulating. **P. Fibers,** nerve-fibers, stimulation of which excites the vaso-motor centers, and consequently increases the arterial tension. Others reflexly diminishing the excitability of these centers are called **Depressor Fibers.**

Pressure (*presh'-ur*) [*premere*, to press]. Force, weight, or tension. In massage, a proceeding midway between kneading and percussion. It consists in making firm pressure with a small surface, as the tips of the fingers held stiffly, or the knuckles. It is used especially when it is desired to reach deep-seated nerve-trunks. **P., After,** the sense of pressure that remains for a brief period after the removal of an object from the surface of the body. **P., Arterial,** the tension of the blood within the arteries. **P., Atmospheric,** the pressure of the atmosphere; it equals about fifteen pounds to the square inch at sea-level. **P.-bandage.** See *Bandage.* **P., Blood,** the pressure of the blood against the walls of the vessels or of the heart. It is measured by means of the manometer. **P., Endocardial,** the pressure of the blood within the heart. **P. of Inspiration,** the pressure of the air in the respiratory organs during the act of inspiration. **P., Intra-abdominal,** the pressure exerted upon the parietes by the abdominal viscera. **P., Intra-cranial,** the pressure of the contents of the cranium upon its walls. **P., Intra-ocular.** See *Tension, Intraocular.* **P., Intra-thoracic,** the pressure of the intra-thoracic organs upon the walls of the chest. **P., Negative,** the force of suction; also absence of pressure. **P.-phosphenes.** See *Phosphenes.* **P.-Points** (or *Spots*), points of marked sensibility to pressure or weight, arranged like the temperature-spots, and showing a specific end-apparatus arranged in a punctated manner and connected with the pressure-sense. **P.-sense,** the sense by which pressure upon the surface is appreciated. **P.-sore.** See *Bed-sore.* **P.-symptoms:** 1. Nervous symptoms due to pressure upon the brain or spinal cord. In general, if the pressure is light, the symptoms are those of irritation of the area pressed upon, manifesting themselves as spasmodic movements, tonicity of the muscles, pain, hyperesthesia, etc.; if the pressure is great, there results paralysis, motor or sensory or both, of the parts innervated by the areas pressed upon. 2. The symptoms produced by an aneurysm or a tumor, as of the pelvis, adjacent organs being impinged upon. **P.-tests,** tests made to ascertain the quality or acuteness of the pressure-sense. They may be made by using objects of the same form and size but of different weights. **P.-theory,** a theory that ascribes the formation of hernia to an overcoming of the resistance of the abdominal parietes at a weakened spot by the intra-abdominal pressure. **P., Venous,** the blood-pressure in the veins.

Presternal (*pre-ster'-nal*) [*præ*, before; *sternum*, the breast-bone]. In biology, of or pertaining to the *presternum.*

Presternalis (*pre-ster-na'-lis*) [*præ*, before; *sternum*, sternum]. A muscle passing along one or both sides of the sternum, from above downward to the fourth or fifth rib, or lower.

Presternum (*pre-ster'-num*) [*præ*, before; *sternum*, the breast-bone]. In biology, the manubrium or cephalic segment of the sternum.

Prestomial (*pre-sto'-me-al*) [*præ*, before; στόμα, mouth]. Extending beyond or in front of the mouth.

Prestomium (*pre-sto'-me-um*) [*præ*, before; στόμα, mouth]. In biology, a distinct cephalic segment of the higher polychetous worms.

Preston Smelling-salts. See *English Smelling-salts.*

Presylvian (*pre-sil'-ve-an*) [*præ*, before; *Sylvius*, an anatomist]. Cephalad of the fissure of Sylvius.

Presymphysial (*pre-sim-fis'-e-al*) [*præ*, before; *σύμφυσις*, symphysis]. Situated in front of the symphysis menti.

Presystole (*pre-sis'-to-le*) [*præ*, before; *συστολή*, systole]. The period of the heart's pause preceding the systole.

Presystolic (*pre-sis-tol'-ik*) [*præ*, before; *συστολή*, systole]. Preceding the systole of the heart. **P. Murmur,** the murmur of mitral or tricuspid stenosis, which occurs just before the systole. **P. Thrill,** a thrill felt over the precordia during the pause of the heart, just before the systole. It is very commonly present in mitral stenosis.

Pretibial (*pre-tib'-e-al*) [*præ*, before; *tibia*, tibia]. Situated in front of the tibia.

Pretuberculous (*pre-tu-ber'-ku-lus*) [*præ*, before; *tuberculum*, tubercle]. Preceding the development of tuberculosis.

Pretympanic (*pre-tim-pan'-ik*) [*præ*, before; *tympanum*, tympanum]. Situated in front of the tympanic region.

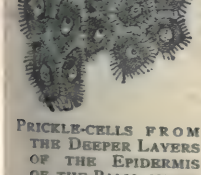
Preventive (*pre-ven'-tiv*) [*prevenire*, to anticipate, to prevent]. Warding off. **P. Medicine,** that branch of medical science that aims to prevent or ward off disease by properly directed hygiene, personal and public.

Prevermis (*pre-ver'-mis*) [*præ*, before; *vermis*, worm]. The superior vermiform process of the cerebellum.

Prevertebral (*pre-ver'-te-bral*) [*præ*, before; *vertebra*, vertebra]. Situated ventrad of a vertebra or the vertebral column.

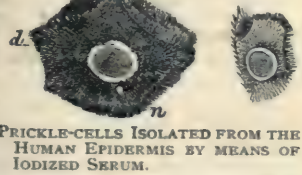
Prevesical (*pre-ves'-ik-al*) [*præ*, before; *vesica*, bladder]. Situated in front of the bladder.

Prezygapophysial (*pre-zi-gap-off-iz'-e-al*) [*præ*, before; *ζυγόν*, yoke; *ἀπόφυσις*, process]. Pertaining to the prezygapophysis.



Prezygapophysis (*pre-zi-gap-off'-is-is*) [*præ*, before; *ζυγόν*, yoke; *ἀπόφυσις*, process]. An anterior or superior zygapophysis; a superior oblique, or articular process of a vertebra.

Priapism (*pri'-ap-izm*) [*πριαπισμός*]. 1. Persistent or frequently repeated erection of the penis. It is sometimes caused by injuries to the spinal cord; also by injuries to the penis and by vesical calculus. 2. The erection of the clitoris in the female, under the influence of venereal desire.



Priapitis (*pri-ap-i'-tis*). Synonym of *Phallitis.*

Priapus (*pri'-ap-us*) [Πρίαπος, the god of procreation]. Penis.

Prickle (*prik'-l*) [*prica*, a point]. In biology, a hardened, ridged, hair-like, epidermal outgrowth; a senile spine. **P.-cells,** irregularly polyhedral cells, constituting the middle strata of the human epidermis, which are mutually connected by means of delicate processes that bridge the intervening intercellular clefts and establish direct continuity between neighboring cells; when such elements are isolated, the delicate threads are broken and the disassociated cells appear as if beset with minute spines. (Piersol.) **P.-layer,** the lowest stratum of the epidermis, the stratum spinosum.

PRICKLE-CELLS FROM THE DEEPER LAYERS OF THE EPIDERMIS OF THE PALM, SHOWING INTERCELLULAR BRIDGES AND CHANNELS. (*From Stirling.*)

PRICKLE-CELLS ISOLATED FROM THE HUMAN EPIDERMIS BY MEANS OF IODIZED SERUM.

n. Prickles; *d.* Space between nucleus and cell-body. × 800. (*From Stirling.*)

Prickly (*prik'-le*) [*prica*, a point]. In biology, covered with prickles. **P. Ash.** See *Xanthoxylum.* **P. Heat.** See *Miliaria.*

Pride of China. See *Azedarach.*

Priestley's Matter. A name formerly given to small algæ found in stagnant water and even in closed vessels, which led Mayer (1827) and Kützing (1833) to assume that they were produced by spontaneous generation.

Primæ viæ (*pri'-me vi'-e*) [L., "the primary passages"]. The alimentary canal, the lacteals being "the secondary passages." Old.

Primalia (*pri-ma'-le-ah*) [*primus*, first]. A name given by Wilson and Cassin to a group of beings, including the simplest plants and animals, which propagate by cell-development. Comprised in these groups are the algæ, lichens, fungi, infusorians, and sponges.

Primary (*pri'-ma-re*) [*primus*, first]. First in time or in importance. **P. Amputation,** one that is done before the development of inflammation, usually within the first twenty-four hours. **P. Body-cavity,** the space included between the somatopleure and the splanchnopleure. It is also known as the cœlom. **P. Bubo,** a simple adenitis of an inguinal lymphatic gland, resulting from mechanical irritation. It is also known as *Bubon d' emblée.* **P. Confusional Insanity,** a form of insanity in which there is confusion of ideas and marked incoherence of speech, without decided emotional disturbance. See *Insanity.* **P. Curable Dementia.** Synonym of *P. Dementia.* **P. Dementia,** a form of insanity coming on suddenly or gradually, in young adults, and characterized by an extreme degree of apathy, the patient lying motionless, absolutely listless, without wants and seemingly without perception of his surroundings. The condition resembles *melancholia attonita,* but there is no distinct emotional disturbance. **P. Growth,** the original growth or tumor from which secondary growths are derived. **P. Lesion,** the original lesion which forms the starting-point for secondary lesions. **P. Neural Tube,** the canal formed by the meeting of the medullary plates, *q. v.* **P. Sore,** the initial sclerosis or chancre of syphilis.

Primates (*pri-ma'-tēz*) [*primus*, first]. The highest order of mammals, including man, the apes, the monkeys, and the lemurs.

Primigenial (*pri-mij-e'-ne-al*) [*primus*, first; *gignere*, to beget]. In biology, applied to organisms which are primitive or early types of their kind.

Primigenious (*pri-mij-e'-ne-us*) [*primus*, first; *gignere*, to beget]. In biology, original.

Primigenous (*pri-mij'-en-us*). Same as *Primigenious.*

Primigravida (*pri-mig-rav'-id-ah*) [*primus*, first; *gravidus*, pregnant]. A woman in her first pregnancy.

Primine (*pri'-min*) [*primus*, first]. In biology, the ectal coat of the ovule, becoming the testa of the seed. On account of the ental coat being first formed, Mirbel and others have called it the primine. Cf. *secundine.*

Primipara (*pri-mip'-ar-ah*) [*primus*, first; *parere*, to bear: *pl.*, *Primiparæ*]. A woman bearing or giving birth to her first child. See *Primigravida.*

Primiparity (*pri-mip-ar'-it-e*) [*primus*, first; *parere*, to bear]. The condition of being a primipara.

Primiparous (*pri-mip'-ar-us*) [*primus*, first; *parere*, to bear]. Bearing a child, or being in labor for the first time.

Primisternate (*pri-mis-ter'-nāt*) [*primus*, first; *στέρνον*, sternum]. The manubrium of the sternum.

Primitiæ (*pri-mish'-e-e*) [*primus*, first]. The part of the liquor amnii discharged before the extrusion of the fetus at birth.

Primitive (*prim'-it-iv*) [*primus*, first]. First-formed; original. **P. Chorion.** See *Chorion*. **P. Groove**, the enlargement and deepening of the primitive streak. See *P. Streak*. **P. Streak**, a streak appearing at the end of the germinal disc, and indicating the first trace of the embryo. It represents, according to many, the concrescence of the lips of the blastopore. **P. Trace.** See *P. Streak*.

Primordial (*pri-mor'-de-al*) [*primordium*, origin, beginnings: *pl.*, *Primordia*]. In biology, existing in the beginning, first-formed, primitive, original, of the simplest character. **P. Cell**, a term applied to a cell of the simplest character, one which does not possess a cell-wall. **P. Cranium**, the membranous skull of the embryo. **P. Kidney**, the Wolffian body. **P. Ova**, cells lying among the germ-epithelium of the surface of the embryonic ovary. **P. Utricle**, a term applied to the outer layer of the protoplasm, which is somewhat denser than the rest, and is immediately applied to the cell-wall.

Primordium (*pri-mor'-de-um*) [*primus*, first; *ordiri*, to begin: *pl.*, *Primordia*]. In biology, any structure or organ in its earliest condition. Same as *Proton*.

Primula (*prim'-u-lah*) [*primulus*, dim. of *primus*, first]. Primrose, a genus of the *Primulaceæ*. **P. odorata, P. officinalis**, lady's-fingers, bedlom (or common) cowslip, is mildly diuretic. Unof.

Primum movens [L.]. The starting point of change; the site of the earliest lesion.

Prince's Method of Resuscitation. In suspended animation, especially from ether or chloroform narcosis, Prince recommends that the person be suspended by the flexed knees from the shoulders of the operator, and that in this hanging position he be carried about the room on a trot. Artificial respiration may be performed while the patient is thus suspended.

Princeps (*prin'-seps*) [L.]. First, original. **P. cervicis**, a branch of the occipital artery; it supplies the trapezius muscle. **P. pollicis**, a branch of the radial artery, going to the palmar surface of the thumb. See *Arteries, Table of*.

Princess Water. A famous cosmetic used in Vienna, said to prevent sunburn and remove freckles. There are two formulæ, one with and the other without any metal. These are :—

1.	Talc. Venet. et magnes. carb., āā, . .	grms.	15
	Tr. benz. et aq. colon., āā, ...	grms.	5
	Aq. rosæ, ...	grms.	300.
2	Bismuth magist., ...	grms.	10
	Talc. Venet., ...	grms.	20
	Aq. rosæ, ...	grms.	70
	Spt. colon., ...	grms.	3.

Principle (*prin'-si-pl*) [*principium*]. Element, essence, or primary quality of a body. **P., Immediate**, the components of an organized tissue as it exists functionally in the living tissue. **P., Mediate**, the chemical compounds and simple bodies into which the immediate principles are decomposed. **P., Proximate.** See *Proximate*. **P., Ultimate**, any one of the elements which a compound body contains.

Prinos (*pri'-nos*) [L.]. Black Alder; the bark of *P. vercillatus*, astringent and tonic. It is used in intermittent fever, diarrhea, and, locally, in cutaneous diseases. Dose ʒss–j; of a decoction ℥j–ij. Unof.

Prionoid (*pri'-o-noid*) [*πρίων*, saw; *εἶδος*, like]. Saw-shaped.

Prior (*pri'-or*) [L.]. Former; previous. **P. annularis**, the dorsal interosseous muscle, inserted into the ring-finger. **P. medii**, the dorsal interosseous muscle inserted into the middle finger, on its ulnar side.

Prisis (*pri'-sis*) [*πρίξειν*, to saw]. Synonym of *Trephining*.

Prism (*prizm*) [*prisma*; *πρίξειν*, to saw]. "A solid whose bases or ends are any similar, equal, and parallel plane polygons and whose sides are parallelograms." (Cent. Dict.) Made of glass, it is used for refracting the sun's rays and forming a spectrum, and to make prismatic lenses. *Prismatic lenses* refract the light toward the base of the prism. Their chief use in ophthalmology is in cases of unbalance of the external ocular muscles. **P., Amice**, one consisting of a triangular prism of heavy flint-glass wedged in between two triangular prisms of crown-glass, the apical edges of the crown-glass prisms pointing toward the base of the flint-glass prism, *i. e.*, the apical edges of the crown and flint-glass prisms point in opposite directions. The flint-glass gives the dispersion or separation into colors, while the crown-glass makes the emergent rays approximately parallel with the incident rays, so that one looks directly into the prism along the axis of the microscope. **P.-diopter, P.-dioptre**, or **P.-dioptry**, a standard of prismatic refractive power consisting in a prism that deflects a ray of light one centimeter on a tangent plane situated at a distance of one meter. **Ps., Enamel**, the irregular columns of from four to six sides composing the enamel of teeth, closely packed together and generally vertical to the surface of the underlying dentine. **P., Nicol**, one consisting of two somewhat elongated rhombs of Iceland spar cut obliquely and cemented together with Canada balsam. These are mounted in such a way that the light passes through them lengthwise, and in passing is divided into two rays of plane polarized light.

Prismatic (*priz-mat'-ik*) [*πρίσμα(τ)*, a prism]. Prism-shaped; having three or more angles bounding flat sides. **P. Colors**, colors developed by the refracting action of a prism. **P. Spectrum.** See *Spectrum*.

Prismenchyma (*priz-men'-kim-ah*) [*πρίσμα*, prism; *ἔγχυμα*, infusion]. Tissue composed of prismatic cells.

Prismoid (*priz'-moid*) [*πρίσμα*, prism; *εἶδος*, like]. Resembling a prism. **P., Liquid**, of J. Thompson, the "refracting watery liquid in the entrant corner between the lip of the eyelid and the cornea." **P., Watery.** Synonym of *P., Liquid*.

Prismoidal (*priz-moi'-dal*) [*πρίσμα*, prism; *εἶδος*, form]. In biology, applied to elongated bodies, as the joints of an insect's antennæ, when resembling a prism.

Prismometer (*priz-mom'-et-er*) [*πρίσμα*, prism; *μέτρον*, measure]. An instrument for measuring the refractive power of prisms.

Prisoptometer (*priz-op-tom'-et-er*) [*πρίσμα*, prism; *ὤψ*, eye; *μέτρον*, measure]. An instrument for estimating ametropia by means of two prisms placed base to base.

Pritchard's Method. See *Stains, Table of*.

Privates, or Privities (*pri'-vets, priv'-it-ēz*) [*privatus*, private]. A vulgar term for the genital organs.

Privy (*priv'-e*). Synonym of *Water-closet*. **P.-councillor's Muscle**, Von Ziemssen's name for the levator menti muscle. See *Muscles, Table of*. **P.-midden.** Same as *Midden*.

Proal (*pro'-al*) [*πρό*, before]. Having a forward direction or movement. Cf. *Palinal* and *Propalinal*.

Proamnion (*pro-am'-ne-on*) [πρό, before; ἀμνίον, amnion]. In biology, a term introduced by Ed. van Beneden to designate that part of the *area embryonalis* at the sides and in front of the head of the developing embryo, which remains without mesoderm for a considerable period. [Minot.]

Proamniotic (*pro-am-ne-ot'-ik*) [πρό, before; ἀμνίον, amnion]. Pertaining to the proamnion.

Proangiosperm (*pro-an'-je-o-sperm*) [πρό, before; ἀγγεῖον, vessel; σπέρμα, seed]. In biology, a primitive or ancestral angiosperm.

Proangiospermic (*pro-an-je-o-sper'-mik*) [πρό, before; ἀγγεῖον, vessel; σπέρμα, seed]. Pertaining to a proangiosperm.

Proatlas (*pro-at'-las*) [*pro*, before; *atlas*, the first cervical vertebra]. A primitive or rudimentary atlas.

Probable Duration of Life. The time, considering all circumstances, that a person of a given age may expect to live, as determined by statistics. The age at which any number of children born into the world will be reduced to one-half, so that there are equal chances of their dying before and after that age. The age at which a given population is reduced by one-half its number.

Probang (*pro'-bang*) [*probare*, to try]. A rod of whalebone or other material for the making of local applications to the esophagus or pharynx. **P., Ball,** a probang having an ivory bulb attached to one end. **P., Sponge,** one provided with a small sponge at one end.

Probarbium (*pro-bar'-be-um*) [*pro*, before; *barba*, beard]. The soft, downy hair which precedes the growth of a beard.

Probasis (*pro-ba'-sis*) [προβάινειν, to step forward]. Change of place; prolapse.

Probe (*prōb*) [*probare*, to prove]. A slender rod or wire, flexible, rigid, or jointed, for exploring a wound or sinus. As a verb, to explore with a probe. **P., Anel's,** a delicate silver or gold probe for exploring or dilating the lacrymal puncta and lacrymal canals. **P., Blunt,** one with a blunt extremity. **Ps., Bowman's,** flexible graduated probes used for dilating the nasal duct. **P., Chemic,** one carrying charpie with dilute acetic acid or other drug. **P., Drainage,** one so constructed and used as to assist drainage. **P., Drum,** one provided with a drum or reverberator to enable the ear to detect contact with foreign bodies. **P., Ear,** one used in exploring the ear. **P., Electric,** one having two insulated wires, so that contact with a bullet or metal completes the circuit, and thus indicates the presence of such a foreign body. **P., Eyed,** a probe having a slit at one end through which a tape or ligature can be passed. **P., Flexible,** one that can be bent into any desired shape. **P., Jointed,** a probe used in exploring for carious bone through sinuses. **P., Lacrymal,** one used for dilating the lacrymal passages. **P., Magnetic,** the employment of the telephone as an indicator. **P., Meerschaum,** a probe the end of which is tipped with meerschaum. It is used in searching for bullets, its advantage consisting in its being streaked by the lead when it comes in contact with the ball. **P., Nelaton's,** a probe that is capped with unglazed porcelain upon which a leaden ball makes a metallic streak. **P.-nippers,** an instrument used in searching for foreign bodies in wounds. By means of it a minute portion of the foreign body can be withdrawn for examination. **P., Scissors,** surgeons' scissors that may be thrust into a sinus, like a probe. **P., Sharp-pointed,** one having a sharp end for introduction into a wound or sinus **P., Stethoscopic,** a probe having the tube of a stethoscope attached to the outer end. **P., Uterine,** a long, flexible probe used in exploring the uterine cavity. **P., Vertebrated,** a probe made of small links so jointed together that it is very flexible. **P., Wire,** a simple wire used as a probe.

Problematic (*prob-lem-at'-ik*) [προβλημα(τ-), a problem]. Uncertain, unsettled. **P. Bodies,** or **Organs,** Müller's name for the tubes of the water-vascular system of invertebrates.

Probole (*prob'-o-le*) [προβάλλειν, to throw forward]. A process, as of bone.

Proboscidate (*pro-bos'-id-āt*) [προβοσκίς, proboscis]. In biology, furnished with a proboscis.

Proboscis (*pro-bos'-is*) [πρό, before; βόσκειν, to feed, graze]. In biology, any part or organ extending from the anterior end of an animal after the manner of an elephant's trunk; a long, flexible nose, snout, rostrum, beak, sucking-mouth, tongue, or other buccal or pharyngeal organ. **P.-sheath,** the receptacle of the proboscis in the *Acanthocephala* and *Nemertina*. Cf. *Rhynchodæum*.

Procalymma (*pro-kal-im'-ah*) [προκαλύπτειν, to hang before]. The pudendal apron.

Procambial (*pro-kam'-be-al*) [*pro*, before; *cambire*, to exchange]. Pertaining to the procambium.

Procambium (*pro-kam'-be-um*) [*pro*, before; *cambire*, to exchange]. In biology, the primitive undifferentiated fibro-vascular tissue.

Procardium (*pro-kar'-de-um*) [πρό, before; καρδία, heart]. The pit of the stomach.

Procarp (*pro'-karp*) [πρό, before; καρπός, fruit]. Same as *Procarpium*.

Procarpium (*pro-kar'-pe-um*) [πρό, before; καρπός, fruit: *pl.*, *Procarpia*]. In biology, the unfertilized female organ of certain algæ (*Florideæ*). It is analogous to the pistil of flowering plants. In its simplest form (*Porphyraceæ* and *Nemalieæ*) it consists of a single cell with a lateral hair-like prolongation, the *trichogyne*. In higher forms it is composed of one or more infertile cells which make up the *trichophore*, the function of which is to convey the fertilizing substance from the *trichogyne* to the *carpogone*. It is usually formed on the youngest parts of the plant and often originates from the terminal cell of a lateral branch.

Procatarctic (*pro-kat-ark'-tik*) [προκατάρχειν, to begin first]. Primary, predisposing.

Procatarxis (*pro-kat-arks'-is*) [προκάταρξις, a first beginning]. The kindling of a disease into action by a procatarctic cause.

Procelia, Procœlia (*pro-se'-le-ah*) [πρό, before; κοιλία, hollow]. Same as *Paracelia*.

Procelous, Procœlous (*pro-se'-lus*) [πρό, before; κοῖλος, hollow]. Being concave in front and convex behind.

Procephalic (*pro-sef-al'-ik*, or *pro-sef'-al-ik*) [πρό, before; κεφαλή, head]. In biology, of or pertaining to the fore part of the head.

Procephalon (*pro-sef'-al-on*) [πρό, before; κεφαλή, head]. The anterior part of the head of arthropods.

Procerebral (*pro-ser'-e-bral*) [*pro*, before; *cerebrum*, cerebrum]. Pertaining to the procerebrum.

Procerebrum (*pro-ser'-e-brum*). See *Prosencephalon*.

Procerite (*pros'-er-īt*) [πρό, before; κέρας, horn]. In biology, the long, slender, many-jointed portion of the antenna or feeler of a crustacean. The larger basal joints are the *coxocerite*, *basicerite*, *scaphocerite*, *ischiocerite*, *merocerite*, *carpocerite*.

Procerous (*pro-se'-rus*) [*procerus*, high]. In biology, tall, or tall and slim.

Process (*pros'-es*) [*processus; procedere*, to issue]. 1. A more or less well-defined outgrowth or projecting structure. 2. Method; phenomenon; occurrence. **P., A, B, C.** See *Sewage, Disposal of*. **P., Acromion.** See *Acromion*. **P., Alar,** one of the

small wing-like processes of the crista galli which surround the foramen cæcum. **P., Alveolar,** the thick border of the upper or lower jaw containing the sockets for the teeth. **P., Ankyroid.** Synonym of *P. Coracoid.* **P., Anterior Clinoid.** See *P., Clinoid.* **P., Apex, P., Apical,** the large process extending from the apex of the pyramidal cells of the cerebral cortex toward the free surface of the cortex. **P., Articular,** the small processes projecting from the upper and lower surfaces of the vertebræ, by means of which adjacent vertebræ articulate with each other. **P., Auditory,** the curved plate of bone surrounding the external auditory meatus for the greater part of its circumference, and serving for the attachment of the cartilage of the external ear. **P., Axis.** Synonym of *P., Axis-cylinder.* **P., Axis-cylinder,** that process of a nerve-cell which becomes the axis-cylinder of a nerve. **P., Basilar** (*of the Occipital Bone*), the quadrilateral plate of bone in front of the foramen magnum articulating with the sphenoid bone. **P., Calcarine.** Synonym of *Hippocampus minor.* **P., Central Base,** the axis-cylinder process arising from the central part of the base of the pyramidal cells of the brain-cortex. **Ps., Ciliary,** plaitings and foldings of the layers of the choroid at its anterior margin. They are received between corresponding foldings of the suspensory ligament of the lens, and are from 60 to 80 in number. **Ps., Ciliary** (*of the Retina*), the anterior part of the retina, in close contact with the choroidal ciliary processes. **Ps., Clinoid,** projections on the body and lesser wings of the sphenoid bone. There are three: the *anterior* is formed by the inner extremity of the lesser wings; the *middle*, a small eminence, one on each side, bounding the pituitary fossa or sella turcica anteriorly; the *posterior*, a tubercle on each side of the dorsum sellæ. **P., Cochleariform.** See *Processus cochleariformis.* **P., Condylar, P., Condyloid,** the posterior process of the lower jaw, consisting of the articular condyle and the neck which supports it. **P., Conoid,** the tuberosity of the clavicle. **P., Coracoid,** the hook-like process projecting from the scapula above the glenoid cavity. See *Coracoid.* **P. Coronoid:** 1. A thin, flattened process projecting from the anterior portion of the upper border of the ramus of the lower jaw, and serving for the attachment of the temporal muscle. 2. A triangular projection from the upper end of the ulna, forming the lower part of the great sigmoid cavity. 3. Synonym of *P., Coracoid.* **P., Costiform,** the transverse processes of the lumbar vertebræ supposed to be rudimentary ribs. **P., Deiters',** the single, large, unbranched process of a multipolar nerve-cell, which becomes the axis-cylinder of a medullated nerve-fiber. **P., Ensiform,** the cartilaginous tip at the lower end of the sternum. Same as *Metasternum.* **P., Ethmoid,** one of the projections from the superior border of the inferior turbinated bone, which joins the unciform process of the ethmoid bone. **P., External Angular,** the projection on the outer extremity of the supraorbital arch of the frontal bone, which articulates with the malar bone. **P., External Nasal,** a small lamina forming the outer portion of the nostril in the embryo. **P., External Orbital.** Synonym of *P., External Angular.* **P., Falciform:** 1. A process of the fascia lata of the thigh, forming the outer and upper margin of the saphenous opening. It is known also as the *P., Falciform, of Burns.* 2. A prolongation of the great sacro-sciatic ligament along the ramus of the ischium. Same as *Falx cerebri.* **P. of Folius,** the long process of the malleus. **P., Frontal,** a process of the malar bone articulating with the frontal bone. **P., Hamate** (*of the Ethmoid bone*). Synonym of *P., Unciform.* **P., Hamular:** 1. A hook-like process of bone on the lower extremity of the internal pterygoid plate, around which the tendon of the tensor palati turns. 2. Of the lacrymal bone, the hook-like termination of the lacrymal crest. **P. of the Helix,** a small projection of cartilage at the front part of the pinna, where the helix bends upward. **P., Inferior Maxillary,** the first post-oral arch. **P., Inferior Turbinated,** the middle turbinated bone. **P., Inferior Vermiform,** the central projection on the lower surface of the cerebellum, between the two hemispheres. **Ps. of Ingrassius,** the lesser wings of the sphenoid bone. **P., Intermaxillary.** Synonym of *P., Fronto-nasal.* **P., Internal Angular,** the inner extremity of the supraorbital arch of the frontal bone. **P., Jugular,** a rough prominence external to the condyles of the occipital bone, channeled by a deep notch which forms part of the jugular foramen. **P., Lacrymal,** a short, pointed process of the inferior turbinated bone which articulates with the lacrymal bone. **P., Lateral Base,** one of the branching processes of a pyramidal nerve-cell, arising from the thickest part of the latter. **P., Lateral Frontal.** Synonym of *P., External Nasal.* **P. of Lenhossek.** Synonym of *P., Reticular.* **P., Lenticular,** the extremity of the long process of the incus, covered with cartilage and articulating with the stapes. **P., Long** (*of the Incus*), a slender process that descends vertically from the body of the incus and articulates, by the lenticular process, with the head of the stapes. **P., Long** (*of the Malleus*), a long, delicate process that passes from the neck of the malleus outward to the Glaserian fissure, to which it is connected by cartilaginous and ligamentous fibers. **P., Malar,** a triangular eminence of the superior maxilla by which it articulates with the malar bone. **Ps., Mammillary,** the tubercles on the posterior part of the superior articular processes of the lumbar vertebræ. **P., Mastoid,** a conical projection at the base of the mastoid portion of the temporal bone. It contains the mastoid cells and the antrum. **P., Maxillary,** a thin plate of bone descending from the ethmoid process of the inferior turbinated bone, and hooking over the lower edge of the orifice of the antrum. **P., Maxillo-palatine.** Synonym of *P., Superior Maxillary.* **P., Mental.** Synonym of *Prominence, Mental.* **P., Middle Clinoid.** See *P., Clinoid.* **P., Midfrontal.** Synonym of *P., Fronto-nasal.* **P., Modeling:** 1. A method of healing wounds while the part is immersed in water. (Macartney.) 2. See *P., Molding.* **P., Molding,** the change in shape of the fetal skull during labor, to accommodate itself to the shape of the pelvic canal. **P., Morbid,** the structural changes induced by disease. **Ps., Muscular,** the processes of a vertebra to which muscles are attached. **P., Nasal** (*of the Frontal Bone*). Synonym of *Spine, Nasal.* **P., Nasal** (*of the Superior Maxilla*), a thick, triangular process of bone that projects upward, inward, and backward by the side of the nose, forming a part of its lateral wall. **P., Nerve.** Synonym of *P., Axis-cylinder.* **P., Odontoid,** the tooth-like process of the axis which ascends and articulates with the atlas. **P., Olecranon.** Synonym of *Olecranon.* **P., Olivary,** a small, olive-like eminence situated behind the optic groove of the sphenoid bone. **P., Orbicular.** Synonym of *P., Lenticular.* **P., Orbital** (*of the Superior Maxilla*), a process projecting from the orbital margin of the superior maxilla. **P., Orbital** (*of the Palate bone*), a process directed upward and outward from the upper portion of the palate bone by means of which the latter articulates with the superior maxillary, the sphenoid, turbinated, and the ethmoid bones. The superior

surface forms the back part of the floor of the orbit. **Ps., Palatal,** the processes of the superior maxillary plates of the embryo which join to form the bony palate. **P., Palate,** a thick process projecting horizontally inward from the inner surface of the superior maxillary bone, and forming part of the floor of the nostril and the roof of the mouth. **P., Palatine.** Synonym of *P., Palate.* **P., Paracondyloid,** an anomalous process on the lower surface of the occipital bone. When present it articulates with the transverse process of the atlas. **P., Paramastoid, P., Paroccipital.** Synonyms of *P., Paracondyloid.* **P., Pituitary.** Synonym of *Pituitary Body.* **P., Pneumatic,** a process sometimes present on the occipital bone, containing air-cells that communicate with the mastoid cells. **P., Posterior Clinoid.** See *P., Clinoid.* **P., Post-glenoid,** a small tubercle separating the glenoid fossa from the auditory process. **P., Premaxillary.** Synonym of *P., Fronto-nasal.* **P., Protoplasmic:** 1. The branched processes of nerve-cells that are not continued as axis-cylinders. 2. The pseudopoda of ameboid cells. **P., Pterygoid** (*of the Palate Bone*), a pyramidal process projecting from the posterior border of the palate bone and articulating with the sphenoid bone. **Ps., Pterygoid** (*of the Sphenoid Bone*), processes, one on each side, descending perpendicularly from the point of junction of the body with the greater wings of the sphenoid bone. Each process consists of an external and an internal plate. **Ps., Pterygo-palatal.** Synonym of *Ps., Palatal.* **P., Pulp,** a process connecting an odontoblast with a cell in the dental pulp. **Ps., Pyramidal.** Synonym of *Pyramids of Ferrein.* **P. of Rau.** Synonym of *P., Long* (*of the Malleus*). **P., Reticular,** a network of interlacing processes of gray and white matter in the spinal cord, which is visible in a cross-section and is situated near the center of the gray crescents. It is seen best in the cervical region of the cord. **P., Short** (*of the Incus*), a conic process projecting almost horizontally backward from the body of the incus and attached by ligamentous fibers to the margin of the opening leading into the mastoid cells. **P., Short** (*of the Malleus*), a slight projection from the root of the manubrium of the malleus, lying in contact with the tympanic membrane. **P., Sphenoidal,** a thin plate of bone directed upward and inward from the vertical plate of the palate bone. **Ps., Spinous** (*of the Ilium*), prominent eminences on the anterior and posterior borders of the ilium. The upper process on the anterior border is the *anterior superior spinous process of the ilium.* It can be readily felt, and is an important landmark. Below it is the *anterior inferior spinous process,* which gives attachment to the straight tendon of the rectus femoris muscle and to the iliotibial band. On the posterior border there are also two processes—a *posterior superior* and a *posterior* inferior. **P., Spinous** (*of the Sphenoid Bone*), a rough prominence descending from the posterior part of the greater wing of the sphenoid bone. It receives the attachment of the internal lateral ligament of the jaw and the tensor palati muscle. **P., Spinous** (*of the Tibia*), an eminence of bone on the upper surface of the tibia, between the two articular surfaces, and nearer to the posterior than the anterior border. **P., Spinous** (*of a Vertebra*), the prominent backward projection from the middle of the posterior portion of the arch of a vertebra. **P., Styloid** (*of the Fibula*), a pointed eminence projecting upward from the posterior portion of the head of the fibula. **P., Styloid** (*of the Radius*), a projection from the external border of the lower extremity of the radius. **P., Styloid** (*of the Temporal Bone*), a sharp spine about an inch in length descending downward, forward, and inward from the inferior surface of the petrous portion of the temporal bone. **P., Styloid** (*of the Ulna*), a projection from the inner and posterior portion of the lower extremity of the ulna. **Ps., Subgerminal,** outgrowths from the inner surface of the epiblast (His). **P., Superior Maxillary,** an eminence on the face of the embryo which gives rise to the superior maxilla and the malar bone. **P., Superior Vermiform,** the upper part of the median lobe of the cerebellum, which connects together the two lateral hemispheres. It consists of the *lobulus centralis,* the *monticulus cerebelli,* and the *commissura simplex.* **P., Temporal,** the posterior angle of the malar bone by which it articulates with the zygomatic process of the temporal bone. **P., Transverse,** a process projecting outward from the side of a vertebra, at the junction of the pedicle and the lamina. **P., Tubercular, Transverse,** the lower transverse process of a vertebra, or the one which articulates with the tuberculum of a rib. It is best marked in the lower vertebrates. **P., Unbranched.** Synonym of *P., Axis-cylinder.* **P., Unciform** (*of the Ethmoid Bone*), a hook-like projection from the inferior portion of each lateral mass of the ethmoid bone. It articulates with the ethmoidal process of the inferior turbinated bone. **P., Unciform** (*of the Hippocampal Gyrus*), a hook-like projection from the anterior end of the gyrus hippocampi. **P., Unciform** (*of the Unciform Bone*), a hook-like projection from the palmar surface of the unciform bone. **P., Uncinate.** Synonym of *P., Unciform.* **P., Ungual,** the distal extremity of a terminal phalanx. **P., Vaginal** (*of Peritoneum*), the process of peritoneum which the testicle in its descent carries in advance, and which in the scrotum forms the tunica vaginalis testis. **P., Vaginal** (*of the Sphenoid Bone*), a projection from the inferior surface of the body of the sphenoid bone, running horizontally inward from near the base of the pterygoid process. **P., Vaginal** (*of the Temporal Bone*), a sheath-like plate of bone which extends from the carotid canal to the mastoid process. It separates behind into two laminæ, which enclose the styloid process. **P., Vermiform:** 1. See *P., Inferior Vermiform,* and *P., Superior Vermiform.* 2. The vermiform appendix of the cecum. See *Vermiform Appendix.* **P., Vocal** (*of the Arytenoid Cartilage*), the anterior angle of the arytenoid cartilage receiving the attachment of the true vocal band. **P., Xyphoid,** the ensiform cartilage. **P., Zygomatic** (*of the Malar Bone*), a long, serrated process which articulates with the zygomatic process of the temporal bone. **P., Zygomatic** (*of the Temporal Bone*), a long projection from the lower part of the squamous portion of the temporal bone; it articulates with the malar bone.

Processus (*pro-ses'-us*) [L.]. Synonym of *Process.* **P. a cerebello ad medullam spinalem.** Synonym of *Peduncle, Superior Cerebellar.* **P. acromialis.** Synonym of *Acromion.* **P. ad cerebrum.** Synonym of *Peduncle, Superior Cerebellar.* **P. ad medullam,** the inferior peduncles of the cerebellum. **P. ad pontem,** the middle peduncles of the cerebellum connecting together its two hemispheres. **P. ad testes.** Synonym of *Peduncles, Superior Cerebellar.* **P. alati,** the wings of the sphenoid bone. **P. anconæus.** Synonym of *Olecranon.* **P. ancoralis.** Synonym of *Process, Coracoid.* **P. annularis.** Synonym of *Pons varolii.* **P. anterioris mallei.** Synonym of *Process, Long* (*of the Malleus*). **P. articulares sporii,** small prominences on the posterior surface of the sacrum, internal to the posterior sacral foramina, being the rudiments of the articular processes of the sacral verte-

bræ. **P. auditorius,** the tympanic ring. **P. beloides,** a styloid process. **P. brevis incudis.** Synonym of *Process, Short* (*of the Incus*). **P. brevis mallei.** Synonym of *Process, Short* (*of the Malleus*). **P. cerebelli inferiores.** Synonym of *Peduncles, Superior Cerebellar*. **P. cerebelli medii.** Synonym of *Peduncles, Middle Cerebellar*. **P. cerebelli superioris.** Synonym of *Peduncles, Superior Cerebellar*. **P. cerebelli transversi.** Synonym of *Peduncles, Middle* (*of the Cerebellum*). **P. ciliares.** Synonym of *Processes, Ciliary*. **P. clinoideus.** Synonym of *Process, Clinoid*. **P. clavatus,** the enlargement of the posterior pyramids of the medulla oblongata opposite the fourth ventricle, where they diverge. **P. cochleariformis,** a thin plate of bone separating the canal for the Eustachian tube from that for the tensor tympani muscle. **P. conicus.** Synonym of *Process, Odontoid*. **P. corporis quadrigemini ad cerebellum.** Synonym of *Peduncles, Superior Cerebellar*. **P. cuneiformis.** Synonym of *Process, Unciform*. **P. dentatus.** Synonym of *Process, Odontoid*. **P. e cerebello ad testes,** the superior peduncles of the cerebellum. See *Peduncle*. **P. e cerebello ad cerebrum.** Synonym of *Peduncle, Superior Cerebellar*. **P. e cerebello ad medullam.** Synonym of *Peduncles, Inferior Cerebellar tubercle*. **P. e cerebello ad pontem.** Synonym of *Peduncles, Middle Cerebellar*. **P. e cerebro ad testes,** the superior peduncles of the cerebellum. **P. ensiformes,** the lesser wings of the sphenoid bone. **P. ensiformis,** the ensiform cartilage. **P. falciformis,** the falx cerebri. **P. folianus, P. Folii.** Synonym of *Process, Long* (*of the Malleus*). **P. glandulæ pinealis.** Synonym of *Peduncles of the Pineal Gland*. **P. globularis of His,** a protuberance in the human embryo between the nasal pit on each side and the mouth; it is the incipient rudiment or *Anlage* of the nasal process. **P. glottidis.** Synonym of *Process, Vocal* (*of the Arytenoid Cartilage*). **P. gracilis,** a long, delicate process passing from below the neck of the malleus to the Glaserian fissure. **P. hamatus.** Synonym of *Process, Unciform*. **P. horizontalis incudis.** Synonym of *Process, Short* (*of the Incus*). **P. incudis longus.** Synonym of *Process, Long* (*of the Incus*). **P. infundibuli:** 1. The posterior lobe of the hypophysis cerebri. 2. Infundibulum. **P. internus calcanei.** Synonym of *Sustentaculum tali*. **P. jugularis.** Synonym of *Process, Jugular*. **P. lachrimalis.** Synonym of *Process, Lacrymal*. **P. laterales vertebrarum.** Synonym of *Processes, Transverse*. **P. lateralis calcanei.** Synonym of *Sustentaculum tali*. **P. lenticularis.** Synonym of *Process, Lenticular* (*of the Incus*). **P. longus incudis.** Synonym of *Process, Long* (*of the Incus*). **P. malaris.** Synonym of *Process, Zygomatic* (*of the Temporal Bone*). **P. mamillaris:** 1. Synonym of *Process, Mammillary* (*of the Lumbar Vertebra*). 2. Synonym of *Process, Mastoid* (*of the Temporal Bone*). **P. mastoideus.** Synonym of *Process, Mastoid*. **P. maxillaris ossis malaris.** Synonym of *Process, Maxillary* (*of the Malar Bone*). **P. medullæ cerebri.** Synonym of *Crus cerebri*. **P. medullaris transversus.** Synonym of *Pons varolii*. **P. membraniformis.** Synonym of *Plexus, Choroid* (*of the Fourth Ventricle*). **P. nasalis.** See *Process, Nasal*. **P. nucleiformis.** Synonym of *Process, Odontoid*. **P. obliqui, P. obliqui vertebrarum.** Synonym of *Processes, Articular*. **P. obtusus.** Synonym of *Process, Short* (*of the Malleus*). **P. occipitalis.** Synonym of *Process, Basilar*. **P. odontoideus.** Synonym of *Process, Odontoid*. **P. orbicularis.** Synonym of *Process, Lenticular*. **P. petrosus anticus.** See *Lingula*. **P. orbitalis.** Synonym of *Process, Orbital*. **P. paracondyloideus.** *P. paramastoideus.* Synonyms of *Process, Paracondyloid*. **P. pinealis.** Synonym of *Pineal Gland*. **P. pterygoidei.** Synonym of *Processes, Pterygoid*. **P. ravii.** Synonym of *Process of Rau*. **P. restiformis.** Synonym of *Restiform Body*. **P. reticularis.** Synonym of *Process, Reticular*. **P. rostriformis.** Synonym of *Process, Coracoid*. **P. sphenoidalis.** Synonym of *Process, Sphenoid*. **P. spinosi spurii,** the bony eminences of the posterior surface of the sacrum, representing the spinous processes of true vertebræ. **P. spinosus.** Synonym of *Process, Spinous*. **P. spinosus mallei.** Synonym of *Process, Long* (*of the Malleus*). **P. styloideus cranii.** Synonym of *Process, Styloid* (*of the Temporal Bone*). **P. styloideus fibulæ.** Synonym of *Process, Styloid* (*of the Fibula*). **P. styloideus radii, P. styloideus ulnæ.** Synonyms of *P., Styloid* (*of the Radius and of the Ulna respectively*). **P. superior incudis.** Synonym of *Process, Short* (*of the Incus*). **P. transversi spurii,** a row of bony prominences on the posterior aspect of the sacrum, on each side of the median line, representing the transverse processes of true vertebræ. **P. transversus.** Synonym of *Process, Transverse*. **P. transversus occipitalis.** Synonym of *Process, Jugular*. **P. tubarius,** a prominence on the internal plate of the pterygoid process upon which the extremity of the cartilaginous portion of the Eustachian tube rests. **P. unciformis.** Synonym of *Process, Coracoid*, and of *Process, Unciform*. **P. vaginalis,** an evagination of the peritoneum at the inguinal ring in the higher mammals; lying laterally and ventrally of the end of the gubernaculum, it undergoes a gradual descent and finally enters the scrotum. Synonym of *Process, Vaginal*. **P. vaginalis peritonei.** Synonym of *Process, Vaginal* (*of the Peritoneum*). **P. vermicularis, P. vermiformis.** Synonym of *Vermiform Appendix*. **P. vermis inferior.** Synonym of *Process, Inferior Vermiform*. **P. vermis superior.** Synonym of *Process, Superior Vermiform*. **P. vocalis.** Synonym of *Process, Vocal* (*of the Arytenoid Cartilage*). **P. xiphoideus.** Synonym of *Process, Ensiform*. **P. zygomaticus.** Synonym of *Process, Zygomatic*.

Prochilon, Procheilon (*pro-ki'-lon*) [πρό, before; χεῖλος, lip]. The prominence in the center of the lip.

Prochilous (*pro-ki'-lus*) [πρό, before; χεῖλος, lip, snout]. In biology, applied to organisms having protuberant or protrusile lips.

Prochondral (*pro-kon'-dral*) [πρό, before, χόνδρος, cartilage]. Prior to the formation of cartilage.

Prochondrium (*pro-kon'-dre-um*) [πρό, before; χόνδρος, cartilage]. In biology, young cartilage with colorable matrix, *i. e.*, a great affinity for carmin and hematoxylon. The *præcartilage* of Minot and the *Vorknorpel* of Hasse.

Prochordal (*pro-kor'-dal*) [πρό, before; χορδή, cord]. Situated in front of the chorda dorsalis.

Prochorion (*pro-ko'-re-on*) [πρό, before; χόριον, membrane]. 1. The primitive chorion. 2. The zona pellucida and vitelline membrane considered as one.

Prochorionic (*pro-ko-re-on'-ik*) [πρό, before; χόριον, membrane]. Pertaining to the prochorion.

Procident (*prō'-id-ent*) [*procidens*, falling forward]. Affected by prolapsus.

Procidentia (*prō-id-en'-she-ah*) [*procidere*, to fall down]. Prolapse. **P. ani,** prolapse of the anus. **P. bulba oculi.** Synonym of *Exophthalmos*. **P. intestini recti,** prolapse of the rectum. **P. oculi.** Synonym of *P. bulbi oculi*. **P. uteri,** complete prolapse of the uterus.

Proclivity (*pro-kliv'-it-e*) [*proclivitas*]. Tendency or inclination.

Procnemium (*prok-ne'-me-um*). Synonym of *Tibia*.

Procreant (*pro'-kre-ant*) [*procreare*, to beget]. Producing young.

Procreate (*pro'-kre-āt*) [*procreare*, to beget]. To beget.

Procreation (*pro-kre-a'-shun*) [*procreare*, to bring forth]. The act of generating or begetting offspring.

Procryptic (*pro-krip'-tik*) [*πρό*, in favor of, for; *κρυπτικός*, fit for concealing]. In biology, applied to that form of protective mimicry in which the coloration enables an animal to escape by hiding, *e. g.*, the green pipe-fish (*Siphonostoma typhle*), which is conspicuous in open water, but is well concealed among the leaves of *Zostera*.

Proctagra (*prok-ta'-grah*) [*πρωκτός*, the anus; *ἀγρα* seizure]. Sudden pain in the anal region.

Proctalgia (*prok-tal'-je-ah*) [*πρωκτός*, anus; *ἄλγος*, pain]. Pain in the anus or rectum. **P. hæmorrhoidalis.** See *Hemorrhoid*. **P. inflammatoria.** Synonym of *Proctitis*. **P. intertriginosa,** intertrigo of the anus.

Proctatresia (*prok-tat-re'-ze-ah*) [*πρωκτός*, anus; *ἀ* priv.; *τρῆσις*, perforation]. An imperforate condition of the anus or rectum.

Proctectasia, Proctectasis (*prok-tek-ta'-ze-ah, prok-tek'-tas-is*) [*πρωκτός*, anus; *ἔκτασις*, dilatation]. Dilatation of the anus.

Proctectomy (*prok-tek'-to-me*) [*πρωκτός*, anus; *ἐκτομή*, excision]. Excision of the rectum.

Proctenclisis (*prok-ten'-klis-is*) [*πρωκτός*, anus; *ἐν*, in; *κλείειν*, to close]. Stricture of the rectum.

Proctеurynter (*prok-tu-rin'-ter*) [*πρῶκτός*, anus; *εὐρίνειν*, to widen]. An instrument for dilating the anus.

Procthemorrhagia (*prokt-hem-or-a'-je-ah*) [*πρωκτός*, anus; *αἷμα*, blood; *ῥηγνύναι*, to burst forth]. Hemorrhage from the anus.

Procthypodesmus (*prokt-hi-po-dez'-mus*) [*πρωκτός*, anus; *ὑπό*, under; *δεσμός*, band]. An anal pessary.

Proctica (*prok'-tik-ah*) [*πρωκτός*, anus]. Any disease of the anus or rectum. **P. marisca.** Synonym of *Hemorrhoid*. **P. simplex.** Synonym of *Proctalgia*.

Proctisis (*prok-tis'-is*). Synonym of *Proctitis*.

Proctitis (*prok-ti'-tis*) [*πρωκτός*, anus; *ιτις*, inflammation]. Inflammation of the anus or rectum. **P. fœtida,** inflammation of the rectum, with the discharge of very offensive material. **P. gangrænosa,** gangrenous inflammation of the rectum.

Procto- (*prok'-to-*) [*πρωκτός*, anus]. A prefix signifying connection with, or relation to, the anus.

Proctoblennozemia (*prok-to-blen-o-ze'-me-ah*) [*πρωκτός*, anus; *βλέννα*, mucus; *ζημία*, loss]. A mucous discharge from the anus.

Proctocase (*prok-tok'-as-e*). Synonym of *Proctitis gangrænosa*.

Proctocele (*prok'-to-sēl*) [*πρωκτός*, anus; *κήλη*, hernia]. The extroversion or prolapse of the mucous coat of the rectum. **P., Vaginal,** a hernia of the rectum appearing in the vagina.

Proctocystotomy (*prok-to-sis-tot'-o-me*) [*πρωκτός*, anus; *κύστις*, bladder; *τομή*, cutting]. A form of lithotomy in which the incision is made through the walls of the rectum.

Proctodeal (*prok-to-de'-al*) [*πρωκτός*, the anus; *ὁδός*, way]. Pertaining to the proctodeum.

Proctodeum, Proctodæum (*prok-to-de'-um*) [*πρωκτός*, the anus; *ὁδός*, way]. In biology, a very small anal invagination of the ectoderm in embryonic amniota, which grows inward toward the cloaca until the ectoderm and entoderm come into contact; the membrane formed by the two epithelia finally breaks through and the cloaca acquires an opening to the exterior; the *primitive anus*.

Proctodynia (*prok-to-din'-e-ah*) [*πρωκτός*, anus; *ὀδύνη*, pain]. Pain about the anus.

Proctoleukorrhea (*prok-to-lu-kor-e'-ah*). Synonym of *Proctorrhea*.

Proctomenia (*prok-to-me'-ne-ah*) [*πρωκτός*, anus; *μήν*, month]. Vicarious menstruation from the rectum.

Proctoncus (*prok-tong'-kus*) [*πρωκτός*, anus; *ὄγκος*, tumor]. Any tumor or swelling at the anus.

Proctoparalysis (*prok-to-par-al'-is-is*) [*πρωκτός*, anus; *παράλυσις*, paralysis]. Paralysis of the sphincter muscle of the anus.

Proctoplastic (*prok-to-plas'-tik*) [*πρωκτός*, anus; *πλάσσειν*, to form]. Pertaining to the plastic surgery of the anal region.

Proctoplasty (*prok'-to-plas-te*) [*πρωκτός*, anus; *πλάσσειν*, to form]. Plastic surgery of the anus.

Proctoplegia (*prok-to-ple'-je-ah*). Synonym of *Proctoparalysis*.

Proctopolypus (*prok-to-pol'-ip-us*) [*πρωκτός*, anus; *πολύπους*, polyp]. A polyp of the rectum.

Proctoptoma (*prok-top-to'-mah*) [*πρωκτός*, anus; *πτῶμα*, fall]. Prolapse of the rectum.

Proctoptosis (*prok-top-to'-sis*) [*πρωκτός*, anus; *πτῶσις*, a falling]. Synonym of *Proctoptoma*.

Proctorrhagia (*prok-tor-a'-je-ah*). Synonym of *Procthemorrhagia*.

Proctorrhaphy (*prok-tor'-a-fe*) [*πρωκτός*, anus; *ῥαφή*, suture]. Suture of the rectum or anus.

Proctorrhea (*prok-tor-e'-ah*) [*πρωκτός*, anus; *ῥοία*, flow]. A discharge of mucus through the anus.

Proctoscirrhus (*prok-to-skir'-us*) [*πρωκτός*, anus; *σκιρρός*, induration]. Scirrhous carcinoma of the rectum.

Proctospasmus (*prok-to-spaz'-mus*) [*πρωκτός*, anus; *σπασμός*, spasm]. Spasm or tenesmus of the rectum.

Proctostenosis (*prok-to-sten-o'-sis*) [*πρωκτός*, anus, and *στένωσις*, stenosis]. Stricture of the anus or rectum.

Proctotocia (*prok-to-to'-se-ah*) [*πρωκτός*, anus; *τόκος*, a bringing forth]. Delivery of the fetus through the anus.

Proctotome (*prok'-to-tōm*) [*πρωκτός*, anus; *τομή*, a cutting]. A cutting-instrument used in proctotomy.

Proctotomy (*prok-tot'-o-me*) [*πρωκτός*, anus; *τομή*, a cutting]. Incision of the anus or rectum for imperforation or stricture.

Proctotoreusis (*prok-to-tor-u'-sis*) [*πρωκτός*, anus; *τορεύειν*, to bore through]. The operation of making an opening into an imperforate anus.

Proctuchous (*prok-tu'-kus*) [*πρωκτός*, anus; *ἔχειν*, to have]. In biology, having an anus.

Procumbent (*pro-kum'-bent*) [*pro*, forward; *cumbere*, to lie]. In biology, prostrate, prone, trailing.

Prodissoconch (*pro-dis'-o-konk*) [*πρό*, before; *δισσός*, double; *κόγχη*, shell]. In biology, the first formed shell of many lamellibranchs, preceding the *dissoconch* or true shell. It is the complete shell of the veliger antemonomyarian and dimyarian stage, and the homologue of the *protoconch* of cephalous molluscs and the *periconch* of *Dentalium*.

Prodroma (*pro-dro'-mah*). See *Prodrome*.

Prodromal (*pro-dro'-mal*) [*πρό*, before; *δρόμος*, a running]. Precursory; of the nature of a prodrome.

Prodrome (*pro'-drōm*) [*πρό*, before; *δρόμος*, a running]. A forerunner of a disease; a precursory symptom.

Prodromic (*pro-dro'-mik*). See *Prodromal*.

Prodromous (*pro-dro'-mus*). Synonym of *Prodomal*.

Prodromus (*pro-dro'-mus*) [*πρό*, before; *δρόμος*, a running]. The prodrome; also the period in which the precursory signs of a disease occur.

Produce (*pro-dūs'*) [*producere*, to bring forth]. To generate or bring forth.

Productive (*pro-duk'-tiv*) [*producere*, to produce]. Generating; tissue-making. **P. Arteritis, Acute,** an acute inflammation of an artery characterized by round-cell infiltration, the formation of new blood-vessels and new connective tissue in their walls. It may proceed to obliteration of the lumen of the vessel.

Proëccrisis (*pro-ek'-ris-is*) [πρό, before; ἔκκρισις, separation]. A premature crisis in the course of a disease.

Proëmbryo (*pro-em'-bre-o*) [πρό, before; ἔμβρυον, embryo]. In biology, the result of the germination of an oöspore, the *Anlage* or proton of the first stage of certain cryptogams (*Characeæ*, *Archegoniatæ*).

Proëmbryonic (*pro-em-bre-on'-ik*) [πρό, before; ἔμβρυον, embryo]. Pertaining to a proembryo.

Proëncephalia (*pro-en-sef-a'-le-ah*) [πρό, before; ἐγκέφαλος, brain]. An exencephalic condition involving the anterior part of the skull.

Proëncephalocele (*pro-en-sef'-al-o-sēl*) [πρό, before; ἐγκέφαλος, brain; κήλη, tumor]. An encephalocele in the anterior part of the skull.

Proëncephalon (*pro-en-sef'-al-on*) [πρό, forward; ἐγκέφαλος, brain]. The fore-brain. Also, encephalocele in the frontal region of the brain.

Proëncephalus (*pro-en-sef'-al-us*) [πρό, before; ἐγκέφαλος, brain]. An exencephalic monstrosity with the brain protruding through a fissure in the frontal region.

Proëotia (*pro-e-o'-she-ah*) [πρώιος, early]. Sexual precocity.

Proëpimeral (*pro-ep-im-e'-ral*) [*pro*, before; ἐπί, upon; μηρός, thigh]. Pertaining to the proëpimeron.

Proëpimeron (*pro-ep-im-e'-ron*) [*pro*, before; ἐπί, upon; μηρός, thigh]. The epimeron or prothorax.

Proëpisternal (*pro-ep-is-ter'-nal*) [*pro*, before; ἐπί, upon; στέρνον, breast-bone]. Pertaining to the proëpisternum.

Proëpisternum (*pro-ep-is-ter'-num*) [*pro*, before; ἐπί, upon; στέρνον, breast-bone]. The prothoracic episternum.

Professional (*pro-fesh'-un-al*) [*profiteri*, to profess]. Pertaining to a profession or occupation; pertaining especially to the medical profession; in keeping with medical ethics. **P. Cramp.** See *Writers' Cramp*. **P. Etiquette,** those principles of honor which govern the conduct of medical men, both in dealings with one another and with the laity. **P., or Occupation, Neurosis,** a neurosis caused by continuous exercise in one's occupation of one set of muscles, or by some other peculiarity of one's employment. See *Neurosis*.

Professor (*pro-fes'-or*) [*professor*, a professor]. A teacher in a college or university.

Professorate (*pro-fes'-or-āt*) [*professor*, a professor]. The office of a professor.

Professorship (*pro-fes'-or-ship*). Same as *Professorate*.

Profile (*pro'-fēl*) [*pro*, before; *filum*, thread]. The outline of the human face in a section at the meson. **P. Line,** one employed in the determination of the general direction of the face. See *Lines, Table of*.

Profluvium (*pro-flu'-ve-um*) [*profluere*, to flow forth]. A flux or discharge **P. alvi.** Diarrhea. **P. muliebre.** Synonym of *Leukorrhea*. **P. sanguinis.** Hemorrhage. **P. seminis.** 1. Synonym of *Spermatorrhea*. 2. Discharge of semen from the vagina after coitus.

Profunda Arteries (*pro-fun'-dah*). See *Arteries, Table of*.

Profundipalmar (*pro-fun-dip-al'-mar*) [*profundus*, deep; *palma*, palm]. Pertaining to the deep-seated parts of the hand.

Profundiplantar (*pro-fun-dip-lan'-tar*) [*profundus*, deep; *planta*, sole]. Deep and plantar: pertaining to the deep-seated parts of the sole of the foot.

Profundus (*pro-fun'-dus*) [*profundus*, deep]. A term applied to any organ or part that is deep-seated.

Progametange, Progametangium (*pro-gam-et-an'-je, pro-gam-et-an'-je-um*) [πρό, before; γαμέτη, a wife; ἀγγεῖον, a vessel]. In biology, an immature or resting *gametangium* formed upon the mycelia of certain fungi (*Protomycetaceæ*), and from which, after a period of rest, is liberated the *gametangium*, within which the minute rod-shaped *gametes* are formed.

Progaster (*pro-gas'-ter*). Same as *Archenteron*.

Progeneration (*pro-jen-er-a'-shun*) [*progenerare*, to beget]. Propagation; the act of begetting.

Progenitor (*pro-jen'-it-or*) [*pro*, before; *genitor*, begetter]. Ancestor, sire, or father.

Progeny (*proj'-en-e*) [πρό, before; γεννᾶν, to beget]. Offspring; descendants.

Proglossis (*pro-glos'-is*) [πρό, before; γλῶσσα, tongue]. The tip of the tongue.

Proglottid (*pro-glot'-id*) [πρό, before; γλῶσσα, tongue]. In biology, one of the mature segments or metameres of a tapeworm. Any *person* of the cestode chain or colony other than the pear-shaped or cone-shaped head or *scolex*; a proglottis.

Proglottis (*pro-glot'-is*) [πρό, before; γλῶσσα, tongue: *pl.*, *Proglottides*]. Same as *Proglottid*.

Prognathic (*prog-na'-thik*). Synonym of *Prognathous*.

Prognathism (*prog'-na-thizm*) [πρό, forward; γνάθος, jaw]. The quality of having a projecting lower jaw, or of being prognathous. **P., Alveolo-subnasal,** in craniometry, the prognathism measured by the angle included between the line joining the alveolar and subnasal points and the alveolo-condylean plane.

Prognathous (*prog'-na-thus*) [πρό, before; γνάθος, jaw]. Having a projecting lower jaw.

Prognosis (*prog-no'-sis*) [πρό, before; γνῶσις, knowledge]. An opinion or judgment concerning the duration, course, and termination of a disease. **P. anceps,** a doubtful prognosis. **P. fausta,** a favorable prognosis. **P. infausta,** an unfavorable prognosis.

Prognostic (*prog-nos'-tik*) [πρό, before; γνῶσις, knowledge]. Pertaining to prognosis.

Prognosticate (*prog-nos'-tik-āt*) [πρό, before; γνῶσις, knowledge]. To make a prognosis.

Progression (*pro-gresh'-un*) [*progredi*, to advance, to step forward]. The act of advancing or of moving forward. **P., Arithmetic,** a progression of numbers which increase or decrease by equal differences, as 2, 4, 6, 8, 10, or 10, 8, 6, 4, 2. **P., Backward,** a backward walking; a rare symptom of some nervous lesions in which the person can only walk backward. **P., Cross-legged,** walking with the legs almost crossing, a condition sometimes observed in double hip-disease and in certain disturbances of the nervous system. **P., Geometric,** a progression of numbers which increase or decrease by equal ratio, as 2, 4, 8, 16, or 16, 8, 4, 2.

Progressive (*pro-gres'-iv*) [*progredi*, to go forward]. Marked by progress; of a disease extending over a wider area or increasing in severity. **P. Muscular Atrophy,** chronic anterior poliomyelitis in which the large ganglion-cells of the anterior horns, the motor and trophic cells of the muscles, are gradually destroyed. **P. Ossifying Myositis,** a chronic inflammation of muscles, associated with a tendency to excessive bony deposits in them. It is usually accompanied by the development of numerous exostoses.

Progymnosperm (*pro-jim'-no-sperm*) [πρό, before; γυμνός, naked; σπέρμα, seed]. In biology, an archaic or ancestral type of gymnosperm.

Progymnospermic (*pro-jim-no-sper'-mik*) [πρό, before; γυμνός, naked; σπέρμα, seed]. Pertaining to a progymnosperm.

Projectile (*pro-jek'-til*) [*projicere*, to throw before]. Anything thrown forward violently. **P., Vomiting,** the vomiting sometimes observed in diseases of the brain; the material is projected out of the mouth to some distance, apparently without nausea.

Projection (*pro-jek'-shun*) [*projicere*, to throw before]. 1. The act of throwing forward. 2. A prominence or a part extending beyond the level of the surrounding surface. **P., Monocular.** Synonym of *P., Uniocular.* **P., Ocular.** See *Ocular.* **P.-system of Meynert.** See *Meynert.* **P.-systems.** See *Meynert.* **P., Uniocular,** the projection into space of the impression of an object made by rays emanating from it and entering one eye. A correct estimate of distance cannot be made by uniocular projection. **P. of Visual Impressions,** the projection into space of the impressions of objects made upon the retina by rays emanating from the objects. The ability to do this enables us to locate correctly the position or distance of objects in space.

Prolabial (*pro-la'-be-al*) [*pro*, before; *labium*, lip]. Pertaining to the prolabium.

Prolabium (*pro-la'-be-um*) [*pro*, before; *labium*, a lip]. The red exposed part of the lip; also, the central prominence of the lip.

Prolapse (*pro-laps'*) [*prolabi*, to slip down]. The falling forward or downward of a part. **P. of the Anus or Rectum,** protrusion of the rectal walls beyond the anus. **P., Artificial,** the drawing down of a part or organ, as the uterus, for purposes of examination or treatment. **P. of the Cord,** premature expulsion of the umbilical cord during parturition. **P. of the Iris,** protrusion of the iris through a corneal wound. **P. of the Uterus,** protrusion of the womb beyond the vulva.

Prolapsed (*pro-lapst'*) [*prolabi*, to fall forward]. In a condition of prolapse.

Prolapsion (*pro-lap'-shun*). Synonym of *Prolapse.* [Old.]

Prolapsus (*pro-lap'-sus*). Synonym of *Prolapse.* **P. ani,** prolapse of the rectum. **P. cerebri.** Synonym of *Encephalocele.* **P. iridis,** prolapse of the iris. **P. linguæ.** Synonym of *Macroglossia.* **P. oculi.** Synonym of *Exophthalmos.* **P. palpebræ.** Synonym of *Ptosis.* **P. placentæ,** prolapse of the placenta. **P. recti,** prolapse of the rectum. **P. sclerotici,** staphyloma of the sclerotic. **P. uteri,** prolapse of the uterus. **P. uteri completus,** complete prolapse of the uterus; procidentia uteri. **P. uvulæ.** Synonym of *Staphyledema.* **P. vaginæ,** prolapse of the vagina. **P. vesicæ,** prolapse of the bladder.

Proleg (*pro'-leg*) [*pro*, for; *leg*]. In biology, a false leg; a proped; an abdominal limb of the larvæ of insects.

Prolepsis (*pro-lep'-sis*) [πρό, before; λαμβάνειν, to seize]. The return of a paroxysm before the expected time.

Proleptic (*pro-lep'-tik*) [πρό, before; λαμβάνειν, to seize]. 1. Prognostic. 2. Returning before the regular or expected time.

Proleptics (*pro-lep'-tiks*) [πρό, before; λαμβάνειν, to seize]. The art of prognosis.

Proles (*pro'-lēz*) [L.]. Offspring.

Prolicide (*pro'-lis-īd*) [*proles*, offspring; *cædere*, to kill]. Feticide or infanticide.

Proliferate (*pro-lif'-er-āt*) [*proles*, offspring; *ferre*, to bear]. To begin; to generate.

Proliferation (*pro-lif-er-a'-shun*) [*proliferatio; proles*, offspring; *ferre*, to bear]. Cell-genesis. The continued formation and development of cells by multiplication. **P., Atrophic,** multiplication of the cell-nuclei, with degeneration of the differentiated protoplasm of the peculiar cells of the tissues. It occurs in inflammation and in regeneration.

Proliferative (*pro-lif'-er-a-tiv*) [*proles*, offspring; *ferre*, to bear]. Multiplying; being the seat of cell-proliferation. **P. Cyst,** a cyst in which the lining epithelium proliferates and produces projections from the ental surface of the cysts.

Proliferous (*pro-lif'-er-us*) [*proles*, offspring; *ferre*, to bear]. In biology, producing offspring; developing buds, branches, or generative zoöids. **P. Cyst, with Vascular Intra-cystic Growths,** a cyst, occurring in glands, especially the mammary and thyroid, from the ental wall of which spring irregular, usually cauliflower-like growths of a glandular character, which may eventually fill the cyst-cavity, or even break through the cyst-wall. The so-called sero-cystic sarcoma generally belongs to this class of cysts.

Prolific (*pro-lif'-ik*) [*proles*, offspring; *facere*, to make]. Fruitful; very fertile.

Prolification (*pro-lif-ik-a'-shun*) [*prolificare*, produce offspring]. In biology, the development of organs or structures from a part normally ultimate. **P. Islands,** numerous spots upon the chorionic villi; thickenings of the nucleated protoplasm of the ectoderm. The "*Proliferationsinseln*" of German authors.

Proligerous (*pro-lij'-er-us*) [*proles*, offspring; *gerere*, to bear]. In biology, germinating; producing offspring; specifically applied to the film of infusions as the source of the microörganisms found in the infusion. **P. Disc,** see *Discus proligerus.*

Promala (*pro-ma'-lah*) [*pro*, before; *mala*, jaw]. In biology, the so-called mandibles of the myriopods, homologous with the *lacinia* of the hexopodous maxilla (Packard), less correctly called *protomala.*

Promanus (*pro-ma'-nus*) [*pro*, before; *manus*, hand]. The thumb.

Promesoblast (*pro-me'-zo-blast*) [πρό, before; μέσος, middle; βλαστος, sprout]. The mass of primordial cells which subsequently develop into the mesoblast.

Prometopia (*pro-met-o'-pe-ah*) [πρό, before; μέτωπον, forehead]. The anterior portion of the forehead, or the skin covering it.

Prometopidia (*pro-met-o-pid'-e-ah*) [πρό, before; μέτωπον, forehead]. Bandages for the forehead.

Prominence (*prom'-in-ens*) [*prominere*, to jut out]. 1. A projection on the surface of a part, especially on a bone. 2. The state of being prominent. 3. Importance; distinction. **P., Bony,** a prominence on a bone, usually serving as a landmark. **P., Doyère's.** See *Doyère's.* **P., Genital,** an accumulation of cells on the ventral aspect of the embryonic cloaca and from which the generative organs are developed. **P., Double,** an abnormal prominence at the junction of the first and second sacral vertebræ. **P., False.** Synonym of *P., Double.* **P., Mental,** the triangular eminence projecting forward from the middle of the body of the lower jaw. **P., Sacro-vertebral,** the promontory of the sacrum.

Prominentia (*prom-in-en'-she-ah*) [L.: *pl., Prominentiæ*]. Synonym of *Prominence.* **P. albicans.** Synonym of *Corpus albicans.* **P. encephali.** Synonym of *Corpora quadrigemina.* **P. laryngea.** Synonym of *Pomum adami.* **P. lentiformis.** Synonym of *Nucleus, Lenticular.* **P. natiformis.** Synonym of the *Nates of the Corpora quadrigemina.* **P. oculi totius.** Exophthalmos. **P. orbiculares majores.** Synonym of the *Nates of the Corpora quadrigemina.* **P. orbiculares minores.** Synonym of the *Testes of the Corpora quadrigemina.* **P. semiovalis.** Synonym of *Olivary Body.* **P. sphærica,** a cerebral convolution. **P. spiralis,** a slight prominence on the outer wall of the cochlear duct, containing a small capillary

vessel. **P. testiformes**, the testes of the corpora quadrigemina.

Promontory (*prom'-on-tor-e*) [*pro*, before; *mons*, mountain]. An elevation or prominence. **P. of the Sacrum**, the prominence formed by the angle between the upper extremity of the sacrum and the last lumbar vertebra. **P. of the Tympanum**, the prominence formed by the first turn of the cochlea.

Promorph (*pro'-morf*) [πρό, before; μορφή, form]. In biology, a primitive or fundamental form-type.

Promorphologist (*pro-mor-fol'-o-jist*) [πρό, before; μόρφη, form; λόγος, science]. One versed in promorphology.

Promorphology (*pro-mor-fol'-o-je*) [πρό, before; μόρφη, form; λογος, science]. In biology, organic morphology as related to a few fundamental types of structure. The treatment of organic form from a mathematic or geometric basis.

Promuscidate (*pro-mus'-id-āt*) [*promuscis*, a corrupt form for *proboscis*]. Having the form of a promuscis.

Promuscis (*pro-mus'-is*) [*promuscis*, a corrupt form for *proboscis*: *pl.*, *Promuscides*]. In biology, a proboscis, beak, or rostrum; usually applied to insects.

Promycele (*pro-mi'-sel*). Same as *Promycelium*.

Promycelial (*pro-mi-se'-le-al*) [πρό, before; μύκης, a fungus; ἦλος, an excrescence]. Pertaining to the promycelium.

Promycelium (*pro-mi-se'-le-um*) [πρό, before; *mycelium*, from μύκης, a fungus; ἦλος, an excrescence]. In biology, a short mycelium formed from the oösperm or resting spore in certain species of fungi (*Oömycetes*, *Zygomycetes*), and which dies after bearing a few *conidiospores*. These conidiospores in turn propagate new thalli, giving rise to a distinct alternation of generations.

Pronation (*pro-na'-shun*) [*pronatio*; *pronus*, bent forward]. 1. The condition of being prone; the act of placing in the prone position. 2. Of the hand. The turning of the palm downward.

Pronator (*pro-na'-tor*) [*pronare*, to bend forward]. That which pronates. A term applied to several muscles. See *Muscles, Table of*.

Pronaus (*pro-nah'-us*) [πρό, before; ναός, temple]. The vestibule of the vagina.

Prone (*prōn*) [*pronus*, prone]. With the palm directed downward. Also, lying with the face downward. The opposite is *Supine*. **P. and Postural Respiration**, "Marshall Hall's Ready Method of Artificial Respiration." See *Respiration*.

Pronephric (*pro-nef'-rik*) [πρό, before; νεφρός, a kidney]. In biology, of or pertaining to the pronephron, or the primitive kidney. **P. Duct**, one of the four fundamental parts of the vertebrate urogenital system; the Wolffian duct. Cf. *Archinephric Duct*, *Müllerian Duct*.

Pronephridium (*pro-nef-rid'-e-um*) [πρό, before; νεφρος, kidney]. One of the canaliculi which in lower orders of animals, especially the invertebrata, act as excretory organs.

Pronephron (*pro-nef'-ron*) [πρό, before; νεφρός, a kidney: *pl.*, *Pronephra*]. In biology, "the first part of the urogenital system to be differentiated in the vertebrate embryo; it is to be regarded as the phylogenetically oldest part. It is found in the embryos of (probably) all vertebrates, but disappears before adult life in selachians, some teleosts, and all amniota. It is always situated in the segments immediately behind the heart, and is a paired organ with a longitudinal duct, which finally opens into the cloaca." (Minot.) Cf. *Head-kidney*, *Primitive Kidney*, *Okenian Body*, *Wolffian Body*.

Pronephros (*pro-nef'-ros*). Same as *Pronephron*.

Proncea (*pro-ne'-ah*). Synonym of *Prognosis*.

Pronotum (*pro-no'-tum*) [πρό, before; νῶτος, back: *pl.*, *Pronota*]. The anterior of the three divisions of the dorsal section of the prothorax of an arthropod.

Pronuclear (*pro-nu'-kle-ar*) [*pro*, before; *nucleus*, nucleus]. Pertaining to a pronucleus.

Pronucleate (*pro-nu'-kle-āt*) [*pro*, before; *nucleus*, nucleus]. Having a pronucleus.

Pronucleolus (*pro-nu-kle'-o-lus*) [*pro*, before; *nucleolus*, nucleolus]. A nucleolus of a pronucleus.

Pronucleus (*pro-nu'-kle-us*) [*pro*, before; *nucleus*, nucleus: *pl.*, *Pronuclei*]. In biology, the name given by Ed. van Beneden to one of the two nuclear elements of a newly fecundated ovum, the *male* and the *female pronucleus*, the fusion (conjugation) of which results in the formation of the first embryonic nucleus. The nucleus which appears within the ovum after the formation of the polar bodies is the *female pronucleus*. According to Hertwig, the head of the spermatozoid is transformed directly into the *male pronucleus*, while Salensky holds that it is first dissolved and provokes secondarily the formation of the male pronucleus. **P., Segmentation**, the nucleus of the germ. **P., Sperm.** Synonym of *P., Male*.

Proödontus (*pro-o-don'-tus*) [πρό, before; ὀδούς, tooth]. Lissauer's term for a skull in which the angle formed between the radius fixus and the line joining the subnasal and alveolar points is between 23° and 50°.

Proof-spirit. See *Spirit*.

Proösteon (*pro-os'-te-on*) [πρό, before; ὀστέον, bone]. A bony process or prominence.

Proöstracal (*pro-os'-trak-al*) [πρό, before; ὄστρακον, shell]. Pertaining to a proöstracum.

Proöstracum (*pro-os'-trak-um*) [πρό, before; ὄστρακον, shell]. In biology, the projecting lamella of the thick covering of the phragmacone of a cephalopod.

Proötic (*pro-o'-tik*) [πρό, before; οὖς, ear]. 1. Before, or in front of, the ear. 2. One of the otic bones, very constant in the skulls of the lower vertebrata.

Propagate (*prop'-ag-āt*) [*propagare*, to generate]. To generate; to multiply.

Propagation (*prop-ag-a'-shun*) [*propagare*, to generate]. Reproduction; spreading, dissemination. **P., Arc of**, a term given to that margin of the corneal creeping ulcer of Saemisch which assumes the form of an elevated curve, and is more decidedly opaque or yellow than the others.

Propagatorium (*prop-ag-at-o'-re um*) [*propagare*, to generate, increase: *pl.*, *Propagatoria*]. In biology, the entire mechanism of reproduction. Cf. *Nutritorium*, *Locomotorium*, *Sensorium*.

Propagule (*pro-pag'-ūl*) [*propagare*, to propagate]. Same as *Propagulum*.

Propagulum (*pro-pag'-u-lum*) [*propagare*, to propagate: *pl.*, *Propagula*]. In biology, any structure, part, or organ utilized in the asexual propagation of plants; a stolon, offset, runner.

Propalanin (*prō-pal'-an-in*), $C_4H_9NO_2$. *Amidobutyric acid*. It crystallizes in little leaflets or needles, and is very soluble in water.

Propalinal (*pro-pal'-in-al*) [πρό, before; πάλιν, back, backward]. In biology, applied to the forward and backward movement of the jaws of certain animals.

Propane (*pro'-pān*), C_3H_8. A hydrocarbon of the marsh-gas series. It is a constituent of petroleum.

Proparapteral (*pro-par-ap'-ter-al*) [πρό, before; παρά, beside; πτερον, wing]. Pertaining to the proparapteron.

Proparapteron (*pro-par-ap'-ter-on*) [πρό, before; παρά, beside; πτερόν, wing: *pl.*, *Proparaptera*]. In biology, the third sclerite of the propleuron of an arthropod.

Proparateresis (*pro-par-at-er-e'-sis*) [πρό, before; παρα, beside; τήρησις, a watching]. Prevention; prophylaxis.

Propargylic Acid (*pro-par-gil'-ik*). See *Propiolic Acid*.

Propatagial (*pro-pat-a'-je-al*) [πρό, before; παταγεῖον, a border]. Pertaining to the propatagium.

Propatagium (*pro-pat-a'-je-um*) [πρό, before; παταγεῖον, a golden stripe, border: *pl.*, *Propatagia*]. In biology, the fold of skin in front of and between the forearm and upper arm in the wing of a bird.

Propathy (*pro'-path-e*) [πρό, before; πάθος, disease]. 1. A premonitory symptom. 2. A past disease.

Prop-cells. Cells, generally columnar or fusiform, placed in the intervals of the rods and hair-cells of the organ of Corti. They are also known as *Supporting Cells* and *Cells of Deiter*.

Proped (*pro'-ped*). See *Proleg*.

Propedal (*pro-pe'-dal*) [*pro*, for; *pes*, a foot]. Pertaining to a proped.

Propendentia (*pro-pen-den'-she-ah*). Synonym of *Prolapse*. **P. uvulæ**, relaxation of the uvula.

Propenyl (*pro'-pen-il*). See *Glyceryl*. **P. Trinitrate.** Synonym of *Nitroglycerin*.

Propenyl Hydrate (*pro'-pen-il-hi'-drāt*). See *Glycerin*.

Propepsin (*pro-pep'-sin*) [πρό, before; πέπτειν, to cook]. The zymogen, or mother-substance, of pepsin, found in the cells of the gastric glands.

Propeptone (*pro-pep'-tōn*). See under *Peptone*.

Propeptonuria (*pro-pep-ton-u'-re-ah*) [πρό, before; πέπτειν, to cook; οὖρον, urine]. The appearance of propeptone or hemialbumose in the urine. It may occur in fevers, diphtheria, or osteomalacia, or during medication with storax or phosphorus. See *Peptonuria*.

Properistoma (*pro-per-is-to'-mah*) [πρό, before; περί, around; στόμα, mouth: *pl.*, *Properistomata*]. In biology, the thickened edge of the gastrula.

Properistomal (*pro-per-is-to'-mal*) [πρό, before; περί, around; στόμα, mouth]. Pertaining to a properistoma.

Properistome (*pro-per'-is-tōm*). Same as *Properistoma*.

Properitoneal (*pro-per-it-o-ne'-al*) [πρό, before; περιτόναιον, peritoneum]. Situated in front of the peritoneum. **P. Hernia**, a hernia the sac of which extends in various directions *within* the abdominal walls. **P. Hernia, Cruro-**, of Kroenlein, a femoral hernia in which an additional sac exists in the cellular tissue of the pelvis, between the peritoneum and the abdominal wall. **P. Hernia, Inguino-**, of Kroenlein; one which protrudes outward along the fold of the groin, *within* the abdominal walls; by the French termed *hernie en bissac*.

Prophasis (*prof'-as-is*) [πρό, before; φαίνειν, to show]. 1. Prognosis. 2. In biology, a collective term proposed by Strasburger for the phenomena of karyokinesis up to the longitudinal splitting of the threads. Cf. *anaphases*, *metaphases*.

Prophetin (*prof'-et-in*), $C_{20}H_{36}O_7$. A glucosid found in *Echallium officinale* and *Cucumis prophetarum*.

Prophloëm (*pro-flo'-em*) [πρό, before; φλοιός, bark]. In biology, (*a*) the incipient rudiment or *Anlage* of phloëm in a fibro-vascular bundle; (*b*) a tissue in the sporophore of mosses resembling the phloëm of higher plants.

Prophragma (*pro-frag'-mah*) [πρό, before; φράγμα, fence, partition: *pl.*, *Prophragmata*]. In biology, an internal, anterior, transverse plate of the exoskeleton of an insect, serving for the attachment of internal organs.

Prophthalmos (*prof-thal'-mos*). Synonym of *Exophthalmos*.

Prophylactic (*pro-fil-ak'-tik*) [προφυλλάσσειν, to keep guard before]. Pertaining to prophylaxis. Also, a medicine or agent that prevents the taking of disease.

Prophylaxis (*pro-fil-aks'-is*) [προφυλλάσσειν, to keep guard before]. Prevention of disease; preventive measures; preventive medicine; hygiene.

Prophylaxy (*pro'-fil-aks-e*). Same as *Prophylaxis*.

Prophyllum (*pro-fil'-um*) [πρό, before; φύλλον, leaf]. A primitive or primary leaf.

Prophysis (*prof'-is-is*). See *Symblepharon*.

Propiolic Acid (*pro-pe-o'-lik*). See *Acid*.

Propionamid (*pro-pe-on'-am-id*) [πρῶτος, first; πίων, fat; *amid*], C_3H_7NO. A substitution compound of ammonia.

Propione (*pro'-pe-ōn*) [πρῶτος, first; πίων, fat], $C_5H_{10}O$. *Diethyl Ketone*, a liquid obtained by the distillation of calcium propionate. It boils at 101° C.

Propionic Acid (*pro-pe-on'-ik*). See p. 36.

Proplasm (*pro'-plazm*) [πρό, for; πλάσσειν, to form]. A mold; a matrix.

Propleural (*pro-plu'-ral*) [πρό, before; πλευρά, side]. Pertaining to the propleura.

Propleuron (*pro-plu'-ron*) [πρό, before; πλευρά, side: *pl.*, *Propleura*]. In biology, one of the prothoracic parameres of an arthropod.

Proplexus (*pro-pleks'-us*) [*pro*, before; *plexus*, plexus]. The choroid plexus of the lateral ventricle of the brain. See *Paraplexus*.

Propodeum (*pro-po'-de-um*) [*pro*, before; *pod(ex)*, fundament: *pl.*, *Propodea*]. In biology, a part of the last thoracic ring of certain insects transferred during development from the first abdominal ring.

Propodial (*pro-po'-de-al*) [πρό, before; πούς, foot]. Pertaining to the propodium.

Propodite (*prop'-o-dit*) [πρό, before; πούς, foot]. Same as *Propodos*.

Propodium (*pro-po'-de-um*) [πρό, before; πούς, foot: *pl.*, *Propodia*]. In biology, the anterior portion of the foot of a gasteropod or pteropod, as distinguished from the *mesopodium* and *metapodium*.

Propodos (*prop'-o-dos*) [πρό, before; πούς, foot]. In biology, the sixth joint of any appendage of a crustacean; a *prognathite*, *propodite* (Bate). Cf. *protopodite*, *endopodite or exopodite*, *ischiopodite*, *meropodite*, *carpopodite*, and *dactylopodite*.

Propolis (*prop'-o-lis*) [πρό, before; πόλις, city]. In biology, a resinous substance, exceedingly tenacious, varying much in color, but usually a rich brown, and which emits a balsamic odor, used by bees both as a cement and as a varnish. Bees varnish their combs with it, applying it quite thickly on the edges of the cells and thin on the cell-walls; they use it to fill up every crack the bottom of which they cannot reach. Propolis is collected in largest amounts toward the end of the season, from a variety of sources, *e. g.*, the leaf-buds of shrubs and trees, the poplar, the alder, the beech, the willow, the fir, the horsechestnut, the hollyhock, etc.

Propoma (*pro-po'-mah*) [προποίνειν, to drink before]. A potion taken before meals.

Propons (*pro'-ponz*). Synonym of *Ponticulus*.

Propostscutellar (*pro-pōst-sku-tel'-ar*) [πρό, before; *postscutellum*]. Pertaining to a propostscutellum.

Propostscutellum (*pro-pōst-sku-tel'-um*) [πρό, before; *postscutellum*]. In biology, the postscutellum of the pronotum.

Proprescutal (*pro-pre-sku'-tal*) [*pro*, before; *prescutum*]. Pertaining to the proprescutum.

Proprietary (*pro-pri'-et-ar-e*) [*proprietas*, property]. Belonging to a proprietor. **P. Medicine.** One the manufacture or sale of which is controlled or limited by a monopoly of the sources of supply; by a property-right in the trade-mark, the name, or the label; by a patent; by a secret of constitution or of method of manufacture; or by any other means.

Propterygial (*pro-ter-ij'-e-al*) [πρό, before; πτερύγιον, a little wing]. Pertaining to the propterygium.

Propterygium (*pro-ter-ij'-e-um*) [πρό, before; πτερύγιον, a little wing, fin: *pl.*, *Propterygia*]. In biology, one of the three segments of the skeleton of the anterior fin of a fish. Cf. *Mesopterygium*, *Metapterygium*.

Proptoma (*prop-to'-mah*) [πρό, before; πτῶμα, a fall: *pl.*, *Proptomata*]. A prolapse, or the protruding mass resulting from a prolapse. **P. auricularum**, flap ears. **P. mammarum**, a pendulous condition of the breasts. **P. palpebrarum**. Synonym of *Ptosis*.

Proptosis (*prop-to'-sis*) [πρό, forward; πτῶσις, a falling]. A falling downward of an organ from its place. Prolapse. **P., Entero-.** See *Enteroproptosis*. **P., Gastro-.** See *Gastroptosis*. **P. oculi.** Synonym of *Exophthalmos*. **P. palpebræ**, ptosis. **P. uvulæ.** Synonym of *Staphyledema*.

Proptysis (*prop'-tis-is*). Synonym of *Expectoration*.

Propulsion (*pro-pul'-shun*) [*pro*, before; *pellere*, to push]. The act of pushing or being pushed forward. It is a symptom of paralysis agitans; as the patient walks there is a progressive increase in the rapidity of his gait, until he breaks into a run. This continues until he either falls or seizes a support. See *Paralysis agitans* and *Festination*.

Propupa (*pro-pu'-pah*) [*pro*, before; *pupa*, pupa]. In biology, that stage of insect development immediately preceding the pupa.

Propygidium (*pro-pi-jid'-e-um*) [πρό, before; πυγή, rump; dim. *ίδιον*: *pl.*, *Propygidia*]. In biology, the penultimate dorsal segment of the abdomen of certain insects.

Propyl (*pro'-pil*) [πρῶτος, first; ὕλη, matter], C_3H_7. The radicle of propane.

Propylamin (*pro-pil'-am-in*) [πρῶτος, first; ὕλη, matter; *amin*], C_3H_9N. A ptomain, isomeric with trimethylamin. There are two propylamins possible, represented by the formulæ $CH_3.CH_2.CH_2.NH_2$ and $(CH_3)_2.CH_2$. The former, or normal compound, boils at 47°–48° C.; while the latter, or isopropylamin, boils at 31.5° C. Iso-propylamin has been found among the distillation-products of beet-root molasses. Normal propylamin has been obtained from cultures of the bacteria of human feces, and a strongly similar basic substance from a cadaver. Both are non-poisonous liquids possessing an ammoniacal, fish-like smell. See *Ptomains*, *Table of*.

Propylene (*pro'-pil-ēn*) [πρῶτος, first; πίων, fat; ὕλη, matter], C_3H_6. A gaseous hydrocarbon belonging to the series of the olefins.

Prora (*pro'-rah*) [πρῶρα, the prow of a ship]. 1. Occiput. 2. In biology, prow-shaped or C-shaped, as certain sponge-spicules. **Proræ, Sutura**, the lambdoid suture.

Proral (*pro'-ral*). See *Cephalic*.

Prorenal (*pro-re'-nal*) [*pro*, for, before; *ren*, the kidney]. In biology, preceding the true kidney. See *Duct*, *Segmental*.

Pro re nata (*pro-re-na'-tah*) [L.]. A phrase signifying according to the circumstances of the case.

Prorrhesis (*pror'-e'-sis*). Synonym of *Prognosis*.

Prorsad (*pror'-sad*) [*prorsum*, forward]. Toward the anterior aspect.

Prorsal (*pror'-sal*) [*prorsum*, forward]. Anterior; forward.

Proruption (*pror-up'-shun*). Synonym of *Eruption*.

Pros's Apparatus. A contrivance for making continuous traction on the obstetric forceps, the counter-pressure being exerted upon the bed, that forms part of the apparatus.

Prosarma (*pro-sar'-mah*) [προσαίρειν, to take up]. Ingesta; anything ingested.

Prosartema (*pros-ar'-tem-ah*) [προσάρτημα, appendage]. In biology, the appendage connected with the inner side of the first joint of the first pair of antennæ in macrurous crustaceans. (Bate.)

Prosarthrosis (*pros-ar-thro'-sis*). Synonym of *Diarthrosis*.

Proscapula (*pro-skap'-u-lah*) [*pro*, before; *scapula*, shoulder-blade: *pl.*, *Proscapulæ*]. In biology, one of the principal parameric elements of the shoulder-girdle of a fish. The *humerus* of Cuvier, the *coracoid* of Owen, and the *clavicle* of later writers.

Proscapular (*pro-skap'-u-lar*) [*pro*, before; *scapula*, shoulder-blade]. Pertaining to the proscapula.

Proschysis (*pros'-kis-is*) [προς, before; χυσις, a pouring]. Affusion.

Proscolecine (*pro-skol'-es-in*) [πρό, before; σκώληξ, a worm]. Pertaining to a proscolex.

Proscolex (*pro-sko'-leks*) [πρό, before; σκώληξ, a worm: *pl.*, *Proscolices*]. In biology, the embryo of a cestode worm immediately after leaving the egg. It is a microscopic spheric or oval body provided at one pole with three pairs of divergent spicules by which it is enabled to penetrate the walls of the stomach or intestine of its host.

Proscolla (*pros-kol'-ah*) [πρός, before; κόλλα, glue: *pl.*, *Proscollæ*]. See *Retinaculum*.

Proscutal (*pro-sku'-tal*) [*pro*, before; *scutum*, a shield]. Pertaining to the proscutum.

Proscutellar (*pro-sku-tel'-ar*) [*pro*, before; *scutellum*, a little shield]. Pertaining to the proscutellum.

Proscutellum (*pro-sku-tel'-um*) [*pro*, before; *scutellum*, a little shield: *pl.*, *Proscutella*]. In biology, the penultimate piece of the pronotum of an arthropod.

Proscutum (*pro-sku'-tum*) [*pro*, before; *scutum*, a shield: *pl.*, *Proscuta*]. The scutum, or second piece of the pronotum of an arthropod.

Prosection (*pro-sek'-shun*) [*prosecare*, to cut off from before]. Dissection practised by a prosector.

Prosector (*pro-sek'-tor*) [*pro*, for; *sector*, cutter]. An officer of a medical college who prepares subjects for anatomic dissection, or to illustrate didactic lectures.

Prosectorship (*pro-sek'-tor-ship*) [*prosecare*, to cut off from before]. The office of a prosector.

Prosencephal (*pros-en'-sef-al*). Same as *Prosencephalon*.

Prosencephalic (*pros-en-sef-al'-ik*) [πρός, before; ἐγκέφαλος, brain]. Pertaining to the forehead or forebrain; frontal. **P. Arch**, the neural arch of a frontal vertebra.

Prosencephalon (*pros-en-sef'-al-on*) [πρός, before; ἐγκέφαλος, brain]. The forebrain; that part of the anterior cerebral vesicle from which are developed the hemispheres, the callosum, the anterior commissure, the fornix, the septum lucidum, the anterior perforated space, the olfactory lobes, and the corpus striatum. The cavity is the prosocele.

Prosenchyma (*pros-eng'-kim-ah*) [πρός, near; ἔγχυμα, an infusion]. In biology, a term used to designate the elongated, taper-pointed cells and vessels of plants.

Prosenchymatous (*pros-eng-kim'-at-us*) [πρός, near, ἔγχυμα, an infusion]. Belonging or pertaining to the prosenchyma.

Prosenthesis (*pros-en'-thes-is*) [πρός, to; ἔνθεσις, a putting in, insertion]. In biology, a supplementary relation which the measure of the phyllotaxis adopts in the transition from the last leaf of one cycle to the first of the next. (Sachs.)

Prosethmoid (*pros-eth'-moid*) [πρός, toward; ἠθμός, a sieve]. In biology, the median ethmoid bone of the skull of a fish.

Proslysis (*pros'-lis-is*). Same as *Catalysis*.

Prosobregmus (*pros-o-breg'-mus*) [πρόσω, forward; βρεγμα, bregma]. Lissauer's term for a skull in which the angle formed between the radius fixus and the line joining the hormion and the bregma is between 82° and 95.5°.

Prosocele (*pros'-o-sēl*) [πρόσω, forward; κοῖλος, a hollow]. The cavity of the prosencephalon. It is divided into three main divisions, a mesal cavity, the aula, and two lateral cavities, the paraceles, together with the rhinoceles (olfactory ventricles) or cavities of the olfactory bulbs.

Prosodal (*pros'-o-dal*) [πρός, to; ὁδός, way, road]. In biology, incurrent.

Prosodiencephal (*pros-o-di-en'-sef-al*) [πρόσω, forward; *dia*, through; ἐγκέφαλος, brain]. The primary fore-brain.

Prosodiencephalic (*pros-o-di-en-sef-al'-ik*) [πρόσω, forward; *diencephalon*]. Pertaining to the prosodiencephal.

Prosodus (*pros'-o-dus*) [πρός, to; ὁδός, way, road: *pl.*, *Prosodi*]. In biology, an incurrent pore; an *aditus*, as in a sponge.

Prosogaster (*pros-o-gas'-ter*) [πρόσω, forward; γαστήρ, belly]. The foregut.

Prosognathous (*pro-sog'-na-thus*). Same as *Prognathic*.

Prosoma (*pro-so'-mah*) [πρό, before; σῶμα, body]. In biology, the cephalic or anterior segment of the body of a mollusc or other animal.

Prosomal (*pro-so'-mal*) [πρό, before; σῶμα, body]. Pertaining to the prosoma.

Prosomatic (*pro-so-mat'-ik*) [πρό, before; σῶμα, body]. Pertaining to the prosoma.

Prosome (*pro'-sōm*). Same as *Prosoma*.

Prosopalgia (*pros-o-pal'-je-ah*) [πρόσωπον, face; ἄλγος, pain]. Face-ache; *Tic douloureux*.

Prosopalgic (*pros-o-pal'-jik*) [πρόσωπον, face; ἄλγος, pain]. Affected with prosopalgia.

Prosopantritis (*pros-op-an-tri'-tis*) [πρόσωπον, face; ἄντρον, cavity; ιτις, inflammation]. Inflammation of the frontal sinuses.

Prosopantrum (*pros-op-an'-trum*) [πρόσωπον, face; ἄντρον, cavity]. A frontal sinus.

Prosopectasia (*pros-o-pek-ta'-ze-ah*) [πρόσωπον, face; ἔκτασις, enlargement]. Morbid enlargement of the face.

Prosoperysipelas (*pros-o-per-is-ip'-el-as*) [πρόσωπον, face; ἐρυσίπελας, erysipelas]. Facial erysipelas.

Prosoplexus (*pros-o-pleks'-us*) [πρόσω, forward; *plexus*, plexus]. The choroid plexuses of the prosencephalic cavities, including the paraplexuses and intermediate portiplexuses and antiplexuses.

Prosopocarcinoma (*pros-o-po-kar-sin-o'-mah*) [πρόσωπον, face; καρκίνωμα, carcinoma]. Carcinoma of the face.

Prosopodidymus (*pros-o-po-did'-im-us*) [πρόσωπος, face; δίδυμος, double]. Same as *Diprosopus*.

Prosopodiplegia (*pros-o-po-di-ple'-je-ah*) [πρόσωπον, face; *dis*, double; πληγή, stroke]. Bilateral facial palsy.

Prosopodismorphia (*pros-o-pod-is-mor'-fe-ah*). Synonym of *Atrophy*, *Progressive Unilateral Facial*.

Prosopodynia (*pros-o-po-din'-e-ah*) [πρόσωπον, face; ὀδύνη, pain]. Facial pain, or neuralgia.

Prosopography (*pros-o-pog'-ra-fe*) [πρόσωπον, face; γράφειν, to write]. The description of anyone's personal appearance.

Prosopology (*pros-o-pol'-o-je*) [πρόσωπον, face; λόγος, science]. The scientific study of the countenance; physiognomy.

Prosoponeuralgia (*pros-o-po-nu-ral'-je-ah*). Synonym of *Prosopalgia*.

Prosopoparalysis (*pros-o-po-par-al'-is-is*). Synonym of *Prosopoplegia*.

Prosopoplegia (*pros-o-po-ple'-je-ah*) [πρόσωπον, face · πληγή, stroke]. Facial palsy.

Prosoposalgia (*pros-o-po-sal'-je-ah*). Synonym of *Prosopalgia*.

Prosoposchisis (*pros-o-pos'-kis-is*) [πρόσωπον, face; σχίσις, fissure]. An oblique fissure or cleft of the face of a fetal monstrosity. It passes from the mouth to one of the orbits, and is usually associated with malformation of the brain.

Prosoposis (*pros-o-po'-sis*) [πρόσωπον, face]. Physiognomy.

Prosopospasmos (*pros-o-po-spaz'-mos*) [πρόσωπον, face; σπασμός, spasm]. Risus sardonicus.

Prosoposternodynia (*pros-o-po-ster-no-din'-e-ah*) [πρόσωπον, face; στέρνον, breast; δίδυμος, double]. A form of double monstrosity in which the twins are united by their faces and chests.

Prosopothoracopagus (*pros-o-po-tho-rak-op'-ag-us*) [πρόσωπον, face; θώραξ, chest; πάγος, that which is fixed]. A form of double fetal monstrosity in which the twins are united by the upper abdomen, chest, and faces, the spinal columns being quite separate and distinct.

Prosopotocia (*pros-o-po-to'-se-ah*) [πρόσωπον, face; τόκος, birth]. Face-presentation in parturition.

Prosoprosopus (*pros-o-pros'-op-us*) [πρόσω, forward; πρόσωπον, face]. Lissauer's term for a skull in which the angle formed between the radius fixus and the line joining the nasion and the alveolar point is between 66.5° and 78°.

Prosopulmonate (*pros-o-pul'-mo-nāt*) [πρόσω, forward; *pulmo*, lung]. Having anterior pulmonary organs.

Prosopylar (*pros-o-pi'-lar*) [πρόσω, forward; πύλη, a gate]. Pertaining to a prosopyle.

Prosopyle (*pros'-o-pil*) [πρόσω, forward; πύλη, a gate]. In biology, the aperture leading from the exterior into an endodermal chamber in a sponge, as distinguished from the *apopyle*, which furnishes communication between the endodermal chamber and the paragastric cavity.

Prosorrhinus (*pros-or-i'-nus*) [πρόσω, forward; ῥίς, nose]. Lissauer's term for a skull in which the angle formed between the radius fixus and the line joining the nasion and the subnasal point is between 66.5° and 77°.

Prosoterma (*pros-o-ter'-mah*) [πρόσω, forward; τέρμα, limit]. A lamina uniting the two halves of the fornix.

Prosothoracopagus (*pros-o-tho-rak-op'-ag-us*) [πρόσω, forward; θώραξ, thorax; πάγος, fixed]. A double monstrosity with fusion of the thoraces.

Prospegma (*pros-peg'-mah*) [προσπηγνύναι, to fix]. An inspissated mass, especially of mucus, in the anus.

Prosphysis (*pros'-fis-is*) [προσφύεσθαι, to cling to]. Adhesion. **P. palpebrarum.** Synonym of *Ankyloblepharon*.

Prosporangium (*pro-spo-ran'-je-um*) [πρό, before; σπόρος, seed; ἀγγεῖον, vessel: *pl.*, *Prosporangia*]. In biology, the rudiment or forerunner of the sporangium in the *Chytridieæ*.

Prostata (*pros'-tat-ah*) [προστάτης, prostate]. The prostate gland.

Prostatalgia (*pros-tat-al'-je-ah*) [προστάτης, prostate; ἄλγος, pain]. Pain in the prostate gland.

Prostatauxe (*pros-tat-awks'-e*) [προστάτης, prostate; αὔξη, increase]. Enlargement of the prostate gland.

Prostate, or Prostate Gland (*pros'-tāt*) [προστατής, πρό, before; ἱστάναι, to stand]. The glandular body surrounding the neck of the bladder and beginning of the urethra. It is situated behind the symphysis

pubis, and upon the rectum, through which it is palpable when enlarged. It measures an inch and a half in its transverse diameter, an inch in its antero-posterior, and three-quarters of an inch in thickness. Its weight is about 6 drams. It consists of two lateral and a middle lobe. In structure it consists of muscular and glandular tissue; a distinct capsule surrounds it. The prostate often becomes enlarged in advanced life, and may then interfere with the emptying of the bladder. **P., Anterior,** a small glandular body sometimes found in front of Méry's glands. **P., Enlarged,** the enlargement of the prostate gland, so frequent in advanced life. One of the most constant symptoms is frequent urination, especially at night.

Prostatectomy (*pros-tat-ek'-to-me*) [προστάτης, prostate; ἐκτομή, excision]. Excision of a part of the prostate, also known as *Mercier's Operation*.

Prostatelcosis, Prostathelcosis (*pros-tat-el-ko'-sis, pros-tat-hel-ko'-sis*) [προστάτης, prostate; ἕλκωσις, ulceration]. Ulceration of the prostate.

Prostatic (*pros-tat'-ik*) [προστάτης, prostate]. Relating to the prostate. **P. Acini,** highly developed urethral glands, opening by several ducts on the free surface of the urethra. **P. Calculus,** a stone lodged in the prostate gland. **P. Ducts,** a number of short ducts opening upon the floor of the urethra, and communicating with the prostate gland. **P. Plexus.** 1. A collection of veins surrounding the neck and base of the bladder and the prostate gland. 2. A plexus of nerves derived from the pelvic plexus, and distributed to the prostate gland, seminal vesicles and erectile tissue of the penis. **P. Sinus,** a depression in the prostatic urethra, one on each side of the verumontanum, which marks the entrance of the prostatic ducts. **P. Urethra,** that portion of the urethra surrounded by the prostate gland. **P. Vesicle,** a small cul-de-sac situated at the middle of the highest portion of the crest of the urethra. It is the analogue of the uterus of the female, and is also called the *uterus masculinus*, the *sinus pocularis* and the *utricle*.

Prostaticus (*pros-tat'-ik-us*). Same as *Prostatic*.

Prostatitic (*pros-tat-it'-ik*) [προστάτης, prostate; ιτις, inflammation]. Affected with prostatitis.

Prostatitis (*pros-tat-i'-tis*) [προστάτης, prostate; ιτις, inflammation]. Inflammation of the prostate gland.

Prostatocele (*pros-tat'-o-sēl*) [προστάτης, prostate; κήλη, tumor]. An enlargement of the prostate gland, causing a tumor-like projection.

Prostatocystitis (*pros-tat-o-sis-ti'-tis*) [προστάτης, prostate; κύστις, bladder; ιτις, inflammation]. Inflammation of the prostate and urinary bladder.

Prostatolith (*pros-tat'-o-lith*) [προστάτης, prostate; λίθος, a stone]. A prostatic calculus.

Prostatome (*pros'-tat-ōm*) [προστάτης, prostate; τομή, a cutting]. A cutting-instrument used in operations upon the prostate.

Prostatomele (*pros-tat-om'-el-e*) [προστάτης, prostate; μήλη, probe]. A sound for exploration of the prostate gland.

Prostatometer (*pros-tat-om'-et-er*) [προστάτης, prostate; μέτρον, measure]. An instrument used in measuring the prostate.

Prostatoncus (*pros-tat-ong'-kus*) [προστάτης, prostate; ὄγκος, tumor]. A tumor of the prostate.

Prostatoparectasis (*pros-tat-o-par-ek'-tas-is*) [προστάτης, prostate; παρέκτασις, a stretching]. Enlargement of the prostate gland.

Prostatorrhea (*pros-tat-or-e'-ah*) [προστάτης, prostate; ῥοία, flow]. A thin, urethral discharge coming from the prostate gland in prostatitis.

Prostatoscirrhus (*pros-tat-o-skir'-us*) [προστάτης, prostate; σκίῤῥος, induration]. Scirrhous carcinoma of the prostate gland.

Prostatotomy (*pros-tat-ot'-o-me*) [προστάτης, prostate; τομή, a cutting]. Incision into the prostate gland. **P., Thermo-electric,** perforation of an enlarged prostate by means of the galvanic cautery, for the purpose of establishing a channel through it.

Prosternal (*pro-ster'-nal*) [πρό, before; στέρνον, the breast-bone]. Pertaining to the prosternum.

Prosternidium (*pro-ster-nid'-e-um*) [πρό, before; στέρνον, breast-bone]. A plaster for the chest.

Prosternum (*pro-ster'-num*) [πρό, before; στέρνον, the breast-bone: *pl.*, *Prosterna*]. In biology, the sternal piece of the prothorax of an arthropod.

Prostethedium (*pro-steth-ed'-e-um*) [πρό, before; στῆθος, breast]. See *Prosternidium*.

Prostheca (*pros-the'-kah*) [προσθέκη, an addition, appendage: *pl.*, *Prosthecæ*]. In biology, a process on the mandibles of certain insects (*e. g.*, *Staphylinidæ*, or rove-beetles).

Prosthecal (*pros-the'-kal*) [προσθήκη, an addition, appendage]. Pertaining to the prostheca.

Prosthema (*pros'-the-mah*) [προσθεμα, an addition, appendage: *pl.*, *Prosthemata*]. In biology, the leaf-like appendage of the nose of a bat, as in *Phyllorhina*.

Prosthencephalon (*pros-then-sef'-al-on*) [πρόσθεν, before; ἐγκέφαλος, the brain]. The segment of the brain consisting of the cerebellum and oblongata.

Prosthesis (*pros'-thes-is*) [πρός, to; θέσις, a placing]. 1. Substitution of an artificial for a natural part; replacement of a missing part by an artificial substitute. 2. The branch of surgery which is devoted to supplying by artificial means parts that are defective. **P., Dental,** the replacement of the loss of one or more teeth by an artificial substitute.

Prosthetic (*pros-thet'-ik*) [πρός, to; θέσις, a placing]. Pertaining to prosthesis, or the use of artificial substitutes to replace lost or wanting parts of the body. **P. Apparatus,** an apparatus which serves as a substitute for a part that is missing. **P. Dentistry,** the replacement of natural teeth by artificial substitutes.

Prosthetics (*pros-thet'-iks*) [πρός, to; θέσις, a placing]. The branch of surgery which deals with prosthesis.

Prosthion (*pros'-the-on*) [πρόσθιος, foremost]. 1. Alveolar point. See *Craniometric Points*. 2. Penis.

Prostitution (*pros-tit-u'-shun*) [*prostitutio*]. The condition or act of a woman who indiscriminately lets her body for sexual intercourse. In many of the countries of Europe prostitution is recognized as a matter for hygienic inspection, the prostitutes being subject to police surveillance and medical inspection. In the United States the existence of the evil is, in general, legally ignored.

Prostoma (*pro-sto'-mah*) [πρό, before; στόμα, mouth]. The blastopore.

Prostomial (*pro-sto'-me-al*) [πρό, before; στόμα, mouth]. Preoral; pertaining to the prostomium.

Prostomiate (*pro-sto'-me-āt*) [πρό, before; στόμα, mouth]. Provided with a prostomium.

Prostomium (*pro-sto'-me-um*) [πρό, before; στόμα, mouth: *pl.*, *Prostomia*]. In biology, the region in front of the mouth; said of embryos or invertebrates.

Prostrate (*pros'-trāt*) [*pro*, before; *sternere*, to spread]. Lying flat or at full length.

Prostrated (*pros'-tra-ted*) [*pro*, before; *sternere*, to spread]. Exhausted; stricken down.

Prostration (*pros-tra'-shun*) [*pro*, before; *sternere*, to spread]. The condition of being prostrate. Extreme exhaustion of nervous or muscular force. **P., Nervous,** general exhaustion from excessive expenditure of nervous energy. Intense mental application may produce it.

Protagon (*pro'-tag-on*) [πρῶτος, first; ἀγειν, to lead], $C_{150}H_{300}N_5PO_{35}$. A crystalline substance discovered in nervous tissue, by Liebreich. It separates out from warm alcohol on gradual cooling in the form of very small needles, often arranged in groups; it is slightly soluble in cold, more soluble in hot alcohol, and in ether. It is insoluble in water, but swells up and forms a gelatinous mass. It melts at 200° C. and forms a brown sirupy fluid.

Protalbumose (*prōt-al'-bu-mōz*). Same as *Protoalbumose*.

Protameba (*pro-tam-e'-bah*) [πρῶτος, first; ἀμοιβη, ameba]. A genus, or perhaps only a stage of development, of moners, or protists, of the very simplest type.

Protamin (*pro-tam'-in*) [πρῶτος, first; *amin*], $C_{16}H_{32}N_9O_2$. An organic base found in the nuclein of the outer covering of spermatozoa.

Protamnion (*pro-tam'-ne-on*) [πρῶτος, first; ἀμνίον, amnion]. The hypothetic ancestral type of existing amniotic animals.

Protamphirine (*pro-tam'-fir-in*) [πρῶτος, first; ἀμφί, on both sides; ῥίς, nose]. In biology, the hypothetic ancestral type of existing amphirhine animals.

Protandric (*pro-tan'-drik*). Same as *Protandrous*.

Protandrous (*pro-tan'-drus*). Same as *Proterandrous*.

Protandry (*pro-tan'-dre*) [πρῶτος, first; ἀνήρ, mate]. See *Proterandry*.

Protarsus (*pro-tar'-sus*) [πρό, before; ταρσός, tarsus: *pl.*, *Protarsi*]. In biology, the tarsus of the fore-leg of a six-footed insect.

Protean (*pro'-te-an*) [like the ancient god *Proteus*]. Existing in many shapes; as a protean disease, protean eruption.

Protective (*pro-tek'-tiv*) [*pro*, before; *tegere*, to cover]. 1. That which covers or protects. 2. As a noun, a water-proof substance, which is laid directly upon a wound as a part of the antiseptic dressing. **P. Bandage.** See *Bandage*. **P. Dressing**, an antiseptic dressing, shielding the part involved from injury or septic contamination. **P., Green.** See *Protective*, second definition.

Proteids (*pro'-te-ids*) [πρῶτός, first]. A general term for the albumins and albuminoid constituents of the organism. They are the anhydrids of peptones, are colloid, non-crystallizable, and levogyrous, and are composed of carbon, oxygen, hydrogen, and nitrogen in certain proportions. They are precipitated from solutions by alcohol and various metallic salts, and are coagulated by heat and mineral acids. They form the principal solids of the muscular, nervous, and glandular tissues, of the serum of the blood, of serous fluids, and of lymph. Proteids are divided by Landois into: 1. The *Native Albumins*, comprising Serum-albumin, Egg-albumin, Metal-albumin, and Paralbumin (the last two are probably the same substance); 2. The *Derived Albumins*, or *Albuminates*, comprising Acid-albumin, Syntonin, Alkali albumin, and Casein, or Native Alkali-albumin; 3. The *Globulins*, subdivided into Crystallin, the globulin of the crystalline lens, Vitellin, Para-globulin or Serum-globulin, Fibrinogen, Myosin, Globin; 4. The *Fibrins*; 5. *Coagulated Proteids*; 6. *Albumoses and Peptones*; 7. *Lardacein or Amyloid Substances*. For the tests for proteids, see *Xanthoproteic Reaction*, *Millon's Reagent*, *Piotrowski's Reaction*, *Brücke's Reagent*, and *Adamkiewicz's Reaction*, in *Tests, Table of*. **P., Defensive**, certain bacteria-destroying substances, either existing normally in the animal economy, or produced therein by the process of vaccination or inoculation. Buchner proposes for them the name of alexins. Those defensive proteids that exist normally in the animal are termed by Hankin *Sozins*, while those that are present in artificially immune animals are termed *Phylaxins*. *Myco-sozins* and *Myco-phylaxins* are sub-divisions that act by destroying the microbes, while *Toxo-sozins* and *Toxo-phylaxins* act by destroying microbic products. **P., Vegetal**, or **Vegetable**, proteid substances found in plants, especially in seeds, closely resembling those in animals. They have been given the same names with the prefix *vegetal*, as, *e. g.*, vegetal globulin, myosin, vitellin, casein, glutin, etc. A true peptone has not been found, but allied substances called *albumoses*, and divided into *Alpha* (α)-*albumoses*, *Beta* (β)-*albumoses* and *Phytalbumoses*, have been differentiated.

Proteiform (*pro-te'-if-orm*) [*Proteus*, a mythical character that assumed various shapes; *forma*, a form]. Having various forms. See *Protean*.

Proteil (*pro'-te-il*) [πρῶτος, first; ὕλη, matter]. In biology, the term applied by Lankester to that definite chemic substance of very high complexity which is probably present in all protoplasm. The hypothetic essential basis of every variety of living matter.

Protein (*pro'-te-in*) [πρωτεύειν, to be first]. In biology: 1. The term introduced by Mulder (1838) to designate the hypothetic compound common to all albuminoids. It is now loosely used to denote the whole class. Cf. *Proteid*. 2. A nitrogenous substance analogous to fibrin. It is formed artificially by the action of an alkaline hydrate on albumin, fibrin, or casein. The addition of acetic acid precipitates the protein as a gelatinous translucent deposit. **P., Anthrax**, a proteid obtained from cultures of bacillus anthracosis. It resembles mykoprotein in not containing sulphur. **P. Bodies.** See *Proteids*. **P. Granules.** See *Aleurone*. **P., Myco-**, Nencki's term for any one of the albuminous bodies contained within bacterial organisms.

Proteinchrome, Proteinchromogen (*pro'-te-in-krōm*, *pro-te-in-kro'-mo-jen*) [πρῶτος, first; χρωμα, color; γεννᾶν, to produce]. *Tryptophan*; a substance produced from hemi-peptone by the action of trypsin. It gives with chlorin or bromin a reddish-violet product, *proteinchrome*.

Proteinol (*pro'-te-in-ōl*) [πρῶτος, first; *oleum*, oil]. A form of nutritious food for infants and invalids. It contains proteids, fats, carbohydrates and lime-salts.

Protembryo (*pro-tem'-bre-o*) [πρῶτος, first; ἐμβρυον, embryo]. In biology, that stage in the segmenting ovum of a metazoön in which it resembles the colonial stage of certain protozoans.

Protembryonic (*pro-tem-bre-on'-ik*) [πρῶτος, first; ἐμβρυον, embryo]. Pertaining to the protembryo.

Protencephalon (*pro-ten-sef'-al-on*) [πρῶτος, first; ἐγκέφαλος, brain]. The fore-brain.

Protenchyma (*pro-teng'-kim-ah*) [πρῶτος, first; ἐγχύμα, an infusion]. In biology, Nægeli's term for all plant-tissues not of the fibro-vascular system (*epenchyma*).

Proteolysis (*pro-te-ol'-is-is*) [πρωτεύειν, to be first; λύσις, dissolving]. In biology, the change produced in proteids by organized or unorganized ferments. **P., Digestive**, the decomposition of proteids during the process of digestion.

Proteolytic (*pro-te-o-lit'-ik*) [πρῶτος, first; λύσις, solution]. Pertaining to, characterized by, or effecting, proteolysis. See *Ferments*.

Proteoses (*pro-te-o'-sēz*) [πρῶτος, first]. The bodies formed in gastric digestion intermediate between the food proteids and the peptones, called anti-peptone, hemi-peptone, etc.

Proterandrous, Protandrous (*pro-ter-an'-drus*, *pro-tan'-drus*). In biology, terms descriptive of hermaphrodite flowers that mature their stamens before the stigmas are ready to receive the pollen. **P. Hermaphroditism.** See *Hermaphroditism*.

Proterandry (*pro-ter-an'-dre*) [πρότερος, being before; ἀνήρ, male]. In biology, the maturation of the stamens in a perfect flower before the pistil is sufficiently mature to admit of fertilization.

Proteranthous (*pro-ter-an'-thus*) [πρότερος, fore; ἄνθος, flower]. In biology, flowering before leafing.

Proterogynous (*pro-ter-oj'-in-us*) [πρότερος, fore; γυνή, female]. In biology, possessing stigmas that are first to mature.

Proterogyny (*pro-ter-oj'-in-e*) [πρότερος, fore; γυνή, female]. In biology, the maturation of the pistil of a perfect flower before the stamens have matured their pollen.

Proteus (*pro'-te-us*) [L.]. A genus of microbes of the order of *schizomycetes*. See under *Bacteria, Synonymatic Table of*.

Prothallium (*pro-thal'-e-um*) [*pro*, before; *thallus*, a young shoot]. In biology, the thalloid oöphyte or sexual generation of a fern or other pteridophyte, produced by the germination of a spore and giving rise by means of antheridia and archegonia to the frondose generation. Cf. *Protonema*.

Prothallus (*pro-thal'-us*). Same as *Prothallium*.

Prothelmis (*pro-thel'-mis*) [πρῶτος, first: ἕλμις, a worm]. In biology, a hypothetic ancestral worm, having a structure homologous to the four-layered germ of metazoans.

Prothesis (*proth'-es-is*) [πρό, for; θέσις, a placement]. Synonym of *Prosthesis*. **P. ocularis**, an artificial eye.

Prothetic (*pro-thet'-ik*). Synonym of *Prosthetic*.

Prothoracic (*pro-tho-ras'-ik*) [πρό, before; θώραξ, breast]. Pertaining to the prothorax.

Prothoracotheca (*pro-tho-rak-o-the'-kah*) [πρό, before; θώραξ, breast; θήκη, a case: *pl.*, *Prothoracothecæ*]. In biology, that part of a pupa-case inclosing the prothorax.

Prothorax (*pro-tho'-raks*) [πρό, before; θώραξ, breast]. In biology, the most anterior of the three thoracic somites of an insect.

Prothrorubin (*pro-thro-ru'-bin*). One of the bodies which influence the breaking up of cystin and favor coagulation of the blood. (Schmidt.)

Prothyalosoma (*pro-thi-al-o-so'-mah*) [πρῶτος, first; ὕαλος, glass; σῶμα, body: *pl.*, *Prothyalosomata*]. The name proposed by van Beneden (1883) for the envelop of the nucleolus of an ovum.

Prothyalosomal (*pro-thi-al-o-so'-mal*) [πρῶτος, first; ὕαλος, glass; σῶμα, body]. Pertaining to the prothyalosoma.

Protiodid (*prōt-i'-o-did*) [πρῶτος, first; ἰώδης, like a violet]. One of a series of salts in which the metal or radicle fixes, relatively, the smallest proportion of iodin, *e. g.*, Protiodid of Mercury, $Hg_2 I_2$, in contradistinction to the biniodid, $Hg I_2$.

Protist (*pro'-tist*) [*protiston*; πρώτιστος, the very first]. Any unicellular organism. Any protophyte, or protozoön; a microörganism.

Protista (*pro-tis'-tah*) [*pl.*, superlative of πρῶτος, first]. In biology, the name proposed by Hæckel (1868) for those lower organisms which are not readily referred to the plant or animal kingdom. See *Oözoa*.

Protmesis (*prot-me'-sis*). Synonym of *Umbilicus*.

Proto- (*pro'-to-*) [πρῶτος, first]. A prefix signifying *first*.

Protoalbumose (*pro-to-al'-bu-mōz*). See *Albumose*.

Protoblast (*pro'-to-blast*) [πρῶτος, first; βλαστός, germ]. 1. A cell without a distinct cell-wall. 2. The nucleus of the ovum. (Villot.)

Protoblastic (*pro-to-blas'-tik*) [πρῶτος, first; βλαστός, germ]. See *Holoblastic*.

Protocaseose (*pro-to-ka'-se-ōz*) [πρῶτος, first; *caseum*, cheese]. The first product of the digestion of casein.

Protocatechuic Acid (*pro-to-kat-e-chu'-ik*) [πρῶτος, first; *catechu*]. Dioxy-benzoic acid. See *Acid*. It sometimes occurs in urine. **P. aldehyd.** See *Aldehyd*.

Protocercal (*pro-to-ser'-kal*) [πρῶτος, first; κέρκος, tail]. In biology, having a tail-fin of primitive type

Protocere (*pro'-to-sēr*) [πρῶτος, first; κέρας, horn]. In biology, the rudimentary antler of a deer.

Protocerebral (*pro-to-ser'-e-bral*) [πρῶτος, first; *cerebrum*, cerebrum]. Pertaining to the protocerebrum.

Protocerebrum (*pro-to-ser'-e-brum*) [πρῶτος, first; *cerebrum*, cerebrum]. The embryonic rudiment or vesicle from which the cerebrum is evolved.

Protochlorid (*pro-to-klo'-rid*) [πρῶτος, first; χλωρος, green]. One of a series of salts in which the metal or radicle fixes, relatively, the smallest amount of chlorin, *e. g.*, the Protochlorid of Mercury, Hg_2Cl_2.

Protococcus (*pro-to-kok'-us*) [πρῶτος, first; κόκκος, berry]. A genus of unicellular algæ.

Proto-compound (*pro-to-kom'-pownd*) [πρῶτος, first; ME., *compounen*, to mix or compound]. A salt in which the metal or radicle fixes, relatively, the smallest proportion of the acid element. See *Protiodid* and *Protochlorid*.

Proto-conch (*pro'-to-kongk*) [πρῶτος, first; κόγχη, a mussel, shell]. In biology, the primitive type of shell in an ammonoid cephalopod.

Protoconchal (*pro-to-kong'-kal*) [πρῶτος, first; κόγχη, a mussel]. Pertaining to the protoconch.

Protocone (*pro'-to-kōn*) [πρῶτος, first (πρό, before, anterior); κῶνος, cone]. In biology, the anterior, internal cusp of an upper molar.

Protoconid (*pro-to-ko'-nid*) [πρῶτος, first (πρό, before, anterior); κῶνος, cone]. In biology, the anterior internal cusp of a lower molar.

Protoconule (*pro-to-kon'-ūl*) [πρῶτος, first (πρό, before, anterior; κῶνος, cone]. In biology, the anterior intermediate cusp of an upper molar.

Protodont (*pro'-to-dont*) [πρῶτος, first; ὀδούς, tooth]. A simple molar tooth in which the cusps are not well defined.

Proto-elastin (*pro-to-e-las'-tin*) [πρωτος, first; *elastin*]. A chemic substance obtained by Frenzel from the cuticula of gregarinæ.

Proto-elastose (*pro-to-e-las'-tōz*) [πρῶτος, first; ἐλαύνειν, to urge forward]. *Hemi-elastin*; one of the products of digestion of elastin. It is precipitable by saturation with sodium chlorid.

Protogala (*pro-tog'-al-ah*). Synonym of *Colostrum*.

Protogaster (*pro-to-gas'-ter*) [πρῶτος, first; γαστήρ, stomach]. In biology, the primitive intestinal cavity of a gastrula or two-layered germ.

Protogastric (*pro-to-gas'-trik*) [πρῶτος, first; γαστήρ, belly]. Pertaining to the protogaster.

Protogenal (*pro-toj'-en al*) [πρώτος, first; γενής, produced]. Primitive; original; first-born.

Protogenesis (*pro-to-jen'-es-is*) [πρῶτος, first; γένεσις, generation]. See *Abiogenesis*.

Protogenetic (*pro-to-jen-et'-ik*) [πρώτος, first; γένεσις, genesis]. Pertaining to protogenesis.

Protogenic (*pro-to-jen'-ik*) [πρῶτος, first; γενής, produced]. In biology, applied to intercellular spaces formed at the time the tissues are beginning to differentiate.

Protoglobulose (*pro-to-glob'-u-lōz*) [πρώτος, first; *globulus*, a ball]. One of the primary products of the digestion of globulin.

Protogynous (*pro-toj'-in-us*) [πρῶτος, first; γυνή, female]. Pertaining to protogyny.

Protogyny (*pro-toj'-in-e*) [πρῶτος, first; γυνή, female]. See *Proterogyny*.

Protohemoblast (*pro-to-hem'-o-blast*) [πρῶτος, first; αἷμα, blood; βλαστος, sprout]. The hemoglobin cell.

Protoiodid (*pro-to-i'-o-did*). Synonym of *Protiodid*.

Protokollagen (*pro-to-kol'-aj-en*) [πρωτος, first; κολλα, glue; γεννᾶν, to produce]. A substance isolated by Frenzel from gregarinæ. Cf. *Proto-elastin*.

Protoleucyte (*pro-to-lu'-sit*) [πρῶτος, first; λευκός, white; κύτος, a cell]. In biology, the name given by Salensky to the formative portion of the ovum, in which the finely granular protoplasm predominates, as distinguished from the *deutoleucyte*, in which the vitelline granules are most abundant.

Protoleukocyte (*pro-to-lu'-ko-sit*) [πρῶτος, first; λευκός, white; κύτος, cell]. One of the minute lymphoid cells found in the red bone-marrow and also in the spleen.

Protomala (*pro-to-ma'-lah*) [πρῶτος, first; *mala*, mandible: *pl.*, *Protomalæ*]. See *Promala*.

Protomalal (*pro-to-ma'-lal*) [πρῶτος, first; *mala*, mandible]. Pertaining to the protomala.

Protomeristem (*pro-to-mer'-is-tem*) [πρῶτος, first; μέρος, a part]. See *Meristem, Primary*.

Protomerite (*pro-tom'-er-it*) [πρῶτος, first; μέρος, a part]. In biology, the anterior of the two cells of a septate gregarine, as distinguished from the posterior cell, the *deutomerite* (*q. v.*). If it bear a proboscis, or *epimerite*, the organism is spoken of as *Cephalont*.

Protomeritic (*pro-to-mer-it'-ik*) [πρῶτος, first; μέρος, a part]. Pertaining to a protomerite.

Protomorphic (*pro-to-mor'-fik*) [πρῶτος, first; μορφή, form]. In biology, of a primitive or original form or structure.

Protomyosinose (*pro-to-mi-os'-in-ōz*) [πρῶτος, first; μῦς, muscle]. A primary product of the digestion of myosin.

Proton (*pro'-ton*) [πρώτος, first]. A term suggested by Wilder to designate the primitive, undifferentiated mass or rudiment of a part. It is the equivalent of the words *Anlage* and *fundament* as employed by Minot and Mark respectively.

Protonema (*pro-to-ne'-mah*) [πρῶτος, first; νῆμα, a thread]. In biology, a colorless, confervoid or filamentous structure produced from the germinating spore and forming one stage in the life-history of a moss. Upon it the leafy plant containing chlorophyl arises as a lateral shoot. Cf. *Prothallium*.

Protonemal (*pro-to-ne'-mal*) [πρῶτος, first; νῆμα, a thread]. Pertaining to the protonema.

Protonematoid (*pro-to-ne'-mat-oid*) [πρῶτος, first; νῆμα, a thread; εἶδος, like]. In biology, resembling a protonema.

Protoneme (*pro'-to-nēm*). Same as *Protonema*.

Protonephric (*pro-to-nef'-rik*) [πρῶτος, first; νεφρός, kidney]. Pertaining to the protonephron.

Protonephrium (*pro-to-nef'-re-um*). Synonym of *Protonephron*.

Protonephron (*pro-to-nef'-ron*) [πρῶτος, first; νεφρός, kidney]. The pronephron, metanephron, and mesonephron taken together; the Wolffian body in its largest extent; the primitive or embryonic kidney. Cf. *Pronephron, Mesonephron, Metanephron, Okenian Body, Wolffian Body*.

Protonucleate (*pro-to-nu'-kle-āt*) [πρῶτος, first; *nucleus*, nucleus]. Exhibiting the first signs of nucleation.

Proto-organism (*pro-to-or'-gan-izm*) [πρῶτος, first; ὄργανον, organ]. A microörganism; a protozoan or protophyte; a protist.

Protopathia (*pro-to-path'-e-ah*). See *Protopathy*.

Protopathic (*pro-to-path'-ik*) [πρῶτος, first; πάθος, disease]. Primary; relating to the first lesion. Opposed to deuteropathic.

Protopathy (*pro-top'-ath-e*) [πρῶτος, first; πάθος, disease]. A primary disease.

Protopepsia (*pro-to-pep'-se-ah*) [πρῶτος, first; πέπτειν, to cook]. A primary process of digestion, as that of starches by the saliva.

Protophloëm (*pro-to-flo'-em*) [πρῶτος, first; φλοιός, bark]. See *Prophloëm*.

Protophyte (*pro'-to-fit*) [πρῶτος, first; φυτόν, plant]. Any plant of the lowest and most primitive type. The *Schizomycetes*, or bacteria (*q. v.*), may be classed as protophytes, with other low vegetable forms. The protophytes have no visible reproductive organs.

Protophytic (*pro-to-fit'-ik*) [πρῶτος, first; φυτόν, plant]. Pertaining to a protophyte.

Protopin (*pro'-to-pin*) [πρῶτος, first; ὄπιον, opium], $C_{20}H_{19}NO_5$. An alkaloid obtained from opium.

Protoplasis (*pro-to-pla'-sis*) [πρῶτος, first; πλάσσειν, to form]. The primary formation of tissue.

Protoplasm (*pro'-to-plazm*) [πρῶτος, first; πλάσμα, anything formed or molded]. In biology, the slimy material constituting the substance of living plant and animal cells, the chemic and physical properties of which underlie all the vital functions of nutrition, secretion, growth, reproduction, irritability, motility, etc. The word is not now applied to a definite compound, but rather to the physical appearance always found in living cells; the actual chemic composition varying from cell to cell, from organism to organism, from moment to moment. Underlying all this diversity there seems to be one definite chemic basal substance—*proteïl*—a complex molecule derived from various aldehyds, glycols, and ketones, in combination with a number of chemic substances, some of them on the way up to the highest point, some on the downward path. Hugo von Mohl was the first to employ the word protoplasm (1846) in his description of the substance which is essential to the formation and development of plant-cells. Max Schultze (1861) demonstrated the identity of this with the essential substance of animal cells, called *Sarcode* by Dujardin (1835), an identity which had been suggested by Schwann as early as 1839, and by Cohn in 1850. When highly magnified the protoplasm of most cells appears as a network (*spongioplasm, reticulum*), containing a more fluid substance (*hyaloplasm*, or *enchylema*) in its meshes. **P., Mother.** Synonym of *Germ-plasm*.

Protoplasma (*pro-to-plaz'-mah*) [πρῶτος, first; πλάσμα, anything molded]. See *Protoplasm*.

Protoplasmal (*pro-to-plaz'-mal*). Same as *Protoplasmic*.

Protoplasmatic (*pro-to-plaz-mat'-ik*). Synonym of *Protoplasmic*.

Protoplasmic (*pro-to-plaz'-mik*) [πρῶτος, first; πλάσσειν, to mold]. Pertaining to protoplasm.

Protoplast (*pro'-to-plast*) [πρῶτος, first; πλαστός, formed, molded]. In biology: (*a*) The entire unspecialized organic cell. See under *Heredity*. (*b*) The primitive type, or original, of some organic being.

Protoplastic (*pro-to-plas'-tik*) [πρῶτος, first; πλάσσειν, to form]. Synonym of *Protoplasmic*. Applied also to a solution for determining the influence of the blood-plaques upon the coagulation of blood. **P. Liquid, Schmidt's**; its preparation is as follows: One part of blood is allowed to flow into 3 parts of a 28 per cent. watery solution of magnesium sulphate at 0° C. This is well stirred and allowed to stand until sedimentation of the corpuscular elements has taken place. The supernatant liquid is then drawn off and filtered at 0° C.

Protopodial (*pro-to-po'-de-al*) [πρῶτος, first; ποῦς, food]. Pertaining to a protopodium.

Protopodite (*pro-top'-o-dit*) [πρῶτος, first; πόυς, foot]. In biology, the shaft or stem of a biramose limb of a crustacean, as distinguished from the inner branch

(*endopodite*) and the outer branch (*exopodite*); or a third division added in appendages concerned in respiration (*epipodite*).

Protopoditic (*pro-to-po-dit'-ik*) [πρῶτος, first; πούς, foot]. Pertaining to a protopodite.

Protopodium (*pro-to-po'-de-um*) [πρῶτος, first; πούς, foot: *pl.*, *Protopodia*]. In biology, the primitive or typical podium or foot of a mollusc.

Protoproteose (*pro-to-pro'-te-ōz*) [πρῶτος, first; *proteose*]. A white powder, readily soluble in water, yielding a slightly turbid fluid.

Protopsyche (*pro-to-si'-ke*) [πρῶτος, first; ψυχή, soul]. In biology, Hæckel's term for the fore-brain. Cf. *Psyche*.

Protopterous (*pro-top'-ter-us*) [πρῶτος, first; πτερόν, wing]. In biology, having a simple or primitive type of limb.

Protopterygium (*pro-to-ter-ij'-e-um*) [πρῶτος, first; πτέρυξ, fin]. In biology; the anterior osseous piece joining the pectoral fin of fishes to the pectoral arch.

Protoquinamicin (*pro-to-kwin-am'-is-in*) [πρῶτος, first; Sp., *quina*, bark; *amin*], $C_{17}H_{20}N_2O_2$. A substance which is obtained when quinamin sulphate is heated to 120° C.

Protosalt (*pro'-to-sawlt*) [πρῶτος, first; ME., *salt*, salt]. In chemistry, that one of two or more compounds of a metal with an acid which contains relatively the least quantity of metal.

Protosoma (*pro-to-so'-mah*) πρῶτος, fish; σῶμα, body]. In embryology, a large oval spot in the center of the transparent area of the blastoderm, and representing the primitive stage in the development of the embryo.

Protosomite (*pro-to-so'-mīt*) [πρῶτος, first; σῶμα, body]. In biology, a rudimentary somite or segment in a worm or arthropod.

Protosomitic (*pro-to-so-mit'-ik*) [πρῶτος, first; σῶμα, body]. Primitively segmented; pertaining to a protosomite.

Protospasm (*pro'-to-spazm*) πρῶτος, first; σπαρμός, spasm]. A spasm beginning in one limb and extending to the other on the same side, to the head, or to the entire half of the body. It may become general.

Protospermatoblast (*pro-to-sper'-mat-o-blast*) [πρῶτος, first; σπέρμα, seed; βλαστός, bud, sprout, shoot]. In biology, one of the "small cells," or "parent cells" (*Samenstammzellen*, *Stammzellen*, of German writers), forming part of the layer of cells next the tunica propria of the seminiferous tubules and from which arise the spermatoblast, and finally spermatozoa.

Protospore (*pro'-to-spōr*) [πρῶτος, first; σπόρος, seed]. A primary spore or seed from which a prothallus or similar body is developed.

Protostoma (*pro-tos'-to-mah*) [πρῶτος, first; στόμα, mouth: *pl.*, *Protostomata*]. In biology, the primitive opening of the gastrula-sac, formed by the invagination of the blastula. It is also termed the *Anus of Rusconi*.

Protosulphate (*pro-to-sul'-fāt*) [πρῶτος, first; *sulphur*, sulphur]. The one of a series of sulphates which contains relatively the smallest amount of sulphuric acid.

Prototergite (*pro-to-ter'-jīt*) [πρῶτος, first; *tergum*, back]. In biology, the first dorsal segment of the abdomen of insects.

Protothallus (*pro-to-thal'-us*) [πρῶτος, first; θαλλός, a young shoot: *pl.*, *Protothalli*]. In biology: (*a*) Same as *Prothallium*. (*b*) Same as *Hypothallus*.

Protothorax (*pro-to-thō'-raks*) [πρῶτος, first; θώραξ, thorax]. Same as *Prothorax*.

Prototypal (*pro-to-tī'-pal*) [πρῶτος, first; τύπος, type]. Pertaining to a prototype.

Prototype (*pro'-to-tīp*) [πρῶτος, first; τύπος, type]. A model after which something is copied.

Prototypembryo (*pro-to-tip-em'-bre-o*) [πρῶτος, first; τύπος, type; ἔμβρυον, embryo]. A late stage of the embryo which exhibits the essential characters of the group to which it belongs.

Protoveratrin (*pro-to-ver-at'-rin*) [πρῶτος, first; *veratrum*, hellebore], $C_{32}H_{51}NO_{11}$. A very poisonous alkaloid derived from veratrin.

Protovertebræ (*pro-to-ver'-te-bre*) [πρῶτος, first; *vertebra*, vertebra]. A bastard word applied to any one of the few pairs of small, dark bodies, separated by lighter interspaces, on either side of the dorsal axis of the embryo. They were formerly thought to be the primitive vertebræ, but are now recognized as muscle-plates or myotomes. They are of mesoblastic origin. See *Segment, Primitive*.

Protovertebral (*pro-to-ver'-te-bral*) [πσῶτος, first; *vertebra*, vertebra]. Pertaining to the protovertebræ.

P. Somites. See *Protovertebræ*.

Protovum (*pro-to'-vum*) [πρῶτος, first; ᾠόν, egg: *pl.*, *Protova*]. In biology, an ovum or ovule at its most primitive stage.

Protoxid (*pro-toks'-id*) [πρώτος, first; ὀξύς, sharp]. The one of a series of oxids of a metal or radicle which contains relatively the smallest proportion of oxygen.

Protoxylem (*pro-to-zi'-lem*) [πρῶτος, first; ξύλον, wood]. In biology, the first-formed elements of the xylem of a bundle.

Protozoa (*pro-to-zo'-ah*) [πρῶτος, first; ζῷον, animal]. The lowest class of the animal kingdom, comprising organisms which consist of simple cells or colonies of cells, and which possess no nervous system, and no circulatory organs. Within recent years the study of the lower forms of animal life in relation to disease has been diligently pursued, and evidence is constantly accumulating in favor of the view that certain diseases of animals and of man are produced by protozoa. For the parasitic protozoa of man and domestic animals see the following genera under *Parasites* (*Animal*), *Table of*:—*Amœba*, *Balantidium*, *Balbiania*, *Bodo*, *Bütschlia*, *Cercomonas*, *Coccidium*, *Cystomonas*, *Cytospermium*, *Dasytricha*, *Diplodinium*, *Eimeria*, *Entodinium*, *Globidium*, *Gregarina*, *Hæmoplasmodium*, *Herpetomonas*, *Heteromita*, *Megastoma*, *Microsporidia*, *Miescheria*, *Monas*, *Monocercomonas*, *Ophryoscolex*, *Polimitus*, *Rhophalocephalus*, *Sarcocystis*, *Trichomonas*, *Trypanosoma*.

Protozoal, Protozoan (*pro-to-zo'-al*, *pro-to-zo'-an*) [πρῶτος, first; ζῷον, animal]. First, lowest, primitive.

Protozoön (*pro-to-zo'-on*) [πρῶτος, first; ζῷον, animal]. One of the *Protozoa*.

Protractile (*pro-trak'-til*) [*pro*, before; *trahere*, to draw]. Capable of being protruded or thrust out.

Protraction (*pro-trak'-shun*) [*pro*, before; *trahere*, to draw]. Extraction, as of foreign bodies from wounds.

Protractor (*pro-trak'-tor*) [*pro*, before; *trahere*, to draw]. 1. A surgical instrument used for drawing extraneous bodies from wounds. 2. A mathematic instrument employed in measuring angles and recording them on paper. 3. A muscle that draws forward.

Protrahens (*pro-trah'-enz*) [L.]. A drawing forward.

P. auriculæ, a muscle drawing the pinna forward. It is known, also, as the *Attrahens aurem*. See *Muscles, Table of*.

P. lentis, the ciliary muscle of the eye.

Protrude (*pro-trūd'*) [*protrudere*, to thrust forward]. To thrust forward or to be thrust forward.

Protrusile (*pro-tru'-zil*). Synonym of *Protractile*.

Protrusio (*pro-tru'-ze-o*) [L.]. Synonym of *Protrusion*.

P. enorbitalis, protrusion of the orbit and the eye.

P. exorbitalis, P. oculi. Synonym of *Exophthalmos*.

Protrusion (*pro-tru'-zhun*) [*protrudere*, to thrust forward]. The act of thrusting forward; also the state of being thrust forward.

Protrusor (*pro-tru'-zor*) [*protrudere*, to thrust forward]. Anything protruded, or which protrudes. **P. labii inferioris,** the corrugator muscle of the lower lip. **P. linguæ.** Synonym of *Genio-glossus*. See *Muscles, Table of.*

Protuberance (*pro-tu'-ber-ans*) [*protuberantia; pro*, forward; *tuber*, a swelling]. A knob-like projecting part. **P., Annular.** Synonym of *Pons varolii*. **P., Cerebral:** 1. Synonym of *Pons varolii*. 2. The prominence formed by the upper or anterior of the cerebral flexures of the embryo. **P., External Occipital,** the central prominence on the outer surface of the flat portion of the occipital bone. **P., Frontal:** 1. The prominence of the frontal bone. 2. The prominence formed by the lower of the two flexures of the cephalic end of the embryo. **P., Inferior Maxillary,** in the embryo, a prominence formed on each side by a division of the first pharyngeal arch, and representing the rudiments of the lower jaw. **P., Internal Occipital,** a slight central prominence on the inner surface of the tabular portion of the occipital bone. **P., Lateral Frontal,** an elevation on either side of the frontal prominence of the embryo. **P., Mental.** A synonym of *Prominence, Mental*. **P., Natiform,** the nates of the corpora quadrigemina. **P., Occipital.** See *P., External Occipital*, and *P., Internal Occipital*. **P., Parietal,** the eminence of the parietal bone, situated near the sagittal suture. **P., Superior Maxillary,** a prominence formed on each side of the embryo by a division of the first pharyngeal arch.

Protuberantia (*pro-tu-ber-an'-she-ah*) [L.]. Synonym of *Protuberance*. **P. basilaris, P. cerebralis.** Synonyms of *Pons*. **P. laryngea.** Synonym of *Pomum adami*. **P. scleralis,** a small prominence of the sclera posteriorly, below the entrance of the optic nerve.

Protuberate (*pro-tu'-ber-āt*) [*protuberare*, to swell out]. To swell, or become prominent, as the navel.

Protureter (*pro-tu-re'-ter*) [πρῶτος, first; οὐρον, urine]. A primitive ureter, or excretory duct of a protonephron.

Protyle (*pro-til'-le*) [πρῶτος, first; ὕλη, matter]. 1. In biology, the hpyothetic primal substance from which all living matter is supposed to be derived; also called *biod, biogen, zoëther, psychoplasm*. 2. Synonym of *Methyl*.

Protylic (*pro-til'-ik*) [πρῶτος, first; ὕλη, matter]. Pertaining to or derived from protyl.

Proud Flesh. A popular term for the sprouting of an inflamed area; granulations. Also, any fungous growth.

Provan's Paste. A paste used in the treatment of eczema. Its formula is: Tragacanth and glycerin, each 4 drams; sodium borate, ½ dram; distilled water, a sufficient quantity. Apply during the day and wash off at night.

Proventricular (*pro-ven-trik'-u-lar*) [*pro*, before; *ventriculus*, dim. of *venter*, stomach]. Pertaining to the proventriculus.

Proventriculus (*pro-ven-trik'-u-lus*) [*pro*, before; *ventriculus*, dim. of *venter*, stomach: *pl.*, *Proventriculi*]. In biology: (*a*) the glandular or true stomach of birds, between the crop and the gizzard; (*b*) the first stomach of an insect.

Proximad (*proks'-im-ad*) [*proximus*, nearest]. Toward the proximal end or point of attachment.

Proximal (*proks'-im-al*) [*proximus*, next to]. Situated at or nearest to the attached extremity of an appendage: thus, the proximal end of the arm is at the shoulder. Proximal is also made to include *central*, *q. v.*, by some writers. See the opposite, *Distal*; also *Position and Direction, Table of*. **P. Clot.** See *Clot*.

Proximate (*proks'-im-āt*) [*proximus*, nearest]. Next; immediate. **P. Cause,** the immediate cause of any change. **P. Principle,** "any substance, whether simple or compound, chemically speaking, which exists under its own form, in the animal solid or fluid, and which can be extracted by means which do not alter or destroy its chemical properties." (Dalton.)

Proximen (*proks'-im-en*) [*proximus*, nearest]. Belonging to the proximal aspect in itself.

Pruinescence (*pru-in-es'-ens*) [*pruina*, hoar-frost]. In biology, the condition of being pruinose.

Pruinose, Pruinous (*pru'-in-ōs, pru'-in-us*) [*pruina*, hoar-frost]. In biology, applied to leaves or other organs that appear as if covered with hoar-frost.

Prune (*prūn*) [*prunum*, a plum]. See *Prunum* and *Pigments, Conspectus of*. **P.-juice Expectoration,** a peculiar blood-containing sputum, of a dark purple color, resembling prune-juice. It is met with in low forms of croupous pneumonia, in gangrene and in carcinoma of the lung.

Prunella (*pru-nel'-ah*) [L., a disorder of the throat]. 1. Sore-throat. 2. Thrush. 3. Angina pectoris.

Pruniform (*pru'-nif-orm*) [*prunum*, a plum; *forma*, form]. Plum-shaped; having the appearance of a plum.

Prunin (*prūn'-in*) [*prunus*, plum-tree]. A solid substance, prepared by evaporating the tincture and powdering the extract of *Prunus virginiana*. It is pale-brown in color, and has a characteristic odor. It is stimulant and expectorant. Dose 1 to 5 grains.

Prunum (*pru'-num*) [L.]. Prune. The fruit of *P. domestica*, native to W. Asia. It is laxative and nutritious. Dose indefinite.

Prunus (*pru'-nus*) [L.]. A genus of rosaceous trees. **P. virginiana.** Wild cherry. In *pharmacy*, the bark of *Prunus serotina*. It contains amygdalin, tannic acid, emulsin, and a bitter extractive. Amygdalin in watery solution with emulsin is decomposed into hydrocyanic acid and a volatile oil. Wild cherry is aromatic and feebly tonic; it is largely used in pulmonary tuberculosis to quiet the cough and to calm the nervous system; also in coughs of bronchitis. It is an ingredient of various proprietary cough-mixtures. Dose of the bark ʒss–j; of the fld. ext. ʒss–j; of a 4 per cent. infusion ℥ss–ij; of a 12 per cent. syrup ʒj–iv. **P. virginiana** (true). See *Choke Cherry*.

Prurient (*pru'-re-ent*) [*prurire*, to itch]. Itching; sensual.

Pruriginous (*pru-rij'-in-us*) [*prurire*, to itch]. Pertaining to or like prurigo.

Prurigo (*pru-ri'-go*) [*prurire*, to itch]. 1. A chronic inflammatory skin-disease developing in childhood, and characterized by an eruption of pale, discrete papules, attended with severe itching. The papules are at first of the size of hempseed, more easily felt than seen, but soon become darker and covered by crusts of blood or serum, due to scratching. The usual sites are the extensor surfaces of the limbs. 2. Pruritus, *q. v.* **P. adolescentium.** Synonym of *P. æstivalis*. **P. æstivalis,** *summer prurigo;* a form of relapsing bullous eruption allied to the vesicular erythemata, and occurring in summer only. **P. agria,** a very severe form of prurigo. **P. ferox,** a severe type of prurigo. **P. mitis,** a mild type of prurigo. **P. partialis,** prurigo limited to a part of the body. **P. pediculosis,** pruritus due to pediculosis.

Pruritic (*pru-rit'-ik*) [*prurire*, to itch]. Itching.

Pruritus (*pru-ri'-tus*) [*prurire*, to itch]. An important neurosis of the skin, characterized by the

single symptom of itching, occurring either over the entire cutaneous surface, or limited to certain regions. The itching may be more or less constant, but is likely to occur in paroxysms, and is usually worse at night. It is not dependent upon any primary structural lesion of the skin, but excoriations and thickening result from the scratching. **P. analis, P. ani,** itching around the anus. **P. consensualis,** eczema the result of disturbances of internal organs. **P. flavescens.** Synonym of *Eczema impetiginosum.* **P. hidroa.** Synonym of *Miliaria.* **P. hiemalis,** a form following exposure to cold, or existing only in winter, especially in dry climates. **P. localis,** pruritus limited to a part of the body. **P. opii,** the itching that sometimes supervenes upon the administration of opium. **P. porcellanea.** Synonym of *Urticaria.* **P. senilis,** the pruritus of the aged, often due to degenerative changes in the skin. **P. universalis,** general itching of the surface of the body. **P. vulvæ,** itching around the vulva. This, it should not be forgotten, is sometimes due to diabetes.

Prussak's Chamber. Same as *P.'s Space.* **P.'s Fibers,** two short, tightly-stretched striæ extending from the tip of the short process of the malleus to the notch of Rivinus. **P.'s Space,** a small space lying above the short process of the malleus, and bounded externally by Shrapnell's membrane.

Prussian (*prush'-an*) [*Prussia*, Prussia]. Of, or pertaining to, Prussia. **P. Blue,** the ferrocyanid of iron, largely used in the arts as a dye and pigment; it was formerly used as a febrifuge, tonic, alterative, and antiepileptic. Dose gr. iij–v. Unof. See *Pigments, Conspectus of.* **P. Brown, P. Green.** See *Pigments, Conspectus of.* **P. Red.** Same as *Venetian Red.*

Prussiate (*prus'-e-āt*) [*Prussia*, Prussia]. A salt of prussic, or hydrocyanic acid.

Prussic (*prus'-ik*) [*Prussia*, Prussia]. Pertaining to Prussian blue. **P. Acid.** See *Acid, Hydrocyanic.*

Prussine (*prus'-in*). Synonym of *Cyanogen.*

Psalidium (*sal-id'-e-um*). Synonym of *Psalis.*

Psalidoma (*sal-id-o'-mah*) [ψαλίδωμα, arch]. The ental surface of the skull.

Psalis (*sa'-lis*) [ψαλίς, arch]. The fornix of the cerebrum.

Psalistoma (*sal-is'-to-mah*) [ψαλίς, scissors; στόμα, mouth]. In biology, the cutting margin of the mandible of an arthropod. (Bate.)

Psalloid (*sal'-oid*) [ψάλλειν, to play on a stringed instrument; εἶδος, form]. Lyriform; resembling the lyra of the brain.

Psaloid (*sa'-loid*) [ψαλίς, an arch; εἶδος, like]. Resembling an arch.

Psalterial (*sawl-te'-re-al*) [ψαλτήριον, a psaltery]. Resembling a psalterium.

Psalterium (*sawl-te'-re-um*) [ψαλτήριον, a psaltery: *pl.*, *Psalteria*]. 1. Synonym of the *Lyra.* 2. A group of longitudinal fibers on the floor of the Sylvian aqueduct. (Bergmann.) 3. In biology, the third compartment of the complicated stomach of the *Pecora* or true ruminants. It is globular in form and its lining membrane is raised into longitudinal folds or laminæ, arranged very much like the leaves of a book and very close together. It is also called *Manyplies.*

Psammism (*sam'-izm*) [ψάμμος, sand]. 1. The use of the sand-bath; ammism. 2. The passage of gravel in the urine.

Psammocarcinoma (*sam-o-kar-sin-o'-mah*) [ψάμμος, sand; καρκίνωμα, carcinoma]. A carcinoma containing a calcareous deposit.

Psammoma (*sam-o'-mah*) [ψάμμος, sand; ὄμα, tumor]. A meningeal tumor containing sand-like material. It is classed among the sarcomata.

Psammotherapy (*sam-o-ther'-ap-e*) [ψάμμος, sand; θεραπεία, treatment]. Ammotherapy; the therapeutic use of the sand-bath.

Psammous (*sam'-us*) [ψάμμος, sand]. Sandy; sabulous.

Psapharous (*saf'-ar-us*) [ψαφαρός]. Friable; gritty.

Psathyrous (*sath'-ir-us*). Synonym of *Psapharous.*

Pselaphesis (*sel-af-e'-sis*) [ψηλάφησις, touch]. 1. The act of groping with the fingers, seen in the low delirium of fevers; carphology. 2. Tickling, or ticklishness.

Pselaphia (*sel-a'-fe-ah*) [ψηλαφία, touch]. 1. Digital examination or exploration. 2. The same as *Pselaphesis.*

Pselaphotheca (*sel-af-o-the'-kah*) [ψηλαφᾶν, to feel about; θήκη, a box, chest: *pl.*, *Pselaphothecæ*]. In biology, the case or covering of the rudimentary palpi in many butterfly pupæ.

Psellism, Psellismus (*sel'-izm, sel-iz'-mus*) [ψελλισμός]. 1. Stuttering or stammering. 2. Defect of speech due to hare-lip, or to cleft palate.

Pseud- (*sūd-*). Same as *Pseudo-.*

Pseudacetic Acid (*sūd-as-e'-tik*). Synonym of *Propionic Acid.*

Pseudaconin (*su-dak'-o-nin*) [ψευδής, false; ἀκόνιτον, aconite], $C_{27}H_{41}NO_9$. A decomposition-product of pseudaconitin.

Pseudaconitin (*su-dak-on'-it-in*) [ψευδής, false; ἀκόνιτον, aconite], $C_{36}H_{49}NO_{12}$. An extremely poisonous alkaloid from *aconitum ferox.* Unof.

Pseudacousma (*su-dak-oōz'-mah*) [ψευδής, false; ἄκουσμα, a thing heard]. False hearing; a pathologic condition in which sounds are heard altered in pitch and quality.

Pseudacusis (*su-dak-u'-sis*) [ψευδής, false; ἀκουσμεν, to hear]. Synonym of *Pseudacousma.*

Pseudæsthesia (*su-des-the'-ze-ah*). See *Pseudesthesia.*

Pseudallosematic (*su-dal-o-se-mat'-ik*) [ψευδής, false; ἄλλος, some other; σῆμα, a sign, mark, token]. In biology, the displaying of a sign belonging to or characteristic of another. Applied by Poulton to the mimetic colors assumed by comparatively defenceless animals by means of which they imitate foreign objects associated with some well-defined and aggressive species. Thus the leaf-carrying ants of South America (*Œcodoma*), are mimicked by an immature homopterous insect possessing a shape and color closely resembling the ant, together with the leaf carried by it. Cf. *Mimicry, Pseudaposematic, Pseudepisematic, Pseudosematic.*

Pseudambulacral (*su-dam-bu-la'-kral*) [ψευδής, false; *ambulacrum*, a walk]. In biology, simulating an ambulacra.

Pseudamnesia (*su-dam-ne'-ze-ah*) [ψευδής, false; ἀμνησία, forgetfulness]. 1. Spurious amnesia; a condition resembling amnesia, but of a transient character. 2. An erroneous form of the word *Pseudomnesia, q. v.*

Pseudangeiosis (*su-dan-je-o'-sis*) [ψευδής, false; ἀγγεῖον, vessel; νόσος, disease]. The development of blood-vessels in adventitious tissue.

Pseudankylosis (*su-dank-il-o'-sis*) [ψευδής, false; ἀγκύλωσις, ankylosis]. A false joint.

Pseudantitropy (*su-dan-tit'-ro-pe*) [ψευδής, false; ἀντί, against; τρέπειν, to turn]. In biology, Wilder's term for the apparently antitropic relation between parts which are opposed to each other, but lie upon the same side of an ideal plane. An example of *longitudinal* pseudantitropy is furnished by correspondin maxillary and mandibular teeth; of *lateral* pseudantitropy, by the mesal and lateral canthi of the eye.

Pseudaphe, Pseudaphia (*su-daf'-fe, su-daf'-fe-ah*) [ψευδής, false; ἁφή, touch]. Pseudesthesia.

Pseudaposematic (*su-dap-o-sem-at'-ik*) [ψευδής, false; ἀπο, away from; σῆμα, sign, mark, token]. In biology, the displaying of a false warning signal. Applied by Poulton to those cases of mimicry in which enemies are repelled by the deceptive suggestion of some unpleasant or dangerous quality; *e. g.*, both sexes of the India moth, *Epicopeia philenora*, mimic an unpalatable butterfly, *Papilio protenor*. See, also, *Mimicry*, *Pseudosematic*, *Pseudallosematic*, *Pseudepisematic*.

Pseudargomorphosis (*su-dar-go-mor-fo'-sis*) [ψευδής, false; ἀργός, white; μορφή, form]. The formation of a false membrane.

Pseudarthritis (*su-dar-thri'-tis*) [ψευδής, false; ἄρθρον, joint; ῖτις, inflammation]. Hysterical affection of a joint, simulating arthritis.

Pseudarthrosis (*su-dar-thro'-sis*) [ψευδής, false; ἄρθρον, a joint]. A false joint or articulation. **P., Diarthrodial**, one closely resembling a natural joint; it is usually seen in fractured long bones. **P., Ligamentous**, one in which the fragments are united by fibrous bands, as in fracture of the patella or olecranon.

Pseudasthma (*su-daz'-mah*). Synonym of *Dyspnea*.

Pseudaxis (*su-daks'-is*). See *Pseudoaxis*.

Pseudelminth (*su-del'-minth*) [ψευδής, false; ἕλμινθ, a worm]. Any worm-like object mistaken for an entoparasitic worm.

Pseudelytrum, Pseudelytron (*su-del'-it-rum, su-del'-it-tron*) [ψευδής, false; ἔλυτρον, a cover, sheath: *pl.*, *Pseudelytra*]. In biology, a false elytrum, or wing-cover.

Pseudembryo (*su-dem'-bre-o*) [ψευδής, false; ἔμβρυον, embryo]. A false embryo.

Pseudembryonic (*su-dem-bre-on'-ik*) [ψευδής, false; ἔμβρυον, embryo]. Pertaining to a pseudembryo.

Pseudemesis (*su-dem'-es-is*) [ψευδής, false; ἔμεσις, vomiting]. Pretended vomiting.

Pseudencephalia (*su-den-sef-a'-le-ah*). See *Pseudencephalus*.

Pseudencephalus (*su-den-sef'-al-us*) [ψευδής, false; ἐγκέφαλος, brain]. A species of single autositic monsters characterized by a partial development of the frontal, parietal, and occipital bones, while the brain is represented by a bunch of membranes, blood-vessels, connective and possibly nervous tissue, at the base of the skull.

Pseudepiploic (*su-dep-ip-lo'-ik*) [ψευδής, false; ἐπίπλοον, caul]. Pertaining to the pseudepiploön.

Pseudepiploön (*su-dep-ip'-lo-on*) [ψευδής, false; ἐπίπλοον, caul]. A false omentum found in birds.

Pseudepisematic (*su-dep-is-em-at'-ik*) [ψευδής, false; ἐπί, motion toward; σῆμα, a sign, mark, token]. In biology, the displaying of a lure or false safety-sign. Applied by Poulton to those cases of mimicry (*a*) in which an animal resembles another animal, and is so enabled to approach and injure it in some way, or (*b*) in which some lure is employed; thus, (1) the flies of the genus *Volucella* are enabled to lay their eggs in nests of bumble-bees by reason of their close resemblance to the latter; the larvæ of the fly feed on those of the bee; (2) the Asiatic lizard, *Phrynocephalus mystaceus*, possesses pink, flower-like structures at the corners of its mouth, by which flies are allured; or (3) the Terrapin, *Malacoclemmys temminckii* of the Southern States of America, when hungry, opens its mouth and moves about two filaments at the tip of its tongue; they look like worms moving in a crevice in the rock and therefore attract prey; the animal is otherwise perfectly motionless, and looks like a weed-covered rock.

Pseuderysipelas (*su-der-is-ip'-el-as*). Synonym of *Pseudo-erysipelas*.

Pseudesthesia (*su-des-the'-ze-ah*) [ψευδής, false; αἰσθησις, feeling]. A sensation without a corresponding object. Also, an imaginary sensation in parts of the body that have been removed by accident or surgical operation.

Pseudhæmal (*sūd-hem'-al*). Same as *Pseudohemal*.

Pseudhelminth (*sūd-hel'-minth*). Same as *Pseudelminth*.

Pseudiatrus (*su-de-at'-rus*). Synonym of *Quack*.

Pseudimaginal (*su-dim-aj'-in-al*) [ψευδής, false; *imago*, imago]. Pertaining to a pseudimago.

Pseudimago (*su-dim-a'-go*) [ψευδής, false; *imago*, imago]. In biology, a false imago.

Pseudinogenesis (*su-din-o-jen'-es-is*) [ψευδής, false; ἴς, fiber; γένεσις, generation]. An abnormal formation of fibers or tissues.

Pseudinoma (*su-din-o'-mah*). Synonym of *Scirrhus*.

Pseudo- (*su'-do-*) [ψευδής, false]. A prefix denoting *false*, *simulating*, *resembling*, or *seeming*.

Pseudo-acephalia (*su-do-as-ef-a'-le-ah*). Synonym of *Pseudencephalia*.

Pseudo-acetic Acid (*su-do-as-e'-tik*). Synonym of *Propionic Acid*.

Pseudo-aconitin (*su-do-ak-on'-it-in*). Synonym of *Pseudaconitin*.

Pseudo-actinomycosis (*su-do-ak-tin-o-mi-ko'-sis*) [ψευδής, false; ἀκτις, ray; μυκης, fungus]. A form of pulmonary tuberculosis in which the sputum contains granular bodies resembling the grains of actinomycosis. They consist of a crystalline substance similar to leucin.

Pseudo-albuminuria (*su-do-al-bu-min-u'-re-ah*) [ψευδής, false; *albumen*, albumin; οὖρον, urine]. False or physiologic albuminuria.

Pseudo-anemia (*su-do-an-e'-me-ah*). Synonym of *Anemia, Progressive Pernicious*.

Pseudo-angina (*su-do-an-ji'-nah*) [ψευδής, false; *angere*, to strangle]. Hysterical angina. See, also, *angina pectoris*.

Pseudo-angioma (*su-do-an-je-o'-mah*) [ψευδής, false; ἀγγεῖον, vessel; ὄμα, tumor]. The formation of a temporary angioma, as is sometimes seen in healing stumps. **P., Urethral**, urethral caruncle.

Pseudo-annulus (*su-do-an'-u-lus*) [ψευδής, false; *annulus*, a ring]. In biology, an apparent annulus.

Pseudo-apoplexy (*su-do-ap'-o-pleks-e*) [ψευδής, false; ἀποπληξία, apoplexy]. A diseased condition resembling apoplexy, but in which cerebral hemorrhage is not found, post-mortem.

Pseudo-aquatic (*su-do-a-kwat'-ik*) [ψευδής, false; *aqua*, water]. In biology, growing in moist places, but not strictly aquatic.

Pseudo-arthrosis (*su-do-ar-thro'-sis*). Synonym of *Pseudarthrosis*.

Pseudo-articulation (*su-do-ar-tik-u-la'-shun*) [ψευδής, false; *articulus*, a joint]. A false joint. See *Pseudarthrosis*.

Pseudo-asthma (*su-do-az'-mah*). Synonym of *Pseudasthma*.

Pseudo-axis (*su-do-aks'-is*) [ψευδής, false; *axis*, axis]. Same as *Sympodium*.

Pseudo-bacillus (*su-do-bas-il'-us*) [ψευδής, false; *bacillum*, a small rod]. In biology, one of the very fine fat crystals, which, according to Celli and Guarnieri, are sometimes found in sputum, and which react to the staining almost as tubercle-bacilli, but which may be distinguished by their varying size and their solubility in ether and chloroform.

Pseudo-bacterium (*su-do-bak-te'-re-um*) [ψευδής, false; βακτήριον, a little rod or staff: *pl.*, *Pseudobacteria*].

In biology, any object mistaken for a *bacterium*, as a *pseudobacillus*.

Pseudobasidium (*su-do-bas-id'-e-um*) [ψευδής, false; βάσις, a base]. A false basidium.

Pseudoblepsia, Pseudoblepsis (*su-do-blep'-se-ah, su-do-blep'-sis*) [ψευδής, false; βλέψις, seeing]. A visual hallucination; a distorted visual image.

Pseudo-boina (*su-do-bo-i'-nah*) [πευδής, false; *bos*, ox]. Spurious cow-pox.

Pseudobrachial (*su-do-bra'-ke-al*) [ψευδής, false; βραχίων, brachium]. Pertaining to a pseudobrachium.

Pseudobrachium (*su-do-bra'-ke-um*) [ψευδής, false; βραχιων, brachium]. A false arm in certain fishes.

Pseudobranchia (*su-do-brang'-ke-ah*) [ψευδής, false; βράγχια, gills: *pl.*, *Pseudobranchiæ*]. In biology, a false gill.

Pseudobranchial (*su-do-brang'-ke-al*) [ψευδής, false; βράγχια, gills]. Pertaining to a pseudobranchia.

Pseudobranchiate (*su-do-brang'-ke-āt*) [ψευδής, false; βράγχια, gills]. In biology, provided with pseudobranchiæ.

Pseudo-bulbar (*su-do-bul'-bar*) [ψευδής, false; βολβός, bulb]. Not truly bulbar. Denoting a kind of paralysis. **P. Paralysis**, symmetric disease of both cerebral hemispheres involving the centers or paths of the nerves of speech, and thus resembling disease of the oblongata.

Pseudo-calculi (*su-do-kal'-ku-li*) [ψευδής, false; *calculus*, calculus]. A name given by Poland to the fibrinous and sanguineous calculi or masses, sometimes seen in urine.

Pseudo-carcinoma (*su-do-kar-sin-o'-mah*) [ψευδής, false; καρκίνωμα, carcinoma]. A benign tumor resembling a carcinoma.

Pseudocarp (*su'-do-karp*) [ψευδής, false; καρπός, fruit]. In biology, any fruit made up of parts other than those belonging exclusively to a single ovary. The apple, rose, mulberry, and juniper are examples of pseudocarps.

Pseudocarpous (*su-do-kar'-pus*) [ψευδής, false; καρπός, fruit]. Same as *Anthocarpous*.

Pseudocataracta (*su-do-kat-ar-ak'-tah*) [ψευδής, false; καταρράκτης, cataract]. Spurious cataract.

Pseudocele (*su'-do-sēl*) [ψευδής, false; κοῖλος, hollow]. The fifth ventricle of the brain. It is the space between the two opposed halves of the septum; in man and apes it is completely circumscribed by the continuity of the callosum with the fornix at the splenium and at the copula.

Pseudo-cell (*su'-do-sel*) [ψευδής, false; *cella*, cell]. One of the peculiar vesicular bodies, albuminoid in character, found in the ova of many species of hydrozoa, and by Balfour considered to be analogous to the vitelline granules of birds' eggs.

Pseudo-cephalocele (*su'-do-sef'-al-o-sēl*) [ψευδής, false; κεφαλή, head; κήλη, tumor]. A cephalocele acquired subsequently to birth through disease of the cranial bones or subcutaneous fractures.

Pseudoceratogenesis (*su-do-ser-at-o-jen'-es-is*) [ψευδής, false; κέρας, horn; γένεσις, generation]. The abnormal proliferation of horny tissue.

Pseudoceratosis (*su-do-ser-at-o'-sis*). Synonym of *Pseudoceratogenesis*.

Pseudo-cerebrin (*su-do-ser'-e-brin*) [ψευδής, false; *cerebrum*, cerebrum], $C_{44}H_{92}NO_8$. A substance extracted from brain-tissue by alcohol.

Pseudo-chorea (*su-do-ko-re'-ah*) [ψευδής, false; χορεία, dance]. Spurious chorea, usually hysterical in origin.

Pseudo-chromesthesia (*su-do-kro-mes-the'-ze-ah*) [ψευδής, false; χρῶμα, color; αἰσθησις, sense]. A condition in which the vowels of a word (whether seen, heard, or remembered) each seem to have a distinct visual tint. See *Photism*, *Phonism*.

Pseudochromia (*su-do-kro'-me-ah*) [ψευδής, false; χρῶμα, color]. A false or incorrect perception of color.

Pseudo-chrysalis (*su-do-kris'-al-is*). Same as *Pseudopupa*.

Pseudocilia (*su-do-sil'-e-ah*) [ψευδής, false; *cilium*, eyelash]. An abnormal growth of hairs on the conjunctiva.

Pseudocœle, Pseudocœlia (*su-do-sēl'*, *su-do-se'-le-ah*). Synonym of *Pseudocele* and of *Pseudocœlom*.

Pseudocœlom (*su-do-se'-lōm*) [ψευδής, false; κοίλωμα, a hollow cavity]. In biology, one of those interstitial spaces or cavities sometimes found in invertebrates (*Platyhelminthes*, *Arthropoda*, *Mollusca*), which, not being lined by an epithelium derived from the archenteron, is to be distinguished from a true body-cavity or cœlom derived from archenteric diverticula. Cf. *Archicœl*.

Pseudo-coloboma (*su-do-kol-o-bo'-mah*) [ψευδής, false; κολόβωμα, mutilation]. A scarcely noticeable fissure of the iris, the remains of the embryonic ocular fissure, which has almost, but not perfectly, closed.

Pseudocolumella (*su-do-kol-u-mel'-ah*) [ψευδής, false; *columella*, a little column]. In biology, a parietal or septal columella.

Pseudocolumellar (*su-do-kol-u-mel'-ar*) [ψευδής, false; *columella*, a little column]. Pertaining to a pseudocolumella.

Pseudocommissural (*su-do-kom-is-u'-ral*) [ψευδής, false; *commissura*, a commissure]. Pertaining to a pseudocommissure.

Pseudocommissure (*su-do-kom'-is-ūr*) [ψευδής, false; *commissura*, a commissure]. A sort of commissure between the olfactory lobes of the frog.

Pseudoconcha (*su-do-kong'-kah*) [ψευδής, false; κόγχη, a shell: *pl.*, *Pseudoconchæ*]. In biology, a turbinated structure connected with the inter-nasal septum in front of and below the turbinate bones of birds. It separates the vestibule of the nose from the internal nasal cavity.

Pseudo-cortex (*su-do-kor'-teks*) [ψευδής, false; *cortex*, bark]. In biology, a false cortex.

Pseudocostate (*su-do-kos'-tāt*) [ψευδής, false; *costa*, rib]. In biology, false-ribbed, as certain leaves.

Pseudocotyledon (*su-do-kot-il-e'-don*) [ψευδής, false; κοτυληδων, cotyledon]. In biology, one of the germinating threads of the spores of cryptogams.

Pseudo-coxalgia (*su-do-koks-al'-je-ah*) [ψευδής, false; *coxa*, hip; ἄλγος, pain]. False or spurious coxalgia, an hysterical affection of the hip-joint

Pseudo-crisis (*su-do-kri'-sis*) [ψευδής, false; κρίσις, separating]. Variation in the course of the temperature in acute pneumonia due to variations in the local process. The fall of temperature varies from 2° to 7° F., but rarely is the normal temperature reached, and a subsequent rise soon appears. Pseudo-crises are most frequent from the fifth to the seventh day, but may occur earlier or later.

Pseudo-croup (*su'-do-krūp*) [ψευδής, false; AS., *hrōpan*, to cry aloud]. False croup; laryngismus stridulus.

Pseudocumene (*su-do-ku'-mēn*) [ψευδής, false; *cuminum*. cumin], C_9H_{12}. A liquid occurring with mesitylene in coal-tar. It boils at 166° C.

Pseudocurarin (*su-do-ku-rar'-in*) [ψευδής, false; *curara*]. A non-poisonous alkaloid found in *Nerium oleander*.

Pseudocyclosis (*su-do-si-klo'-sis*) [ψευδής, false; κύκλος, a circle]. The apparent circulation of food in an ameba.

Pseudocyesis (*su-do-si-e'-sis*) [ψευδής, false; κύησις, pregnancy]. False pregnancy. The belief in the

existence of pregnancy on the part of a woman (usually the result of desire), accompanied, perhaps, by uncertain signs. **P. abdominalis**, abdominal pregnancy. **P. ovaria**, gestation in an ovary. **P. tubaria**, tubal pregnancy.

pseudo-cyst (*su'-do-sist*) [ψευδής, false; κίστις, a bladder]. In biology, a globular body produced by the breaking up of the protoplasm in a filament in certain of the lower plants; an asexual reproductive body. Cf. *Gonidium*, *Spore*, *Carpospore*.

pseudodesma (*su-do-dez'-mah*) [ψευδής, false; δεσμός, bond]. A false or adventitious ligament.

pseudo-diarthrosis (*su-do-di-ar-thro'-sis*). Synonym of *Pseudarthrosis*, *Diarthrodial*.

pseudo-diphtheria (*su-do-dif-the'-re-ah*) [ψευδής, false; διφθέρα, diphtheria]. Tonsillitis or pharyngitis with an exudate simulating that of diphtheria, but not due to the Klebs-Löffler bacillus.

pseudo-dipsomania (*su-do-dip-so-ma'-ne-ah*) [ψευδής, false; δίψις, thirst; μανία, madness]. Habitual drunkenness, without maniacal impulse, or obsession, impelling the patient to drink.

pseudo-dipsomaniac (*su-do-dip-so-ma'-ne-ak*) [ψευδής, false; δίψα, thirst; μανία, madness]. One affected with pseudo-dipsomania.

pseudodont (*su'-do-dont*) [ψευδής, false; ὀδούς, tooth]. In biology, having false teeth, as a monotreme.

pseudodontosis (*su-do-don-to'-sis*) [ψευδής, false; ὀδούς, tooth]. The formation of anomalous teeth.

pseudo-elephantiasis (*su-do-el-e-fan-ti'-as-is*) [ψευδής, false; ἐλεφαντία, elephantiasis]. A tumor-like hypertrophy, resembling elephantiasis.

pseudo-embryo (*su-do-em'-bre-o*). Synonym of *Proembryo*.

pseudo-encephalitis (*su-do-en-sef-al-i'-tis*) [ψευδής, false; ἐγκέφαλος, brain; ιτις, inflammation]. Hydrencephaloid disease.

pseudo-entozoa (*su-do-en-to-zo'-ah*) [ψευδής, false; ἐντός, within; ζῷον, animal]. In biology, any object resembling or mistaken for an entozoic parasite, *e.g.*, *Ovuligera acephalocystis*, *q. v.* under *Parasites* (*Animal*), *Table of*.

pseudo-epithelium (*su-do-ep-ith-e'-le-um*) [ψευδής, false; ἐπί, upon; θηλή, nipple]. 1. The membrane lining serous and vascular cavities of the body; true endothelium. 2. The layer of germinal cells found on the surface of the ovary after the ovarian tubes have formed.

pseudo-erotism (*su-do-er'-o-tizm*) [ψευδής, false; ἔρος, love]. Sexual desire in animals at unusual seasons.

pseudo-erysipelas (*su-do-er-is-ip'-el-as*) [ψευδής, false; ἐρυσίπελας, erysipelas]. A name vaguely applied to conditions having more or less resemblance to true erysipelas. **P. subtendinosum colli.** Synonym of *Angina ludovici*.

pseudo-esophoria (*su-do-es'-o-fo'-re-ah*). See *Esophoria*.

pseudo-exanthemata (*su-do-eks-an-them'-at-ah*) [ψευδής, false; ἐξάνθημα, eruption]. A group of non-contagious eruptive diseases resembling the exanthemata in their onset and course.

pseudo-exophoria (*su-do-eks-o-fo'-re-ah*). See *Exophoria*.

pseudo-fever (*su-do-fe'-ver*) [ψευδής, false; *febris*, fever]. An hysterical elevation of temperature.

pseudo-fibrin (*su-do fi'-brin*) [ψευδής, false; *fibra*, fiber]. The coagulative material of blood in cases of "buffy coat."

pseudo-filament (*su-do-fil'-am-ent*) [ψευδής, false; *filum*, a thread]. In biology, an object that looks like, but is not, a real filament. The term is applied to cocci or other bacteria arranged in rows in the direction of the successive divisions.

Pseudofilaria (*su-do-fi-la'-re-ah*) [ψευδής, false; *filum*, a thread]. In biology, a name given by Ed. van Beneden to a stage in the development of gregarines, in which they resemble minute nematode worms (*Filariæ*).

Pseudofoliaceous (*su-do-fo-le-a'-she-us*) [ψευδής, false; *folium*, leaf]. In biology, provided with lobes or expansions resembling leaves.

Pseudo-ganglion (*su-do-gang'-gle-on*) [ψευδής, false; γάγγλιον, ganglion]. A false ganglion, usually a slight thickening of a nerve. **P. of Bochdalek**, an enlargement of a branch of the middle alveolar nerve from which fibers descend to supply the canine teeth. **P. of the Circumflex Nerve**, an expansion of a branch of the nerve which goes to the teres major. **P. of Cloquet**, a thickening of the palatine branches of the naso-palatine nerve. **P., Valentin's**, a slight thickening at the junction of certain divisions of the middle alveolar branch of the maxillary nerve.

Pseudo-gastralgia (*su-do-gas-tral'-je-ah*) [ψευδής, false; γαστήρ, stomach; ἄλγος pain]. A pain resembling gastralgia, but not caused by disease of the stomach. It may be dependent upon disease of the aorta.

Pseudo-gastrula (*su-do-gas'-tru-lah*) [ψευδής, false; γαστήρ, stomach]. In biology, an embryonic stage which resembles, but is not, a true gastrula.

Pseudogenus (*su-do-je'-nus*) [ψευδής, false; γένος, descent, origin]. In biology, a spurious genus. Cf. *Form-genus*.

Pseudogeusia (*su-do-gu'-ze-ah*) [ψεῦδής, false; γεῦσις, taste]. A false perception, or hallucination, of taste.

Pseudogeustia (*su-do-gūs'-te-ah*). See *Pseudogeusia*.

Pseudo-glioma (*su-do-gli-o'-mah*) [ψευδής, false; γλία, glia; ὄμα, tumor]. A name sometimes, though improperly, given to inflammatory changes of the vitreous tumor, the result of irido-choroiditis, which cause a condition simulating glioma. **P. of Retina.** See *Glioma*.

Pseudo-gonorrhea (*su-do-gon-or-e'-ah*) [ψευδής, false; γονόῤῥοια, gonorrhea]. A simple non-specific urethritis.

Pseudogyne (*su'-do-jin*) [ψευδής, false; γυνή, female]. In biology, the agamic females of certain insects (*e.g.*, *Aphididæ*), successive generations of which are sometimes born viviparously without copulation with the males.

Pseudogynous (*su-doj'-in-us*) [ψευδής, false; γυνή, female]. Pertaining to a pseudogyne.

Pseudogyrate (*su-do-ji'-rāt*) [ψευδής, false; γυρος, a gyre]. In biology, falsely ringed.

Pseudohæmal (*su-do-hem'-al*). See *Pseudohemal*.

Pseudo-heart (*su'-do-hart*) [ψευδής, false; ME., *hart*, heart]. In biology, one of the glandular organs found in *Brachiopoda*, having the double function of renal organs and genital ducts; they are the homologues of the organs of Bojanus of the *Mollusca* and of the segmented organs of *Vermes*.

Pseudo-hemal (*su-do-hem'-al*) [ψευδής, false: αἷμα, blood]. In biology, pertaining to that form of respiratory or nutritive fluid of many invertebrates which is analogous to blood but is not true blood. It is found in most annelids, is red or green, corpusculated or non-corpusculated, and flows through a system of vessels with contractile walls, either shut off from or communicating with the perivisceral cavity.

Pseudo-hematemesis (*su-do-hem-at-em'-es-is*) [ψευδής, false; αἷμα, blood; ἔμεσις, vomiting]. The vomiting of bile, red-wine, fruit-juices, or any other substance simulating blood.

Pseudo-hemorrhage (*su-do-hem'-or-āj*) [ψευδής, false; αἷμα, blood; ῥηγνύναι, to burst forth]. A hemorrhage without rupture of the vessels; vicarious hemorrhage.

Pseudo-hermaphrodism (*su-do-her-maf'-ro-dizm*) [ψευδής, false; ἑρμαφροδισμός, hermaphrodism]. The condition presented by a pseudo-hermaphrodite. **P., Feminine**, a condition in which the genitals of the female resemble those of the male. There are three varieties. See *P., Male*. **P., Male**, a condition in which the genitals of the male resemble those of the female. There are three varieties; the external, the internal, and the complete, according as the external or internal generative organs, or both, are affected.

Pseudo-hermaphrodite (*su-do-her-maf'-ro-dīt*) [ψευδής, false; ἑρμαφρόδιτος, hermaphrodite]. An individual in which there is a double sexual formation of the external genitals, but a unisexual development of the reproductive glands (ovaries and testicles). According to the development of one or the other of the latter will the sex of the individual be determined.

Pseudo-hermaphroditism (*su-do-her-maf'-ro-dit-izm*). See *Pseudohermaphrodism*.

Pseudo-hydrophobia (*su-do-hi-dro-fo'-be-ah*) [ψευδής, false; ὑδωρ, water; φόβος, fear]. Hysterical convulsions in one believing himself to have been bitten by a rabid animal. There is, however, absence of the true respiratory spasm. It has also been called *Lyssophobia* and *Hydrophobophobia*.

Pseudo-hymen (*su-do-hi'-men*) [ψευδής, false; ὑμήν, membrane]. A false membrane.

Pseudo-hypertrophic (*su-do-hi-per-tro'-fik*) [ψευδής, false; ὑπέρ, over; τροφή, nutrition]. Pertaining to pseudohypertrophy. **P. Paralysis**, loss or diminution of the power of motion, accompanied by enlarged, and apparently hypertrophied muscles. The types are the Leyden-Möbius, Zimmerlin, and Landouzy-Déjerine. See *Paralysis, Pseudohypertrophic*.

Pseudo-hypertrophy (*su-do-hi-per'-tro-fe*) [ψευδής, false; ὑπέρ, above; τροφή, nutrition]. False hypertrophy; increase in the size of an organ or part on account of overgrowth of an unimportant tissue. It is accompanied by diminution in function.

Pseudo-jervin (*su-do-jer'-vin*) [ψευδής, false; *jerva*, green hellebore-root], $C_{29}H_{43}NO_7$. An alkaloid found in *Veratrum viride*.

Pseudo-joint (*su'-do-joint*). Same as *Pseudo-articulation*.

Pseudolabial (*su-do-la'-be-al*) [ψευδής, false; *labium*, lip]. Pertaining to a pseudolabium.

Pseudolabium (*su-do-la'-be-um*) [ψευδής, false; *labium*, lip]. In biology, the sternite of the sub-basilar plate of certain *Myriapoda*.

Pseudolateral (*su-do-lat'-er-al*) [ψευδής, false; *latus*, side]. In biology, having a tendency to become lateral when normally terminal.

Pseudo-leukemia (*su-do-lu-ke'-me-ah*). See *Hodgkin's Disease* and *Lymphadenoma*.

Pseudo-leukocythemia (*su-do-lu-ko-si-the'-me-ah*) [ψευδής, false; λευκός, white; κύτος, cell; αἷμα, blood]. Same as *Pseudoleukemia*.

Pseudo-ligament (*su-do-lig'-am-ent*) [ψευδής, false; *ligamentum*, ligament]. An inflammatory band of adhesion.

Pseudo-lipoma (*su-do-lip-o'-mah*) [ψευδής, false; λίπος, fat; ὄμα, tumor]. A localized edema resembling an accumulation of fat, occurring above the clavicle and about the knee, especially in cases of rheumatism.

Pseudo-lunula (*su-do-lūn'-u-lah*) [ψευδής, false; *lunula*, a little moon]. An aggregation of mucous cells in the salivary glands, forming lunula-like masses.

Pseudo-malady (*su-do-mal'-ad-e*) [ψευδής, false; *malum*, evil]. An imaginary or simulated illness.

Pseudo-mania (*su-do-ma'-ne-ah*) [ψευδής, false; μανία, mania]. 1. A form of insanity in which the person affected accuses himself of a crime or crimes of which he is innocent. 2. A mania characterized by lying.

Pseudomedicus (*su-do-med'-ik-us*). Synonym of *Quack*.

Pseudo-melanemia (*su-do-mel-an-e'-me-ah*). Synonym of *Pseudomelanosis*.

Pseudo-melanosis (*su-do-mel-an-o'-sis*) [ψευδής, false; μέλας, black; νόσος, disease]. The dark staining of gangrenous parts or the tissues after death, due to the deposit of ferrous sulphid, which is formed by a reaction of hydrogen sulphid and the hemoglobin of the blood.

Pseudo-membrane (*su-do-mem'-brān*) [ψευδής, false; *membrana*, membrane]. A false membrane, such as is seen in diphtheria.

Pseudo-membranous (*su-do-mem'-bra-nus*) [ψευδής, false; *membrana*, membrane]. Characterized by, or pertaining to false membranes. **P. Inflammation**, any inflammation characterized by the formation of a false membrane.

Pseudo-meningitis (*su-do-men-in-ji'-tis*) [ψευδής, false; μῆνιγξ, membrane; ιτις, inflammation]. A group of symptoms resembling that produced by meningitis, but with absence of the lesions of meningeal inflammation. **P., Dental**, meningeal symptoms occurring in children during difficult dentition.

Pseudo-meningocele (*su-do-men-in'-go-sēl*) [ψευδής, false; μῆνιγξ, membrane; κήλη, tumor]. A tumor formed beneath the scalp as a result of a traumatic lesion of the skull and dura, by the pouring out of cerebro-spinal fluid.

Pseudo-menstrual (*su-do-men'-stru-al*) [ψευδής, false; *menstruus*, monthly]. Pertaining to pseudo-menstruation.

Pseudo-menstruation (*su-do-men-stru-a'-shun*) [ψευδής, false; *menstruus*, monthly]. Hemorrhage from the uterus due to systemic disease. It is sometimes seen during the course of eruptive fevers.

Pseudomeric (*su-do-mer'-ik*) [ψευδής, false; μέρος, part]. A qualification applied to unstable forms of tautomeric bodies.

Pseudo-metritis (*su-do-met-ri'-tis*) [ψευδής, false; μήτρα, womb; ιτις, inflammation]. Spurious metritis.

Pseudomnesia (*su-dom-ne'-ze-ah*) [ψευδής, false; μνῆσις, remembrance]. A perversion of the memory, in which the patient recalls as facts things which never have occurred.

Pseudomonocotyledonous (*su-do-mo-no-kot-il-e'-a-nus*) [ψευδής, false; μονος, one; κοτυληδών, cotyledon]. In biology, having two or more cotyledons consolidated into one mass.

Pseudo-monomania (*su-do-mo-no-ma'-ne-ah*) [ψευδής, false; μόνος, one; μανία, mania]. Spurious monomania, a condition not monomania, yet presenting similar symptoms.

Pseudomorph (*su'-do-morf*) [ψευδής, false; μορφή, form]. A false form.

Pseudomorphin (*su-do-mor'-fin*) [ψευδής, false; *Morpheus*, the god of sleep], $C_{34}H_{36}N_2O_6$ (Foster). A finely crystalline alkaloid of opium, insoluble in water, alcohol, ether, and chloroform; it is soluble in alkalies and lime-water, neutral, tasteless. It is also called *Phormia* and *Oxymorphin*.

Pseudomorphic (*su-do-mor'-fik*). Same as *Pseudomorphous*.

Pseudomorphism (*su-do-mor'-fizm*) [ψευδής, false; μορφή, form]. The state of having a form different from that normal to the substance.

Pseudomorphosis (*su-do-mor-fo'-sis*) [ψευδής, false; μορφή, form]. An abnormal formation, as a tumor, deformity, or monstrosity.

Pseudo-morphous (*su-do-mor'-fus*) [ψευδής, false; μορφή, form]. Not having the true form; exhibiting pseudomorphism.

Pseudo-morula (*su-do-mor'-u-lah*) [ψευδής, false; *morus*, a mulberry: *pl.*, *Pseudomorulæ*]. A false morula.

Pseudo-morular (*su-do-mor'-u-lar*) [ψευδής, false; *morus*, a mulberry]. Pertaining to a pseudomorula.

Pseudo-mucin (*su-do-mu'-sin*) [ψευδής, false; *mucus*, mucus]. A substance allied to mucin, from which it differs in not being altered by acetic acid. It is found in proliferative ovarian cysts, being the cause of the gelatinous nature of the contents of the cyst. It is produced by the epithelial cells lining the cyst-walls.

Pseudo-myeloma (*su-do-mi-el-o'-mah*) [ψευδής, false; μυελος, marrow; ὄμα, tumor: *pl.*, *Pseudomyelomata*]. A sarcoma resembling the white substance of the brain.

Pseudonarcissin (*su-do-nar-sis'-in*) [ψευδής, false; νάρκισσος, narcissus]. An alkaloid found in the bulb of *Narcissus pseudonarcissus*.

Pseudo-narcotism (*su-do-nar'-ko-tism*) [ψευδής, false; ναρκοῦν, to benumb]. An hysteric simulation of narcotism.

Pseudonavicella (*su-do-nav-is-el'-ah*) [ψευδής, false; *navicella*, a small boat, dim. of *navis*, a ship: *pl.*, *Pseudonavicellæ*]. A name given by Lieberkühn to a developmental stage of gregarines, resembling the navicellæ or naviculæ of diatoms.

Pseudonavicellar (*su-do-nav-is-el'-ar*) [ψευδής, false; *navicella*, a small boat]. Pertaining to a pseudonavicella.

Pseudonavicula (*su-do-nav-ik'-u-lah*). Same as *Pseudonavicella*.

Pseudonavicular (*su-do-nav-ik'-u-lar*) [ψευδής, false; *navicula*, a small boat]. Pertaining to a pseudonavicula.

Pseudo-neuralgia (*su-do-nu-ral'-je-ah*) [ψευδής, false; νεῦρον, nerve; ἄλγος, pain]. A term given by Charcot to the pains of rickets.

Pseudo-neuritis (*su-do-nu-ri'-tis*) [ψευδής, false; νεῦρον, nerve; ῖτις, inflammation]. A disease simulating a neuritis.

Pseudo-nipple (*su-do-nip'-l*) [ψευδής, false; ME., *neple*, nipple]. A false nipple of the mamma.

Pseudonomania (*su-do-no-ma'-ne-ah*) [ψεύδειν, to lie; μανία, mania]. An insane habit of telling lies.

Pseudo-nucleolus (*su-do-nu-kle'-o-lus*) [ψευδής, false; *nucleolus*, a little nucleus: *pl.*, *Pseudonucleoli*]. A false nucleolus.

Pseudonychium (*su-do-nik'-e-um*) [ψευδής, false, and ὄνυχιον, a little claw: *pl.*, *Pseudonychia*]. In biology, the spurious claw between the true tarsal claws of an insect.

Pseudonym (*su'-do-nim*) [ψευδής, false; ὄνυμα, a name]. A false name.

Pseudonymal (*su-do-nim'-al*) [ψευδής, false; ὄνυμα, name]. In biology, vernacular; not having the character of an onym.

Pseudo-osteomalacia (*su-do-os-te-o-mal-a'-se-ah*) [ψευδής, false; ὀστέον, bone; μαλακία, softness]. Rachitis in which the pelvic basin is distorted so as to resemble in form that of osteomalacia.

Pseudo-paralysis (*su-do-par-al'-is-is*) [ψευδής, false; παράλυσις, paralysis]. An apparent paralysis of the limbs. **P. of Rickets**, the inability to walk in severe cases of rickets, due to distortion of the bones. **P., Syphilitic**, an inflammatory condition of the epiphyses of the bones in acquired syphilis, which causes a marked impairment of motion.

Pseudo-paranoia (*su-do-par-an-oi'-ah*) [ψευδής, false; παρά, beside; νόος, mind]. A condition in which there is a primarily more active mentality, as well as an increased responsivity to emotional impulses, associated with a heightened desire for activity.

Pseudo-paraplegia (*su-do-par-ap-le'-je-ah*) [ψευδής, false; παρά, beside; πληγή, stroke]. Spurious paraplegia. **P., Tetanoid.** Synonym of *Paralysis, Spastic*.

Pseudo-parasite (*su-do-par'-as-īt*) [ψευδής, false; παρά, beside; σῖτος, food]. In biology, a term properly restricted to various objects, such as hairs, vegetable tissues, etc., which have been mistaken for parasites and even described as such; also to frogs, snakes, spiders, etc., which have been stated by many authors to have existed for years in the human alimentary canal, although it is perfectly certain that animals of this kind cannot endure the moist heat of the body of a mammal for more than six hours (Leuckart); a commensal, inquiline messmate. One of certain bodies sometimes seen in the blood in anemia, resembling microörganisms. They are probably altered blood-corpuscles.

Pseudo-parasitic (*su-do-par-as-it'-ik*) [ψευδής, false; παρά, beside; σῖτος, food]. Apparently parasitic. See *Pseudo-parasite*.

Pseudo-parenchyma (*su-do-par-eng'-kim-ah*) [ψευδής, false; παρά, beside; ἐγχεῖν, pour in]. In biology, DeBary's term for the tissue of fungi produced by the interlacing of the hyphæ.

Pseudo-parenchymatous (*su-do-par-en-kim'-at-us*) [ψευδής, false; παρά, beside; ἐγχεῖν, to pour in]. Pertaining to a pseudoparenchyma.

Pseudo-parenchyme (*su-do-par-en'-kim*). Same as *Pseudoparenchyma*.

Pseudo-paresis (*su-do-par'-es-is*) [ψευδής, false; πάρεσις, paresis]. An affection resembling paresis, but regarded as distinct from the ordinary forms.

Pseudo-parthenogenesis (*su-do-par-then-o-jen'-es-is*) [ψευδής, false; παρθένος, a virgin; γένεσις, production]. In biology, a mode of reproduction intermediate between metagenesis and parthenogenesis.

Pseudo-pediform (*su-do-ped'-if-orm*) [ψευδής, false; *pes*, foot; *forma*, form]. Pseudopodial.

Pseudo-pelletierin (*su-do-pel-et'-e-er-in*) [ψευδής, false; *Pelletier*, a French chemist, 1761–97], $C_{18}H_{30}N_2O_2$. An alkaloid found in the root-bark of pomegranate.

Pseudo-peptone (*su-do-pep'-tōn*). Same as *Hemialbumose*.

Pseudopercular (*su-do-per'-ku-lar*) [ψευδής, false; *operculum*, a lid]. Pertaining to or of the nature of a pseudoperculum.

Pseudoperculate (*su-do-per'-ku-lāt*) [ψευδής, false; *operculum*, lid]. In biology, provided with a pseudoperculum.

Pseudoperculum (*su-do-per'-ku-lum*) [ψευδής, false; *operculum*, lid: *pl.*, *Pseudopercula*]. A false operculum.

Pseudophenanthrene (*su-do-fen-anth'-rēn*) [ψευδής, false; φοῖνιξ, purple-red; ἄνθραξ, coal], $C_{16}H_{12}$. A hydrocarbon found in crude anthracene, crystallizing in large glistening plates that melt at a temperature of 115° C.

Pseudo-photesthesia (*su-do-fo-tes-the'-ze-ah*) [ψευδής, false; φῶς, light; αἴσθησις, perception]. The seeing of photisms.

Pseudophthisis (*su-doff'-this-is*) [ψευδής, false; φθίσις, wasting]. Emaciation and general wasting arising from other causes than pulmonary tuberculosis.

Pseudopia (*su-do'-pe-ah*). Synonym of *Pseudopsia*.

Pseudoplasm (*su'-do-plazm*) [ψευδής, false; πλάσμα, a thing molded]. Same as *Neoplasm*.

Pseudoplasma (*su-do-plaz'-mah*). Synonym of *Pseudoplasm*.

Pseudoplegia (*su-do-ple'-je-ah*) [ψευδής, false; πληγή, stroke]. Spurious, or hysteric paralysis.

Pseudo-pleuritis (*su-do-plu-ri'-tis*). Synonym of *Pleurodynia.*

Pseudo-pneumonia (*su-do-nu-mo'-ne-ah*) [ψευδής, false, πνεύμων, lung]. Any disease of the lung simulating pneumonia.

Pseudopod, Pseudopodium (*su'-do-pod, su-do-po'-de-um*) [ψευδής, false; πούς, foot: *pl.*, *Pseudopodia*]. A protrusion of a portion of the substance of a cell, especially of one possessing ameboid movement. See *Pseudopodium.*

Pseudopodal (*su-dop'-o-dal*) [ψευδής, false; πούς, foot]. Provided with pseudopods.

Pseudopode (*su'-do-pōd*). Same as *Pseudopodium.*

Pseudopodial, Pseudopodian (*su-do-po'-de-al, su-do-po'-de-an*) [ψευδής, false; πούς, foot]. Pertaining to pseudopodia.

Pseudopodic (*su-do-po'-dik*). Same as *Pseudopodal.*

Pseudopodium (*su-do-po'-de-um*) [ψευδής, false; πούς, foot: *pl.*, *Pseudopodia*]. In biology, a temporary or permanent, filose or lobose process of the exoplasm of *Rhizopoda*, *Heliozoa*, *Radiolaria*, and other ameboid cells; leukocytes, plasmodia, etc. "There are two principal sorts of pseudopodia, *myxopodia* and *axopodia*. The former are not stiff, but protrusible and retractile; they can fuse with neighboring pseudopodia into a network, and chiefly in the *Rhizopoda*, can collect into small masses by flowing together outside the body at points where they meet with food. Such myxopodia are characteristic of the *Rhizopoda*, and most *Radiolaria*. The axopodia, which are found in the *Heliozoa* and in *Acantharia* among *Radiolaria*, are on the contrary, more or less stiff, and not inclined to reticulate and fuse. In their axes there generally runs a stiff axial filament, a sort of elastic organ of support formed of organic substance. These axial filaments run toward the central point of the body—to the boundary of the endoplasm (*Actinosphærium*), or to the nucleus near the center (*Actinophrys*), or they meet actually in the center (*Acantharia*). All pseudopodia show more or less swift granular streaming." (Lang.)

Pseudo-polypus (*su-do-pol'-ip-us*) [ψευδής, false; πολύπους, polypus]. A mass of mucus or blood assuming the shape of a polypoid tumor.

Pseudo-pregnancy (*su-do-preg'-nan-se*) [ψευδής, false; *pregnans*, pregnant]. Synonym of *Pregnancy*, *False.*

Pseudoproct (*su'-do-prokt*) [ψευδής, false; πρωκτός, anus]. In biology: (*a*) the anal opening of the echinopædium of an echinoderm. (*b*) The secondary opening replacing the original ascule in a sponge.

Pseudoproctous (*su-do-prok'-tus*) [ψευδής, false; πρωκτός, anus]. In biology, provided with a pseudoproct.

Pseudopsia (*su-dop'-se-ah*) [ψευδής, false; ὤψ, eye]. Visual hallucination, or error of visual perception.

Pseudo-pterygium (*su-do-ter-ij'-e-um*) [ψευδής, heart; πτέρυξ, wing]. False, or cicatricial, pterygium.

Pseudo-pupa (*su-do-pu'-pah*) [ψευδής, false; *pupa*, pupa]. A false pupa.

Pseudopupal (*su-do-pu'-pal*) [ψευδής, false; *pupa*, pupa]. Pertaining to a pseudopupa.

Pseudo-pus (*su'-do-pus*) [ψευδής, false; *pus*, pus]. A liquid that resembles pus in appearance only.

Pseudo-rachitis (*su-do-ra-ki'-tis*) [ψευδής, false; ῥάχις, spine; ιτις, inflammation]. Osteitis deformans (Pozzi).

Pseudoramose (*su-do-ra'-mōz*) [ψευδής, false; *ramus*, branch]. In biology, forming false branches.

Pseudo-ramulus (*su-do-ram'-u-lus*) [ψευδής, false; *ramulus*, a little branch]. In biology, a false branch.

Pseudorasis (*su-dor-a'-sis*). Synonym of *Pseudopsia.*

Pseudorcin (*su-dor'-sin*). Synonym of *Erythrite.*

Pseudoresia, Pseudorexia (*su-dor-e'-ze-ah, su-dor-eks'-e-ah*) [ψευδής, false; ὄρεξις, desire]. A perverted appetite.

Pseudo-rheumatism (*su-do-ru'-mat-izm*) [ψευδής, false; ῥευμα, flux]. False rheumatism. **P., Infectious**, a term given by Lapersonne to certain cases of multiple synovitis or arthritis, the prime cause of which it is impossible to discover.

Pseudo-rhonchus (*su-do-rong'-kus*) [ψευδής, false; ῥόγχος, rhonchus]. A false or spurious rhonchus; a deceptive auscultatory sound.

Pseudo-rubeola (*su-do-ru-be-o'-lah*) [ψευδής, false; *rubeola*, rubeola]. An exanthematous disease simulating rubeola.

Pseudo-scarlatina (*su-do-skar-lat-e'-nah*) [ψευδής, false; *scarlatina*, scarlet fever]. A low fever associated with a cutaneous rash like that of scarlet fever, occurring as a result of gonorrhea, or after puerperal infection.

Pseudo-sclerosis (*su-do-skle-ro'-sis*) [ψευδής, false; σκληρός, hard]. An affection similar in symptoms to multiple sclerosis of the nervous system, but without the anatomic lesions.

Pseudoscope (*su'-do-skōp*) [ψευδής, false; σκοπεῖν, to see]. An instrument consisting of a pair of rectangular prisms so arranged that the projecting portions of objects looked at appear depressed, and their deeper portions prominent.

Pseudoscopic (*su-do-skop'-ik*) [ψευδής, false; σκοπεῖν, to view]. Pertaining to the pseudoscope.

Pseudoscopy (*su-dos'-ko-pe*) [ψευδής, false; σκοπεῖν, to view]. The use of the pseudoscope.

Pseudosematic (*su-do-sem-at'-ik*) [ψευδής, false; σῆμα, a sign, mark, token]. In biology, false signaling, as the colors and disguises acquired by animals for purposes of deception, and generally referred to as *mimicry*, *q.v.* Cf. *Pseudallosematic*, *Pseudaposematic*, *Pseudepisematic.*

Pseudoseptate (*su-do-sep'-tāt*) [ψευδής, false; *septum*, a fence]. In biology, having pseudosepta. Presenting the appearance of being septate when not so.

Pseudoseptum (*su-do-sep'-tum*) [ψευδής, false; *septum*, fence: *pl.*, *Pseudosepta*]. In biology, a false septum.

Pseudosiphon (*su-do-si'-fun*) [ψευδής, false; σίφων, siphon]. In biology, a false siphon.

Pseudosiphonal (*su-do-si'-fun-al*) [ψευδής, false; σίφων, siphon]. Pertaining to a pseudosiphon.

Pseudosiphuncle (*su-do-si'-fung-kl*). Same as *Pseudosiphon.*

Pseudosmia (*su-doz'-me-ah*) [ψευδής, false; ὀσμή, smell]. Perversion of the sense of smell; olfactory hallucinations.

Pseudospermic (*su-do-sper'-mik*) [ψευδής, false; σπέρμα, seed]. Pertaining to pseudospermium.

Pseudospermium (*su-do-sper'-me-um*) [ψευδής, false; σπέρμα, seed: *pl.*, *Pseudospermia*]. In biology, a term applied to such fruits as have the pericarp so closely applied to the seed that it is readily mistaken for a simple seed.

Pseudospermous (*su-do-sper'-mus*). Same as *Pseudospermic.*

Pseudosphresia (*su-dos-fre'-ze-ah*). Synonym of *Pseudosmia.*

Pseudospore (*su'-do-spōr*) [ψευδής, false; σπόρος, seed] See *Telentospore.*

Pseudostigma (*su-do-stig'-mah*) [ψευδής, false; στίγμα, stigma]. In biology, a false stigma.

Pseudostoma (*su-dos-to'-mah*) [ψευδής, false; στόμα, mouth: *pl.*, *Pseudostomata*]. 1. One of the small deeply-stained areas in silver preparations of endothelium. They are regarded by some as minute openings filled by silver-stained albuminous substances;

according to Klein, however, many of these stigmata are the protruding, stained processes of connective-tissue cells. 2. The oral orifice of the echinopædium of an echinoderm.

Pseudostomatous (*su-do-sto'-mat-us*) [ψευδής, false; στόμα, mouth]. Provided with pseudostomata; pertaining to a pseudostoma.

Pseudostome (*su'-do-stom*) [ψευδής, false; στόμα, mouth]. See *Pseudostoma*.

Pseudostomosis (*su-do-sto-mo'-sis*) [ψευδής, false; στόμα, mouth]. The formation or existence of a pseudostome.

Pseudostomotic (*su-do-sto-mot'-ik*) [ψευδής, false; στόμα, mouth]. Characterized by pseudostomosis.

Pseudostomous (*su-do-sto'-mus*) [ψευδής, false; στόμα, mouth]. In biology, having pseudostomes.

Pseudo-stroma (*su-do-stro'-mah*) [ψευδής, false; στρῶμα, a covering]. A false stroma; a cellular body resembling a stroma.

Pseudo-synarthrosis (*su-do-sin-ar-thro'-sis*) [ψευδής, false; συν, with; ἀρθρον, joint]. A ligamentous pseudarthrosis.

Pseudo-syphilis (*su-do-sif'-il-is*) [ψευδής, false; *syphilis*, syphilis]. Chancroid.

Pseudo-tabes (*su-do-ta'-bēz*) [ψευδής, false; *tabes*, a wasting]. Any disease simulating locomotor ataxia. See *Polyneuritis potatorum*. **P. mesenterica**, a functional disorder most common in young women and hysterical persons, and resembling tabes mesenterica.

Pseudo-tetany (*su-do-tet'-an-e*) [ψευδής, false; τέτανος, tetanus]. A disease simulating tetany.

Pseudo-trichinosis (*su-do-trik-in-o'-sis*) [ψευδής, false; θριξ, hair; νόσος, disease]. Acute polymyositis resembling trichinosis of the muscles.

Pseudotropin (*su-do-tro'-pin*) [ψευδής, false; τρέπειν, to turn], $C_8H_{15}NO$. An isomeric form of tropin.

Pseudo-tuberculous (*su-do-tu-ber'-ku-lus*) [ψευδής, false; *tuberculum*, tubercle]. Simulating tuberculosis.

Pseudo-typhoid (*su-do-ti'-foid*) [ψευδής, false; τῦφος, smoke]. False typhoid; simulating typhoid fever. **P. Bacilli**, bacteria that resemble the bacillus of enteric fever, but are not identical with it.

Pseudo-urticaria (*su-do-ur-tik-a'-re ah*) [ψευδής, false; *urtica*, nettle]. A skin-affection resembling urticaria in appearance, but not identical with it.

Pseudoval (*su-do'-val*) [ψευδής, false; *ovum*, egg]. Pertaining to a pseudovum.

Pseudovarian (*su-do-va'-re-an*) [ψευδής, false; *ovarian*, ovary]. Pertaining to a pseudovarium.

Pseudo-variola (*su-do-va-ri'-o-lah*). Synonym of *Varicella*.

Pseudovarium, Pseudovary (*su-do-va'-re-um, su-do'-va-re*) [ψευδής, false; *ovarium*, ovary]. The ovary of a viviparous insect.

Pseudovelar (*su-do-ve'-lar*) [ψευδής, false; *velum*, veil]. Vascular; having the character of a pseudovelum.

Pseudovelum (*su-do-ve'-lum*) [ψευδής, false; *velum*, veil]. The vascular velum of some hydrozoans.

Pseudo-vermicules (*su-do-ver'-mik-ūlz*) [ψευδής, false; *vermes*, a worm]. The crescentic bodies found by Laveran in the blood of persons suffering from malarial fever. See *Parasites* (*Animal*), *Table of*.

Pseudovum (*su-do'-vum*) [ψευδής, false; *ovum*, egg: *pl.*, *Pseudova*]. An egg that develops parthenogenically.

Pseudoxanthin (*su-doks-an'-thin*) [ψευδής, false; ξάνθος, yellow]. A name given, it is thought inappropriately, by Gautier to a leukomain-base, $C_4H_5N_5O$, isolated from fresh muscle-tissue of beef. It so much resembles xanthin, however, that it may have been often mistaken for that compound—hence, the name given by Gautier; but it differs from xanthin in its empiric composition, solubility, and crystalline form. The name *Pseudoxanthin* was also given by Schultzen and Filehne to a body isomeric with xanthin, obtained by action of sulphuric upon uric acid.

Pseudymen (*su-di'-men*) [ψευδής, false; ὑμήν, membrane]. A false membrane.

Psiloma (*si-lo'-mah*) [ψιλός, bare]. Baldness.

Psilopedic (*si-lo-pe'-dik*) [ψιλός, bare; παῖς, child]. Of birds born featherless.

Psilosis (*si-lo'-sis*) [ψιλός, bare]. 1. The removal of the hair from a part. Depilation. 2. A term for certain forms of tropical diarrhea.

Psilothrum (*si-lo'-thrum*) [ψίλωθρον]. A depilatory.

Psoadic (*so-ad'-ik*) [ψόα, loin]. Pertaining to a psoas muscle, or to the loin.

Psoas (*so'-as*) [ψόα, loin]. The loin. **P. Abscess**, an abscess, usually dependent upon tuberculous disease of the vertebra, making its way along the sheath of the psoas muscle and pointing at the front of the thigh, below Poupart's ligament, to the outer side of the spine of the pubis. See *Abscess*. **P. magnus, P. major.** See *Muscles, Table of*. **P. minor, P. parvus.** See *Muscles, Table of*. **P. quartus.** Synonym of *Obturator internus*.

Psoatic (*so-at'-ik*). Same as *Psoadic*.

Psodymus (*sod'-im-us*) [ψόα, loin; δίδυμος, double]. A sysomic monstrosity with two heads and thoraces, and conjoined abdominal and pelvic cavities. There are two legs, and occasionally the rudiments of a third.

Psoïtis (*so-i'-tis*) [ψόα, loin; ιτις, inflammation]. Inflammation of the psoas muscles, or of the region of the loins.

Psoloncus (*so-long'-kus*) [ψωλή, the bared glans penis; ὄγκος, tumor]. Tumefaction of the prepuce and the glans penis, due to paraphimosis.

Psora (*so'-rah*) [ψώρα; ψάειν, to scratch]. Scabies. See also *Psoriasis*.

Psoralin (*so-ral'-in*). Synonym of *Caffein*.

Psorelcosis (*so-rel-ko'-sis*) [ψώρα, scabies; ἕλκωσις, ulceration]. Ulceration occurring during the progress of scabies.

Psorentery (*so'-ren-ter-e*) [ψώρα, scabies; ἔντερον, intestine]. Asiatic cholera.

Psoriasis (*so-ri'-as-is*) [ψώρα, the itch]. *Lepra alphos; Lepra; Dry Tetter; Psora;* a common chronic inflammatory disease of the skin, characterized by variously-sized lesions having red bases, covered with white scales resembling mother-of-pearl. It affects by preference the extensor surfaces of the body. The lesions are infiltrated, elevated, clearly defined, covered with white, shining, easily-detachable scales, which upon removal reveal a red, punctate, bleeding surface. The eruption is absolutely dry, and itching is usually absent. The etiology is obscure, though heredity plays a considerable rôle in its production. **P. annularis.** Synonym of *P. circinata*. **P., Buccal, P. buccalis.** Synonym of *Leukoplakia buccalis*. See also *P., Lingual*. **P. centrifuga**, psoriasis in which the patches heal in the center while spreading at the periphery. **P. circinata**, psoriasis in which the central part of the lesions has disappeared, leaving ring-shaped patches. **P. diffusa**, a form in which there is coalescence of large contiguous lesions. **P. discoidea.** Same as *P. nummularis*. **P., Eczematous**, an acute form with bright-red patches, less defined at the margin than usual, with thin and papery scales, which are thrown off so rapidly that they have no time to aggregate into masses. The part is hot and tender, itches severely, and very little irritation will produce discharge. **P. empyodes**, a form in which a little pus forms underneath the crusts; a rare event. **P. figurata, P. geographica**, psoriasis in which the patches are arranged in irregular patterns. **P. gut-**

tata. See *P. punctata*. **P. gyrata**, psoriasis with a serpentine arrangement of the patches. **P. inveterata**, a very obstinate form in which the skin is much thickened and fissured, with large adherent scales. **P. nigra**, a variety of psoriasis in which deep pigmentation has taken place. **P. nummularis, P. nummulata**, psoriasis in which the patches develop in the shape and size of coins. **P. ophthalmica**, squamous eczema of the eyelids. **P. orbicularis**. Synonym of *P. circinata*. **P. palmæ**, a dry eczema of the hands, or a squamous syphiloderm. **P. palmaris et plantaris syphilitica**, a squamous syphiloderm of the palms and soles. **P. pilaris**, a form affecting the region of the hair-follicles. **P. punctata**, a form in which the lesion consists of minute red papules which rapidly become surmounted by pearly scales. These spread peripherally and soon resemble drops of mortar (*P. guttata*); when they attain the size of a coin the name *P. nummularis* is applied to them. By coalescence of these, larger patches are produced (*P. diffusa*), the outline of which is festooned and convex outward. Healing begins in the center of the patches, causing a ringed appearance (*P. circinata*), composite patches thus assuming serpiginous outlines (*P. gyrata*). **P. rubra**, an acute form of psoriasis. **P. rupioides**, a form in which the scales are excessive in quantity and piled up like the shell of a limpet. **P. simplex**: (1) the usual form of psoriasis; (2) synonym of *Eczema*. **P. striata**, psoriasis in which the lesions are disposed in striæ or lines. **P., Syphilitic.** See *Syphiloderma papulo-squamosum*. **P. unguium**, psoriasis of the nails, which become brittle, rough, ridged, and their ends broken off. **P. universalis**, a form in which the lesions are all over the body.

Psoriatic (*so-re-at'-ik*) [ψώρα, itch]. 1. Pertaining to psoriasis. 2. One affected with psoriasis.

Psoric (*so'-rik*) [ψώρα, itch]. Pertaining to or affected with psora.

Psorocomium (*so-ro-ko'-me-um*) [ψώρα, itch; κομεῖν, to take care of]. A hospital for patients affected with the itch.

Psoroid (*so'-roid*) [ψώρα, itch; εἶδος, like]. Similar to psora or scabies.

Psorophthalmia (*so-roff-thal'-me-ah*) [ψώρα, itch; ὀφθαλμός, eye]. Marginal blepharitis.

Psorophthalmic (*so-roff-thal'-mik*) [ψώρα, itch; ὀφθαλμός, eye]. Pertaining to psorophthalmia.

Psororheumatismus (*so-ro-ru-mat-iz'-mus*) [ψώρα, itch; ῥευματισμος, rheumatism]. Rheumatism ascribed to scabies.

Psorosperm (*so'-ro-sperm*) [ψώρα, the itch; σπέρμα, seed]. In biology, one of the *Psorospermiæ*, the name originally created by Müller to designate the sporozoa of *Fishes*, but later applied to such a variety of low forms of animal life as to have lost its specific value, and now having but the general, vague significance of any or all sporozoa. *Coccidia*, *Myxosporidia*, *Sarcosporidia*, *Microsporidia*, *q. v.* **P. Nodules.** See *Coccidium oviforme* in *Parasites* (*Animal*), *Table of*. **P. Saccules.** See *Sarcocystis miescheri*, under *Parasites* (*Animal*), *Table of*.

Psorospermial, Psorospermic (*so-ro-sper'-me-al, so-ro-sper'-mik*) [ψώρα, itch; σπέρμα, seed]. Pertaining to or of the nature of psorosperms.

Psorospermiasis (*so-ro-sper-mi'-as-is*) [ψώρα, itch; σπέρμα, seed]. A term embracing several parasitic affections produced by psorosperms.

Psorospermosis (*so-ro-sper-mo'-sis*) [ψώρα, itch; σπέρμα seed: *pl.*, *Psorospermoses*]. A diseased condition associated with the presence of psorosperms. **P., Proliferative Follicular.** Synonym of *Keratosis follicularis* and *Darier's Disease*.

Psorotheoria (*so-ro-the-o'-re-ah*) [ψώρα, itch; θεωρία, theory]. Hahnemann's theory that many diseases were due to the driving inward of scabies.

Psorous (*so'-rus*) [ψώρα, itch]. Pertaining to or affected with the itch.

Psorozoa (*so-ro-zo'-ah*) [ψώρα, itch; ζῷον, animal]. Animal psorosperms.

Psychagogia (*si-kag-o'-je-ah*) [ψυχή, spirit; ἀγωγός, leading]. Mental excitement or activity.

Psychagogic (*si-kag-oj'-ik*) [ψυχή, spirit; ἀγωγός, leading]. 1. Restorative of the consciousness. 2. A remedy that restores to consciousness, as in fainting.

Psychalgia (*si-kal'-je-ah*) [ψυχή, mind; ἄλγος, pain]. Mental distress; melancholia.

Psyche (*si'-ke*) [ψυχή, soul]. The brain and myelon considered as one organ; the cerebro-spinal axis.

Psychentonia (*si-ken-to'-ne-ah*) [ψυχή, mind; ἐντονία, tension]. Mental strain or over-work.

Psychiater (*si-ki'-at-er*) [ψυχή, soul; ἰατρός, a physician]. An alienist; one who cures mind-diseases.

Psychiatria (*si-ki-a'-tre-ah*). Same as *Psychiatry*.

Psychiatric (*si-ke-at'-rik*) [ψυχή, mind; ἰατρεία, healing art]. Pertaining to pschiatry.

Psychiatrist (*si-ke-at'-rist*) [ψυχή, mind; ἰατήρ, physician]. A specialist in psychiatry.

Psychiatry (*si-ki'-at-re*) [ψυχή, mind; ἰατρεία, healing art]. The science and treatment of the diseases of the mind.

Psychic, or Psychical (*si'-kik, si'-kik-al*) [ψυχή, mind]. Pertaining to the mind. **P. Blindness.** See *Word-blindness*. **P. Centers.** Nerve-centers connected with sensation in the sense of conscious perception, feeling, volition, intellectual acts, and will.

Psychics (*si'-kiks*) [ψυχή, soul]. The science of psychology.

Psychism (*si'-kizm*) [ψυχή, soul]. The character of being psychic, or mental.

Psychist (*si'-kist*) [ψυχή, soul]. One who engages in psychic research.

Psychlampsia (*si-klamp'-se-ah*) [ψυχή, mind; λάμψις, a flashing]. Mania, viewed as a discharging phenomenon of perverted cerebral activity.

Psycho-auditory (*si-ko-aw'-dit-or-e*) [ψυχή, mind; *audire*, to hear]. Pertaining to the psychic perception of sound. **P. Area**, the cortical area concerned in the conscious perception of sound.

Psychocoma (*si-ko-ko'-mah*) [ψυχή, mind; κῶμα, coma]. Mental stupor (Clouston).

Psychodometer (*si-ko-dom'-et-er*) [ψυχή, mind; ὁδός, way; μέτρον, measure]. An instrument for measuring the rapidity of psychic processes.

Psychodynamic (*si-ko-di-nam'-ik*) [ψυχή, soul; δύναμις, power]. Pertaining to psychodynamics.

Psychodynamics (*si-ko-di-nam'-iks*) [ψυχή, mind; δύναμις, power]. The science of the laws of mental activity.

Psychodynamy (*si-ko-di'-nam-e*). Synonym of *Magnetism*, *Animal*.

Psychogenesis (*si-ko-jen'-es-is*) [ψυχή, mind; γένεσις, generation]. The development of mental characteristics.

Psychogeny (*si-koj'-en-e*) [ψυχή, soul; γενής, producing]. The development of mind.

Psychogeusic (*si-ko-gu'-sik*) [ψυχή, mind; γεῦσις, sense of taste]. Pertaining to perception of taste.

Psychogony (*si-kog'-o-ne*) [ψυχή, soul; γονία, generation]. The doctrine of the development of mind.

Psychographic (*si-ko-graf'-ik*) [ψυχή, soul; γράφειν, to write]. Pertaining to psychography.

Psychography (*si-kog'-ra-fe*) [ψυχή, soul; γραφειν, to write]. The natural history of mind.

Psychokinesia (*si-ko-kin-e'-ze-ah*) [ψυχή, mind; κίνησις, movement]. Explosive or impulsive maniacal action, due to defective inhibition; psychlampsia.

Psychologic (*si-ko-loj'-ik*) [ψυχή, soul; λόγος, science]. Pertaining to psychology.

Psychologist (*si-kol'-o-jist*) [ψυχή, soul; λόγος, science]. One versed in psychology.

Psychology (*si-kol'-o-je*) [ψυχή, mind; λόγος, science]. The science which has for its primary subject of investigation all the phenomena of human consciousness, or of the sentient life of man (Ladd).

Psychometry (*si-kom'-et-re*) [ψυχή, mind; μέτρον, measure]. The measurement of the duration of psychic processes; measurement of sense-relations in mental action. **P., Physiologic,** psychology studied from a physiologic standpoint. There is a growing tendency on the part of scientists to study the phenomena of the mind from the physical and physiologic side. Important results have been achieved by the aid of psycho-physics, and a number of psychic phenomena can now be defined in mathematic terms. **P., Transcendental,** psychic processes which are believed not to be dependent on cerebral function.

Psycho-motor (*si-ko-mo'-tor*) [ψυχή, mind; *movere*, to move]. Pertaining to the mind and to voluntary movement. **P. Area,** the motor area of the brain; disposed chiefly at the sides of the central (Rolandic) fissure.

Psychoneurology (*si-ko-nu-rol'-o-je*) [ψυχή, soul; νεῦρον, nerve; λόγος, science]. That part of neurology treating of mental action.

Psychoneurosis (*si-ko-nu-ro'-sis*) [ψυχή, mind; νεῦρον, nerve; νόσος, disease]. Mental disease, especially such as is not accompanied by or dependent on any demonstrable bodily disorder.

Psychonomy (*si-kon'-o-me*) [ψυχή, soul; ὄνομα, name]. The science of the laws of mental action.

Psychonosema (*si-ko-no-ze'-mah*) [ψυχή, mind; νόσημα, disease]. Any mental disease.

Psychonosology (*si-ko-no-sol'-o-je*) [ψυχή, mind; νόσος, disease; λόγος, science]. The nosology of mental diseases.

Psycho-optic (*si'-ko-op'-tik*) [ψυχή, mind; ὄψ, sight]. Pertaining to the psychic perception of light. **P. Area,** the cortical area concerned in conscious perception of retinal impulses.

Psychoparesis (*si-ko-par'-es-is*) [ψυχή, mind; πάρεσις, paresis]. Enfeeblement of the mind.

Psychopath (*si'-ko-path*) [ψυχή, soul; πάθος, disease]. A morally irresponsible person.

Psychopathic (*si-ko-path'-ik*) [ψυχή, mind; πάθος, disease]. Pertaining to psychopathy.

Psychopathist (*si-kop'-ath-ist*). Synonym of *Psychiatrist.*

Psycho-pathology (*si-ko-path-ol'-o-je*) [ψυχή, mind; πάθος, disease; λόγος, science]. 1. The pathology of mental disease. 2. In legal medicine, the legal aspect of insanity; the law as to the rights and responsibilities of insane persons; legal psychiatry, incorrectly called criminal anthropology.

Psychopathy (*si-kop'-ath-e*) [ψυχή, mind; πάθος, disease]. Any disease of the mind.

Psycho-physical (*si-ko-fiz'-ik-al*) [ψυχή, mind; φυσικός, physical]. Pertaining to pyscho-physics. **P. Law.** See *Law, Fechner's.*

Psychophysics (*si-ko-fiz'-iks*) [ψυχή, mind; φυσικός, physical]. The study of mental processes by physical methods; the study of the relation of stimuli to the sensations which they produce, especially the determination of the differences of stimulus required to produce recognizable differences of sensation; experimental psychology.

Psychophysiology (*si-ko-fiz-e-ol'-o-je*). Synonym of *Psychology, Physiologic.*

Psychoplasm (*si'-ko-plazm*) [ψυχή, soul, mind; πλάσμα, anything formed]. In biology: "The sentient material out of which all forms of consciousness are evolved, incessantly fluctuating, incessantly renewed." (Lewes.) See *Protyl.*

Psychoplasmic (*si-ko-plaz'-mik*) [ψυχή, soul; πλάσμα, anything formed]. Pertaining to pyschoplasm.

Psychorrhythm (*si'-ko-rithm*) [ψυχή, mind; ῥυθμός, rhythm]. Any cyclic or alternating mental condition.

Psycho-sensory, Psycho-sensorial (*si-ko-sen'-sor-e, si-ko-sen-so'-re-al*) [ψυχή, mind; *sensus*, sense]. Pertaining to the conscious perception of sensory impulses. **P. Area,** an area in the brain-cortex connected with the perception of sensory impulses, particularly those of special sense.

Psychosin (*si-ko'-sin*) [ψυχή, mind]. A cerebrosid resembling sphingosin, occurring in brain-tissue.

Psychosis (*si-ko'-sis*) [ψυχή, mind: *pl.*, *Psychoses*]. 1. Any disease of the mind. 2. The neural act corresponding to a mental phenomenon. "In all intellectual operations we have to distinguish two sets of successive changes—one in the physical basis of consciousness and the other in consciousness itself; one set which may, and doubtless will, in course of time, be followed through all its complexities by the anatomist and the physicist, and one of which only the man can have immediate knowledge. As it is very necessary to keep up a clear distinction between these two processes, let the one be called *neurosis, q. v.*, and the other *psychosis.*" (Huxley.)

Psychosomatiatria (*si-ko-so-mat-e-a'-tre-ah*) [ψυχή, mind; σῶμα, body; ἰατρία, healing art]. The treatment of diseases of the mind and body.

Psychosomatic (*si-ko-so-mat'-ik*) [ψυχή, soul; σῶμα, body]. Relating to both soul and body.

Psychotherapeutic (*si-ko-ther-ap-u'-tik*) [ψυχή, soul; θεραπευτικός, pertaining to medical treatment]. Pertaining to psychotherapeutics.

Psychotherapeutics (*si-ko-ther-ap-u'-tiks*) [ψυχή, mind; θεραπεία, treatment]. The treatment of disease by mental influence, or by suggestion.

Psychotherapy (*si-ko-ther'-ap-e*). Same as *Psychotherapeutics.*

Psychovital (*si-ko-vi'-tal*) [ψυχή, soul; *vita*, life]. Psychic and vital.

Psychrapostema (*si-krap-os'-te-mah*) [ψυχρός, cold; ἀπόστημα, abscess]. Cold abscess.

Psychrolusia (*si-kro-lu'-ze-ah*) [ψυχρός, cold; λούειν, to wash]. Cold bathing.

Psychrolutron (*si-kro-lu'-tron*) [ψυχρός, cold; λουτρόν, bath]. Cold bath.

Psychrometer (*si-krom'-et-er*) [ψυχρός, cold; μέτρον, measure]. An instrument for determining the amount of atmospheric moisture by precipitation on a cold surface.

Psychrometric (*si-kro-met'-rik*) [ψυχρός, cold; μέτρον, measure]. Pertaining to a psychrometer.

Psychrometry (*si-krom'-et-re*) [ψυχρος, cold; μέτρον, measure]. The use of the psychrometer.

Psychrophobia (*si-kro-fo'-be-ah*) [ψυχρός, cold; φόβος, dread]. Morbid dread of or impressibility to cold.

Psychrophore (*si'-kro-for*) [ψυχρος, cold; φορεῖν, to carry]. An instrument for applying cold to parts deeply placed, as by a double-current catheter to the prostate gland.

Psychroposia (*si-kro-po'-ze-ah*) [ψυχρός, cold; πόσις, a drinking]. The drinking of cold beverages.

Psydracia (*si-dra'-se-ah*) [ψύδραξ, blister, pimple: *pl.*, *Psydraciæ*]. 1. Eczema (Fuchs). 2. In Plenck's classification, a variety of skin-diseases characterized

by red, elevated spots. **P. spontaneæ**, a form of large-whealed urticaria usually affecting covered parts. **P. vulgaris.** Synonym of *Eczema simplex.*

Psydracium (*si-dra'-se-um*) [ψύδραξ, a blister or pimple: *pl.*, *Psydracia*]. A small pustule.

Psygma (*sig'-mah*) [ψῦγμα]. A refrigerant medicine.

Ptarmic (*tar'-mik*) [πταρμός, a sneezing]. Pertaining to the act of sneezing. Sternutatory. Also, a substance that produces sneezing.

Ptelea (*te'-le-ah*) [πτελέα, elm]. A genus of polypetalous shrubs and trees. **P. trifoliata,** Hop-tree; Wafer-ash; Wing-seed. The bark of a shrub yielding a bitter tonic extractive. It is a popular tonic in debility and dyspepsia, and is also used as an anthelmintic. Unof.

Pteleorrhine (*tel'-e-or-in*) [πτελέο, elm; ῥίς, nose]. A term applied to the anterior nares when the aperture is asymmetric.

Ptenopleural (*ten-o-plu'-ral*) [πτηνός, feathered; πλευρά, side]. In biology, having the sides of the body winged or alate.

Pteral (*ter'-al*) [πτερόν, wing]. In biology, of or pertaining to the wing. Cf. *Manal.*

Ptere (*tēr*) [πτερόν, feather, wing]. In biology, a wing-like structure.

Pteridium (*ter-id'-e-um*) [πτερόν, wing]. See *Samara.*

Pterion (*te'-re-on*) [πτερόν, wing]. See *Craniometric Points.*

Pterna (*ter'-nah*) [πτέρνα]. 1. Calcaneum. 2. The heel-pad of birds.

Ptero- (*ter'-o*) [πτερόν, wing]. A prefix to denote resemblance to a wing, or wing-shaped.

Pterocardiac (*ter-o-kar'-de-ak*) [πτερόν, wing; κάρδια, the heart]. In biology, applied by Huxley to a wing-like ossicle that articulates with the cardiac ossicle in the stomach of the crawfish.

Pterocarpous (*ter-o-kar'-pus*) [πτερόν, wing; καρπός, fruit]. In biology, wing-fruited.

Pterocarpus (*ter-o-kar'-pus*) [πτερόν, wing; καρπός, fruit]. A genus of tropical leguminous trees. **P. draco,** of tropical America, affords some of the dragon's blood of commerce. **P. erinaceus,** of Africa, and **P. marsupium,** of India, yield kino. **P. santalinus,** affords red saunders.

Pterocaulon (*ter-o-kaw'-lon*) [πτερόν, wing; καυλός, stem]. A genus of the *Inuloideæ.* **P. pycnostachyum,** black-root, a species found in Georgia, where it is used as a tonic, emmenagogue, and alterative.

Pterodium (*ter-o'-de-um*). Same as *Pteridium.*

Pteroglossine (*ter-o-glos'-in*) [πτερόν, wing; γλῶσσα, tongue]. In biology, having a feathery or brushy tongue.

Pterologic (*ter-o-loj'-ik*) [πτερόν, wing; λόγος, science]. Pertaining to pterology.

Pterology (*ter-ol'-o-je*) [πτερόν, wing; λόγος, science]. In biology, that department of entomology or ornithology which treats of the wings.

Pteropegal (*ter-o-pe'-gal*) [πτερόν, wing; πηγός, fastened]. Pertaining to a pteropegum.

Pteropegum (*ter-o-pe'-gum*) [πτερόν, feather, wing; πηγός, fastened: *pl.*, *Pteropega*]. In biology, the articular socket or surface on the thorax of an insect for the reception of the base of the wing.

Pteropodial (*ter-o-po'-de-al*) [πτερόν, wing; πόδιον, a small foot]. Pertaining to a pteropodium.

Pteropodium (*ter-o-po'-de-um*) [πτερός, wing; πόδιον, a small foot]. The podium of a pteropod.

Pterorhine (*ter'-o-rin*) [πτερόν, wing; ῥίς, nose]. In biology, having feathered nostrils.

Pterospora (*ter-os'-po-rah*) [πτερόν, wing; σπόρος, seed]. A genus of plants belonging to the order *Monotropeæ.* **P. andromeda,** scaly dragon-claw, dragon-root, fever-root, a plant found in New York Vermont, and Canada, and having anthelmintic, diaphoretic, and emmenagogue properties.

Pterostigma (*ter-o-stig'-mah*) [πτερόν, wing; στίγμα a spot]. The stigma on the wings of some insects.

Pterostigmal (*ter-o-stig'-mal*) [πτερόν, wing; στίγμα stigma]. Pertaining to a pterostigma.

Pterostigmatic (*ter-o-stig-mat'-ik*) [πτερόν, wing στίγμα, stigma]. In biology, having a pterostigma.

Pterotheca (*ter-o-the'-kah*) [πτερόν, wing; θήκη, case *pl.*, *Pterothecæ*]. In biology, that part of the pupa-case which covers the developing wings.

Pterotic (*ter-ot'-ik*) [πτερόν, wing]. Wing-like.

Pterygial (*ter-ij'-e-al*) [dim. of πτέρυξ, wing]. Pertaining to a pterygium.

Pterygium (*ter-ij'-e-um*) [dim. of πτέρυξ, wing: *pl. Pterygia*]. 1. A triangular patch of thickened conjunctiva, the apex pointing toward the pupil, the fan-shaped base extending toward the canthus. It is most common on the nasal side. 2. One of the ala

Pterygium.

nasi. 3. In biology, the generalized vertebrate limb. Cf. *Archipterygium, Ichthyopterygium, Cheiropterygium, Mesopterygium, Metapterygium, Propterygium.* **P. carnosum,** a flesh-like vascular pterygium. **P. crassum.** Synonym of *P. carnosum.* **P. membranaceum,** a thin, membrane-like pterygium. **P. sarcomatosum.** Synonym of *P. carnosum.* **P. tenue.** Synonym of *P. membranaceum.* **P. unguis,** an abnormal growth of skin over the finger-nail. **P. vasculosum.** Synonym of *P. carnosum.*

Pterygo- (*ter'-ig-o-*) [πτέρυξ, wing]. A prefix denoting connection with or relation to the pterygoid process.

Pterygoblast (*ter'-ig-o-blast*) [πτέρυξ, wing; βλαστός, germ]. In biology, the incipient rudiment or protoplasm of the fin-ray.

Pterygobranchiate (*ter-ig-o-brang'-ke-āt*) [πτέρυξ, wing; βράγχια, gills]. In biology, having feathery gills.

Pterygoda (*ter-ig-o'-dah*) [πτερυγώδης, wing-like]. In biology, a pair of scales on the mesothorax, near the insertion of the first legs, in *Lepidoptera.* Cf. *Tegulæ.*

Pterygoid (*ter'-ig-oid*) [πτέρυξ, wing; εἶδος, like]. Wing-shaped. **P. Artery.** See *Arteries, Table of.* **P. Canal,** the Vidian canal. **P. Fossa.** See *Fossa.* **P. Muscle.** See Muscle. **P. Notch.** Same as *Fossa.* **P. Plate,** one of the two plates of a pterygoid process, *q. v.* **P. Plexus.** See *Plexus.* **P. Process.** See *Process, Pterygoid.*

Pterygoidean (*ter-ig-oid'-e-an*) [πτέρυξ, wing]. Pterygoid. **P. Plaques,** the characteristic sores seen on the hard palate in children affected with Bednar's aphthæ.

Pterygoma (*ter-ig-o'-mah*) [πτέρυξ, wing; ὄμα, tumor] A chronic swelling of the labia minora which interferes with coitus (Severin).

Pterygomaxillary (*ter-ig-o-maks'-il-a-re*) [πτερόν, wing; εἶδος, like; *maxilla*, maxilla]. Pertaining to a pterygoid process and the maxilla. **P. Fissure,** an elongated fissure formed by the divergence of the superior maxillary bone from the pterygoid process of the sphenoid. It gives passage to branches of the internal maxillary artery. **P. Ligament,** a ligamentous branch extending from the apex of the internal pterygoid plate to the posterior end of the internal oblique line of the lower jaw.

Pterygopalatal, Pterygopalatine (*ter-ig-o-pal'-at-al, ter-ig-o-pal'-at-in*). See *Palatopterygoid.* **P. Artery.** See *Arteries, Table of.* **P. Canal,** a canal formed by the articulation of the pterygoid process of the sphenoid bone, with the sphenoid process of the palate bone and transmitting the pterygo-palatine vessels and nerves. **P. Nerve,** a small nerve arising from the back part of Meckel's ganglion and passing through the pterygo-palatine canal to the mucous membrane of the upper part of the pharynx, behind the Eustachian tube. Also known as the *pharyngeal nerve.*

Pterygo-pharyngeus (*ter-ig-o-far-in-je'-us*) [πτερόν, wing; φάρυγξ, pharynx]. 1. Synonym of *Palatopharyngeus.* 2. The part of the superior constrictor of the pharynx which arises from the internal pterygoid plate.

Pterygo-quadrate (*ter-ig-o-kwod'-rāt*) [πτερύξ, wing; *quadratus*, quadrate]. Pertaining to the pterygoid bone and to the quadrate bone.

Pterygosphenoid (*ter-ig-o-sfe'-noid*). See *Sphenopterygoid.*

Pterygospinous (*ter-ig-o-spi'-nus*) [πτερυξ, wing; *spinosus*, spinous]. Pertaining to a pterygoid process and to the spine of the sphenoid.

Pterygo-staphylinus (*ter-ig-o-staf-il-i'-nus*) [πτέρυξ, wing; σταφυλή, uvula]. Same as *Tensor palati.*

Pterygostium (*ter-ig-os'-te-um*) [πτερύξ, wing; *ostium*, mouth]. One of the veins of an insect's wing.

Pterygostomial (*ter-ig-o-sto'-me-al*) [πτερύξ, wing; στομα, mouth]. In biology, applied to the plate-like extensions of the carapace running forward parallel with the axis of the body in certain crustaceans.

Pterygo-syndesmo-staphylo-pharyngeus (*ter'-ig-o-sin-des'-mo-staf'-il-o-far-in-je'-us*). Synonym of *Constrictor, Superior, of the Pharynx.*

Pterygote (*ter'-ig-ōt*) [πτερυγωτός, winged]. Winged, alate.

Pterygo-temporal (*ter-ig-o-tem'-po-ral*) [πτέρυξ, wing; *tempus*, temple]. Pertaining to the pterygoid process and to the temporal bone.

Pterygotrabecular (*ter-ig-o-tra-bek'-u-lar*) [πτερύξ, wing; *trabecula*]. Pertaining to the pterygoid bone and the trabecular region of the skull.

Pteryla (*ter'-il-ah*) [πτερόν, feather, wing; ὕλη, wood: *pl.*, *Pterylæ*]. In biology, a "feather tract," an area of the skin on which feathers grow, as distinguished from *apteria*, or tracts on which no feathers grow.

Pterylographic (*ter-il-o-graf'-ik*) [πτερόν, feather; γράφειν, to write]. Pertaining to pterylography.

Pterylography (*ter-il-og'-ra-fe*) [πτερόν, feather; γράφειν, to write]. In biology, the written description of the arrangement of the feathers in the skin of birds.

Pterylosis (*ter-il-o'-sis*) [*pteryla*, from πτερόν, wing, feather; ὕλη, wood]. In biology, the arrangement or distribution of the feathers of a bird, as distinguished from the character of the plumage, *ptilosis.*

Ptiloma (*ti-lo'-mah*) [πτίλον, down]. The part of the eyelid deprived of its cilia by ptilosis.

Ptilosis (*ti-lo'-sis*) [πτίλον, feather]. In biology, the plumage or feathering of a bird regarded as to character rather than as to the distribution of the feathers, for which see *pterylosis.* See also *Madarosis.*

Ptisan (*tiz'-an*) [πτισάνη, peeled barley]. Barley-water. Any decoction of barley designed as a medicinal drink.

Ptochiater (*to'-ke-a-ter*) [πτωχός, poor; ἰατρος, physician]. A physician who attends the poor.

Ptochiatria (*to-ke-a'-tre-ah*) [πτωχός, a beggar; ἰατρία, healing art]. Medical treatment of the poor.

Ptochocomion (*to-ko-ko'-me-on*) [πτωχός, poor; κομεῖν, to take care of]. A hospital for the care of the poor.

Ptoma (*to'-mah*) [πτῶμα]. Cadaver.

Ptomain (*to'-ma-in*) [πτῶμα, corpse]. Any one of the active, inanimate septic or toxic substances resulting from processes of decomposition and disintegration of albuminous materials. (Farquharson.) As ptomains are chiefly developed during putrefaction, they have been termed *putrefactive alkaloids.* The name *cadaveric alkaloids* has also been given to them, but applies properly only to those obtained from the dead animal body. Some of the ptomains are poisonous; the greater number are not. As a rule, each distinctive ptomain is produced by a different microörganism, but there are instances of several bacteria producing the same ptomain. The dependence of a ptomain upon microörganisms may be indirect and complicated by or dependent upon purely chemic changes. The kind of ptomain produced depends somewhat upon the stage of putrefaction, as ptomains are "transition products in the process of putrefaction." Their production is also influenced by the media in which the bacteria grow. A ptomain that is formed by a certain bacterium in one medium may not be produced by the same bacterium in another medium. Ptomains have been found in foods, as in mussels, oysters, eels, sausage, ham, canned meats, cheese, milk, ice-cream, etc. The pathogenic action of certain bacteria may be due to their production of ptomains. In addition to the ptomains given in the following table, a number of unnamed substances have been studied that possess reactions and physiologic effects similar or identical with those of well-known vegetable alkaloids. These at present can only be called after analogues, *e.g.*, **Coniïn-like Substances;** others are called **Atropin-like, Delphinin-like, Digitalin-like, Morphin-like, Nicotin-like, Strychnin-like, Veratrin-like,** etc. The table beginning on page 1210 is modified from Vaughan and Novy.

Ptomainemia (*to-ma-in-e'-me-ah*) [πτῶμα, corpse; αἷμα, blood]. The presence of ptomains in the blood.

Ptomainic (*to'-ma-in-ik*) [πτῶμα, corpse]. Due to or associated with a ptomain.

Ptomapeptone (*to'-mah-pep'-ton*) [πτῶμα, a corpse; *peptone*, from πέπτειν, to cook, digest]. In biology, one of the putrefactive alkaloids produced in cereals by the action of ergot, molds, etc.

Ptomatin (*to'-mat-in*). Synonym of *Ptomain.*

Ptomatopsia (*to-mat-op'-se-ah*) [πτῶμα, corpse; ὄψις, view]. The examination of the cadaver; necropsy.

Ptomatropin (*to-mat'-ro-pin*). A ptomain resembling the vegetable alkaloid atropin in its physiologic properties. That isolated by Zuelzer and Sonnenschein did not give the odor of blossoms when heated with sulphuric acid and oxidizing agents (Reuss's test), but a ptomatropin found by Selmi gave the reaction.

Ptosis (*to'-sis*) [πτῶσις, πίπτειν, to fall]. Complete or partial drooping of the upper eyelid, due to paralysis of the levator palpebræ or to thickening of the lid. **P. iridis,** hernia of the iris. **P. oculi.** Synonym of *Exophthalmos.* **P. palpebræ, P. palpebrarum.** See *Ptosis.* **P. sympathica,** ptosis in connection with paresis of the cervical sympathetic and associated with myosis and vaso-motor paralysis of the side of the face affected.

TABLE OF PTOMAINS.

NAME.	FORMULA.	DISCOVERER.	SOURCE.	PHYSIOLOGIC ACTION.
Amido-valerianic acid.	$C_5H_{11}NO_2$.	E. and H. Salkowski.	Putrefying fibrin and meat.	Non-toxic.
Amylamin.	$C_5H_{13}N$.	Hesse.	Cod-liver oil, horn, putrid yeast.	Toxic.
Asellin.	$C_{25}H_{32}N_4$.	Gautier and Mourgues.	Cod-liver oil.	Toxic.
Betain.	$C_5H_{13}NO_3$.	Brieger.	Mussel, human urine.	Non-toxic.
Butylamin.	$C_4H_{11}N$.	Gautier and Mourgues.	Cod-liver oil.	Toxic (?).
Cadaverin.	$C_5H_{14}N_2$.	Brieger.	Putrefying animal tissues, cultures of comma-bacillus.	Slightly toxic.
Caproylamin.	See *Hexylamin.*			
Cholin.	$C_5H_{15}NO_2$.	Brieger.	Decomposing animal tissues, proteus and comma-bacillus cultures.	Toxic.
Collidin (?).	$C_8H_{11}N$.	Nencki.	Putrid mixture of pancreas and gelatin.	
Diethylamin.	$C_4H_{11}N$.	Bocklisch.	Putrefying fish (pike).	Non-toxic.
Dihydrolutidin.	$C_7H_{11}N$.	Gautier and Mourgues.	Cod-liver oil.	Toxic.
Dimethylamin.	C_2H_7N.	Brieger.	Putrid gelatin, yeast, fish.	Non-toxic.
Eczemin.		Griffith.	Extracted from the urine in eczema. A white, crystalline substance, soluble in water, feebly alkaline in reaction.	Toxic.
Ethylamin.	C_2H_7N.	Hesse.	Putrefying yeast, wheat flour.	Non-toxic.
Ethylidenediamin (?).	$C_2H_8N_2$.	Brieger.	Putrefying haddock.	Toxic.
Gadinin.	$C_7H_{17}NO_2$.	Brieger.	Decomposing haddock.	Toxic.
Hexylamin.	$C_6H_{15}N$.	Hesse.	Putrid yeast.	Toxic.
Hydrocollidin (?).	$C_8H_{13}N$.	Gautier and Etard.	Putrefying mackerel, horse, and ox-flesh.	Toxic.
Hydrocoridin.	$C_{10}H_{17}N$.	Griffiths.	Agar-culture of bacterium album.	
Methylamin.	CH_5N.	Bocklisch.	Putrefying fish.	Non-toxic.
Methyl-guanidin.	$C_2H_7N_3$.	Brieger.	Putrefying horse-flesh.	Toxic.
Morrhuic acid.	$C_9H_{13}NO_3$.	Gautier and Mourgues.	Cod-liver oil.	
Morrhuin.	$C_{19}N_{27}N_3$.	Gautier and Mourgues.	Cod-liver oil.	Diuretic and diaphoretic.
Muscarin.	$C_5H_{15}NO_3$.	Brieger.	Decomposing haddock.	Toxic.
Mydalein.		Brieger.	Putrefying human organs.	Toxic.
Mydatoxin.	$C_6H_{13}NO_2$.	Brieger.	Putrefying human organs.	Toxic.
Mydin.	$C_8H_{11}NO$.	Brieger.	Putrid human tissues, blood-serum cultures of Eberth's bacillus of typhoid fever.	Non-toxic.
Mytilotoxin.	$C_6H_{15}NO_2$.	Brieger.	Poisonous mussel (*Mytilus edulis*).	Toxic.
Neuridin.	$C_5H_{14}N_2$.	Brieger.	Putrefying flesh.	Non-toxic.
Neurin.	$C_5H_{13}NO$.	Brieger.	Putrefying flesh.	Toxic.
Parvolin (?).	$C_9H_{13}N$.	Gautier and Etard.	Putrefying mackerel and horse-flesh.	
Peptotoxin.		Brieger.	Decomposing proteid substances.	Toxic.
Phlogosin.		Leber.	Cultures of *staphylococcus pyogenes aureus.*	Powerful local irritant.
Propylamin.	C_3H_9N.	Brieger.	Gelatin-cultures of bacteria of human feces.	
Putrescin.	$C_4H_{12}N_2$.	Brieger.	Putrefying flesh, gelatin, etc.	Slightly toxic.

TABLE OF PTOMAINS.—*Continued.*

Name.	Formula.	Discoverer.	Source.	Physiologic Action.
Pyocyanin.	$C_{14}H_{14}NO_2$.	Ledderhose.	Cultures of *bacillus pyocyaneus*.	Non-toxic.
Pyridin-base (?).	$C_{10}H_{15}N$.	De Coninck.	Putrefying sea-polyps.	
Pyridin-base.	$C_8H_{11}N$.	De Coninck.	Putrefying sea-polyps.	
Saprin.	$C_5H_{14}N_2$.	Brieger.	Putrefying human liver and spleen.	Non-toxic.
Spasmotoxin.		Brieger.	Cultures of tetanus-bacillus.	Toxic.
Susotoxin.	$C_{10}H_{26}N_2$ (?).	Novy.	Cultures of hog-cholera bacillus.	Toxic.
Tetanin.	$C_{13}H_{30}N_2O_4$.	Brieger.	Cultures of tetanus-bacillus.	Toxic.
Tetanotoxin.	$C_5H_{11}N$ (?).	Brieger.	Cultures of tetanus-bacillus.	Toxic.
Triethylamin.	$C_6H_{15}N$.	Brieger.	Putrefying fish (haddock).	Non-toxic.
Trimethylamin.	C_3H_9N.	Dessaigues.	Herring-brine.	Non-toxic.
Trimethylenediamin.	$C_3H_{10}N_2$ (?).	Brieger.	Beef-broth cultures of comma-bacillus.	Toxic.
Typhotoxin.	$C_7H_{17}NO_2$.	Brieger.	Beef-broth cultures of Eberth's bacillus.	Toxic.
Tyrotoxicon.		Vaughan.	Poisonous cheese, ice cream, milk, etc.	Toxic.
Unnamed.	$C_5H_{12}N_2O_4$.	Pouchet.	Flesh, bones, etc.	Toxic.
Unnamed.	$C_6H_{13}NO_2$.	Brieger.	Cultures of tetanus-bacillus.	Non-toxic.
Unnamed.	$C_7H_{10}N_2$.	Morin.	Sugar undergoing alcoholic fermentation.	Non-toxic.
Unnamed.	$C_7H_{17}NO_2$.	Brieger.	Putrefying horse-flesh.	Toxic.
Unnamed.	$C_7H_{18}N_2O_6$.	Pouchet.	Flesh, bones, etc.	Toxic.
Unnamed.	$C_{10}H_{15}N$.	Guareschi and Mosso.	Putrid fibrin.	Toxic.
Unnamed.	$C_{13}H_{20}N_4$.	Oser.	Fermenting cane-sugar.	
Unnamed.	$C_{14}H_{20}N_2O$.	Guareschi.	Putrefying fibrin.	
Unnamed.	$C_{17}H_{38}N_4$.	Gautier and Etard.	Putrefying mackerel, horse-flesh and ox-flesh.	
Unnamed.	$C_{32}H_{31}N$.	Delézinier.		

Ptotic (*to'-tik*) [πτῶσις, a falling]. Affected with or pertaining to ptosis.

Ptotostereoscope (*to-tos-te'-re-o-skōp*) [πτωτός, fallen; στερεός, solid; σκοπεῖν, to examine]. Donders' name for an instrument for testing the existence of binocular vision.

Ptyalagogue (*ti-al'-a-gog*) [πτύαλον, saliva; ἀγωγός, leading]. A medicine producing an increased flow of saliva. A sialagogue.

Ptyalin (*ti'-al-in*) [πτύαλον, saliva]. An amylolytic or diastatic ferment found in saliva, having the property of converting starch into dextrin and sugar. The starch first becomes converted into achroödextrin and erythrodextrin; these by hydration into maltose, and the latter, by further hydration, into dextrose. Ptyalin is most active in a slightly alkaline medium and at the temperature of the body.

Ptyalinogen (*ti-al-in'-o-jen*) [πτύαλον, saliva; γεννᾶν, to produce]. The hypothetic zymogen of ptyalin.

Ptyalism (*ti'-al-izm*) [πτύαλον, saliva]. An excessive secretion of saliva. Sometimes it is used to signify mercurial ptyalism. **P., Mercurial,** that produced by mercury. It is attended with profuse salivation, a coppery taste, swelling and sponginess of the gums, and sometimes by looseness of the teeth and fetid breath.

Ptyalismus (*ti-al-is'-mus*). See *Ptyalism*. **P. mercurialis.** Synonym of *Ptyalism, Mercurial.*

Ptyalith (*ti'-al-ith*) [πτύαλον, saliva; λίθος, stone]. A salivary calculus.

Ptyalize (*ti'-al-īz*) [πτυαλίζειν, to salivate]. To produce ptyalism.

Ptyalocele (*ti-al'-o-sēl*) [πτύαλον, saliva; κήλη, tumor]. A cyst due to obstruction of the duct of a salivary gland.

Ptyalogogic (*ti-al-o-goj'-ik*) [πτύαλον, spittle; ἀγωγός, leading]. Promoting a flow of saliva.

Ptyalogogue (*ti-al'-o-gog*) [πτύαλον, spittle; ἀγωγός, leading]. A medicine causing a flow of saliva.

Ptyalophthisis (*ti-al-off'-this-is*) [πτύαλον, saliva; φθίσις, a wasting]. Wasting from excessive discharge of saliva.

Ptyalose (*ti'-al-ōz*) [πτύαλον, saliva]. A sugar found in saliva; it is identical with maltose.

Ptyalum (*ti'-al-um*). Synonym of *Saliva.*

Ptychodont (*ti'-ko-dont*) [πτύξ (πτυχ-), a fold; ὀδούς, (ὀδοντ-) tooth]. In biology, applied to molar teeth with folded crowns, or to the animals bearing such teeth.

Ptysis (*ti'-sis*) [πτύσις]. The act of spitting.

Ptysma (*tiz'-mah*) [πτύσμα]. Saliva.

Ptysmagogue (*tiz'-mag-og*) [πτύσμα, spittle; ἀγωγός, leading]. A drug that promotes the secretion of saliva; a ptyalagogue, or sialagogue.

Ptysmatischesis (*tiz-mat-is'-ke-sis*) [πτύσμα, saliva; ἴσχειν, to check]. Retention of saliva.

Ptyxis (*tiks'-is*) [πτύξις, a folding]. In biology, the arrangement of a single part in the bud, as distinguished from the conjoint disposition of the parts in *estivation* and *vernation*.

Pubal (*pu'-bal*). Synonym of *Pubic*.

Puben (*pu'-ben*) [*pubes*, adult]. Belonging to the pubes in itself.

Pubeotomy (*pu-be-ot'-o-me*). See *Pubiotomy*.

Puberal (*pu'-ber-al*) [*puber*, adult]. Relating to puberty.

Puberty (*pu'-ber-te*) [*pubertas; puber*, adult]. 1. The period at which the generative organs of the male or of the female become capable of exercising the function of reproduction. 2. The changes in the generative organs and in the general system that accompany the inauguration of this period.

Puberulent (*pu-ber'-u-lent*) [*pubes*, *puber*, downy, pubescent]. In biology, covered with a fine, soft, almost imperceptible down. Cf. *Holosericeus*.

Pubes (*pu'-bēz*) [L.: *gen.*, *pubis*]. 1. The os pubis, or pubic bone; that portion of the os innominatum forming the front of the pelvis. 2. The hairy region covering the os pubis. 3. The pubic hair. **P., Angle of.** See *Angle*. **P., Crest of.** See *Crest*. **P., Spine of.** See *Spine*. **P., Symphysis of.** See *Symphysis*.

Pubescence (*pu-bes'-ens*) [*pubescentia*]. 1. Hairiness; the presence of down; fine, soft hairs. 2. Puberty, or the coming on of puberty.

Pubescent (*pu-bes'-ent*) [*pubes*, pubes]. 1. Downy, or hairy. 2. Approaching or arriving at the age of puberty. **P. Uterus,** an abnormality of the uterus in which the characters of that organ peculiar to the epoch preceding puberty persist in the adult.

Pubetrotomy (*pu-be-trot'-o-me*) [*pubes*, pubes; ἦτρον, pelvis; τομή, a cutting]. Pelvic section through the pubes.

Pubic (*pu'-bik*) [*pubes*, pubes]. Pertaining to the pubes. **P. Symphysis.** See *Symphysis*.

Pubigerous (*pu-bij'-er-us*) [*pubes*, hair; *gerere*, to carry]. Bearing or covered with down or soft hairs.

Pubio-femoralis (*pu-be-o-fem-or-a'-lis*). Synonym of *Adductor longus*.

Pubio-infra-abdominalis (*pu-be-o-in-frah-ab-dom-in-a'-lis*). Synonym of *Pyramidalis*.

Pubio-ischiadic, Pubio-ischiatic (*pu-be-o-is-ke-ad'-ik, pu'-be-o-is-ke-at'-ik*) [*pubes*, pubes; ἰσχίον, ischium]. Pertaining to the pubes and the ischium.

Pubio-prostaticus (*pu-be-o-pros-tat'-ik-us*). Synonym of *Compressor prostatæ*.

Pubio-sternalis (*pu-be-o-ster-na'-lis*). Synonym of *Rectus abdominis*.

Pubiotomy (*pu-be-ot'-o-me*) [*pubes*, pubes; τομή, a cutting]. An operation for enlarging the diameter of the pelvic outlet by cutting through the pubic bone to facilitate delivery in cases of pelvic malformation; it is now generally termed symphysiotomy.

Pubio-umbilicalis (*pu'-be-o-um-bil-ik-a'-lis*). Synonym of *Pyramidalis*.

Pubis, or Os Pubis (*pu'-bis*). Same as *Pubes*.

Pubo- (*pu'-bo-*) [*pubes*, pubes]. A prefix denoting relation to the pubes.

Pubo-cavernosus (*pu-bo-kav-ern-o'-sus*). Synonym of *Compressor venæ dorsalis*.

Pubo-coccygeal (*pu-bo-kok-sij-e'-al*) [κόκκυξ, coccyx]. Pertaining, or having relation to the os pubis and the coccyx.

Pubo-femoral (*pu-bo-fem'-o-ral*) [*pubes*, pubes; *femur*, femur]. Pertaining to the pubes and the femur.

Pubo-iliac (*pu-bo-il'-e-ak*) [*pubes*, pubes; *ilium*, ilium]. Common to the pubes and the ilium.

Pubo-ischiatic (*pu-bo-is-ke-at'-ik*). Synonym of *Pubio-ischiatic*.

Puboischium (*pu-bo-is'-ke-um*) [*pubes*, pubes; ἰσχίον, ischium]. The os pubis and the ischium considered as a unit.

Pubo-prostatic (*pu-bo-pros-tat'-ik*) [*pubes*, pubes; προστάτης, prostate]. Pertaining to the os pubis and the prostate gland. As a noun, *Wilson's Muscle*. See *Muscles, Table of*.

Pubo-tibial (*pu-bo-tib'-e-al*) [*pubes*, pubes; *tibia* tibia]. Pertaining to the pubes and the tibia.

Pubo-trochantericus (*pu-bo-tro-kan-ter'-ik-us*). Synonym of *Pectineus*.

Pubo-urethral (*pu-bo-u-re'-thral*) [*pubis*, pubis; *urethra*, urethra]. Passing from the pubis to the urethra.

Pubo-urethralis (*pu-bo-u-re-thra'-lis*). Synonym of *Wilson's Muscle*.

Pubo-vesical (*pu-bo-ves'-ik-al*). Synonym of *Compressor prostatæ*. See *Muscles, Table of*.

Puccin (*puk'-sin*). A substance found in *Sanguinaria canadensis*. Its exact nature is not yet known.

Pucelage (*pu'-sel-āj*, or *pu-sel-ahzh'*) [Fr.]. Virginity.

Pudenda (*pu-den'-dah*). See *Pudendum*.

Pudendagra (*pu-den-da'-grah*) [*pudere*, to be ashamed; ἀγρα, a seizure]. 1. Pain in the genital organs. 2. Primary syphilis, especially of the female genital organs. **P. pruriens,** pruritus vulvæ.

Pudendal (*pu-den'-dal*) [*pudere*, to be ashamed]. Pertaining to the pudenda.

Pudendum (*pu-den'-dum*) [*pudere*, to be ashamed; *pl.*, *Pudenda*]. The genital organs, especially those

EXTERNAL GENITALIA OF FEMALE.

1. Labium majus of right side. 2. Fourchet. 3. Labium minus. 4. Clitoris. 5. Urethral orifice. 6. Vestibule. 7. Orifice of the vagina. 8. Hymen. 9. Orifice of the vulvo-vaginal gland. 10. Anterior commissure of the labia majora. 11. Orifice of the anus.

parts of the female genital organs visible externally. These are the mons veneris, the labia, clitoris, nympha and hymen.

Pudibilia (*pu-dib-il'-e-ah*) [*pudibilis*, shameful]. The genital organs, especially of the male.

Pudic (*pu'-dik*) [*pudicus; pudere*, to be ashamed]. Pertaining to the genital organs or related parts. **P. Artery.** See *Arteries, Table of*. **P. Nerve.** See *Nerves, Table of*.

uerile (*pu'-er-il*) [*puerilis; puer*, boy]. Pertaining to boyhood or childhood. **P. Respiration,** a form of respiration sometimes observed in adults and similar to that heard in vigorous, healthy children.

uerpera (*pu-er'-pe-rah*) [*puer*, boy, child; *parere*, to bear]. A woman in labor, or one recently delivered.

uerperal (*pu-er'-pe-ral*) [*puerpera*, puerpera]. Pertaining to the state of a woman in childbed. **P. Convulsions.** See *Eclampsia.* **P. Fever,** an acute, grave, febrile affection of women in childbed, usually due to septic infection. See *Fever.* **P. Insanity,** insanity occurring during the puerperium, usually within five or ten days after delivery. The insanity may take the form of mania, melancholia, or dementia. **P. Mania,** a delirious condition of women sometimes occurring in the puerperium. See *Insanity, Confusional.* **P. Sepsis, P. Septicemia.** See *P. Fever.* **P. Tetanus,** tetanus, occurring rarely in the puerperium. It is usually fatal.

uerperality (*pu-er-per-al'-it-e*) [Fr., *Puerpéralité*]. The puerperal condition.

uerperium (*pu-er-pe'-re-um*) [L.; *puer*, boy, child; *parere*, to bear]. The puerperal state or season; the period from birth to the time when the uterus has regained its normal size, which is about six weeks.

uerperopyra (*pu-er-per-o-pi'-rah*) [*puer*, boy, child; *parere*, to bear; πῦρ, fire, fever]. Puerperal fever.

uerpero-typhus (*pu-er'-per-o-ti'-fus*) [*puer*, child; *parere*, to bear; τῦφος, stupor]. A typhoid state developing in the course of any grave puerperal disease.

uerperous (*pu-er'-per-us*). Same as *Puerperal.*

uerpery (*pu-er'-per-e*) [*puerperium*, childbirth]. The puerperal state.

uff-ball. See *Lycoperdon giganteum, bovista.*

uffiness (*puf'-in-es*) [ME., *puf*, a puff]. Swelling or intumescence of the tissues; an edematous condition.

uffy (*puf'-e*) [ME., *puf*, a puff]. Tumid, swollen, or puffed up, as with air; swollen and soft. **P. Tumor,** Pott's. See *Tumor.*

ug [origin obscure]. A term signifying dwarf. **P.-nose,** *Snub-nose,* turned-up nose; a deformity of the nose characterized by a flattening of the organ and a tilting up of its tip. **P.-tooth,** a canine tooth.

ugil, Pugillus (*pu'-jil, pu-jil'-us*) [L., a handful]. The amount of a substance that can be grasped between the thumb and two or three fingers. See also *Manipule.*

gioniform (*pu-je-on'-if-orm*) [*pugio*, a dagger; *forma*, form]. Shaped like a dagger.

ke (*puk*) [origin obscure]. A colloquialism signifying vomit and generally used as a verb.

king (*pul'-king*) [origin obscure]. Vomiting. **P. Fever.** Synonym of *Milk-sickness.*

lex (*pu'-leks*) [L.]. A flea. A genus of insects partly parasitic upon the skin. **P. irritans,** *Flea;* a transient parasite on man. The bite causes an itching, circular, red spot of hyperemia, in the center of which is a little speck where the boring apparatus has entered. It may produce an irritable urticaria. **P. penetrans,** the chigoe, or jigger flea, a species the female of which, much smaller than the ordinary flea, burrows under the skin of the feet to deposit its ova. A high degree of irritation, which may go on to serious inflammation, is produced. It is found mainly in tropical America and in Africa. See *Parasites (Animal), Table of.*

licatio (*pu-lik-a'-she-o*) [*pulex*, flea]. The state of being infested with fleas.

licene (*pu'-lis-ēn*) [*pulex*, a flea]. Pertaining to fleas.

licose (*pu'-lik-ōs*) [*pulex*, flea]. Abounding with fleas.

Pulley [origin uncertain]. 1. One of the mechanical powers. 2. A trochlea, *q. v.* 3. A ligamentous structure which serves to change the direction of the action of a muscle passing through or over it.

Pulling [ME., *pullen*, to pull]. One of the Swedish movements that may be either active or passive.

Pullulate (*pul'-u-lāt*) [*pullulare*, to put forth]. To germinate, to bud.

Pullulation (*pul-u-la'-shun*) [*pullulare*, to put forth; to bud, to sprout]. In biology, that form of cell-multiplication in which the mother-cell forms a minute protuberance on one side, which afterward increases to the size of the parent-cell. It is also called budding. This is the ordinary form of cell-multiplication in the yeast-plant and its allies.

Pullus (*pul'-us*) [*pullus*, a young animal]. In biology, the young of a bird or other animal.

Pulmo-aortic (*pul-mo-a-or'-tik*) [*pulmo*, lung; ἀορτή, aorta]. Pertaining to the lungs and the aorta.

Pulmobranchiæ (*pul-mo-brang'-ke-e*) [*pulmo*, lung; *branchiæ*, gills]. In biology, the modified gills of certain animals (snails, spiders) adapted to breathing in air.

Pulmobranchial (*pul-mo-brang'-ke-al*) [*pulmo*, lung; *branchiæ*, gills]. Pulmonate, breathing by gills.

Pulmobranchiate (*pul-mo-brang'-ke-āt*) [*pulmo*, lung; *branchiæ*, gills]. Provided with pulmobranchiæ.

Pulmocardiac (*pul-mo-kar'-de-ak*) [*pulmo*, lung; καρδία, heart]. Pertaining to the lungs and the heart. **P. Region,** that portion of the thorax in which the heart is covered by the lungs.

Pulmocutaneous (*pul'-mo-ku-ta'-ne-us*) [*pulmo*, lung; *cutis*, skin]. Pertaining to the lungs and the skin.

Pulmogastric (*pul-mo-gas'-trik*) [*pulmo*, lung; γαστηρ, stomach]. Pertaining to the lungs and the stomach. **P. Region,** that portion of the thorax in which the lungs overlap the stomach.

Pulmohepatic (*pul-mo-he-pat'-ik*) [*pulmo*, lung; ἡπαρ, liver]. Relating to the lungs and the liver. **P. Region,** that portion of the thorax in which the lungs overlap the liver.

Pulmometer (*pul-mom'-et-er*) [*pulmo*, a lung; μέτρον, measure]. Synonym of *Spirometer.*

Pulmometry (*pul-mom'-et-re*) [*pulmo*, lung; μέτρον, measure]. The quantitative determination of the air concerned in respiration. Also, the determination of the volume of the lungs.

Pulmonar (*pul'-mo-nar*) [*pulmo*, lung]. Having lungs or lung-like organs.

Pulmonarious (*pul-mo-na'-re-us*) [*pulmo*, lung]. Affected with pulmonary disease.

Pulmonary (*pul'-mo-na-re*) [*pulmo*, lung]. Pertaining to the lung. **P. Alveoli,** air-cells. **P. Artery.** See *Arteries, Table of.* **P. Cartilage,** the second costal cartilage of the left side. **P. Circulation,** the lesser circulation of the blood from the right cardiac ventricle through the pulmonary vessels and back to the left auricle. **P. Consumption.** See *Phthisis.* **P. Emphysema.** See *Emphysema.* **P. Groove,** the groove within the thorax on either side of the spinal column. **P. Incompetence.** See *Endocarditis.* **P. Murrain,** a contagious form of pleuropneumonia. **P. Nerves,** branches of the vagus nerve going to the lungs. There are two sets, an anterior and a posterior. **P. Sinuses,** the sinuses of Valsalva of the pulmonary artery. **P. Stenosis.** See *Endocarditis.* **P. Valves,** the semilunar valves at the opening of the right ventricle into the pulmonary artery. **P. Veins,** four veins returning the oxygenated blood from the lungs to the left auricle. **P. Vesicles,** air-cells of the pulmonary parenchyma.

Pulmonata (*pul-mo'-nat-ah*) [*pulmo*, lung]. A class of land or fresh-water molluscs breathing by means of a pulmonary sac, gills being absent.

Pulmonate (*pul'-mo-nāt*) [*pulmo*, lung]. In biology, possessed of lungs or organs adapted to aërial respiration.

Pulmonectomy (*pul-mo-nek'-to-me*). See *Pneumonectomy*.

Pulmonic (*pul-mon'-ik*) [*pulmo*, lung]. Synonym of *Pulmonary*. **P. Circulation.** See *Pulmonary Circulation*. **P. Fever**, a synonym of *Croupous Pneumonia*.

Pulmoniferous (*pul-mon-if'-er-us*) [*pulmo*, lung; *ferre*, to bear]. Provided with lungs; pulmonate.

Pulmonitis (*pul-mon-i'-tis*). Synonym of *Pneumonia*.

Pulmotracheal (*pul-mo-tra'-ke-al*) [*pulmo*, lung; *trachea*, trachea]. Pertaining to the lungs and the trachea.

Pulp [*pulpa*, pulp]. A soft, moist tissue; chyme. **P.-cavity**, the hollow space in a tooth containing the dental pulp. **P.-cells**, cells found in the pulp-tissue of any organ. **P., Dental**, a soft tissue filling the pulp-cavity of a tooth. It consists of loose connective tissue and cells, vessels, and nerves. Also the rudiment of a tooth. **P., Digital**, the sensitive, elastic, convex prominence on the palmar or plantar surface of the terminal phalanx of a finger or toe. **P. of the Finger.** See *P., Digital*. **P., Fruit**, the fleshy part of fruits by which the seeds are surrounded. **P., Hair.** Synonym of *Papilla, Hair*. **P. of the Intervertebral Discs**, the soft substance in the center of the intervertebral dics, the remains of the chordæ dorsalis. **P., Spleen, P., Splenic**, the substance filling the spaces formed by the trabeculæ of the spleen. See *Spleen*. **P. of a Tooth.** See *P., Dental*.

Pulpa (*pul'-pah*) [L.]. Pulp. **P. cerebralis**, the white matter of the brain. **P. dentis**, a dental pulp. **P. digitorum.** Synonym of *Pulp, Digital*. **P. lienis.** Synonym of *Pulp, Splenic*. **P. pili.** Synonym of *Papilla, Hair*. **P. testiculi, P. testis**, the tissue contained in the space formed by the connective-tissue septa of the testis.

Pulpalgia (*pul-pal'-je-ah*) [*pulpa*, pulp; ἄλγος, pain]. Pain in tooth-pulp.

Pulpamen (*pul-pa'-men*). Synonym of *Pulp*.

Pulpefaction (*pul-pe-fak'-shun*) [*pulpa*, pulp; *facere*, to make]. Conversion into a pulpy substance.

Pulpezia (*pul-pe'-ze-ah*). Synonym of *Apoplexy, Cerebral*.

Pulpitis (*pul-pi'-tis*) [*pulpa*, pulp; ιτις, inflammation]. Inflammation of dental pulp. The causes of pulpitis are exposure of the pulp by decay, abrasions of the teeth, etc.

Pulpose, Pulpous, Pulpy (*pul'-pōz, pul'-pus, pul'-pe*) [*pulpa*, pulp]. Resembling or containing pulp. **P. Disease.** See *Brodie's Disease*.

Pulque (*pul'-ke*) [Sp.]. A fermented beverage prepared in Mexico from the juice of various species of *Agave*. **P. Brandy.** See *Mezcal*. **P. Plant.** See *Agave*.

Pulsate (*pul'-sāt*) [*pulsare*, to beat]. To beat or throb.

Pulsatile (*pul'-sat-il*) [*pulsare*, to beat]. Pulsating; throbbing; exhibiting pulsation.

Pulsatilla (*pul-sat-il'-ah*) [L.]. Pasque Flower. Meadow Anemone. The leaves and tops of *Anemone P.* Its properties are due to a camphoraceous principle, anemonin, $C_{15}H_{12}O_6$, which depresses the circulation; in larger doses paralyzes motion. The extract in toxic doses causes convulsions, but anemonin does not. It has been used in amenorrhea, dysmenorrhea, bronchitis, and asthma. It is a valuable alterative. An unofficial tincture consists of equal parts of the juice and alcohol. Dose ♏ $\frac{1}{10}$–x; of the active principle gr. $\frac{1}{10}$–ij; of the liquid extract, ♏ j–v.

Pulsating (*pul'-sa-ting*) [*pulsare*, to beat]. Exhibiting pulsation. **P. Aorta**, the pulsation of the abdominal aorta seen in nervous and anemic persons. **P. Bronchocele**, a goiter exhibiting pulsation. **P. Empyema**, an accumulation of pus in the pleural cavity, and which displays pulsation. **P. Tumor**, one which pulsates, in consequence of an enlarged state of its blood-vessels.

Pulsation (*pul-sa'-shun*) [*pulsatio; pellere*, to drive]. Any beating or throbbing. The visible or sensible elevation of a vessel synchronously with or following the heart's beat; the pulse-beat. **P., Abdominal**, pulsation in the abdomen, usually in the median line. It is due to a pulsating aorta, *q. v.*, or to aortic aneurysm, or to the impulse transmitted to a tumor resting on the aorta. **P., Carotid**, pulsation of the carotid arteries in the neck. It occurs in aortic regurgitation, exophthalmic goiter, anemia, and cardiac excitement. **P., Epigastric**, pulsation in the epigastrium. It is seen in excitement of the action of the heart, in aneurysm of the aorta, in enlargement of the right heart, in tumors resting on the aorta; in hysteric and anemic subjects the pulsation of the abdominal aorta may be visible in the epigastrium. **P., Hepatic**, pulsation of the liver at each cardiac systole, due to insufficiency of the tricuspid valve, with a consequent transmission of a pulse along the vena cava. **P., Retinal**, pulsation of the retinal vessels, seen in the eye as a consequence of the disturbance of the relation between the intraocular and the extraocular pressure. **P., Secondary**, the contraction in the muscle of a muscle-nerve preparation if its nerve is laid on a second contracting muscle. **P., Stair-case**, the increase in the length of successive contractions of a frog's heart that has been filled with serum. **P., Suprasternal**, pulsation at the suprasternal notch. It may be due to aneurysm, dilated aortic arch, or to the presence of an anomalous artery.

Pulsatory (*pul'-sat-or-e*) [*pulsare*, to beat]. Exhibiting or characterized by pulsation.

Pulse (*puls'*) [*pulsus*, the pulse]. The change in the shape and size of an artery due to a temporary increase in the tension of its walls following the contractile action of the heart. It can only be felt when the artery is somewhat compressed and flattened against a bone or other hard substance. **P., Abrupt.** Synonym of *P., Quick*. **P., Allorrhythmic.** See *Allorrhythmia*. **P., Anacrotic.** See *Anacrotism*. **P., Aneurysmal**, the pulse produced by an aneurysm of the thoracic aorta or one of its large branches. The impulse is not sudden, is long in duration, and subsides gradually; it may be much slower than the pulse on the opposite side. **P., Angry.** Synonym of *P., Wiry*. **P., Apoplectic**, a condition of the radial artery at the wrist, marked by fulness, without great hardness, the vessel generally being dilated and tortuous. The predicrotic notch is deep and close to the percussion-wave, the dicrotic notch is deep, and the dicrotic wave is short; the total extent of the wave is small. It is seen in impoverished conditions of the blood, in rheumatism, gout, lithemia, and contracted kidneys. **P., Arachnoid**, a small, feeble, tremulous pulse. (Old.) **P., Bounding**, a pulse in which a weak beat is succeeded by a strong, full beat. **P., Capillary**, seen when the capillaries are dilated and the blood-pressure is high, as in aortic regurgitation. **P., Catacrotic**, one with an elevation in the line of descent in the syphygmographic tracing. **P.-clock.** See *Angiometer*. **P., Collapsing.** See *Corrigan's*

Pulse. **P., Compressible,** a pulse that is easily obliterated by pressure with the finger; a soft pulse. **P., Cordy,** a tense pulse. **P., Corrigan's.** See *Corrigan.* **P.-curve,** the tracing, called a sphygmogram or arteriogram, of the pulse, made by the sphygmograph or sphygmoscope. **P., Decurtate.** See *Pulsus myurus.* **P., Dicrotal, P., Dicrotic,** an exaggerated dicrotic wave, or recoil wave, the larger of the catacrotic elevations corresponding to the closure of the aortic valves. It is observed when the arterial tension is low and gives to the finger the impression of two beats. **P., Dropped-beat.** Synonym of *P., Intermittent.* **P., Elastic,** one that feels elastic to the finger. **P., Endopleural,** a pulsation of pulsating pleurisy which can only be rendered visible by means of a manometer. **P., Entoptic,** the subjective illumination in a dark, visual field, after violent exercise, corresponding to each heart-beat. **P., Epigastric.** See *Pulsation, Epigastric.* **P., Exopleural,** the pulsation of a pulsating pleurisy that is visible without the use of a manometer. **P., Filiform.** Synonym of *P., Thready.* **P., Full,** a pulse in which the artery is filled with a large volume of blood and conveys a feeling of being distended. **P., Gaseous,** the pulse of an artery that has lost its tone; it is full, but exceedingly compressible. **P., Goatleap.** See *Pulsus caprizans.* **P., Hard,** one with character of high tension and rigidity. **P., Hemorrhagic.** Synonym of *P., Gaseous.* **P., Heterochronic.** Synonym of *P., Irregular.* **P., High Tension,** one due to increase of the peripheral resistance, together with a corresponding increase in the force of the ventricular systole. It is gradual in its impulse, long in duration, slow in subsiding, with difficulty compressible, and the artery between the beats feels like a firm, round cord. **P., Hyperdicrotic, P., Hyperdicrotous,** a pulse of which the aortic notch falls below the base line, indicating very low tension, a symptom of great exhaustion. **P., Infrequent,** properly, a pulse due to diminished rate of heart-beat; often, however, used as synonymous with slow pulse. **P., Intermittent,** one in which one or more beats may be dropped. **P., Irregular,** one in which the beats occur at irregular intervals, or in which the force, or even both the rhythm and force, vary. **P., Jerking,** a pulse in which the artery is suddenly and markedly distended, as in aortic regurgitation. **P., Jugular,** pulsation of the jugular veins in the neck. It may be merely transmitted from the arteries or may be due to tricuspid regurgitation. **P., Locomotive.** Synonym of *Corrigan's Pulse.* **P., Low Tension,** one that is sudden in its onset and short, and quickly declining. It is easily obliterated by pressure. **P., Monocrotic, P., Monocrotous,** one with absence of the dicrotic wave. **P., Myurous.** See *Pulsus myurus.* **P. paradoxic,** one due to failure of the heart during inspiration, seen sometimes in adherent pericardium. **P., Polycrotic,** a pulse in which there are a number of secondary waves, as in the smaller arteries. It can only be demonstrated with the sphygmograph. **P., Quick,** one that strikes the finger rapidly, but leaves it also rapidly. Corrigan's pulse is a quick pulse. **P.-rate,** the number of pulsations of an artery in a given time, usually in a minute. **P., Recurrent,** the appearance of the pulse on the distal side of the point of compression of an artery. **P., Renal,** the tense, full pulse seen in association with chronic nephritis. **P., Respiratory,** the alternate dilatation and collapse of the cervical veins occurring synchronously with expiration (dilatation) and inspiration (collapse). **P., Short,** one in which the systolic wave is short. **P., Slow,** one indicating a lengthened systolic contraction of the heart and prolonged diastole; as generally used, it signifies a pulse of slow rate. **P., Soft,** a pulse that is readily compressed. **P., Splashing.** Synonym of *P., Jerking.* **P., Steel-hammer,** the abrupt, full pulse felt in the arteries near a joint the seat of acute rheumatism. **P., Tense.** Synonym of *P., Hard.* **P., Thready,** one which is scarcely perceptible. It is met with in syncope, under conditions of collapse; and in the terminal stage of fatal diseases. **P.-tracing.** See *P.-curve* and *Sphygmogram.* **P., Tremulous,** one in which the finger detects a quivering of the artery with each pulse. **P., Tricrotic,** a pulse in which the three waves usually present are unusually well marked. **P., Undulating,** one that conveys to the finger a sensation of successive waves. **P., Unequal,** one in which the beats vary in force. **P., Unsustained.** See *Corrigan's Pulse.* **P., Vaginal,** a throbbing or pulsation felt in the vagina during pregnancy, or in conditions of intense pelvic engorgement. **P., Venous,** 1. Pulsatile phenomena occasionally observed in veins, especially in the eye. It is also sometimes seen in the jugular veins. See *P., Jugular.* 2. The normal pulse in the cervical veins due to the respiratory movements. See *P., Respiratory.* **P., Vermicular,** a pulse, usually small and rapid, conveying to the finger a sensation of worm-like motion. **P., Virtual Tension,** the pulse of high tension associated with a failing heart; the artery is still full between the beats, but is generally large, the impulse is sudden, lasts but a short time, and suddenly declines. See also *Pulses.* **P., Water-hammer.** See *Corrigan's Pulse.* **P.-wave,** the condition of expansion which begins with each cardiac systole, and is propagated along the aorta and the arteries, ending normally at the capillaries. **P., Waxing and Waning.** See *Pulsus inciduus.* **P., Wiry,** a small, rapid, tense pulse, feeling like a cord under the finger. It is typified by the pulse of acute peritonitis.

Pulsellum (*pul-sel'-um*) [*pulsellum*, dim. of *pulsus*, a beating: *pl.*, *Pulsella*]. In biology, a propulsive filament; a modified form of flagellum, characteristic of spermatozoa.

Pulsilegium (*pul-sil-e'-je-um*). See *Pulsilogium.*

Pulsilogium (*pul-sil-o'-je-um*) [*pulsus*, pulse; λόγος, a reckoning]. An obsolete instrument, invented by Galileo and improved by Sanctorius, for registering the character of the pulse; a pulse-clock.

Pulsilogon (*pul-sil'-o-gon*). See *Pulsilogium.*

Pulsilogram (*pul-sil'-o-gram*). The record of a *Pulsilogium.*

Pulsimeter (*pul-sim'-et-er*) [*pulsus*, pulse; μέτρον, measure]. Any instrument for the quantitative determination of the rate or force of the pulse.

Pulsograph (*pul'-so-graf*). Same as *Sphygmograph.*

Pulsometer (*pul-som'-et-er*). Same as *Pulsimeter.*

Pulsus (*pul'-sus*) [L.]. The pulse. **P. æqualis,** one in which the beats are equal. **P. alternans,** one in which there is a regular alternation of strong and weak beats. The weak beat may be imperceptible, in which case two heart-beats correspond to only one beat of the pulse. **P. araneosus.** Synonym of *Pulse, Arachnoid.* **P. bigeminus,** one in which the beats occur in pairs, so that a longer pause follows every two beats. **P. bisferiens,** observed in aortic stenosis in which there is a reinforcement of a prolonged ventricular systole near its close by an accessory spasmodic contraction. **P. bisiliens, P. bispulsorus.** See *P. Bisferiens.* **P. caprizans,** in the hyperdicrotic pulse, a condition in which the second beat is felt as a grace-note to the succeeding primary beat; *goatleap pulse.* **P. celer,** the quick, short pulse.

P. celer et altus, the quick, full pulse, seen especially in aortic regurgitation. **P. cerebralis,** the slow pulse sometimes present in apoplexy. **P. cordis,** the apex-beat. **P. crassus,** a strong, full pulse. **P. debilis,** a feeble pulse. **P. deficiens,** true intermittence of the pulse, due to actual absence of systole. **P. dicrotus.** See *Pulse, Dicrotic.* **P. differens,** a condition in which the pulse of one artery is found to differ from that of the corresponding vessel of the other side. **P. duplex.** Synonym of *Pulse, Dicrotic.* **P. durus,** the hard pulse of high tension. It is characterized chiefly by early, distinct, and numerous elastic elevations, and a small dicrotic wave. **P. endopleuricus.** See *Pulse, Endopleural.* **P. exopleuricus.** See *Pulse, Exopleural.* **P. filiformis.** Synonym of *Pulse, Thready.* **P. fortis.** Synonym of *Pulse, Hard.* **P. imminutus.** Synonym of *Pulse, Myurous.* **P. inæqualis.** See *Pulse, Unequal.* **P. inanis.** Synonym of *Pulse, Thready.* **P. inciduus,** the *waxing and waning pulse;* it consists of successive short periods of pulsations, beginning with a strong beat, and, after gradual diminution, ending with a weak beat. **P. inflammatorius,** the tense pulse met with in inflammation. **P. intercidens.** Same as *P. intercurrens.* **P. intercisus.** Synonym of *Pulse, Dicrotic.* **P. intercurrens,** one in which an extra beat is intercalated in a normal series. **P. intermittens,** one in which in an otherwise regular rhythm a beat is omitted. **P. lentus.** Synonym of *Pulse, Slow.* **P. magnus,** the large, full pulse. **P. mollis,** the soft pulse of low tension. **P. myurus,** a pathologic curiosity, in which the pulse-strength gradually tapers away "like the tail of a mouse." It was formerly frequently present after the practice of bleeding. **P. paradoxicus, P. paradoxus.** See *Pulse, Paradoxic.* **P. parvus,** the small pulse of failing heart. **P. plenus,** a full pulse. **P. quadrigeminus** and **P. trigeminus,** pulses in which the irregularities occur after every fourth and third beat respectively. **P. rarissimus.** See *Bradycardia.* **P. rarus,** a pulse of slow rhythm; an infrequent pulse. **P. tardus,** the slow or long pulse, observed when the heart's action is labored. It is present in aortic and mitral stenosis, in aneurysm, and in senility. **P. triferiens,** observed in aortic stenosis, due to the reinforcement of a prolonged ventricular systole near its close by two accessory spasmodic contractions. **P. undosus, P. undulosus.** See *Pulse, Undulating.* **P. vacuus.** Synonym of *Pulse, Thready.* **P. venosus.** See *Pulse, Venous.*

Pultaceous (*pul-ta'-se-us*) [*puls,* pottage]. Having the consistence of pulp or pottage.

Pulver (*pul'-ver*). See *Pulvis.*

Pulveraceous (*pul-ver-a'-she-us*). Synonym of *Pulverulent.*

Pulveres (*pul'-ver-ēz*). Plural of *Pulvis.*

Pulverflator (*pul'-ver-fla-tor*) [*pulvis,* powder; *flare,* to blow]. An instrument designed for blowing or spraying impalpable powders.

Pulveris (*pul'-ver-is*). Genitive case of *Pulvis.*

Pulverization (*pul-ver-iz-a'-shun*) [*pulvis,* powder]. The operation of reducing a substance to powder.

Pulverous (*pul'-ver-us*) [*pulvis,* powder]. Consisting of dust or powder.

Pulverulent (*pul-ver'-u-lent*) [*pulverulentus,* full of dust; *pulvis,* powder]. 1. In biology, powdery, dusty. Covered with something resembling a fine powder. 2. Readily reduced to a powder; but slightly coherent (said of tissues).

Pulvillar (*pul'-vil-ar*) [*pulvillus,* a little cushion]. Cushion-like.

Pulvilliform (*pul-vil'-if-orm*) [*pulvillus,* a little cushion; *forma,* form]. In biology, resembling a pulvillus.

Pulvillus (*pul-vil'-us*) [*pulvillus,* a little cushion: *pl.,* *Pulvilli*]. In biology, the cushion, pad, or sucker-like structure of an insect's foot. Cf. *plantula, onychium, empodium.*

Pulvinar (*pul'-vin-ar*) [L., "couch"]. 1. The posterior tubercle of the thalamus opticus. 2. The fatty mass that occupies a part of the acetabulum. 3. A surgical pad. 4. A medicated cushion.

Pulvinate (*pul'-vin-āt*). Same as *Pulvinar.*

Pulviniform (*pul-vin'-if-orm*). Same as *Pulvinate.*

Pulvinulus (*pul-vin'-u-lus*). Same as *Pulvillus.*

Pulvinus (*pul-vi'-nus*) [*pulvinus,* cushion, pillow: *pl.,* *Pulvini.*]. In biology, an enlargement at the base of some leaves or of the leaflets of some compound leaves. Cf. *cushion.*

Pulvis [L.; *gen., pulveris: pl., Pulveres*]. A powder. In pharmacy, one or more medicinal substances reduced to a state of very fine division. There are nine official *pulveres.* **P. antimonialis.** See *Powder, James'.* **P. aromaticus,** a mixture of cinnamon and ginger, each 35 parts, in No. 60 powder, and with nutmeg in No. 20 powder and cardamom seeds, each 15 parts. **P. cretæ compositus,** consists of prepared chalk 30, powdered acacia 20, and sugar 50 parts. Dose 10–60 grains. A mild astringent. **P. Doveri.** See *Powder, Dover's.* **P. effervescens compositus,** Seidlitz powder. A preparation consisting of two powders: the white paper contains 35 grains of tartaric acid, the blue paper, 40 grains of sodium bicarbonate and 2 drams of Rochelle salt. **P. glycyrrhizæ compositus,** consists of senna, 18; licorice, 16; fennel, 8; washed sulphur, 8; sugar, 50. **P. ipecacuanhæ et opii.** See *Powder, Dover's.* **P. jalapæ compositus,** consists of jalap, 35 parts; cream of tartar, 65 parts. It is a useful hydragogue cathartic. Dose 30 to 60 grains. **P. opii.** See *Opium.* **P. parturiens,** an old name for ergot. **P. rhei compositus,** consists of rhubarb, 25; magnesia, 65; ginger, 10 parts. A mild laxative. Dose 30 to 60 grains.

Pumice (*pum'-is,* or *pu'-mis*) [*pumex*]. Pumice-stone, used as a detergent for the skin and an ingredient in some dentrifices.

Pumiced Sole. In farriery, that condition in which the horny sole in the neighborhood of the toe readily crumbles away and leaves the sensitive tissues more or less exposed.

Pumiceous (*pum-is'-e-us*) [*pumiceus,* of pumice]. Pertaining to or consisting of pumice.

Pump [ME., *pumpe,* a pump]. A mechanical apparatus which, by creating a vacuum between its valves, either sucks up a liquid into its hollow chamber, or, after sucking up the liquid, forcibly ejects it from one end. **P., Air,** a pump used to exhaust the air from a chamber or vessel, or to force more air into a vessel already filled with air. **P., Breast,** a pump for removing milk from the breast. **P., Dental,** a device for removing saliva from the mouth during dental operations. **P., Force,** one which forcibly ejects from one end the liquid which it has sucked into the barrel. **P., Lift,** the ordinary suction-pump. **P., Milk.** Synonym of *P., Breast.* **P., Stomach,** a pump for removing the contents of the stomach in cases of poisoning. It consists of a barrel, a delivery tube, and a flexible tube to be introduced into the stomach. **P., Suction,** one which sucks up the liquid into a barrel.

Pumpkin Seed. See *Pepo.*

Puna (*pu'-nah*). See *Mountain Sickness.*

Punch [*punctuare,* to pierce]. 1. A mixed alcoholic or vinous beverage. There are many kinds; as milk-punch, tea-punch, claret-punch, rum-punch, arrack-

punch. 2. An instrument used in extracting stumps of teeth.

'unch's Voice. A peculiar bell-like, or ringing tone of voice, like that assumed by "Punch" in the Punch and Judy shows. It is sometimes heard among the insane, and has been thought to be sometimes a forerunner of violent and homicidal attacks.

unching-bag (*punch'-ing-bag*). A bag suspended from the ceiling, to be struck and punched, in physical exercise.

ıncta (*punk'-tah*) [pl. of *Punctum*, a point]. Points. **P. cruenta.** Synonym of *P. vasculosa.* **P. dolorosa,** tender or painful points in the course of nerves in an inflamed condition, or at the exit of nerves the seat of neuralgia. See *Valleix's Points.* **P. lacrimalia,** the orifices of the lacrymal canaliculi in the eyelids near the inner canthus. **P. vasculosa,** minute red spots studding the cut surface of the white central mass of the brain. They are produced by the blood escaping from divided blood-vessels.

ınctate, Punctated (*punk'-tāt, punk-ta'-ted*) [*punctum*, point]. Having many points. Dotted. Full of minute punctures.

ınctation (*punk-ta'-shun*). See *Tapotement.*

ıncticula (*punk-tik'-u-lah*). Synonym of *Petechia.*

ıncticulate, Puncticulose (*punk-tik'-u-lāt, punk-tik'-u-lōz*) [*puncticulum*, dim. of *punctum*, point]. Marked by minute puncta.

ınctiform (*punk'-tif-orm*) [*punctum*, point; *forma*, form]. Having the nature or qualities of a point; seeming to be located at a point; as a *punctiform* sensation.

ınctulate (*pungk'-tu-lāt*) [*punctulum*, a small point]. Minutely punctate.

ınctule (*pungk'-tūl*) [*punctulum*, a small point]. A small puncture or dot.

ınctum (*pungk'-tum*) [L., a point, dot: *pl.*, *Puncta*]. A point or minute area. **P. aureum.** See *Macula lutea.* **P. cæcum.** See *Blind Spot.* **P. fixum,** the point of attachment of a muscle. **P. foraminis incisivi,** Lissauer's term for the posterior border of the incisor foramen. **P. foraminis magni anterius.** Synonym of *Basion.* **P. insertionis,** the point of insertion of a muscle. **P. nasale inferius.** Synonym of *Rhinion.* **P. ossificationis.** See *Center of ossification.* **P. præmaxillare.** Synonym of *Point, alveolar.* **P. proximum,** the point nearest the eye at which an object can be seen with distinctness and without diplopia. **P. remotum,** the farthest point at which an object can be distinctly seen with suspended accommodation. In the emmetropic eye it is theoretically at an infinite distance; in the hyperopic eye it is theoretically beyond this, as such an eye is adapted only for convergent rays. **P. radiens,** the first trace of the embryonic heart. **P. spinæ nasalis anterioris,** the apex of the anterior nasal spine, or if it be absent, the upper extremity of the suture between the two maxillæ. **P. spinæ nasalis posterioris,** the center of the posterior nasal spine. **P. vegetationis,** the vegetating point. Applied to the growing-point of an organ, as of a stem or root.

Puncturation (*punk-tu-ra'-shun*) [*pungere*, to prick]. The making of punctures; acupuncture.

Puncture (*punk'-chūr*) [*pungere*, to prick]. A wound or hole made by a pointed instrument. **P., Capillary,** a puncture made with a needle of capillary fineness. **P.-diabetes,** diabetes caused by puncture of the medulla oblongata near the hepatic vaso-motor center (diabetic center). **P., Diabetic,** puncture of the fourth ventricle in animals, which produces glycosuria.

Pungence (*pun'-jens*) [*pungens*, penetrating]. Pungent quality; tartness.

Pungent (*pun'-jent*) [*pungens; pungere*, to prick]. Acrid; penetrating; producing a prieking or painful sensation.

Punica (*pu'-nik-ah*) [*punicum*, the pomegranate]. A genus of polypelatous plants. **P. granatum.** See *Pomegranate.*

Punicin (*pu'-nis-in*) [*puniceus*, reddish]. 1. A crystalline coloring-matter obtained from the colorless juices of certain kinds of shell-fish (*Purpura lapellus, P. patula*); on exposure to the sunlight it becomes of a purple color. See *Pigments, Conspectus of.* 2. Synonym of *Pelletierin.*

Punning (*pun'-ing*) [origin uncertain]. Play upon words. This practice is very common among some classes of lunatics, especially during periods of excitement and exaltation.

Pupa (*pu'-pah*) [*pupa*, a girl, doll, puppet: *pl.*, *Pupæ*]. In biology, the second stage of development from the egg, of such insects as undergo complete metamorphosis.

Pupal (*pu'-pal*) [*pupa*, a doll]. Pertaining to a pupa.

Puparium (*pu-pa'-re-um*) [*pupa*, a pupa: *pl.*, *Puparia*]. In biology, a pupa inclosed in the larval skin.

Pupate (*pu'-pāt*) [*pupa*, a doll]. In biology, to become a pupa.

Pupation (*pu-pa'-shun*) [*pupa*, a doll]. The act of pupating; the pupal condition.

Pupiform (*pu'-pif-orm*) [*pupa*, pupa; *forma*, form]. Having the form of a pupa.

Pupigenous (*pu-pij'-en-us*). Same as *Pupiparous.*

Pupigerous (*pu-pij'-er-us*) [*pupa*, pupa; *gerere*, to carry]. Forming a puparium.

Pupil (*pu'-pil*) [*pupilla*]. The round aperture in the iris of the eye. **P., Argyll Robertson,** one of the early symptoms of tabes, in which a myotic pupil responds on accommodative effort, but not to light. **P., Artificial,** an iridectomy made in an iris the pupil of which is occluded by inflammatory deposits. **P., Cat's-eye,** an elongated, slit-like pupil. **P., Exclusion of,** total posterior synechia, the entire pupillary edge of the iris being adherent to the capsule. **P., Hutchinson's,** one-sided dilatation of the pupil in hemorrhage from the middle meningeal artery. **P., Occlusion of,** the pupillary area is filled with semi-opaque inflammatory exudation-products. **P., Pin-hole,** extreme myosis.

Pupillary (*pu'-pil-a-re*) [*pupilla*, pupil]. Pertaining to the pupil of the eye. **P. Membrane,** a fetal membrane covering the eye until the seventh month of gestation. **P. Membrane, Persistent,** fibrillar bands springing from the iris, passing to or across the pupil, and sometimes attached to the lens-capsule—the unabsorbed remains of the pupillary membrane. **P. Reflex.** See *Reflexes, Table of.*

Pupillate (*pu'-pil-āt*) [*pupilla*, a pupil]. Having a central spot or pupil.

Pupillometer (*pu-pil-om'-et-er*) [*pupilla*, pupil; *μέτρον*, a measure]. An instrument designed for the measurement of the pupil of the eye.

Pupilloscopy (*pu-pil-os'-ko-pe*) [*pupilla*, pupil; *σκοπεῖν*, to inspect]. Same as *Koroscopy*, or *Retinoscopy.* More exactly, the diagnostic inspection of the pupil.

Pupillostatometer (*pu'-pil-o-stat-om'-e-ter*) [*pupilla*, pupil; *στατος*, placed; *μέτρον*, a measure]. An instrument for measuring the exact distance between the centers of the two pupils.

Pupiparous (*pu-pip'-ar-us*) [*pupa*, pupa; *parere*, to bring forth]. Bringing forth pupæ.

Pure (*pūr*) [*purus*, pure]. Unstained; unalloyed. **P. Scarlet.** See *Pigments, Conspectus of.*

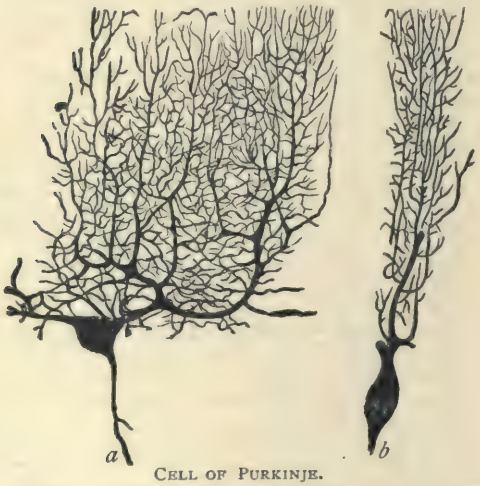
Purgament, Purgamentum (*per'-gam-ent, per-gam-en'-tum*) [*purgare*, to purge: *pl.*, *Purgamenta*]. 1. A purge. 2. In the plural, the lochia; also, excrement.

Purgantia (*pur-gan'-she-ah*) [*purgare*, to purge]. Laxatives.

Purgation (*pur-ga'-shun*) [*purgare*, to cleanse]. The evacuation of the bowels by means of purgatives.

Purgative (*pur'-gat-iv*) [*purgare*, to purge]. 1. Having a tendency to purge; cathartic. 2. A medicine producing copious evacuations of the bowels.

Purge (*purj*) [*purgare*, to purge]. A purgation; a dose of purgative medicine. As a verb, to cause free evacuations of the bowels.

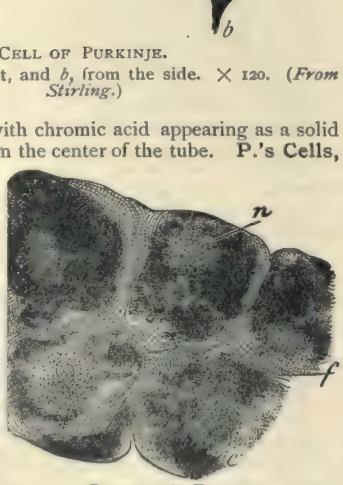


Purging (*pur'-jing*) [*purgare*, to purge]. Causing free evacuations of the bowel. **P. Agaric.** See *Agaricus*. **P. Cassia.** See *Cassia*. **P. Nut.** The seed of the tropical tree, *Jatropha curcas*. The nut affords a purgative oil much like castor-oil, though not so active.

Purified (*pu'-rif-id*) [*purus*, pure; *facere*, to make]. Cleansed; freed from extraneous matter.

Puriform (*pu'-ri-form*) [*pus*, pus; *forma*, form]. Resembling pus.

Puritic (*pu-rit'-ik*) [*pus*, pus]. Pertaining to pus.



Purkinje, Axis-cylinder of (*per-kin'-je*) [a Bohemian physiologist, 1787–1869]. The viscous fluid contents of a nerve-tube, solidified by coagulating agents, and

CELL OF PURKINJE.

a, Seen on the flat, and *b*, from the side. × 120. (*From Stirling.*)

after treatment with chromic acid appearing as a solid rod running down the center of the tube. **P.'s Cells,** the cells forming the thinnest but, at the same time, the most characteristic layer of the cerebellar cortex. They are among the largest ganglion-cells in the body, are disposed as a single row at the junction of the nuclear and the molecular layer, and present pyriform or flask-shaped bodies, 60–70 μ in their longest diameter, placed vertically to the plane of the zone, with

PURKINJE'S FIBERS.

c. Cell. *f*. Striated substance. *n*. Nucleus. × 300. (*Landois.*)

the larger rounded end resting on the outer margin of the nuclear layer, while the smaller end is directed toward the periphery. (Piersol.) **P., Corpuscles of.** See *Bone-lacunæ*. **P.'s Fibers,** an anastomosing system of grayish muscular fibers that exists in the sub-endocardial tissue of the ventricles, especially in the heart of the sheep and ox. The fibers are composed of nucleated polyhedral cells, containing some granular protoplasm. **P.'s Figures,** shadows of the retinal blood-vessels upon the retina. **P. Vesicle,** the nucleus of the human ovum first discovered by Purkinje (1830), and known as the *vesicula germinativa*, *Purkinje'schen Bläschen*, or *Germinal Vesicle*.

Purkinje-Sanson's Images. Three pairs of images of one object seen in an observed pupil: the first, erect, reflected from the anterior surface of the cornea; the second, erect, reflected from the anterior surface of the lens; the third, inverted, reflected from the posterior capsule of the lens.

Puro-hepatitis (*pu-ro-hep-at-it'-tis*) [*pus*, pus; *ἡπαρ*, liver; *ιτις*, inflammation]. Purulent hepatitis.

Puromucous (*pu-ro-mu'-kus*) [*pus*, pus; *mucus*, mucus]. Purulent and mucous.

Purple (*pur'-pl*) [*purpureus*]. Of a color possessing the elements of blue and red. As a noun, the color itself, or a body possessing it. **P.-brown.** See *Pigments, Conspectus of*. **P.-carmin.** Same as *Murexid*. **P. of Cassius,** the purplish-red precipitate resulting when a solution of gold trichlorid is brought in contact with a mixture of stannous and stannic chlorids. **P., French.** Synonym of *Orchellin*. **P.-madder.** See *Pigments, Conspectus of*. **P., Mineral.** Synonym of *P. of Cassius*. **P. of Mollusca.** Same as *Tyrian Purple*. **P., Ocher.** Same as *Mineral Purple*. **P., Visual.** See *Rhodopsin*.

Purples (*pur'-plz*) [*purpureus*, purple]. A popular name for purpura; also, for petechial spots.

Purposive (*pur'-po-siv*) [ME., *purposen*, to propose]. Functional; not vestigial, and not rudimentary; regarded as fulfilling an end or purpose in the economy. **P. Acts,** those acts performed with the consent of the will.

Purpura (*pur'-pu-rah*) [L. for "purple"]. *Hæmorrhagica petechialis;* a general term including all extravasations of blood into the skin and mucous membranes not resulting from traumatism. It is symptomatic of many conditions. **P. apyretica.** Synonym of *P. simplex*. **P., Aqueous.** Synonym of *Hæmophilia*. **P. bullosa.** See *Pemphigus hæmorrhagicus*. **P. febrilis,** purpura with elevation of temperature. **P. fulminans,** a grave form of purpura, developing in young children as a sequel to acute infectious diseases. It is of short duration, is marked by extensive extravasations, grave constitutional symptoms, and usually ends fatally. **P. hæmorrhagica,** *Morbus maculosus werlhofii; Land-scurvy:* a greatly aggravated form of purpura simplex. There are marked constitutional symptoms followed by an eruption of hemorrhagic points, larger than in purpura simplex, upon the lower limbs, extending in successive crops over the whole body-surface, coalescing to form irregularly-shaped extensive ecchymotic patches, or even raised, bloody tumors (ecchymomata). Hemorrhages may take place from the mucous surfaces or into the serous cavities. Recovery is the rule. See *Werlhof's Disease*. The disease may be infectious. **P. hypertrophica.** See *P. tuberculosa*. **P., Iodic.** a purpuric eruption caused by the use of iodin or the iodids. **P., Malignant.** Synonym of *Fever, Cerebrospinal*. **P. medicamentosa,** purpura due to the action of drugs. See *P., Iodic*. **P. menstrualis.**

purpura associated with the menstrual period. **P. miliaris.** Synonym of *Miliaria.* **P. nautica.** Synonym of *Scurvy.* **P. neonatorum,** that occurring in the newborn from sudden changes in the circulation. **P. neurotica,** purpura due to a nervous disease. **P. papulosa,** the variety in which the effusion is round a hair-follicle and papules are formed. **P. pestilential.** Synonym of *Fever, Cerebrospinal.* **P. puerperalis, P. puerperarum,** a purpuric eruption occurring during the puerperium, and probably due to septicemia. **P. pulicosa,** petechial spots produced by flea-bites. **P. rheumatica.** See *Peliosis rheumatica.* **P. scorbutica.** Synonym of *Scurvy.* **P. senilis,** that occurring in old age from want of support to the vessels due to relaxation of the tissues. **P. simplex,** the mildest degree of purpura. It generally occurs suddenly in young persons who are apparently healthy. Small, flat, roundish, or irregularly-shaped petechiæ appear, of a deep-red color, which does not disappear on pressure and soon becomes purplish, the lesions usually remaining discrete. There are no concomitant constitutional, or subjective symptoms. In children the spots are commonest about the upper part of the trunk, neck, and arms; in adults, about the inner surface of the thighs. **P. syphilitica,** purpura due to syphilis; it may be localized, as in the area of distribution of a certain nerve, or it may be general. **P. thrombotica,** purpura due to thrombosis of the veins. See *Erythema purpuricum.* **P. traumatica,** purpuric spots due to traumatism. **P. tuberculosa,** *P. hypertrophica;* a rare form associated with the formation of tubercles and nodules upon the skin, and edema of the affected part. Death follows from gradual exhaustion. **P. urticans.** See *Urticaria hæmorrhagica.* **P. variolosa.** See *Small-pox, Hemorrhagic.* **P., Vascular,** purpura due to changes in the character of the blood and changes in the vessel walls.

Purpuraceous (*pur-pu-ra'-se-us*) [*purpura*, purple]. Of a purple color.

Purpurate (*pur'-pu-rāt*) [*purpura*, purple]. Of a purple color.

Purpuremia (*pur-pu-re'-me-ah*) [*purpureus*, purple; *ha*, blood]. Intermittent malarial fever with hematuria.

Purpurescent (*pur-pu-res'-ent*) [*purpura*, purple]. Purplish.

Purpuric (*pur-pu'-rik*) [*purpura*, purple]. Purplish. Pertaining to, or of the nature of purpura. **P. Acid.** See *Acid.*

Purpurigenous (*pur-pu-rij'-en-us*) [*purpura*, purple; *gignere*, to bear]. Producing purple.

Purpurin (*pur'-pu-rin*) [*purpura*, purple], $C_{14}H_8O_5$. A dye present with alizarin in the madder-root. It is prepared artificially by heating alizarin and quinizarin with manganese dioxid and H_2SO_4 to 150° C. It crystallizes with one molecule of water in reddish-yellow needles or prisms, and dissolves with a purple color in hot water, alcohol, ether, and the alkalies. **P. Uroerythrin;** a red coloring-matter sometimes present in urinary deposits. It may attend serious lesions, but is often of no special significance. See *Pigments, Conspectus of.*

Purpuriparous (*pur-pu-rip'-ar-us*). Same as *Purpurigenous.*

Purpuroxanthic Acid (*pur-pu-ro-zan'-thik*) [*purpura*, purple; ξάνθος, yellow], $C_{15}H_8H_6$. A substance found in madder.

Purpurrhe (*pur'-a*) [E. Ind.]. See *Euxanthinic Acid*, and *Pigments, Conspectus of.*

Purpurrheic Acid, Purrheic Acid (*pur-e'-ik*). See *Euxanthic Acid.*

Purring Thrill. A fine, trembling vibration in the precordium, either heard or perceived by palpation. It may be due to aneurysm, or to some valvular heart-lesion, especially mitral stenosis.

Purse-string Operation. See *Stoltz's Operation* in *Operations, Table of.*

Pursy (*pur'-se*) [ME., *pursy*, short-winded]. Fat, or corpulent, and short of breath. [Popular.]

Purulence (*pur'-u-lens*) [*pus*, pus]. The quality of being purulent; suppuration.

Purulent (*pur'-u-lent*) [*pus*, pus]. Having the character of or forming pus. **P. Catarrh,** an inflammation of a mucous membrane accompanied by the production of pus. **P. Edema,** a general infiltration of pus with much fluid.

Puruloid (*pur'-u-loid*) [*pus*, pus; εἶδος, like]. Resembling pus; puriform.

Pus [πῦον]. A fluid of varying consistence produced in the process of suppuration. It is formed by a liquefactive necrosis of the intercellular substance of tissues, the cells themselves floating in the fluid and undergoing fatty degeneration. Clinically, pus is due to the action of microörganisms. **P., Blue,** pus colored blue by the bacillus pyocyaneus. **P.-corpuscles,** the corpuscles found in pus; they are small, usually multinuclear cells, chiefly outwandered leukocytes, but also degenerate connective-tissue cells. The nuclei may be hidden by granules, but can be made to appear by adding a little acetic acid to the pus. **P., Curdy,** containing cheesy-looking flakes. **P.-disease.** Synonym of *Pyemia.* **P., Healthy.** See *P., Laudable.* **P., Ichorous,** pus when thin and acrid. **P., Laudable,** a whitish, inodorous pus, formerly thought to be essential to the healing of wounds. **P., Muco-,** pus mixed with mucus. **P.-poison,** a chemic compound that gives rise in the tissues to purulent inflammation. The proteid extracts of many bacteria act thus, *e. g.*, tuberculin. **P., Sanious,** pus mixed with blood. **P. Sero-,** pus largely admixed with serum. **P.-tube,** a term frequently applied to a Fallopian tube the seat of suppurative inflammation. See *Pyosalpinx.* **P., Watery.** Synonym of *P., Ichorous.* For microörganisms of pus see *Bacteria, Synonymatic Table of.*

Pustula (*pus'-tu-lah*) [L.]. A pustule. A vesicle or bleb containing pus. **P. maligna,** *Anthrax; Charbon; Malignant Pustule; Woolsorters' Disease; Splenic Fever; Carbuncle, Milzbrand;* an acute specific disease, due to the introduction of the bacillus anthracis into the system. It is characterized by the appearance of a localized inflammation beginning as a vesicle, and is situated on the face, neck, hands or arms, closely resembling carbuncle. The tumefaction may be very great, and this is associated with a profound degree of depression and exhaustion, the patient often dying on the fourth or fifth day. In favorable cases recovery takes place. The fever is slight; in fact, there is often a subnormal temperature. In some cases general infection does not occur. **Internal Anthrax,** *mycosis intestinalis, anthrax intestinalis,* may be secondary to infection of the skin, but in some cases no primary focus can be discovered. The symptoms are diarrhea, vomiting, dyspnea, and a tendency to collapse. The temperature is usually not elevated, often subnormal. Death occurs in profound collapse in a very few days. The lesions consist of necrotic foci in the intestines; bacilli are abundant in the vessels of these areas. The spleen is not much enlarged, but the lymphatic glands are greatly tumefied. See *Pustule.*

Pustulant (*pus'-tu-lant*) [*pustula*, a pustule]. 1. Causing the formation of pustules. 2. An irritant substance which does not affect the whole skin

alike, but especially irritates isolated portions and gives rise to the formation of pustules. Croton-oil and tartar emetic are examples.

Pustular (*pus'-tu-lar*) [*pustula*, pustule]. Pertaintaining to or characterized by pustules. In biology, a term descriptive of a surface which has blister-like elevations. **P. Grease.** See *Horsepox.*

Pustulate (*pus'-tu-lāt*) [*pustulare*, to blister]. 1. To form pustules. 2. Same as *Pustular.*

Pustulation (*pus-tu-la'-shun*) [*pustula*, pustule]. A condition marked by the formation of pustules.

Pustulatous (*pus'-tu-lāt-us*). Same as *Pustular.*

Pustule (*pus'-tūl*) [*pustula*, pustule]. A vesicle or bleb containing pus. It is always of inflammatory origin, of a yellowish color, and has, as a rule, a red areola, sometimes with induration. **P., Malignant.** See *Pustula maligna.*

Pustuliform (*pus'-tu-lif-orm*) [*pustula*, pustule; *forma*, form]. Resembling a pustule.

Pustulocrustaceous (*pus-tu-lo-krus-ta'-se-us*) [*pustula*, pustule; *crusta*, crust]. Pustulous, and also covered with crusts, or scabs.

Pustulose (*pus'-tu-lōz*). Same as *Pustular.*

Pustulose, Pustulous (*pus'-tu-lōz, pus'-tu-lus*) [*pustula*, pustule]. Characterized by pustules.

Pusula (*pus'-u-lah*) [L.]. 1. Pustule. 2. Erysipelas.

Putamen (*pu-ta'-men*) [*putamen*, husk: *pl.*, *Putamina*]. 1. The lateral or darker part of the lenticular nucleus of the brain. 2. In biology: (*a*) the stone of a drupe, or shell of a nut; (*b*) the soft or inner shell of an egg.

Putaminous (*pu-tam'-in-us*) [*putamen*, husk]. Pertaining to the membrana putaminis.

Putchuk (*put'-chuk*) [India]. The costus root; the root of *Saussurea lappa*, a composite plant of India. In that country and China it is extensively used in medicine. It is a stimulant and aromatic tonic. Also the root of *Aristolochia recurvilabra*, an Asiatic plant; useful as an emmenagogue, diuretic, tonic, and stimulant. Unof.

Putrefacient (*pu-tre-fa'-se-ent*) [*putridus*, putrid; *facere*, to make]. 1. Causing putrefaction. 2. An agent that causes putrefaction.

Putrefaction (*pu-tre-fak'-shun*) [*putridus*, rotten; *facere*, to make]. The decomposition of nitrogenous organic matter under the influence of microörganisms, and accompanied by the development of disagreeable odors, due to the evolution of ammonia and hydrogen sulphid.

Putrefactive (*pu-tre-fak'-tiv*) [*putridus*, putrid; *facere*, to make]. Pertaining to or causing putrefaction.

Putrefy (*pu'-tre-fi*) [*putrefacere*, to putrefy]. To render putrid.

Putrescence (*pu-tres'-ens*) [*putrescere*, to become rotten]. The state or process of putrefaction.

Putrescent (*pu-tres'-ent*) [*putrescere*, to become rotten]. Undergoing putrefaction.

Putrescin (*pu-tres'-in*) [*putrescere*, to become rotten], $C_4H_{12}N_2$. A poisonous ptomain. It is a clear, rather thin liquid of a disagreeable odor, boiling at 156°–157° C. See *Ptomains, Table of.*

Putrid (*pu'-trid*) [*putridus*, rotten]. Rotten; having undergone putrefaction. **P. Fever.** Synonym of *Typhus Fever, q. v.* **P. Infection**, pyemia due to infection from a gangrenous focus. **P. Pleurisy.** See *Pleurisy, Ichorous.* **P. Sore-mouth.** See *Stomatitis, Ulcerative.* **P. Sore-throat.** See *Pharyngitis, Gangrenous.*

Putridity (*pu-trid'-it-e*) [*putridus*, rotten]. The quality or state of being putrid; putrid material.

Putrilage (*pu-tril-ahzh'*) [*putris*, rotten]. Putrescent or gangrenous material.

Putty (*put'-e*) [OF., *potee*, brass]. A pasty, inelast substance usually made from whiting and linseed-oi and hardening on exposure to the air. **P., Horsley'** a mixture of white and yellow wax, vaselin, and ca bolic acid, used to check bleeding from the vessels c cut bone.

Pyæmia (*pi-e'-me-ah*). See *Pyemia.*

Pyapostasis (*pi-ap-os'-tas-is*) [πύον, pus; ἀπόστασι a standing off]. Metastasis of pus.

Pyarthrosis (*pi-ar-thro'-sis*) [πῦον, pus; ἄρθρον, joint Suppuration of a joint.

Pyaulacomele (*pi-aw-lak-om'-el-e*) [πύον, pus; αὖλα furrow; μήλη, probe]. A grooved probe used in e ploring for pus.

Pycnicmasia, Pycnicmasis (*pik-nik-ma'-ze-ah, pi nik'-mas-is*) [πυκνός, ἰκμάς, moisture]. A thickenir of the bodily fluids.

Pycnid, Pycnide (*pik'-nid*). Same as *Pycnidium.*

Pycnidiophore (*pik-nid'-e-o-for*) [πυκνός, thick; φ to bear]. In biology, a compound sporophore bearir pycnidia.

Pycnidiospore (*pik-nid'-e-o-spōr*). Same as *Sty spore.*

Pycnidium (*pik-nid'-e-um*) [πυκνός, thick, dens ἰδιον, dim.: *pl.*, *Pycnidia*]. In biology, are produ tive body resembling a perithecium, found in certa fungi (*Ascomycetes*). Pycnidia arise interstitially mycelial hyphæ, and consist of a wall of several laye from the inner surface of which there converge seri of cells producing successively (terminally and late ally) pycnospores (Bennett and Murray).

Pycnocardia (*pik-no-kar'-de-ah*) [πυκνός, solid; καρδ heart]. See *Tachycardia.*

Pycnocephalous (*pik-no-sef'-al-us*) [πυκνός, thick κεφαλή, head]. Thick-headed.

Pycnoconidium (*pik-no-ko-nid'-e-um*) [πυκνός, thick κόνος, dust; ἰδιον, dim.: *pl.*, *Pycnoconidia*]. S *Pycnospore.*

Pycnogonidium (*pik-no-go-nid'-e-um*) [πυκνός, thic γονή, generation; ἰδιον, dim.: *pl.*, *Pycnogonidia*]. S *Pycnospore.*

Pycnometer (*pik-nom'-et-er*) [πυκνός, thick; μέτ measure]. A specific-gravity bottle, or a small, lig flask of known weight.

Pycnophrasia (*pik-no-fra'-ze-ah*) [πυκνός, thick; φρά speech]. Thickness of speech.

Pycnosis (*pik-no'-sis*) [πυκνός, thick]. Thickening inspissation.

Pycnospore (*pik'-no-spōr*) [πυκνός, close; σπόρ seed]. In biology, De Bary's term for the styl spores produced in the pycnidia of the *Ascomycetes.*

Pycnotic (*pik-not'-ik*) [πυκνός, thick]. Pertaining pycnosis.

Pyecchysis (*pi-ek'-is-is*) [πύον, pus; ἔκχυσις, effusion Effusion of pus.

Pyedema, Pycedema (*pi-e-de'-mah*) [πῦον, pus; οἴδη edema]. Edema due to purulent infiltration.

Pyelitic (*pi-el-it'-ik*) [πύελος, trough; ιτις, inflamm tion]. Relating to or affected with pyelitis.

Pyelitis (*pi-el-i'-tis*) [πύελος, a trough; ιτις, inflamm tion]. Inflammation of the pelvis of the kidney. may be due to the mechanical irritation of calculi, o tumors, animal parasites, tubercles, etc., or it appea in the course of acute specific fevers, or, perhaps m commonly, is secondary to diseases of the bladd It is marked by pain and tenderness in the lum regions, and the presence in the urine of album mucus, epithelial cells from the pelvis of the kidn and pus-corpuscles in large amount. The urine generally acid. Blood is also frequently seen in t urine. Gradually a swelling or tumor appears in t lumbar region, dull on percussion and slightly fluct

ating. **P., Calculous,** that due to calculi. **P., Hemorrhagic,** that attended with hemorrhage.

yelocystitis (*pi-el-o-sis-ti'-tis*) [πύελος, trough; κύστις, bladder; ῖτις, inflammation]. Pyelitis with cystitis.

yelo-lithotomy (*pi-el-o-lith-ot'-o-me*) [πύελος, trough; λίθος, stone; τομή, a cutting]. Removal of a renal calculus through an incision into the pelvis of the kidney.

yelometer (*pi-el-om'-et-er*). Synonym of *Pelvimeter.*

yelonephritic (*pi-el-o-nef-rit'-ik*) [πύελος, trough; νεφρός, kidney; ῖτις, inflammation]. Pertaining to pyelonephritis.

yelo-nephritis (*pi-el-o-nef-ri'-tis*) [πύελος, trough; νεφρός, kidney; ῖτις, inflammation]. Simultaneous inflammation of the kidney and its pelvis.

yelonephrosis (*pi-el-o-nef-ro'-sis*). Synonym of *Pyelonephritis.*

yelotomy (*pi-el-ot'-o-me*) [πύελος, trough; τομή, a cutting]. Incision of the renal pelvis.

yemesis (*pi-em'-is-is*) [πυόν, pus; ἔμεσις, vomiting]. Vomiting of pus.

yemia (*pi-e'-me-ah*) [πύον, pus; αἷμα, blood]. Phlebitic septicemia, with the presence of pyogenic microörganisms in the blood and with the formation wherever they lodge of secondary embolic or metastatic abscesses. It is characterized by intermittent fever, with recurrent rigors, profuse sweats, a sweetish odor to the breath, a dry, brown tongue, and rapid emaciation. Slight jaundice frequently develops; sometimes, also, a purpuric eruption; the temperature may be very high, 105°, or even more. It usually terminates in death. **P., Arterial,** a name given to pyemia produced by disorganization of a cardiac thrombus and the dissemination of emboli through the arterial circulation. **P., Cryptogenetic,** a condition in which the primary suppuration occurs in the deeper tissues of the body.

yemic (*pi-e'-mik*) [πύον, pus; αἷμα, blood]. Pertaining to or affected with pyemia.

yencephalus (*pi-en-sef'-al-us*) [πυον, pus; ἐγκέφαλος, brain]. Suppuration within the cranium.

yesis (*pi-e'-sis*). Synonym of *Suppuration.*

yetia (*pi-e'-she-ah*). Synonym of *Colostrum.*

ygagria (*pi-ga'-gre-ah*) [πυγή, buttock; ἄγρα, seizure]. Pruritus ani; eczema, or pain, of the anal region. **P. granulata,** eczema of the anal region.

ygal (*pi'-gal*) [πυγή, rump]. In biology, of or pertaining to the rump.

ygidial (*pi-jid'-e-al*) [πυγή, rump]. Pertaining to a pygidium.

ygidium (*pi-jid'-e-um*) [πυγή, rump; dim. ἰδιον: *pl.*, *Pygidia*]. In biology, a term applied to the hinder or rump region of the body in various animals, especially insects, crustaceans, and worms.

ygme (*pig'-me*) [πυγμή, fist]. The distance between the elbow and the knuckles. Fist. Forearm.

ygmy, Pigmy (*pig'-me*) [πυγμή, a fist]. A dwarf or dwarfish person.

ygodidymus (*pi-go-did'-im-us*) [πυγή, buttock; δίδυμος, twins]. A double fetal monstrosity united by the buttocks.

ygomelus (*pi-gom'-el-us*) [πυγή, buttock; μέλος, member]. A parasitic monstrosity with the parasite united to the hypogastric region or to the buttock.

ygopagus (*pi-gop'-ag-us*) [πυγή, buttock; πάγος, joined]. An ensomphalic monstrosity with conjoined buttocks or backs.

ygostyle (*pi'-go-stil*) [πυγή, rump; στῦλος, column]. In biology, the last bone in the tail of a bird, giving support to the tail-feathers. It theoretically consists of ankylosed or coalesced caudal vertebræ, as there are pairs of feathers in the tail.

Pyic (*pi'-ik*). Synonym of *Purulent.*

Pyin (*pi'-in*) [πύον, pus]. An albuminous substance of complex constitution occurring in pus. It may be separated by adding sodium chlorid and filtering.

Pyknometer (*pik-nom'-et-er*). See *Pycnometer.*

Pyla (*pi'-lah*) [πύλη, gate: *pl.* and *gen.*, *Pylæ*]. The orifice by which the mesal portion of the mesocele communicates with the lateral.

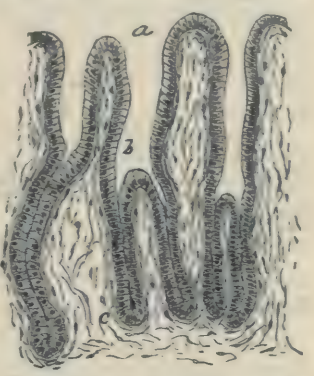
Pylemia (*pi-le'-me-ah*) [πύλη, gate; αἷμα, blood]. The blood of the portal vein.

Pylemphraxis (*pi-lem-fraks'-is*) [πύλη, gate; ἐμφραξις, obstruction]. Obstruction of the portal circulation.

Pylephlebectasis (*pi-le-fleb-ek'-tas-is*) [πύλη, gate; φλέψ, vein; ἔκτασις, dilatation]. Dilatation of the portal vein. This is usually caused by some obstruction in the liver, or it may be due to relaxation of the vessel-walls from some disturbance of innervation.

Pylephlebitis (*pi-le-fleb-i'-tis*) [πύλη, gate; φλέψ, vein; ῖτις, inflammation]. Inflammation of the portal vein. The symptoms are those of pyemia; the liver is usually enlarged and tender. The condition is usually secondary to disease of the intestines. **P., Adhesive,** thrombo-phlebitis of the portal vein.

Pylethrombosis (*pi-le-throm-bo'-sis*) [πύλη, gate; θρόμβος, clot]. Thrombosis of the portal vein.



Pylic (*pi'-lik*) [πύλη, gate]. Pertaining to the portal vein.

Pylometer (*pi-lom'-et-er*) [πύλη, gate; μέτρον, measure]. See *Cystopylometer.*

Pylophlebitis (*pi-lo-fleb-i'-tis*). Synonym of *Pylephlebitis.*

Pylorectomy (*pi-lor-ek'-to-me*) [πυλωρός, pylorus; ἐκτομή, excision]. Excision or resection of the pylorus.

Pyloric (*pi-lor'-ik*) [πυλωρός, pylorus]. Pertaining to the pylorus. **P. Artery,** the pyloric branch of the hepatic artery. **P. Glands,** glands of the pylorus, secreting the gastric juice. **P. Plexus,** branches of the hepatic plexus accompanying the pyloric artery.

SECTION OF PYLORIC GLANDS FROM HUMAN STOMACH.

a. Mouth of gland leading into long, wide duct (*b*), into which open the terminal divisions. *c.* Connective tissue of the mucosa. (*After Piersol.*)

Pyloristenosis (*pi-lor-is-ten-o'-sis*) [πυλωρός, pylorus; στενός, narrow]. Contraction of the pylorus.

Pyloritis (*pi-lor-i'-tis*) [πυλωρός, pylorus; ῖτις, inflammation]. Inflammation of the pylorus.

Pylorochesis (*pi-lor-o-ke'-sis*) [πυλωρός, pylorus; ὄχησις, a holding]. Obstruction of the pylorus.

Pylorocleisis (*pi-lor-ok'-lis-is*). Synonym of *Pylorochesis.*

Pylorogastroscirrhus (*pi-lor'-o-gas'-tro-skir'-us*). Synonym of *Pyloroscirrhus.*

Pyloroplasty (*pi-lor'-o-plas-te*) [πυλωρός, pylorus; πλάσσειν, to form]. Plastic operation upon the pylorus.

Pyloroscirrhus (*pi-lor-o-skir'-us*) [πυλωρός, pylorus; σκίρρος, induration]. Scirrhus of the pylorus.

Pylorostenoma (*pi-lor-o-sten-o'-mah*). Synonym of *Pylorostenosis.*

Pylorostenosis (*pi-lor-o-ste-no'-sis*) [πυλωρός, pylorus; στένωσις, stenosis]. Stenosis, or stricture, of the pylorus.

Pylorus (*pi-lo'-rus*) [πυλωρός, gate-keeper]. 1. The opening of the stomach into the duodenum. 2. The pyloric valve.

Pyo- (*pi'-o*) [πῦον, pus]. A prefix that indicates connection with or relation to pus.

Pyoblenna (*pi-o-blen'-ah*) [πύον, pus; βλεννα, mucus]. Muco-pus.

Pyoblennorrhea (*pi-o-blen-or-e'-ah*) [πύον, pus; βλέννα, mucus; ῥοία, a flow]. A muco-purulent discharge.

Pyocataracta (*pi-o-kat-ar-ak'-tah*) [πύον, pus; καταράκτης, cataract]. Purulent cataract.

Pyocele (*pi'-o-sēl*) [πῦον, pus; κήλη, hernia]. Hernia with pus in its sac.

Pyocelia (*pi-o-se'-le-ah*) [πυόν, pus; κοιλία, a hollow]. Pus in the abdominal cavity.

Pyocenosis (*pi-o-sen-o'-sis*) [πύον, pus; κένωσις, emptying]. The evacuation of a pus-cavity.

Pyochezia (*pi-o-ke'-ze-ah*) [πυόν, pus; χέξειν, to defecate]. Discharge of pus from the intestines.

Pyocolpocele (*pi-o-kol'-po-sēl*) [πῦον, pus; κόλπος, vagina; κήλη, a tumor]. A tumor of the vagina containing pus.

Pyocolpos (*pi-o-kol'-pos*) [πύον, pus; κόλπος, vagina]. An accumulation of pus within the vagina.

Pyoctanin (*pi-ok'-tan-in*). See *Pyoktanin*.

Pyocyanin (*pi-o-si'-an-in*) [πύον, pus; κύανος, blue], $C_{14}H_{14}NO_2$. A colored extractive derived from blue pus, and from cultures of the *Bacillus pyocyaneus*. On exposure to the air it is oxidized to pyoxanthose. It has positive chemotactic properties. See *Pigments, Conspectus of*.

Pyocyst (*pi'-o-sist*) [πύον, pus; κύστις, cyst]. A cyst containing pus.

Pyocyte (*pi'-o-sīt*) [πύον, pus; κύτος, cell]. The pus-corpuscle.

Pyodermatitis (*pi-o-der-mat-i'-tis*). A skin-affection produced by inoculation with pyogenic material.

Pyodermitis (*pi-o-der-mi'-tis*) [πύον, pus; δέρμα, skin; ιτις, inflammation]. An inflammatory skin-affection attended by pus-formation.

Pyodiathesis (*pi-o-di-ath'-es-is*) [πύον, pus; διάθεσις, disposition]. A purulent diathesis, characterized by a tendency of inflammation to proceed to suppuration.

Pycœdema (*pi-e-de'-mah*). See *Pyedema*.

Pyogangrenous (*pi-o-gang'-ren-us*) [πύον, pus; *gangræna*, gangrene]. Suppurating, and also gangrenous. **P. Inflammation.** See *Inflammation*.

Pyogenes (*pi-oj'-en-ēz*). Synonym of *Pyogenic*.

Pyogenesis (*pi-o-jen'-es-is*) [πύον, pus; γεννᾶν, to produce]. The formation of pus.

Pyogenetic (*pi-o-jen-et'-ik*) [πύον, pus; γεννᾶν, to produce]. Pertaining to pyogenesis.

Pyogenia (*pi-o-je'-ne-ah*). Same as *Pyogenesis*.

Pyogenic (*pi-o-jen'-ik*) [πύον, pus; γεννᾶν, to beget]. Producing or relating to pus-formation. **P. Fever.** See *Strangles*. **P. Membrane,** the thin, yellow layer forming the wall of an abscess. The wall is pyogenic only as long as the abscess is spreading, for it is then that breaking down and suppuration are going on in it; when the abscess ceases to spread, the membrane becomes a healing one. **P. Microörganisms,** the ordinary pyogenic microörganisms are the *staphylococcus albus, aureus,* and *citreus,* and the *streptococcus pyogenes*. Under certain circumstances pus may be produced by the pneumococcus of Frānkel, the bacillus coli communis, the bacillus of typhoid fever, the gonococcus, and others. See *Bacteria, Synonymatic Table of*.

Pyohæmia (*pi-o-hem'-e-ah*). Synonym of *Pyemia*.

Pyohemothorax (*pi-o-hem-o-tho'-raks*) [πύον, pus; αἷμα, blood; θώραξ, thorax]. The presence of pus and blood in the pleural cavity.

Pyoid (*pi'-oid*) [πύον, pus; εἶδος, like]. Resembling pus.

Pyoktanin (*pi-ok'-tan-in*) [πύον, pus; κτείνειν, to kill]. A name given to *methyl-violet* and *auramin* (both anilin dyes), from their power of arresting suppuration. Both are antiseptic, but are harmless, as well as odorless. One to two per cent. ointments, and one per cent. gauzes and cottons are recommended. Unof.

Pyolymph (*pi'-o-limf*) [πύον, pus; λύμφα, lymph]. Lymph containing pus-corpuscles.

Pyomalgia (*pi-o-mal'-je-ah*) [πύον, pus; ὦμος, shoulder; ἄλγος, pain]. Pain in the shoulder due to suppuration.

Pyomele (*pi-om'-el-e*). See *Pyaulacomele*.

Pyometra (*pi-o-me'-trah*) [πύον, pus; μήτρα, womb]. A collection of pus in the uterus.

Pyonephritis (*pi-o-nef-ri'-tis*) [πύον, pus; νεφρος, kidney; ιτις, inflammation]. Suppurative inflammation of the kidney.

Pyonephrosis (*pi-o-nef-ro'-sis*) [πύον, pus; νεφρος, kidney]. Pus in the kidney and its pelvis.

Pyonephrotic (*pi-o-nef-rot'-ik*) [πύον, pus; νεφρος, kidney]. Pertaining to pyonephrosis.

Pyonoma (*pi-o-no'-mah*) [πύον, pus; νομή, an eating sore]. 1. A suppurative focus. 2. A tumor infiltrated with pus.

Pyoöphoritis (*pi-o-off-or-i'-tis*) [πύον, pus; ᾠόν, egg; φορός, bearing; ιτις, inflammation]. Purulent oöphoritis.

Pyopericardium (*pi-o-per-ik-ar'-de-um*) [πύον, pus; περί, about; καρδία, heart]. The presence of pus in the pericardium.

Pyoperitonitis (*pi-o-per-it-on-i'-tis*). Synonym of *Peritonitis, Purulent*.

Pyophthalmia (*pi-off-thal'-me-ah*) [πύον, pus; ὀφθαλμός, eye]. Purulent ophthalmia.

Pyophthisis (*pi-off'-this-is*) [πύον, pus; φθισις, a wasting]. Wasting from long-continued suppuration.

Pyophylactic (*pi-o-fil-ak'-tik*) [πύον, pus; φυλάσσειν, to guard]. Same as *Pyogenic*. **P. Membrane.** See *Membrane*.

Pyoplania (*pi-o-pla'-ne-ah*) [πύον, pus; πλανάειν, to wander]. Infiltration of tissues with pus.

Pyopneumopericardium (*pi-o-nu-mo-per-ik-ar'-de-um*) [πύον, pus; πνεῦμα, air; πέρι, around; καρδία, heart]. Pus and air or gas in the pericardium.

Pyopneumoperitonitis (*pi-o-nu-mo-per-it-on-i'-tis*) [πύον, pus; πνευμα, air; περιτοναιον, peritoneum; ιτις, inflammation]. Peritonitis complicated by the presence of pus and air in the peritoneal cavity.

Pyopneumothorax (*pi-o-nu-mo-tho'-raks*) [πύον, pus; πνεῦμα, air; θώραξ, thorax]. An accumulation of air or gas and pus in the pleural cavity.

Pyopoiesis (*pi-o-poi-e'-sis*). Synonym of *Suppuration*.

Pyoptysis (*pi-op'-tis-is*) [πύον, pus; πτύειν, to spit]. The expectoration of pus.

Pyorrhagia (*pi-or-a'-je-ah*) [πύον, pus; ῥηγνύναι, to burst forth]. A profuse discharge of pus.

Pyorrhea (*pi-or-e'-ah*) [πύον, pus; ῥοία, a flow]. A purulent discharge. **P., Alveolar.** Same as *Fauchard's Disease*. See *Diseases, Table of*.

Pyorthopnea (*pi-or-thop-ne'-ah*) [πύον, pus; ὀρθός, straight; πνοή, breath]. Orthopnea due to the presence of pus in the pleural cavity.

Pyosalpingitis (*pi-o-sal-pin-gi'-tis*) [πύον, pus; σάλπιγξ, tube; ιτις, inflammation]. Purulent inflammation of the Fallopian or Eustachian tube.

Pyosalpinx (*pi-o-sal'-pinks*) [πύον, pus; σάλπιγξ, tube]

A formation of pus in the oviduct or the Eustachian tube.

yosapremia (*pi-o-sap-re'-me-ah*) [πύον, pus; σαπρός, rotten; αἷμα, blood]. Infection of the blood by putrid pus.

yoscheocele (*pi-os'-ke-o-sēl*) [πύον, pus; ὀσχεον, scrotum; κήλη, tumor]. A suppurative swelling of the scrotum.

yoscope (*pi'-o-skōp*) [πύος, colostrum; σκοπεῖν, to examine]. An instrument for determining the richness of milk by its color.

yosepthemia (*pi-o-sep-the'-me-ah*). Synonym of *Pyo-septicemia*.

yo-septicemia (*pi-o-sep-tis-e'-me-ah*) [πύον, pus; σῆψις, sepsis; αἷμα, blood]. The association of pyemia and septicemia.

rosis (*pi-o'-sis*) [πύον, pus]. 1. Suppuration. 2. Suppuration of the eye.

vospermatocyst (*pi-ō-sper'-mat-o-sist*) [πύον, pus; σπέρμα, seed; κύστις, cyst]. The accumulation of pus in a spermatic vesicle.

rostercorous (*pi-o-ster'-kor-us*) [πύον, pus; *stercus*, feces]. Pertaining to purulent discharges from the bowels.

rothorax (*pi-o-tho'-raks*) [πύον, pus; θώραξ, thorax]. The accumulation of pus in the pleural cavity; empyema.

rotorrhea (*pi-o-tor-e'-ah*) [πύον, pus; οὖς, ear; ῥοια, a flow]. Purulent otorrhea.

roxanthin, Pyoxanthose (*pi-o-zan'-thin, pi-o-zan'-thōz*) [πύον, pus; ξανθός, yellow]. A yellow coloring-extractive sometimes found in pus, and resulting from the oxidation of pyocyanin, *q. v.*

yozemia (*pi-o-ze'-me-ah*) [πύον, pus; ζυμή, a ferment]. The constitutional condition dependent upon the presence of a pus. Probably an intoxication, in contradistinction to pyemia, which is an infection.

yra (*pi'-rah*). Synonym of *Anthrax*.

yracetic Acid (*pi-ras-e'-tik*). Synonym of *Pyroligneous Acid*.

yramid (*pir'-am-id*) [πυραμίς]. Any conic eminence of an organ, as *P. of the cerebellum*, *P. of the tympanum*, etc. **Ps., Anterior** (*of the Oblongata*), the two pyramidal bundles of white matter, one on either side of the ventral median fissure of the medulla. They are continuous with the ventral columns of the spinal cord, except the decussating bundles, which are continuous with the deeper portions of the lateral columns of the cord. **P. of the Cerebellum,** a conic projection forming the central portion of the inferior vermiform process. **Ps., Cortical.** Synonym of *Ps. of Malpighi*. **Ps. of Ferrein,** a prolongation of the striæ of the Malpighian Pyramids into the cortex. They are also known as medullary rays. **Ps., Giant,** Betz's name for the large pyramidal cells of the cortex of the paracentral convolution of the human brain. **P., Lateral.** Synonym of *Restiform Body*. **P. of Light,** the triangular reflection from the normal membrana tympani. **Ps., Malpighian,** the conic masses composing the medullary substance of the kidneys. There are from eight to eighteen. **Ps., Posterior** (*of the Oblongata*), two narrow bundles of white matter placed one on either side of the dorsal median fissure of the oblongata. They are continuous with the dorsal median columns of the spinal cord.

ramidal (*pir-am'-id-al*) [πυραμίς, pyramid]. Shaped like a pyramid. **P. Tracts.** See *Tracts*.

ramidale (*pir-am-id-a'-le*) [πυραμίς, pyramid]. The cuneiform bone of the carpus; the os pyramidale.

ramidalis (*pir-am-id-a'-lis*). See *Muscles, Table of*.

ramidate (*pir-am'-id-āt*) [πυραμίς, pyramid]. In biology, pyramidal.

Pyramis (*pir'-am-is*). Synonym of *Pyramid*. **P. cerebelli.** See *Pyramid of the Cerebellum*.

Pyrazol (*pi'-raz-ōl*) [πῦρ, fire; *azotum*, nitrogen], $C_3H_4N_2$. A derivative of pyrrol, crystallizing in colorless needles, melting at 70° C., and boiling at 185° C.

Pyrazolin (*pi-raz'-o-lin*) [πῦρ, fire; *azotum*, nitrogen], $C_3H_6N_2$. A reduction-product of pyrazol.

Pyrazolon (*pi-raz'-o-lon*) [πῦρ, fire; *azotum*, nitrogen], $C_3H_4N_2O$. An oxidation-product of pyrazolin.

Pyremetin (*pi-rem'-et-in*) [πυρήν, mass; ἔμεσις, vomit]. A substance obtained from impure creasote; it has emetic properties.

Pyrene (*pi'-rēn*) [πῦρ, fire], $C_{16}H_{10}$. 1. A hydrocarbon occurring in the "stubb-fat" obtained from the distillation of the "stubb." It is sparingly soluble in hot alcohol, readily in ether, benzene, and carbon disulphid; it crystallizes in colorless leaflets or plates, and melts at 148° C. 2. A hydrocarbon occurring with fluoranthene in the highest fractions of coal-tar.

Pyrene (*pi'-rēn*) [πυρήν, the stone of a fruit]. In biology, a nutlet; the stone of a small drupe.

Pyrenematous (*pi-ren-em'-at-us*) [πυρήν, mass; αἷμα, blood]. Pertaining to, or having nucleated red corpuscles.

Pyrenemia (*pi-ren-e'-me-ah*) [πυρήν, mass; αἷμα, blood]. The existence of nucleated red cells in the blood.

Pyrenin (*pi-re'-nin*) [πῦρ, fire]. In biology, the name given by Schwartz to the substance composing nucleoli, as distinguished from the nuclear membrane, *amphipyrenin*.

Pyrenium (*pi-re'-ne-um*) [πυρήνιον, dim. of πυρήν, the stone of a fruit]. In biology, the hypothecium of a nucleiform apothecium.

Pyrenocarp (*pi-re'-no-karp*) [πυρήν, the stone of a fruit; καρπός, fruit]. In botany, a drupe.

Pyrenocarpous (*pi-re-no-kar'-pus*) [πυρήν, the stone of a fruit; καρπός, fruit]. Resembling or pertaining to a pyrenocarp.

Pyrenodeine (*pi-re-no'-de-in*) [πυρήν, the stone of a fruit; εἶδος, form]. Same as *Pyrenoid*.

Pyrenoid (*pi-re'-noid*) [πυρήν, the stone of a fruit; εἶδος, form]. The name given by Schmitz to the small, bright globules found imbedded in the chromatophores of green algæ and of certain invertebrates, and having the reactions of nuclein and the function of forming starch and similar carbohydrates.

Pyrenomycetes (*pi-re-no-mi-se'-tēz*) [πυρήν, the stone of a fruit; μύκης, fungus]. An order of ascomycetous fungi.

Pyretetiology (*pi-ret-e-te-ol'-o-je*) [πυρετός, fever; αἰτία, cause; λόγος, science]. The study of the etiology of fevers.

Pyrethrum (*pi-re'-thrum*) [πύρεθρον, a certain plant]. Pellitory. The dried root of *Anacyclus P.* It contains a resin, a volatile oil, and sugar. When taken into the mouth, it increases the flow of saliva, and is used as a masticatory in dry conditions of the mouth, in relaxed states of the throat, and in aphonia; also in headache and facial neuralgia. It is valuable mainly as a masticatory and sialagogue. Dose ʒ ss–j. **P., Tinct.,** 20 per cent. strong—used externally. Dose of the British tincture ♏ xv–ʒ j. **P. roseum,** Persian Pellitory. The powdered flower-heads are used as an insecticide. See *Buhach*.

Pyretic (*pi-ret'-ik*) [πυρετός, fever]. Pertaining to or affected with fever.

Pyreticosis (*pi-ret-ik-o'-sis*) [πυρετός, fever]. Feverishness.

Pyretogenesia, Pyretogenesis (*pi-ret-o-jen-e'-ze-ah*, (*pi-ret-o-jen'-es-is*) [πυρετός, fever; γένεσις, origin]. The origin and progress of fever.

Pyretogenic (*pi-ret-o-jen'-ik*) [πυρετός, fever; γεννᾶν, to produce]. Causing or producing fever.

Pyretogenin (*pi-ret-oj'-en-in*) [πυρετός, fever; γεννᾶν, to produce]. A substance (probably a ptomain) formed by microörganisms. Its composition is unknown. It has the property of producing fever when inoculated into animals.

Pyretogenous (*pi-ret-oj'-en-us*). Synonym of *Pyretogenic.*

Pyretography (*pi-ret-og'-ra-fe*) [πυρετός, fever; γράφειν, to write]. A treatise on fevers.

Pyretology (*pi-ret-ol'-o-je*) [πυρετός, fever; λόγος, treatise]. The science of the nature and characteristics of fevers.

Pyretophthalmia (*pi-ret-off-thal'-me-ah*) [πυρετός, fever; ὀφθαλμός, eye]. 1. Ophthalmia caused by a febrile disease. 2. A febrile affection complicated by ophthalmia.

Pyretorthopnea (*pi-ret-or-thop-ne'-ah*) [πυρετός, fever; ὀρθός, straight; πνοή, breath]. Orthopnea attended with fever.

Pyrexia (*pi-reks'-e-ah*) [πύρεξις, fever]. Elevation of temperature above the normal. Fever.

Pyrexial, Pyrexic (*pi-reks'-e-al, pi-reks'-ik*) [πύρεξις, fever]. Pertaining to pyrexia. **P. Tincture.** See *Warburg's Tincture.*

Pyrexialis, Tinctura (*pi-reks-e-a'-lis*). See *Warburg's Tincture.*

Pyrexy (*pi-reks'-e*). Same as *Pyrexia.*

Pyrgocephaly (*pir-go-sef'-al-e*) [πύργος, tower; κεφαλή, head]. The condition in which the vertex rises as an eminence above the level of the skull.

Pyria (*pi'-re-ah*) [πῦρ, fire]. Hot bath, vapor-bath; hot fomentation.

Pyriastes (*pir-e-as'-tēz*). Synonym of *Colostrum.*

Pyridin (*pi'-rid-in*) [πῦρ, fire], C_5H_5N. An alkaloid, prepared from bone-oil, and also obtained from all the pyridin-carboxylic acids on distillation with lime. It is a pungent-smelling liquid, miscible with water, of sp. gr. 1.0033 at 0° C. and boiling at 114.8° C. It is useful in allaying asthmatic paroxysms. Dose gtt. vj–xv; by inhalation, f℥j–f℥iss. Unofficial.

Pyriform (*pir'-if-orm*) [*pyrus*, pear; *forma*, a form]. Pear-shaped. **Pyriformis Muscle.** See *Muscles, Table of.*

Pyrimania (*pi-rim-a'-ne-ah*). Synonym of *Pyromania.*

Pyrites (*pi'-rit-ēz*) [πυρίτης, flint]. Either of the common sulphids of iron, pyrite and marcasite. **P., Arsenical,** pyrites occurring as a mixture of several sulphids of arsenic. **P., Iron,** the ordinary pyrites.

Pyro- (*pi'-ro-*) [πῦρ, fire]. A prefix signifying connection with or relation to fire, or heat.

Pyro-acetic (*pi-ro-as-e'-tik*) [πῦρ, fire; *acetum*, acid]. Pertaining to or obtained from acetic acid by the action of heat. **P. Spirit.** Synonym of *Acetone.*

Pyro-acid (*pi-ro-as'-id*) [πῦρ, fire; *acidus*, acid]. A product obtained by subjecting certain organic acids to heat.

Pyroantimonic Acid (*pi-ro-an-tim-o'-nik*). See *Pyrantimonic Acid.*

Pyroarsenic Acid (*pi-ro-ar-sen'-ik*) [πῦρ, fire; *arsenicum*, arsenic], $H_4As_2O_7$. A tetrabasic acid produced when arsenic is heated to 180° C.

Pyroboric Acid (*pi-ro-bo'-rik*) [πῦρ, fire; *boron*], $H_2B_4O_8$. A dibasic acid produced by heating boric acid.

Pyrocatechic Acid (*pi-ro-kat'-e-chik*). Synonym of *Pyrocatechin.*

Pyrocatechin (*pi-ro-kat-e'-chin*) [πῦρ, fire; *catechu*], $C_6H_4(OH)_2 = C_6H_6O_2$. *Catechol;* a substance first obtained in the distillation of catechin (the juice of *Mimosa catechu*). It is formed by the dry distillation of proto-catechuic acid. It crystallizes in short rhombic prisms and sublimes in shining leaflets; is soluble in water, alcohol, and ether; melts at 104° C. and boils at 245° C. Its alkaline solutions turn black on exposure to air. It is an antipyretic. Dose gr. j–iij.

Pyrocatechinic Acid, Pyrocatechuic Acid (*pi-ro-kat-e-chin'-ik, pi-ro-kat-e-chu'-ik*). Synonyms of *Pyrocatechin.*

Pyrocitric Acid (*pi-ro-sit'-rik*) [πῦρ, fire; *citrus*, lemon]. An acid formed from citric acid by distillation. The term includes several acids.

Pyrocoll (*pi'-ro-kol*) [πῦρ, fire; κόλλα, glue]. 1. The amid anhydrid of carbopyrrolic acid. It crystallizes in yellow leaflets, melting at about 268° C. 2. $C_{10}H_6N_2O_2$. A substance obtained in the dry distillation of gelatin.

Pyrocomane (*pi-ro-ko'-mān*). See *Pyrone.*

Pyrodextrin (*pi-ro-deks'-trin*) [πῦρ, fire; *dexter*, right], $C_{48}H_{74}O_{37}$. A brownish solid resulting from the action of heat upon dextrin.

Pyrodin (*pi'-ro-din*) [πῦρ, fire], $C_6H_5.C_2H_3O.N_2H_2$. Acetyl-phenyl-hydrazin. A white, sparingly soluble powder, a powerful antipyretic. Dose ½ to 4 grains.

Pyrogallate (*pi-ro-gal'-āt*) [πῦρ, fire; *galla*, galls]. A salt of pyrogallic acid.

Pyrogallic Acid (*pi-ro-gal'-ik*). See *Acid.*

Pyrogallocarbonic Acid (*pi'-ro-gal'-o-kar-bon'-ik*) [πῦρ, fire; *galla*, galls; *carbon*, carbon]. A substance prepared by heating pyrogallic acid with a five per cent. solution of sodium carbonate, and dissolving the product in cold strong sulphuric acid. It is used as a delicate test for nitric acid.

Pyrogallol (*pi-ro-gal'-ol*) [πῦρ, fire; *galla*, galls], $C_6H_3(OH)_3$. *Pyrogallic acid;* a phenol derivative produced by the action of heat on gallic acid. It occurs in long, flattened prisms, colorless, bitter to taste, soluble in water, alcohol, and ether. It will affect the blood and produce hemoglobinuria. It is a powerful reducing agent. It is used as a local application in dermatology.

Pyrogen (*pi'-ro-jen*) [πῦρ, fire; γεννᾶν, to produce]. 1. A substance capable of producing fever. 2. The electric fluid.

Pyrogenesia, Pyrogenesis (*pi-ro-jen-e'-ze-ah, pi-ro-jen'-es-is*) [πῦρ, fire; γένεσις, origin]. The production of heat or fever.

Pyrogenetic, Pyrogenic (*pi-ro-jen-et'-ik, pi-ro-jen'-ik*) [πῦρ, fire; γεννᾶν, to produce]. Producing heat or fever.

Pyrogenic (*pi-ro-jen'-ik*) [πῦρ, fire; γεννάν, to produce]. Producing fever.

Pyrogenous (*pi-roj'-en-us*) [πῦρ, fire; γεννάν, to produce]. Produced by heat.

Pyroglucic Acid (*pi-ro-glu'-sik*). Synonym of *Pyrodextrin.*

Pyroglycin (*pi-ro-gli'-sin*). Synonym of *Metaglycerin.*

Pyroguaiacic Acid (*pi-ro-gwī-ak'-ik*). Synonym of *Guaiacol.*

Pyroleum (*pi-ro'-le-um*) [πῦρ, fire; *oleum*, oil]. 1. Petroleum. 2. An oil produced by dry distillation.

Pyroligneous (*pi-ro-lig'-ne-us*) [πῦρ, fire; *lignum*, wood]. Pertaining to the destructive distillation of wood. **P. Acid,** wood-vinegar. See *Acid, Pyroligneous.* **P. Alcohol, P. Spirit.** Synonym of *Methyl alcohol.* **P. Vinegar.** Synonym of *Acid, Pyroligneous.*

Pyrolithic Acid (*pi-ro-lith'-ik*). Synonym of *Acid, Cyanuric.*

Pyrology (*pi-rol'-o-je*) [πῦρ, fire; λόγος, science]. A study of the application of heat, especially with reference to surgical processes.

Pyrolusite (*pi-ro-lu'-sīt*) [πῦρ, fire; λοῦσις, a washing]. Native manganese dioxid.

Pyrolysis (*pi-rol'-is-is*) [πῦρ, fire; λύσις, solution]. Decomposition by means of heat.

Pyrolytic (*pi-ro-lit'-ik*) [πῦρ, fire; λύειν, to dissolve]. Pertaining to pyrolysis.

Pyromania (*pi-ro-ma'-ne-ah*) [πῦρ, fire; μανία, madness]. A form of moral insanity which actuates incendiarism.

Pyromaniac (*pi-ro-ma'-ne-ak*) [πῦρ, fire; μανία, madness]. One affected with pyromania.

Pyromeconic Acid (*pi-ro-me-kon'-ik*) [πῦρ, fire; *meconic*], $C_5H_4O_3$. A crystalline acid obtained by the dry distillation of meconic acid.

Pyromel (*pi'-ro-mel*) [πῦρ, fire; *mel*, honey]. Molasses.

Pyromellitic Acid (*pi-ro-mel-it'-ik*). See *Acid*.

Pyrometamorphism (*pi-ro-met-am-orf'-izm*) [πῦρ, fire; metamorphism]. Metamorphism resulting from the action of heat.

Pyrometer (*pi-rom'-et-er*) [πῦρ, fire; μέτρον, measure]. An instrument for measuring the intensity of heat of too high a degree to be estimated by the ordinary thermometer. **P., Optic.** A photometer used as a pyrometer, on the principle that the luminosity of a body is proportionate to its temperature.

Pyrometric (*pi-ro-met'-rik*) [πῦρ, fire; μέτρον, measure]. Pertaining to the pyrometer.

Pyronaphtha (*pi-ro-naf'-thah*). See *Burning Oil.*

Pyrone (*pi'-rōn*) [πῦρ, fire], $C_5H_4O_2$. *Pyrocomane;* a substance formed when comanic and chelidonic acids are heated to 250° C. It is a neutral solid readily soluble in water; it melts at 32.5° C., and boils at about 315° C.

Pyropemphigus (*pi-ro-pem'-fig-us*) [πῦρ, fire; πέμφιξ, pemphigus]. Pemphigus attended with fever.

Pyrophlyctis syriaca. Synonym of *Aleppo Boil.*

Pyrophobia (*pi-ro-fō'-be-ah*) [πῦρ, fire; φόβος, dread]. Morbid dread of fire.

Pyrophosphate (*pi-ro-fos'-fāt*) [πῦρ, fire; φοσφορος, phosphorus]. A salt of pyrophosphoric acid.

Pyrophosphoric Acid (*pi-ro-fos-for'-ik*). See *Acid.*

Pyroptothymia (*pi-rop-to-thi'-me-ah*) [πῦρ, fire; πτοειν, to terrify; θυμός, mind]. A form of insanity in which the person imagines himself enveloped in flame.

Pyropuncture (*pi-ro-pungk'-tūr*) [πῦρ, fire; *punctura*, puncture]. Puncturing with hot needles.

Pyroscope (*pi'-ro-skōp*) [πῦρ, fire; σκοπεῖν, to examine]. An instrument employed in determining the intensity of thermal radiation.

Pyrosin (*pi'-ro-sin*). Same as *Erythrosin.*

Pyrosis (*pi-ro'-sis*) [πῦρ, fire]. An affection of the stomach characterized by a burning sensation, accompanied by eructations of an acrid, irritating fluid. "Heartburn." **P., Oatmeal.** See *Oatmeal Pyrosis.*

Pyrosphyre (*pi'-ro-sfīr*) [πῦρ, fire; σφῦρα, hammer]. Same as *Moxosphyra.*

Pyrosulphuric Acid (*pi-ro-sul-fu'-rik*) [πῦρ, fire; *sulphur*], $H_2S_2O_7$. A fuming crystalline body prepared by crystallization from cold Nordhausen sulphuric acid.

Pyrotartaric Acid (*pi-ro-tar-tar'-ik*). See *Acid.*

Pyrotechnia (*pi-ro-tek'-ne-ah*) [πῦρ, fire; τέχνη, art]. The scientific application of heat. **P. chirurgica**, the employment of fire in surgical procedures.

Pyrothonid (*pi-roth'-o-nid*) [πῦρ, fire]. A tarry substance resulting from the imperfect combustion of hemp, cotton, and linen.

Pyrotic (*pi-rot'-ik*) [πῦρ, fire]. 1. Having the property of inflammability. 2. Caustic.

Pyrotoxic (*pi-ro-toks'-ik*) [πῦρ, fire; τοξικος, poison]. A caustic poison.

Pyrotoxin (*pi-ro-toks'-in*) [πῦρ, fire; τοξικον, poison]. A toxic agent generated in the course of the febrile process.

Pyrouric Acid (*pi-ro-u'-rik*). See *Acid, Cyanuric.*

Pyrovinic Acid (*pi-ro-vin'-ik*). See *Acid, Pyrotartaric.*

Pyroxanthin (*pi-ro-zan'-thin*) [πῦρ, fire; ξανθός, yellow]. A crystalline substance found in crude wood-spirit.

Pyroxylic (*pi-roks-il'-ik*) [πῦρ, fire; ξύλον, wood]. Obtained by distilling wood. **P. Spirit**, methylic alcohol, a product of the distillation of wood. It is also called *wood-spirit* and *wood-alcohol.*

Pyroxylin, Pyroxylinum (*pi-roks'-il-in, pi-roks-il-i'-num*) [πῦρ, fire; ξύλον, wood: gen., *Pyroxylini*]. Gun-cotton. Ordinary cotton fiber treated with strong fuming nitric acid, the cellulose, $C_6H_{10}O_5$, being changed to trinitro-cellulose, $C_6H_7O_2(NO_2)_3$. It is soluble in ether, and is highly explosive by percussion. **Collodium**, contains pyroxylin 4, ether 70, alcohol 26. Solution should be complete. **C. cum cantharide** (**C. desiccans**, B. P.), flexible collodion 85, cantharides 60, chloroform, q. s. **C. flexile**, flexible collodion contains collodion 92, Canada turpentine 5, castor-oil 3 parts. **C. stypticum**, styptic collodion, tannic acid 2, alcohol 5, ether 25, collodion q. s. ad. 100.

Pyrozone (*pi'-ro-zōn*) [πῦρ, fire; ozone]. A rapidly acting antiseptic, containing 3 per cent. of H_2O_2 in water. It may be employed either internally or externally without danger of toxic effects. It decomposes pus with rapidity, causing effervescence. Unof.

Pyrrhol, Pyrrol (*pir'-ol*) [πῦρ, fire; *oleum*, oil], $C_4H_4(NH)$. A liquid first found in coal-tar and bone-oil. It is produced by the distillation of ammonium saccharate or mucate, or upon heating glycerol to 200° C. It is a colorless liquid, with an odor like that of chloroform. It becomes brown on exposure, and boils at 131° C.; it has a sp. gr., 0.9752 at 12.5° C.; it is but slightly soluble in water. **P. Red**, $C_{12}H_{14}N_2O$, a reddish powder obtained by treating pyrrhol with a strong acid.

Pyrrolidin (*pi-rol'-id-in*) [πῦρ, fire; *oleum*, oil], C_4H_9N. A substance formed by the action of sodium upon succinimid dissolved in absolute alcohol.

Pyrrolin (*pir'-ol-in*) [πῦρ, fire; *oleum*, oil], C_4H_6NH. An oily liquid formed when pyrrhol is digested with zinc dust and acetic acid. It is readily soluble in water, and boils at 91° C.

Pyruric Acid (*pi-ru'-rik*). Synonym of *Acid, Cyanuric.*

Pyrus (*pi'-rus*) [L., a pear-tree]. A genus of the *Pomeæ*, including the apple (*Malus*), the pear (*P. communis*, and other species) and others.

Pyruvic Acid (*pir-u'-vik*). See *Acid.*

Pyruvil (*pi-ru'-vil*) [πῦρ, fire; οὖρον, urine], $C_5H_8N_4O_3$. A substance formed from urea and pyroracemic acid.

Pythogenesis (*pi-tho-jen'-es-is*) [πύθειν, to rot; γένεσις, genesis]. Production by means of filth.

Pythogenic (*pi-tho-jen'-ik*) [πύθειν, to rot; γεννᾶν, to produce]. Arising from decomposing matter. **P. Fever.** Synonym of *Typhoid Fever.* **P. Pneumonia.** See *Pneumonia.*

Pytia (*pi'-she-ah*). Synonym of *Colostrum.*

Pyuria (*pi-u'-re-ah*) [πύον, pus; οὖρον, the urine]. Pus in the urine.

Pyxidate (*piks'-id-āt*) [πυξίς, a box]. Resembling a *pyxidium*, or bearing *pyxidia;* furnished with a lid.

Pyxidium (*piks-id'-e-um*) [dim. of πυξίς, a box: *pl.*, *Pyxidia*]. In biology, a capsule which dehisces along a circular transverse line, so that the upper part comes off like a lid; also called a *pyxis.*

Pyxinin (*piks'-in-in*) [πυξίς, a box]. A characteristic chemic substance found by Frenzel in the gregarina *Pyxina.*

Q

Q. S. Abbreviation of *quantum sufficit*—as much as suffices.

Qinbil (*kin'-bil*) [Arab.]. See *Kamala*.

Quack (*kwak*) [ME., *quakken*, to quack]. One who practises quackery; a pretender to medical skill. **Q.-salver**, a quack, or mountebank; a peddler of his own medicines and salves. See *Mountebank*.

Quackery (*kwak'-er-e*) [ME., *quakken*, to quack]. The pretence of medical knowledge, skill, or success, by one without either. Medical charlatanism.

Quackism (*kwak'-izm*) [ME., *quakken*, to quack]. The practice of quackery.

Quadrangular (*kwod-rang'-gu-lar*) [*quadrangulum*, a four-cornered figure]. Having four angles. Applied especially to a lobe of the cerebellum.

Quadrant (*kwod'-rant*) [*quadratus*, squared]. The fourth part of a circle, subtending an angle of 90 degrees. **Q. of Wilder**, such an area of the ventral aspect of the crus cerebri in the cat.

Quadrate (*kwod'-rāt*) [*quadratus*, square]. 1. Square; four-sided. 2. In biology, the bone which in birds and reptiles articulates with the squamosal above, the mandible below, the pterygoid internally, and the quadratojugal externally. **Q. Lobule**. See *Lobule*.

Quadratiferous (*kwod-rat-if'-er-us*) [*quadratus*, quadrate; *ferri*, to bear]. Having a distinct quadrate bone.

Quadratiformis (*kwod-rat-if-or'-mis*). Same as *Quadratus femoris*. See *Muscles, Table of*.

Quadratipronator (*kwod-rat-ip-ro-na'-tor*). Same as *Pronator quadratus*. See *Muscles, Table of*.

Quadratojugal (*kwod-ra-to-ju'-gal*) [*quadratus*, square; *jujum*, a yoke]. Common to the quadrate and malar bones.

Quadratomandibular (*kwod-ra-to-man-dib'-u-lar*) [*quadratus*, quadrate; *mandibile*]. Pertaining to the quadrate bone and inferior maxilla.

Quadratopterygoid (*kwod-ra-to-ter'-ig-oid*) [*quadratus*, quadrate; πτερυζ, any; εἰδος, like]. Pertaining to the quadrate and pterygoid bones.

Quadratosquamosal (*kwod-ra-to-skwa-mo'-zal*) [*quadratus*, quadrate; *squama*, scale]. Pertaining to the quadrate and squamosal bones.

Quadratum (*kwod-ra'-tum*) [*quadra*, a square: *pl.*, *Quadrata*]. The *os quadratum*, or quadrate bone.

Quadratus (*kwod-ra'-tus*) [L.]. Squared. Having four sides. **Q. Muscle.** See *Muscles, Table of*.

Quadrauricular (*kwod-raw-rik'-u-lar*) [*quadri-*, four; *auricula*, auricle]. In biology, having four auricles, as the heart of certain cephalopods (*Nautilus*).

Quadri- (*kwod'-re-*) [L.]. A prefix used to denote four, or four times.

Quadriarticulate (*kwod-re-ar-tik'-u-lāt*) [*quadri*, four; *articulare*, to divide into single joints]. Possessing four articulations or joints.

Quadribasic (*kwod-rib-a'-zik*) [*quadri*, four; *basis*, base]. In chemistry, applied to an acid having four replaceable hydrogen atoms.

Quadricapsular (*kwod-re-kap'-su-lar*) [*quadri*, four; *capsula*, capsule]. In biology, having four capsules.

Quadricarinate (*kwod-re-kar'-in-āt*) [*quadri*, four; *carina*, keel]. In biology, applied to such insects or other animals as possess four ridges or keel-like structures.

Quadricellular (*kwod-ris-el'-u-lar*) [*quadri*, four; *cellula*, little cell]. Having four cells.

Quadriceps (*kwod'-ris-eps*). See *Muscles, Table of*.

Quadriciliate (*kwod-ris-il'-e-āt*) [*quadri*, four; *cilium*, an eyelash]. In biology, having four cilia or flagella.

Quadricipital (*kwod-ris-ip'-it-al*) [*quadri*, four; *caput*, head]. Having four heads, as a muscle.

Quadricorn (*kwod'-rik-orn*) [*quadri*, four; *cornu*, horn]. In biology, having four horns or horn-like structures.

Quadricornous (*kwod-rik-or'-nus*). Same as *Quadricorn*.

Quadricostate (*kwod-rik-os'-tāt*) [*quadri*, four; *costa*, rib]. In biology, having four costæ.

Quadricuspidate (*kwod-rik-us'-pid-āt*) [*quadri*, four; *cuspis*, a point]. Having four cusps, as a tooth.

Quadridentate (*kwod-rid-en'-tāt*) [*quadri*, four; *dens*, a tooth]. Having four teeth or tooth-like parts.

Quadridigitate (*kwod-rid-ij'-it-āt*) [*quadri*, four; *digitus*, a digit]. Having four digits.

Quadrifid (*kwod'-rif-id*) [*quadri*, four; *findere*, to cleave]. Four-cleft.

Quadrifocal (*kwod-rif-o'-kal*) [*quadri*, four; *focus*, a focus]. Having four foci.

Quadrifoliate (*kwod-rif-o'-le-āt*) [*quadri*, four; *folium*, leaf]. With four leaves.

Quadrifoliolate (*kwod-rif-o'-le-o-lāt*) [*quadri*, four; *foliolus*, leaflet]. In biology, having four leaflets or folioles.

Quadrifurcate (*kwod-rif-ir'-kāt*) [*quadri*, four; *furca*, fork]. In biology, having four branches or subdivisions, doubly bifurcate.

Quadrigeminal (*kwod-rij-em'-in-al*) [*quadrigeminus*, fourfold]. Fourfold. Pertaining to the corpora quadrigemina. **Q. Bodies.** See *Corpora quadrigemina*.

Quadrigeminate (*kwod-rij-em'-in-āt*) [*quadri*, four; *geminus*, twin born]. In biology, growing in fours, as *Sarcina*.

Quadrigeminous (*kwod-rij-em'-in-us*) [*quadrigeminus*, four-fold]. Pertaining to the corpora quadrigemina.

Quadriglandular (*kwod-rig-lan'-du-lar*) [*quadri*, four; *glans*, gland]. Having four glands.

Quadrijugate (*kwod-rij-u'-gāt*, *kwod-rij'-u-gāt*). In biology, having four pairs of leaflets.

Quadrilaminar, Quadrilaminate (*kwod-ril-am'-in-ar*, *kwod-ril-am'-in-āt*) [*quadri*, four; *lamina*, a thin plate]. Four-layered.

Quadrilateral (*kwod-ril-at'-er-al*) [*quadri*, four; *latus*, a side]. Having four sides.

Quadrilobate (*kwod-ril-o'-bāt*) [*quadri*, four; *lobus*, lobe]. In biology, having four lobes.

Quadrilobular (*kwod-ril-ob'-u-lar*) [*quadri*, four; *lobus*, lobe]. Having four lobes. **Q. Brain**, a double brain, or a brain with four hemispheres; a rare form of cerebral deformity.

Quadrilocular (*kwod-ril-ok'-u-lar*) [*quadri*, four; *loculus*, a cell]. In biology, having four cells or compartments, as the ovary of a flower, or the heart of a bird or mammal.

Quadriloculate (*kwod-ril-ok'-u-lāt*). Same as *Quadrilocular*.

Quadrimembral (*kwod-rim-em'-bral*) [*quadri*, four; *membrum*, a limb]. In biology, having four limbs.

Quadrinucleate (*kwod-rin-u'-kle-āt*) [*quadri*, four; *nucleus*, a *nucleus*]. In biology, having four nuclei.

Quadripara (*kwod-rip'-ar-ah*) [*quadri*, four; *parere*, to bear]. A woman who is bearing, or has borne, her fourth child, or has had her fourth confinement.

Quadriparous (*kwod-rip'-ar-us*) [*quadri*, four; *parere*, to bring forth]. Pertaining to a quadripara, or to a fourth confinement.

Quadripartite (*kwod-rip-ar'-tit*) [*quadri*, four; *partire*, to divide]. In biology, divided into four parts.

Quadripennate (*kwod-rip-en'-āt*) [*quadri*, four; *penna*, wing]. In biology, having four functional wings.

Quadriphyllous (*kwod-rif-il'-us*) [*quadri*, four; *φύλλον*, leaf]. In biology, having four leaves.

Quadripulmonary (*kwod-rip-ul'-mo-na-re*) [*quadri*, four; *pulmon*, lung]. In biology, applied to such spiders as have four pulmonary sacs.

Quadriradiate (*kwod-re-ra'-de-āt*) [*quadri*, four; *radius*, ray]. In biology, four-rayed.

Quadriseptate (*kwod-ris-ep'-tāt*) [*quadri*, four; *septum*, a partition]. In biology, having four septa.

Quadriserial (*kwod-ris-e'-re-al*) [*quadri*, four; *series*, a row]. In biology, arranged in four rows or series; tetrastichous.

Quadrisetose (*kwod-ris-e'-tōz*) [*quadri*, four; *sæta*, *seta*, a bristle]. In biology, having four setæ, or bristles.

Quadrispiral (*kwod-ris-pi'-ral*) [*quadri*, four; *spira*, coil]. In biology, having four spirals.

Quadrisulcate (*kwod-ris-ul'-kāt*) [*quadri*, four; *sulcus*, a furrow]. In biology, having four grooves, or furrows.

Quadrituberculate (*kwod-rit-u-ber'-ku-lāt*) [*quadri*, four; *tuberculum*, tubercle]. Having four tubercles.

Quadriurate (*kwod-re-u'-rāt*) [*quadri*, four; *οὖρον*, urine]. A term applied to the mixed urates of the lateritious deposits of urine.

Quadrivalent (*kwod-riv'-al-ent*) [*quadri*, four; *valens*, power]. Having a quadruple chemic valence; having a combining power equivalent to that of four hydrogen atoms.

Quadrivalvular (*kwod-riv-al'-vu-lar*) [*quadri*, four; *valva*, a valve]. In biology, having four valves, as certain pericarps.

Quadrivoltine (*kwod-riv-ol'-tin*) [*quadri*, four; *volta*, turn, time]. Applied to such silkworms as yield four crops of cocoons a year.

Quadroon. See *Mulatto.*

Quadrumana (*kwod-ru'-man-ah*) [*quadri*, four; *manus*, a hand]. Formerly, an order of mammalia, including monkeys, apes, etc. The term is now mostly used merely as a descriptive word.

Quadrumanous (*kwod-ru'-mān-us*) [*quadri*, four; *manus*, hand]. Having four hands. Pertaining to the *Quadrumana.*

Quadruped (*kwod'-ru-ped*) [*quadri*, four; *pes*, foot]. In biology, having four ambulatory limbs, as distinguished from *aliped* and *biped.* Cf. *quadrumanous.*

Quadruple (*kwod'-ru-pl*) [*quadruplare*, to make fourfold]. Four-fold.

Quadruplet (*kwod-ru'-plet*) [*quadruplare*, to make fourfold]. Any one of four children brought forth at one birth.

Quain's Fatty Heart. That form of fatty heart in which the muscular fiber is replaced by fatty tissue. See *Diseases, Table of.*

Quaker Button. A popular name for *Nux Vomica.*

Qualitative (*kwol'-it-a-tiv*) [*qualitas*]. Pertaining to quality. **Q. Analysis.** See *Analysis.*

Qualitive (*kwol'-it-iv*). See *Qualitative.*

Quantation (*kwon-ta'-shun*) [*quantus*, how great]. The determination of quantity, or volume, as in observations regarding specific gravity.

Quantitative (*kwon'-tit-a-tiv*) [*quantus*, how much]. Pertaining to quantity. **Q. Analysis.** See *Analysis.*

Quantitive (*kwon'-tit-iv*). Same as *Quantitative.*

Quantivalence (*kwon-tiv'-al-ens*) [*quantus*, how much; *valere*, to be able]. The chemic strength of an element or radicle expressed in terms of the number of atoms of hydrogen with which it will unite. *Univalent* or *monad atoms*, as chlorin, Cl–, are saturated with one atom. *Bivalent* or *dyad* atoms, as oxygen, –O–, require two. *Trivalent* or *triad* atoms, as Boron,

—B—, take three. *Tetravalent* or *tetrad* atoms, as

carbon, —C—, take four, etc. Nitrogen is a *pentad*,

and sulphur a *hexad.*

Quarantine (*kwor'-an-tēn*) [It., *quaranta*, forty]. The time (formerly forty days) during which a vessel from ports infected with contagious or epidemic diseases is required by law to remain outside the port of its destination, as a safeguard against the spreading of such disease. Also, the place of detention. **Q., Land,** the isolation of a person or district on land for similar purposes. **Q. Period,** the length of time required to insure immunity after exposure, or the length of time necessary after an attack, to render the disease innocuous.

Quart (*kwort*) [*quartus*, fourth]. The fourth part of a gallon.

Quartan (*kwor'-tan*) [*quartus*, fourth]. Recurring on the fourth day (both days of occurrence being reckoned). A form of intermittent fever, the paroxysms of which occur every fourth day. **Q., Double,** milder and severer paroxysms occurring alternately, with a day between,—a severe one the first day, a milder one the second, then a free day, followed by a severe paroxysm on the fourth day.

Quarter-crack. In farriery, a fissure of the hoof on the inner side of the fore-foot of a horse.

Quarter-evil (*kwor'-ter-e'-vil*). An infectious disease of cattle, prevalent during the summer months, and characterized by the appearance of irregular emphysematous swellings of the subcutaneous tissue and muscles, especially over the quarters, hence the name: it is also called—*Symptomatic Anthrax, Black-Leg. Fr.*, "*Charbon symptomatique.*" *Ger., Rauschbrand.* See *Bacillus chauvæi*, Bollinger and Feser, under *Bacteria, Synonymatic Table of*, and also *Black-leg.*

Quarteroon, Quarteronne (*kwor-ter-oon'*). See *Mulatto.*

Quartine (*kwar'-tin*) [*quartus*, fourth]. In biology, a fourth integument, counting from the outside.

Quartipara (*kwor-tip'-ar-ah*) [*quartus*, fourth; *parere*, to bring forth]. A woman in her fourth pregnancy.

Quartz (*kworts*). See *Silica.*

Quassation (*kwas-a'-shun*) [*quassatio*, a shaking or shattering]. The reduction of barks, roots, and other drugs to morsels in preparation for further pharmaceutic treatment; cassation.

Quassia (*kwosh'-e-ah*) [after *Quassi*, a negro slave in Surinam]. 1. The wood of *Picræna excelsa*, native to the W. Indies and other tropical regions. It is a bitter stomachic tonic. Dose gr. xx–xxx. **Q.-cup,** a cup made of quassia wood, called also *bitter-cup*, from which water may be drunk, the bitter principles becoming dissolved in the water. **Q., Ext.** Its properties are due to a bitter principle, quassin, $C_{31}H_{42}O_9$. Dose gr. j–iij. **Q., Fld. Ext.** Dose ʒss–j. **Q., Infus.,** quassia chips ʒj, water ℥x. Dose ℥j–iij. **Q., Tinct.,** 10 per cent. in strength. Dose ♏v–ʒj. 2. Originally, as still in France and Germany, the wood of *Quassia amara* was the official quassia; the therapeutic properties of this tree and its wood are much the same as those of the ordinary quassia of commerce.

Quassin (*kwos'-in*) [after *Quassi*, a negro slave in Surinam]. The active principle of quassia.

Quaternary (*kwa-ter'-na-re*) [*quaterni*, four each]. Consisting of four. **Q. Union or Structure,** an old

chemic term denoting union of four elements, as in fibrin or gelatin.

Quaternate (*kwat-er'-nat*) [*quaterni*, four each]. In biology, made up of four parts, as leaflets.

Quatrefages, Angle of. See *Angle.*

Quatuor (*kwat'-u-or*) [L.]. Four. **Q. Pills** [Pilulæ Quatuor, N. F.]. The *pilulæ ferri et quininæ compositæ*, made up of four ingredients, iron sulphate, quinin, aloes, and nux vomica.

Queasy (*kwē'-ze*) [ME., *quaysy*, causing a feeling of nausea]. Nauseated; inclined to vomit. [Colloquial.]

Quebrachin (*ke-brah'-kin*) [contr. from Pg. *quebrahacho*, "ax-breaker."] An alkaloid of *Quebracho*. It occurs in colorless crystals, which become yellow in the light.

Quebracho (*ke-brah'-ko*) [contr. from Pg. *quebrahacho*, "ax-breaker."] The bark of *Aspidosperma quebracho*, a bitter tonic and antispasmodic. In large doses, it lowers the heart's action. It is much used in Chile as an antiperiodic. The alkaloid, *aspidospermin*, $C_{22}H_{30}N_2O_2$, is used in cardiac neuroses, asthma, and as an antipyretic. **Q., Ext.** Dose gr. ij–viij. **Q., Fld. Ext.** Dose ɱv–ʒj. **Q., Tinct.,** 20 per cent. Dose ʒj–ʒ ss. **Q., Vinum,** contains quebracho 1, alcohol 2, white wine 16 parts. Dose ʒj–ʒj. All unof.

Quebrachomin (*ke-brah'-ko-min*) [contr. from Pg. *quebra-hacho*, "ax-breaker."] An alkaloid of *Quebracho* resembling quebrachin.

Queen (*kwēn*) [AS. *cwēn*, a woman]. 1. The consort of a king. 2. A name applied to the pectens or mussels (*Mytilus edulis*) caught for food and bait off the southern coast of England. **Q. of the Meadow.** Also, *Spiræa ulmaria*, of Europe; the flower, leaf, and root are diuretic and astringent. Also, rarely, *Spiræa salicifolia*. **Q.'s-root.** See *Stillingia.*

Quenuthoracoplasty (*kwen-u-tho-rak-o-plas'-te*) [*Quenu*, a physician; θώραξ, thorax; πλάσσειν, to form]. Richelot's term for an operation devised by Quenu for empyema, consisting in simple section of the ribs, without resection, to favor retraction of the chest-wall.

Quercin (*kwer'-sin*) [*quercus*, oak], $C_6H_6(OH)_6$. A bitter, crystallizable carbohydrate extracted from acorns and oak-bark.

Quercitannic Acid (*kwer-sit-an'-ik*) [*quercus*, oak; *tannin*, tannin], $C_{17}H_{16}O_9$. A substance found in oak-bark, forming an amorphous yellowish-brown mass, and differing from gallotannic acid in not being convertible into gallic acid or hydrogallol. See *Oak-bark.*

Quercite (*kwer'-sīt*) [*quercus*, oak], $C_6H_7(OH)_5$. A crystallizable substance, the so-called oak-sugar, or acorn-sugar, which is a sweet and optically active sugar-like carbohydrate, derivable from acorns.

Quercitrin (*kwer'-sit-rin*) [*quercus*, oak; *citrus*, lemon], $C_{36}H_{38}O_{20}$. A glucosid found in the bark of *Quercus tinctoria*, and used as a yellow dye. It consists of yellow needles or leaflets.

Quercivorous (*kwer-siv'-o-rus*) [*quercus*, an oak; *vorare*, to devour]. In biology, applied to insects or other organisms that feed upon the oak.

Quercus (*kwer'-kus*) [L.]. A genus of dicotyledonous trees. **Q. alba,** the bark of the white oak. Its properties are due to quercitannic acid, a variety of tannic acid with which its medical properties are identical. It is much used as an astringent lotion, and is commonly exhibited in a decoction of ʒj to the Oj. **Q. ballota.** See *Racahout.* **Q. bicolor,** the swamp white-oak of North America. **Q., Decoct.** (B. P.) is used as an astringent gargle. **Q. infectoria,** Dyer's oak; Aleppo gall-oak; nut-gall oak, growing in Greece and Asia Minor, and from which the nut-gall of commerce is mainly derived. **Q. robur,** the common black-oak. The bark (*cortex*) is astringent and tonic, containing gallic acid, quercitannic acid, and a little quercite. The leaves and acorns are also used. **Q. rubra,** red oak or Champion oak of Canada and the Northern United States. **Q. suber.** See *Cork.* **Q. tinctoria** (*Angulosa*), black, or dyers' oak. **Q. virens,** American live-oak, bearing edible acorns.

Quevenne's Iron. See *Ferrum.*

Quick, or Quick with Child (*kwik*) [ME., *quik*, alive]. A term used in legal medicine to denote pregnancy. **Q. Anatomy.** See *Vivisection.* **Q. Consumption.** See *Galloping Consumption.* **Q.-lime,** the popular name for calcic oxid. See *Calcium.* **Q.-silver,** the popular name for mercury or hydrargyrum.

Quicken (*kwik'-en*) [ME., *quik*, alive]. To experience the sensation of quickening, *q. v.*

Quickening (*kwik'-en-ing*) [ME., *quik*, alive]. The first feelings on the part of the pregnant woman of fetal movements, occurring about the fifth month.

Quiddany (*kwid'-an-e*) [*cydoneum*]. An old name for a confection of quinces.

Quiescence (*kwi-es'-ens*) [*quiescence*, repose]. A condition of animal life approaching torpidity, but in which the animal may receive food and move slightly.

Quiet (*kwi'-et*) [*quies, quietis*]. Repose; complete rest. See *Rest-cure.* **Q.-disease,** hip-joint disease in children (sometimes destructive and always of progressive tendency), which has no strongly marked symptoms, and is often overlooked for a long time, there being in many cases little or no pain.

Quigila (*kwig'-il-ah*). Synonym of *Ainhum.*

Quill (*kwil*) [ME., *quille*, a quill]. The tube, barrel, calamus, or hollow shaft of a feather, principally of the domestic goose; it has a limited use in surgery. **Q.-suture.** See *Suture.*

Quillaic Acid (*kwil-a'-ik*). See *Acid.*

Quillain (*kwil-a'-in*). See *Saponin.*

Quillaja (*kwil'-a-yah*) [Chilean, *quillai*, hair]. A genus of rosaceous trees, including *Soap-bark*, the inner bark of *Q. saponaria*, indigenous to the Andes. Its properties are due to a glucosid, saponin, $C_{32}H_{54}O_{18}$. It is a sternutatory, irritant to the mucous membranes, and an expectorant. Dose of a 5 : 200 decoction ʒj–ij.

Quiltor (*kwil'-tor*). See *Quiltor.*

Quinaldin (*kwin-al'-din*), $C_{10}H_9N$. *Methyl-quinolin*; formed by digesting anilin with paraldehyd and HCl. It is a liquid with a faint odor resembling that of quinolin, and boils at 238° C.

Quinaldinic Acid (*kwin-al-din'-ik*). See *Acid.*

Quinamicin (*kwin-am'-is-in*) [*quinamin*, an arbitrary form]. An artificial alkaloid, $C_{19}H_{24}N_2O_3$, obtained from quinamin.

Quinamidin (*kwin-am'-id-in*). An isomer of *Quinamicin.*

Quinamin (*kwin'-am-in*) [Sp., *quina*, bark; *amin*], $C_{19}H_{24}N_2O_2$. An alkaloid of the *Cinchonas.*

Quinary (*kwin'-a-re*) [*quinarius*, containing five]. Divided into five parts.

Quinate (*kwin'-āt*) [*quini*, five each]. Applied to a palmately compound leaf with five leaflets.

Quince (*quins*). See *Scrofula.* **Q.-seed.** See *Cydonium.*

Quincke's Capillary Pulse. Capillary pulsation with a marked blanching of the finger nails at each diastole of the heart; a symptom of aortic insufficiency. **Q.'s Disease.** See *Urticaria œdematosa*, and *Diseases, Table of.* **Q.'s Puncture,** puncture of the spinal canal for withdrawal of cerebrospinal fluid in hydrocephalus.

Quincuncial (*kwin-kun'-she-al*) [*quincunx*, five-twelfths]. In biology, applied to that form of

estivation in which there are five leaves, two outside, two inside, and one with one edge outside and the other inside. Also five-ranked.

Quincunx (*kwin'-kungks*) [*quinque*, five; *uncia*, a twelfth part]. In biology, an arrangement of five parts, or objects, in a square with the odd one in the center, *i. e.*, ⁘.

Quinetum (*kwi-ne'-tum*) [Sp. *quina*, bark]. *Cinchona febrifuga*; the mixed alkaloids from red cinchona bark used as a cheap febrifuge in India. Dose gr. j–v.

Quinic (*kwin'-ik*) [Sp., *quina*, bark]. Pertaining to quinin. **Q. Fever**, febrile symptoms, with an eruption; it occurs among workmen making quinin.

Quinicin (*kwin'-is-in*) [Sp., *quina*, bark]. One of the constituents of *chinoidin*.

Quinidin (*kwin'-id-in*). See *Quinidina*.

Quinidina (*kwin-id-i'-nah*) [Sp., *quina*, bark], $C_{20}H_{24}N_2O_2$. A cinchona alkaloid, considered by most writers to be isomeric with quinin, with which it corresponds in therapeutic effects, but it is thought to produce less unpleasant symptoms in the head. **Q., Sulph.**, $(C_{20}H_{24}N_2O_2)_2H_2SO_4.2H_2O$, readily soluble in acidulated water and alcohol; it is an excellent antipyretic and antiperiodic. Dose gr. j–xx or more.

Quinin, Quinia, Quinina (*kwi'-nin, kwin'-en*, or *kin-en'*; *kwin'-e-ah*, *kwin-i'nah*) [Sp., *quina*, bark], $C_{20}H_{24}N_2O_2,3H_2O$. Quinin is a finely crystalline or amorphous white alkaloid obtained from various species of *cinchona*. It is odorless; very bitter, alkaline in reaction, and soluble in 1600 parts of cold water or 6 parts of alcohol. It is a valuable tonic, antiseptic, antipyretic, and antiperiodic. It is extremely valuable in malarial affections. Quinin and its salts are distinguished from all other alkaloids, excepting quinidin and quinicin, by the emerald-green color given to their solution by chlorin-water followed by ammonia. **Q.-bush.** See *Garrya*. **Q.-flower**, the root of *Sabbatia elliottii*, abundant in southeast U. S. It is tonic, febrifuge, and antiperiodic, and is of high repute in malarial fevers. Dose of the fld. ext. ʒss–j. Unof. **Q., Amorphous**, an alcoholic extract of powdered calisaya bark mixed with calcium hydrate. **Beta-Q.** See *Quinidina*. **Q., Amorphous Boric**, borate of quinin. Unof. It is highly recommended, soluble, and is said to cause little congestion of the membrana tympani. **Q., Poor man's**, the seeds of *Cæsalpinia bonduc* and *C. bonducella*. **Q. and urea bimuriate**, a soluble salt, especially useful for hypodermatic injection. **Q. bibromas**, $C_{20}H_{24}N_2O_2,2HBr,3H_2O$. Dose gr. j–iij. **Q. bisulphas**, $C_{20}H_{24}N_2O_2,H_2SO_4,7H_2O$, very soluble in water. Dose gr. j-xxx. **Q. hydrobromas**, $C_{20}H_{24}N_2O_2HBr,2H_2O$, best salt for hypodermatic use. Dose gr. j–xx. **Q. hydrochloras**, $C_{20}H_{24}N_2O_2HCl.2H_2O$, muriate of quinin, antipyretic in gr. v–x doses. **Q. hydrochlor. carbamidat.**, a compound salt of quinin and urea. Dose gr. j–iij. Suitable for hypodermatic use. **Q. lactas**, $C_{20}H_{24}N_2O_2.C_3H_6O_3$, very soluble. Dose gr. j–xx. **Q. salicylas**, valuable in neuralgia and rheumatic gout. Dose gr. j–vj. **Q. sulphas** $(C_{20}H_{24}N_2O_2)_2.H_2SO_4.7H_2O$, soluble in hot and acidulated water. Dose gr. j–xx or xl. **Q. sulphocarbolas.** Dose gr. j–v. **Q. tannas**, tasteless, but insoluble in the stomach. Dose gr. x–xx. **Q., Tinctura, Ammoniata** (B. P.). Dose ʒss–ij. **Q. valerianas**, $C_{20}H_{24}N_2O_2C_5H_{10}O_2.H_2O$, the only salt affected by constituent acid. Dose gr. j–iij. **Q., Vinum** (B. P.). Dose ʒss–j.

Quinina (*kwin-i'-nah*). See *Quinia*.

Quininic Acid (*kwin-in'-ik*). See *Acid*.

Quininism (*kwin-en'-izm*) [Sp., *quina*, bark]. Cinchonism; the condition induced by the continued use or by large doses of quinin. It is marked by deafness, ringing in the ears, etc.

Quinizarin (*kwin-iz-a'-rin*) [Sp., *quina*, bark], $C_{14}H_8O_4$. An isomerid of alizarin.

Quinoa (*ke-no'-ah*) [Peruv.]. A plant, *Chenopodium quinoa*, of Peru and Chile, where it is cultivated for its seeds, which are used as a substitute for the true cereals. The seed-husks of red quinoa are said to be antiperiodic and emetic. Unof.

Quinodin (*kwin'-o-din*) [Sp., *quina*, bark]. An alkaloid-like body found in the organs, tissues, and fluids of human and other animal bodies, resembling by its bluish fluorescence the sulphate of quinin. Obtained by Du Prè and Bence Jones, 1866.

Quinoidin (*kwin-oi'-din*). See *Chinoidinum*.

Quinol (*kwi'-nol*). See *Hydroquinone*.

Quinolin (*kwin'-o-lin*) [Sp., *quina*, bark], C_9H_7N. A substance occurring in bone-oil and coal-tar. It results when many alkaloids are distilled. It is a colorless, strongly refracting liquid, with a penetrating odor. It boils at 239° C.; its specific gravity is 1.095 at 20° C. It is also called *Chinolin*, *q. v.* **Q.-colors.** See *Pigments, Conspectus of*.

Quinology (*kwin-ol'-o-je*) [Sp., *quina*, bark; λόγος, science]. The scientific study of the cinchona trees and of their alkaloids.

Quinone (*kwin'-ōn*) [Sp., *quina*, bark]. A general term for certain derivatives of the benzene series. Also a specific substance of yellowish color and volatile at ordinary temperatures, derived from members of the aromatic group by oxidation with sulphuric acid and manganese dioxid.

Quinotannic Acid (*kwin-o-tan'-ik*) [Sp., *quina*, bark; *tannin*, tannin]. A special form of tannic acid found in certain classes of cinchona-bark.

Quinova (*kwin-o'-vah*) [a contraction of *quina nova*, false cinchona bark]. The bark of *Portlandia grandiflora*.

Quinovin (*kwin'-o-vin*) [Sp., *quina*, bark], $C_{30}H_{48}O_8$. Kinovin; an amorphous bitter glucosid derived from cinchona bark. It is said to be an antipyretic.

Quinoxalin (*kwin-oks'-al-in*) [Sp., *quina*, bark; ὀξύς, sharp], $C_8H_6N_2$. A substance obtained from phenylene diamin and glyoxal or its compounds by digesting the aqueous solution at 60° C. with sodium bisulphite. It is a crystalline mass, melting at 27° C. and boiling at 229° C. Its odor resembles that of quinolin and piperidin. The *Quinoxalins* are prepared by the condensation of the ortho-phenylene diamins with glyoxal. The quinoxalins that do not contain oxygen are feeble monacid bases, generally soluble in water, alcohol, and ether. Their odor resembles that of quinolin.

Quinoxim (*kwin-oks'-im*) [Sp., *quina*, bark; ὀξύς, sharp], $C_6H_4(NO).OH$. *Nitrosophenol*; prepared by the action of nitrous acid upon the phenols. It crystallizes from hot water in colorless, delicate needles, which readily brown on exposure. It is soluble in water, alcohol, and ether, and imparts to them a bright-green color.

Quinquaud's Disease. See *Folliculitis decalvans*, and *Diseases, Table of*. **Q.'s Plaster**, a plaster used in treating syphilis. It consists of emplastrum diachylon, 3000 parts; calomel, 1000 parts; castor-oil, 300 parts. The calomel is suspended in the oil and is then added to the melted plaster; it is then spread on linen so that 14 strips each 9 feet by 7¾ inches are produced. Of this plaster a square of 2½ inches contains 18 grains of calomel.

Quinquecapsular (*kwin-kwe-kap'-su-lar*) [*quinque*, five; *capsula*, capsule]. In biology, having five capsules.

Quinquecostate (*kwin-kwe-kos'-tāt*) [*quinque*, five; *costa*, a rib]. In biology, having five costæ.

Quinquedentate (*kwin-kwe-den'-tāt*) [*quinque*, five; *dens*, tooth]. In biology, five-toothed.

Quinquedigitate (*kwin-kwe-dij'-it-āt*) [*quinque*, five; *digitus*, finger]. Having five fingers or toes.

Quinquefid (*kwin'-kwe-fid*) [*quinque*, five; *findere*, to cleave, split]. In biology, five-cleft.

Quinquefoliate (*kwin-kwe-fo'-le-āt*) [*quinque*, five; *folium*, leaf]. In biology, five-leaved.

Quinquefoliolate (*kwin-kwe-fo'-le-o-lāt*) [*quinque*, five; *foliolum*, a leaflet]. In biology, applied to any compound leaf that has just five leaflets.

Quinquelobate (*kwin-kwe-lo'-bāt*) [*quinque*, five; *lobus*, lobe]. In biology, having five lobes.

Quinquelocular (*kwin-kwe-lok'-u-lar*) [*quinque*, five; *loculus*, a cell]. In biology, having five cells or compartments, as a five-celled ovary.

Quinqueloculine (*kwin-kwe-lok'-u-lin*) [*quinque*, five; *loculus*, a cell]. In biology, the same as *quinquelocular*. Applied to certain *Foraminifera*.

Quinquepartite (*kwin-kwe-par'-tit*) [*quinque*, five; *partire*, to divide]. In biology, five-parted.

Quinqueradiate (*kwin-kwe-ra'-de-āt*) [*quinque*, five; *radius*, ray]. In biology, five-rayed.

Quinqueseptate (*kwin-kwe-sep'-tāt*) [*quinque*, five; *septum*, a partition]. In biology, having five septa or partitions.

Quinqueserial (*kwin-kwe-se'-re-al*) [*quinque*, five; *series*, a row]. In biology, arranged in five rows.

Quinquetuberculate (*kwin-kwe-tu-ber'-ku-lāt*) [*quinque*, five; *tuberculum*, tubercle]. Having five tubercles.

Quinquevalve (*kwin'-kwe-valv*) [*quinque*, five; *valva*, door]. In biology, having five valves.

Quinquinina (*kwin-kwe-ni'-nah*) [Sp., *quina*, bark]. A preparation containing alkaloids of cinchona-bark, extracted by macerating in acidulated water, and precipitated by a soluble alkali.

Quinquino (*kwin-ke'-no*) [S. Amer.]. The tree *Myroxylon pereiræ*, which produces balsam of Peru.

Quinsy (*kwin'-ze*) [κύων, dog; ἀγχειν, to choke]. The popular name for *Cynanche tonsillaris*, an acute, severe inflammation of the tonsils and mucous membrane of the fauces, accompanied by fever. It is specially applied to suppurative tonsillitis. **Q., Malignant.** See *Diphtheria*.

Quintan (*kwin'-tan*) [*quintus*, fifth]. An intermittent fever, the paroxysms of which occur every fifth day, counting the first and last day.

Quinteroon (*kwin'-ter-oon*). See *Quintroon*.

Quintessence (*kwin-tes'-ens*) [*quintus*, fifth; *essentia*, essence]. The active principle of any substance, concentrated to the utmost degree. A term anciently much employed in medicine and pharmacy for a tincture prepared by digestion at a moderate heat.

Quintine (*kwin'-tin*) [*quintus*, fifth]. In biology, a fifth integument counting from the outside.

Quintroon (*kwin-troon'*) [Sp., *quinteron*]. A person, one of whose parents is of the white race, and the other has one-sixteenth part of African blood.

Quintuple (*kwin'-tu-pl*) [*quintuplex*, fivefold]. Fivefold.

Quintuplets (*kwin-tu'-plets*) [*quintuplex*, five-fold]. A set of five children all born at one confinement.

Quitch-grass (*kwitch'-gras*). See *Triticum repens*, or *Quicken*.

Quittor, Quitter (*kwit'-or, kwit'-er*) [ME., *quiter*, rottenness]. In farriery, a fistulous wound upon the quarters or the heel of the coronet, caused by treads, pricks in shoeing, corns, or other injuries which produce suppuration at the coronet or within the foot.

Quiz (*kwiz*) [*quæsare*, to ask]. In medical pedagogics, an informal recitation or exercise in which the student familiarizes himself with his medical studies. **Q.-master**, one who conducts a quiz.

Quizzer (*kwiz'-er*) [*quærare*, to ask (?)]. The preceptor who conducts the quiz-exercise.

Quotidian (*kwo-tid'-e-an*) [*quot*, as many as; *dies*, day]. An intermittent fever, the paroxysms of which occur daily.

Quotient (*kwo'-shent*) [*quoties*, how often]. The result of the process of division. **Q., Respiratory**, the mathematic relation of the free oxygen that is inspired to that which is expelled from the lungs as carbon dioxid.

R

R. The abbreviation of *Recipe*, take; also of *Right*, of *Reaumur*, and of *Resistance* (electric).

℞, or R. An abbreviation of *Recipe*, used in physicians' prescriptions, signifying *take*. The stroke across the tail of the R is probably a remnant of the symbol of Jupiter (♃), used of old as the superscription to formulæ, in accordance with the custom of propitiating the gods by pious invocations.

Rabic (*rab'-ik*) [*rabies*, rage]. Pertaining to rabies; rabietic.

Rabid (*rab'-id*) [*rabidus*, mad]. Affected with rabies, or hydrophobia. Pertaining to hydrophobia, as rabid virus.

Rabidity (*ra-bid'-it-e*) [*rabidus*, rabid]. The state of being rabid.

Rabidness (*rab'-id-nes*) [*rabidus*, rabid]. Madness; the state of being rabid.

Rabidus (*rab'-id-us*) [L.]. Madness. **R. canis.** Synonym of *Hydrophobia*.

Rabies (*ra'-be-ēz*) [L.]. Lyssa, or Hydrophobia. The latter term is popularly applied to the human disease consequent upon the bite of a rabid dog or other animal. Rabies is an acute infectious disease of animals, dependent upon a specific virus, and communicable to man by inoculation. All animals are liable to the disease, but it occurs most frequently in the wolf, the cat, and the dog, and is chiefly propagated by the latter, which is specially susceptible. The nature of the poison is as yet unknown; it has a special affinity for the nervous system, and is found in the secretions, particularly in the saliva. The period of incubation in man varies from six weeks to three months. Three stages of the disease are recognized: a premonitory, characterized by depression and irritability, followed by a stage of great excitability, and excessive sensitiveness to afferent stimuli, giving rise to intensely painful spasms, particularly of the oral and laryngeal muscles. The fact that the attempt to

take water will induce a spasm, and makes the sufferer dread the sight of it, gives the popular name to the affection. There may be rise of temperature. In the last, or paralytic stage, the spasms are succeeded by quiet and gradual unconsciousness, ending in death. The cerebro-spinal system shows congested vessels, perivascular exudation of leukocytes, and minute hemorrhages, particularly in the oblongata (Gowers), and the larynx, trachea, and bronchi show acute hyperemia (Osler). **R., Dumb,** rabies in rodents, in which the preliminary and second periods are absent, and the paralytic stage is pronounced from the onset (Osler). **R., canina, R. felina,** rabies in or acquired from the dog or cat respectively. **R., False.** See *R., Pseudo.* **R., Paralytic:** 1. Of Gamaleia, rabies in which the third stage is the only manifestation of the infection. 2. An acute ascending spinal paralysis due to infection, probably rabietic. **R., Pseudo:** 1. A neurotic or hysteric manifestation closely simulating rabies, but of longer duration and amenable to treatment (Osler). 2. A morbid condition resembling rabies induced experimentally in animals, and occurring in dogs infested with the *Strongylus gigas.* **R., Tanacetic,** a morbid condition resembling rabies induced in rabbits by the intravenous injection of oil of tanacetum.

Rabietic (*ra-be-et'-ik*) [*rabies*, rage]. Pertaining to, affected with, or of the nature of, rabies.

Rabific (*ra-bif'-ik*) [*rabies*, rage]. Causing rabies; communicating hydrophobia.

Rabiform (*ra'-bif-orm*) [*rabies*, rage; *forma*, form]. Resembling rabies.

Rabigenic (*ra-big-en'-ik*). Same as *Rabific.*

Rabious (*ra'-be-us*) [*rabies*, rage]. Wild; raging.

Rabl's Fluid. See *Stains, Table of.*

Rabuteau's Method. A method of estimating the amount of acids in the stomach. It consists in driving off the volatile acids by heat and shaking the residue with a large excess of ether, which takes up the lactic acid. This is separated and cinchonin or quinin is added to the remainder until the reaction is neutral. The cinchonin or quinin hydrochlorid is dissolved out by shaking with chloroform, the latter is distilled off from this extract, and the chlorin estimated in the residue.

Racahout (*rah-kah-oot'*) [Fr.; Arab., *raqaut*]. A kind of starchy food prepared from the acorns of *Quercus ballota*, an oak-tree of the Mediterranean region. Most of the commercial racahout is, however, quite factitious. It is recommended as an analeptic, and as a food for invalids. Unof.

Raccoon-berry (*rak-oon-ber'-e*). Synonym of *Podophyllum peltatum.*

Race (*rās*) [Dan., *race*, a breed of horses]. In biology, a genealogic, ethnic, or tribal stock; a breed or variety of plants or animals made permanent by constant transmission of its characters through the offspring.

Race (*rās*) [*radix*, root]. A root, especially of ginger. **R.-ginger,** ginger in the race or root.

Raceme (*ra-sēm'*) [*racemus*, a cluster of grapes]. In biology, an indeterminate inflorescence having a common peduncle with one-flowered pedicels arranged along its sides. **R., Compound,** a raceme in which the pedicels branch and form secondary racemes. **R., False,** a circinate, or scorpioid, cyme.

Racemed (*ra-sēmd'*) [*racemus*, a cluster of grapes]. In biology, disposed in racemes; said of flowers or fruits.

Racemic (*ra-sē'-mik*) [*racemus*, a bunch of grapes]. Pertaining to clusters of grapes, or to racemes. **R. Acid.** See *Acid.*

Racemiferous (*ras-em-if'-er-us*) [*racemus*, a cluster of grapes; *ferre*, to bear]. Bearing racemes.

Racemiform (*ra-sē'-mif-orm*) [*racemus*, a bunch of grapes; *forma*, form]. In biology, having the form of a raceme.

Racemose (*ras'-e-mōs*) [*racemus*, a bunch of grapes]. Having a shape resembling that of a bunch of grapes; applied especially to certain glands. **R. Aneurysm,** anastomotic aneurysm. **R. Cells,** clusters of cells arranged around a central duct. **R. Varix,** anastomotic varix.

Racemule (*ras'-e-mūl*) [*racemulus*, dim. of *racemus*, a cluster]. In biology, a small raceme.

Racemulose (*ra-sem'-u-lōz*) [*racemulus*, a small raceme]. In biology, resembling a racemule, or arranged in racemules.

Rach-. See, also, *Rhach-.*

Rachiæi (*ra-ki'-e-i*) [ῥάχις, the spine]. Spinal muscles.

Rachiagra (*ra-ke-a'-grah*) [ῥάχις, spine; ἄγρα, seizure]. Gouty or rheumatic pain in the muscles of the spine.

Rachial (*ra'-ke-al*). Same as *Rachidial.*

Rachialgia (*ra-ke-al'-je-ah*) [ῥάχις, spine; ἄλγος, pain]. Vertebral disease; pain in or about the spine. Metallic colic. **R. mesenterica,** tabes mesenterica. **R. pictorum,** Rachialgia of painters. **R. pictoniensium,** metallic colic.

Rachialgic (*ra-ke-al'-jik*) [ῥάχις, spine; ἄλγος, pain]. Affected with rachialgia.

Rachialgitis (*ra-ke-al-ji'-tis*) [ῥάχις, spine; ἄλγος, pain; ιτις, inflammation]. Inflammatory rachialgia; myelitis.

Rachiasmus (*ra-ke-az'-mus*) [ῥάχις, spine]. The spasmodic action of the muscles of the back of the neck, occurring early in epilepsy.

Rachidial (*ra-kid'-e-al*) [ῥάχις, the spine]. Belonging to a rachis, or spine.

Rachidian (*ra-kid'-e-an*) [ῥάχις, spine]. Spinal; vertebral. **R. Arteries,** the spinal arteries. **R. Bulb,** the *medulla oblongata.* **R. Canal,** the vertebral canal.

Rachiglossate (*ra-kig-los'-āt*) [ῥάχις, the spine; γλῶσσα, tongue]. In biology, applied to such gasteropod molluscs as have only from one to three teeth in each transverse series on the radula or lingual ribbon.

Rachilla (*ra-kil'-ah*) [ῥάχις, the spine]. In biology, a secondary rachis; the pedicel of a spikelet in grasses.

Rachiocampsis (*ra-ke-o-kamp'-sis*) [ῥάχις, a spine; κάμψις, a curving]. Curvature of the spine.

Rachiochysis (*ra-ke-ok'-is-is*). See *Hydrorhachis.*

Rachiodont (*ra'-ke-o-dont*) [ῥάχις, spine; ὀδούς, tooth]. In biology, having tooth-like processes of the spinal column.

Rachiodynia (*ra-ke-o-din'-e-ah*) [ῥάχις, spine; ὀδυνη, pain]. Spasmodic pain in the spine.

Rachiokyphosis (*ra-ke-o-ki-fo'-sis*). See *Kyphosis.*

Rachiometer (*ra-ke-om'-et-er*). Same as *Skoliosometer.*

Rachiomyelitis (*ra-ke-o-mi-el-i'-tis*). See *Myelitis.*

Rachiomyelophthisis (*ra-ke-o-mi-el-off'-this-is*). Synonym of *Locomotor ataxia.*

Rachiomyelos (*ra-ke-o-mi'-el-os*). Synonym of *Spinal Cord.*

Rachioparalysis (*ra-ke-o-par-al'-is-is*) [ῥάχις, spine; παράλυσις, paralysis]. Spinal paralysis; paraplegia.

Rachioplegia (*ra-ke-o-ple'-je-ah*). See *Rachioparalysis.*

Rachiorrheuma (*ra-ke-or-u'-mah*) [ῥάχις, spine; ῥευμα, flux]. Rheumatism affecting the back.

Rachioscoliosis (*ra-ke-o-sko-le-o'-sis*). Synonym of *Scoliosis.*

Rachiostrophosis (*ra-ke-o-stro-fo'-sis*) [ῥάχις, spine; στρέφειν, to curve]. Curvature of the spine.

Rachiotome (*ra'-ke-o-tōm*) [ῥάχις, spine; τομή, a cutting]. An instrument for performing rachiotomy. An

instrument devised by Aral for opening the vertebral canal without injury to the cord.

Rachiotomy (*ra-ke-ot'-o-me*) [ῥάχις, spine; τέμνειν, to cut]. Incision into the vertebral column. The operation of cutting through the spine of the fetus to facilitate delivery.

Rachiophyma (*ra-ke-o-fi'-mah*) [ῥάχις, spine; φυμα, growth]. A spinal tumor.

Rachipagus (*ra-kip'-ag-us*) [ῥαχις, spine; πάγος, that which is fixed]. A double monster with the individuals joined at the spine.

Rachis (*ra'-kis*) [ῥάχις, spine: *pl.*, *Rachides*]. The vertebral column. In biology, the main petiole of a compound leaf; the axis of inflorescence; the shaft of a feather. **R. nasi**, the line extending from the root to the tip of the nose.

Rachisagra (*ra-kis-a'-grah*). See *Rachiagra.*

Rachischisis (*ra-kis'-kis-is*). See *Spina bifida.*

Rachitæ (*ra-kit'-e*) [ῥάχις, spine]. The muscles attached to the spinal column.

Rachitic (*ra-kit'-ik*) [ῥάχις, spine; ιτις, inflammation]. Affected with, relating to, or of the nature of rachitis; rickety. **R. Rosary, R. Rose-garland**, the row of nodules appearing on the ribs, at their junction with the cartilages, in rachitis. See *Beads, Rachitic.*

Rachitis (*ra-ki'-tis*) [ῥάχις, spine; ιτις, inflammation]. 1. *Rickets*, the "*English disease*," a constitutional disease of infancy, characterized by impaired nutrition and changes in the bones. Rachitis was first accurately described by Glisson, in the seventeeth century, The disease comes on insidiously at about the period of dentition, and three general symptoms are usually present—a diffuse soreness of the body, slight fever, and profuse sweating about the head and neck. Coincident with these the skeletal lesions appear, the chief of which are the bending of the ribs, the arching of the long bones, with thickening at the junction of the shaft and the epiphysis, and the development of hyperostoses on the frontal and parietal eminences, producing the *caput quadratum.* Dentition is delayed, nervous symptoms are marked, as peevishness and sleeplessness, and in some cases convulsions and laryngismus stridulus; and all the manifestations are accompanied by a state of general weakness. The cartilage between the shaft and the epiphysis of the long bones is greatly thickened, the line of ossification is irregular and more spongy and vascular than normal, and beneath the periosteum, which strips off easily, there is spongioid tissue resembling decalcified bone. Chemic analysis shows a marked diminution in the lime-salts. Kassowitz regards the hyperemia of the bone, the marrow, the cartilage, and the periosteum as the primary lesion, on which all the others depend. 2. In biology, a disease causing abortion of the fruit or seed. **R. adultorum**, osteomalacia; mollities ossium. **R. annularis**, congenital rachitis characterized by the production, after birth, of furrows of the bones and fractures (Winckler). **R. micromelica**, intrauterine rachitis, characterized by shortening of the limbs and thickening of the diaphyses (Winckler). **R. senilis.** See *R. adultorum.*

Rachitome (*ra'-kit-ōm*) [ῥάχις, spine; τέμνειν, to cut]. An instrument for opening the spinal canal. See *Rachiotome.*

Rachitomous (*ra-kit'-o-mus*) [ῥαχις, the spine; τομος, cut]. In biology, applied to the vertebræ consisting of separate pieces, or to animals possessing segmented vertebræ. Cf. *embolomerous.*

Rachitomy (*ra-kit'-o-me*) [ῥάχις, spine; πέμνειν, to cut]. 1. Section of the spine. 2. Decollation of the fetus.

Rachoma, Rachosis (*ra-ko'-mah, ra-ko'-sis*) [ῥάχις, spine]. 1. Relaxation of the integument of the scrotum. 2. The production of a ragged, irregular abrasion.

Rachylysis (*ra-kil'-is-is*) [ῥάχις, spine; λυσις, a solution]. A method of forcible correction of lateral spinal curvature; the abnormal curve is opposed by traction or pressure applied by means of apparatus.

Racial (*ra'-se-al*) [origin obscure]. Pertaining or due to one's race.

Rack (*rak*). See *Arrack.*

Raclage (*rak-lahzh'*) [Fr.]. The destruction of a soft growth by rubbing, as with a brush or harsh sponge; grattage.

Raclement. See *Raclage.*

Racleur (*rah-klūr'*). See *Curet.*

Radcliffe's Elixir. See *Tinctura aloës composita.*

Rademacher's Plaster. See *Plaster.*

Radesyge (*rad-e-si'-ge*) [Norwegian]. A disease popularly known as Scandinavian syphilis, or Norwegian leprosy, bearing more or less similarity to the yaws, and characterized by malignant ulceration and other cutaneous lesions. It occurred in the last century in an endemic form in Norway, the east Adriatic coast, Scotland, and Canada, and is regarded by some authorities as a syphilitic, and by others as a leprous disorder. **R. istrica.** See *Scherlievo.* **R. scabieuse.** See *Spedalskhed.* **R. scotica.** See *Sibbens.*

Radiad (*ra'-de-ad*) [*radius*, a spoke]. Toward the radial aspect.

Radial (*ra'-de-al*) [*radius*, a spoke]. Pertaining to the radius or bone of the forearm. In biology, diverging from a common center. Relating to the radiating processes of animals, or to the ray of an umbel, or the ligulate corolla of an outer floret of *Compositæ.* Gœbel uses it in opposition to *bifacial* or *dorsoventral.* **R. Artery.** See *Artery.* **R. Aspect**, the aspect or view from the side on which the radius is situated. **R. Bundle**, in biology, a fibro-vascular bundle in which the xylem is arranged in rays, with the phloëm in intervening rays or masses. **R. Fibers** (*of the Retina*), Müller's fibers. **R. Fossa**, a depression on the humerus for the reception of the head of the radius in flexion. **R. Glands**, lymphatic glands of the forearm following the radial vessels. **R. Nerve.** See *Nerve.* **R. Tap**, percussion of the lower end of the radius to elicit the reflex contraction of the biceps and supinator longus. **R. Veins.** See *Veins.*

Radiale (*ra-de-a'-le*) [*radius*, ray: *pl.*, *Radialia*]. In biology: (*a*) the radio-carpal or scaphoid bone of the wrist; cf. *ulnare*; (*b*) one of the cartilages at the base of the fin in certain fishes (*Elasmobranchs*); (*c*) one of the rays of a crinoid cup.

Radialis (*ra-de-a'-lis*) [L.]. Pertaining to the radius. Various muscles are so called. See *Muscles, Table of.*

Radiate (*ra'-de-āt*) [*radius*, a spoke]. Diverging from a central point; extending around the circumference in rays; furnished with ray-flowers. **R.-veined**, *palmately veined.* **R. Venation**, or **Veined**, that form of venation in which the main veins radiate from the top of the petiole.

Radiatiform (*ra-de-a'-tif-orm*) [*radiatus*, radiate; *forma*, form]. In biology, having a radiate appearance; applied to heads with the marginal disc-flowers enlarged, but not ligulate.

Radiatio (*ra-de-a'-she-o*) [L.]. See *Radiation.*

Radiation (*ra-de-a'-shun*) [*radiare*, to radiate]. Divergence from a center; having the appearance of rays. **R., Optic**, of Gratiolet, a large strand of fibers continuous with those of the corona radiata, derived mainly from the pulvinar, the external and internal geniculate bodies, and the optic tract, and radiating into the occipital lobes. **R., Thalamic**, certain tracts of fibers from the optic thalami, which radiate into the

hemispheres (Spitzka). **R.-theory of Rauber,** a theory to explain the origin of double monsters. "It is based upon the fact that in the earliest stage the embryonic trace extends from the edge of the germinal wall or ridge toward the area pellucida as a radius. When a plural formation occurs, Rauber assumes that two, or even three, of these embryonic traces appear instead of one, the development being designated as 'pluri-radial.'"

adical (*rad'-ik-al*) [*radix*, a root]. Designed to destroy disease instead of modifying it. The opposite of palliative. The opposite of conservative. In biology, belonging to the root. Radical leaves are those which, like the leaves of the dandelion, appear to spring from the root, but which in reality arise from a very short stem at or near the surface of the ground.

adicant (*rad'-ik-ant*) [*radicari*, to take root]. In biology, rooting; applied to roots proceeding from some part of the ascending axis, as for climbing, like *Rhus toxicodendron*.

adicate (*rad'-ik-āt*) [*radicari*, to take root]. In biology, rooted or adherent, as by a byssus.

adicel (*rad'-is-el*) [*radicella*, a little root]. In biology, a tiny root; the rootlet produced in germination.

adicicolous (*rad-is-ik'-o-lus*) [*radix*, root; *colere*, to inhabit]. In biology, living upon or devouring roots.

adiciflorous (*ra-dis-if-lo'-rus*) [*radix*, root; *flos*, flower]. In biology, having the appearance of flowering from the root.

adiciform (*ra-dis'-if-orm*) [*radix*, root; *forma*, form]. In biology, having the form and function of a root.

adicle (*rad'-ik-l*) [dim. of *radix*]. 1. A rootlet, the germ of a root. 2. The primary root or stem of the embryo. 3. The initial fibril of a nerve; the beginning of a vein. 4. A group of atoms having unsatisfied valency; an unsaturated molecule which goes into and out of combinations without change, and which determines the character of the compound. **R., Acid.** See *Acid*. **R., Alcohol,** a radicle which, when it substitutes half the hydrogen in one or more molecules of water, forms an alcohol. **R., Aldehyd,** a radicle which, when it replaces two atoms of hydrogen in an alcohol, forms an aldehyd. **R., Ascending,** (*of the Fornix*), the anterior crura or fibers, extending upward from the corpora albicantia. **R., Descending,** (*of the Fornix*), the posterior crura or those fibers of the fornix extending from the optic thalami to the corpora albicantia. **R., Electro-negative,** the nonmetallic constituent of a compound which, in electrolysis, is evolved at the anode. **R., Electro-positive,** that constituent of a salt which, in electrolysis, appears at the kathode, and which is either a base or a group of atoms having basic properties.

Radicose (*rad'-ik-ōz*) [*radix*, root]. In biology, having large or numerous roots.

Radicula, Radicule (*rad-ik'-u-lah, rad'-ik-ūl*) [*radicula*, little root]. Same as *Radicle*.

Radicular (*rad-ik'-u-lar*) [*radicularis, radix*, a root]. Pertaining to the roots of nerves. **R. Arteries,** arteries accompanying nerve-roots into the spinal cord. **R. Fasciculus, Internal,** of Charcot, runs a longitudinal course in the postero-external column and then enters the gray substance of the posterior cornu. **R. Fibers, External,** of Charcot, fibers of the posterior roots of spinal nerves passing through the substantia gelatinosa of Rolando to the posterior cornu.

Radicule (*rad'-ik-ūl*). See *Radicle*.

Radiculose (*rad-ik'-u-lōz*) [*radicula*, a rootlet]. In biology, having rootlets.

Radien (*ra'-de-en*) [*radius*, a spoke]. Belonging to the radius in itself.

Radiism (*ra'-de-izm*) [*radius*, a ray]. Same as *Radiation*.

Radio- (*ra'-de-o-*) [*radius*, a spoke]. A prefix denoting connection with the radius.

Radio-bicipital (*ra'-de-o-bi-sip'-it-al*) [*radius*, a spoke; *biceps*, two-headed]. Relating to the radius and the biceps.

Radio-carpal (*ra'-de-o-kar'-pal*) [*radius*, a spoke; καρπός, carpus]. Relating to the radius and the carpus. **R.-Amputation,** removal of the hand at the wrist-joint.

Radio-digital (*ra-de-o-dij'-it-al*) [*radius*, a spoke; *digitus*, a digit]. Relating to the radius and the fingers.

Radio-humeral (*ra'-de-o-hu'-mer-al*) [*radius*, a spoke; *humerus*, the humerus]. Relating to the radius and the humerus.

Radiolus (*ra-di'-o-lus*) [dim. of *radius*, a ray: *pl.*, *Radioli*]. In biology, one of the secondary rays of the main rachis of a feather. In surgery, a probe or sound.

Radio-metacarpalis (*ra'-de-o-met-ak-ar-pa'-lis*) [*radius*, spoke; *metacarpus*]. The flexor carpi radialis brevis when the insertion is at a metacarpal bone.

Radiometer (*ra-de-om'-et-er*) [*radius*, ray; μέτρον, measure]. An instrument for transforming radiant energy into mechanical work.

Radiometric (*ra-de-o-met'-rik*) [*radius*, ray; μέτρον, measure]. Pertaining to the radiometer.

Radio-muscular (*ra-de-o-mus'-ku-lar*) [*radius*, radius; *musculus*, a muscle]. Relating to the radius and its muscles. The name of branches of the radial artery distributed to the muscles of the forearm, and of filaments of the radial nerve going to the same muscles.

Radio-palmar (*ra'-de-o-pal'-mar*) [*radius*, radius; *palma*, palm]. Relating to the radius and the palm.

Radio-ulnar (*ra'-de-o-ul'-nar*) [*radius*, spoke; *ulna*, ulna]. Pertaining to the radius and the ulna.

Radius (*ra'-de-us*) [*radius*, a staff, rod, spoke of a wheel, ray: *pl.*, *Radii*]. In biology: (*a*) spokebone, the outer of the two bones of the antibrachium or anterior limb of a vertebrate; see *Muscles, Table of;* (*b*) one of the veins of an insect's wing; (*c*) a ray of the first order, of the shaft of a feather (used in the plural); (*d*) one of the radiating threads of a spider's web; (*e*) a bifurcated piece, of which there are five, in the oral skeleton of an echinoderm. 1. In geometry, the line drawn from the center of a circle to its circumference. 2. One of the cartilaginous rods supporting the fins in fishes. 3. See *Ray*. **Radii auriculares,** lines projected on the cranium at right angles to a line passing through the auricular points. **R. ciliares,** the ciliary processes. **R. fixus,** in craniometry, a line connecting the inion and the hormion. **R. frontis,** wrinkles of the forehead. **R. lentis,** lines radiating from the poles of the crystalline lens. **R. medullares,** bundles of receiving tubules of the kidney, beginning in one tubule at the apices of the papillæ, dividing dichotomously, and extending nearly to the cortical surface.

Radix (*ra'-dix*) [*gen.*, *radicis: pl.*, *radices*]. The root or lower extremity of a plant, constituting its organ of prehension, and also, to a great extent, of nutrition. Applied also to root-like organs or parts of the body. The *five greater aperient roots:* smallache, parsley, fennel, asparagus, and butchers' broom. The *five lesser aperient roots:* dandelion, caper, restharrow, madder, and eryngo. **Radices accessoriæ breves ganglii ciliaris,** nerve-branches occasionally seen uniting the ciliary ganglion with the oculomotor and other nerves. **Radices accessoriæ mediæ ganglii ciliaris,** inconstant nerve-branches which connect the ciliary

ganglion with the internal carotid plexus, or the sympathetic plexus surrounding the ophthalmic artery. **R. accessoriæ sphenopalatina ganglii ciliaris,** an accessory nerve-branch of the ciliary ganglion going to the sphenopalatine ganglion. **R. antica processus transversi vertebræ** (Sömmering). See *Parapophysis.* **R. aortæ,** bulb of the aorta. **R. brasiliensis.** See *Ipecacuanha.* **R. brevis ganglii ciliaris,** a branch of the oculomotor nerve going to the ciliary ganglion. **R. brevis ganglii submaxillaris,** branches of the lingual nerve going to the submaxillary ganglion. **R. cerebelli.** See *Restiform Body.* **R. cordis,** the base of the heart. **R. dentis,** the root of a tooth. **R. dysenterica.** See *Ipecacuanha.* **R. epiglottidis,** the constricted part of the epiglottis, by which the organ is attached to the thyroid cartilage. **R. externa nervi sapheni externi.** See *Peroneal Nerve.* **Radices fornicis,** the crura of the fornix. **R. gangliosa,** the sensory root of the fifth nerve. **R. inferior ganglii ciliaris.** See *R. brevis ganglii ciliaris.* **R. linguæ,** the root of the tongue. **Radices longæ superiores ganglii ciliaris,** inconstant branches running from the naso-ciliary nerve to the ciliary ganglion. **R. longa ganglii sphenopalatini.** See *Great Superficial Petrosal Nerve.* **R. longa inferior ganglii ciliaris,** an additional inconstant branch going from the ciliary ganglion to one of the ciliary nerves. **R. lopez,** lopez-root; a root discovered by Pigneiro at the mouth of the Zambezi, and introduced into Europe by Gaubius in 1771, where it was used in the treatment of chronic dysentery and of pulmonary tuberculosis. It is probably a derivative of *Toddalia aculeata*, which it resembles in appearance and properties. **R. media nervi olfactorii,** the median root of the olfactory nerve. **R. medullæ spinalis,** of Varolius, the medulla oblongata. **R. mesenterii,** the root of the mesentery. **R. minor trigemini,** the motor root of the fifth nerve. **R. mollis ganglii otici,** fibers connecting the otic ganglion with the sympathetic plexus upon the middle meningeal artery. **R. mollis ganglii submaxillaris,** fibers of the sympathetic plexus upon the external maxillary artery going to the submaxillary ganglion. **R. motoria ganglii ciliaris.** See *R. brevis ganglii ciliaris.* **R. motoria ganglii otici,** the fibers of the inframaxillary nerve going to the otic ganglion. **R. motoria ganglii sphenopalatini.** See *Great Superficial Petrosal Nerve.* **R. motoria ganglii submaxillaris,** the fibers of the chorda tympani going to the submaxillary ganglion. **R. nasi,** the root of the nose. **R. nervi optici,** the optic tract. **R. olfactoria grisea.** See *R. media nervi olfactoria.* **R. olfactoria superioris,** those fibers of the olfactory nerve derived from the caruncula mammillaris. **Radices penis,** the crura of the penis. **R. pili,** hair-root. **R. postica processus transversi vertebræ** (Sömmering). See *Diapophysis.* **R. prior processus transversi vertebræ.** See *Parapophysis.* **R. processus spinosa,** the anterior part of a spinous process of a vertebra. **R. pulmonis,** the root of a lung. **R. recurrens ganglii ciliaris.** See *R. longa inferior ganglii ciliaris.* **Radices sensitivæ ganglii ciliaris.** See *Radices longæ superiores ganglii ciliaris.* **Radices sensitivæ ganglii otici,** fibers of the glossopharyngeal nerve going to the otic ganglion. **Radices sensitivæ ganglii sphenopalatini,** the sphenopalatine nerves. **R. sensitivæ ganglii submaxillaris.** See *R. brevis ganglii submaxillaris.* **Radices sympathicæ ganglii otici.** See *R. mollis ganglii otici.* **R. sympathicæ ganglii ciliaris,** the fibers of the ophthalmic ganglion coming from the carotid plexus. **R. sympathica ganglii sphenopalatini.** See *Great Deep Petrosal Nerve.* **Radices sympathicæ ganglii submaxillaris.** See *R. mollis ganglii submaxillaris.* **R. unguis,** the root of a nail. **R. vestibularis,** the anterior root of the auditory nerve.

Radula (*rad′-u-lah*) [*radula*, a scraper: *pl.*, *Radulæ*]. In biology, the rasping surface of the odontophore or lingual ribbon of certain molluscs. See *Raspatory.*

Radulate (*rad′-u-lāt*) [*radula*, a scraper]. In biology, having a radula.

Raduliferous (*rad-u-lif′-er-us*) [*radula*, a scraper; *ferre*, to bear]. In biology, bearing a radula.

Raduliform (*rad′-u-lif-orm*) [*radula*, a scraper; *forma*, form]. In biology, applied to structures having a rasp-like surface.

Radzyge (*rad-zi′-ge*). See *Radesyge.*

Raffinose (*raf′-in-ōs*). See *Melitose*, under *Carbohydrates, Table of.*

Rafflesia (*raf-le′-ze-ah*) [after Sir Stamford Raffles, a British statesman]. A genus of parasitic plants, bearing large, fetid flowers. **R. arnoldi,** a styptic species found in Sumatra. **R. patma,** a Javanese species. A decoction of the styptic buds is used for metrorrhagia.

Rafle (*ra′-fl*) [Fr.]. A pustular disease of cattle.

Rag [ME., *ragge*, a rag]. A worn garment; a shred of cloth. **R.-picker's disease** (Hadernkrankheit), malignant pustule or anthrax. An infection transmitted by old rags and caused by the presence of the *Bacillus* (*Proteus*) *hominis capsulatus, q. v.*, under *Bacteria. Synonymatic Table of.* **R.-weed,** a plant of the genus *Ambrosia.* **R.-weed Fever.** See *Hay-fever* and *Rhinitis, Hyperesthetic.* **R.-wort.** See *Life-root.*

Rage (*rāj*) [ME., *rage*, rage]. 1. Violent passion or anger. 2. Any intensely painful affection. 3. [Fr.] Hydrophobia; rabies.

Ragle (*rag′-l*) [Fr.]. An hallucination due to isolation and insomnia, observed in French troops while in the desert, in which they imagined they saw prairie and water.

Railway (*rāl′-wa*) [ME., *rail*, a bar or rail; *way*]. A roadway composed of iron rails. **R. Brain,** traumatic hysteria; Erichsen's disease. A morbid condition following shock, in which the symptoms are those of neurasthenia or hysteria, or both. Erichsen ascribed the condition to inflammation of the meninges and cord, and gave it the name of *Railway Spine.* **R. Kidney,** a renal affection said to be due to the constant jar of railway journeys. **R. Spine.** See *R. Brain.*

Rain (*rān*) [ME., *rein*, rain]. The descent of water in drops through the atmosphere. **R.-bath.** See *Bath.* **R.-bow Disease, R.-bow Worm,** herpes iris. **R.-gauge,** an instrument for measuring the quantity of rain that falls in a given area in a given time.

Rainey's Corpuscles, R. Tubes. Psorosperms occurring in the muscles of the pig and other animals. See *Miescher's Tubes*, and *Sarcocystis miescheri*, under *Parasites* (*Animal*), *Table of.*

Raised (*rāzd*) [ME., *raisen*, to raise]. Elevated. **R. Base** (*for artificial teeth*), a term applied in mechanical dentistry to a metallic base, surmounted by a box or chamber soldered to it, and designed to compensate for the loss of substance which the parts have sustained. A base thus constructed is usually termed by dentists a raised plate. See *Metallic base for artificial teeth.*

Raisin (*ra′-zin*) [ME., *raisin*, raisin]. Dried grapes. See *Uvæ* and *Passæ.*

Raising (*ra′-zing*) [ME., *raisen*, to raise]. 1. See *Pigments, Colors*, and *Dyestuffs.* 2. One of the Swedish movements, either active or passive. It is used for deformities of the back, to relieve constipation, to act upon the abdomen, etc.

ak (*rak*). See *Arrak*.

ake Teeth, a term applied to teeth separated by interals, like those of a rake.

aki (*rak'-e*) [Turk., spirits]. A Turkish liqueur, in he preparation of which mastic is used.

akli pili (*rak'-le-pi'-le*). An Indian term for leposy.

le (*rahl*) [Fr., *râler*, to rattle]. The sound caused by the breaking of air through impediments or passing over obstructions in the lungs and bronchi. They vary in character according to the consistency of the surrounding lung-tissue. Sometimes a distinction is made between râles and rhonchi. The first word is applied to sounds generated by vibrations set up in fluids, the second to sounds generated in the narrowed or obstructed lumen of tubes. See *Table of Râles*.

TABLE OF RÂLES.

Variety.	When Heard.	How and Where Produced.	Size and Character.	Condition in which Heard.
phoric.	Inspiration and expiration.	By movement of air in a tense-walled cavity containing air and communicating with a bronchus.	Large, musical, and tinkling.	In tuberculous and abscess cavities.
bling, large.	Inspiration and expiration.	By passage of air through frothy mucus in the trachea and larger bronchi.	Larger than the medium bubbling; moist.	Bronchitis and pulmonary engorgement.
bling, medium.	Inspiration and expiration.	By passage of air through mucus in the larger tubes.	Larger than the small bubbling; moist.	In capillary bronchitis, especially in children.
bling, small.	Inspiration and expiration.	By passage of air through mucus in the bronchioles.	Small; moist; like the bursting of soft bubbles.	In capillary bronchitis, especially in children.
ernous.	Inspiration and expiration.	By passage of air through a small cavity with flaccid walls, which collapse with expiration.	Hollow and metallic.	In the third stage of pulmonary tuberculosis.
king.	Inspiration only.	By passage of air through softening material in smaller bronchi.	Small; sticky.	The apex in pulmonary tuberculosis.
sonating.	Inspiration and expiration.	When bronchial tubes surrounded by consolidated tissue.	Bright, clear, ringing.	Tuberculous pneumonia.
kling, dry.	In inspiration.	By the breaking down of lung-tissue.	Sharp, short, and clicking.	In the second or softening stage of pulmonary tuberculosis and in pulmonary gangrene.
kling, large.	Inspiration and expiration.	By fluid in very small cavities.	Larger than the medium crackling; dry.	In pulmonary tuberculosis and pneumonia, after formation of small cavities.
kling, medium	Chiefly in inspiration.	By fluid in the finer bronchi.	Larger than the small crackling; dry.	Softening of tuberculous deposit or pneumonic exudation.
kling, small.	Chiefly in inspiration.	By fluid in the finer bronchi.	Small; dry; like the breaking of small shells.	Softening of tuberculous deposit or pneumonic exudation.
tant.	End of inspiration.	By passage of air into vesicles collapsed, or containing fibrinous exudation. Usually at the base of the lungs.	Small; like rubbing the hair between the fingers.	Pneumonia, early stage; edema of lungs; hypostatic pneumonia; localized in pulmonary tuberculosis.
	Inspiration and expiration.	By narrowing of the bronchial tubes from thickening of the mucous lining, from spasmodic contraction of the muscular coat, viscid mucus within, or pressure from without.	Large and sonorous, or small and hissing, or whistling.	In bronchitis, asthma, and localized in beginning pulmonary tuberculosis.
-thoracic.		In the trachea or larynx.		
on.	Inspiration and expiration; most distinct at the end of inspiration.	By the rubbing together of serous surfaces, roughened by inflammation or deprived of their natural secretion.	Grazing, rubbing, grating, creaking, or crackling.	In pleurisy and pericarditis.
ing.	Inspiration and expiration.	By the passage of air through fluid in cavities, on coughing.	Larger than the large bubbling; moist; like the bursting of large bubbles.	Pulmonary tuberculosis after formation of cavities.
ral.		In the throat.		
		By the passage of air through bronchi containing fluid.		
ous (of nec).	Inspiration and expiration.	By viscid bubbles bursting in the bronchial tubes.	A modification of the sub-crepitant.	Pulmonary emphysema.

TABLE OF RÂLES.—*Continued.*

Variety.	When Heard.	How and Where Produced.	Size and Character.	Condition in which Heard.
Râle redux, râle de retour.	Inspiration and expiration.	By the passage of air through fluid in a bronchial tube.	Crackling and unequal.	In pneumonia in the stage of resolution.
Sibilant.	Inspiration and expiration.	By narrowing of the smaller bronchi from viscid mucus adhering to the walls, from thickening of the lining membrane or spasmodic contraction.	High-pitched and even hissing or piping.	In bronchitis, asthma, and localized in beginning pulmonary tuberculosis.
Sonorous.	Inspiration and expiration.	By lessened caliber of the larger bronchi, from spasm, tumefaction of mucous lining or external pressure.	Low-pitched and snoring.	Most frequent in bronchitis and spasmodic asthma but may occur in any pulmonary disease.
Sub-crepitant.	Inspiration and expiration.	By passage of air through mucus in the capillary bronchial tubes.	Small; moist.	Capillary bronchitis.

Ramal (*ra'-mal*) [*ramus*, a branch]. Pertaining to a ramus; branching; growing on a branch. **Ramalis vena**, the portal vein and its branches.

Ramastrum (*ra-mas'-trum*) [*ramus*, branch]. In biology, one of the secondary petioles of compound leaves.

Ramdohr's Suture. See *Suture.*

Ramellose (*ram'-el-ōz*) [*ramellus*, a small branch]. Bearing ramelli.

Ramellus (*ra-mel'-us*) [dim. of *ramus*, a branch: *pl.*, *Ramelli*]. In biology, a branch less than a ramulus occurring at the growing point of an algal filament.

Ramenta (*ra-men'-tah*) [L., *pl.*, *Filings*, *Scrapings*]. 1. Shreds, filings, or shavings. 2. Fine chaffy scales on the surface of plants, consisting of elongated cells. **R. intestinorum**, shreds of intestinal mucus discharged with the evacuations in severe dysentery.

Ramentaceous (*ram-en-ta'-se-us*) [*ramenta*, filings]. In biology, covered with ramenta.

Ramentum (*ra-men'-tum*) [L., *a scraping*, *a chip*, *a scale*: *pl.*, *Ramenta*]. In biology, a scale-like or hairy outgrowth of the epidermis, of a membranous texture, found on the stems and petioles of many ferns.

Ramex (*ra'-meks*) [*gen.*, *Ramicis*: *pl.*, *Ramices*]. A hernia, or hernial tumor]. **R. varicosus**, varicocele.

Ramicorn (*ra'-mik-orn*) [*ramus*, a branch; *cornu*, horn]. In biology, the horny covering or sheath of the rami of the lower mandible of a bird.

Ramie (*ram'-e*) [Malay]. See *China Grass.* **R. Fiber**, China-grass. The bast fiber from two varieties of *Boehmeria nivea*, known in India as *Rhea*, and in the Malay Archipelago as *Ramie.* The properly prepared fiber is of fine, silky luster, soft, and extraordinarily strong. It is the most perfect of all the vegetable fibers, and is composed of pure cellulose.

Ramification (*ram-if-ik-a'-shun*) [*ramus*, a branch; *facere*, to make]. The branching and division of an organ or part, as observed in the nerves and blood-vessels.

Ramiflorous (*ra-mif-lo'-rus*) [*ramus*, branch; *flos*, flower]. Flowering on the branches.

Ramiform (*ram'-if-orm*) [*ramus*, a branch; *forma*, form]. Resembling a branch in form.

Ramify (*ram'-if-i*) [*ramus*, a branch; *facere*, to make]. To form branches.

Ramiparous (*ra-mip'-ar-us*) [*ramus*, branch; *parere*, to bear]. Producing branches.

Ramolescence (*ram-o-les'-ens*) [Fr., *ramollir*, to soften]. A softening; mollification.

Ramollissement (*ra-mo-lēs'-mon(g)*) [Fr.]. A morbid softening of any tissue or part. **R. des os.** See *Osteomalacia.* **R. hémorrhagipare**, softening giving rise to hemorrhage.

Ramose (*ram'-ōz*) [*ramus*, branch]. Provided with many branches; branching.

Rampion (*ram'-pe-on*) [Sp., *rampion*, a species of lobelia]. An herbaceous plant, *Campanula rapunculus*, with an edible root, resembling a small turnip. **R., Horned**, the genus *Phyteuma.*

Ramsden's Eye-piece. An eye-piece having two plano-convex lenses, used with a micrometer.

Ramsted (*ram'-sted*). See *Antirrhinum linaria.*

Ramuliferous (*ram-u-lif'-er-us*) [*ramulus*, a little branch; *ferre*, to bear]. In biology, bearing ramuli.

Ramulose (*ram'-u-lōz*) [*ramus*, a branch]. Full of branchlets.

Ramulous (*ram'-u-lus*) [*ramulus*, a little branch]. In biology, having many small branches.

Ramulus (*ram'-u-lus*) [L.: *pl.*, *Ramuli*]. A small branch, or ramus.

Ramus (*ra'-mus*) [L.]. The branch of an organ, especially of a vein or an artery. **R. abdominalis**, the hypogastric nerve. **R. acetabuli**, a branch of the internal circumflex artery supplying the hip-joint. **R. anastomoticus**, the branch of an artery by which an anastomosis is established. **R. anterior ascendens.** **R. anterior nervi acustici.** See *Cochlear Nerve.* **R. ascendens**, the anterior branch of the fissure of Sylvius. **R. ascendens glabellaris**, the branch of the angular artery going to the inner angle of the orbit. **R. ascendens nervi vagi**, a branch of the superior laryngeal nerve going to the epiglottis. **R. ascendens** (seu **inferior**) **ossis ischii**, the ascending branch of the ischium. **R., Ascending** (*of the Ischium*), the portion between its tuberosity and the acetabulum. **R., Ascending** (*of the Pubic Bone*), the portion between its body and the acetabulum. **R. auricularis nervi vagi.** See *Nerve of Arnold.* **R. bulbo cavernosus.** See *Artery of the Bulb of the Urethra.* **R. canalis spinalis**, the branch of the intercostal artery supplying the walls of the spinal canal. **R. cardiacus nervi vagi inferior**, inferior cardiac nerve. **R. cardiacus nervi vagi superior**, superior cardiac nerve. **R. cervico-facialis** (**nervi facialis**), cervico-facial nerve. **R. cochleæ**, **R. cochlearis**, the cochlear nerve. **R. communicans anterior**, anterior communicating artery of the brain. **R. communicans medullæ spinalis**, a branch of a spinal nerve uniting it with the sympathetic. **R. communicans posterior** the posterior communicating artery of the brain. **R. cruralis**, lumbo-inguinal nerve. **R. cutaneus nervi**

radialis. See *Radial Nerve.* **R. cutaneus palmaris longus.** See *R. palmaris longus nervi mediani.* **R. descendens.** 1. The descendens noni nerve. 2. The inferior division of the inferior maxillary nerve. **R. descendens nervi hypoglossi,** the descendens noni nerve. **R. descendens** (seu **superior**) **ossis ischii,** the descending branch of the ischium. **R. descendens ossis pubis,** the descending branch of the pubic bone. **R., Descending** (*of the Ischium*), the portion between its body and tuberosity. **R., Descending** (*of the Pubic Bone*), the portion included between its body and its junction with the ischium. **R. dexter arteriæ pulmonalis,** the right pulmonary artery. **R. dorsalis nasi,** the dorsal artery of the nose. **R. dorsalis nervi radialis.** See *Radial Nerve.* **R. dorsalis nervi ulnaris.** See *Ulnar Nerve.* **R. dorsalis pollicis radialis,** that part of the radial artery which winds round the outer side of the carpus and crosses the thumb beneath the extensor tendons. **R. dorsalis pollicis ulnaris, R. duræ matris vagi,** a branch from the jugular ganglion going to the meninges. **R. externus, R. femoralis,** lumbo-inguinal nerve. **R. hepaticus dexter,** the right hepatic artery. **R. hepaticus sinister,** the left hepatic artery. **R., Horizontal** (*of the Pubic Bone*). See *R., Ascending* (*of the Pubic Bone*). **R. horizontalis fissuræ sylvii,** the posterior limb of the fissure of Sylvius. **R. horizontalis mandibulæ,** the body of the inferior maxilla. **R. horizontalis** (seu **superior**) **ossis pubis** (seu **pectinis**), the horizontal ramus of the pubic bone. **R. hyoideus.** See *Hyoid Artery.* **R. of the Inferior Maxilla,** the portion ascending from the angle, and terminating in the condyle and coronoid process. **R. intermedius.** See *R. anastomoticus.* **R. lingualis recurrens.** See *R. ascendens nervi vagi.* **R. magnus nervi mediani,** the musculo-cutaneous nerve. **R. major nervi maxillaris inferioris,** the greater of the two primary branches of the inferior maxillary nerve. **R. malaris,** the inferior branch of the orbital nerve. **R. marginalis,** the dorsal branch of the radial nerve supplying the thumb. **R. mastoideus.** 1. The small occipital nerve. 2. The occipital branch of the posterior auricular artery. 3. The posterior division of the great auricular nerve. **R. maxillaris inferior nervi trigemini.** See *Inferior Maxillary Nerve.* **R. maxillaris superior** (seu **medius**) **nervi trigemini.** See *Superior Maxillary Nerve.* **R. medullæ spinalis,** the spinal branch of the intercostal artery supplying the spinal cord. **R. meningeus posterior.** See *R. duræ matris vagi.* **R. minor nervi vidiani,** the great superficial petrosal nerve. **R. muscularis nervi radialis,** the radial nerve. **R. nasalis nervi ophthalmici.** See *Naso-ciliary Nerve.* **R. nutriens,** the nutrient artery of a bone. **R. ophthalmicus** (quinti), the ophthalmic nerve. **R. ossis maxillæ inferioris.** See *R. of the Inferior Maxilla.* **R. ovarii.** See *Ovarian Artery.* **R. palmaris longus nervi mediani,** a branch of the median nerve distributed to the integument of palm of the hand. **R. perpendiculares** (**mandibulæ**). See *R. of Inferior Maxilla.* **R. posterior.** 1. The ilio-lumbar artery. 2. The posterior limb of the fissure of Sylvius. **R. primus nervi trigemini** (seu **primus quinti**). See *Ophthalmic Nerve.* **R. profundus nervi radialis.** See *Radial Nerve.* **R. recurrens vagi,** a branch of the jugular ganglion which goes to the transverse sinus through the jugular foramen. **R. secundus** (**ganglii gasserii**), **R. secundus nervi trigemini** (seu **quinti paris**), the superior maxillary nerve. **R. sinister arteriæ pulmonalis,** the left pulmonary artery. **R. sinualis,** the recurrent branch of the ophthalmic nerve going to the tentorium. **R. sublimis** (seu **volaris superficialis**) **arteriæ radialis,** the superficial volar artery. **R. superficialis nervi radialis,** the radial nerve. **R. superior ossis ischii,** the descending ramus of the ischium. **R. superioris nervi trigemini, R. superioris quinti,** the ophthalmic nerve. **R. supraspinatus,** the suprapinous artery. **R. tertius nervi trigemini,** the inferior maxillary nerve. **R. vestibularis,** the vestibular nerve. **R. volaris nervi ulnaris,** the volar distribution of the ulnar nerve. **Rami accelerantes,** accelerator nerves. **R. alares,** branches of the lateral nasal artery supplying the nasal pinnæ. **R. anteriores nervorum spinalium,** the anterior divisions of the spinal nerves. **R. cardiaci** (**nervi vagi**), the cardiac branches of the pneumogastric nerve. **R. communicantes noni,** the branch of the descendens noni which joins the communicating branches of the second and third cervical nerves. **R. emissaria,** branches of the anterior spinal plexuses which emerge through the intervertebral and anterior sacral foramina. **R. intestinales,** branches of the cerebro-spinal nerves supplying the abdominal viscera. **R., Ischio-pubic,** the descending rami of the ischium and the pubes taken as one. **R. linguales** (**nervi glossopharyngei**), the terminal branches of the ninth nerve. **R. marginales,** the branches of the palpebral arteries which aid in forming the arcus arteriosus palpebræ. **R. molles** (**nervi vagi**). See *Auditory Nerve.* **R. musculares,** unnamed branches of nerves or blood-vessels distributed to the muscles. **R. olfactorii,** the olfactory nerve. **R. pectorales laterales** (seu **perforantes laterales,** seu **posteriores,** seu **superficiales**). See *Lateral Thoracic Cutaneous Nerves.* **R. pharyngei** (**nervi vagi**), the branches of the vagus going to the pharynx. **Rami ventrales,** the branches of the intercostal arteries distributed to the intercostal muscles and to the ribs.

Ramuscule (*ra-mus'-kūl*) [*ramusculus*]. A little branch, especially of the pial arteries.

Rancid (*ran'-sid*) [*rancidus, rancere,* to become sour]. The condition, marked by a sharp taste and disagreeable odor, that fats and oils acquire by oxidation in the presence of light and fermentation of certain of their principles.

Rancidification (*ran-sid-if-ik-a'-shun*) [*rancidus,* rancid; *facere,* to make]. The act of making or the process of becoming rancid.

Rancidity (*ran-sid'-it-e*) [*rancidus,* rancid]. The state of being rancid.

Randia (*ran'-de-ah*) [after Isaac *Rand,* a London botanist of the eighteenth century]. A genus of cinchonaceous shrubs. **R. aculeata,** of West India; ink-berry, indigo plant. The juice of the fruit is astringent. **R. dumetorum,** of India; has a poisonous and strongly emetic fruit. Unof. **R. longiflora,** of Bengal; the cortex is used in intermittent fever.

Range (*rānj*) [Fr., *ranger,* to dispose]. Scope, extent or compass. **R. of Accommodation.** See *Accommodation.* **R. of Sensibility.** See *Law, Fechner's.*

Rangoon Tar. A variety of petroleum obtained in India.

Ranine (*ra'-nēn*) [*rana,* a frog]. 1. The designation of a branch of the sublingual artery; also of its accompanying vein. See *Artery.* 2. Relating to that part of the tongue subject to ranula.

Ranke, Angle of. See *Angle.*

Ranson's Apparatus. See *Disinfection.*

Ranstead (*ran'-sted*). See *Antirrhinum linaria.*

Ranula (*ran'-u-lah*) [*rana,* frog]. A cystic tumor beneath the tongue, connected with the duct of the sublingual salivary gland. **R. lapidea,** salivary calculi. **R. pancreatica,** a dilated saccular condition of the larger pancreatic ducts due to calculous obstruction.

R., Suprahyoid, a cystic tumor situated above the hyoid bone.

Ranunculaceous (*ra-nung-ku-la'-se-us*) [*ranunculus*, a medicinal plant]. Noting, or relating to plants of the order *Ranunculaceæ*.

Ranunculus (*ra-nung'-ku-lus*) [L.]. A genus of acrid herbs of many species, growing in many temperate and cold regions, *e.g.*, buttercups, or crowfoot. Many of the species are acrid poisons, and have been used (especially *R. acris*, *bulbosus*, *flammula*, and *sceleratus*) as counter-irritants and vesicants. Unof. **R. aconitifolius,** a native of Europe. The root, juice, and green leaves are used. **R. acris,** blister-plant; very irritant, causing erythema æstivum. **R. alpestris,** white crowfoot of the Alps. The chamois-hunters chew the leaves, which are said to prevent giddiness and fatigue. **R. aquatilis,** water anemone, floating white crowfoot; a species of Europe and North America. It is said to be poisonous when fresh, but otherwise wholesome and nutritive. **R. asiaticus,** turkey crowfoot; the common garden species. **R. bulbosus,** crow-flower; buttercup; a European and North American species; very acrid. It was once official as *radix ranunculi bulbosi*, and is still used by the homeopathists. **R. creticus,** a species known to the ancients, and used by them for the cure of warts, chilblains, scabies, and ulcers, also for toothache. **R. ficaria,** the lesser celandine, an edible species found in Europe; the leaves are eaten as salad, the root prepared as a vegetable. **R. glacialis,** a species found in the Alps. The root possesses sudorific properties, and is used in rheumatism and bronchial affections. **R. lingua, R. longifolius,** spearwort; great crowfoot; found in Europe, Asia, and North America. The root and herb were formerly official. **R. muricatus,** a European species, possessing stimulant and vesicant properties, and used for skin-diseases. **R. paludensis, R. palustris,** old pharmaceutic names for *R. sceleratus*. **R. repens,** creeping crowfoot; buttercup; occurring in Europe, Asia, and North America. The herbs and flowers were formerly official. **R. sceleratus,** water celery; a very acrid species found in Europe, Asia, and North Ameria, and formerly used as a vesicant. It contains a resin and a volatile oil which yields anemonin and anemonic acid.

Ranvier's Constrictions. See *R.'s Nodes*. **R.'s Crosses,** brownish-black cruciform figures which appear at each node of Ranvier in preparations of nerve-tissue stained with silver nitrate. The silver diffuses into the nerve-fiber only at the nodes, stains the cement-substance joining one internode with another, thus forming the transverse bar of the cross, and as it diffuses along the axis-cylinder stains the cement-substance on the latter for a short distance, and so makes the vertical bar. **R.'s Lemon-juice Method,** a method of tracing nerve-fibers. Small pieces of tissue, ¼ inch square, are soaked in lemon-juice 5 or 10 minutes, washed quickly in distilled water, and placed in 1 per cent. solution of gold chlorid for from 10 minutes to 1 hour, according to the density of the tissue. Wash in water, place in 50 c.c. water containing two drops of acetic acid, and expose to the light; or, if it is not desired to keep the superficial epithelium, after treating with lemon-juice and gold the tissue is placed for 24 hours in formic acid (sp. gr. 1.2) diluted with three times its volume of water, and kept in the dark (after Squire). **R.'s Nodes.** See *Node*. **R.'s Picrocarmin.** See *Stains, Table of*. **R.'s Tactile Discs,** nerve-endings consisting of small, cup-shaped bodies, the concave side of which is always directed toward the free surface of the epidermis. They are those tactile corpuscles of Merkel, also of Grandy, which terminate, not in the cells, but in the intercellular substances.

Rape (*rāp*) [*rapere*, to seize]. Forcible sexual intercourse with a woman. According to the laws of some States, the intercourse with a young girl is also considered as rape when not effected through force, but by reason of her ignorance. **R.-oil.** See *Colza-oil*. **R.-plant.** See *Brassica*.

Raphania (*ra-fa'-ne-ah*) [*raphanus*, a radish]. A nervous affection attended with spasmodic disorder of the joints and the limbs. It has been attributed to a poisonous principle in the seeds of the wild radish, which are likely, at certain times, to become mixed with grain. The affection is allied to ergotism and pellagra. See *Ergotism*. **R. maisitica,** pellagra; so named because it was supposed to be caused by the use of maize as food.

Raphe (*raf'-a*) [*ῥάφη*, suture]. 1. Any line, suture, ridge, or crease having the appearance of a seam. It is applied especially to the median line of the body. 2. A ridge or cord; the continuation of the seed-stalk, extending from the hilum to the chalaza along the side of an anatropous or an amphitropous ovule or seed. **R., Exterior,** the stria longitudinalis medialis. **R. inferior corporis callosi,** the raphe on the inferior surface of the corpus callosum. **R. palati duri.** Same as *R. palatine*. **R., Palatine,** the narrow ridge of mucosa in the mesial line of the palate. **R. of the Penis,** a continuation of the raphe of the scrotum upon the penis. **R., Perineal,** the ridge of skin in the middle line of the perineum. **R. of the Pharynx,** a fibrous band in the median line of the posterior wall of the pharynx. **R. post-oblongata,** the posterior median fissure of the medulla oblongata. **R. of the Scrotum,** a median ridge dividing the scrotum into two lateral halves; it is continuous, posteriorly, with the raphe of the perineum, anteriorly with the raphe of the penis. The septum of the medulla oblongata, of Stilling. **R. superior corporis callosi,** the longitudinal raphe in the middle of the superior surface of the corpus callosum. **R. of the Tongue,** a median furrow on the dorsal surface of the tongue corresponding to the fibrous septum which divides it into symmetric halves.

Raphis (*ra'-fis*) [*ῥαφις*, a needle: *pl.*, *Raphides*]. In biology, one of the needle-shaped crystals found in bundles in the cells of many plants. See also *Rhaphis*.

Raptus (*rap'-tus*) [*rapere*, to seize]. Any sudden attack or seizure; rape. **R. hæmorrhagicus,** a sudden hemorrhage. **R. maniacus,** transient frenzy. **R. melancholicus,** sudden and vehement melancholy. **R. nervorum,** cramp or spasm.

Rarefaction (*rar-e-fak'-shun*) [*rarus*, rare; *facere*, to make]. The decreasing of the density or tension of a gaseous substance, especially the air; attenuation; dilution. **R. of Bony Tissue,** the attenuation of bony tissue as a result of ostitis or senile atrophy. See *Osteoporosis*. **R., Pulmonary.** See *Emphysema*.

Raritas (*rar'-it-as*) [L.]. Rarity. **R. dentium,** fewness of teeth; less than the usual number of teeth, with or without interspaces between them.

Rarity of the Atmosphere. See *Atmospheric*.

Rasceta (*ra-se'-tah*) [L.]. The transverse lines or creases of the skin on the inner side of the wrist.

Rash [OF., *rasche*, a rash]. Any exanthematous eruption of the skin. **R., Canker.** Same as *Scarlatina*. **R., Caterpillar,** a localized eruption attributed to the irritant action of the hairs of certain caterpillars. **R., Doctors',** a transitory rash sometimes seen in nervous persons undergoing medical ex-

amination. **R., Drug,** a rash due to the toxic action of arsenic, potassium iodid or bromid, quinin or other drug. **R., Medicinal.** See *R., Drug.* **R., Millet-seed.** See *Miliaria.* **R., Mulberry,** an eruption resembling the exanthem of measles, sometimes occurring in the course of typhus (Jenner). **R., Nettle.** See *Urticaria.* **R., Rose.** See *Roseola.* **R., Scarlet.** See *Scarlet Fever.* **R., Tooth,** any rash attributed to dentition. Strophulus. **R., Typhoid.** See *Typhoid Fever.* **R., Wildfire,** any transitory erythematous rash.

Rasorian (*ra-zo'-re-an*) [after *Rasori*]. Following the teachings of Rasori; contrastimulant. **R. Method,** in phlebotomy, repeated bleeding.

Rasorianism, Rasorism (*ra-zo'-re-an-izm, ra-zo'-rizm*) [after *Rasori*]. The doctrine of Rasori; contrastimulism.

Raspail's Eau Sedatif. See *Ammonium* and *Camphor.*

Raspatory (*ras'-pat-o-re*) [*raspatorium; radere,* to scrape]. In surgery, a rasp or file for trimming the rough surfaces of bones or for removing the periosteum.

Raspberry (*ras'-ber-e*). See *Rubus idæus.*

Rasura (*ra-zu'-rah*) [L.]. 1. The process of rasping, shaving, or scraping. 2. That which is scraped or shaved off.

Rat [ME., *ratte,* rat]. A rodent of the family *Muridæ.* **R.-tail Sutures,** fibers from the rat's tail, used instead of silk or gut, for surgical sutures. **R.-tooth Forceps.** See *Forceps.*

Ratafia (*rat-a-fe'-ah*) [Malay, *arag,* arrack; *tafia,* a spirit distilled from molasses]. A name for various *liqueurs,* or aromatized and sweetened cordials.

Ratanhia (*rat-an'-e-ah*) [Peruv., *ratana*]. See *Krameria.* **R., Decoctum (radicis),** a decoction made by boiling one part of ratanhia with 40 parts of water, and filtering when cold. **R., Extractum, Alcoholicum,** an extract prepared from an infusion of ratanhia in 22 per cent. alcohol, which is driven off by distillation, and the residue evaporated. **R., Extractum, Americanum (seu falsum).** See *American Kino.* **R., Extractum, Æquosum (seu depuratum).** See *Extractum krameriæ.* **R., Extractum, Fluidum.** See *Extractum krameriæ fluidum.* **R., Extractum, Venale.** See *Extractum krameriæ.* **R., Infusum.** See *Infusum krameriæ.* **R., Poudre de.** Dried ratanhia, powdered and sifted. **R., Red,** a red pigment, $C_{26}H_{22}O_{11}$, obtained from the bark of ratanhia. **R.-tannic Acid,** a tannic acid occurring in the roots of several kinds of krameria. **R., Suppositoriæ,** suppositories consisting of one grain of ratanhia and three of oil of theobroma (Fr. Cod.). **R., Syrupus, cum extracto, R., Syrupus.** See *Syrupus krameriæ.* **R., Tinctura.** See *Tinctura krameriæ.*

Ratanhin (*rat'-an-in*) [Peruv., *ratana*], $C_{10}H_{13}NO_3$. Methylated tyrosin.

Ratany (*rat'-an-e*). See *Ratanhia.*

Rathke, Glands of. See *Gland.* **R., Investing Mass of,** the membranous capsule covering the end of the chorda dorsalis in the developing embryo and forming the rudiment of the base of the skull. It molds itself on the cerebral vesicles, so as to constitute the membrane in which the vault of the skull is developed. The membranous capsule at the base of the skull presents two thickenings, the *lateral trabeculæ of Rathke,* directed forward and enclosing the pituitary opening. **R., Lateral Trabeculæ of.** See *R., Investing Mass of.* **R., Pouch of.** See *Pouch.*

Rathke's Organ, an extremely muscular division of the gut in certain crustaceans (parasitic, or female, *Isopoda*) which carries on energetic rhythmic contractions. It is the third division; following the *cephalogaster* and *typhlosolis.*

Ratio (*ra'-she-o*) [L.]. 1. The mind or reasoning faculties. 2. In chemistry and pharmacy, the proportion of ingredients or of atomic composition. **R. medendi,** the theory or scheme of a course of medical treatment. **R., Ocular Micrometer,** the number obtained by finding the number of divisions on the ocular micrometer required to include the image of an entire millimeter of the stage micrometer.

Ration (*ra'-shun*) [*ratio,* proportion]. The daily allowance of food of a soldier or a sailor.

Rational (*ra'-shon-al*) [*ratio,* reason]. Relating to reason; reasonable. In therapeutics, opposed to empiric. **R. Formula,** in chemistry, a structural formula. See *Formula.*

Ratsbane (*rats-bān'*) [ME., *rātte,* rat; *bane*]. A popular name for rat-poisons containing arsenic; arsenious acid. See *Rough on Rats.* **R., Yellow,** orpiment.

Rattle (*rat'-l*) [ME., *ratelen,* rattle]. See *Râle.* **R., Death-,** a gurgling sound observed in dying persons, due to accumulation of mucus in the trachea obstructing the passage of air. **R.-herb,** the *Actæa spicata.* **R.-weed,** the *Actæa racemosa.*

Ratula (*rat'-u-lah*). See *Raspatory.*

Rau, Process of. The longer process at the junction of the handle with the neck of the malleus. It is also called the *Process of Folius.*

Rauber's Convolution. See *Convolutions, Table of.* **R.'s Layer,** a superficial stratum of flat cells occurring in the center of the embryonal spot at an early stage in the development of the blastodermic membranes.

Raucedo (*raw-se'-do*) [*raucus,* hoarse]. Hoarseness arising from inflammation of the mucosa of the larynx and throat. **R. catarrhalis,** hoarseness resulting from laryngitis. **R. potatorum,** hoarseness caused by drinking whiskey or other distilled liquors. **R. syphilitica,** chronic hoarseness due to secondary syphilitic affections of the larynx.

Raucitas (*raw'-sit-as*). See *Raucedo.*

Raucous (*raw'-kus*) [*raucus,* hoarse]. Husky; hoarse.

Raulin's Liquid. A nutritive liquid composed entirely of mineral constituents, upon which the common mold, *Aspergillus niger,* grows more perfectly and to a greater size than upon any of the natural (organic) substances upon which the parasite habitually develops. It is composed, in grams, of the following: water, 1500; crystallized sugar, 70; tartaric acid, 4; ammonium nitrate, 4; ammonium phosphate, 0.6; potassium carbonate, 0.6; magnesium carbonate, 0.4; ammonium sulphate, 0.25; zinc sulphate, 0.07; iron sulphate, 0.07; potassium silicate, 0.07. The suppression or diminution of the quantity of a single one of these salts diminishes the harvest, often far more than the proportion of the weight of the changed salt.

Rauracienne (*ro-ras-e-en'*). Same as *Orseillin* and *Fast Red.* See *Pigments, Conspectus of.*

Rauschbrand (*rowsh'-brant*) [Ger.]. The German name for black-leg, *q. v.*

Ravaton's Amputation. An amputation performed by making a circular incision through all the structures down to the bone and a lateral lengthwise incision, to secure flaps. See *Operations, Table of.*

Ray (*ra*) [ME., *raye,* a ray]. 1. A beam, pencil, or cone of light; a line of light or heat proceeding from a luminous point. One of the component elements of light or of the spectrum. 2. One of a number of lines diverging from a common center. In biology, the branch of an umbel; the marginal flowers of an inflorescence when their structure varies from those of the disc, *e. g.,* ligulate flowers, or circle of enlarged tubular flowers in heads of *Compositæ,* outer flowers

in cyme of wild hydrangea. **Rs., Actinic,** solar rays that produce chemic change. **Rs., Bipolar,** rays leading from one point of divergence to another, as in the diaster of a cell undergoing indirect division. **Rs., Chemic.** See *Rs., Actinic.* **R., Extraordinary,** the polarized ray that departs farthest from the ordinary law of refraction. Its vibrations are parallel to the vertical axis. **R., Fin-,** one of the radiating, bony spines forming the framework of the fins in fishes. **R.-floret.** Same as *R.-flower.* **R.-flower,** one of the marginal flowers of an inflorescence when distinct from those of the disc. **R.-fungus.** See *Actinomyces.* **R., Medullary,** one of the vertical partitions of parenchyma radiating from the pith to the bark in woody plants, and separating the bundles of fibro-vascular tissue. **R.-oil,** the oil of the liver of the fish called ray or skate, *Raja batis,* said to be an effective substitute for cod-liver oil. **R., Ordinary,** the polarized ray which follows most nearly the ordinary law of refraction. Its vibrations are perpendicular to the vertical axis.

Ray's Mania. A form of general moral insanity. See *Diseases, Table of.*

Raygat's Test. See *Birth.*

Raymond's Blue. Same as *Napoleon Blue.*

Raynaud's Disease. A vascular disorder characterized by three grades of intensity: (*a*) *Local syncope,* observed most frequently in the extremities, and producing the condition known as dead fingers or dead toes; it is analogous to that induced by intense cold. (*b*) *Local asphyxia,* which usually follows local syncope, but may develop independently. Chilblains are the mildest manifestation of this condition. The fingers and toes and the ears are the parts usually affected. In the most extreme degree the parts are swollen, stiff, and livid, and the capillary circulation is almost stagnant. (*c*) *Local or symmetric gangrene,* the mildest form of which follows local asphyxia. Small areas of necrosis appear on the pads of the fingers and of the toes, also at the edges of the ears and tip of the nose. Occasionally symmetric patches appear on the limbs or trunk, and in severe cases terminate in extensive gangrene. Raynaud suggested that the local syncope was produced by contraction of the vessels; the asphyxia is probably caused by dilatation of the capillaries and venules with persistence of the spasm of the arterioles. Two forms of congestion occur, which may be seen in adjacent fingers, one of which may be swollen, intensely red, and extremely hot; the other swollen, cyanotic, and icy cold (Osler). See *Sphaceloderma.* **R.'s Gangrene.** Same as *R.'s Disease.* **R.'s Phenomenon.** See *Acroasphyxia* and *Diseases, Eponymic, Table of.*

Re-. A Latin prefix signifying *back* or *again.*

Reabsorption (*re-ab-sorp'-shun*). See *Resorption.*

Reaching (*rēch'-ing*) [ME., *rechen,* to reach]. To attempt to vomit; to retch.

Reacquired (*re-ak-wird'*) [*re,* again; *acquirere,* to acquire]. Acquired a second time. **R. Movements.** See *Acquired Movements.*

Reaction (*re-ak'-shun*) [*re,* again; *agere,* to act]. 1. Mutual action; interaction. The response of an organ, tissue, or the system, to a stimulus, agent, or influence. Recuperation or return of power after depression or "shock." The supervention of fever after a surgical operation, or trauma. 2. In chemistry, the result of introducing a reagent or test. See *Tests, Table of.* 3. In electro-therapeutics, the muscular contraction following the making or breaking of the current. **R., Acid,** the reddening of blue litmus paper by the action of an acid; a test for the presence of acids. **R., Adamkiewicz's,** a reaction employed as a test for albuminoids. See *Tests, Table of.* **R., Alkaline,** a reaction indicative of alkaline properties, and in which red litmus paper is changed to blue. **R., Amphicroitic, R., Amphigenous, R., Amphoteric,** a double reaction occurring occasionally in urine, owing to the presence of substances by which the liquid responds to both the acid and alkaline tests. **R., Biuret.** See *Tests, Table of.* **R. of Degeneration** ("*De. R.*"), diminution and loss of faradic excitability in both nerves and muscles, the galvanic excitability of the muscles remaining unimpaired, sometimes notably increased, and always undergoing definite qualitative modifications. It is due to a degenerative atrophy in the nerves and muscles, eventually in the muscles only, whose origin is always nervous, paralytic, or atrophic, and whose seat is in the peripheral nerves, motor roots, or central gray substance. Strict cerebral disease is excluded. The lesion is either in the peripheral nerves or spinal cord. De. R. is of special value in prognosis. When there is only **Partial De. R.** (*i. e.,* slight diminution of both galvanic and faradic excitability, "a less maximum contraction rather than a later minimum"), the disease will probably last one or two months; if complete, it will last much longer. The De. R. embraces the following *modifications of irritability:* 1. Disappearance or diminution of nervous irritability to both galvanic and faradic currents. 2. Disappearance of faradic and increase of galvanic irritability of muscles, generally associated with an increase of mechanical irritability. 3. Disappearance of faradic and increase of galvanic muscular irritability, associated generally with increased mechanical irritability. 4. Tardy, delayed contraction of muscles, instead of the quick reaction of normal muscles. 5. Marked modification of normal sequence of contraction. A special variety of the De. R. is the so-called **Reaction of Exhaustion,** which is a condition of nervous and muscular irritability to electric excitation in which a certain reaction produced by a given current-strength cannot be reproduced without an increase of current-strength. **R., Galvano-trophic,** of L. Herrmann, a phenomenon observed in small aquatic animals subjected to the influence of a galvanic current. After a few spasmodic movements, they place themselves in the direction of the current, with the head toward the positive pole. **R., Gmelin's.** See *Tests, Table of.* **R., Hemiopic Pupillary,** of Wernicke, a reaction in which a pencil of light thrown on the blind side of the retina gives rise to no movement in the iris, but thrown upon the normal side produces contraction of both irides. **R.-impulse,** the supposed recoil of the cardiac ventricles after the discharge of the blood into the aorta and pulmonary artery. **R., Isofaradic,** of Adamkiewicz, a condition of muscle in which it responds only to the faradic current. **R., Myotonic,** of Erb, a reaction seen in Thomsen's disease, in which there is quantitative and qualitative increase in the faradic excitability. **R., Neutral,** a reaction indicating the absence of both acid and alkaline properties; also, of positive opposite qualities. **R.-period,** the period following a trauma or operation in which there is recovery from the incident shock. **R.-time,** in physiology and psycho-physics, the interval between the application of a stimulus and the beginning of the corresponding muscular contraction. **R., Xanthoproteic.** See *Tests, Table of.*

Readjustment (*re-ad-just'-ment*). See *Adjustment.*

Reagent (*re-a'-jent*) [*re,* again; *agere,* to act]. In chemistry, anything used to produce a reaction, or to test for the presence of an element. A test. See *Tests, Table of.* **R., General,** a reagent that indicates the group of substances to which a body belongs, with-

out determining which one of the group it is. **R., Special,** a reagent which indicates the presence of an individual substance, and not only the group of which it is a member.

Real (*re'-al*) [ME., *real*, real]. Actual; true; genuine. **R. Image.** See *Image.*

Realgar (*re-al'-gahr*) [Arab., *rahj alghar*, realgar]. An old name for arsenous disulphid, As_2S_2. See *Pigments, Conspectus of.*

Reamer (*re'-mer*) [ME., *remen*, to widen]. An instrument for gouging out holes. **R., Dentists'.** See *Nerve-canal Reamer.*

Reanimate (*re-an'-im-āt*) [*re*, again; *animare*, to animate]. To revive; to resuscitate; to restore to life, as a person apparently dead.

Reanimation (*re-an-im-a'-shun*) [*reanimare*, to reanimate]. The act of restoring to life; reviving.

Reason (*re'-zn*) [ME., *reson*, reason]. The intellectual faculty.

Réaumur's Thermometer. See *Thermometer.*

Reboulleau's Blue. Same as *Schweinfurth Blue.*

Recaulescence (*re-kaw-les'-ens*) [*re*, again; *caulis*, a stem]. In biology, Schimper's term to indicate the union of a petiole to a peduncle or branch.

Receiver (*re-se'-ver*) [*recipio*, to receive]. 1. In chemistry and pharmacy, the vessel receiving the products of distillation. 2. A popular term for the blanket in which an infant is placed after division of the umbilical cord.

Receptacle (*re-sep'-ta-kl*) [*receptaculum*, a receptacle]. 1. A vessel or place in which something is contained; a receiver or container. 2. In biology, (*a*) the more or less expanded part of an axis upon which the floral organs are inserted (torus), or the collected flowers of the head, as the disc-like apex of the peduncle in *Compositæ*. In cryptogams a structure of similar nature. An organ or part or intercellular space formed for the storing of secretions; (*b*) a receptaculum. **R., Common,** the short rachis bearing a flower-head. **R. of the Flower,** the axile part of a single flower. **R. of Fungi,** a receptacle of cellular tissue, developed from the mycelium, for the reception of the reproductive organs. **R. of Inflorescence.** See *R., Common.* **R. of the Ovules.** See *Placenta.* **R., Pollinifer-ous,** of R. Brown, a cellular plate in an anther-cell, dividing it into two compartments. **R., Seminal.** See *Receptaculum seminis.*

Receptacular (*re-sep-tak'-u-lar*) [*receptaculum*, a receptacle]. Pertaining to a receptaculum.

Receptaculum (*re-sep-tak'-u-lum*) [*recipere*, p.p. *receptus*, receive, hold, contain]. In biology, any part or organ for the reception of a secretion. See *Receptacle.* **R. chyli,** an expansion of the thoracic duct opposite the last dorsal vertebra. See *Pecquet's Reservoir.* **R. cotunni,** a triangular space near the middle of the posterior surface of the petrous portion of the temporal bone, at the termination of the aquæductus vestibuli. It is formed by the separation of the laminæ of the dura mater.

Receptive (*re-sep'-tiv*) [*recipere*, to receive]. Having the quality of or capacity for receiving. **R. Centers,** In physiology and psycho-physics, nerve-centers to which influences arrive that may excite sensations or some kind of activity not associated with consciousness.

Receptum (*re-sep'-tum*). See *Prescription.*

Recess (*re-ses'*) [*recessus*, a recess]. A fossa, ventricle, or ampulla; an anatomic depression. **R., Chiasmal,** a pit in front of the infundibulum bounded by the optic chiasm and the cinereous lamina. **R., Cochlear,** an elliptic pit below the oval window of the vestibule, forming part of the cochlea. **R., Intercrural.** See *Interpeduncular Space.* **R., Interscapular,** the depression between the scapulæ. **R., Lateral,** the lateral extension of the fourth ventricle in the angle between the cerebellum and the oblongata. **R., Postpontile,** the foramen cæcum of the brain.

Recessus (*re-ses'-us*) [L.]. 1. See *Recess.* 2. Abscess. 3. A cornu of a lateral ventricle. **R. acetabuli,** the cotyloid cavity. **R. chiasmatica.** See *Lamina cinerea.* **R. cochlearis,** a shallow depression between the diverging portions of the crista vestibuli. **R. conarii,** the cavity at the base of the pineal body, situated between the supracommissure and postcommissure. **R. ellipticus.** See *Fovea hemielliptica.* **R. hemiellipticus.** See *Fovea hemielliptica.* **R. hemisphæricus,** a tiny perforated cavity in the inner wall of the vestibule, anterior to the crista vestibuli; it transmits the branches of the auditory nerve. **R. infundibuli,** the cavity of the infundibulum in the floor of the third ventricle. **R. intercruralis,** the interpeduncular space. **R. labyrinthi,** a cavity formed in the base of the fetal skull, developing into the primitive auditory vesicle, and finally into the internal ear. **R. naso-palatinus,** the nasal orifice of the naso-palatine canal. **R. occipitalis,** the posterior horn of the lateral ventricle. **R. opticus.** See *Lamina cinerea.* **R. peritonæi,** the pocket-like processes formed by the peritoneum. **R. pharyngeus,** a pouch-like process of the mucosa of the pharynx situated below the opening of the Eustachian tube. **R. sphæricus.** See *Fovea hemisphærica.* **R., spheno-ethmoidalis,** a small depression or groove between the sphenoid bone and the superior turbinated bones. **R. superior sacci omenti,** the cavity of the lesser omentum.

Recidivation (*re-sid-iv-a'-shun*) [*recidivus*, a falling back]. The relapsing of a disease. In criminology, a relapsing into crime.

Recidive (*re-sid'-īv'*). See *Relapse* and *Recurrence.*

Recidivist (*re-sid'-iv-ist*) [*recidivus*, falling back]. 1. A patient who returns to a hospital for treatment, especially an insane person who so returns. 2. In criminology, a confirmed or relapsed criminal; (*a*) one who for the most part has no mental or bodily signs of degeneration, caused by bad bringing up, society, poverty, sexual disorders, and who makes crime a trade or a vengeance; (*b*) one with inborn criminal inclinations and a positive tendency to insanity or epilepsy; and (*c*) one whose antecedents and environment lead him to crime by blunting his sense of honor and morality. The latter classes are inclined to coarseness, boldness, resistance, and wilful spoiling of their clothes; but are not legally regarded as insane.

Recidivity (*re-sid-iv'-it-e*) [*recidivatus*, a restoration]. Tendency to return or to relapse.

Recipe (*res'-ip-e*) [*recipere*, to take]. A Latin word contracted to ℞, used as the heading of a physician's prescription and signifying *take.* See also *Prescription.*

Recipiomotor (*re-sip-e-o-mo'-tor*) [*recipere*, to receive; *motor*, mover]. Receiving motor impulses.

Recklinghausen, Canals of. See *Canal.*

Reclinate (*rek'-lin-āt*) [*reclinare*, to bend back, recline]. In biology, reclined or bent downward. Applied to stems, branches, etc. Also applied to that form of vernation in which the apex of the leaf is bent downward toward the base, and to a cotyledon doubled over in the seed. It is used to qualify the hairs and processes of insects when they bend toward a surface as if to rest on it.

Reclinatio (*rek-lin-a'-she-o*). See *Reclination.* **R. palpebrarum,** ectropion.

Reclination (*rek-lin-a'-shun*) [*reclinare*, to recline]. The act of lying, or of laying down. **R. of Cataract.** See *Couching*.

Recline (*re-klin'*) [*reclinare*, to lean back]. To lean backward or downward; to rest in a recumbent posture.

Reclining (*re-klī'-ning*) [*reclinare*, to recline]. Bending downward or backward; having a leaning posture. **R. Board**, a board to which young persons are sometimes strapped to prevent stooping and to give erectness to the figure. **R. Posture.** See *Postures*.

Reclivate (*rek'-liv-āt*) [*re*, back; *clivus*, sloping]. In biology, doubly curved, as the letter *s*.

Reclus' Disease. Cystic disease of the mammary gland. See *Diseases, Table of*.

Reclusor (*re-klu'-zor*) [*recludere*, to shut up]. A muscle that opens a part, as the levator palpebræ superioris.

Reclusus (*re-klu'-sus*) [*recludere*, to shut up]. Shut in, enveloped, as a plant-embryo embedded in albumin.

Recognition Time. See *Time*.

Recoil Wave. See *Pulse*.

Recondite (*re-kon'-dīt*, or *rek'-on-dīt*) [*re*, back; *condere*, put together]. Hidden; not readily perceived. Said of organs of insects that are not exserted.

Reconstitution (*re-kon-stit-u'-shun*) [*re*, again; *constituere*, to constitute]. Continuous repair of decaying tissue, or restoration to compensate loss by tissue-waste.

Recovery (*re-kuv'-er-e*) [Fr., *recovrer*, recover]. The restoration of health; return to a state of health.

Recreate (*rek'-re-āt*) [*recreare*, to revive]. To revive or refresh; to reanimate.

Recreation (*rek-re-a'-shun*) [*recreatio*, restoration]. The act of recreating or refreshing. Diversion.

Recrement (*rek'-re-ment*) [*recrementum*]. A secretion that is reabsorbed or reabsorbable.

Recremental (*rek-re-men'-tal*) [*recrementum*, dross]. Pertaining to recrement.

Recrementitious (*rek-re-men-tish'-us*) [*recrementum*, dross]. Of the nature of a recrement; pertaining to such natural secretions as saliva and gastric juice, that, after excretion are again absorbed.

Recrescence (*re-kres'-ens*) [*re*, again; *crescere*, to come forth, to grow]. The reproduction of a lost part.

Recrudescence (*re-kru-des'-ens*) [*re*, again; *crudescere*, to become raw]. The beginning anew or increase in the symptoms of a disease after a short intermission.

Rectal (*rek'-tal*). Pertaining to the rectum. **R. Etherization.** See *Anesthetic*. **R. Glands.** From two to six projecting glandular bodies in the rectum of many insects (*Orthoptera*, *Diptera*). In certain larvæ (*Libellula æschna*) they take the form of respiratory organs. **R. Pouch**, of rays and sharks, a dorsal diverticle of the rectum characteristic of the group.

Rectalgia (*rek-tal'-je-ah*) [*rectum*, rectum; ἄλγος, pain]. Pain in the rectum; proctalgia.

Rectangular (*rek-tang'-gu-lar*) [*rectus*, straight; *angulus*, an angle]. Having straight sides or right angles. **R. Flap Amputation.** See *Teale's Operation* in *Operations, Table of*.

Recticruræus (*rek-tik-ru-re'-us*) [*rectus*, straight; *crus*, leg]. The rectus femoris muscle.

Rectification (*rek-tif-ik-a'-shun*) [*rectus*, straight; *facere*, to make]. A straightening, as of a crooked limb. In chemistry, the redistillation of weak spirit in order to strengthen it. **R., Artificial**, the operation of correcting a faulty position of the fetal head during labor by the hand or with the forceps.

Rectified (*rek'-tif-īd*) [*rectus*, straight; *facere*, to make]. Refined; made right or straight. **R. Spirit**, alcohol containing 85 per cent. of spirit.

Rectinerved (*rek'-tin-ervd*) [*rectus*, straight; *nervus*, nerve]. In biology, with straight nerves or veins.

Rectipetality (*rek-tip-et-al'-it-e*) [*rectus*, straight; *petere*, to seek]. In biology, the inherent tendency of growing organs to advance in a right line, modified, however, by *Heterauxesis* (*q. v.*), as demonstrated by Voechting.

Rectirostral (*rek-te-ros'-tral*) [*rectus*, straight; *rostrum*, beak]. Straight-beaked.

Rectischiac (*rek-tis'-ke-ak*). Same as *Ischiorectal*.

Rectiserial (*rek-tis-e'-re-al*) [*rectus*, straight; *series*, a row]. In biology, arranged in straight lines or ranks.

Rectitic (*rek-tit'-ik*) [*rectum*, rectum; ιτις, inflammation]. Of the nature of or affected with rectitis.

Rectitis (*rek-tī'-tis*) [*rectum*, rectum; *-itis*, inflammation]. Inflammation of the rectum; proctitis. **R. proliferans**, chronic inflammation of the rectum, with increase of the connective-tissue elements and the development of small granulomata.

Recto- (*rek'-to-*) [*rectum*, rectum]. A prefix used to denote connection with or relation to the rectum.

Rectocele (*rek'-to-sēl*) [*rectum*, rectum; κήλη, tumor]. Prolapse of the rectum, causing a rectal tumor and even protrusion of the rectum.

Rectococcygeal (*rek-to-kok-sij-e'-al*) [*rectum*, rectum; κόκκυξ, the coccyx]. Pertaining to the rectum and the coccyx.

Rectococcypexy (*rek-to-kok-si-peks'-e*) [*rectum*, rectum; κόκκυξ, coccyx; πῆξις, a fastening]. Suturing of the rectum to the coccyx.

Recto-colonic (*rek-to-ko-lon'-ik*) [*rectum*, rectum; κωλον, colon]. Pertaining to the rectum and the colon.

Rectogenital (*rek-to-jen'-it-al*) [*rectum*, straight; *genitalis*, pertaining to generation]. Pertaining to the rectum and the genital organs.

Rectopexia (*rek-to-peks'-e-ah*) [*rectum*, rectum; πῆξις, a fastening]. Fixation of a prolapsed rectum in a desired position by artificial means.

Rectopexy (*rek'-to-peks-e*). Same as *Rectopexia*.

Rectophobia (*rek-to-fo'-be-ah*) [*rectum*, rectum; φόβος, fear]. A presentiment or sense of impending ill experienced by patients having rectal disease (Kelsey).

Rectoscope (*rek'-to-skōp*) [*rectum*, rectum; σκοπεῖν, to inspect]. A rectal speculum.

Rectoscopy (*rek-tos'-ko-pe*) [*rectum*, rectum; σκοπεῖν, to inspect]. An examination of the rectum.

Rectostenosis (*rek-to-sten-o'-sis*) [*rectum*, rectum; στένωσις, stenosis]. Stenosis of the rectum.

Rectotome (*rek'-to-tōm*) [*rectum*, rectum; τομη, a cutting]. A cutting instrument used in rectotomy.

Rectotomy (*rek-tot'-o-me*) [*rectum*, rectum; τεμνειν, to cut]. Incision of the rectum for stricture, etc.

Recto-urethral (*rek-to-u-re'-thral*) [*rectum*, rectum; οὐρον, urine]. Pertaining to the rectum and the urethra.

Recto-uterine (*rek-to-u'-ter-īn*) [*rectum*, rectum; *uterus*, the womb]. Pertaining conjointly to the rectum and the womb. **R. Cul-de-sac**, the pouch of Douglas. **R. Folds, R. Ligaments.** Semilunar folds of peritoneum passing on each side from the rectum to the posterior upper surface of the uterus. **R. Fossa.** The space between the uterus and the rectum above the borders of the recto-uterine folds. **R. Pouch.** Douglas's cul-de-sac.

Recto-uterinus (*rek-to-u-ter-ī'-nus*) [*rectum*, rectum; *uterus*, uterus]. A band of non-striated muscles in the recto-uterine folds.

Recto-vaginal (*rek-to-vaj'-in-al*) [*rectum*, rectum; *vagina*, vagina]. Pertaining conjointly to the rectum and the vagina. **R. Cul-de-sac**, the pouch of Douglas. **R. Fistula**, an opening between the vagina and the rectum. **R. Hernia.** Same as *Rectocele*. **R. Septum**, the tissues separating the rectum and the vagina.

Recto-vesical (*rek-to-ves'-ik-al*) [*rectum*, rectum; *vesica*, the bladder]. Pertaining conjointly to the rectum and the bladder. **R. Folds**, the posterior false ligaments of the bladder; lunate peritoneal folds between the bladder and the rectum in the male. Also called *semilunar folds of Douglas*. **R. Fossa**, the pouch of peritoneum lying between the bladder and the rectum.

Rectrix (*rek'-triks*) [*rectrix*, governess, mistress: *pl.*, *Rectrices*]. In biology, one of the rectrices, or tail-feathers, of a bird.

Rectum (*rek'-tum*) [*rectus*, straight]. The lower part of the large intestine, extending from the sigmoid flexure to the anus. Beginning opposite the left sacro-iliac synchondrosis, it passes obliquely downward to the middle of the sacrum, and thence descends in the median line to terminate in the anus. It presents two curves, one in the direction of the concavity of the sacrum and coccyx, and a shorter one in the opposite direction as it turns backward to the anus. Narrower than the sigmoid flexure in its upper portion, it gradually increases in size, and just above the anus a considerable dilatation occurs. It has four coats, from within outward, as follows: mucosa, muscularis mucosæ, submucosa, muscularis. It has also a partial investment of peritoneum. The mucous coat has a lining of columnar epithelium, and is raised in longitudinal ridges or folds, the *columnæ morgagni*. The muscular coats consist of an outer longitudinal layer of fibers and an inner circular layer, especially thick at the lower end, where they constitute the internal sphincter. **R., Encysted**, Gross's disease of the anus; a pathologic sacculation of the rectum. See *Diseases, Table of*.

Rectus (*rek'-tus*) [L.]. Right. In a straight line. **R. Muscles.** See *Muscles, Table of*.

Recubant (*rek'-u-bant*) [*recubans*, lying back]. Lying down; reclining.

Recumbency (*re-kum'-ben-se*) [*recumbere*, to recline]. The posture of one who is lying down; decubitus.

Recumbent (*re-kum'-bent*) [*recumbere*, to recline]. Leaning back; reclining.

Recuperate (*re-ku'-per-āt*) [*recuperare*, to regain]. To recover; to regain strength or health.

Recuperation (*re-ku-per-a'-shun*) [*recuperatio*; *recuperare*, to recover]. Convalescence. Restoration to health.

Recuperative (*re-ku'-per-a-tiv*) [*recuperativus*]. Pertaining to, or tending to, recovery of health or strength.

Recurrence (*re-kur'-ens*) [*recurrere*, to run back]. The return, as of a disease.

Recurrent (*re-kur'-ent*) [*recurrere*, to run back]. Returning; reappearing. In anatomy, turning back in its course, as an artery or nerve. **R. Erysipelas.** See *Erysipelas*. **R. Fever**, the same as relapsing fever. **R. Mania.** Same as *Periodic Mania*. **R. Pulse.** See *Pulse* and *Pulsus*. **R. Summer Eruption.** See *Hydrosa vacciniforme*.

Recurring (*re-kur'-ing*) [*recurrere*, to run back]. Returning; occurring again. **R. Disease**, one that returns or relapses. **R. Utterance**, the involuntary utterance of certain words, usually a symptom of motor aphasia.

Recurvate (*re-kur'-vāt*) [*recurvatus*, curved back]. In biology, recurved.

Recurvation (*re-kur-va'-shun*) [*recurvatus*, curved back]. The act or process of recurving or of bending backward.

Recurved (*re-kurvd'*) [*re*, back; *curvare*, to curve]. In biology, bent back or downward. Curved upward when applied to the bill or beak of a bird.

Recurvirostral (*re-kur-ve-ros'-tral*) [*recurvus*, bent back; *rostrum*, beak]. Having a recurved bill.

Recurvous (*re-kur'-vus*) [*recurvus*]. Bent backward.

Recutitus (*rek-u-te'-tus*) [*re*, back; *cutis*, skin]. 1. Circumcised. 2. In biology, apparent denudation of the epidermis.

Red [ME., *red*, red]. The least refrangible color of the spectrum. **R. Antimony.** See *Kermes Mineral*. **R. Arsenic.** Same as *Realgar*. **R. Baneberry**, the root of *Acetata rubra*, a very violent purgative. Dose of the fld. ext. ♏v–x. Unof. **R. Bark.** See *Cinchona*. **R. or Black Water**, a blood-disease affecting cattle and sheep, in which in cattle the urine is of a red or blood color, while in sheep there is an effusion of bloody serum into the abdominal cavity. **R.-blindness.** See *Blindness*. **R.-blooded**, having red blood. **R. Bole.** Same as *Ocher*. **R. Braxy.** See *Braxy*. **R. Bud.** See *Judas Tree*. **R., Chinese.** Mercuric sulphid. **R. Cohosh.** See *Actea*. **R., Congo**, a red dye which is turned blue by acids, and is a delicate test for them. **R. Corpuscles.** See *Corpuscles*. **R.-crested**, having red crests. **R.-cross Society**, an international society founded by Clara Barton, and intended to act upon the principles laid down in the Geneva Convention of 1864. It furnishes nurses and supplies for service in wars, and relieves the distress, needs, or wants of those who suffer in floods, pestilences, and public calamities. **R.-green blindness**, a form of color-blindness in which shades of red and green cannot be distinguished. **R. Gum:** 1. A disease of grain. 2. A red papular eruption of infants. Also called *gum-rash* and *strophulus*. See *Miliaria*, also *Eucalyptus* and *Strophulus*. **R. Induration.** See *Induration*. **R. Infarct.** See *Infarct*. **R. Infiltration.** See *Infiltration*. **R. Jaundice.** See *Phenigmus*. **R. Lane**, a vulgarism for the throat. **R. Lead.** Same as *Minium*. See *Antimonial Cinnabar* in *Pigments, Conspectus of*. **R. Lip-salve.** See *Theobromæ, Ol.* **R. Maple.** See *Acer*. **R.-milk Bacillus**, *Bacillus prodigiosus*. Milk affected by it is called "*bloody milk*" by farmers. See *Bacteria, Synonymatic Table of*. **R. Mixture**, a combination of rock salt, potassium nitrate, sodium carbonate, and molasses, used for injecting bodies for the dissecting room. It imparts a beautiful red color to the muscles. It is also called *Horner's Mixture*. **R. Neuralgia.** See *Erythromelalgia*. **R. Nucleus.** See *Nucleus tegmenti*. **R. Osier**, the bark of the common *Cornus serica*. Tonic and astringent. Dose of fld. ext. ʒss–j. Unof. **R. Pestilence.** See *R. Plague*. **R. Plague**, a form of the plague characterized by a red spot, boil, or bubo. **R.-polled**, having a red poll, or the top of the head red. **R. Precipitate.** See *Hydrargyrum*. **R., Retinal, R., Visual.** See *Visual Purple*. **R. Root**, Jersey tea. The root of *Ceanothus americanus*. Alterative and astringent. A popular remedy for the sore-throat of scarlatina. Dose of a decoction, *ad lib*. Unof. See *Ceanothus*, also *Lachnanthes tinctoria*. **R. Rose.** See *Rosa gallica*. **R. Saunders.** See *Santalum rubrum*. **R.-shafted**, having the shafts of the wing and tail-feathers red. **R. Softening**, a form of acute softening of the cerebral substance characterized by a red, punctiform appearance due to the presence of blood. **R. Soldier.** See *Cholera, Hog*. **R. Sweat.** See *Chromidrosis* and *Micrococcus hæmatodes*, under *Bacteria, Synonymatic Table of*. **R.-thighed**, having red thighs. **R.-throated**, having a red patch on the throat. **R., Violet.** See *Pigments, Conspectus of*. **R. Vision.** See *Erythropsia*. **R. Vitriol.** Same as *Colcothar*. **R.-water**, a common name for hemoglobinuria in cattle. **R.-winged**, having red wings.

Redia (*re'-de-ah*) [*Redi*, an Italian naturalist: *pl.*, *Rediæ*]. In biology, the larval stage of a trematode, which results from the development of a parthenogenetic egg of the first larval stage (*Sporocyst*). The *rediæ* have at the anterior extremity of their body a sucker-like formation, a pharynx, a simple intestinal tube, and a birth-aperture. The first *rediæ* give rise to a second and these to a third parthenogenetic generation and these finally to larvæ called *Cercariæ*, *q. v.*

Redintegration (*red-in-te-gra'-shun*) [*redintegrare*, to renew]. 1. Regeneration. In chemistry, the restoration of any mixed substance to its former nature. 2. The complete restitution or reforming of a part that has been injured or destroyed.

Redresser (*re-dres'-er*) [Fr., *redresseur*]. An instrument used to replace a displaced organ or part.

Redressment (*re-dres'-ment*) [Fr., redressement]. The correction of a deformity, or replacement of a dislocated part.

Reds (*redz*) [ME., *red*, red]. Popular term for the menses.

Reduce (*re-dūs'*) [*reducere*, to bring back]. To restore a part to its normal topographic relations, as to reduce a hernia or fracture.

Reduced (*re-dūsd'*) [*reducere*, to lead back]. 1. Restored to its proper place, as a dislocated bone. 2. In chemistry, brought into the metallic form. 3. Diminished in size. **R. Eye.** See *Listing*. **R. Hematin**, the product of the reduction of hematin in alkaline solution. **R. Hemoglobin**, the result of deoxidation of oxyhemoglobin. **R. Iron**, iron by hydrogen; ferrum reductum. **R. Oil.** See *Lubricating Oils*.

Reducible (*re-du'-sib-l*) [OF., *redusible*]. Capable of being reduced. **R. Circuit.** See *Circuit*. **R. Hernia**, a hernia capable of being reduced by manipulation or posture.

Reducing (*re-dūs'-ing*) [*reducere*, to lead back]. Restoring to the proper position. **R. Division**, a synonym of the term, *Extrusion of the polar bodies or globules*.

Réducteur (*ra-duk'-tur*) [Fr.]. The India-rubber bag of A. Favrot for replacing a retroverted gravid uterus. It is introduced into the rectum and inflated.

Reduction (*re-duk'-shun*) [*reductio; reducere*, to lead back]. In surgery, the replacing a dislocated bone, hernia, or other part in its normal position. In chemistry, the operation of extracting a metal from its salt or other combination. **R., False**, a false forcing of a strangulated hernia through a rent in the neck of the sac and beneath a portion of detached parietal peritoneum. **R. en masse**, the reduction of a strangulated hernia in its sac, thus failing to relieve the strangulation. **R., La Mothe's**, a method of reducing shoulder-dislocations by manipulation. The patient is placed in the dorsal position, with the arm parallel to the side of the head and face and the hand of the operator fixing the scapula. **R., Thomas's**, a method of approximating and fixing the fragments of bone in case of fracture of the inferior maxilla, by passing a wire through them and twisting each end of it upon the other until the fragments are brought together. **R.-works**, a cremating establishment for disposing of the filth and refuse matter of a city.

Reductor (*re-dukt'-or*) [L.]. 1. An instrument for effecting reduction. 2. A retractor muscle.

Reduplicate (*re-du'-plik-āt*) [*re*, again; *duplicare*, to double]. In biology, double-back. Applied to that form of valvate estivation in which the margins of the organs are turned outward.

Reduplication (*re-du-plik-a'-shun*) [L., *reduplicatio*, a doubling]. The doubling of the paroxysms in certain forms of intermittent fever. **R. of the Heart-sounds**, a simulated doubling of either the first or second sound of the heart. In the case of the first sound it is probably the effect of a shock caused at the pre-systolic period by a sudden tension of the auriculo-ventricular valves of the left side as a result of the contraction of the auricle. In the case of the second sound it is due to tension of the mitral leaflets occurring in mitral stenosis during the auricular systole. **R. of the Muscles**, a doubling of a muscle due to some abnormal relation of its fasciculi.

Reduplicative (*re-du'-plik-a-tiv*). Same as *Reduplicate*.

Reduvia (*red-u'-ve-ah*). See *Paronychia*.

Redux (*re'-duks*) [L.]. Noting the return of certain physical signs after their disappearance in consequence of disease. **R., Crepitation.** See *Crepitation*. **R., Crepitus**, the small mucous râles of the early stage of resolution after pneumonia.

Reed (*rēd*) [D., *riet*, a reed]. The abomasum, "fourth," or proper digestive stomach of ruminants. Cf. *abomasum*, *omasum*, *manyplies*, *psalterium*, *paunch*.

Reedy Nail (*re'-de-nāl*). A condition of the nail in which the natural longitudinal striæ become very marked, apparently from wasting of the intermediate portions. The condition is regarded by Fothergill as a sign of gout.

Reef-knot (*rēf'-not*). A sailor's knot used in the ligature of arteries. It is not likely to slip or loosen. See *Knot*.

Reel-foot (*rēl'-foot*). Synonym of *Club-foot*.

Reeling (*re'-ling*) [ME., *relen*, to turn round and round]. Swaying of the body, as in intoxication.

Reeves' Method. See *Stains*, *Table of*.

Refining (*re-fi'-ning*) [Fr., *raffiner*, to refine]. In chemistry and pharmacy, the separation of a substance from the foreign matter with which it is mixed.

Reflected (*re-flek'-ted*) [*reflectere*, to bend backward]. Cast or thrown back. In anatomy, turned back upon itself. **R. Light.** See *Light*.

Reflection (*re-flek'-shun*) [*reflexio*, *re*, back; *flectere*, to bend]. In optics, the bending or turning back of a ray of light from a surface that neither absorbs, transmits, nor scatters it. In pathology, the bending back of an organ or part from its normal direction.

Reflector (*re-flek'-tor*) [*reflectere*, to bend back]. 1. A mirror or speculum by which light is reflected for use in diagnostic or operative processes. 2. A muscle the function of which is to turn a part back. **R. epiglottidis.** See *Depressor epiglottidis* in *Muscles, Table of*. **R., Forehead.** See *Head-mirror*.

Reflex (*re'-fleks*) [*reflexus*, thrown back]. A bounding back or return of an impulse or body. **R. Arc**, **R. Movement**, the stimulus of an afferent nerve, and the transference or return, by a center, of the impulse through an efferent nerve, resulting in movement or function of a peripheral organ. Reflexes may be motor, sensory, secretory, tactile or inhibitory. A table of reflexes is appended. **R., Crossed.** See *Crossed*. **R., Cutaneous**, that arising from stimulation of the skin. **R., Deep**, the so-called tendon-reflex, such as the knee-jerk, ankle-clonus, etc. **R. Epilepsy**, epileptic seizures due to reflex influences, such as irritation from a cicatrix, etc.; genuine cases are rare. **R. Neurosis.** See *Neurosis*. **R., Reinforced.** See *Reinforced*. **R., Tendon**, muscle reflex action; myotatic reaction: deep reflex. See, also, *Clonus*. **R., Vestigial**, a reflex due to conditions, or to the environment, which affected one's ancestry, but which does not affect the subject of the reflex. **R., Watered-silk**, a vivid reflex often existing in the retina of children, especially pronounced along the vessels, changing its place with every movement of the mirror, and giving the retina a luster somewhat like that of watered silk.

TABLE OF REFLEXES.

NAME.	DEEP OR SUPERFICIAL.	HOW OBTAINED.	EFFECT PRODUCED.	SIGNIFICANCE.
·lominal.	Superficial.	Sharp, sudden stroking of abdominal wall from margin of ribs downward.	Contraction of muscles about umbilicus.	Shows integrity of cord from eighth to twelfth dorsal nerve.
gle-clonus.	Deep.	By sudden complete flexion of foot, by pressing hand against sole.	Clonic contractions of tendo achillis, dependent upon alternate contraction and relaxation of anterior tibial and calf muscles.	As in knee-jerk.
gyll-Robertson.		See Robertson, Argyll.		
eps.	Deep.	Tapping tendon of biceps.	Contraction of biceps muscle.	Same cases as increased knee-jerk.
bo-cavernous.	Superficial.	See *Virile*.		
n.	Deep.	See *Jaw*.		
o-spinal.	Superficial.	By irritation of the skin of the neck.	Pupillary dilatation.	
neal.	Superficial.	Same as *Eyelid-closure*.		
masteric.	Superficial.	Stimulation of skin on front and inner aspect of thigh.	Retraction of testicle on same side.	Shows integrity of cord between the first and second lumbar pairs of nerves.
ssed.	Deep.	Stimulation of one side of body.	Reflex on opposite side of body.	
p.		Reflexes developed by percussion of tendons or bones.		
rsal.	Superficial.	Same as *Erector spinæ*.		
ow-jerk.				
gastric.	Superficial.	Stimulation of skin in fifth or sixth intercostal space near axilla.	Dimpling in the epigastrium, due to contraction of the highest fibers of the rectus abdominis muscle.	Shows integrity of cord from fourth to seventh dorsal nerves.
ctor spinæ.	Superficial.	Stimulation of skin along border of erector spinæ muscle.	Local contraction of these muscles.	Integrity of dorsal region of cord.
lid-closure.	Superficial.	Irritation of conjunctiva.	Closure of lid.	
t-tap.	See *Tendo achillis*.			
teal.	Superficial.	Firm sudden stroking of skin over buttock.	Contraction of glutei.	Shows integrity of cord at fourth and fifth lumbar nerves.
rscapular.	Superficial.	See *Scapular*.		
-contraction.	Superficial.	See *Pupillary*.		
jerk, or jaw-clonus.	Superficial.	Downward stroke with a hammer on the lower jaw hanging passively or gently supported by the hand.	Clonic movements of inferior maxilla.	Rarely present in health.
e-jerk.	Deep.	By striking patellar tendon after rendering it tense by flexing the knee at right angle.	Contraction of quadriceps muscle, foot jerked forward.	Normal in health. *Absent* in locomotor ataxia, destructive lesions of lower part of cord, alcoholic paraplegia, affections of the anterior gray cornua, infantile paralysis, meningitis, diphtheric paralysis, atrophic palsy, pseudo-hypertrophic muscular paralysis, diabetes, etc. *Increased* in diseases of the pyramidal tracts, in spinal irritability, tumors of brain, cerebro-spinal sclerosis, lateral sclerosis, after epileptic seizures or unilateral convulsions.
ngeal.	Superficial.	Irritation of fauces, larynx, etc.	Cough.	
bar.	Superficial.	Same as *Erector spinæ*.		
l.	Superficial.	Irritation of Schneiderian membrane.	Sneezing.	
quus.	Superficial.	Irritation of skin below Poupart's ligament.	Contraction of fibers of external oblique in females; corresponds to cremasteric in males, although it can also be caused in males.	

TABLE OF REFLEXES.—*Continued.*

NAME.	DEEP OR SUPERFICIAL.	HOW OBTAINED.	EFFECT PRODUCED.	SIGNIFICANCE.
Palatal.	Superficial.	Irritation.	Swallowing.	
Palmar.	Superficial.	Tickling of palm.	Contraction of digital flexors.	Shows that cervical region of cord is normal.
Patellar.	Deep.	Same as *Knee-jerk*.		
Patellar, Paradoxic.	Superficial.	Percussing patellar tendon with the patient in the dorsal decubitus.	Contraction of the adductor, but not of the quadriceps muscle. If the patient be in the sitting posture the normal reflex is elicited.	Spinal concussion.
Penis-percussion.	Superficial.	See *Virile*.		
Periosteal.	Deep.	Tapping the bones of the forearm or leg.	Sharp contractions of the muscles.	Indicates disease of the spinal cord (amyotrophic lateral sclerosis).
Peroneal.	Superficial.	Stroke on peroneal muscles when tense or when the foot is turned inward.	Reflex movements.	
Pharyngeal.	Superficial.	Irritation.	Swallowing.	
Plantar.	Superficial.	Stroking sole of foot.	Contraction of toes.	Muscular exertion.
Platysma.	Superficial.	Pinching the platysma myoides muscle.	Dilatation of pupil.	
Pupillary.		Exposure of retina to light.	Contraction of iris.	Absent in basal meningitis, etc.
Paradoxic.		Stimulation of retina by light.	Dilatation of pupil.	In rare abnormal states.
Paradoxic Patellar.	See *Patellar, Paradoxic*.			
Reinforced.	Any reflex is heightened by coincident muscular exertion of other parts than those being tested or by mental distraction.			
Robertson, Argyll.		Light and accommodation.	Pupil reacts in accommodation, but not to light.	Locomotor ataxia.
Scapular.	Superficial.	Irritation of interscapular region.	Contraction of scapular muscles.	Shows integrity of cord between upper two or three dorsal and lower two or three cervical nerves.
Skin.	Superficial.	See *Platysma*.		
Sole.		Same as *Plantar*.		
Spinal.		Those reflex actions emanating from centers in the spinal cord.		
Superficial.		Such as are developed from irritation of the skin.		
Tendo achillis, or front-tap contraction.	Superficial.	By striking muscles on anterior part of leg, while in extension, the foot being extended by the hand upon the sole.	Reflex contraction of gastrocnemius.	Considered by Gowers as a delicate test of heightened spinal irritability.
Tendon.		See *Myotatic Irritability*.		
Toe (great).	Superficial.	Strong flexion of great toe.	Involuntary flexion of foot, then flexion of leg, and, lastly, flexion of the thigh on the pelvis.	Met with in cases in which the knee-jerk and other tendon-reflexes are strongly developed.
Virile.	Superficial.	Sharp percussion of back of penis, the sheath having been made tense.	Retraction of bulbocavernous portion.	Occurs in health.
Wrist-clonus.	Deep.	By pressing hand backward, causing extreme extension.	A series of jerking movements of the hand.	In the late rigidity of hemiplegia.

eflexa (*re-fleks'-ah*) [L.]. See *Decidua reflexa.*

eflexed (*re-flekst'*) [*reflectere*, to bend back]. In biology, curved abruptly backward. Applied to sepals, petals, etc.

eflexio (*re-fleks'-e-o*) [L.]. See *Reflection.* **R. palpebrarum.** See *Ectropion.*

eflexogenic (*re-fleks-o-jen'-ik*) [*reflexus*, reflex; γενᾶν, to produce]. Causing or increasing a tendency to reflex action; producing reflexes.

eflexometer (*re-fleks-om'-et-er*) [*reflexus*, reflex; μέτρον, a measure]. An instrument used to measure the force required to produce myotatic movement.

eflux (*re'-fluks*) [*refluxus; re*, back; *fluere*, to flow]. Any return of a current by reversal along its former course.

efoulement (*ra-fool'-mon(g)*) [Fr.]. A forcing back. **R. du sacrum en arrière,** a backward inclination of the sacrum that marks one of the changes in the pelvis of girls at puberty.

efracted (*re-frak'-ted*) [*refractus*, *p. p.* of *refrangere*, break back or up]. In biology, bent suddenly, so as to appear broken at the bend.

efraction (*re-frak'-shun*) [*refractio; re*, up or back; *frangere*, to break]. The deviation of light from a straight line in passing obliquely from one transparent medium to another of different density. **R., Angle of,** the angle formed by a refracted ray of light with the perpendicular at the point of refraction. **R., Atomic,** the product of the refractive index of the constituent elements of a compound and their atomic weights. **R., Coëfficient of,** the quotient of the sine of the angle of refraction into the sine of the angle of incidence. **R., Double,** the power possessed, *e. g.*, by Iceland spar, of dividing a ray of light and thus producing a double image of an object. **R., Dynamic,** the static refraction of the eye, plus that of the accommodative apparatus. **R., Errors of,** departures from the power of producing a normal or well-defined image upon the retina, because of ametropia. **R. of the Eye,** the influence of the ocular media upon a cone or beam of light, whereby a normal or emmetropic eye produces a proper image of the object upon the retina. **R.-image.** See *Image.* **R., Index of,** the refractive power of any substance as compared with air. **R., Molecular,** the molecular weight of a compound. The molecular refraction of a liquid carbon compound is equal to the sum of the atomic refractions. **R., Static,** that of the eye with paralyzed accommodation.

efractionist (*re-frak'-shun-ist*) [*refrangere*, to break up]. One who corrects errors of ocular refraction, or ametropia.

efractive (*re-frak'-tiv*) [*refrangere*, to break up]. Tending to refract. Capable of being turned from a straight line. **R. Equivalent.** See *Refractive Power, Specific.* **R. Index.** Same as *Refraction, Index of, q. v.* **R. Power,** the measure of influence which a transparent body exercises on the light which passes through it. **R. Power, Specific,** an almost constant quantity representative of the relation between the coëfficient of refraction, the temperature, and the specific gravity of a given fluid.

efractometer (*re-frak-tom'-et-er*) [*refrangere*, to break up; μέτρον, measure]. 1. An instrument for measuring the refraction of the eye. 2. An instrument for the determination of the refractive indices of liquids.

efractory (*re-frak'-tor-e*) [*refrangere*, to break up]. 1. Resisting treatment. 2. Resisting the action of heat; slow to melt.

efracture (*re-frak'-tūr*) [*refrangere*, to break up]. The re-breaking of fractured bones that have joined by faulty or improper union.

Refrangibility (*re-fran-jib-il'-it-e*) [L., *refrangere*, to refract]. In optics, capability of being bent away from a straight line; a property shown by a ray of light in passing obliquely from one transparent medium into another of different density.

Refresh (*re-fresh'*) [L., *re*, again; *friscus*, new]. In surgery, to restore the character of a fresh wound; as to refresh the edges of a fissure before closing it.

Refreshing (*re-fresh'-ing*) [*re*, again; *friscus*, fresh]. Tending to refresh; invigorating; reviving. **R. Action** (of the electric current). The restoration of excitability after fatigue by the effect of voltaic alternatives.

Refrigerant (*re-frij'-er-ant*) [*refrigerans*, making cool]. A medicine or agent having cooling properties, or lowering bodily temperature.

Refrigerated (*re-frij'-er-a-ted*) [*refrigerare*, to make cool again]. Cooled; made cool. **R. Meat,** meat which is kept at a temperature of from 36° to 40° F. from the time of slaughter until used.

Refrigeration (*re-frij-er-a'-shun*) [*refrigeratio*, a cooling again]. The act of lowering the temperature of a body, by conducting away its heat to a surrounding cooling substance.

Refrigeratory (*re-frij'-er-a-tor-e*) [L., *refrigeratorius*]. A condenser. Also, a vessel filled with ice or with cold water for maintaining a low temperature.

Refuse (*ref'-us*) [L., *refusus*, restored]. Waste from manufacturing establishments, and all inorganic waste.

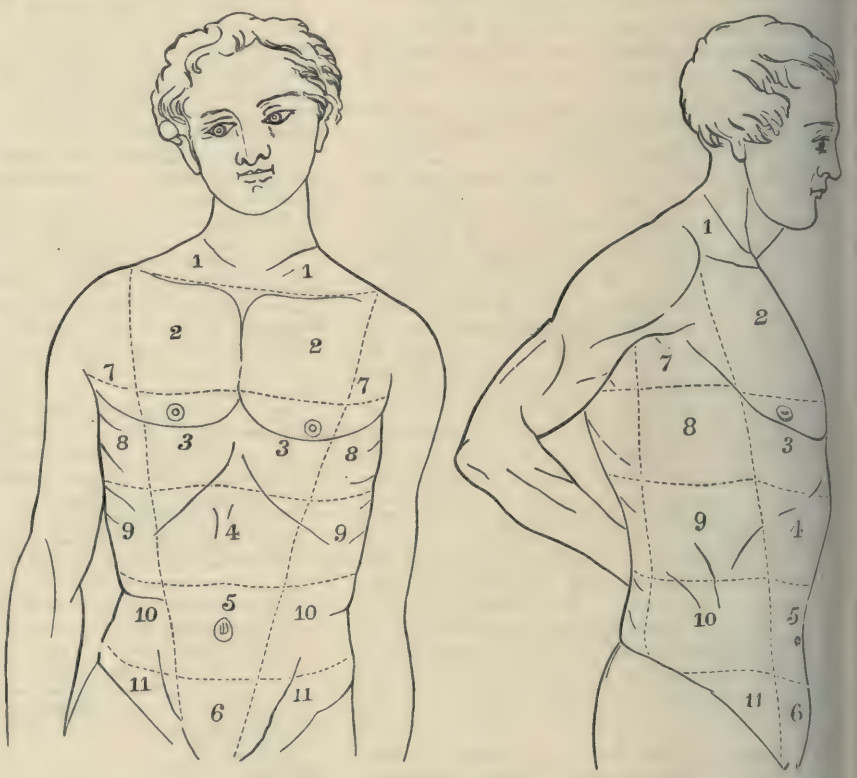
Refusion (*re-fu'-zhun*) [*refusio*, an overflowing]. The act of withdrawing blood from the vessels, freeing it from poisonous substances, and passing it back again.

Regenerate (*re-jen'-er-āt*) [*regenerare*, to generate again]. To generate anew; to reproduce.

Regeneration (*re-jen-er-a'-shun*) [*regeneratio; regenerare*, to beget]. 1. The new growth or repair of structures or tissues lost by disease or by injury. 2. In chemistry, the process of obtaining from the by-products or end-products of an operation a substance which was employed in the earlier part of the operation. **R., Cell-processes in,** these consist in either simple hypertrophy (increase in the size of existing cells), or numerical hypertrophy, hyperplasia, increase in the number of cells in the tissue. **R. after Inflammation,** repair by multiplication of the tissue-cells. **R. after Necrosis,** repair by absorption of dead tissue and its replacement by newly formed normal tissue. **R., Pathologic,** the renewal of destroyed tissue by a pathologic rather than a physiologic process.

Regenerative (*re-jen'-er-a-tiv*) [*regenerare*, to regenerate]. Tendency to regenerate. **R. Inflammation.** See *Inflammation.*

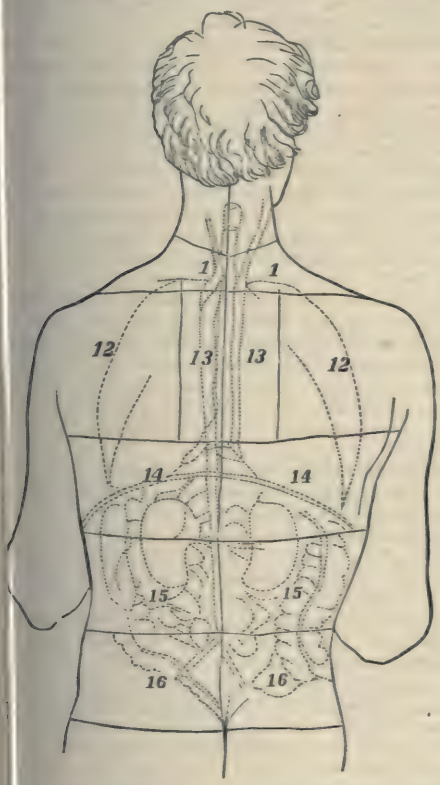
Regenesis (*re-jen'-es-is*) [*regenerare*, to generate anew]. The state of being reproduced.



Régime (*ra-zhēm'*) [Fr.]. See *Regimen.*

Regimen (*rej'-im-en*) [*regimen*, guidance]. The methodic and systematized use of food, and the sanitary arrangement of surroundings essential to the preservation of life, both in health and in disease.

Regina Purple. Same as *Rosanilin Violet.*



Regio (*re'-je-o*) [L.]. See *Region.* **R. aulica,** the region about the aula and portas (foramina of Monro). **R. cardiaca,** the region of the heart. **R. coxarum,** the lower portion of the lumbar region. **R. germinativa,** of Waldeyer, the germ-epithelium of the embryo. **R. glutea,** the region about the gluteal muscles. **R. subthalamica,** the area between the ventral face of the thalamus, the body of Luys, and the red nucleus. It consists of a fine, felt-like mass of fibers, whose relations are so obscure that even their boundary is not well determined (*zona incerta*).

Region (*re'-jun*) [*regio*, a region]. One of the artificial and conventional divisions of the body, as the *Abdominal R.* See *Abdomen*, and *Pectoral R.* **R., Acromial,** the parts near the acromion. **R., Anal,** pertaining to the anus. **R., Aulic,** the area about the aula. **R., Auricular,** the parts near the ear. **R., Axillary,** a region upon the lateral aspect of the thorax, extending from the axilla to a line drawn from the lower border of the mammary region to that of the scapular region. **R., Basilar,** the region at the base of the skull. **R., Brachial,** the region of the arms. **R. of Broca,** the third left frontal convolution of the brain. **R., Central Gray,** the medullary substance of the cerebellar hemispheres. **R., Cervical,** the parts around the neck. **R., Ciliary.** 1. The zone of the eyeball in which the ciliary body is situated. 2. The part of the eyelid containing the cilia. **R., Clavicular,** the area about the clavicle. **R., Costal,** the lateral chest-area. **R., Diaphragmatic,** the region of the diaphragm. **R., Epicranial,** the region above the cranium. **R., Epigastric,** the region over the stomach bounded laterally by two vertical lines passing through the middle of Poupart's ligament; above by a horizontal line touching the lower margin of the sternum, and below by a horizontal line touching the lowest part of the thorax, and including the pyloric end and middle of stomach, the left lobe of the liver, the lobulus spigelii, the pancreas, the duodenum, parts of the kidneys, the aorta, vena cava, thoracic duct, semilunar ganglia. **R., Femoral,** the parts about the femur. **R., Fibular,** the parts about the fibula. **R., Gastric,** the region over the stomach. **R., Gluteal,** the region of the gluteus muscle. **R., Groin,** the region of the groin. **R., Gustatory,** the tips, margins, and root of the tongue in the neighborhood of the circumvallate papillæ; also the lateral parts of the soft palate and the anterior surface of the anterior pillars of the fauces. **R., Humeral,** the parts about the humerus. **R., Hyo-mental.** See *R., Supra-hyoid.* **R., Hyo-sternal.** See *R., Infra-hyoid.* **R., Hypochondriac,** the region that joins the epigastric region laterally. The right hypochondriac region includes the surface of the abdomen covering the right lobe of the liver, the gall-bladder, the hepatic flexure of the colon, and part of the right kidney; the left that covering the spleen, the splenic end of the stomach, the extremity of the pancreas, the splenic flexure of the colon, and part of the left kidney. **R., Hypogastric,** that part of the abdominal surface between a horizontal line drawn through the anterior superior crests of the ilia above and on either side by vertical lines drawn through the center of Poupart's ligament. It overlies the small intestines, the bladder in children and in adults when distended, the uterus during pregnancy, sometimes the vermiform appendix, the cecum, and the sigmoid flexure of the colon. **R., Iliac,** the region of the ilium. See also *R., Inguinal.* **R., Ilio-inguinal,** the iliac region and the groin conjointly. **R., Inferior Sternal,** the space corresponding to the part of the sternum below the lower margin of the third costal cartilages. **R., Infra-axillary,** the space between the anterior and posterior axillary lines. **R., Infra-clavicular,** the area circumscribed superiorly by the lower border of the clavicle, inferiorly by the lower border of the third rib, on one side by a line extending from the acromion to the pubic spine, and on the other side by the edge of the sternum. **R., Infra-hyoid,** the space below the hyoid bone, between the sterno-cleido-mastoidei and the sternum. **R., Infra-mammary,** the space between a line drawn along the upper border of the xiphoid cartilage and the margin of the false ribs, and between the middle line of the

1. Supraclavicular region. 2. Clavicular region. 3. Mammary region. 4. Epigastric region. 5. Umbilical region. 6. Hypogastric region. 7. Axillary region. 8. Infra-axillary region. 9. Hypochondriac region. 10. Lumbar region. 11. Inguinal region.

xiphoid cartilage and a vertical line passing through the pubic spine. **R., Infra-scapular,** the region on either side of the vertebral column below a horizontal line drawn through the inferior angle of each scapula. It is called also the *Subscapular Region*. **R., Infra-spinous,** that included between the spine of the scapula and a line passing through the angle of the scapula. **R., Inguinal, R., Iliac,** the right and left inguinal or iliac regions are two of the nine abdominal regions. The right includes the abdominal surface covering the cecum and the cecal appendix, the ureter, and the spermatic vessels; the left that covering the sigmoid flexure of the colon, the ureter, and the spermatic vessels. **R., Interscapular,** the space between the

. 9. Infra-scapular region. 12. Infra-spinous region. 13. Interscapular region. 14. Infra-scapular region. 15. Lumbar region. 16. Sacro-iliac region.

scapulæ. **R., Ischio-rectal,** the region corresponding to the posterior part of the pelvic outlet, between the ischium and the rectum. **R., Jugal,** the space below the zygoma. **R., Laryngo-tracheal,** the parts about the larynx and the trachea. **R., Lenticulostriate,** the anterior parts of the lenticular and caudate nuclei, and the intervening portion of the internal capsule. **R., Lenticulo-thalamic,** the posterior part of the lenticular nucleus, the optic thalamus, and the part of the internal capsule which intervenes. **R., Lingual,** the region of the tongue. **R., Lumbar,** the surface of the abdomen between a curved line drawn parallel with the cartilage of each false rib above and a curved line parallel with the iliac crests below, and a vertical line through the center of Poupart's ligament anteriorly, and the lumbar vertebræ posteriorly. **R., Mammary,** the space on the anterior surface of the chest between a line drawn through the lower border of the third rib, and one drawn through the upper border of the xiphoid cartilage. **R., Maxillary,** the parts about the jaws. **R., Mesogastric,** the umbilical and the right and left lumbar regions together. **R., Middle Cervical,** the area between the lower jaw, the sternum, and the anterior edges of the sterno-cleido-mastoidei. **R., Mylo-hyoid.** See *Mylo-hyoid Triangle*. **R., Nasal,** the parts around the nose. **R., Olfactory,** the region of the nasal mucous membrane including the ramifications of the olfactory nerve. **R., Orbital,** the region of the orbits. **R., Palatal,** the parts about the palate. **R., Palpebral,** the region of the eyebrows. **R., Parasternal,** the space between the mid-axillary line and the edge of the sternum. **R., Perineal,** the region of the perineum. **R., Pharyngeal,** the parts about the pharynx. **R., Popliteal.** See *Popliteal Space*. **R., Precordial,** the surface of the chest covering the heart. **R., Psycho-motor,** the cerebral cortex. **R., Pterygo-maxillary,** the parts connecting or lying between the pterygoid process of the sphenoid and the maxillary bone. **R., Pulmo-cardiac,** the region of the left thorax in which the left lung overlaps the heart. **R., Pulmo-gastric,** the portion of the left thorax in which the lung overlaps the stomach. **R., Pulmo-hepatic,** the portion of the right thorax in which the lung overlaps the liver. **R., Respiratory** (*of the nose*), the portion of the nasal passages having to do with the act of respiration. **R., Sacral,** the area above the sacrum. **R., Scapular,** the space over either scapula. **R., Sternal,** the space overlying the sternum. **R., Sub-auricular,** the space immediately below the ear. **R., Sub-maxillary.** Same as *R., Supra-hyoid*. **R., Sub-mental,** the region just beneath the chin. **R., Sub-ocular,** the anterior extremity of the temporo-sphenoidal lobe. **R., Sub-thalamic,** the extension of the tegmentum beneath the posterior portion of the optic thalamus. **R., Superior** (*of the skull*), the space between the superior curved line of the occipital bone behind, the supra-orbital ridge in front and, laterally, between the temporal lines. **R., Superior Sternal,** the surface corresponding to that portion of the sternal region above the lower border of the third rib. **R., Supra-clavicular,** the space above either clavicle. **R., Supra-hyoid,** the space between the upper margin of the hyoid bone, the lower border of the inferior maxilla and the sterno-cleido-mastoid muscles. **R., Supra-mammary.** Same as *R., Infra-clavicular, q. v.* **R., Supra-scapular,** the area above the spine of the scapula. **R., Supra-spinous,** the region corresponding to the supra-spinous fossa, *q. v.* **R., Supra-sternal.** See *Supra-sternal Notch*. **R., Temporo-maxillary,** the area over the junction of the temporal and maxillary bones. **R., Thoracic,** relating to the entire surface of the thorax. **R., Umbilical,** the surface of the abdomen immediately about the umbilicus, bounded as follows: above by a horizontal line connecting the cartilages of the ninth ribs; below, by a line joining the crests of the ilia, and laterally, by lines passing vertically through the center of Poupart's ligament. **R., Vertebral,** relating to the region over the vertebral column.

Regional (*re'-jun-al*) [*regionalis*]. Pertaining to a region. **R. Anatomy,** the anatomic study of a definite and limited region of the body that has close anatomic, surgical, or pathologic inter-relations of parts or functions.

Register (*rej'-ist-er*) [*registrum*]. The compass of a voice; also a subdivision of its compass, consisting in

a series of tones produced in the same way and of a like character.

Registrar (*rej'-is-trar*) [*registrarius*, one who keeps a record]. A keeper of records.

Registrarship (*rej'-is-trar-ship*) [*registrarius*, one who keeps a record]. The office of a registrar.

Registration (*rej-is-tra'-shun*) [*registratio*, a registering]. The act of recording, as of deaths, births, etc.

Regius (*re'-je-us*) [*regius*, royal]. A descriptive term applied to the golden or royal color observed in certain forms of jaundice. **R. Professor,** a royal professor, as in one of the English universities.

Regma (*reg'-mah*) [*ῥῆγμα*, a fracture: *pl.*, *Regmata*]. In biology, a term applied to a fruit like that of the geranium, in which the carpels separate elastically from the base of the carpophore.

Regmacarp (*reg'-mak-arp*) [*ῥῆγμα*, a fracture; *καρπός*, fruit]. In biology, a dehiscent fruit.

Regnauld's Anesthetic or Liquid. A mixture of chloroform 4 parts, and methylic alcohol 1 part. It is sometimes used in place of chloroform. See *Anesthetic.*

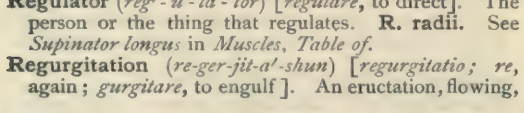
Regnault and Reiset, Method of. A method of investigating the changes in the air brought about by respiration. The animal is placed in a closed chamber, and the carbonic acid formed is continually removed, the necessary oxygen being supplied in measured quantities.

Regnoli's Operation. See *Operations, Table of.*

Regorgement (*ra-gorzh'-mon(g)*) [Fr.]. An overflowing. **R. de la vessie,** or *R. urinaire,* involuntary urination; incontinence of urine.

Regression (*re-gresh'-un*) [*regressio*, regression]. Retrogression.

Regressive (*re-gres'-iv*) [*regredi*, to go back]. Passing back; returning.



Regressus (*re-gres'-us*) [*p. p.* of *regredi*, to go back]. In biology, the change of an organ from a higher to a lower type.

Regrowth (*re-grōth'*) [*re*, again; ME., *growen*, to grow]. A growing again; a new or second growth.

Regular (*reg'-u-lar*) [*regularis; regula*, a rule]. According to rule, custom, or normal procedure; opposed to irregular or exceptional. In biology, applied to symmetrically disposed parts or organs; specifically to a flower that has all the parts of each floral circle uniform in shape and size. Having normal menstruation. **R. Physician,** one of the school of scientific medicine who adheres to no clique, sect, "-pathy," or "-ism."

Regulator (*reg'-u-la-tor*) [*regulare*, to direct]. The person or the thing that regulates. **R. radii.** See *Supinator longus* in *Muscles, Table of.*

Regurgitation (*re-ger-jit-a'-shun*) [*regurgitatio; re*, again; *gurgitare*, to engulf]. An eructation, flowing,

IRREGULAR PULSE OF MITRAL REGURGITATION.

or throwing back of the contents of a canal or vessel. **R., Cardiac.** See *Heart-murmurs.* **R. of Food,** a symptom of acid dyspepsia.

Rehmannia (*ra-man'-e-ah*). A genus of the *Digitaleæ.* **R. chinensis,** a plant the root of which is used in China as a tonic and alterative. **R. lutea,** a plant used in the same manner as *R. chinensis.*

Reichert's Cartilage. That cartilaginous structure which appears in the embryo on the hyoid arch, eventually becoming the styloid process, the stylo-hyoid ligaments, and the lesser cornu of the hyoid bone. **R.'s Membrane,** the anterior layer of the cornea, also called *Bowman's Membrane.* See *Membrane.*

Reichmann's Disease. A chronic disease of the stomach characterized by a condition of permanent gastric hypersecretion, associated with marked dilatation of the stomach, with thickening of its walls and hypertrophy of the glands. It is accompanied by violent attacks of pain that are typical of the disease, together with vomiting, and is usually followed by the formation of a round ulcer on the wall of the stomach. See *Diseases, Table of.* **R.'s Test-breakfast,** a breakfast composed of 30 grams of meat-powder, 2 grams of salt, 200 grams of water, 1 wheaten roll. It is used in testing the digestive power of the stomach.

Reid's Base Line. See *Lines, Table of.* **R.'s Method,** to determine the position of the fissure of Rolando; a method of cerebral localization; a base line is drawn from the infraorbital ridge through the middle of the external auditory meatus. To this two perpendicular lines are drawn, one through the depression in front of the external auditory meatus, and the other at the posterior border of the mastoid process; a diagonal line from the upper extremity of the posterior line, drawn to the junction of the anterior line with the fissure of Sylvius, indicates the fissure of Rolando. See *Treatment, Methods of.*

Reil, Ansa of. The lemniscus. See *Ansa.* **R.'s Band,** a fibrous band extending across the right ventricle of the heart from the base of the anterior papillary muscle to the septum. It is quite common in man and corresponds to the moderator band of the heart of some lower animals. See *Moderator.* **R., Fissure of.** See *Fissures, Table of.* **R., Island of.** See *Island of Reil.*

Reimplantation (*re-im-plan-ta'-shun*) [*reimplantare*, implant again]. In dental surgery, the replacing of a drawn tooth within its socket.

Reindeer Moss. See *Cladonea.*

Re-infection (*re-in-fek'-shun*) [*re*, again; *inficere*, to infect]. Infection a second time with the same virus or contagium.

Re-inflame (*re-in-flām'*) [*re*, again; *inflammare*, to inflame]. To inflame anew.

Reinforcement (*re-in-fors'-ment*) [OF., *reinforcer*, to strengthen]. The act of reinforcing. Any augmentation of force. **R. of Reflexes,** increased myotatic irritability (or reflex response) when muscular or mental actions are synchronously carried out, or other stimuli are coincidently brought to bear upon other parts of the body than that concerned in the reflex arc. It has been asserted that the synchronous act of winking increases the knee-jerk, or patellar tendon-reflex. See *Reflexes, Table of.*

Reinfusion (*re-in-fu'-zhun*). Same as *Refusion, q. v.*

Reinoculation (*re-in-ok-u-la'-shun*) [*re*, again; *inoculare*, to inoculate]. Inoculation a second time.

Reins (*rānz*) [*ren*, kidney]. The kidneys; the loins.

Reinsch's Test. See *Tests, Table of.*

Reinversion (*re-in-ver'-zhun*) [*re*, again; *invertere*, to turn upside down]. The act of reducing an inverted uterus by the application of pressure to the fundus.

Reiset's Method. A method of estimating CO_2 in the air. See *Ventilation.*

Reissner, Canal of. See *Canal.* **R.'s Membrane,** an extremely fragile membrane forming the vestibular wall of the cochlear duct and separating the duct from the *scala vestibuli.* It begins on the vestibular border of the *lamina spiralis,* about 0.2 mm. inside the free edge of the crista, and extends at an angle of about

orty-five degrees until it meets the outer bony wall. t consists of three layers, a central connective tissue tratum, the vestibular endothelium on one side, and ne epithelium of the cochlear duct on the other.

ectamenta (*re-jek-tam-en'-tah*) [*rejectare*, to throw way]. Ejecta; excrement.

uvenescence (*re-ju-ven-es'-ens*) [*re*, again; *juvenescere*, to grow young]. In biology: 1. Literally, the rowing young again; a renewal of strength and vigor. A process first described by A. Braun in which ne whole protoplasm of a vegetative cell is transrmed into a primordial cell, which in time becomes vested with a cell-wall and develops a new plant, as (*Eugonium*. "We may regard the idea of rejunescence as presented by Braun as an extension of e idea of metamorphosis, in which extended form it adapted to take in even the results of the cell-eory, of the history of development, and of the dern knowledge of the cryptogams from the alistic point of view." (Sachs.)

chement (*ra-lash'-mon(g)'*) [Fr.]. Same as *Relaxion*.

pse (*re-laps'*) [*re*, again; *labi*, *lapsus*, to fall]. e return or recurrence of a disease during convacence, or shortly afterward.

psed (*re-lapst'*) [*re*, back; *labi*, to slip]. Rened; slipped back. **R. Club-foot**, the occurce of deformity after tenotomy, making the condia difficult of further treatment.

psing (*re-lap'-sing*) [*re*, back; *labi*, to slip]. In hology, returning to a morbid condition from ich there had been partial or complete recovery. **R. ver**, or *Famine Fever*, a specific infectious dise caused by the spirocheta of Obermeier, charerized by definite febrile paroxysms which usuv last six days, and are followed by a remisn of about the same length of time, then by a nd paroxysm, which may be repeated three or r times, whence the name relapsing fever. (Osler.)

tion (*re-la'-shun*) [*relatio*]. 1. Interdependence; ual influence or connection between organs or s. 2. Connection by consanguinity; kinship.

xant (*re-laks'-ant*) [*relaxare*, to loosen]. Any edy or agent that diminishes tension.

xation (*re-laks-a'-shun*) [*relaxatio*]. A diminuof tension in an organ or a part. Also, a conn of languor. **R. of the Pelvic Joints**, inased mobility and softening of the pelvic joints urring in pregnancy, giving rise to pain in the bs, joints, and lumbar region, and difficulty in king.

ative (*re-laks'-at-iv*). Same as *Laxative*.

iæ (*re-lik'-we-e*) [L., leavings, remains, remns]. In biology, persistent parts of a flower which r the ripened ovary; dry and withered leaves h remain upon the stems of some plants. Same as *reliquiæ*.

k, Band of. See *Axis-cylinder of Purkinje*. **Contractions**, so-called diplegic contractions ionally seen in progressive muscular atrophy n an electric current is applied. The positive elecde is placed above and the negative below the fifth cal vertebra, the contractions occurring on the opposite to the anode. **R.'s Fibers**, non-medullongitudinally fibrillated, sometimes branching ylinders, surrounded by a delicate, structureelastic neurilemma, or primitive sheath; abundsympathetic and olfactory nerves, they constitute e nerves of the embryo and of many invertes. See *Nerve-fibers*. **R.'s Ganglion**, a ganglion rve-cells in the sinus venosus of the frog's heart. See *Ganglia, Table of*.

Remasticate (*re-mas'-tik-āt*) [*re*, again; *masticare*, to chew]. To ruminate; to chew again.

Remastication (*re-mas-tik-a'-shun*) [*re*, again; *masticare*, to chew]. Rumination.

Remedial (*re-me'-de-al*) [*remedium*, a remedy]. Having the nature of a remedy.

Remedy (*rem'-ed-e*) [*remedium*]. Any agent or substance used in the treatment of disease. It may be curative, palliative, or preventive.

Remex (*re'-meks*) [*remex*, a rower: *pl.*, *Remiges*]. In biology, one of the remiges or large quill-feathers (flight-feathers) of a bird's wing.

Remigial (*re-mij'-e-al*) [*remex*, a rower]. Of or pertaining to a remex.

Remijia (*re-mij'-e-ah*) [after *Remijō*, a Spanish surgeon]. A genus of rubiaceous shrubs and trees. **R. pedunculata** and **R. purdiana** afford cuprea-bark, and are important as sources of quinin and other cinchona salts. The genus is closely related to *Cinchona*. Unof.

Remiped (*rem'-ip-ed*) [*remus*, oar; *pes*, foot]. In biology, having oar-shaped feet.

Remission (*re-mish'-un*) [*remissio*]. Temporary abatement or subsidence. The period of diminution of a paroxysmal disease, especially that of remittent fever.

Remittent (*re-mit'-ent*). Characterized by alternate periods of increment and cessation. **R. Fever**, a malarial fever characterized by periods of remission and exacerbation, but without periods of complete apyrexia.

Ren [L.: *pl.*, *Renes*]. The kidney. **R. amyloideus**, amyloid degeneration of the kidneys. **R. mobilis**, *Movable Kidney*, *q. v.* **R. unguiformis.** See *Horse-shoe Kidney*.

Renal (*re'-nal*) [*renalis; ren*, a kidney]. Pertaining to the kidneys. **R. Apoplexy**, ischuria, or suppression of urine from hemorrhage into the substance of the kidney or other renal lesion. **R. Calculus**, any concretion in the kidney. **R. Glands**, the suprarenal capsules. **R. Inadequacy**, that peculiar condition in which the amount of urinary solids, and often the quantity of urine itself, is considerably diminished. It is probably due to an exhausted condition of the epithelial cells of the kidney. **R. Storm**, Murchison's term for a peculiar form of neurosal attack referred to the kidney, frequently seen in patients suffering from aortic regurgitation. There is sudden excruciating pain over the region of the kidney, like renal colic, but without nausea or retraction of the testicle, and with the passage of normal urine. In a few hours the pain passes off as suddenly as it appeared.

Renascence (*re-nas'-ens*) [*renascen*, new-born]. In biology, a new birth, a rejuvenescence. (Same as and preferable to *renaissance*.)

Renascent (*re-nas'-ent*) [*renascen*, *p. p.* of *renasci*, be born again]. In biology, reproduced, revivified, coming into being a second time.

Renculin (*ren'-ku-lin*) [*ren*, kidney]. An albuminoid reported to have been found in the supra-renal capsules.

Renculus (*ren'-ku-lus*). See *Reniculus*.

Rendle's Inhaler. See *Anesthetic*.

Renealmia (*ren-e-al'-me-ah*). A genus of zingiberaceous plants. **R. exaltata**, of South America, is emetic, diuretic, diaphoretic, and stimulant. The leaves and bruised root-stalk are applied externally for rheumatism. Unof.

Renicapsular (*ren-ik-ap'-su-lar*) [*ren*, kidney; *capsula*, capsule]. Pertaining to a renicapsule.

Renicapsule (*ren-ik-ap'-sūl*) [*ren*, kidney; *capsula*, capsule]. A suprarenal capsule; an adrenal.

Renicardiac (*ren-ik-ar'-de ak*) [*ren*, kidney; καρδία, heart]. Pertaining to the renal and cardiac organs of a mollusc.

Reniculus (*ren-ik'-u-lus*) [L., dim. of *ren*, kidney]. A lobule of the kidney; renculus.

Renifleurs (*ren'-if-lürz*). See *Passivism.*

Reniform (*ren'-if-orm*) [*ren*, kidney; *forma*, form]. In biology, kidney-shaped.

Reniglandular (*ren-ig-lan'-du-lar*). Same as *Reni-capsular.*

Renin (*ren'-in*). See *Organotherapy.*

Reniportal (*ren-ip-or'-tal*) [*ren*, kidney; *porta*, gate]. Relating to the portal system of the kidney.

Renisexual (*ren-is-eks'-u-al*) [*ren*, kidney; *sexualis*, sexual]. Both renal and sexual.

Renitent (*ren'-it-ent*) [*reniti*, to resist]. Resisting pressure.

Rennet (*ren'-et*) [ME., *renet*, rennet]. The prepared inner membrane of the fourth stomach of a calf, or an infusion of this membrane. It contains a milk-curdling ferment that decomposes the casein. **R.-bag**, in biology, the abomasum, *q. v.*

Rennie's Formula. See *Alimentation, Rectal.*

Rennin (*ren'-in*) [ME., *renet*, rennet]. An enzyme to whose action is due the clotting of milk produced upon the addition of rennet. Nothing is known as to its chemic nature. It is most copiously present in the gastric mucous membrane of the calf, but may be obtained from the walls of the stomach of most animals.

Renninogen (*ren-in'-o-gen*) [ME., *renet*, rennet]. The zymogen whence rennin is formed. It exists in the cells of the mucous membrane of the stomach.

Renovation (*ren-o-va'-shun*) [*renovatio; renovare*, to render new]. The repair or renewal of that which has been impaired.

Renuent (*ren'-u-ent*) [*renuens*, nodding back the head]. In anatomy, throwing back the head; applied to certain muscles.

Renule (*ren'-ūl*) [*ren*, the kidney]. A small kidney.

Repand (*re-pand'*) [*re*, back; *pandus*, bent, crooked]. In biology, applied to a leaf-margin which is toothed like the margin of an umbrella.

Repandodentate (*re-pan-do-den'-tāt*) [*repandus*, bent back; *dens*, tooth]. In biology, repand and toothed.

Repandous (*re-pan'-dus*) [*repandus*, bent back]. Bent upward.

Reparative (*re-par'-at-iv*) [*reparare*, to repair]. Reinstating, or restoring to the normal.

Repatency (*re-pa'-ten-se*) [*re*, again; *patens*, open]. The reopening of a part or vessel. **R. of a Vessel**, after ligation, the reopening of the lumen of a ligated vessel from too rapid absorption of the ligature, or from slipping of the knot.

Repel (*re-pel'*) [*repellere*, to repel]. To drive back; to cause resorption.

Repellent (*re-pel'-ent*) [*repellere*, to repel]. Pertaining to or having the power of acting upon morbid processes to determine or repel them.

Repent (*re'-pent*) [*repere*, to creep]. In biology, creeping, *i.e.*, prostrate and rooting underneath.

Repercolation (*re-per-ko-la'-shun*) [*re*, again; *percolare*, to percolate]. Renewed or repeated percolation; the passage of a percolation over and over again through fresh instalments of the same drug.

Repercussion (*re-per-kush'-un*) [*re*, again; *percutere*, to percuss]. 1. See *Ballottement.* 2. A driving in, or scattering of a tumor or eruption; repellent action.

Repercutient (*re-per-ku'-she-ent*) [*re*, again; *percutere*, to percuss]. Effecting a repercussion; pertaining to a process or function of rebound, or reaction.

Repetition (*rep-e-tish'-un*) [*repetere*, to seek again, repeat]. See *Homotopy.*

Replantation (*re-plan-ta'-shun*) [*replantare*, to plant again]. The act of planting again. **R. of the Teeth**, the replacement of teeth which have been extracted or otherwise removed from their cavities when diseased, the thickened periosteum is scraped before returning such teeth to their sockets.

Repletion (*re-ple'-shun*) [*repletio; replere*, to fill again]. The condition of being full.

Repletory (*re-ple'-tor-e*) [*replere*, to fill again]. Pertaining to repletion.

Replicate (*rep'-lik-āt*) [*replicare*, to fold or bend back]. In biology: (*a*) that mode of vernation in which the apex of the leaf is folded backward to the base; (*b*) applied to wings of insects in which the outer part slides or folds back on the base, or is folded like a fan.

Replication (*rep-lik-a'-shun*) [*replicatio; re*, back; *plica*, a fold]. A refolding or turning back of a part so as to form a duplication.

Replum (*rep'-lum*) [*replum*, a doorcase]. In biology, the frame-like placenta in *Cruciferæ*, certain *Papaveraceæ*, etc., across which the septum is drawn and which persists after the valves have fallen away in dehiscence.

Repose (*re-pōz'*) [*re*, back; *ponere*, to place]. Relaxation. To be at rest.

Reposition (*re-po-zish'-un*) [*repositio*]. Return of abnormally placed part to its proper position. Reduction of hernia, dislocation, etc.

Repositor (*re-poz'-it-or*) [*reponere*, to replace]. An instrument for putting back a presenting foot or prolapsed cord in labor; an instrument used in the replacement of a displaced uterus.

Repoussoir (*ra-poo-swahr'*) [Fr.]. An instrument for extracting the roots of teeth. See *Repulsorium.*

Reprise (*ra-prēz'*) [Fr. "recovery"]. That part of the cry of a child which is heard during the act of inspiration. The loud inspiration in pertussis. The "whoop."

Reproduce (*re-pro-dus'*) [*re*, again; *producere*, to bring forth]. To procreate, or bring forth, offspring.

Reproduction (*re-pro-duk'-shun*) [*reproductio*; again; *producere*, to produce]. The begetting of offspring individuals similar to the parent organism. In biology: (*a*) sexual or asexual generation. Cf. *Abiogenesis, Archigenesis, Biogenesis, Fission, Gemmation, Heterogenesis, Homogenesis, Parthenogenesis, Schizogenesis, Xenogenesis;* (*b*) a conscious repetition of perceived sensations. **R., Asexual**, that without sexual intercourse. **R., Endogenous**, internal cell-formation. **R., Sexual**, that by the union of sexually distinct cells.

Reproductive (*re-pro-duk'-tiv*) [*reproducere*, to reproduce]. Having the functions of, or pertaining to, reproduction. **R. Function**, the power and capacity of begetting. **R. Organs**, the organs employed in the procreation of offspring. **R. Organs, Development of**; the *Primitive Kidneys* or *Wolffian Ducts* or ducts of the pronephros, are the first indication of the urinary and generative apparatus in the fertilized ovum. They appear at the side of the vertebræ from the fifth to the last vertebra. *Müller's Duct*, parallel to the Wolffian duct, unites with it to open into the uro-genital sinus, the other end opening into the abdominal cavity. The Müllerian ducts become the Fallopian tubes, hydatid, uterus, and vagina, in the female, and in the male the lower part becomes the male uterus or vesicula prostatica and the hydatid of Morgagni. The Wolffian body or mesonephros becomes in the female the parovarium (organ of Rosenmüller), or paroöphoron, and round ligament of the uterus; while in the male there are produced from it the vasa efferentia (coni vasculosi), the epididymis of Giraldès and the gubernaculum testis. In the female the Wolffian ducts become the chief tubules of the parovarium and the ducts of Gärtner; in the male

they become the convoluted tubes of the epididymis, the vas deferens, and the vesiculæ seminalis. See, also, *Metanephros*. **R. System**, in biology, all the organs directly or indirectly concerned in generation.

eptation (*rep-ta'-shun*) [*reptatio*, a creeping]. In biology, the act of creeping.

eptatorial, Reptatory (*rep-ta-to'-re-al, rep'-ta-to-re*) [*reptare*, to creep]. In biology, creeping.

eptilian Heart. See *Cor biloculare*.

epugnatorial (*re-pug-nat-o'-re-al*) [*repugnatus, p.p.* of *repugnare*, to fight against, oppose]. In biology, of use in repelling enemies. **R. Pores**, the external openings of cutaneous glands in certain myriapods, from which is discharged a strongly odorous secretion containing prussic acid. Cf. *Stink-glands*, under *Gland*.

epullulate (*re-pul'-u-lāt*) (*re*, again; *pullulare*, to sprout]. To grow again.

epullulation (*re-pul-u-la'-shun*) [*re*, again; *pullulare*, to sprout]. The return of a morbid growth.

epulsion (*re-pul'-shun*) [*repellere*, to repulse]. The influence which two bodies exert upon each other when they tend to increase the distance between them. **R., Capillary**, repulsion due to the forces causing movements of liquids in small tubes.

epulsorium (*re-pul-so'-re-um*) [*repellere*, to drive back]. See *Repoussoir*.

esectio (*re-sek'-she-o*) [L.]. See *Resection*. **R. subperiostialis**, a substitute operation for symphysiotomy suggested by Christoforis. Subperiosteal resection of the ends of the pubic bones on either side of the pubic joint, with the idea of replacement by deposition of bone.

esection (*re-sek'-shun*) [*resectio; resecare*, to cut off]. Excision of a portion of bone, nerve, or other structure.

eserve Air (*re-zerv'*). See *Air*.

eservoir (*rez'-er-vwor*) [*reservoir*, a storehouse]. In biology, a cell, tissue or organ in which assimilated substances are stored up for future use. See *Receptaculum*. **R. of Pecquet.** See *Receptaculum chyli* and *Cistern of Pecquet*.

esident (*rez'-id-ent*) [*residere*, to remain behind]. In biology, not migratory. **R. Physician, House-physician**, a physician residing in a hospital.

esidual Air (*re-zid'-u-al*). See *Air*.

esidue (*rez'-id-u*) [*residuum*, a remnant]. That which remains after a part has been removed. In pharmacy and chemistry, any part remaining after filtration. See also *Radical*.

esiduum (*re-sid'-u-um*). The balance or remainder.

esilience (*re-zil'-e-ens*) [*re*, back; *salire*, to leap]. The quality of being elastic or resilient. The act of springing or leaping back. Healthy reaction.

esilient (*re-zil'-e-ent*) [*re*, back; *salire*, to leap]. Resounding; elastic. **R. Stricture**, one that is not permanently dilatable.

esin (*rez'-in*) [L.; *resina: gen.* and *pl.*, *Resinæ*]. Any member of a class of compounds made by treating the substances from which they are obtained with alcohol and precipitation with water. The precipitate constitutes the resin of pharmacy. There are four official resinæ. 2. Any member of a class of oxidized terpenes. Resins either accompany terpenes in crude essential oils, or occur as exudations from trees. Their hardening on exposure to the air. They are amorphous, mostly vitreous bodies, insoluble in water. They melt at a low heat, are non-volatile, and burn quickly with a smoky flame. They are largely used in the preparation of varnishes, and several are employed in medicine. Resins are divided into (1) *true resins*, (2) *gum-resins*, and (3) *oleo-resins* or *balsams*. The *true resins* are hard, compact products of oxidation, made up chiefly of what are termed "resin acids," which, admixed with fatty acids, are capable of saponifying with alkalies, and yield "resin soaps;" the *gum-resins* differ from the true resins only in containing some gum capable of softening in water; and the *oleo-resins* include the mixtures of essential oils and resin of whatever consistency, and the mixtures of benzoic and cinnamic acid, and salts of these acids. This last class is much the largest of the three. To the first class belong the hard resins, which serve for the manufacture of varnishes, such as copal, dammar, mastic, sandarach, dragons' blood, gum-lac, and amber; to the second class, olibanum or frankincense, myrrh, ammoniacum, asafetida, galbanum, and tragacanth; and to the third class, crude turpentine, benzoin, storax, copaiba, Peru and Tolu balsams. The following table (*Sadtler's Industrial Organic Chemistry*) gives the bromin-absorption, the saponification-equivalent, and the proportions of potash neutralized by the various resins. A classified table of the resins is also appended. **R.-cell**, a cell that secretes resin. **R., Ceratum**, *Basilicon Ointment*, resin 35, yellow wax 15, lard 50 parts. **R., Common**, *Colophony*, *Rosin*, the residue after the distillation of the volatile oil from turpentine. **R.-duct.** Same as *R.-passage*. **R., Emplastrum**, *Resin Plaster*, *Adhesive Plaster*, resin 14, lead plaster 80, yellow wax 6 parts. **R.-flux**, a disease caused by the fungus *Agaricus melleus*, which attacks conifers, giving rise first to an excessive flow of resin, and ultimately to the death of the tree. **R.-gland**, a large cell, or a group of smaller cells, secreting resin. **R.-passage**, an intercellular cavity formed by masses of tissue becoming separated from each other, and whose function it is to secrete resin. **R.-tube.** Same as *R.-passage*. **R., Ung.** (B. P.), used for the same purpose as the plaster or cerate.

TABLE OF RESINS.

I. Copaline or Varnish Resins.

African Copal. Black Dammar.	*Conarium strictum.*
Brazilian Copal.	*Hymenia, and Trachylobium martianum.*
Dammar.	*Hopea robusta, H. micrantha, Conarium strictum.*
East Indian Dammar.	*Dammara orientalis, D. australis, D. vitiensis* ("Mabradra"), *D. obtusa, D. moorii, D. robusta.*
Gum Animé.	
Kaurie, or Coudie Resin.	*Dammara australis.*
Lac.	*Schleichera trijuga, Croton lacciferum, C. draco.*
Mastic.	*Pistacia lentiscus.*
Mexican Copal.	*Hymenea*
Piney Resin, or White Dammar.	*Vateria indica and V. acuminata.*
Sal Dammar.	*Shorea robusta et al.*
Sandarach.	*Callitris quadrivalvis.*

II. Soft Resins, or Oleo-resins.

Balsam of Canada.	*Abies canadensis.*
Brazilian Elemi.	*Icica icicariba.*
Chian Turpentine.	*Pistacia terebinthus.*
Frankincense.	*Pinus halepensis, Boswellia carteri, B. frereana, B. thusifera.*
Manila Elemi.	*Conarium commune.*
Mexican Elemi.	*Amyris elemifera.*
Riga Balsam.	*Pinus cembra.*
Tacamahac (American).	*Elephrium tomentosum.*
Tacamahac (Curaca).	*Fagara octandra.*
Tacamahac (East Indian).	*Calophyllum inophyllum.*
Turpentine.	*Abies balsamifera, Pinus palustris,* etc.
Turpentine (Venetian).	*Larix europæa*
Wood Oil.	*Dipterocarpus turbinatus.*

TABLE OF RESINS.—*Continued.*

III. Fragrant Oleo-resins and Gum-resins.

Balsam of Gilead, or Mecca Balsam.	*Balsamodendron perryi, B. opobalsamum* and *Amyris gileadensis.*
Balsam of Peru.	*Myrospermum peruiferum.*
Balsam of Tolu.	*Myrospermum toluiferum.*
Bdellium, or Grogul.	*Balsamodendron roxburghii.*
Benzoin.	*Styrax benzoin and balsamodendron Mukul.*
Labdanum, or Ladanum.	*Cistus creticus var. labdaniferus*
Liquid Storax.	*Liquidambar orientalis.*
Myrrh.	*Balsamodendron myrrha.*
Olibanum, or Frankincense.	*Boswellia carteri, B. serrata, Juniperus lycia.*
Solid Styrax.	*Styrax officinalis.*
West Indian Balsam.	*Clusia multiflora, C. grandiflora, C. insignis.*

IV. Fetid Gum-resins.

Ammoniacum.	*Dorema ammoniacum.*
Asafetida.	*Ferula narthex and F. scorodosma.*
Galbanum.	*Ferula galbanifera and F. rubricaulis.*
Opoponax.	*Opoponax chironium.*
Sagapenum.	*Ferula*
Sarcocol.	*Penea sarcocolla, P. mucronata.*

V. Medicinal Resins.

Balsam of Copaiba.	*Copaifera officinalis, C. multijuga,* etc.
Euphorbium.	*Euphorbia resinifera.*
Gamboge.	*Garcinia.*
Guaiacum.	*Guaiacum officinale.*

VI. Extract-resins.

Churrus.	*Cannabis sativa*
Cubeb Resin.	*Cubeba officinalis.*
Jalap Resin.	*Ipomea jalapa.*
Podophyllum Resin.	*Podophyllum peltatum.*
Scammony.	*Convolvulus scammonia.*

Kind of Resin.	KOH Neutralized per Cent.	Saponification-Equivalent.	Bromin-Absorption.	Hydrobromic Acid Formed.
Amber,	16.1	347.6	53.5	Some.
Animé,	9.5	585.5	60.2	Much.
Benzoin,	22.3	256.0	38.9	Some.
Copal,	12.4	450.8	89.9	Much.
Copal (reduced to ¾ by boiling),	12.9	433.4	84.5	Much.
Dammar,	5.2	1068.1	117.9	Much.
Elemi,	3.3	1697.9	122.2	Very much.
Gamboge,	15.5	361.1	71.6	Much.
Kauri,	12.9	433.4	108.2	. . . .
Mastic,	11.7	478.6	124.3	Much.
Rosin (refined),	18.1	308.6	112.7	. . . .
Sandarach,	16.4	340.6	96.4	Very much.
Shellac,	23.0	242.7	5.2	. . . .
Shellac (bleached),	18.2	306.9	4.6	. . . .
Thus,	21.0	340.6	108.5	. . . .

Resina (*rez-i'-nah*) [L.]. A resin. **R. lutea.** See *Acaroides.*

Resinaceous (*rez-in-a'-she-us*) [*resina*, resin]. Having the qualities of resin.

Resiniferous (*rez-in-if'-er-us*) [*resina*, resin; *ferre*, t bear]. Producing resin.

Resiniform (*rez'-in-if-orm*). Same as *Resinoid.*

Resinoid (*rez'-in-oid'*) [*resina*, a resin; εἰδος, like]. Resembling a resin. 2. A substance which has som of the properties of a resin. Most of the so-calle resinoids are of indefinite chemic composition; othe are impure resins.

Resinous (*rez'-in-us*) [*resina*, a resin]. Having th nature of a resin.

Resistance (*re-zis'-tans*) [*resistare*, to withstand]. I electricity, the opposition offered by a conductor to th passage of the current. It is estimated in ohms. Se *Ohm.* **R., Essential,** the resistance to conductio within the battery itself. **R., Extraordinary,** th resistance to conduction outside of the battery.

Resolution (*rez-o-lu'-shun*) [*resolvere*, to resolve]. quick improvement in the course of a febrile diseas See *Crisis.* **R. of Anesthesia,** the condition wh muscular and nervous reactions are permanentl absent. Complete anesthesia. **R. of Inflammatio** the return of tissues implicated in the inflammato process to their normal condition.

Resolvent (*re-zol'-vent*) [*resolvere*, to dissolve]. Th which causes solution or dissipation of tissue. discutient.

Resolving (*re-zol'-ving*) [*resolvere*, to dissolve]. Cau ing solution or dissipation of tissue. **R. Power,** t power of a microscopic objective to show small part

Resonance (*rez'-o-nans*) [*re*, again; *sonare*, to sound The peculiar quality given to sounds by their reverbe ation and modification by the resonance-organs, or t the morbid conditions of the chest in auscultation. R **Amphoric,** a variety of tympanitic resonance having metallic quality. **R., Bell-metal,** a bell-like sou heard on auscultation in pneumothorax when the che is percussed with two coins used as plexor and plexi ter. **R., Cough,** a sound heard on auscultation duri the act of coughing. **R., Cracked-pot,** a variety of ty panitic resonance elicited by percussing over a pulmo ary cavity communicating with a bronchus. R **organs,** the supra-laryngeal cavities that modify th quality of vocal sounds. **R., Skodaic.** See *Sko Tympany.* **R., Tympanic,** resonance elicited on pe cussion over the intestines and over large lung-caviti with thin, yielding walls. **R., Vesicular,** the norm pulmonary note. **R., Vesiculo-tympanitic,** an a mixture of vesicular and tympanitic resonance. R **Vocal,** the sound heard on auscultation of the che during ordinary speech. **R., Whispering,** the sou heard on auscultation of the chest during the act whispering.

Resonant (*rez'-o-nant*) [*resonans*, resounding]. Sounding or ringing in the nasal passages. 2. A sonant or nasal sound. See *Consonant.*

Resonator (*rez'-o-na-tor*) [*re*, again; *sonare*, to soun An instrument used to intensify sounds. See *Re nance-organs.*

Resopyrin (*rez-o-pi'-rin*) [*resina*, resin; *orcin*; πῦ fire]. A compound of resorcin and antipyrin. physiologic and therapeutic actions of this body are undetermined. Unof.

Resorcin (*re-zor'-sin*) [*resina*, resin; *Oreus*, Plu $C_6H_4(OH)_2$. *Resorcinol;* a substance produced f different resins, and from umbelliferous gum-resins fusion with caustic potash. It is isomeric with hydr quinone. It crystallizes in colorless rhombic prism plates, melts at 118° C., and boils at 276° C. It rembles carbolic acid in many of its properties: odorless, antiseptic, and a powerful germicide. I valuable chiefly as an antipyretic, in malarial feve and locally as a lotion in diphtheria. Dose gr. v-x

as an antipyretic, ʒj. It is readily soluble in water, alcohol, and ether. In dyeing it yields a fine purple-red coloring-matter, and several other dyes of commercial importance. **R. Colors.** See *Pigments, Conspectus of.*

resorcinal (*re-zor'-sin-al*). See *Resorcin.* **R. Yellow.** See *Pigments, Conspectus of.*

resorcinism (*re-zor'-sin-izm*) [*resina*, resin; *Orcus*, Pluto]. A toxic condition caused by injudicious or excessive use of resorcin.

resorcinum (*re zor'-sin-um*) [L.: *gen.*, *Resorcini*]. The official name of resorcin, *q. v.*

resorption (*re-sorp'-shun*) [*resorptio; re*, again; *sorbere*, to absorb]. The absorption of morbid deposits, as of the products of inflammation, exudations, etc. **R., Lacunar** (*of bone*), resorption of bone by osteoclasts forming and occupying Howship's lacunæ. **Resorptions-diabetes** (Ger.), a glycosuria due to absorption of sugar.

respiratio (*res-pe-ra'-she-o*) [L.]. Respiration. **R. difficilis.** Synonym of *Dyspnea.*

respiration (*res-pe-ra'-shun*) [*respiratio; respirare*, to breathe again]. The inspiration and expiration of air through the lungs. In biology, the continuous interchange between the gases of living organisms and the gases of the medium in which they live, continuous throughout life. This consists in all active cells in plants of a constant absorption of the oxygen of the air into the tissues, where it causes oxidation of the assimilated substances and the release of carbon dioxid. The movements of protoplasm are dependent upon respiration. It is the opposite of *assimilation.* **R., Abdominal,** respiration caused by the contraction of the diaphragm and the elasticity of the abdominal walls and viscera. It is more common in men than in women. **R., Aërial,** respiration in which the respiratory membrane receives oxygen and is relieved of carbon dioxid by means of atmospheric air. **R., Amphoric,** a blowing respiration engendered in large cavities with firm walls. Its peculiar character is due to an echo from the walls of the cavity. **R., Aquatic,** respiration in which the respiratory membrane, the branchial mucosa (gills), the skin, etc., receive oxygen and are relieved of carbon dioxid by means of water. **R., Artificial,** artificial production of the normal respiratory movements. See *Artificial Respiration.* **R., Biot's,** periodic respirations without any variation in the extent of the individual respirations. It occurs normally during sleep. **R., Blood,** the giving off of carbon dioxid and taking up of oxygen by the blood during its passage through the lungs. The blood while passing through the capillaries gives up its oxygen to the tissues and takes up carbon dioxid. **R., Blowing.** See *R., Bronchial.* **R., Branchial,** respiration by means of gills or branchiæ, as in aquatic animals. **R., Bronchial,** respiration as heard over the trachea or bronchial tubes in health; it is high in pitch, equal in inspiration and expiration, blowing in character, especially the expiratory element, and is marked by a brief pause between inspiration and expiration. It is well defined only in case of pulmonary consolidation. **R., Broncho-cavernous,** a form intermediate in character between bronchial and cavernous respiration. **R., Broncho-vesicular,** respiration having the characters of both bronchial and vesicular respiration. It is heard over areas of consolidation surrounded by patches of healthy lung-tissue. **R., Buccal.** See *Mouth-breathing.* **R., Cavernous,** a blowing respiration of low pitch, circumscribed, alternating with gurgling, and deriving its chief character from the nature of the cavity in which it is generated. **R., Center of,** the nervous center regulating the act of respiration is situated in the floor of the fourth ventricle near the point of the calamus. It is automatic in its action. **R., Cerebral,** respiration in which the lips are closed, the cheeks distended, the nostrils dilate with each expiration, which is attended with a puffing sound; the respirations are irregular. It is observed especially in typhus fever and in apoplexy. **R., Cheyne-Stokes,** a peculiar type of breathing in which there is a rhythmic increase of the respirations up to a certain degree of rapidity, then gradually decreasing again to temporary cessation. This pause may be as long as half a minute. This form of respiration is most commonly seen in the late stages of tuberculous meningitis, but it may also be noted in apoplexy, fatty degeneration of the heart, and nephritis with uremia. **R., Clavicular,** a form resorted to by singers and in which the clavicle is brought into play in the respiratory movements, the shoulders being elevated. **R., Cogged** or **Cogwheel.** See *R., Interrupted.* **R., Costal,** respiration in which the chest-movement predominates over the diaphragmatic movement. It is seen especially in women, and is supposed to be related to gestation or perhaps partially to the mode of dress. **R., Costo-inferior,** respiration in which the elevation and depression (respiratory movements) are confined chiefly to the lower ribs. It is best seen in dogs. **R., Costo-superior,** respiration in which the respiratory movements involve chiefly the upper ribs. It is most common in women. **R., Cutaneous,** the giving off of carbon dioxid and taking up of oxygen through the skin. **R., Diaphragmatic.** See *R., Abdominal.* **R., Direct,** respiration in which the living substance of an organism, as an ameba, takes oxygen directly from the surrounding medium and returns carbon dioxid directly to it, no respiratory blood being present. **R., Divided,** respiration in which there exists a distinct interval between inspiration and expiration. It is seen in emphysema as a result of the distention of the air-vesicles and consequent reduction in expelling force. **R., Exaggerated,** an increase in intensity, without alteration in character or rhythm of the respiratory movements. **R., External.** See *R., Blood.* **R., Extrinsic** (*of F. Hewitt*), the inspiration and immediate expiration of a gas, so that a portion that has once been inspired is not inspired again. **R., Facial,** a term applied to all the movements of the face during inspiration and expiration. **R., Feeble,** diminution in the intensity, without alteration in the character or rhythm of the respiratory movements. **R., Fetal,** the interchange of gases between the fetal and the maternal blood through the medium of the placenta. **R., Forced,** respiration induced by blowing air into the lungs by means of a bellows, or in some other way, as in physiologic experiments. **R., Harsh.** See *R., Broncho-vesicular.* **R., Hissing,** an increased vesicular murmur causing a hissing sound. **R., Hollow.** See *R., Amphoric.* **R., Indeterminate,** the most pronounced vesicular grade of broncho-vesicular respiration. **R., Indirect,** respiration in which the living substance of the organism, as in all the higher animals, gets rid of carbon dioxid and obtains oxygen by means of a circulating respiratory blood. **R., Inner** or **Internal,** the taking up of oxygen and giving off of carbon dioxid by the body-elements for their own requirements. It occurs in man in the capillary system. **R., Interrupted,** respiration in which either inspiration or expiration is divided into two or more parts. It is most often heard at the apex of the right lung, anteriorly. **R., Intestinal,** the interchange of respiratory gases in the mucous membrane of the intestines. **R., Intra-uterine,** respiration by the fetus before delivery. **R., Intrinsic** (*of F. Hewitt*), the

breathing over and over again of a limited volume of gas. **R., Jerking.** See *R., Interrupted.* **R., Labored,** respiration in which, owing to lack of ability on the part of the ordinary muscles of respiration to sufficiently aërate the blood, the auxiliary muscles of respiration are called into play. **R., Laryngeal,** the widening of the glottis during inspiration and its narrowing during expiration. **R., Lung.** See *R., Pulmonary.* **R., Metamorphosing** (*of Seitz*), respiration in which the first part of the inspiratory sound is tubular and the last part cavernous; a cavernous element is also heard during expiration. It is a certain sign of a cavity (Vierordt). **R., Muscle,** respiration by a muscle when in action. **R., Nasal,** nose-breathing. **R., Nervous.** See *R., Cerebral.* **R., Normal,** respiration as it occurs in a normal individual in a state of rest or moderate action. **R., Oral.** See *Mouth-breathing.* **R., Ordinary.** See *R., Normal.* **R., Organs of,** any parts of the body by means of which certain constituents of the blood are exchanged for those of the surrounding air or water. **R., Pharyngeal** (*of Garland*), rhythmic expansions and contractions of the pharnyx in connection with other movements of respiration. The expansion is pre-inspiratory and the contraction inspiratory. **R., Placental.** See *R., Fetal.* **R., Puerile.** See *R., Exaggerated.* **R., Pulmonary,** respiration in which the interchange of gas between the blood and air occurs in the lungs. **R., Rough,** a variety of broncho-vesicular respiration. **R., Rude.** See *R., Rough.* **R., Senile,** the feeble respiration of old age. **R., Sighing,** deep respiration accompanied with sighing. It is seen in pulmonary congestion and dyspepsia. **R., Stertorous,** the sound produced by breathing through the nose and mouth at the same time, causing vibration of the velum pendulum palati between the two currents of air. **R., Subsibilant** (*of Laennec*), a dull, whistling sound heard over the bronchi, and due to an obstruction by mucus. **R., Superficial.** See *R., Blood.* **R., Supplementary.** See *R., Exaggerated.* **R., Thoracic.** See *R., Costal.* **R., Tissue.** See *R., Internal.* **R., To-and-fro.** See *R., Intrinsic.* **R., Tracheal,** the respiratory murmur heard in a normal individual by placing a stethoscope over the supra-sternal fossa. **R., Tranquil.** See *R., Normal.* **R., Tubular.** See *R., Bronchial.* **R., Uremic.** See *R., Cheyne-Stokes.* **R., Vaginal,** the movements of the vagina caused by the movements of the diaphragm in respiration. **R., Ventral.** See *R., Abdominal.* **R., Vesicular,** a soft, gradual, low-pitched inspiration immediately followed by a shorter and less distinct expiration-sound heard over the normal lung during respiration. **R., Vesiculo-bronchial.** See *R., Broncho-vesicular.* **R., Wavy.** See *R., Interrupted.*

Respirative (*res-pi'-rat-iv*) [*respirare*, to respire]. Performing respiration.

Respirator (*res-pe-ra'-tor*) [*respirare*, to respire]. An instrument through which one breathes to modify the coldness of the air or to exclude its impurities, or for the inhalation of volatile medicaments. **R.-veil,** a muffler for women, devised by Lennox Browne. It consists of a piece of plain veiling with a double thickness of silk gossamer on the lower four inches. The part that covers the mouth and nostrils is stiffened with a layer of thin wire gauze, so that the veil may stand a little away from the face and be more comfortable.

Respiratorium (*res-pe-ra-to'-re-um*) [*respirare*, to respire, to breathe out: *pl.*, *Respiratoria*]. In biology, one of the delicate folds of the integument of the aquatic larvæ of certain insects, richly supplied with minute tracheæ.

Respiratory (*res'-pe-ra-to-re*) [*respiratorius*]. Pertaining to respiration. Also, to the murmur heard upon auscultation over the lungs of a healthy person during ordinary breathing. **R. Blood,** Huxley's name for the fluid present in the pseudo-hemal system of vessels of certain invertebrates (*Annelida*). It contains a dissolved red substance allied to hemoglobin. **R. Capacity,** the capacity of the blood for taking up oxygen in the respiratory organs and depositing it in the tissues, and of taking up carbon dioxid from the tissues and giving it off in the respiratory organs. **R. Cavity,** the same as the thoracic cavity; also used as a general term to describe the air-passages. **R. Chamber,** a respiratory cavity. **R. Filaments,** thread-like organs arranged in tufts near the head of the larva of the gnat. **R. Glottis,** that part of the glottis between the arytenoid cartilages. **R. Leaflets,** the laminated organs of respiration of the pulmonary arachnidans. **R. Murmur,** the sound produced by the air entering and escaping from the lungs during the respiratory period. **R. Nerve,** one of two nerves involved in respiration. The *external* is the posterior thoracic nerve; the *internal*, the phrenic nerve. **R. Nerve** (*of the Face*), the facial nerve. **R. Nerves** (*of Bell*), the *Phrenic*, *Posterior Thoracic*, and *Facial Nerves*. **R. Orifice,** a breathing pore. **R. Percussion,** Da Costa's term for the method of physical examination by noting the sound elicited by percussion of the chest while the breath is held after a full inspiration, and also after a prolonged expiration. **R. Periods,** the time elapsing between the beginning of one inspiration and that of the next. **R. Pigments,** a series of pigments discovered by McMunn, Moseley, Krukenberg, and others in the fluids and tissues of many plants and animals. They are capable of existing in a state of oxidization and reduction, and play an important rôle in the function of respiration. See *Pigment. Conspectus of.* **R. Plate.** See *Respiratorium.* **R. Portion of the Nose,** the lower portion of the nasal cavity. **R. Pulse,** the modifications in the pulse produced by respiration. **R. Quotient,** the ratio between the amount of oxygen given off by the lungs and that taken up by them in the same period of time. **R. Sac,** a sac-like respiratory organ of various animals. **R. Sound.** See *R. Murmur.* **R. Surface,** the entire surface of pulmonary tissue coming in contact with the respired air. **R. Tract,** a term descriptive of the sum of the air-passages. **R. Tube,** a term applied to all tubular organs of respiration. **R. Vesicular Murmur,** the normal respiratory murmur. See *Respiration, Normal.*

Respire (*re-spīr'*) [*re*, back; *spirare*, to breathe]. To breathe.

Respirometer (*res-pi-rom'-et-er*) [*respirare*, to breath; μέτρον, measure]. An instrument for ascertaining the condition of the respiration. Also, the apparatus used to supply air to a diver under water by supplying compressed oxygen, which is made to combine in proper proportion with nitrogen chemically filtered from the air expired from the lungs.

Responsibility (*re-spon-sib-il'-it-e*) [*respondere*, to answer]. In medical jurisprudence, the accountability of a person for an act committed. It usually turns upon the question as to whether or not the person was of sound mind and capable of controlling his actions and thoughts.

Resserrement (*res-air-mon(g)'*) [Fr.]. Constriction, constipation.

Rest [ME., *resten*, to rest]. Cessation of all motion, labor or action; to sleep, to lie dormant. **R. of Roy**[illegible] an epithelial formation arising either early, during

development of the embryo or accidentally during later life and apparently left over from the formation of a part or organ. Thus the remains of the craniopharyngeal, lingual, and neural canals are in adult life observed in the lines of old incisions. **R.-cure**, the mode of treatment of patients suffering from hysteria and neurasthenia, as suggested by Weir Mitchell. It consists in (1) rest, (2) isolation, (3) systematic feeding, (4) massage, and (5) electricity. The electricity is the least important factor in the system of treatment. The duration of the treatment should never be under six weeks, and usually should continue for ten or twelve weeks.

Restant (*res'-tant*) [Fr., *restant*, remain]. In biology, remaining; of leaves, remaining on the plant over winter; of a corolla or calyx, remaining unwithered till the fruit ripens.

Restaurans (*res'-taw-rans*) [*restaurare*, to restore]. Restorative, tonic.

Restibrachial (*res-tib-ra'-ke-al*) [*restis*, a rope; *brachium*, an arm]. Pertaining to the restibrachium.

Restibrachium (*res-tib-ra'-ke-um*) [*restis*, a rope; *brachium*, an arm]. The inferior peduncles of the cerebellum; the myelobrachium.

Restiform (*res'-tif-orm*) [*restis*, a cord; *forma*, form]. Corded or cord-like. **R. Bodies**, a descriptive term applied to certain cord-like bodies or processes of the medulla oblongata.

Resting (*rest'-ing*) [ME., *resten*, to rest]. Ceasing from motion; at rest. **R.-cell.** Same as *R.-spore*. **R.-sporangium**, in biology, Pringsheim's term for peculiar resting-cells formed by the mycele of a few fungi (*e. g.*, *Saprolegnia*), in which zoöspores are produced. **R.-spore**, in biology, a spore invested with a firm cell-wall, which remains dormant for a period, often during the whole winter, before it germinates. **R.-stage**, in biology, the period of dormancy in the history of a plant or germ. **R.-state**, in biology, a state of suspended activity, the condition of perennial plants, bulbs, seeds, and spores during their period of dormancy.

Restis (*res'-tis*) [L., a cord]. A name given to the restiform body.

Restitution (*res-tit-u'-shun*) [*restituere*, to set up again]. The act of restoring to a previous condition. See *Rotation*.

Restoration (*res-tor-a'-shun*) [*restaurare*, to restore]. The renewal of or return to a state of health.

Restorative (*re-stor'-at-iv*) [L., *restaurare*, to restore]. 1. Renewing health and vigor. 2. A medicine, cordial, or food that is efficacious in restoring one to health and vigor.

Restraint (*re-strānt'*) [*restringere*, to draw back]. 1. Hindrance of any action, physical, moral, or mental. 2. The state of being controlled; specifically, abridgement of liberty in the care of the insane. **R.-bed** and **R.-chair.** See *R., Mechanical.* **R., Mechanical**, restraining the insane by mechanical means. **R., Medicinal**, the use of narcotics and sedatives in quieting the insane.

Restringent (*re-strin'-gent*) [*restringere*, to restrain]. An astringent or styptic.

Resublimation (*re-sub-lim-a'-shun*) [*re*, again; *sublimare*, to raise on high]. The process of subliming a drug for the second time.

Resudation (*re-su-da'-shun*) [*re*, again; *sudor*, sweat; *resudare*, sweat again]. A renewed sweating; the return of sweating as a symptom.

Resupinate (*re-su'-pin-āt*) [*re*, again; *supinare*, to bend backward]. Turned in a direction directly opposite to the usual one; as in an ovary with its apex directed downward; inverted; reversed.

Resupination (*re-su-pin-a'-shun*) [*re*, back; *supinare*, to bend backward]. In biology, a term applied to the torsion which the long inferior ovary of most orchids undergoes at the time of the opening of the flower, which causes the posterior side of the flower to assume an anterior position.

Resupine (*re-su'-pin*) [*re*, back; *supinus*, lying on the back]. Lying with the face upward.

Resurrectionist (*res-ur-ek'-shun-ist*) [*resurgere*, to rise again]. Colloquially, one who steals dead bodies from the grave as subjects for dissection.

Resuscitant (*re-sus'-it-ant*) [*resuscitans*, *p. p. resuscitare*, to revive again]. The person by whom or the thing by which one is resuscitated.

Resuscitate (*re-sus'-it-āt*) [*resuscitare*, to revive]. To revive; to recover from apparent death.

Resuscitation (*re-sus-it-a'-shun*) [*resuscitatio; resuscitare*, to raise up again]. The bringing to life, or restoration of one apparently dead from asphyxiation or suffocation.

Resuscitative (*re-sus'-it-a-tiv*) [*resuscitare*, to revive]. Tending to resuscitate; reviving.

Resuscitator (*re-sus'-it-a-tor*). See *Resuscitant.*

Retainment (*re-tān'-ment*). See *Retention.*

Retanilla (*ra-tan-il'-ah*) [Fr., *rétanille*]. A genus of the rhamneæ. **R. ephedra, R. obcordata**, two Chilian and Peruvian astringents and tonic styptics. Unof.

Retardation (*re-tar-da'-shun*) [*retardatio; retardare*, to delay]. Any hindering or delaying of a function. In obstetrics, delay in expelling the fetus. In biology, the change of structure during growth accomplished by the subtraction of parts. The opposite of *acceleration*, *q. v.*

Retarding (*re-tar'-ding*) [*retardare*, to delay]. Hindering; delaying. **R. Ague**, a variety of ague in which the paroxysm is postponed to a later hour each day.

Retch [AS., *hræcan*, to cough, Ital., *recere*, to vomit]. To strain at vomiting. To suffer the spasmodic muscular contractions by which the stomach is emptied in vomiting, without discharging any matter.

Rete (*re'-te*) [L., a net: *pl.*, *Retia*]. Any network or decussation and interlacing, especially of capillary blood-vessels. **R., Acromial**, a plexus of arteries on the surface of the acromial process, formed by anastomoses between the acromial branch of the acromiothoracic, the suprascapular, and the anterior and posterior circumflex. **R. articulare cubiti**, an arterial anastomosis over the elbow. **R., Bipolar**, applied to blood-vessels that unite into larger stems and again divide and end in capillaries. **R. calcaneum**, an arterial anastomosis over the os calcis. **R., Carpal, Anterior, and Posterior**, two plexuses of arteries formed by the carpal branches of the radius and ulna, one in front and the other at the back of the wrist. **R. carpi dorsale**, the posterior carpal arch. **R. carpi volare**, an arterial meshwork made up of branches from the radial and ulnar arteries and deep palmar arch upon the anterior surface of the carpus. **R. choroideum**, vascular prolongations of the pia. **R., Epidermal.** Same as *R. mucosum.* **R. halleri**, the upper part of the Wolffian body by which the communication between the seminiferous tubules and the Wolffian duct is established and maintained. **R. malleolare internum** and **externum**, the network surrounding the inner and the outer ankle. **R. malpighii**, the layers of epithelial cells above the corium. **R. mirabile** (*pl.*, *Retia mirabilia*), is seen when an artery splits into branches and reunites in a trunk, without forming capillaries. **R. mirabile duplex.** See *R. mirabile geminum* or *conjugatum.*

R. mirabile (*of Galen*), a network of vessels formed by the intracranial portion of the internal carotid artery in some animals. **R. mirabile geminum** or **conjugatum**, a plexus in which arteries and veins are combined. **R. mirabile simplex**, a network involving only veins or arteries. **R. mucosum**, the three lower layers of living cells of the epidermis. **R. olecrani**, the network of vessels around the olecranon and at the back of the elbow, formed by the divisions of the profunda and other arteries. **R. patellare**, the plexus of vessels surrounding the patella. **R. tarseum dorsale**, an arterial network upon the dorsal surface of the tarsus. **R. testis**, the network of seminal tubules in the corpus highmori of the testicle. **R., Unipolar**, the capillary divisions of blood-vessels which do not reunite. **R., Vascular** (*of B. Ridge*), a membranous sac, very vascular, which with the meconic membrane forms an envelop for the meconium of the fetus. **R. vasculosum**, a network of blood-vessels. **R. vasculosum testis.** See *R. halleri*. **R. venosum dorsale manus**, a venous network on the back of the hand. **R. venosum dorsale pedis**, a venous network on the dorsum of the foot.

Retecious (*re-te'-se-us*). Same as *Retiform*.

Retene (*re'-tēn*), $C_{18}H_{18}$. A hydrocarbon occurring in the highest fractions of coal-tar and also a derivative of phenanthrene. It occurs in the tar of highly resinous pines and in some mineral resins. It is very soluble in alcohol and benzene, and crystallizes in leaflets with a mother-of-pearl luster; it melts at 98° C., and boils at about 390° C.

Retention (*re-ten'-shun*) [*retentio; re*, back; *tenere*, to hold]. The holding back or stoppage of any of the natural discharges of the body, as the feces, lochia, urine, menstrual flow, etc. **R.-cyst**, a cyst formed by a secretion, the natural outlet being closed. **R., Hystero-cystic**, retention of urine caused by pressure from a gravid uterus. **R. of Milk.** Same as *Galactoschesis*, *q. v.* **R. of Menses:** 1. Retention of menstrual blood due to mechanical interference with its outward flow. 2. Postponement of menstruation after the proper age for its establishment. **R. of Placenta**, failure of expulsion of a placenta as a result of improper or deficient uterine contractions. **R. of Urine**, inability to empty the bladder voluntarily.

Retentive (*re-ten'-tiv*) [*retinere*, to retain]. That which holds anything in place.

Retia (*re'-te-ah*) [L., plural of *Rete*]. See *Rete*.

Retial (*re'-te-al*) [*rete*, a net]. Relating to, or of the nature of, a rete.

Retiary (*re'-te-a-re*) [*rete*, a net]. Net-like.

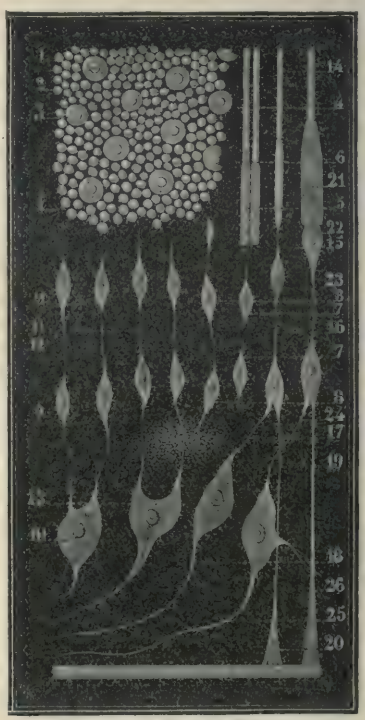
Reticular (*ret-ik'-u-lar*) [*reticulum*, a little net]. Formed by reticulation; areolar; abounding in interstices. **R. Cartilage.** Same as yellow elastic cartilage, *q. v.* **R. Formation**, a formation occupying the anterior and lateral area of the oblongata dorsad of the pyramids and lower olives and extending up into the pons. **R. Lamina of Kölliker.** See *Membrane, Reticular*. **R. Layer of the Skin**, the deep layer of the derma, consisting of strong interlacing bands of white and yellow fibrous tissue.

Reticulare (*ret-ik-u-la'-re*) [*reticularis*, like a net]. The rete mucosum. See *Rete*.

Reticulate (*re-tik'-u-lāt*) [*reticulum*, a little net]. In biology, in the form of network; said of the veins of leaves and the surface-markings of different organs.

Reticulated (*ret-ik'-u-la-ted*). Having net-like meshes.

Reticulation (*ret-ik-u-la'-shun*) [*reticulatus*, like a net]. The character of being reticulated



Reticulose (*ret-ik'-u-lōz*) [*reticulum*, a net]. Minutely or finely reticulate.

Reticulum (*re-tik'-u-lum*) [*reticulum*, a little net: *pl.*, *Reticula*]. 1. A network. 2. In biology, applied to various reticulated structures, *e. g.*, (*a*) the second division (hood or honey-comb bag) of the complicated stomach of a ruminant; (*b*) the intracellular or intranuclear network; (*c*) the neuroglia; (*d*) the fibrous substance growing at the base of the petioles of certain palms, also called *mattulla*. **R. cutaneum**, **R. mucosum**. See *Rete mucosum*. **R.-Germ** (*of Von Ebner*), a network of fibers occasionally seen between layers of seminal cells.

Retiferous (*re-tif'-er-us*) [*rete*, a net; *ferre*, to bear]. That which has a rete.

Retiform (*re'-tif-orm*) [*retiformis*]. Net-shaped; reticulated. **R. Tissue.** See *Animal Tissue*.

Retina (*ret'-in-ah*) [*rete*, a net]. The chief and essential peripheral organ of vision, the third or internal coat or membrane of the eye, made up of the end-organs or expansion of the optic nerve within the globe. It is composed of ten layers from without inward, as follows: 1. Pigment-cells. 2. Rods and cones. 3. External limiting. 4. External granular. 5. Outer molecular. 6. Internal granular. 7. Internal molecular. 8. Ganglionic. 9. Nerve-fiber. 10. Internal limiting. **R., Central Artery of**, a branch of the ophthalmic artery that pierces the optic nerve in the orbit, branching within the globe, and supplying the retina. **R., Coarctate**, a term used to describe

Elements of the Retina.

1, 1. Layer of rods and cones. 2. Rods. 3. Cones. 4. Upper portion of rods. 5. Lower portion. 6. Point of union of these two parts. 7, 7. Two cells of the granular layer. 8, 8. Two other cells of the same layer. 9, 9. Still two other cells of the same layer. 10. Cell of the layer of gray matter with which these communicate. 11, 12. Other cells of the granular layer. 13. Tripolar cell with which these are continuous. 14. A rod continuous with the elements of the other layers. 15. Process by which it communicates with a cell of the external granular layer. 16. Process by which this cell communicates with a cell of the internal granular layer. 17. Process by which this cell communicates with the layer of gray matter. 18. Process from the last entering into the fibrous layer. 19. A radiating fiber of Müller. 20. Conoid swelling by which this fiber is attached to the internal limiting layer. 21. A cone continuous with the other elements of the retina. 22. Cell of external granular layer. 23. Intermediary process between two cells of the granular layer. 24. Process connecting a cell of the granular layer with a cell of the layer of gray matter. 25. Process of cell of layer of gray matter. 26. A radiating fiber.

the morbid condition caused by an effusion of liquid between the retina and the choroid. **R., Detachment of,** disconnection from the choroid. **R., Epilepsy of,** a symptom of migraine or of epilepsy, characterized by transient loss of sight. **R., Fovea centralis of.** See *Fovea.* **R., Leopard or Tiger,**

1, 1. Layer of rods and cones. 2. Rods. 3. Cones. 4, 4. Membrana limitans externa. 5, 5. Outer and inner granular layers. 6. Outer granular layer. 7. Inter-granular layer. 8. Inner granular layer. 9. Layer of gray matter. 10. Granular portion of this layer. 11. Cellular portion. 12, 12 Fibrous layer. 13. Membrana limitans interna. 14, 14. Radiating fibers inserted into this membrane.

VERTICAL SECTION OF THE RETINA.

the appearance of the retina in *chronic retinitis pigmentosa.* **R., Limbus luteus of.** See *Macula lutea.* **R., Membrana limitans of.** See *Membrana limitans.* **R., Pulsation of.** See *Pulsation.* **R., Shot-silk Appearance of.** See *Reflex, Watered-silk.* **R., Sustentacular Fibers of.** See *Fibers of Müller.*

Retinaculum (*ret-in-ak'-u-lum*) [*retinere*, to hold back: *pl.*, *Retinacula*]. 1. A term applied to such bands or membranes as hold back an organ or part, as the *Retinaculum of the ileo-cecal valve.* 2. An instrument at one time used in operations for hernia. 3. In biology: (*a*) That viscid, discoid portion of the rostellum of an orchid which holds the pollen masses in place and is removed with them by a visiting insect; it is also called *proscolla*, and *viscid disc*; (*b*) the hardened, uncinate funiculus of the seeds of many of the *Acanthaceæ*; (*c*) the little plate or scale which in certain insects restrains the protrusion of the sting. **Retinacula of Barry,** tense filaments running from the thickened portion of the cellular membrane lining the Graafian follicle to other parts of the membrane. **R. costæ ultimatæ.** Same as *Lumbo-costal Ligament*, *q. v.* **Retinacula cutis,** fibrous bands connecting the corium with the underlying fascia. **R. ligamenti arcuati,** the short external lateral ligaments of the knee-joint, *q. v.* **Retinacula morgagni,** or **Retinacula of the Ileo-cecal Valve,** the membranous ridge formed by the coming together of the valve-segments at each end of the opening between the cecum and the ileum. **Retinacula ossis brachii,** fibrous bands inserted into the neck of the humerus and having their origin in the capsule of the humero-scapular articulation. **R. patellæ externum,** the lateral patellar ligaments. **R. patellæ internum,** the ligamentum patellæ mediale. **Retinacula patellæ, laterale et mediale.** See *Lateral Patellar Ligaments.* **R. peroneorum inferius,** a fibrous band running over the peroneal tendons as they pass through the grooves on the outer side of the calcaneum. **R. peroneorum superius, R. tendinum peroneorum.** See *Ligament, Extreme Angular (of Ankle).* **Retinacula valvulæ.** See *Retinacula morgagni.* **R. of Weitbricht,** bands of ligamentous tissue situated on the neck of the trochanter of the femur.

Retinal (*ret'-in-al*) [*retinalis; rete*, a network]. Pertaining to the retina. **R. Apoplexy,** hemorrhage into the retina. **R. Horizon,** a term used by Helmholtz to describe the horizontal plane passing through the transverse axis of the eyeball. **R. Image,** the image of external objects as reflected on the retina. **R. Ischemia,** anemia of the retina. **R. Melanin.** See *Fuscin.* **R. Purple.** Same as *Rhodopsin.*

Retinerved (*ret'-tin-ervd'*) [*rete*, net; *nervus*, nerve]. In biology, reticulate; netted-veined.

Retinitis (*ret-in-i'-tis*) [*retina*, retina; *ιτις*, inflammation]. Inflammation of the retina, classed, according to its etiology, into albuminuric, diabetic, leukemic, pigmentary (*R. pigmentosa*), syphilitic, etc., most of which are characterized by distinctive ophthalmoscopic appearances. **R. albuminurica,** the form due to nephritis, usually chronic. Numerous white spots may be seen scattered over the fundus, some having an irregular outline, while others are stellated. There are also spots of hemorrhagic extravasation. **R., Central Punctate,** a form seen most in the aged. A great number of striæ or white spots are visible in the fundus. **R., Central Relapsing,** a form of syphilitic retinitis in which there is a gray or yellow area in the macular region, or numerous small yellowish-white spots and pigment-dots. It is a rare form, and is inclined to relapse. **R. cerebralis,** retinitis due to intracranial inflammation. **R., Choroido-,** a form of syphilitic retinitis with cellular infiltration, exudation, atrophy, and proliferation of the pigment-epithelium in the choroid, between the choroid and retina, and in the retinal layers. **R. circumpapillaris,** a form in which there is proliferation of the outer layers of the retina around the disc. **R., Diabetic,** the form of retinitis occurring in diabetes. **R., Diffuse.** See *R. serosa.* **R., Diffuse Parenchymatous,** the parenchymatous form affecting the limitans, the externa, the interna, and the adventitia. **R. exsudativa,** retinitis with parenchymatous exudation. **R., Glycosuric.** Same as *R., Diabetic, q. v.* **R. gravidarum,** a form occurring in pregnant women and which is similar to retinitis albuminurica, and is of grave prognostic import. **R. hæmorrhagica,** a form in which there is swelling of the papilla and opaque infiltration of the surrounding retina; there are distended, dark, and tortuous veins, and the arteries are small; there are hemorrhages, linear or irregular and round in appearance. **R. hepatica,** a rare form which sometimes occurs in cases of parenchymatous hepatitis. **R. leukæmica,** a form characterized by pallor of the retinal vessels and optic disc, the boundary of the latter being indistinct. Hemorrhages appear at various points of the membrane, while numerous white patches and round bodies are visible about the disc in the retina. It is a result of systemic anemia. **R. macularis.** Same as *R., Central Relapsing, q. v.*

R. nephritica. See *R. albuminurica.* **R. nyctalopica,** a diffuse, streaked opacity of the retina and swelling of the disc, with central scotoma or color-scotoma, and more or less marked amblyopia. It indicates retro-bulbar neuritis. **R. paralytica** (*of Klein*), retinitis caused by paralysis affecting the optic nerve. **R., Parenchymatous,** a simple chronic retinitis affecting the connective tissue of the retina. **R. pigmentosa,** an affection involving all the layers of the retina, and consisting in a slowly-progressing connective-tissue and pigment-cell proliferation of the entire membrane, with wasting of its nerve-elements. The disease is most common in males, is often hereditary, and begins at a very early period of life, and may be congenital. Both eyes are attacked simultaneously, though occasionally only one suffers. **R. postica,** inflammation of the ectal retinal layer. **R., Proliferating,** a development of connective tissue in the retina, with the formation of dense bluish-white masses within the retina, and extending into the vitreous humor. **R. punctata albescens.** Same as *R., Central Punctate, q. v.* **R., Purulent,** a form in which there are small circumscribed white spots near the papilla and in the macular region. **R., Renal.** See *R. albuminurica.* **R., Septic.** Same as *R., Purulent.* **R. serosa,** a form characterized by an infiltration, most marked in the nerve-fiber and ganglionic layer of the retina, creating opacity, edema, and hyperemia, most marked in the veins. **R., Simple Syphilitic,** a form of syphilitic retinitis in which the ophthalmoscope shows a gray opacity surrounding the papilla, which is discolored and cloudy, and the veins darker than normal. **R. simplex.** Same as *R. serosa, q. v.* **R., Solar,** retinal change from the effect of sunlight. **R. sympathetica,** retinitis of sympathetic origin, and attended with retinal hyperemia, redness of the disc, engorgement of the veins, and great disturbance of vision. **R., Syphilitic,** the form occurring in syphilis; it is chronic, diffuse, and a late manifestation of the systemic disease.

Retinochoroiditis (*ret-in-o-ko-roi-di'-tis*) [*retina,* retina; *χόριον,* the chorion; *εἶδος,* like; *ιτις,* inflammation]. Inflammation of the retina and choroid. See *Choroido-retinitis.*

Retinogen (*ret'-in-o-jen*) [*retina,* retina; *γεννᾶν,* to produce]. In biology, the ectal of the two layers composing the ectoderm of the embryonic eye of arthropods, the ental layer being called the *gangliogen.*

Retinoid (*ret'-in-oid*) [*ῥητίνη,* resin; *εἶδος,* form]. Resin-like, or in the form of a resin.

Retinol (*ret'-in-ol*) [*ῥητίνη,* a resin], $C_{32}H_{16}$. *Rosinol;* a liquid hydrocarbon derived from the destructive distillation of resin. It is employed in capsules for blennorrhea. It is a good solvent for iodol, aristol, camphor, etc., and is antiseptic, tonic, and cicatrizant. Dose ♏viij three or four times daily. Unof.

Retinophora (*ret-in-off'-or-ah*) [*retina,* retina; *φέρειν,* bear: *pl., Retinophoræ*]. In biology, one of the crystalline cone-cells of the arthropodan eye. The retinophoræ are surrounded by pigment-cells.

Retinoscopy (*ret-in-os'-ko-pe*) [*retina,* retina; *σκοπεῖν,* to observe]. A method of estimating the refraction of the eye by observation of the movements of the retinal images and shadows through the ophthalmoscopic mirror. The method has also been called, and very properly, the *Fundus-reflex Test;* other terms are: *Keratoscopy, Pupilloscopy, Umbrascopy, Skiascopy, Koroscopy,* etc. **R., Phosphenic,** a method of learning the condition of the retina when the crystalline lens is opaque. It consists in making slight pressure on different regions of the closed eye; if the retina is healthy under the region pressed, a luminous circle is seen by the patient on the side opposite to the point of pressure.

Retinoskiascopy (*ret-in-o-ski-as'-ko-pe*). See *Retinoscopy.*

Retinula (*ret-in'-u-lah*) [dim. of *retina,* retina: *pl., Retinulæ*]. In biology, an aggregation of retinal cells; that portion of the whole retina of the compound eye which belongs to each of the single eyes, as in the lateral eyes of scorpions and *Limulus,* and the eyes of *Myriapoda.*

Retinular (*ret-in'-u-lar*) [*retinula,* a little retina]. In biology, of or pertaining to a *retinula, q. v.*

Retinulate (*ret-in'-u-lāt*) [*retinula,* a little retina]. In biology, aggregated into *retinulæ.*

Retiped (*re'-tip-ed*) [*rete,* a net; *pes,* foot]. Having netted tarsi; said of certain birds.

Retort (*re-tort'*) [*retorquere,* to bend back]. A vessel employed in distillation, containing the liquid to be distilled.

Retract (*re-trakt'*) [*re,* back; *trahere,* to draw]. To draw back; to contract; to shorten.

Retractile (*re-trak'-til*) [*retrahere,* to draw back]. That which may be drawn back. **R. Carcinoma,** mammary carcinoma with retraction of the nipple.

Retractility (*re-trak-til'-it-e*) [*retrahere,* to draw back]. 1. Capable of retraction. 2. Of Pajot, a property of the uterine tissue by virtue of which the uterus, having been emptied of a part of its contents, becomes thicker-walled, while its capacity and volume diminish.

Retraction (*re-trak'-shun*) [*retractio,* a drawing back]. The shortening of a fractured limb from the broken ends slipping past one another. **R., Cicatricial,** that due to cicatrices. See *Cicatricial Contraction.* **R., Muscular,** post-paralytic atrophy of a muscle. **R. of the Uterus,** a chronic contraction of the uterus by which it applies itself closely to its contents without any change of contraction and relaxation. **R.-ring.** See *Bandl, Ring of.* **R., Spasmodic,** irregular contraction of the uterus.

Retractor (*re-trak'-tor*) [*retrahere,* to draw back]. 1. An instrument for withdrawing the lips or edges of a wound, or for pulling the soft parts away from the place of incision in amputations. 2. A muscle that retracts the organ into which it is inserted. **R. anguli oris.** See *Buccinator Muscle,* in *Muscles, Table of.* **R. bulbi,** the retractor muscle of the eyeball present in some animals. **R., Emmet's Perineal,** a self-retaining vaginal speculum. **R., Eyelid,** a metallic instrument used to hold the eyelids away from the eyeball during an examination or operation. **R., Minor's Trachea,** an instrument used as a substitute for tracheotomy tubes, consisting in a hollow rod, slightly curved, and holding a bent wire retractor by means of a screw at each end. **R. oculi.** See *R. bulbi.* **R., Pilcher's,** a small pair of blunt hooks on a single delicate stem. An instrument used in tracheotomy. **R. urethræ** or **urethralis.** See *Bulbo-cavernous.* **R. uteri:** (1) the recto-uterini of both sides considered as one: (2) of *Luschka,* a uterine fold. **R., Rose's,** an instrument used to hold open a tracheotomy-wound; it consists in a piece of steel wire bent to form a pair of spring hooks. **R., Wells's,** two wires bent into hooks and tied in place about the neck by bands. It is advised for the purpose of keeping the wound open after tracheotomy.

Retrad (*re'-trad*) [*retro,* backward]. In or toward the rear or posterior part.

Retrahens (*re'-trah-henz*) [*retrahere,* to draw back]. Drawing back. **R. Muscle.** See *Muscles, Table of.*

Retrahent (*re'-trah-hent*) [*retrahens,* drawing back]. Drawing backward; retracting.

Retral (*re'-tral*) [*retro*, backward]. Situated toward the back; posterior, caudal.

Retrenchment (*re-trench'-ment*) [Fr., *retrenchement*]. A plastic operation the object of which is to obtain cicatricial contraction by the removal of superfluous tissue.

Retriment (*ret'-ri-ment*) [*retrimentum*, refuse]. Dregs; refuse, or marc.

Retro- (*re'-tro-*) [*retro*, back]. A prefix meaning *backward* or *behind*; usually relating to place or position.

Retroaction (*re-tro-ak'-shun*) [*retro*, backward; *agere*, to do]. Reverse action.

Retroanterograde (*re-tro-ant'-er-o-grād*) [*retro*, backward; *anterius*, before; *gredi*, to go]. Reversing the order of succession. **R. Amnesia**, a perversion of the memory in which recent events are referred to a far-off and past time, while the occurrences of the remote past seem recent.

Retrobuccal (*re-tro-buk'-al*) [*retro*, back; *bucca*, the mouth]. Pertaining to the back part of the mouth, or of the cheek.

Retrobulbar (*re-tro-bul'-bar*) [*retro*, back; *bulbus*, bulb]. Situated or occurring behind the eyeball. **R. Neuritis**, inflammation in the orbital part of the optic nerve. **R. Perineuritis**, inflammation of the sheath of the orbital part of the optic nerve.

Retrocedent (*re-tro-se'-dent*) [*retro*, back; *cedere*, to go]. Pertaining to a retrograde condition or action of disease; going back; disappearing from the surface, as an eruption. **R. Gout.** See *Gout*.

Retroceps (*re'-tro-seps*) [Fr.]. A variety of obstetric forceps used to grasp the fetal head from behind.

Retrocervical (*re-tro-ser'-vik-l*) [*retro*, behind; *cervix*, the neck]. Situated behind the cervix uteri.

Retrocession (*re-tro-sesh'-un*) [*retrocessio*]. Disappearance from the surface, as of an exanthem. **R. of Labor**, of Charrier, a rare condition in which, after labor has begun, but before the membranes are ruptured, the uterine contractions cease, and the cervix, formerly a small ring, becomes a canal again.

Retroclavicularis (*re-tro-kla-vik-u-la'-ris*) [*retro*, behind; *clavicula*, the clavicle]. See *Sterno-clavicularis posticus*.

Retroclusion (*re-tro-klu'-zhun*) [*retro*, back; *claudere*, to shut]. A form of acupressure, in which the pin is passed first above the artery, twisted a half circle and then driven below the artery into the tissues upon the side first entered.

Retrocollic (*re-tro-kol'-ik*) [*retro*, back; *collis*, the nape of the neck]. Pertaining to the muscles at the back of the neck. **R. Spasm**, that form of wry-neck involving the retrocollic muscles. Spasmodic torticollis.

Retrocopulant (*re-tro-kop'-u-lant*) [*retro*, back; *copulans*, copulating]. Copulating backward or from behind.

Retrocopulation (*re-tro-kop-u-la'-shun*) [*retro*, backward; *copulare*, to copulate]. The act of copulating from behind or aversely.

Retrodeviation (*re-tro-de-ve-a'-shun*) [*retro*, back; *deviatio*, a wandering]. Any backward displacement; a retroflexion or retroversion.

Retrodisplacement (*re-tro-dis-plās'-ment*) [*retro*, back; OF., *desplacer*, to put out of place]. Displacement backward of a part or organ.

Retro-esophageal (*re-tro-e-so-faj'-e-al*) [*retro*, behind; οἰσοφάγος, esophagus]. Located behind the esophagus.

Retroflected (*re-tro-flek'-ted*). Same as *Retroflexed*.

Retroflection (*re-tro-flek'-shun*). See *Retroflexion*.

Retroflex (*re'-tro-fleks*) [*retro*, back; *flectere*, to turn]. Turning back abruptly.

Retroflexed (*re-tro-flekst'*) [*retro*, back; *flectere*, bend]. Bent backward.

Retroflexion (*re-tro-flek'-shun*) [*retro*, back; *flectere*, to bend]. Any abrupt displacement, bending or changing of normal direction. **R. of Uterus.** See *Uterus*.

Retrofract (*re'-tro-frakt*). Same as *Refracted*.

Retrogenerative (*re-tro-jen'-er-a-tiv*). Same as *Retrocopulant*.

Retrognathous (*re-trog'-na-thus*) [*retro*, backward; γνάθος, jaw]. Retracted jaw.

Retrograde (*re'-tro-grād*, or *ret'-ro-grāa*) [*retro*, backward; *gradus*, a step]. Receding, or going backward. **R. Carcinoma**, a carcinoma which grows firmer and less in size and remains so. **R. Metamorphosis**, katabolic change.

Retrograde (*re'-tro-grād*, or *ret'-ro-grād*) [*retrogradi*, go backward]. In biology, (1) showing degeneration from a more complex structure or higher function to a lower one. 2. Descriptive of animals that walk or swim backward.

Retrography (*re'-tro-graf-e*) [*retro*, back; γράφειν, to write]. Writing backward; a symptom of certain nervous diseases.

Retrogressive (*re-tro-gres'-iv*) [*retrogressus*]. Declining in strength; degenerating. In biology, degeneration, backward metamorphosis, as the transformation of bracts into foliage leaves, stamens into petals, sepals into bracts, etc.

Retro-insular (*re-tro-in'-su-lar*) [*retro*, behind; *insula*, island]. Situated or occurring behind the insula, or island of Reil. **R. Convolutions**, two or three convolutions behind the insula and wholly within the fissure of Sylvius.

Retrojection (*re-tro-jek'-shun*) [*retro*, back; *jectio*, a throwing]. The washing out of a cavity from within outward.

Retro-lingual (*re-tro-lin'-gwal*) [*retro*, back; *lingua*, tongue]. Relating to that part of the throat back of the tongue. Serving to retract the tongue.

Retro-location (*re-tro-lo-ka'-shun*) [*retro*, back; *locatio*, location]. Same as *Retro-position*, *q. v.*

Retro-malleolar (*re-tro-mal-e'-o-lar*) [*retro*, back; *malleolus*, malleolus]. Located back of a malleolus.

Retromammary (*re-tro-mam'-ar-e*) [*retro*, behind; *mamma*, breast]. Situated or occurring behind a mammary gland.

Retro-maxillary (*re-tro-maks'-il-a-re*) [*retro*, back; *maxilla*, maxilla]. Situated behind the maxilla.

Retromorphosis (*re-tro-mor'-fo-sis*) [*retro*, back; μορφή, form]. Katabolism; retrograde metamorphosis; katabolic change.

Retro-nasal (*re-tro-na'-zal*) [*retro*, behind; *nasus*, nose]. Situated back of the nose or nasal cavities.

Retro-ocular (*re-tro-ok'-u-lar*) [*retro*, behind; *oculus*, the eye]. Situated behind the eyeball. Same as *Retrobulbar*.

Retroperitoneal (*re-tro-per-it-on-e'-al*) [*retro*, behind; περιτοναιον, peritoneum]. Occurring or situated behind the peritoneum. **R. Hernia**, hernia of the intestine into the iliac fossa back of the peritoneum.

Retroperitoneum (*re-tro-per-it-on-e'-um*) [*retro*, behind; περιτοναιον, peritoneum]. The retro-peritoneal space.

Retroperitonitis (*re-tro-per-it-on-i'-tis*) [*retro*, behind; περιτοναιον, peritoneum; ιτις, inflammation]. Inflammation of the retroperitoneal structures.

Retropharyngeal (*re-tro-far-in'-je-al*) [*retro*, behind; φαρυγξ, the pharynx]. Situated or occurring behind the pharynx. Pertaining to parts situated behind the pharynx. **R. Abscess**, abscess occurring in the tissues back of the pharynx.

Retropharyngitis (*re-tro-far-in-ji'-tis*) [*retro*, behind; φάρυγξ, pharynx; ιτις, inflammation]. Inflammation of the retropharyngeal tissues.

Retroposed (*re'-tro-pōzd'*) [*retro*, back; *ponere*, to place]. Displaced backward.

Retro-position (*re-tro-po-zish'-un*) [*retro*, back; *positio*, position]. Backward displacement of the uterus without flexion or version.

Retropulsion (*re-tro-pul'-shun*) [*retro*, back; *pulsio*, beating]. 1. A driving or turning back, as of the fetal head. 2. A running backward; a disorder of locomotion sometimes witnessed in paralysis agitans.

Retrorse (*re-trors'*) [*retro*, backward; *vertere*, turn]. In biology, turned backward.

Retroserrate (*re-tro-ser'-āt*) [*retro*, back; *serratus*, saw-shaped]. In biology, furnished with serrations which are turned backward, as the sting of a bee.

Retroserrulate (*re-tro-ser'-u-lāt*) [*retro*, back; *serrula*, a little saw]. Furnished with diminutive retrorse teeth.

Retrosiphonate (*re-tro-si'-fun-āt*), [*retro*, back; σίφων, siphon]. In biology, having the siphon and surrounding partitions directed backward.

Retrostalsis (*re-tro-stal'-sis*) [*retro*, backward; στάλσις, compression]. Reversed peristaltic action; peristaltic action that tends to drive the intestinal contents cephalad instead of caudad.

Retrosternal (*re-tro-ster'-nal*) [*retro*, back; στέρνον, sternum]. Situated or occurring behind the sternum.

Retrotarsal (*re-tro-tar'-sal*) [*retro*, back; τάρσος, tarsus]. Situated or occurring behind the tarsus. **R. Fold**, the fornix of the conjunctiva.

Retrotracheal (*re-tro-trā'-ke-al*) [*retro*, behind; τραχεῖα, trachea]. Situated or occurring behind the trachea.

Retro-uterine (*re-tro-u'-ter-in*) [*retro*, behind; *uterus*, uterus]. Behind the uterus. **R. Hematocele**, a blood-tumor behind the uterus in the pouch of Douglas.

Retrovaccination (*re-tro-vak-sin-a'-shun*)[*retro*, back; *vaccinus*, of a cow]. Vaccination with virus from a cow that had been inoculated with the virus of smallpox from a human subject.

Retrovaccine (*re-tro-vak'-sin*) [*retro*, back; *vaccinus*, of a cow]. The virus obtained after inoculating a cow with human virus.

Retroversion (*re-tro-ver'-shun*) [*retro; versio*, a turning]. A turning back; applied especially to such organs as the bladder, the womb, etc. **R. of Uterus.** See *Uterus.*

Retti (*ret'-i*) [Hind., *ratti*]. The seed of *Abrus precatorius*. See *Jequirity.*

Retuse (*re-tūs'*) [*retusus*, blunted, dull]. In biology, applied to a leaf or other flattened organ that has a broad, shallow sinus at the apex.

Retzius, Brown Lines of. Fine parallel lines in the enamel of a tooth. **R., Cavity of.** See *Cavity, Peritoneal.* **R., Ligament of.** See *Ligament.* **R., Space of.** Same as *R., Cavity of.* **R., Stripes of.** See *Stripe.* **R., Veins of,** small veins uniting the radicles of the portal branches in the intestines and mesentery with the inferior vena cava and its branches. They include all the retroperitoneal veins and are often enormously enlarged in hepatic cirrhosis.

Reunion (*re-ūn'-yun*) [*re*, again; *unio*, to become one]. The joining of parts whose continuity has been destroyed. **R. of Wound.** See *Healing.*

Reuss's Test. See *Tests, Table of.*

Revaccination (*re-vak-sin-a'-shun*)[*revaccinatio*]. Renewed or repeated vaccination.

Revalenta (*rev-al-en'-tah*) [transposed from *Ervum lens*]. A commercial and proprietary food-preparation for invalids, said to be composed principally of lentil meal.

Revealed (*re-vēld'*) [*re*, back; *velare*, to veil]. In biology, not concealed under other parts.

Réveilleur (*ra-vel-yur'*) [Fr.]. The instrument used in Baunscheidtism.

Revellent (*re-vel'-ent*). See *Revulsive.*

Reverdin's Operations. See *Operations, Table of.*

Reverie (*rev'-er-e*) [Fr., *rêverie*]. A state of dreamy abstraction; visionary mental or ideational movement, the mind itself, at least so far as volition is concerned, being passive.

Reverse (*re-vers'*) [*revertere*, to turn back]. In bandaging, a half-turn employed to change the direction of a bandage.

Reversion (*re-ver'-shun*) [*revertere*, to turn back]. In biology: 1. The appearance of characteristics which existed in remote ancestors; thus many endoparasites (*Cestoda, Acanthocephala, Rhizocephala*) show reversion to a very low type of digestion, while the *Ascidians* are held by Dohrn, Lankester, and others to be degenerate *Vertebrata*. The loss of eyes by the *Cirripedia*, the *Penellina*, and the *Lernæodea*, when these animals become fixed, as well as by various cave-animals, may be included as examples of reversion. 2. The backward development of plant-organs, as stamens into petals, etc. 3. Becoming wild after having been domesticated or cultivated.

Revert (*re-vert'*). See *Latent.*

Revitalization (*re-vi-tal-i-za'-shun*) [*re*, again; *vita*, life]. The act or process of refreshing or revitalizing.

Revive (*re-vīv'*) [*re*, again; *vivere*, to live.] To return to life after seeming death.

Revivement (*re-vīv'-ment*) [*revivere*, to live again]. The act of reviving.

Revivification (*re-viv-if-ik-a'-shun*) [*revivificatio*]. 1. Restoration to consciousness. 2. The refreshing of surfaces by paring before placing them in apposition.

Reviviscence (*re-viv-is'-ens*) [*reviviscere*, inceptive of *revivere*, to revive]. The awakening from a period of dormancy; said of insects after hibernation.

Revolute (*rev'-o-lūt*) [*re*, back; *volvere*, to roll]. That form of vernation or estivation in which the margins of the organ are rolled backward.

Revolver (*re-vol'-ver*). See *Nose-piece.*

Revomit (*re-vom'-it*) [*re*, again; *vomere*, to vomit]. To reject from the stomach.

Revulsant (*re-vul'-sant*) [*revellere*, to push away]. 1. Revulsive. 2. A medicine or agent that, by irritation, draws the blood from a distant part of the body.

Revulsion (*re-vul'-shun*) [*revulsio*]. The reduction of morbid action in any part by means of counter-irritation.

Revulsive (*re-vul'-siv*) [*revellere*, to turn away]. Capable of causing revulsion; applied to therapeutic agencies designed to withdraw the blood from or counteract the tendencies toward a morbid focus or process.

Revulsor (*re-vul'-sor*) [*revellere*, to turn away]. 1. An apparatus for effecting revulsion by means of the alternate application of heat and cold. 2. A plate or cylinder set with needles, and used in producing counter-irritation.

Reybard's Suture. An interrupted loop-suture for wounds of the intestine. See *Suture.*

Rhabarbarin (*ra-bar'-bar-in*) [*rhabarbarum*, barbarian rhubarb]. Same as *Chrysophanic Acid, q. v.*

Rhabarbarum (*ra-bar'-bar-um*) [*rhabarbarum*, barbarian rhubarb]. Rhubarb.

Rhabdia (*rab'-de-ah*) [ῥάβδος, a rod]. In biology, the great rods lying beneath the crystalline cones of the insect's eye.

Rhabdite (*rab'-dīt*) [ῥάβδος, a rod]. In biology, (*a*) one of the spindle-shaped glandular secretions occurring in the skin of certain invertebrates. They are specially characteristic of the *Turbellaria*; (*b*) one of

the paired appendages of the abdominal sternites forming the ovipositor of certain insects.

Rhabditic (*rab-dit'-ik*) [ῥάβδος, a rod]. Pertaining to a rhabdite.

Rhabditis (*rab-di'-tis*) [ῥάβδος, a rod]. A genus of nematode worms. Abundant especially in decaying organic matter, garden earth, etc. Several species are parasitic in snails, a few in man. See *R. niellyi*, *R. pellio* and *R. terricola*, under *Parasites* (*Animal*), *Table of*.

Rhabdium (*rab'-de-um*) [dim. of ῥάβδος, rod: *pl.*, *Rhabdia*]. A fiber of striped or voluntary muscle.

Rhabdocelous (*rab-do-se'-lus*) [ῥάβδος, a rod; κοῖλος, hollow]. Having a straight digestive cavity.

Rhabdoid (*rab'-doid*) [ῥαβδος, a rod; εἶδος, form]. In biology, an acicular or spindle-shaped body chemically related to the plastids, which is found lying diagonally across the stalk-cells of the tentacles of *Drosera* and in the mesophyl-cells of *Dionea*; and tends to grow spherical when the part is irritated. Its importance is not fully known.

Rhabdoidal (*rab-doi'-dal*) [ῥαβδοειδής, like a rod]. Rod-like.

Rhabdomal (*rab'-do-mal*) [ῥάβδωμα, a bundle of rods]. Having the character of a rhabdom.

Rhabdome (*rab'-dōm*) [ῥάβδωμα, a bundle of rods]. In biology, a tubular rod forming the central axis of the retinula of the arthropod eye.

Rhabdomere (*rab'-do-mēr*) [ῥαβδος, a rod; μέρος, a part]. In biology, a rod found in the distal portion of each of the retinular cells of the arthropod eye.

Rhabdomyoma (*rab-do-mi-o'-mah*) [ῥάβδος, a rod; μῦς, a muscle; ὄμα, a tumor: *pl.*, *Rhabdomyomata*]. A rare form of myoma characterized by the presence of striated muscular fiber.

Rhabdonema (*rab-do-ne'-mah*) [ῥάβδος, a rod; νημα, a thread]. A genus of parasitic *Anguillulidæ*. See under *Parasites* (*Animal*), *Table of*.

Rhabdonemiasis (*rab-do-ne-mi'-as-is*) [*Rhabdonema*, a genus of parasitic nematode worms; ῥάβδος, a rod; νῆμα, a thread]. The disease arising from the presence of parasites of the genus *Rhabdonema*. See *Parasites* (*Animal*), *Table of*.

Rhabdosphere (*rab'-do-sfēr*) [ῥάβδος, a rod; σφαῖρα, a sphere]. A minute spheric body bristling with rhabdolithic rods.

Rhabdous (*rab'-dus*) [ῥάβδος, a rod]. Having the character of a rhabdus.

Rhabdus (*rab'-dus*) [ῥάβδος, a rod]. In biology, (*a*) a simple, straight spicule; (*b*) the stipe of certain fungi.

Rhachi. See also *Rachi*.

Rhachiagra (*rak-e-a'-grah*) [ῥάχις, a spine; ἄγρα, pain]. Rheumatism in the muscles of the spine.

Rhachial (*ra'-ke-al*) [ῥάχις, spine]. Pertaining to the spine.

Rhachialgia (*ra-ke-al'-je-ah*) [ῥάχις, spine; ἄλγος, a pain]. Any pain in the spine. Spinal irritation.

R. mesenterica. Same as *Tabes mesenterica*, *q. v.*

R. pictonum. See *Metallic Colic*.

Rhachialgitis (*rak-e-al-ji'-tis*) [ῥάχις, spine; ἄλγος, pain; ιτις, inflammation]. Inflammatory rhachialgia.

Rhachiasmus (*ra-ke-az'-mus*) [ῥάχις, spine]. Spasm of the muscles at the back of the neck, as seen in the early part of many epileptic attacks.

Rhachidial (*ra-kid'-e-al*) [ῥάχις, spine]. Pertaining to a rhachis, or spine.

Rhachidian (*ra-kid'-e-an*). Same as *Rhachidial*.

Rhachilysis (*ra-kil'-is-is*) [ῥάχις, spine; λύειν, to loose]. A method of treating lateral curvature of the spine by mechanical counteraction of the abnormal curves.

Rhachio- or **Rachio-** (*ra'-ke-o-*) [ῥάχις, spine]. A prefix denoting connection with or relation to the spine.

Rhachiocampsis (*ra-ke-o-kamp'-sis*) [ῥάχις; spine; κάμψις, a bending]. Curvature of the spine.

Rhachiochysis (*ra-ke-o-ki'-sis*) [ῥάχις, spine; χύσις, a pouring]. An accumulation of water or watery substance within the spinal canal.

Rhachiodynia (*ra-ke-o-din'-e-ah*) [ῥάχις, spine; ὀδύνη, pain]. Pain in the spinal cord.

Rhachiokyphosis (*ra-ke-o-ki-fo'-sis*) [ῥάχις, spine; κύφωσις, a bending]. Gibbosity, or hunch of the back.

Rhachiometer (*ra-ke-om'-et-er*) [ῥάχις, spine; μέτρον, a measure]. An instrument used to measure the degree of spinal deformities.

Rhachiomyelitis (*ra-ke-o-mi-el-i'-tis*) [ῥάχις, spine; μυελός, marrow; ιτις, inflammation]. Inflammation of the spinal cord. Myelitis.

Rhachiomyelophthisis (*ra-ke-o-mi-el-off'-this-is*) [ῥάχις, spine; μυελός, marrow; φθισις, a wasting]. See *Tabes dorsalis*.

Rhachiomyelos (*ra-ke-ō-mi'-el-os*) [ῥάχις, spine; μυελός, marrow]. See *Spinal Cord*.

Rhachio-paralysis (*ra-ke-o-par-al'-is-is*) [ῥάχις, spine; παράλυσις, paralysis]. Spinal paralysis.

Rhachiophyma (*ra-ke-o-fi'-mah*) [ῥάχις, spine; φῦμα, a growth]. A spinal tumor.

Rhachioplegia (*ra-ke-o-ple'-je-ah*) [ῥάχις, spine; πληγή, stroke]. Spinal paralysis.

Rhachiorrheuma (*ra-ke-or-ru'-mah*) [ῥάχις, spine; ῥεῦμα, a flowing]. Spinal rheumatism.

Rhachioscolioma (*ra-ke-o-sko-le-o'-mah*) [ῥάχις, spine; σκολίωμα, a curve]. Lateral distortion and curvature of the spine.

Rhachioscoliosis (*ra-ke-o-sko-le-o'-sis*) [ῥάχις, spine; σκολιός, σκολίωσις, a curving]. The condition and progress of curvature of the spine.

Rhachiostrophosis (*ra-ke-o-stro-fo'-sis*) [ῥάχις, spine; στροφος, twisted]. Curvature of the spine.

Rhachiotome (*ra'-ke-o-tōm*) [ῥάχις, spine; τομός, cutting]. A cutting instrument used in rhachiotomy.

Rhachiotomy (*ra-ke-ot'-o-me*) [ῥάχις, spine; τομή, a cutting]. An incision into or dissection of the spine.

Rhachipagus (*ra-kip'-a-gus*) [ῥάχις, spine; πάγος, anything fixed]. A double fetal monstrosity in which the twins are joined back to back by any portion of the spinal column.

Rhachis (*ra'-kis*) [ῥάχις]. The spinal column. In biology, (*a*) the main petiole of a compound leaf; (*b*) the axis of inflorescence; (*c*) the shaft of a feather; (*d*) the arched middle area of the dorsal surface of a trilobite.

Rhachischisis (*ra-kis'-kis-is*) [ῥάχις, spine; σχίζειν, to cleave]. A cleft in the vertebral column. Same as *Spina bifida*.

Rhachitæ (*ra-ki'-te*) [ῥαχῖται]. The muscles attached to the vertebral column.

Rhachitic (*ra-kit'-ik*). See *Rachitic*.

Rhachitis. See *Rachitis*.

Rhachitome (*ra'-kit-ōm*). Same as *Rhachiotome*, *q. v.*

Rhachus (*ra'-kus*) [ῥάχος]. A ragged wound.

Rhacoma (*ra-ko'-mah*) [ῥάκος, a rag]. Excoriation, rent, or chapping. Also a pendulous, relaxed condition of the scrotum.

Rhacosis (*ra-ko'-sis*) [ῥάκος, a rag]. The condition of one affected with rhacoma.

Rhacous (*rā'-kus*) [ῥάκος, a rag]. Wrinkled. Lacerated.

Rhæbocrania or **Rhebocrania** (*re-bo-kra'-ne-ah*) [ῥαιβός, crooked; κρανίον, the skull]. The condition of wry-neck.

Rhæboscelia, Rhæbosis (*re-bo-se'-le-ah, re-bo'-sis*) [ῥαιβός, crooked; σκέλος, leg]. Crooked-legged.

Rhæstocythemia (*res-to-si-the′-me-ah*). See *Rhestocythemia.*

Rhagades (*rag′-ad-ēz*) [ῥαγάς: *pl. of Rhagas*]. *Rhagadia;* linear cracks or fissures in the skin, whether due to injury or disease. They are most frequently seen on the palmar and plantar surfaces of the hands and feet, at the angles of the mouth, the anus, and the flexures. They are painful on movement.

Rhagadia (*rag-a′-de-ah*). See *Rhagades.*

Rhagadiolus (*rag-ad-i′-o-lus*) [ῥαγάς, a crack]. A genus of the *Cichoriaceæ.* **R. etulis,** a variety found in southern Europe and which possesses aperient and diuretic properties. **R. hedypnois,** a variety supposed to possess aperient properties.

Rhagas (*ra′-gas*) [ῥαγάς, a rent: *pl., Rhagades*]. Singular of *Rhagades* (seldom used in the singular).

Rhagite (*rag′-īt*) [ῥαγας, a crack]. A hydrous arseniate of bismuth occurring in yellow or yellowish-green crystals.

Rhagon (*rag′-on*) [ῥάξ, a grape]. In biology, a type of sponge-structure characterized by the grape-like arrangement of the spheric chambers. Also called *Dyssycus.* Cf. *Ascon, Leucon, Sycon.*

Rhagonate (*rag′-o-nāt*) [ῥάξ, a grape]. Having the character of a rhagon; rhagose.

Rhagose (*rag′-ōz*) [ῥάξ, a grape]. Racemose; arranged like a bunch of grapes.

Rhamma (*ram′-ah*) [ῥάμμα]. Suture, *q. v.*

Rhamnegin (*ram′-ne-jin*) [ῥάμνος], $C_{12}H_{10}O_5$. A glucosid derived from buckthorn-berries.

Rhamnetin (*ram-ne′-tin*). See *Rhamnin.*

Rhamnin (*ram′-nin*) [ῥάμνος, the buckthorn]. A yellow, neutral, crystalline substance found in buckthorn. It contains *rhamnetin,* a valuable yellow coloring-matter.

Rhamnite (*ram′-nīt*) [ῥάμνος, the buckthorn], $C_6H_{14}O_5$. Pentaoxyhexane. Its aldehyd is rhamnose.

Rhamnocathartin (*ram′-no-kath-art′-in*) [ῥάμνος, buckthorn; καθαρτικός, purging]. A yellow, amorphous, translucent substance; a bitter principle contained in the berries of *Rhamnus cathartica.*

Rhamnose (*ram′-nōz*) [ῥάμνος, the buckthorn], $C_6H_{12}O_5$. *Isodulcite* or *methyl arabinose;* one of the glucoses. It results upon decomposing different glucosids (quercitrin, xanthorhamnin, lesperidin) with dilute H_2SO_4. It forms large, vitreous crystals containing one molecule of water, and melting at 93° C. It reduces alkaline copper solutions, but is not fermented by yeast. See *Carbohydrates, Table of.*

Rhamnotannic Acid, Rhamnotannin (*ram-no-tan′-ik, ram-no-tan′-in*) [ῥάμνος, buckthorn; *tannin,* tannin]. An astringent, amorphous, neutral greenish-yellow mass, probably an impure coloring-matter derived from some variety of *Rhamnus.*

Rhamnoxanthin (*ram-no-zan′-thin*) [ῥάμνος, buckthorn; ξανθός, yellow]. See *Frangulin.*

Rhamnus (*ram′-nus*) [ῥάμνος, buckthorn]. One of a genus of polypetalous shrubs and trees. **R. alaternus,** a plant indigenous to northern Africa and the south of Europe, of which the leaves are astringent and the fruits bitter and purgative. **R. alpinus,** Alpine buckthorn. The fruits and bark are purgative. **R. baccæ,** the berries of *R. catharticus.* **R. californica,** California buckthorn, the bark of which has strong purgative properties. **R. carolinianus,** a shrub or small tree with purple berries, found in the southern United States. **R. cathartica,** or **catharticus,** *common buckthorn; purging thorn; harts-thorn; rain-berry; thornway; thorn;* a shrub indigenous to Europe, Asia, and northern Africa; it is cultivated in the United States. The berries are actively purgative. They are usually given in a syrupy vehicle to counteract their irritant effect. **R. catharticæ fructus,** the berries of *R. cathartica.* **R. crocea,** California mountain holly; an extract of the bark is used in medicine as a mild laxative and tonic. **R. ellipticus,** a species used in medicine as an antisyphilitic. **R. frangula,** dogwood; alder (United States and Br. Ph.). The bark only is official and occurs in thin quills, grayish-brown externally, and rough; internally, smooth and yellowish in color. It is a laxative, but too irritant to prove of much value in medicine. The berries have been used as a cathartic. **R. frangulæ, Extractum,** an aqueous or alcoholic extract of the bark of *R. frangula.* **R. lineatus,** a species indigenous to China. The root is used in medicine and has diuretic properties. **R. lycioides,** a Spanish variety. A decoction of the berries is used as an external application in rheumatic joint-enlargements. **R. pumilus,** dwarf buckthorn; a variety having mild purgative properties, the fruit and bark being used. **R. purshiana,** or **purshianus,** California buckthorn; a small tree which grows in California. The bitter bark constitutes cascara sagrada—official in the Br. Ph. as *Rhamni purshiani cortex.* It contains three resins; tannic, malic, and oxalic acids; a neutral, crystallizable principle, and an essential oil. It is used as a laxative, and is especially valuable in that it exerts a protracted influence upon the gastro-intestinal tract. **R. sanguinea,** or **sanguineus,** used in the treatment of itch; a Spanish variety. **R. saxatilis,** rock buckthorn; the berries and a portion of the bark are said to be purgative. **Rhamni, Succus,** the expressed juice of the fruit of *R. catharticus.* **R. virgatus,** a variety found in Hindostan. The fruit is used as a purgative. **R. wightii,** an Asiatic variety. The bark is akin in its action to cascara sagrada. See *Buckthorn, Cascara sagrada.*

Rhamphoid (*ram′-foid*) [ῥαμφος, a curved beak; εἰδος, like]. Beak-shaped.

Rhamphos (*ram′-fos*) [ῥαμφος, a beak]. A rostrum.

Rhamphotheca (*ram-fo-the′-kah*) [ῥαμφος, a curved beak; θήκη, a sheath]. In biology, the entire horny integument of the beak of a bird. Cf. *dertrotheca, gnathotheca, rhinotheca.*

Rhanter (*rant′-er*) [ῥαντήρ, sprinkle]. The inner canthus, *q. v.*

Rhaphagra (*raf-a′-grah*) [ῥαφή, a seam; ἄγρα, a seizure]. Pain in the cranial sutures.

Rhaphanedon (*raf-an′-ed-on*) [ῥαφανηδόν]. A transverse fracture.

Rhaphania (*raf-a′-ne-ah*) [ῥάφανος, the radish]. Poisoning by the black radish, strawberries, or ergot. **R. marsitica,** pellagra, so named because it was thought to be due to using maize as a food.

Rhaphe (*ra′-fe*). See *Raphe.*

Rhaphides (*ra′-fid-ēz*). See *Raphis.*

Rhaphiostixis (*ra-fe-o-stiks′-is*) [ῥαφίς, a needle; στιξις, a pricking]. Same as *Acupuncture, q. v.*

Rhaphis (*ra′-fis*). See *Raphis.*

Rhaphosymphysis (*ra-fo-sim′-fis-is*) [ῥαφή, a seam; σύμφυσις, a symphysis]. Ossification of a suture.

Rhapontic (*ra-pon′-tik*) [*rhaponticum*]. Rhubarb.

Rhatany (*rat′-an-e*). See *Krameria.*

Rhea (*re′-ah*). Synonym of *Ramie-fiber, q. v.*

Rheadin (*re′-ad-in*). An insoluble crystalline alkaloid of opium.

Rhegma (*reg′-mah*) [ῥῆγμα: *pl., Rhegmata*]. A rent, rupture, or puncture of the walls of a vessel or of the containing membrane of a tissue, as, for example, the coats of the eye, the walls of the peritoneum. Also, the bursting of an abscess.

Rhegmatous (*reg′-mat-us*) [ῥῆγμα, a rent]. In a rent or ruptured condition.

Rheic Acid (*re'-ik*) [*ῥῆον*, rhubarb], $C_{20}H_{16}O_9$. An amorphous red powder. Synonym of *Chrysophanic Acid.*

Rheïn (*re'-in*) [*ῥῆον*, rhubarb]. 1. The precipitate from a tincture of *Rheum palmatum;* it is cathartic, tonic, cholagogue, and antiseptic. Dose 1 to 4 grains. Unof. 2. Same as *Chrysarobin.*

Rheïnic Acid (*re-in'-ik*). See *Acid, Chrysophanic.*

Rhembasmus (*rem-baz'-mus*) [*ῥέμβειν*, to wander]. Mental distraction, or wandering.

Rhenchos (*ren'-kos*) [*ῥέγκειν*, to snore]. Synonym of *Snoring.*

Rheocord (*re'-o-kord'*) [*ῥεῖν*, flow; *χορδή*, a cord]. An instrument serving to graduate the strength of the galvanic current. See *Rheostat.*

Rheometer (*re-om'-et-er*) [*ῥέος*, current; *μέτρον*, a measure]. A device for ascertaining the electromotive force or voltage of a given current. A galvanometer. Also, an instrument for measuring the amount of fluid (*e. g.*, blood) passing through a canal or vessel. See *Stromuhr.*

Rheometric (*re-o-met'-rik*) [*ῥέος*, current; *μέτρον*, measure]. Pertaining to the rheometer.

Rheometry (*re-om'-et-re*) [*ῥέος*, current; *μέτρον*, measure]. The measurement of electric currents; galvanometry.

Rheomotor (*re-o-mo'-tor*) [*ῥεῖν*, to flow; *motor*, a mover]. An apparatus used to generate an electric current.

Rheonone (*re'-o-nōn*) [*ῥέος*, a current]. An instrument constructed by von Fleischl to measure the exact effect of nerve-irritation.

Rheophore (*re'-o-fōr*) [*ῥέος*, current; *φέρειν*, to carry]. Any conducting substance leading from the poles of a galvanic battery, coil, or dynamo. Practically the terminals or electrodes which the patient receiving the current grasps in his hands, or which are applied to his body.

Rheoscope (*re'-o-skōp*) [*ῥέος*, current; *σκοπεῖν*, to examine]. An instrument for demonstrating the existence of an electric current. **R., Physiologic,** or **Rheoscopic Limb,** a moist conductor placed upon a sensitive nerve-muscle preparation.

Rheoscopic (*re-o-skop'-ik*) [*ῥέος*, current; *σκοπεῖν*, to view]. Pertaining to the rheoscope.

Rheostat (*re'-o-stat*) [*ῥέος*, current; *ἱστάναι*, to stand]. An instrument for the measurement or comparison of the resistance of an electric current. When a battery-current of absolute uniformity of electromotive force is required, a rheostat is usually introduced within the circuit in order to effect such uniformity. **R., Water,** a rheostat the resistance of which is obtained by means of a mass of water of fixed dimensions.

Rheostatic (*re-o-stat'-ik*) [*ῥέος*, current; *ἱστάναι*, to stand]. Pertaining to the rheostat.

Rheostatics (*re-o-stat'-iks*) [*ῥέος*, current; *ἱστάναι*, to stand]. The statics of fluids.

Rheotannic Acid (*re-o-tan'-ik*) [*ῥῆον*, rhubarb; *tannin*, tannin], $C_{28}H_{26}O_{14}$. A reddish or yellowish-brown powder obtained from rhubarb.

Rheotome (*re'-o-tōm*) [*ῥέος*, current; *τέμνειν*, to cut]. An instrument for breaking and making the Faradic current.

Rheotrope (*re'-o-trōp*) [*ῥεῖν*, to flow; *τρέπειν*, to turn]. A device for periodically reversing the direction of an electric current.

Rheotropism (*re-ot'-ro-pizm*) [*ῥειν*, to flow; *τρέπειν*, to turn]. In biology, Jönsson's term applied to the effect produced by a current of water upon the direction of plant-growth. The phenomenon is called *positive* rheotropism when the plant grows with the current; *negative* rheotropism when the plant grows against it.

Rhestocythemia, or **Rhæstocythæmia** (*res-to-si-the'-me-ah*) [*ῥαιστός*, destroyed; *κύτος*, cell; *αἷμα*, blood]. A condition related to the presence of the products of degeneration of red blood-corpuscles contained in cells within the liver and spleen and perhaps other organs.

Rhetoranche (*ret-or'-ang-ke*) [*ῥήτωρα*, a public speaker; *ἄγκειν*, to press tight]. Synonym of *Pharyngitis, Follicular.*

Rheum (*re'-um*) [*ῥῆον*, rhubarb]. Rhubarb. The root of *R. officinale,* the Chinese variety being commonly used. It contains several active extractives, and is a popular tonic astringent, and in large doses purgative. **R., Ext.** Dose gr. x–xv. **R., Ext., Fld.** Dose ʒss-ij. **R., Infus.** (B. P.) Dose ℥j–ij. **R., Pil.,** each containing rhubarb gr. iij, soap gr. j. Dose j–iij. **R., Pil., Comp.,** each contains rhubarb gr. ij, aloes gr. jss, myrrh gr. j, oil of peppermint gr. $\frac{1}{10}$. Dose ij–iv. **R., Pulv., Comp.,** rhubarb 25, magnesia 65, ginger 10. Dose ʒj. **R. et sodæ., Mist.,** sod. bicarb. 3.5, fld. ext. rhubarb 1.5, fld. ext. ipecac. 3, glycerin 35, spt. peppermint 3.5, water q.s. ad. 1000 parts. Dose ʒij–℥ij. **R., Syr.,** fld. ext. of rhubarb 100, spt. cinnamon 4, potassium carbonate 10, glycerin 50, water 50, syrup q. s. 1000 parts. Dose ʒj–℥ss. **R., Syr., Aromat.,** arom. tinct. of rhubarb 15, syrup 85. Dose ʒj–℥ss. **R., Tinct.,** rhubarb 12, cardamom 2, dil. alcohol ad 100 parts. Dose ʒj–℥ss. **R., Tinct., Aromat.,** rhubarb 20, cinnamon 4, cloves 4, nutmeg 2, dil. alcohol ad 100 parts. Dose ʒj–iij. **R., Tinct., Dulcis,** rhubarb 8, licorice 4, anise 4, cardamom 1, dil. alcohol ad 100 parts. Dose ℥ss–ij. **R., Vinum,** rhubarb 10, calamus 1 stronger white wine ad 100 parts. Dose ʒj–℥ss.

Rheum (*rūm*) [*ῥεῦμα*, flow]. Any catarrhal discharge, or watery flux; the fluid of such a discharge. [Old.] **R.-salt,** a vulgar term for chronic eczema.

Rheuma (*ru'-mah*). Same as *Rheum.* **R. epidemicum.** Synonym of *Influenza.* **R. ventris.** Synonym of *Dysentery.*

Rheumarthritis (*rūm-arth-ri'-tis*) [*ῥεῦμα*, a flowing; *ἄρθρον*, a joint; *ιτις*, inflammation]. A synonym of *Acute Articular Rheumatism.*

Rheumarthrosis (*ru-mar-thro'-sis*) [*ῥεῦμα*, flow; *ἄρθρον*, a joint]. Rheumatism of the joints.

Rheumatalgia (*ru-mat-al'-je-ah*) [*ῥεῦμα*, flux; *ἄλγος*, pain]. Rheumatic pain.

Rheumatic (*ru-mat'-ik*) [*ῥευματικός*]. Relating to, of the nature of, or affected with, rheumatism. **R. Anesthesia,** anesthesia associated with rheumatism. **R. Apoplexy,** the stupor or coma sometimes present in the course of acute rheumatism. **R. Diathesis,** the condition of body tending to the development of rheumatism. **R. Fever.** Synonym of *Rheumatism.* **R. Gout.** Synonym of *Rheumatoid Arthritis.*

Rheumatism (*rūm'-at-izm*) [*ῥευματισμός*]. *Rheumatic Fever;* a disease characterized by severe, fitful, and shifting lancinating pains in the joints, and in the muscles, with fever, and inflammatory swelling of the affected parts. It may be acute or chronic. Acute rheumatism is a self-limited affection lasting, untreated, for about six weeks. It is characterized by elevation of temperature, acid perspiration, and pain, redness and swelling of various large joints, often with effusion. Inflammation of the serous membranes, particularly of the endocardium, is a common association. There is a great tendency to relapses. The blood contains an excess of fibrin, and is said to contain an excess of lactic acid. To this latter cause, also to cold and to microörganisms, has been ascribed the origin of the affection. Subcutaneous nodules form frequently in connection with the fibrous structures, such as tendons, fasciæ, etc. The disease is most frequent in young persons under twenty-five years of age and in those who show a strong hereditary

tendency. Chronic rheumatism appears rather in middle and late life than in the young. Stiffness, pain and deformity are the most prominent symptoms. **R., Apoplectic,** rheumatism complicated with apoplexy due to cerebral congestion. **R., Articular.** See *Rheumatism.* **R., Blennorrhagic.** See *R., Gonorrheal.* **R., Cerebral,** rheumatism associated with well-marked cerebral symptoms. **R., Diaphragmatic,** rheumatism of the diaphragm. **R., Encephalic.** Synonym of *R., Cerebral.* **R., Epidemic Muscular,** muscular rheumatism occurring in an epidemic form. **R., Gonorrheal,** *Gonorrheal Synovitis; Urethral Rheumatism:* arthritis associated with urethritis. It is probably a metastatic infection and attacks the wrist, ankle, or knee by preference. It is most common in men, and is sometimes attended with endocardial involvement. **R., Gouty.** Synonym of *Rheumatoid Arthritis.* **R. of the Gullet,** a functional condition of the esophagus causing painful deglutition. **R. of the Heart,** an affection of the heart occurring in the course of rheumatism. Also a synonym of *Angina pectoris.* **R., Heberden's,** rheumatism of small joints, with the formation of nodosities. **R., Hemorrhagic,** rheumatism with a tendency to hemorrhage. **R., Infectious,** articular manifestations of a general infection. **R., Muscular,** that form affecting single muscles or groups of muscles. **R., Neuralgic,** muscular rheumatism which is truly a neuralgia of the sensory nerves of a muscle. **R., Nodular.** See *Arthritis deformans.* **R., Periosteal,** a variety of periostitis common in syphilitics. **R., Puerperal,** a variety of rheumatism supposed to originate from some disorder of the urogenital tract in pregnant, lying-in or menstruating women, as does gonorrheal rheumatism. **R.-root.** See *Jeffersonia diphylla.* **R., Scarlatinal,** a rheumatoid affection occurring occasionally in the course of scarlet fever and which may lead to suppurative arthritis. **R., Scorbutic,** an enlargement of the joints in a person suffering from scurvy. **R., Spinal,** a mild form of spinal meningitis. **R. of the Spine.** A synonym of *Spondylitis deformans.* **R. of the Superior Portion of the Spinal Cord.** Synonym of *Tetany.* **R., Synovial,** a rheumatic affection of the synovial membranes usually leading to large serous effusions. **R., Syphilitic.** Synonym of *R., Periosteal.* **R., Urethral.** Synonym of *R., Gonorrheal.* **R. of the Uterus,** a true rheumatism of the uterine muscle, but, according to some authorities, a neuralgia of the uterus. **R., Venereal.** Synonym of *R., Gonorrheal.* **R., Vertebro-meningeal.** Synonym of *R., Spinal.* **R., Visceral,** rheumatism affecting the viscera.

Rheumatismal (*ru-mat-iz'-mal*). Same as *Rheumatic.*

Rheumatismus (*ru-mat-iz'-mus*) [L.]. See *Rheumatism.* **R. calidus.** Synonym of *Acute Articular Rheumatism.* **R. cervicis.** Synonym of *Torticollis.* **R. colli.** Synonym of *Torticollis.* **R. cordis,** rheumatism of the heart. **R. coxæ.** Synonym of *Coxalgia.* **R. dorsi,** rheumatism of the spinal muscles and ligaments. **R. febricosus.** Synonym of *Rheumatic Fever.* **R. febrilis exanthematicus.** Synonym of *Dengue.* **R. flatuosus.** Synonym of *Emphysema.* **R. lumborum muscularis.** Synonym of *Lumbago.* **R. muscularis.** Synonym of *Muscular Rheumatism.* **R. nodosus.** Synonym of *Rheumatoid Arthritis.* **R. odontalgicus.** Synonym of *Odontalgia.* **R. pectoris.** Synonym of *Pleurodynia.*

Rheumatocolica (*rūm'-at-o-kol'-ik-ah*) [ῥεῦμα, a flux; κωλικός, pertaining to the colon]. Rheumatic colic.

Rheumatodynia (*rūm-at-o-din'-e-ah*) [ῥεῦμα, a flux; ὀδύνη, pain]. A dull rheumatic pain.

Rheumatoid (*rūm'-at-oid*) [ῥεῦμα, a flux; εἶδος, resemblance]. Resembling rheumatism. **R. Arthritis,** a disease of the joints characterized by chronic inflammatory and degenerative changes involving the structure of the various articulations and resulting in rigidity and deformity.

Rheumatoidal (*ru-mat-oi'-dal*). Same as *Rheumatoid.*

Rheumatokelis (*ru-mat-o-ke'-lis*) [ῥεῦμα, a flux; κηλίς, a spot]. A term applied by Fuchs to purpura occurring in conjunction with rheumatism.

Rheumatophthisis (*ru-mat-off'-this-is*) [ῥεῦμα, a flux; φθίσις, wasting]. Atrophy the result of rheumatism.

Rheumato-pneumonia (*ru-mat-o-nu-mo'-ne-ah*) [ῥεῦμα, a flux; πνευμονία, pneumonia]. Pneumonia dependent upon rheumatism.

Rheumatopyra (*ru-mat-o-pi'-rah*) [ῥεῦμα, flux; πῦρ, fire]. Rheumatic fever.

Rheumic (*ru'-mik*) [ῥεῦμα, flux]. Allied to rheumatism. A term applied to a diathesis which gives rise to cutaneous eruptions. **R. Acid,** $C_{20}H_{16}O_9$, an acid formed by treating rheotannic acid with dilute acids.

Rheumin (*re-um'-in*). Synonym of *Acid, Chrysophanic.*

Rheumoparotiditis (*ru-mo-par-o-tid-i'-tis*) [ῥεῦμα, a flux; παρωτίς, the parotid gland; ιτις, inflammation]. Rheumatic parotiditis.

Rheumophthalmia (*ru-moff-thal'-me-ah*) [ῥεῦμα, flux; ὀφθαλμία, ophthalmia]. Rheumatic ophthalmia.

Rheumotylus (*ru-mo'-til-us*) [ῥεῦμα, flux; τύλος, a knob]. A callus the result of rheumatism.

Rheumy (*ru'-me*) [ῥεῦμα, flux]. Affected by or causing rheum.

Rheusis (*ru'-sis*) [ῥεῦσις]. A flow. Especially applied to a discharge from the genitals of the female.

Rhexis (*reks'-is*) [ῥῆξις, rupture]. Rupture of any organ.

Rhicnosis (*rik-no'-sis*) [ῥικνός, shriveled]. A wrinkling of the skin, the result of muscular atrophy.

Rhigolene (*rig'-o-lēn*) [ῥῖγος, cold]. A product of petroleum obtained by repeated distillation. It is used as a spray to produce local anesthesia in minor surgical operations, as in the use of the actual cautery. It acts by chilling the part to which it is applied. Unof.

Rhigos (*ri'-gos*) [ῥιχεῖν, to shiver]. Synonym of *Rigor.*

Rhinacanthus (*ri-na-kan'-thus*) [ῥίς, nose; ἄκανθος, a canthus]. The leaves and root of the Asiatic plant, *R. communis,* with properties due to *rhinocanthin,* a substance resembling hydroquinone. It is a local remedy for parasitic skin-diseases. Unof.

Rhinæsthesia (*ri-nes-the'-ze-ah*). See *Rhinesthesia.*

Rhinæus (*ri-ne'-us*) [ῥίς, the nose]. Synonym of *Compressor naris.* See *Muscles, Table of.*

Rhinal (*ri'-nal*) [ῥίς, nose]. Pertaining to the nose.

Rhinalgia (*ri-nal'-je-ah*) [ῥίς (*gen.* ῥινός), nose; ἄλγος, pain]. Pain in the nose.

Rhinanchone (*ri-nan'-ko-ne*) [ῥίς, the nose; ἀγχόνη, strangulation]. Painful constriction of the nasal passages.

Rhinantralgia (*ri-nan-tral'-je-ah*) [ῥίς, the nose; ἄντρον, a cavity; ἄλγος, pain]. Pain in the cavities of the nose.

Rhinarium (*ri-na'-re-um*) [ῥίς, nose: *pl.*, *Rhinaria*] 1. A small nose. 2. In biology, a portion of the front part of the cephalic exoskeleton of certain insects (*Neuroptera, Coleoptera*).

Rhinelcos (*ri-nel'-kos*) [ῥίς, the nose; ἕλκος, an ulcer]. A nasal ulcer.

Rhinencephal (*ri-nen'-sef-al*). Same as *Rhinencephalon.*

inencephalia (*ri-nen-sef-a'-le-ah*) [ῥίς, the nose; ...κεφαλός, the brain]. A monstrosity with an extreme elongation of the nose.

inencephalic (*ri-nen-sef-al'-ik*) [ῥίς, nose; ἐγκέφαλος, brain]. 1. Pertaining to or of the nature of a rhinencephalus. 2. Pertaining to the rhinencephalon.

Rhinencephalon (*ri-nen-sef'-al-on*) [ῥίς, nose; ἐγκέφαλος, brain]. The olfactory lobe or segment of the brain.

Rhinencephalous (*ri-nen-sef'-al-us*) [ῥίς, nose; ἐγκέφαλος, brain]. Same as *Rhinencephalic.*

Rhinencephalus (*ri-nen-sef'-al-us*). See *Rhinocephalus.*

Rhinenchysia (*ri-nen-ki'-ze-ah*) [ῥίς, the nose; ἔγχυσις, pouring in]. Douching of the nasal passages.

Rhinenchyta (*ri-nen'-kit-ah*) [ῥίς, the nose; ἔγχυτος, poured in]. A nasal syringe.

Rhinenchytous (*ri-nen'-kit-us*) [ῥίς, nose; ἔγχυτος, poured in]. Pertaining to nasal injections.

Rhinenchytum (*ri-nen'-kit-um*) [ῥίς, nose; ἐγχεῖν, to pour in]. A liquid used in nasal douching.

Rhinesthesia, Rhinesthesis (*ri-nes-the'-ze-ah, ri-nes'-the-sis*) [ῥίς, nose; αἰσθησις, sensation]. The sense of smell.

Rhineurynter (*ri-nu-rin'-ter*) [ῥίς, nose; εὐρύνειν, to dilate]. An instrument consisting of a bag or sac, to be inflated after insertion into the nostril.

Rhiniatry (*ri-ni'-at-re*) [ῥίς, the nose; ἰατρεί, a medical treatment]. Synonym of *Rhinology.*

Rhinic (*rin'-ik*) [ῥίς, nose]. Pertaining to the nose.

Rhinion (*rin'-e-on*) [ῥινίον, a small nose]. In craniometry, the lower point of the suture between the nasal bones. See *Craniometric Points.*

Rhinismus (*ri-nis'-mus*) [ῥίς, nose]. A nasal quality of voice.

Rhinitis (*ri-ni'-tis*) [ῥίς, the nose; ιτις, inflammation]. Inflammation of the nasal mucous membrane. **R., acute,** acute nasal catarrh; coryza; the so-called "cold in the head." It is marked by chilliness, sneezing, profuse mucous discharge, and a feeling of stuffiness in the nose. **R. caseosa,** a rare affection of the nose characterized by occlusion of the nasal passage, extreme fetor, and the discharge of a gelatinous mass from time to time from the nares and choanæ. This mass is composed of an amorphous substance containing a great number of white corpuscles and fatty cells and crystals of stearin. **R. catarrhalis.** See *Coryza.* **R., Chronic Atrophic,** *ozena;* a chronic inflammation, with subsequent atrophy of the mucous membrane of the nose, accompanied by the formation of dry crusts and by a very offensive odor. This disease is most frequently seen in anemic young women. **R., Chronic Catarrhal.** Synonym of *R., chronic Hypertrophic.* **R., Chronic Hypertrophic,** chronic nasal catarrh, a chronic inflammatory condition of the mucous membrane of the nose, with profuse watery or muco-purulent discharge and an hypertrophied condition of the nasal mucous membrane. It follows repeated acute coryzas. **R., Cirrhotic.** Synonym of *R., Atrophic.* **R., Fetid Atrophic.** See *R., Chronic Atrophic.* **R. Fibrinous,** a rare form of rhinitis, with development of false membrane in the nose. **R., Pruriginous.** Synonym of *Hay-fever.* **R., Pseudo-membranous,** a rhinitis in which an opaque exudate covers the inflamed area. **R., Sclerotic.** See *Ozena.* **R. sicca.** See *Atrophic Catarrh.* **R., Simple,** the stage of rhinitis preceding hypertrophic or atrophic changes. **R. sympathetica,** a term descriptive of reflex neuroses of the nasal passages. **R. ulcerosa.** Synonym of *Ozena.* **R., Vasomotor.** Synonym of *Hay-fever.*

Rhino- (*ri'-no-*) [ῥίς, ῥινός, nose]. A prefix denoting relation to or connection with the nose.

Rhinoblennorrhea (*ri-no-blen-or-e'-ah*) [ῥίς, the nose; βλέννα, mucus; ῥοια, a flowing]. Synonym of *Rhinorrhea.*

Rhinobyon (*ri-no'-be-on*) [ῥίς, nose; βύειν, to stop]. A nasal plug or tampon.

Rhinocace (*ri-nok'-as-e*) [ῥίς, nose; κακος, evil]. Fetid ulceration of the nose.

Rhinocarcinoma (*ri-no-kar-sin-o'-mah*) [ῥίς, the nose; καρκίνωμα, carcinoma]. Nasal carcinoma.

Rhino-catarrhus (*ri-no-kat-ar'-rus*) [ῥίς, the nose; κατάρρος, catarrh]. Synonym of *Coryza.*

Rhinocaul (*ri'-no-kawl'*) [ῥίς, the nose; καυλός, a stalk]. The crus, peduncle, or support of the olfactory bulb.

Rhinocele, Rhinocœle (*ri'-no-sēl*), or **Rhinocœlia** (*ri-no-sē'-le-a*) [ῥίς, nose; κοιλία, hollow]. The hollow, or ventricle, of the rhinencephalon; in man it is very small, or quite obliterated.

Rhinocephalus (*ri-no-sef'-al-us*) [ῥίς, nose; κεφαλή, head]. A cyclocephalic monster, the nose resembling a tube or trunk, the eyes fused in the median line and below the nose.

Rhinocereal (*ri-no-se'-re-al*). Synonym of *Pug-nose.*

Rhinocleisis (*ri-no-kli'-sis*) [ῥίς, nose; κλεῖσις, fastening]. Nasal obstruction.

Rhinocnesmus (*ri-nok-nes'-mus*) [ῥίς, the nose; κνησμός, an itching]. Itching of the nose.

Rhinodacryolithus (*ri-no-dak-re-o-lith'-us*) [ῥίς, the nose; δάκρυον, a tear; λίθος, a stone]. A lacrymal stone in the nasal duct.

Rhinoderma (*ri-no-der'-mah*). Synonym of *Keratosis pilaris.*

Rhinodynia (*ri-no-din'-e-ah*) [ῥίς, nose; ὀδύνη, pain]. Any pain in the nose.

Rhinogramma (*ri-no-gram'-ah*) [ῥίς, nose; γράμμα, a line]. The nasal line.

Rhinolalia (*ri-no-la'-le-ah*) [ῥίς, the nose; λαλιά, speech]. Synonym of *Dyslalia nasalis.* **R. aperta,** naso-palatine dyslalia, the nasal fossa and naso-pharyngeal cavity communicating with the pharynx. **R. clausa,** naso-palatine dyslalia caused by a separation of the nasal fossa or naso-pharyngeal cavity from the pharynx.

Rhino-laryngitis (*ri-no-lar-in-ji'-tis*) [ῥίς, the nose; λαρυγξ, the larynx; ιτις, inflammation]. Simultaneous inflammation of the mucosa of the nose and the larynx.

Rhinolaryngology (*ri-no-lar-in-gol'-o-je*) [ῥίς, nose; λάρυγξ, larynx; λόγος, science]. The science of the anatomy, physiology and pathology of the nose and the larynx.

Rhinolerema (*ri-no-ler'-e-mah*) [ῥίς, the nose; λήρημα, silly talk]. Same as *Rhinoleresis.*

Rhinoleresis (*ri-no-ler-e'-sis*) [ῥίς, nose; λήρησις, folly]. Perverted olfactory sense.

Rhinolethrum (*ri-no-lēth'-rum*) [ῥίς, the nose; ὄλεθρος, destruction]. Destruction of the nose.

Rhinolith (*ri'-no-lith*) [ῥίς, nose; λίθος, stone]. A nasal calculus. Cozzolini makes a distinction between *true rhinoliths,* in which the calcareous deposit becomes formed around a nucleus of mucus or of blood, and *false rhinoliths,* the more common, in which a foreign body, such as a cherry-stone, a bead, or the like, has formed the nucleus. The former are rarely found before the fortieth year of age; the latter may be found at any age, the foreign body often having been inserted in play during childhood.

Rhinolithiasis (*ri-no-lith-i'-as-is*) [ῥίς, nose; λίθος, stone]. The condition and progress of calculus of the nasal fossa.

Rhinologic (*ri-no-loj'-ik*) [ῥίς, nose; λόγος, science]. Pertaining to rhinology.

Rhinologist (*ri-nol'-o-jist*) [ῥίς, nose; λόγος, science]. A specialist in the treatment of nasal diseases.

Rhinology (*ri-nol'-o-je*) [ῥίς, nose; λόγος, science]. The science of the anatomy, functions, and diseases of the nose.

Rhinometer (*ri-nom'-et-er*) [ῥίς, nose; μέτρον, measure]. An instrument for aiding in the diagnosis of obstructive diseases of the naso-pharynx.

Rhinommectome (*ri-nom-mek'-tome*) [ῥίς, the nose; ὄμμα, the eye; ἐκτομή, a cutting out]. Excision of the inner canthus of the eye.

Rhinonecrosis (*ri-no-ne-kro'-sis*) [ῥίς, nose; νέκρωσις, death]. Necrotic disease of the nasal bones.

Rhinopharyngitis (*ri-no-far-in-ji'-tis*) [ῥίς, nose; φαρυγξ, pharynx; ιτις, inflammation]. Inflammation of the nose and pharynx, or of the naso-pharynx.

Rhino-pharynx (*ri-no-far'-ingks*). See *Naso-pharynx*.

Rhinophonia (*ri-no-fo'-ne-ah*) [ῥίς, nose; φωνή, sound]. A nasal tone in speaking.

Rhinophore (*ri'-no-for*) [ῥίς, ῥιν, nose; φέρειν, to bear]. In biology, one of the posterior pair of tentacles of certain molluscs, possibly olfactory in function. Any external olfactory organ.

Rhinophyma (*ri-no-fi'-mah*) [ῥίς, nose; φῦμα, tumor: *pl.*, *Rhinophymata*]. A hypertrophic form of rosacea confined to the nose, perinasal portions of the cheeks and forehead, and the lobes of the ears, and marked by a new growth of vessels and connective tissue and chronically enlarged glands, producing a bulbous and knotted organ. It is usually seen in advanced alcoholism.

Rhinoplastic (*ri-no-plas'-tik*) [ῥίς, nose; πλάσσειν, to mold]. Pertaining to or having the character of rhinoplasty. **R. Operation,** a surgical operation for creating an artificial nose or reconstructing a nose partially destroyed.

Rhinoplasty (*ri'-no-plas-te*) [ῥίς, nose; πλάσσειν, to mold]. A plastic operation upon the nose, to replace lost tissue. **R., English,** Syme's operation, in which flaps are taken from the cheek. **R., German,** v. Graefe's modification of the Tagliacotian rhinoplasty. The entire operation is done at a single sitting. **R. of v. Graefe,** *R., German, q. v.* **R., Heteroplastic,** rhinoplasty in which the tissues are removed from some person other than the one operated upon. **R., Indian,** an operation originating in India, in which the flap is taken from the forehead. **R., Italian.** Synonym of *R., Tagliacotian.* **R., Langenbeck's,** a modification of the Indian method, in which the periosteum is included in the frontal flap. See *Operations, Table of.* **R., Osteoplastic,** rhinoplasty with transplantation of a cartilaginous flap to replace the septum nasi. **R., Periosteal.** See *R., Langenbeck's.* **R. of Post,** a modified Tagliacotian rhinoplasty, in which the flap is taken from the finger of the patient. **R. of Syme,** English rhinoplasty, *q. v.* **R., Tagliacotian,** rhinoplasty as performed by Tagliacozzi. The flap is taken from the skin of the arm. **R. of Wood,** rhinoplasty in which an inverted flap from the upper lip is elongated by detaching the mucous from the cutaneous surface from the root of the flap to its free border. This defect is covered with lateral flaps from the cheeks.

Rhinopolypus (*ri-no-pol'-ip-us*) [ῥίς, nose; πολυπυς, polypus]. Polypus of the nose.

Rhinoptia (*ri-nop'-she-ah*) [ῥίς, the nose; ὀπτός, seen]. Internal strabismus.

Rhinorrhagia (*ri-nor-a'-je-ah*) [ῥίς, nose; ῥηγνῦναι, to burst forth]. Copious hemorrhage from the nose.

Rhinorrhaphy (*ri-nor'-a-fe*) [ῥίς, nose; ῥαφή, suture]. Reduction of the tissue of the nose by section, and by suturing the edges of the wound.

Rhinorrhea (*ri-nor-e'-ah*) [ῥίς, nose; ῥοία, a flow]. A mucous discharge from the nostrils.

Rhinorrheal (*ri-nor-e'-al*) [ῥίς, nose; ῥοία, a flow]. Relating to or of the nature of rhinorrhea.

Rhinoscleroma (*ri-no-skle-ro'-mah*) [ῥίς, nose; σκλήρος, hard; ὄμα, tumor]. A granulation new-growth of almost stony hardness, affecting the anterior nares and adjacent parts. The disease commences in the mucous membrane of the anterior nares and adjoining skin. The lesions consist of flattish, isolated, or coalescent nodules or raised plaques, imbedded in the cutis vera. Their growth is slow, and recurrence takes place if removal is attempted. The cause of the affection is not certainly known, but it is thought by some to be due to a bacillus which is nearly always present.

Rhinoscope (*ri'-no-skōp*) [ῥίς, nose; σκοπεῖν, to observe]. An instrument for examination of the cavities of the nose.

Rhinoscopic (*ri-no-skop'-ik*) [ῥίς, nose; σκοπεῖν, to view]. Pertaining to the rhinoscope, or to rhinoscopy.

Rhinoscopy (*ri-nos'-ko-pe*) [ῥίς, the nose; σκοπεῖν, to observe]. Examination of the nasal fossæ by means of the rhinoscope; that of the anterior nares is termed *anterior rhinoscopy;* that of the posterior nares, *posterior rhinoscopy.*

Rhinosis (*ri-no'-sis*). Synonym of *Rhicnosis.*

Rhinostegnosis (*ri-no-steg-no'-sis*) [ῥίς, nose; στεγνωσις, obstruction]. Nasal obstruction.

Rhinostenose (*ri-nos-te'-nōz*). A synonym of *Rhinitis atrophica.*

Rhinotheca (*ri-no-the'-kah*) [ῥις, nose; θήκη, a sheath: *pl.*, *Rhinothecæ*]. In biology, a portion of the integument of the upper mandible of a bird.

Rhinothecal (*ri-no-the'-kal*) [ῥίς, nose; θήκη, sheath]. Pertaining to the rhinotheca.

Rhinothrix (*ri'-no-thriks*) [ῥίς, nose; θρίξ, hair; *pl.* *Rhinotriches*]. A hair growing in the nostril.

Rhipidium (*ri-pid'-e-um*) [ῥιπιδιον, dim. of ῥιπις, fan: *pl.*, *Rhipidia*]. In biology, Eichler's term for a fan-shaped cymose inflorescence, occurring in monocotyledons, in which the successive branches are in the same plane, each from the back of the preceding. The *Fächel* of Buchenau.

Rhipidura (*rip-id'-u-rah*) [ῥιπίς, a fan; οὐρα, tail]. The posterior pair of pleopoda and the telson, when these parts are developed as in the *Macrura.*

Rhiptasmus (*rip-taz'-mus*) [ῥιπτασμός]. Synonym of *Ballismus.*

Rhis (*ris*) [ῥίς]. Synonym of *Nose.*

Rhizagra (*riz-a'-grah*) [ῥίζα, root; ἀγρα, seizure]. An instrument for extracting the roots of teeth.

Rhizanthous (*ri-zan'-thus*) [ῥίζα, root; ἄνθος, flower]. In biology, flowering from the root.

Rhizantoicous (*ri-zan-toi'-kus*) [ῥίζα, root; ἀντι, opposite; οἶκος, dwelling]. In biology, applied to mosses that bear both organs of reproduction on the same plant, the antheridium on a short branch connected with the archegonium by the rhizome.

Rhizias (*riz'-e-as*) [ῥιζίας]. A medicine made from roots.

Rhizina (*ri-zi'-nah*) [ῥίξα, a root: *pl.*, *Rhizinæ*]. Same as *Rhizoid.*

Rhizine (*ri'-zin*) [ῥίζα, root]. Same as *Rhizoid.*

Rhizinous (*ri-zi'-nus*) [ῥίζα, root]. In biology, having rhizoids.

Rhizo- (*ri'-zo-*) [ῥίζα, a root]. A prefix denoting connection with or relation to a root.

Rhizocarpic (*ri-zo-kar'-pik*) [ῥίξα, root; καρπός, fruit]. In biology, having the stem annual, but the root perennial.

hizocarpous (*ri-zo-kar'-pus*) [ῥίζα, root; καρπός, fruit]. In biology, a term sometimes applied to herbaceous plants whose roots live on from year to year.

hizocaul (*ri'-zo-kawl*) [ῥίζα, root; καυλός, stalk]. In biology, the portion of a polyp by which it is fastened to its support.

hizocephalous (*ri-zo-sef'-al-us*) [ῥίζα, root; κεφαλή, head]. In biology, rooted by the head.

hizodontropy (*ri-zo-don'-tro-pe*) [ῥίζα, root; ὀδούς, tooth; τροπή, turn, pivot]. The pivoting of an artificial crown upon the root of a tooth.

hizodontrypy (*ri-zo-don'-trip-e*) [ῥίζα, root; ὀδούς, tooth; τρύπη, hole]. The surgical puncture of the root of a tooth.

hizogen (*ri'-zo-jen*) [ῥίζα, root; γενής, producing]. A plant parasitic upon the roots of another plant. A part or organ from which roots or root-hairs grow.

hizogenic (*ri-zo-jen'-ik*) [ῥίζα, a root; γενής, producing]. In biology, root-producing. A term applied to the cells in the pericambium, just in front of a xylem ray of a fibro-vascular bundle, and which give origin to root-branches.

hizography (*ri-zog'-ra-fe*) [ῥιζα, root; γράφειν, to write]. A descriptive treatise on the roots of plants.

hizoid (*ri'-zoid*) [ῥίζα, root; εἶδος, form]. In biology, slender, root-like filaments, the organs of attachment in many cryptogams; like a root.

hizoma (*ri-zo'-mah*) [ῥίζωμα: *pl.*, *Rhizomata*]. Same as *Rhizome*.

hizomania (*ri-zo-ma'-ne-ah*) [ῥίζα, a root; μανία, madness]. In biology, an unusual or abnormal development of adventitious roots.

hizomatoid (*ri-zo'-mat-oid*) [ῥίζωμα, a mass of roots; εἶδος, resemblance]. Resembling a rhizome.

hizome (*ri'-zom*) [ῥίζα, root]. In biology, a prostrate or subterranean stem, having roots at its nodes and a bud or shoot at its apex.

hizomorph (*ri'-zo-morf*) [ῥίζα, root; μορφή, form]. In biology, the long, flocculent mycelium of several species of *Agaricus*.

hizomorphoid (*ri-zo-mor'-foid*) [ῥίζα, root; μορφή, form; εἶδος, form]. Having the form of a root.

hizomorphous (*ri-zo-mor'-fus*) [ῥίζα, root; μορφη, form]. In biology, in shape and appearance like a root.

hizonychia (*ri-zo-nik'-e-ah*) [ῥίζα, a root; ὄνυξ, the nail]. The root of the nail.

hizonychial (*ri-zo-nik'-e-al*) [ῥίζα, root: ὄνυξ, nail]. Pertaining to a rhizonychium.

hizonychium (*ri-zo-nik'-e-um*) [ῥίζα, root; ὄνυξ, a claw: *pl.*, *Rhizonichia*]. In biology, the claw-bearing phalanx of a digit.

hizophagous (*ri-zof'-ag-us*) [ῥιζοφάγος, eating roots]. Root-eating.

hizophora (*ri-zof'-or-ah*) [ῥίζα, a root; φορός, a bearing]. Mangrove. In its several varieties it is used medicinally.

hizophore (*ri'-zo-for*) [ῥίζα, a root; φορος, bear]. In *Selaginella* a leafless shoot, which grows downward and from the end of which the true roots originate as soon as it penetrates the ground.

hizophorous (*ri-zof'-or-us*) [ῥίζα, root; φέρειν, to bear]. In biology, root-bearing.

hizophyto-alopecia (*ri-zof-it-o-al-o-pe'-se-ah*) [ῥίζα, a root; φυτόν, a plant; ἀλωπεκία, alopecia]. Synonym of *Trichomycosis circinata*.

hizopod (*ri'-zo-pod*) [ῥίζα, root; πούς, foot]. A member of the *Rhizopoda*, a sub-class of *Protozoa* or animalcules. Locomotion and ingestion of food take place by means of pseudopodia, which at times fuse and form a reticulum.

hizopodium (*ri-zo-po'-de-um*) [ῥίζα, a root; πούς, foot]. In biology, the mycelium of fungi.

Rhizotaxis (*ri-zo-taks'-is*) [ῥίζα, root; τάξις, order]. In biology, the arrangement of roots. Cf. also *Phyllotaxis*.

Rhizotaxy (*ri'-zo-taks-e*). Same as *Rhizotaxis*.

Rhodacne (*rod-ak'-ne*) [ῥόδον, a rose; ἀκνη, acne] Synonym of *Acne rosacea*.

Rhodalose (*ro'-dal-ōz*) [ῥόδον, rose; ἅλς, salt]. Sulphate of cobalt.

Rhodamin (*ro'-dam-in*) [ῥόδον, rose; *amin*]. A violet-red, magnificently fluorescent dyestuff, analogous in constitution to the fluoresceïns.

Rhodanic (*ro-dan'-ik*) [ῥόδον, rose]. Denoting an acid which produces a red salt with persalts of iron. **R. Acid.** See *Acid*.

Rhodelæon, Rhodelæum (*ro-del-e'-on, ro-del-e'-um*) [ῥόδον, a rose; ἔλαιον, oil]. The oil of rose.

Rhodeorrhetin (*ro-de-or-re'-tin*). Synonym of *Convolvulin*.

Rhodic Acid (*ro'-dic*) [ῥόδιος, rosy], RhO_2. A flaky powder; the precipitate of a solution of rhodium sesquioxid by nitric acid.

Rhodinacne (*ro-din-ak'-ne*) [ῥόδον, a rose; ἀκνη, acne]. Synonym of *Acne rosacea*.

Rhodinon (*ro'-din-on*) [ῥόδινον]. Oil of roses.

Rhodiochlorid (*ro-de-o-klo'-rid*) [ῥόδιος, rosy; χλωρος, green]. A double chlorid of rhodium and one of the alkali metals.

Rhodionitrite (*ro-de-o-ni'-trīt*) [ῥόδιος, rosy; *nitrum*, niter]. A combination of rhodium nitrite with the nitrite of some other element or radicle.

Rhodis (*ro'-dis*) [ῥόδιος, rosy]. An ointment or powder made from roses.

Rhodium (*rō'-de-um*) [ῥόδιος, rosy]. A rare metal (symbol, Rh.; at. wt., 103) of the platinum group. Its medicinal qualities are little known. See *Elements, Table of*. **R., Oil of:** (1) a fragrant oil derived from the root-wood of *Convolvulus scoparius* and *C. floridus* of the Canaries; (2) a factitious compound which commercially replaces the preceding for the most part; (3) an oil from *Amyris balsamifera*, a West Indian tree. The foregoing oils are mainly used by veterinarians.

Rhodizite (*ro'-diz-īt*) [ῥοδίζειν, be like a rose]. A rare borate of aluminum and potassium; it occurs in minute isomeric crystals.

Rhodochrosite (*ro-do-kro'-sīt*) [ῥόδον, rose; χρῶσις, a coloring]. Native protocarbonate of manganese, a delicate, rose-red color, occurring in rhombohedral crystals.

Rhododendron (*ro-do-den'-dron*) [ῥοδόδενδρον, the oleander]. A large genus of shrubs of the order ericaceæ and species rhodoreæ. **R. campanulatum,** the bell-flowered rhododendron. The leaves are used as an errhine. **R. chrysanthum,** a variety of Eastern Siberia. The leaves and flowering branches are used in rheumatism and gout. They are stimulant, diaphoretic, and diuretic, and in large doses narcotic. **R. cinnabarinum,** an East Indian variety—poisonous. **R. dahuricum,** Dahurian rhododendron. The leaves are used in gout and rheumatism. **R. maximum,** American great laurel. The leaves are sometimes used in rheumatism and gout. **R. officinale.** Synonym of *R. chrysanthum*. **R. ponticum,** pontic rhododendron of Asia Minor, Armenia, and Spain. It is used in gout and rheumatism. **R., Tinctura,** made by treating 1 part of the leaves of *R. chrysanthum* with 3 parts each of brandy and white wine for two weeks, and filtering.

Rhodomel (*ro'-do-mel*) [ῥόδον, rose; μέλι, honey]. Synonym of *Mel rosæ*. **R. cydoniatum,** a mixture consisting of 7 parts of honey, 30 parts of honey of roses, and 180 parts of quince-seed mucilage.

Rhodomyces (*ro-do-mi'-sēz*) [*ῥόδον*, rose; *μύκης*, a fungus]. A fungus resembling the *Oïdium albicans*. **R. kochii**, a fungus appearing as a delicate pink mold and producing enormous numbers of conidia. It is sometimes found in the gastric juice in pyrosis.

Rhodon (*ro'-don*) [*ῥόδον*]. 1. The rose. 2. The vulva.

Rhodonite (*ro'-do-nīt*) [*ῥόδον*, rose]. Native silicate of manganese. It occurs in masses, and is occasionally found in distinct crystals of a fine rose-red or pinkish hue.

Rhodophan (*ro'-do-fān*) [*ῥόδον*, rose; *φανής*, appearing]. In biology, a red lipochrome pigment found by Kühne and others in the retinal cones of fishes, reptiles, and birds. Cf. *Pigments, Conspectus of.*

Rhodophyl, Rhodophyll (*ro'-do-fil*) [*ῥόδεος*, red; *φύλλον*, a leaf]. A name given by Schütt to the compound pigment of the *Red Algæ*. Cf. *Pigments, Conspectus of.*

Rhodophyllous (*ro-do-fil'-us*) [*ῥόδεος*, red; *φύλλον*, a leaf]. In biology, containing rhodophyl.

Rhodopsin (*ro-dop'-sin*) [*ῥόδον*, rose; *ὤψ*, eye]. Visual purple, a retinal substance the color of which is preserved by darkness, but bleached by daylight; it is found in the outer segment of the rods.

Rhodorrhiza (*ro-dor-ī'-zah*) [*ῥόδον*, a rose; *ῥίζα*, a root]. Synonym of *Convolvulus*.

Rhodosaccharum (*ro-do-sak'-ar-um*) [*ῥόδον*, rose; *σάκχαρον*, sugar]. Synonym of *Syrupus rosarum*.

Rhodospermin (*ro-do-sper'-min*) [*ῥόδον*, rose; *σπέρμα*, seed]. Crystalloids of an albuminous substance found in the *Florideæ*, forming the rhodophyl, or red coloring-matter. Cf. *Pigments, Conspectus of.*

Rhodotannic Acid (*ro-do-tan'-ik*) [*ῥόδον*, rose; *tannin*, tannin], $C_{14}H_6O_7$. A tannin derived from the leaves of *Rhododendron fumigineum*.

Rhodymenia palmata (*ro-di-me'-ne-ah*) [*ῥόδον*, rose; *ὑμήν*, a membrane]. A marine *Alga* (Scotch, *Dulse;* Irish, *Dillesk*), parasitic on littoral *Fuci*, *Laminariæ*, etc. It contains a mucilage which is used in scrofula. Its value is probably dependent upon contained iodin. It is largely used as food in the west of Ireland, also in the Mediterranean regions, where it forms a common ingredient of soups.

Rhœa (*re'-ah*) [*ῥοιά*]. Synonym of *Leukorrhea*.

Rhœadic Acid (*re-ad'-ik*) [*ῥοιάς*, a kind of poppy]. See *Papaveric Acid*.

Rhœadin (*re'-ad-in*) [*ῥοιάς*, a kind of poppy], $C_{21}H_{21}NO_6$. A crystallizable alkaloid obtained from *Papaver rhœas*.

Rhœagenin (*re-aj'-en-in*) [*ῥοιάς*, a kind of poppy], $C_{21}H_{21}NO_6$. A base isomeric with rhœadin found in acidified solutions of rhœadin.

Rhœbdesis (*reb-de'-sis*) [*ῥοίβδησις*]. Absorption; resorption.

Rhœzus (*re'-zus*) [*ῥόϊζος*]. A purring auscultatory sound.

Rhogmos (*rog'-mos*) [*ῥωχμός*]. See *Snoring*.

Rhombo-atloideus (*rom-bo-at-lo-id'-e-us*) [*ῥόμβος*, a rhomb; *ἄτλας*, the atlas]. An anomalous muscle arising from the spinal processes of the lower cervical and upper dorsal vertebræ and having its insertion in the transverse process of the atlas.

Rhombocele, Rhombocœle (*rom'-bo-sēl*) [*ῥόμβος*, rhomb; *κοίλη*, cavity]. Same as *Rhombocœlia*.

Rhombocœlia (*rom-bo-se'-le-ah*) [*ῥόμβος*, rhomb; *κοιλία*, hollow]. The *sinus rhomboidalis;* a dilatation of the cavity of the spinal cord in the sacral region of birds.

Rhombogen (*rom'-bo-jen*) [*ῥόμβος*, rhomb; *γενής*, producing]. In biology, one of the early embryonic stages of a nematode worm; to be distinguished from the *nematogen*.

Rhombohedral (*rom-bo-he'-dral*) [*ῥόμβος*, rhomb *ἕδρα*, base]. Of the shape of a rhombohedron. **R Carbonates**, the isomorphous group of the native carbonates of calcium, magnesium, iron, manganese, zinc, and the intermediate compounds, as the double carbonate of calcium and magnesium, etc.

Rhomboid, Rhomboidal (*rom'-boid, rom-boi'-dal*) [*ῥόμβος*, a rhomb; *εἶδος*, resemblance]. Having a shape similar to that of a rhomb. A quadrilatera with opposite sides equal and parallel, and oblique angles. **R. Fossa**, the fourth ventricle of the brain **R. Impression.** See *Impression.* **R. Ligament** See *Ligament.* **R. Sinus.** See *Rhombocœlia.*

Rhomboideus (*rom-bo-id'-e-us*). See *Muscles, Table of*

Rhoncal (*rong'-kal*) [*ῥόγχος*, a snoring]. Relating to a rhonchus. **R. Fremitus.** See *Fremitus.*

Rhonchial (*rong'-ke-al*). Same as *Rhoncal.*

Rhoncus (*rong'-kus*) [*ῥογχος*, snore]. A rattling o musical sound produced in the throat or bronchia tubes during respiration. Rhonchi may be *sonorou* or *sibilant*, the former being loud, low-pitched, an snoring, and the latter high-pitched and whistling Rhonchi are especially marked during the early stage of acute bronchitis, when the mucous membrane swollen and thickened, but has not begun to secret mucus; also in the spasm of the bronchial tubes i asthma and in the chronic bronchitis of emphysema.

Rhoodes (*roo'-dēz*) [*ῥοώδος*, like a stream]. Of fever associated with fluid discharges.

Rhopal Nich (*ro'-pal-nitch*). See *Antra rhopalaria*

Rhopalismus (*ro-pal-iz'-mus*) [*ῥόπαλον*, club]. Pri pism; also plica polonica.

Rhopalium (*ro-pāl'-e-um*) [*ῥόπαλον*, a club; *pl., Rh palia*]. In biology, the so-called sense-club of a acraspede *Medusa;* a compound sense-organ of whic the auditory organ is the principal factor; it is at t same time a metamorphosed tentacle into which hollow process of the gastric system penetrates.

Rhopalocephalus carcinomatosus (*ro-pal-o-sef' a us kar-sin-o-mat'o-sus*). A name given to a parasit organism found by Korotneff in the cells of carcinoma The formation of pearls is attributed to it. See *Par sites* (*Animal*), *Table of.*

Rhopalosis (*ro-pal-o'-sis*) [*ῥόπαλον*, club]. Plica p lonica.

Rhophesis (*ro-fe'-sis*) [*ῥοφεῖν*, to gulp down]. Si ping; absorption.

Rhophetic (*ro-fet'-ik*) [*ῥοφητικός*]. An absorbe medicine.

Rhosaton (*rō'-zat-on*) [*ῥόσατον*]. A purgative confe tion of roses. Cf. *Actius.*

Rhotacism (*ro'-tas-izm*) [*ῥοτακίζειν*, to use the sound]. 1. The substitution of some other spee sound for that of the letter *r;* more correctly, the frequent or too strong utterance of the *r* sound; use of the *r* sound in place of some other spee sound.

Rhothones (*ro-tho'-nēz*) [*ῥώθωνες*]. The nasal ca ties.

Rhubarb (*ru'-barb*) [*ῥῆον*]. See *Rheum.*

Rhubarbaric Acid, Rhubarbarin (*ru-bar'-bar-ik, r bar'-bar-in*). Synonym of *Acid, Chrysophanic.*

Rhus (*rus*) [*ῥοῦς*, sumac]. In biology, a genus of t order *Anacardiaceæ*, of which the sumachs are the b known. **R. aromatica**, Sweet Sumach; the bark the root is an astringent, acting upon the ureth canal. It is useful in cystitis, incontinence of urin and diabetes. Dose of the fld. ext. ♏xv–xx. **R. coriaria**, Elm-leaved Sumach, the dried lea and fruit are used in dyeing and tanning and cont gallo-tannic acid. The berries are used as a c diment and contain binoxalate of calcium. Th

have been used in the East in cholera. **R. cotinus,** Purple-fringed Sumach, indigenous to Southern Europe. The bark (*cortex cotini*) is used as an antiperiodic. The leaves (*folia cotini*) are used in the form of a gargle in sore-throat. **R.-dermatitis,** a form of inflammation of the skin, the result of poisoning produced by the poison-oak and other species of sumach. **R. diversiloba,** the *hiedra* of California; the poison-oak; a high grade of cutaneous irritation results from contact with it. **R. glabra,** Smooth Sumach, the fruit of *R. glabra.* Its properties are due to tannic acid and potassium and calcium malates. The diluted juice is a pleasant, astringent drink in catarrhal affections of the stomach and bowels. Dose of the fld. ext. ʒj–ij. **R. glab., Ext., Fld.,** a gargle for sore-throat. **R. perniciosa,** a variety which has been used in the treatment of scorpion-bites. **R.-poisoning.** See *Dermatitis venenata.* **R. pumila,** Dwarf Sumach, found in North Carolina. It is probably the most poisonous variety. **R. radicans,** Poison-vine, found in Canada and the United States. The juice of the berries is very poisonous. **R. toxicodendron,** Poison-oak, the fresh leaves of the poison-oak, *R. toxicodendron,* and the poison-ivy, *R. radicans.* Locally applied, it causes swelling and a vesicular eruption upon the skin and mucous membranes. It is recommended in certain affections of the skin, in rheumatism, and locally in erysipelas and eczema. It is a favorite remedy with homeopathic practitioners. An unof. tinct. contains fresh leaves 1, alcohol 2 parts. Dose ♏ x–ij. **R. venenata,** Poison-ash, a highly poisonous shrub found in North America and Japan. **R. venicifera,** Japan lacquer-tree; it is used chiefly in the preparation of varnish, and is highly poisonous.

husin (*ru'-sin*) [ῥοῦς, sumac]. A precipitate from a tincture of the root-bark of Sumach, *Rhus glabra;* it is tonic, astringent, and antiseptic. Dose 1 to 2 grains. Unof.

husma (*rus'-mah*) [Turkish]. A depilatory of orpiment, lime, and water, used to remove superfluous human hair.

hyas (*ri'-as*) [ῥεῖν, to flow]. Synonym of *Discharge.*

hynchanthera (*rin-kan'-ther-ah*) [ῥύγχος, snout; ἀνθηρός, blooming]. A genus of melastomaceous herbs. **R. grandiflora,** a West Indian species; the flowers are used as a sedative expectorant in chronic cough.

hynchodont (*ring'-ko-dont*) [ῥύγχος, snout; ὀδούς, tooth]. In biology, having a toothed beak.

hynchosia (*ring-ko'-ze-ah*) [ῥύγχος, a snout]. A genus of plants of the tribe *Phaseoleæ.* **R. diversifolia,** a variety used as an expectorant in spasmodic cough.

hyostomaturia (*ri-o-sto-mat-u'-re-ah*) [ῥυάς, fluid; στόμα, the mouth; οὖρον, urine]. Excretion of the urinary constituents by the salivary glands.

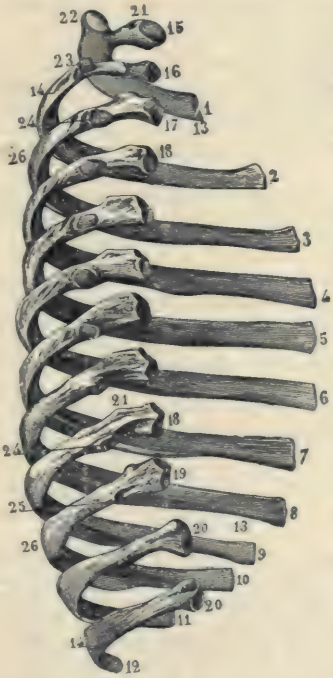
hypia (*rip'-e-ah*). Synonym of *Rupia.*

hypophobia (*ri-po-fo'-be-ah*) [ῥύπος, filth; φοβεῖν, to fear]. A better form of the word *Rupophobia.* A morbid dread of dirt.

hyptic (*ript'-tik*) [ῥυπτικός; ῥύπτειν, to cleanse]. Detergent; cleansing; cathartic.

hypus (*rip'-us*) [ῥύπος]. Dirt; sordes.

hysema (*ri-se'-mah*) [ῥυσημα]. Wrinkle.



hysis- (*ri'-sis-*) [ῥεῖν, to flow]. Synonym of *Discharge.*

hythm (*rithm*) [ῥυθμός]. Action or function recurring at regular intervals or according to some systematic plan or type, as the rhythm of the heart, of respiration, etc.

Rhythmic (*rith'-mik*) [ῥυθμος, rhythm]. Pertaining to or having the quality of rhythm.

Rhytidosis corneæ [ῥυτίς, a wrinkle]. Wrinkling of the cornea.

Rib (*rib*) [ME., *rib,* rib]. 1. In anatomy, a rib is a long, flat, curved bone, with an ectal and an ental broad smooth surface, cephalic rounded border, and a caudal sharp one. Within the greater part of the length of the lower border there exists a groove for the intercostal blood-vessels. The dorsal end is the *head,* and this presents two articular facets (separated by the *intervertebral ridge*) which articulate with corresponding facets of a contiguous pair of vertebræ. Slightly ventral, just beyond a slight constriction, the *neck,* is the *tubercle,* upon which is a facet for articulation with the transverse process of the lower of the two

RIBS OF LEFT SIDE, POSTERIOR ASPECT.
